PLATE II. VARIOUS FORMS OF EPITHELIUM, BASED UPON THE FIGURES AND DESCRIPTIONS OF KLEIN, KÖLLIKER, KRAUSE, PRUDDEN, RANVIER, SCHAEFER, AND WALDEYER, AND UPON PERSONAL OBSERVATION. (Drawn by Mrs. S. H. Gage.)

All the examples are represented as stained with hæmatoxylin and eosin; the basement membrane is the red band on which the cells rest; nuclei of connective-tissue corpuscles are shown as purple spots in the supporting membranes, and in most of the membranes are loops of capillaries in red, and branches of nerve-fibres in purple.

Fig. 1.—Vascular Epithelium or Endothelium: (*A*) Vertical section showing (*a*) the cells in profile with projecting nuclei in the cells cut at the proper level; (*x*) supporting membrane. (*B*) Capillary loop with walls of a single layer of elongated, flattened, nucleated cells. (*C*) Face view of sinuous cells lining a lymphatic capillary. (*D*) Face view of the cells lining one of the larger blood-vessels or lymphatic vessels.

Fig. 2.—Epithelium or Endothelium of Serous Membranes: (*A*) Vertical section showing (*a*) the cells in profile, and (*x*) the supporting membrane. (*B*) Face view of the epithelium, showing the outline and difference in size of the cells with (*b*) true stomates and (*c*) pseudo-stomates.

Fig. 3.—Respiratory Epithelium: (*A*) Vertical section of a lobular bronchiole and an alveolus, showing (*a*, *b*, and *c*) the gradual transition of the cubical, ciliated cells of the lobular bronchiole to the scaly, non-ciliated cells of the alveolus. A capillary is represented as coming nearly in contact with the alveolar cells. (*x*) Supporting membrane. (*B*) Face view of the cells shown in (*A*). Nuclei do not appear in all the alveolar cells.

Fig. 4.—Simple Columnar Epithelium: (*A*) Vertical section showing (*a*) columnar cells with a striated or porous free border at the left, unstriated at the right; (*b*) beaker cell (letter just at the right of the cell); (*c*) basilar or replacement cell; (*x*) supporting membrane, showing at the left unstriated muscular tissue (muscularis mucosæ as seen in the stomach and intestines). (*B*) Cells seen on end, part of them showing pores or ends of the striæ.

Fig. 5.—Glandular Epithelium: (*A*) Longitudinal section of a gastric tubule, showing (*a*) the mouth and neck with columnar and cubical epithelium merging into (*b*) the more rounded or proper glandular epithelium of the base or fundus. (*B*) Transection near the fundus, showing (*a*) the central and (*b*) the parietal cells. (*C*) Section of a racemose or alveolar and a tubular gland, at (*a*) the true glandular part in the form of an alveolus (submaxillary gland), and at (*b*) in the form of a tube (pancreas); (*c*) duct or outlet with first cubical, then columnar, bacillated or striated cells. (Bacillated cells also in parts of urinary tubules.) (*D*) Striated, bacillated, or fibrillated cell, base down.

Fig. 6.—Germinal Epithelium (slightly modified from Waldeyer): (*A*) Profile of the columnar germinal epithelium covering the ovary. At (*b*) the beginning of an ovarian tube; at (*c*) primordial ova between the columnar cells; (*d*) an older egg tube in the ovarian stroma; (*e*) ovarian nest with primordial ova, surrounded by young follicular cells; (*x*) ovarian stroma.

Fig. 7.—Epidermis or Epithelium of the Skin: (*A*) Vertical section of the skin showing (*a*) the stratum corneum; (*b*) the stratum granulosum or eleidine layer; (*c*) stratum mucosum; (*x*) corium. (*B*) (*a′*) Profile and face view of cells of the stratum corneum; (*b′*) enlarged profile view of a cell of the stratum granulosum, showing granules of eleidine; (*c′*) enlarged cells of the stratum mucosum, showing spines or intercellular bridges.

Fig. 8.—Stratified Pavement Epithelium as seen in the Œsophagus: (*A*) Vertical section showing (*a*) profiles of the flattened, nucleated scales or cells on the free surface; (*b*) deeper cells connected by intercellular bridges and somewhat elongated next the basement membrane; (*x*) supporting membrane or corium. (*B*) Face view of some of the flattened surface cells.

Fig. 9.—Transitional Epithelium between the Œsophagus and Stomach: (*a*) Vertical section of the stratified epithelium of the œsophagus; (*b*) vertical section of the columnar epithelium of the stomach; (*x*) supporting membrane.

Fig. 10.—Ciliated Columnar Epithelium: (*A*) Vertical section showing (*a*) the ciliated cells in profile; (*b*) a basilar or replacement cell. There are frequently two or three rows of these, giving the appearance of stratification. (*x*) Supporting membrane. (*B*) Profile of a ciliated cell, showing striæ and a branched base, including a basilar cell between the branches. (*C*) Face or end view of ciliated cells. The cilia shown as dots.

Fig. 11.—Endymal Epithelium: (*A*) Vertical section of the endyma and its epithelium in a child, showing (*a*) profile view of the columnar ciliated cells with delicate processes extending from the base into the underlying neuroglia; (*x*) neuroglia or endyma next the epithelium, showing fibres, granules, and neuroglia cells. (*B*) Same as (*A*), but showing the absence of cilia in the adult.

Fig. 12.—Type of Sensory Epithelium or Neuro-epithelium (Merkel and Ranvier), Sensory Cells, and connecting Nerve Purple; Cuticula (*d*) at Free Border Pink: (*a*) Supporting cell; (*b*) sensory cell connected with a nerve fibril; (*c*) basilar cell; (*n*) nerve-fibre dividing into varicose fibrils which join the sensory cells. [J.]

FOSTER'S MEDICAL DICTIONARY.

CACOTHANASIA (Lat.), n. f. Ka^{2}k(ka^{3}k)-o(o^2)-tha^{2}n(tha^{3}n)-az(a^{3}s)'i^2-a^3. From κακός, bad, and θάνατος, death. Fr., *cacothanasie.* Ger., *Kakothanasie.* A miserable, painful death; as used by Hennemann, the injudicious persistence in the use of therapeutical measures when there is no hope of benefit, thus rendering death more painful. [A, 322.]

CACOTHANATUS (Lat.), adj. Ka^{2}k(ka^{3}k)-o(o^2)-tha^{2}n(tha^{3}n)'-a^{2}t(a^{3}t)-u^{3}s(u^{4}s). Gr., κακοθάνατος. Dying miserably, causing a painful death. [A, 387; L, 41, 119.]

CACOTHELINE, n. Ka^{2}k-o^{2}th'e^{2}l-en. Fr., *cacothéline.* An alkaloid, $C_{42}H_{22}NO_{20}$, obtained by Laurent by the action of nitric acid on brucine. [A, 301, 385; L, 41, 108.]

CACOTHESIS (Lat.), n. f. Ka^{2}k(ka^{3}k)-o^{2}th'e^{2}s-i^{2}s. Gen., *cacothes'eos (-oth'esis).* From κακός, bad, and θέσις, position. An abnormal attitude of a part or of the whole body. [A, 322.]

CACOTHETICUS (Lat.), adj. Ka^{2}k(ka^{3}k)-o(o^2)-the^{2}t'i^{2}k-u^{3}s-(u^{4}s). Pertaining to, causing, caused by, or affected with, cacothesis. [A, 322.]

CACOTHYMIA (Lat.), n. f. Ka^{2}k(ka^{3}k)-o(o^2)-thim(thu^{6}m)'-i^2-a^3. Gr., κακοθυμία (from κακός, evil, and θυμός, the mind). Fr., *cacothymie.* Ger., *Kakothymie.* Moroseness, mental depression with malignity. [A, 322, 387.]

CACOTHYMICUS (Lat.), adj. Ka^{2}k(ka^{3}k)-o(o^2)-thi^{2}m(thu^{6}m)'-i^{2}k-u^{3}s(u^{4}s). Pertaining to, causing, caused by, or affected with, cacothymia. [A, 322.]

CACOTRIBULUS (Lat.), n. m. Ka^{2}k(ka^{3}k)-o(o^2)-tri^{2}b'u^{2}l(u^{4}l)-u^{3}s(u^{4}s). From κακός, evil, and τρίβολος, the *Trapa natans.* Of Cæsalpinius, the *Centaurea calcitrapa.* [A, 387; B, 121; L, 105.]

CACOTRICHIA (Lat.), n. f. Ka^{2}k(ka^{3}k)-o(o^2)-tri^{2}k(tri^{2}ch^2)'i^{2}a^3. From κακός, evil, and θρίξ, the hair. Fr., *cacotrichie.* Ger., *Kakotrichie.* Any disease of the hair. [A, 322.]

CACOTRICHICUS (Lat.), adj. Ka^{2}k(ka^{3}k)-o(o^2)-tri^{2}k(tri^{2}ch^2)'-i^{2}k-u^{3}s(u^{4}s). Pertaining to, causing, caused by, or affected with, cacotrichia. [A, 322.]

CACOTROPHIA (Lat.), n. f. Ka^{2}k(ka^{3}k)-o(o^2)-trof(tro^{2}f)'i^2-a^3. Gr., κακοτροφία (from κακός, bad, and τρέφειν, to nourish). Fr., *cacotrophie.* Ger., *Kakotrophie.* Defective or disordered nutrition. [A, 322; Galen (A, 325).]—**C. folliculorum** [T. Fox]. See Lichen *pilaris.*

CACOTROPHICUS (Lat.), adj. Ka^{2}k(ka^{3}k)-o(o^2)-tro^{2}f'i^{2}k-u^{3}s-(u^{4}s). Pertaining to, causing, caused by, or affected with, cacotrophia. [A, 322.]

CACOTROPHY, n. Ka^{2}k-o^{2}t'ro-fi^2. See Cacotrophia.

CACO-TUMBA, n. An East Indian name for the *Nepeta malabarica.* [B, 121.]

CACOUCHUA, n. The *Polypodium lycopodioides.* [B, 121.]

CACOUCIA (Lat.), n. f. Ka^{2}k(ka^{3}k)-u'si^2(ki^2)-a^3. Fr., *cacoucie.* Of Aublet, a genus of combretaceous plants of the tribe *Combreteæ,* having emetic properties. [A, 385; B, 42.]

CACRI (Bengal.), n. The *Cucumis utilissimus.* [B, 172.]

CACTACEÆ (Lat.), n. f. pl. Ka^{2}k(ka^{3}k)-ta(ta^3)'se^2(ke^2)-e(a^3-e^2). Fr., *cactacées.* See Cacteæ (1st def.).

CACTACEOUS, adj. Ka^{2}k-ta'shu^{3}s. Belonging to or resembling the *Cacteæ.* [B.]

CACTÆ (Lat.), n. f. pl. Ka^{2}k(ka^{3}k)'te(ta^3-e^2). See Cacteæ.

CACTAL, adj. Ka^{2}k'ta^{2}l. Lat., *cactalis.* Of, pertaining to, or resembling, a *Cactus.* [B.]—**C. alliance.** See Cactales.

CACTALES (Lat.), n. f. pl. Ka^{2}k(ka^{3}k)-ta(ta^3)'lez(le^{2}s). The cactal alliance; of Lindley, an alliance of epigynous exogens, comprising the orders *Cactaceæ, Loasaceæ,* and *Homaliaceæ.* [B, 12, 170.]

CACTEÆ (Lat.), n. f. pl. Ka^{2}k(ka^{3}k)'te^2-e(a^3-e^2). Fr., *cactées.* Ger., *Cacteen.* Syn.: *Cactaceæ* [Lindley], *Cacti.* 1. An order of calycifloorous dicotyledons, established by De Candolle, who subdivided it into the tribes *Opuntiaceæ* and *Rhipsalideæ,* to which Reichenbach (who made the *C.* a subdivision of the order *Ribesiaceæ*) added the *Pereskieæ.* Lindley divided it into the tribes *Melocactidæ, Echinocactidæ, Cereidæ, Phyllanthidæ, Rhipsalidæ, Opuntidæ,* and *Pereskidæ;* and Bentham and Hooker made of it two tribes, the *Echinocacteæ* and the *Opuntieæ.* 2. Of Reichenbach (1827), a family of the *Corniculatæ,* comprising the divisions *Nopaleæ* and *Ribesieæ;* or (1837) of the *Sedifloræ,* comprising the divisions *Grossularieæ, Escallonieæ,* and *C. genuinæ,* the latter being the same as the *C.* of De Candolle. [B, 42, 170.]

CACTI (Lat.), n. m. pl. Ka^{2}k(ka^{3}k)'ti(te). 1. Of Jussieu, an order of plants equivalent to the *Grossularieæ* and *Cacteæ* together. See Cacteæ (2d def.). 2. Of De Candolle and Lindley, see Cacteæ (1st def.). [B.]

CACTIER (Fr.), n. Ka^{3}k-ti^2-a. The genus *Cactus.* [B, 173.]

CACTIFLORE (Fr.), adj. Ka^{3}k-ti^2-flor. Having flowers like those of a *Cactus.* [L, 41.]

CACTIFORME (Fr.), adj. Ka^{2}k-ti^2-fo^{2}rm. Resembling a *Cactus.* [L, 41.]

CACTIN, n. Ka^{2}k'ti^{2}n. A red coloring matter obtained by Vogel from the flowers of *Cereus (Cactus) speciosus.* [B, 121.]

CACTINÆ [Link] (Lat.), n. f. pl. Ka^{2}k(ka^{3}k)'ti^{2}n-e(a^3-e^2). See Cacteæ (1st def.).

CACTOIDEÆ (Lat.), n. f. pl. Ka^{2}k(ka^{3}k)-to(to^2)-i^{2}d(ed)'e^2-e-(a^3-e^2). Of Ventenat, the *Cacteæ* (1st def.); of Brongniart, a class of perigynous *Dialypetalæ,* comprising the families *Mesembryanthemeæ* and *Cacteæ* (1st def.). [B.] Cf. Ficoidales.

CACTOS (Lat.), n. m. and f. Ka^{2}k(ka^{3}k)'to^{2}s. See Cactus (1st def.).

CACTUS (Lat.), n. m. and f. Ka^{2}k(ka^{3}k)'tu^{3}s(tu^{4}s). Gr., κάκτος. Fr., *cactier.* Ger., *Fackeldistel.* 1. Of the ancients, the artichoke. 2. A Linnæan genus of plants, corresponding to the whole order *Cacteæ* (1st def.), including species now distributed among various genera of that order. [B, 19, 42, 121.]—**C. cereus.** See Cereus.—**C. coccinillifer, C. cochinillifer.** See Opuntia *cochinillifera.*—**C. divaricatus** [Lamarck]. The *Cereus divaricatus.* [B, 180.]—**C. family.** The *Cacteæ.* [B, 75.]—**C. fimbriatus** [Lamarck]. The *Cereus fimbriatus.* [B, 180.]—**C. flagelliformis** [Linnæus]. The *Cereus flagelliformis.* [B, 180.]—**C. grandiflorus** [Linnæus]. The *Cereus grandiflorus.* [B, 180.]—**C. mammillaria** [Linnæus]. The *Mammillaria simplex.* [B, 180.]—**C. melocactus** [Linnæus]. The *Melocactus communis.* [B, 180.]—**C. moniliformis** [Linnæus]. The *Cereus moniliformis.* [B, 180.]—**C. opuntia** [Linnæus]. The *Opuntia vulgaris.* [B, 81.]—**C. paniculatus** [Lamarck]. The *Cereus paniculatus.* [B, 180.]—**C. pereskia** [Linnæus]. The *Pereskia aculeata.* [B, 180.]—**C. pitajaya** [Jacquin]. The *Cereus variabilis.* [B, 180.]—**C. sepium** [Humboldt, Bonpland, Kunth]. The *Cereus sepium.* [B, 180.]—**C. speciosus.** The *Cereus speciosus.* [B, 121.]—**C. triangularis** [Linnæus], **C. triangularis aphyllus** [Jacquin]. The *Cereus triangularis.* [B, 180.]—**C. triangularis foliosus** [Jacquin]. The *Cereus trigonus.* [B, 180.]—**C. tuna.** The *Opuntia tuna.* [B.]—**Cochineal c.** The *Opuntia cochinillifera* and the *Opuntia tuna.* [B, 275.]—**Common hardy c.** The *Opuntia vulgaris.* [B, 275.]—**Elephant's-tooth c.** The *Mammillaria elephantidens.* [B, 275.]—**Erect c.** The *Mammillaria erecta.* [B, 275.]—**Hardy dwarf-c.** The *Opuntia humilis.* [B, 275.]—**Hedgehog-c.** The *Echinocactus.* [B, 19.]—**Houllett's woolly c.** The *Cereus (Pilocereus) Houlletti.* [B, 275.]—**Leaf-c., Leaf-flowering c.** The genus *Epiphyllum.* [B, 19, 275.]—**Many-headed hedgehog-c.** The *Echinocactus polycephalus.* [B, 275.]—**Melon-c., Melon-thistle c.** The genus *Melocactus.* [B, 19, 275.]—**Mistletoe-c.** The genus *Rhipsalis.* [B, 185.]—**Nipple-c.** The genus *Mammillaria.* [B, 275.]—**Old-man c.** The *Cereus (Pilocereus) senilis.* [B, 275.]—**Pin-pillow c.** The *Opuntia curassavica.* [B, 275.]—**Rat's-tail c.** The *Cereus flagelliformis.* [B, 275.]—**Silvery c.** The *Echinocactus myriostigma.* [B, 275.]—**Simpson's hardy hedgehog-c.** The *Echinocactus Simpsoni.* [B, 275.]—**Turk's-cap c.** The genus *Melocactus.* [B, 275.]—**White-spined hardy c.** The *Opuntia missouriensis,* var. *leucospina.* [B, 275.]—**Winter-c.** The genus *Epiphyllum.* [B, 275.]

CACUBALON, CACUBALUM (Lat.), n's. Ka^{2}k(ka^{3}k)-u^2(u)'-ba^{2}l(ba^{3}l)-o^{2}n, -u^{3}m(u^{4}m). Of Pliny, the *Solanum nigrum,* the *Cucubalus baccifer,* and the *Withania somnifera.* [B, 121.]

CACULE (Ar.), n. Cardamoms. [L, 97.]

CACUMEN (Lat.), n. n. Ka^{2}k(ka^{3}k)-u^2(u)'me^{2}n. Gen., *cacum'inis.* Gr., ἄκρον. In botany, the summit or apex of an organ or a plant; the mass of branches forming the top of a tree. [B, 1, 123.]

CACUR, n. The fruit of *Cucumis myriocarpus.* [Atkinson, "Edinburgh Med. Jour.," July, 1886; "N. Y. Med. Jour.," July 17, 1886, p. 84.]

CACURGIA (Lat.), n. f. Ka^{2}k(ka^{3}k)-u^{5}r(ur)'ji^2(gi^2)-a^3. Gr., κακουργία (from κακουργεῖν, to act badly). Functional disturbance. [A, 322.]

CACYBALON (Lat.), n. n. Ka^{2}s(ka^{3}k)-i^{2}b(u^{6}b)'a^{2}l(a^{3}l)-o^{2}n. See Cacubalon.

CAD, n. See Cade.

CADA (Lat.), n. f. Ka(ka^3)'da^3. See Cade.—**Oleum cadæ.** See *Oil of* cade.

CADABA (Lat.), n. f. Ka^{2}d(ka^{3}d)-a(a^3)'ba^3. Of Forskål, a genus of capparideous plants of the tribe *Cappareæ.* [B, 42, 121.]—**C. farinosa** [Forskål]. A shrub of Arabia and tropical Africa, used

as a purgative and antiseptic. [B, 121, 180.]—**C. indica** [Lamarck]. Syn.: *Cleome fruticosa* [Linnæus]. An East Indian shrub, used as an anthelminthic, purgative, emmenagogue, antisyphilitic, and antiphlogistic. [P. S. Mootooswamy, "Indian Med. Gaz.," Nov., 1886, p. 325; B, 121, 180.]

CADABEÆ (Lat.), n. f. pl. Ka^{2}d(ka^{3}d)-a(a^3)'be^2-e(a^3-e^2). Of Reichenbach, a subdivision of the *Cappareæ*, comprising *Cadaba* and related genera. [B, 170.]

CADAGA SALEH (Tamil), n. The *Rungia repens.* [B, 172.]

CADAGUA-PALA, n. The genus *Wrightia.* [L, 87.]

CADALA (Tamil), n. The *Cicer arietinum.* [B, 172.]

CADAL-AVANACU, n. See CADEL-AVENACU.

CADALE, n. See CADALA.

CADALI, n. Of Ray, the *Osbeckia zeylanica;* according to Adanson, a Malabar name for a species of *Melastoma.* [B, 121.]

CADALIA-PUA (Tamil), n. The *Lagerstrœmia reginæ.* [B, 172.]

CADAM (Bengal.), n. The *Nauclea parvifolia.* [B, 172.]

CADAMONI, n. The fruit of *Carthamus tinctorius.* [B, 119; L, 41.]

CADA-NAKU, n. In Malabar, the *Aloe perfoliata.* [B, 121.]

CADA-PALAVA, CADA-PILAVA (Malay), n's. The *Morinda citrifolia.* [B, 88, 121, 172; L, 105, 119.]

CADAT, n. The *Calamus carva.* [B, 121.]

CADAVANG, n. In Java, the *Gleditschia inermis.* [B, 121.]

CADAVER (Lat.), n. n. Ka^{2}d(ka^{3}d)-a(a^3)'vu^{5}r(we^{2}r). Gen., *cadav'eris.* From *cadere*, to fall. Gr., πτῶμα νεκροῦ. Fr., *cadavre.* Ger., *Leichnam.* It., *cadavere.* Sp., *cadáver.* A corpse. [A, 301, 322.]—**C'alkaloid** (Ger.). See PTOMAINE.

CADAVÉREUX (Fr.), adj. Ka^{3}d-a^3-va-ru^5. See CADAVEROUS.

CADAVERIC, adj. Ka^{2}d-a^{2}v-e^{2}r'i^{2}k. Lat., *cadaverinus.* Fr., *cadavérique.* Ger., *kadaverisch.* Pertaining to a cadaver (*e. g.*, c. rigidity); occurring after death. [D.]

CADAVÉRIN (Fr.), adj. Ka^{3}d-a^3-va-ra^{2}n^2. Parasitic on dead bodies. [L, 109.]

CADAVERINE, n. Ka^{2}d-a^{2}v'e^{2}r-en. Fr., *cadavérine.* Ger., *Cadaverin, Leichenconiin.* A ptomaine of the constitution of pentamethylenediamine, $C_5H_{14}N_2 = H_2N.CH_2.CH_2.CH_2,CH_2,CH_2.NH_2$, isolated from the organs of the human dead body in the later stages of decomposition; a dense, highly refracting liquid of extremely disagreeable odor which, on exposure to the air, crystallizes by the absorption of carbonic acid; perhaps identical with coniine. It resembles ammonia in its local action when injected subcutaneously; it destroys the *Staphylococcus aureus*, but is itself capable of exciting suppuration. [B, 270; Grawitz, "Arch. f. path. Anat. u. Physiol. u. f. klin. Med."; "N. Y. Med. Jour.," Dec. 31, 1887, p. 746.]

CADAVERINUS (Lat.), adj. Ka^{2}d(ka^{3}d)-a^2(a^3)-ve^{2}r(we^{2}r)-i(e)'-nu^{3}s(nu^{4}s). See CADAVERIC.

CADAVERIZATION, n. Ka^{2}d-a^{2}v-e^{2}r-i^2-za'shu^{3}n. Lat., *cadaverisatio.* Fr., *cadavérisation.* The moribund state with algidity, as in the collapse of cholera. [A, 385.]

CADAVEROUS, adj. Ka^{2}d-a^{2}v'e^{2}r-u^{3}s. Lat., *cadaverosus.* Fr., *cadavéreux.* Ger., *cadaverös, leichenartig.* Corpse-like, ghastly.

CADAVRE (Fr.), n. Ka^{3}d-a^{3}vr. See CADAVER.

CADDATI, CADDOU-COULLOU, n's. Malabar names for the *Bauhinia tomentosa.* [B, 121.]

CADE (Fr.), n. Ka^{3}d. A Languedoc name for the *Juniperus oxycedrus* and the *Juniperus communis.* [B, 121, 173.]—**Émulsion d'huile de c.** [Fr. Cod.]. A preparation made by adding a solution of 2 parts of oil of c. in 10 of 90-per-cent. alcohol to 10 of *teinture de bois de Panama*, and making into an emulsion with 78 of distilled water. [B.]—**Glycéré d'huile de c.** A mixture of 1 part of oil of c. and 30 parts of glycerin. [L, 87.]—**Huile de c.** See *Oil of c.*—**Liniment d'huile de c.** [Bazin]. 1. A mixture of 1 part of oil of c. and 2 parts of oil of sweet almonds. 2. A mixture of 4 parts of oil of c. and 30 of mucilage of quince-seeds. [L, 87.]—**Oil of c.** Lat., *oleum cadinum.* Fr., *huile de c.* Ger., *C'öl.* Empyreumatic oil of juniper; a liquid like tar in appearance and properties, obtained by distilling the inner wood of the *Juniperus oxycedrus.* [B, 5.]

CADÉ (Fr.), n. Ka^3-da. See CADE.

CADÉAC (Fr.), n. Ka^{3}d-a-a^{3}k. A place in the department of the Hautes-Pyrénées, France, where there are cold sulphurous and saline springs containing iodine and bromine. [A, 385; B, 270; L, 49.]

CADE-ELEMICH, n. The *Zizyphus œnoplia.* [B, 121.]

CADEJI-INDI, n. The *Laurus malabathrum.* [B, 121.]

CADELARI (Malay), n. The *Achyranthes aspera;* of Adanson, the genus *Achyranthes;* of Moquin, a section of that genus. [B, 121, 172.]

CADEL AVANACU, CADEL-AVENACU (Malay), n's. The *Croton tiglium.* [B, 88, 121, 172; L, 102.]

CADEN, n. The *Phœnix silvestris.* [B, 19, 185.]

CADENACO, n. The *Sanseveria lanuginosa.* [L, 41.]

CADENELLES, n. A Languedoc name for the fruit of *Juniperus oxycedrus.* [B, 173.]

CADETIA [Gaudichaud] (Lat.), n. f. Ka^3-da'shi^2(ti^2)-a^3. Fr., *cadétie.* See DENDROLOBIUM.

CADIA (Lat.), n. f. Ka^{2}d(ka^{3}d)'i^2-a^3. Fr., *cadie.* Of Forskål, a genus of leguminous plants of the tribe *Sophoreæ.* [B, 42, 121.]—**C. arabica** [Räusch.], **C. purpurea** [Forskål]. Syn.: *Spændoncea tamarindifolia* [Desfontaines]. A shrub growing in Arabia, where the leaves are applied to the abdomen to relieve pain. [B, 173.]

CADIAC (Fr.), n. Ka^3-di^2-a^{3}k. See CADÉAC.

CADIEÆ (Lat.), n. f. pl. Ka^{2}d(ka^{3}d)-i(i^2)'e^2-e(a^3-e^2). Fr., *cadiées.* Of Baillon, a series of the *Cæsalpinieæ*, comprising the single genus *Cadia.* [B, 121.]

CADIVUS (Lat.), adj. Ka^{2}d(ka^{3}d)-i(e)'vu^{3}s(wu^{4}s). From *cadere*, to fall. Falling of itself; affected with the falling sickness (epilepsy). [A, 318.]

CADJAN, n. The fruit of *Cajanus indicus.* [B, 173.]

CADJII, CADJU, n's. The *Anacardium occidentale.* [B, 19.]

CADJUCT (Bengal.), n. The *Mucuna pruriens.* [B, 88.]

CADMEÆ (Lat.), n. f. pl. Ka^{2}d(ka^{3}d)'me^2-e(a^3-e^2). From *Cadmus*, one of the genera. A family or division of *Algæ* (*Sphæropleæ* [Meneghini], *Confervaceæ* [Reichenbach]). [B, 170.]

CADMIA (Lat.), n. f. Ka^{2}d(ka^{3}d)-mi(me)'a^3. Gr., καδμεία. Ar., *climia.* Fr., *cadmie.* Ger., *Ofenbruch.* 1. Of Pliny, the impure zinc oxide found in brass-workers' furnaces. [B, 3.] 2. A commercial name for yellow sulphide of cadmium. [B, 81.]—**C. artificialis, C. factitia, C. fornacum.** Fr., *cadmie artificielle* (ou *des fourneaux*). See *C.* (1st def.).—**C. fossilis.** Fr., *cadmie fossile* (ou *naturelle*). A variety of arsenic ore, also calamine. [B, 119, 180.]—**C. lapidosa.** Cobalt. [L, 104, 119.]—**C. metallica, C. nativa.** Arsenic. [B, 180.]

CADMIE (Fr.), n. Ka^{3}d-me. See CADMIA.—**C. des fourneaux.** See CADMIA (1st def.).

CADMIFERUS (Lat.), adj. Ka^{2}d(ka^{3}d)-mi^{2}f'e^{2}r-u^{3}s(u^{4}s). From *cadmium* (*q. v.*), and *ferre*, to bear. Fr., *cadmifère.* Containing cadmium. [L, 42.]

CADMIUM (Lat.), n. n. Ka^{2}d(ka^{3}d)'mi^2-u^{3}m(u^{4}m). From *cadmia*, because usually found, along with zinc oxide, in furnaces in which zinc ores had been roasted. Fr., *cadmium* [Fr. Cod.]. Ger., *Cadmium, Kadmium.* It., Sp., *cadmio* [Sp. Ph.]. A metallic element (symbol, Cd) found, alone or associated with zinc, in various minerals, discovered in 1818 by Hermann and Stromeyer; white, rather soft, malleable, ductile, of a fibrous fracture, readily obtained in crystalline form, melting at from 315° to 320° C., of the sp. gr. of from 8·5 to 8·67 and the atomic weight of 111·6, acting as a bivalent radicle. [B, 3.]—**Adipinsaures C.** (Ger.). See *C. adipate.*—**Azotate de c.** (Fr.). See *C. nitrate.*—**Bromk'** (Ger.), **Bromure de c.** (Fr.). See *C. bromide.*—**Cadmii chloridum.** See *C. chloride.*—**Cadmii iodidi unguentum.** Of C. A. Heinitsch, an ointment of 20 grains of c. iodide, 1 oz. of lard, 10 drops of oil of neroli, and 20 drops of ether. ["Am. Jour. of Pharm.," x, p. 382 (L).] Cf. *Unguentum cadmii iodidi.*—**Cadmii iodidum** [Br. Ph.]. See *C. iodide.*—**Cadmii oxidum.** See *C. oxide.*—**Cadmii sulphas** [U. S. Ph., 1870]. See *C. sulphate.*—**C. adipate.** Ger., *adipinsaures C.* A substance of the composition $Cd.C_6H_8O_4 + 2H_2O$. [B, 2.]—**C. amalgam.** An alloy of c. and mercury. Definite compounds are known of the composition Hg_6Cd_2 and Hg_2Cd. Both are solids, and the latter forms very brittle, heavy, silvery crystals which gradually become harder on standing. [B, 3.]—**C. bromide.** Fr., *bromure de c.* Ger., *C'bromür, Bromc'.* A salt of the composition $CdBr_2$. [B, 16.]—**C. carbonate.** Fr., *carbonate de c.* Ger., *kohlensaures Kadmiumoxyd.* Basic carbonates of c. are known, prepared by precipitating a soluble salt of c. with the carbonate of an alkaline metal; varying in composition according to the temperature and the quantity of the precipitating material. [B, 3.]—**C. chloride.** Lat., *cadmii chloridum.* Fr., *chlorure de c.* Ger., *Chlorc', C'chlorür.* A body occurring as transparent masses of a pearly lustre, $CdCl_2$, or as prismatic efflorescent crystals, $CdCl_2 + 2H_2O$. [B, 3.]—**C. chromate.** Fr., *chromate de c.* Ger., *chromsaures C.* A yellow compound of c. and chromic acid; the so-called c.-yellow. [B.]—**C. cyanide.** Fr., *cyanure de c.* Ger., *Cyanc'.* A compound, $Cd(CN)_2$, formed by the action of potassic cyanide or of hydrocyanic acid on a salt of c. [B.]—**C. ethide, C'ethyl.** Ger., *C'äthyl.* A colorless liquid, $Cd.(C_2H_5)_2$. [B, 3.]—**C. ferricyanide.** Ger., *Ferridcyanc'.* A yellow powder, $Cd_3Fe_2.(C_3N_3)_4$. [B.]—**C. ferrocyanide.** Ger., *Ferrocyanc'.* An amorphous white powder, $Cd_2.Fe.(C_3N_3)_2$. [B.]—**C'gelb** (Ger.). C.-yellow. [B.] See *C. chromate.*—**C. hydrate.** Fr., *hydrate de c.* Ger., *C'hydrat.* See *C. hydroxide.*—**C. hydriodate.** See *C. iodide.*—**C. hydroxide.** A white substance, $Cd(OH)_2$. [B. 3.]—**C. iodide.** Lat., *cadmii iodidum* [Br. Ph.], *c. iodatum, c. ioduratum* [Gr. Ph.]. Fr., *iodure de c.* Ger., *Jodc', C'jodür.* A crystalline compound, CdI_2. [B, 3.]—**C. monoxide.** Fr., *monoxyde de c.* See *C. oxide.*—**C. nitrate.** Fr., *azotate de c.* Ger., *salpetersaures C.* (oder *C'oxyd*). A compound, $Cd(NO_3)_2 + 4H_2O$, forming acicular crystals. [B, 3.]—**C. oxide.** Lat., *cadmii oxidum.* Fr., *oxyde de c.* Ger., *C'oxyd.* A compound, CdO, forming dark-red or dark-blue crystals. [B, 3.]—**C. oxydatum sulphuricum.** See *C. sulphate.*—**C. pentasulphide.** A yellow substance, CdS_5; according to some, only a mixture of c. sulphide and sulphur. [B, 5. 16.]—**C. protoxide.** See *C. oxide.*—**C. suboxide.** A greenish powder, Cd_2O. [B, 16.]—**C'sulfat** (Ger.). See *C. sulphate.*—**C'sulfid** (Ger.). See *C. sulphide.*—**C. sulfuricum.** See *C. sulphate.*—**C. sulpharsenite.** See *C. thioarsenite.*—**C. sulphate.** Lat., *cadmii sulphas* [U. S. Ph., 1870], *sulphas cadmii* [Belg. Ph.], *c. sulfuricum* [Ger. Ph.., 1st ed., Russ. Ph.], *c. oxydatum sulphuricum* [Gr. Ph.]. Fr., *sulfate de c.* [Fr. Cod.]. Ger., *C'sulfat.* A compound forming large efflorescent prismatic crystals, $CdSO_4 + 4H_2O$ or $3CdSO_4 + 8H_2O$, of an astringent taste. readily soluble in water; used topically as an astringent. Other sulphates of c., both basic and normal. are known. [B, 3, 5; E. L. Shurly, "N. Y. Med. Jour.," Sept. 11, 1886, p. 284.]—**C. sulphide.** Fr., *sulfure de c.* Ger., *C'sulfid, Schwefelc'.* A yellow substance, CdS, occurring native in the crystalline form and obtainable artificially. [B, 3.] See also *C. pentasulphide.*—**C. sulphuricum.** See *C. sulphate.*—**C. thioarsenite.** A yellow salt, $Cd_2As_2S_5$. [B, 2.]—**C.-yellow.** Ger., *C'gelb.* See *C. chromate.*—

Kohlensaures C. (Ger.). See *C. carbonate*.—**Salpetersaures C.** (Ger.). See *C. nitrate*.—**Schwefele'** (Ger.). See *C. sulphide*.—**Schwefelsaures C.** (Ger.), **Schwefelsaures C'oxyd** (Ger.), **Sulphas cadmii.** See *C. sulphate*.—**Unguentum cadmii iodidi** [Br. Ph.]. An ointment made of 1 part of c. iodide and 7 parts of simple ointment. [B, 5.] Cf. *Cadmii iodidi unguentum.*

CADOO, n. A Sumatra species of pepper. [L, 41.]

CADOQUE (Fr.), n. Ka^{3}d-ok. The seed of *Cæsalpinia bonduc.* [B, 173.]

CADRAN (Fr.), n. Ka^{3}d-ra^{3}n^2. The *Agaricus cæsareus.* [B, 173.]—**C. astigmatique.** See *Astigmatic* CLOCK-FACE.

CADRE (Fr.), n. Ka^{3}dr. A frame. [A, 300.]—**C. buccal.** See PERISTOME.—**C. du tympan, C. tympanal.** The tympanic ring of the temporal bone, to which the membrana tympani is attached, constituting a separate bone in the fœtus. [A, 301, 385; L, 41.]

CADU, n. The *Lagenaria vulgaris.* [B, 172.]

CADUC (Fr.), adj. Ka^{3}d-u^{6}k. See CADUCOUS.

CADUCA (Lat.), n., f. of adj. *caducus* (*q. v.*). Ka^{2}d(ka^{3}d)-u^2(u)'-ka^3. Fr., *caduque.* See DECIDUA.—**C. crassa** [Mayer]. See DECIDUA *vera.*—**C. Hunteri.** See DECIDUA.

CADUCI (Lat.), n., m. pl. of adj. *caducus* (*q. v.*). Ka^{2}d(ka^{3}d)-u^2-(u)'si(ke). Of Linnæus, an order of plants, comprising *Datura, Triglochin, Epimedium*, etc. [B, 170.]

CADUCIBRANCHIA, CADUCIBRANCHIATA (Lat.), n's n. pl. Ka^{2}d(ka^{3}d)-u^{2}s(uk)-i^2-bra^{2}n^{2}k(bra^{3}n^{2}ch^2)'i^2-a^3, -bra^{2}n^{2}k-(bra^{3}n^{2}ch^2)-i^2-a(a^3)'ta^3. For deriv., see CADUCUS and BRANCHIÆ. Fr., *caducibranches.* A group of the *Amphibia* in which the gills disappear in the adult. [L, 41.]

CADUCIBRANCHIATE, adj. Ka^{2}d-u^{2}s-i^2-bra^{2}n^{2}k'i^2-at. Lat., *caducibranchius, caducibranchiatus.* Fr., *caducibranche.* Shedding the gills, belonging to the *Caducibranchiata.* [L, 147.]

CADUCICHORDATA (Lat.), n. n. pl. Ka^{2}d(ka^{3}d)-u^{2}s(uk)-i^2-ko^{2}rd(ch^{2}o^{2}rd)-a(a^3)'ta^3. For deriv., see CADUCUS and CHORDA. A division of the *Urochordata* in which the caudal notochord is present in the larva only or is never developed at all; divided into the *Simplicia, Composita*, and *Conserta.* [L, 201, 210.]

CADUCIFLORUS (Lat.), adj. Ka^{2}d(ka^{3}d)-u^{2}s(uk)-i^2-flor'u^{3}s-(u^{4}s). From *caducus* (*q. v.*), and *flos*, a flower. Fr., *caduciflore.* Having caducous flowers. [B, 38.]

CADUCITY, n. Ka^{2}d-u^{2}s'i^{2}t-i^2. Lat., *caducitas.* Fr., *caducité.* Ger., *Caducität, Hinfälligkeit.* It., *caducità.* Sp., *caducidad.* 1. The state or property of being caducous. [B, 1.] 2. Senility. [K; L, 44, 80.]

CADUCOUS, adj. Ka^{2}d-u^{2}k'u^{3}s. Gr., πτώσιμος. Lat., *caducus.* Fr., *caduc.* Ger., *hinfällig.* It., Sp., *caduco.* Not persistent; in botany, falling off before other parts (as of the calyx when it falls before or soon after the development of the flower and before the falling of the corolla, or of the stipule when it falls soon after the development of the leaf). [B, 1, 123; L, 41.] Cf. DECIDUOUS and DECIDUATE.

CADUCUS (Lat.), adj. Ka^{2}d(ka^{3}d)-u^2(u)'ku^{3}s(ku^{4}s). From *cadere*, to fall. Ready to fall, tending to fall, caducous (*q. v.*); as a n. (*morbus* understood), the falling sickness (epilepsy). [A, 301, 318, 322, 325.]

CADUMBAH (Malay), n. The *Barringtonia racemosa.* [B, 172.]

CADUQUE (Fr.), n. Ka^{3}d-u^{6}k. See DECIDUA; in the pl., the temporary teeth. [L, 13.]—**C. externe, C. externe utérine.** See DECIDUA *vera.*—**C. intermédiaire.** See DECIDUA *serotina.*—**C. interne.** See DECIDUA *reflexa.*—**C. inter-utéro-placentaire.** See DECIDUA *serotina.*—**C. ovulaire.** See DECIDUA *reflexa.*—**C. pariétale.** See DECIDUA *vera.*—**C. réfléchie.** See DECIDUA *reflexa.*—**C. secondaire, C. sérotine.** See DECIDUA *serotina.*—**C. utérine.** See DECIDUA *vera.*—**C. utéro-placentaire.** See DECIDUA *serotina.*—**C. vraie.** See DECIDUA *vera.*

CADURE, n. In Malabar, the *Aloe vulgaris.* [B, 121.]

CADUS (Lat.), n. m. Ka(ka^3)'du^{3}s(du^{4}s). Gr., κάδος. Heb., *kadad.* Ar., *kadda.* An ancient name for a jar, also for a liquid measure of 12 congii. [Pliny (A, 318); L, 94.]

CAD-WEED, n. Ka^{2}d'wed. The *Heracleum sphondylium.* [B, 275.]

CADYTAS (Lat.), n. m. Ka^{2}d(ka^{3}d)'i^{2}t(u^{6}t)-a^{2}s(a^{3}s). Gr., καδύτας. An ancient name for some unknown parasitic plant. [A, 313, 387.]

CÆCA (Lat.), n., pl. of *cæcum* (*q. v.*). Se'(ka^3'e^2)-ka^3.

CÆCAL, adj. Se'ka^{2}l. Gr., τυφλός. Lat., *cæcus* (1st def.), *cæcalis* (2d def.). Fr., *cæcal.* Ger., *blind* (1st def.), *Blinddarm-* (2d def.). It., *ciecale.* 1. Blind, terminating in a closed extremity. [L, 11.] 2. Pertaining to the cæcum (2d def.). [A, 301.]

CÆCIDÆ (Lat.), n. f. pl. Ses'(ka^3'e^{2}k)-i^{2}d-e(a^3-e^2). A family of the *Rostrifera.* [L, 282.]

CÆCIFORME (Fr.), adj. Sa-si^2-fo^{2}rm. See CÆCAL (1st def.).

CÆCIGENUS (Lat.), adj. Se^{2}s(ka^3-e^{2}k)-i^{2}j(i^{2}g)'e^{2}n-u^{3}s(u^{4}s). From *cæcus*, blind, and *gigni*, to be born. Gr., τυφλογενής. Born blind. [A, 318.]

CÆCILIA (Lat.), n. f. Se(ka^3-e^2)-si^{2}l(ki^{2}l)'i^2-a^3. From *cæcus*, blind. 1. An ancient name for a kind of snake or worm the bite of which was considered dangerous, and to which alexeteric properties were attributed; also for a kind of lettuce. [A, 318, 322, 325; L, 105.] 2. The sole genus of the *Cæciliadæ.* [L, 14.]

CÆCILIADÆ (Lat.), n. f. pl. Se(ka^3-e^2)-si^{2}l(ki^{2}l)-i(i^2)'a^{2}d(a^{3}d)-e(a^3-e^2). Of Owen, a family of the *Ophiomorpha*, comprising the single genus *Cæcilia.* [L, 14.]

CÆCILIÆ (Lat.), n. f. pl. Se(ka^3-e^2)-si^{2}l(ki^{2}l)'i^2-e(a^3-e^2). Of Wagler, an order of reptiles. [L, 121.]

CÆCITAS (Lat.), n. f. Se'(ka^3'e^2)-si^{2}t(ki^{2}t)-a^{2}s(a^{3}s). Gen., *cæcita'tis.* From *cæcus*, blind. Gr., ἀβλεψία, τυφλότης. Fr., *cécité, aveuglement.* Ger., *Blindheit.* It., *cecità.* Sp., *ceguedad, ceguera.* Blindness, congenital or acquired. [F.]—**C. crepuscularis.** Fr., *cécité crepusculaire* (ou *nocturne*, ou *de nuit*). Ger., *Nachtblindheit.* It., *cecità di notte.* Sp., *ceguedad de noche.* See HEMERALOPIA.—**C. diurna.** Fr., *cécité diurne.* Ger., *Tagblindheit.* It., *cecità diurna.* Sp., *ceguedad diurna.* See NYCTALOPIA.—**C. minor.** See AMAUROSIS.—**C. nocturna.** See HEMARALOPIA.

CÆCITIS (Lat.), n. f. Se(ka^3-e^2)-si(ke)'ti^{2}s. Gen., *cæcit'idis.* See TYPHLITIS.

CÆCITUDO (Lat.), n. f. Se^{2}s(ka^3-e^{2}k)-i^{2}t-u^2(u)'do. Gen., *cæcitud'inis.* See CÆCITAS.

CÆCUM (Lat.), n., n. of adj. *cæcus* (*intestinum* or *caput coli* understood). Se'(ka^3'e^2)-ku^{3}m(ku^{4}m). Fr., *cæcum.* Ger., *Blinddarm* (2d def.). It., *cieco.* Sp., *ciego.* 1. Any canal terminating in a closed (blind) extremity. 2. The blind gut, the *caput coli*; the pouch-like initial portion of the large intestine, so called because it is prolonged downward in the form of a cul-de-sac. It is situated in the right iliac fossa, and merges insensibly into the ascending colon. [A, 301; C.]—**Hepatic cæca.** Blind prolongations of the intestine into the arms in the *Asteroidea.* [L, 210.]—**Lateral cæca.** The pyloric cæca of insects. [L, 121.]—**Malpighian cæca.** Cæcal diverticula of the chylific ventricle of certain insects. [L, 11.]—**Nasal c.** A blind pouch lying close under the anterior end of the notochord in the lamprey, opening into the ventral portion of the nasal sac. [L, 200.]—**Oral c.** A blind pouch in the lamprey on the dorsal side of the mouth cavity. [L, 200.]—**Pyloric cæca.** In insects and fishes, blind intestinal diverticula close to the pylorus. [L, 11, 147.]—**Umbilical c., Vitelline c.** In certain birds, a blind tube, the vestige of the communication of the umbilical vesicle with the intestine. [L, 221.]

CÆCUS (Lat.), adj. Se'(ka^3'e^2)-ku^{3}s(ku^{4}s). Gr., τυφλός. Fr., *aveugle, borgne.* Ger., *blind.* It., *cieco.* Sp., *ciego.* Blind, hidden, invisible, having no opening. [F; H.]

CÆLA, n. A Malabar plant. The leaves, pounded with aromatics, are applied to pustules, and their juice, sweetened, is used for gonorrhœa. [L, 105.]

CÆMENTATIO (Lat.), n. f. Se(ka^3-e^2)-me^{2}nt-a(a^3)'shi^2(ti^2)-o. Gen., *cæmentatio'nis.* From *cæmentum*, cement. Ger., *Cämentiren.* Of the older chemists, a process of luting, also one of testing incrusted metals by burning away the incrustation. [A, 325; L, 135.]

CÆMENTUM (Lat.), n. n. Se(ka^3-e^2)-me^{2}nt'u^{3}m(u^{4}m). See CEMENT.

CÆNÆSTHESIS (Lat.), n. f. Se^{2}n(ka^3-e^{2}n)-e^{2}s(a^3-e^{2}s)-the(tha)'-si^{2}s. See CŒNÆSTHESIS.

CÆNOPTERIS (Lat.), n. f. Se^{2}n(ka^3-e^{2}n)-o^{2}p'te^{2}r-i^{2}s. A genus of ferns, referred by Hooker to *Asplenium.* [B, 242.]—**C. myriophylla** [Swartz]. See ASPLENIUM *rhizophyllum.*

CÆNOTUS (Lat.), n. m. Se^{2}n(ka^3-e^{2}n)-o'tu^{3}s(tu^{4}s). Of Nuttall, a section of the genus *Erigeron.* [B, 215.]

CÆOMA (Lat.), n. n. Se(ka^3-e^2)-o'ma^3. Gen., *cæom'atos* (-*tis*). Fr., *cæome, céome.* A genus of *Fungi*, constituting one of the varieties of rust or mildew. [B.]—**C. laricis** [Hartig]. A species found on the needles of *Larix europœa*; together with *C. pinitorquum*, a derivative of *Melampsora tremulæ.* [R. Hartig, "Ctrlbl. f. Bacteriol. u. Parasitenk.," 1887, 9, p. 274 (B).]—**C. pinitorquum** [De Bary]. A species attacking and destroying pine-trees in northern Europe. [B, 61.]

CÆOMACEÆ [Corda], **CÆOMACEI** [Lindley, Bonarden] (Lat.), n's f. pl. and m. pl. Se^{2}n(ka^3-e^{2}n)-o^{2}m-a(a^3)'se^2-e(a^3-e^2), -i(e). A family or suborder of coniomycetous *Fungi*, comprising *Cæoma, Uredo, Æcidium, Ustilago*, etc., having naked, non-septate spores. [B, 19, 170.]

CÆPA, CÆPE, CÆPULLA (Lat.), n's f. Se'(ka^3'e^2)-pa^3, -pe(pe^2), se^{2}p(ka^3-e^{2}p)-u^{3}l(u^{4}l)'la^3. See ALLIUM *cepa.*

CÆREFOLIUM (Lat.), n. n. Se^{2}r(ka^3-e^{2}r)-e^2-fol(fo^{2}l)'i^2-u^{3}m-(u^{4}m). Gr., χαιρέφυλλον. See CHÆREPHYLLUM.

CÆRULEIN, n. Se^{2}r-u^{2}l'e^2-i^{2}n. 1. A coloring matter, $C_{20}H_8O_6$, formed by dehydrating gallein; combined with acid sulphite of sodium, it constitutes the so-called *c.-sodium.* 2. Gladstone's name for azulene. [B, 81, 270.]—**C'schwefelsäure** (Ger.). Indigosulphuric acid. [B, 270.]

CÆRULEUM (Lat.), n. n. Se(ka^3-e^2)-ru^{2}l(ru^{4}l)'e^2-u^{3}m(u^{4}m). 1. A blue color or substance. [A, 318.] 2. A blue pigment consisting essentially of cobaltous stannate and gypsum. [B, 270.]—**C. berolinense, C. borussicum.** Prussian blue. [L, 105.]

CÆRULEUS (Lat.), adj. Se(ka^3-e^2)-ru^{2}l(ru^{4}l)'e^2-u^{3}s(u^{4}s). Sky-blue. [B.]

CÆRULIC ACID, n. Se^{2}r-u^{2}l'i^{2}k. An acid derived from coffee; regarded as a product of oxidation. [B, 81.]

CÆRULIGNONE, n. Se^{2}r-u^{2}l-i^{2}g'non. From *cæruleus* (*q. v.*), and *lignum*, wood. Ger., *Cärulignon.* A substance, $C_{16}H_{16}O_6$ = $C_{12}H_4(CH_3)_4.O_6$, forming dark steel-blue acicular crystals, prepared by the action of potassium dichromate on crude pyroligneous acid. [B, 270.]

CÆRULOSIS (Lat.), n. f. Se^{2}r(ka^3-e^{2}r)-u^{2}l(u^{4}l)-o'si^{2}s. Gen., *cærulo'seos* (-*sis*). See CYANOSIS.

CÆSALPINEÆ (Lat.), n. f. pl. Se^{2}z(ka^3-e^{2}s)-a^{2}l(a^{3}l)-pi^{2}n(pen)'-e^2-e(a^3-e^2). Of R. Brown, a tribe or suborder of leguminous plants; divided by De Candolle into the tribes *Geoffreæ, Cassieæ*, and *Detarieæ.* [B, 170.] See CÆSALPINIEÆ.

CÆSALPINIA (Lat.), n. f. Se^{2}z(ka^3-e^{2}s)-a^{2}l(a^{3}l)-pi^{2}n(pen)'i^2-a^3. Fr., *cæsalpinie, césalpinie.* Ger., *Cäsalpinie.* A Linnæan genus of leguminous trees and climbing shrubs of the suborder *Cæsalpinieæ*, tribe *Eucæsalpinieæ*, comprising ten sections, some of

which, such as *Guilandina*, *Balsamocarpon*, *Libidibia*, and *Cinclidocarpus*, have been regarded as distinct genera. [B, 42.]—**C. arista** [Miller]. See *C. crista*.—**C. axillaris** [De Candolle]. A Malabar species, the bitter seeds of which are emetic in large doses and used in malarial fevers. [B, 180.]—**C. bahamensis** [Lamarck]. A small tree of the Bahamas; said to furnish yellow Brazil-wood (*lignum brasiliense luteum*) and to have a very acrid bark which is used as an epispastic. [B, 180.]—**C. bijuga** [Swartz]. Syn.: *Poinciana bijuga* [Linnæus]. A low Jamaica tree. The red wood is one variety of Brazil-wood. [B, 180.]—**C. bonduc** [Roxburgh]. Fr., *bonduc jaune*. Syn.: *Guilandina bonduc* [Linnæus]. Bonduc; a prickly trailing shrub growing along the sea-coast in most tropical countries. The fruit is a flattened prickly pod containing from one to three very hard yellow seeds (nicker-nuts, Molucca beans, bonduc-seeds), which are very bitter and are used in India as a tonic, antiperiodic, and anthelminthic. They contain an oil (nicker-seed oil) which is employed as an embrocation in paralysis, convulsions, etc. The leaves are used in Cochin-China as a deobstruent and emmenagogue, and the root is held to be a gastric tonic and an astringent. [B, 19, 81, 172, 185; E. Heckel and F. Schlagdenhauffen, "Nouv. remèdes," May 1, 1886, p. 203.]—**C. bonducella** [Roxburgh]. Syn.: *Guilandina bonducella* [Linnæus]. Bonducella; a species resembling *C. bonduc*, but differing in its grayish lead-colored seeds and the geminate prickles on the leaves. The nuts are used like those of *C. bonduc*. [B, 81, 185, 270.]—**C. brasiliensis** [Linnæus]. A tree of the West Indies and, according to some, of South America, said to furnish a variety of Brazil-wood; identified by some with *C. bahamensis*. [B, 173, 180.]—**C. brevifolia** [Bentham]. Syn.: *Balsamocarpon brevifolium*. The *algarrobo* of Chili. The pods become converted into a resinous substance which is astringent and used as a black dye and an ink. [B, 19.]—**B. coriaria** [Willdenow]. Syn.: *Poinciana coriaria* [Jacquin], *Libidibia coriaria*, *arbor brasilia dicta*. The American sumach, divi-divi, dibi-dibi; a tree or tall shrub of the West Indies and South America and cultivated in India. The pods —*fabæ* (seu *siliquæ*) *dibi-dibi* (seu *divi-divi*)—contain a large amount of tannin, and are used in tanning, also as an astringent for piles and prolapse of the anus and as an antiperiodic. [B, 19, 172, 173, 180, 185.]—**C. crista** [Linnæus]. A shrub or small tree of Jamaica, having a reddish-yellow wood which, according to some, is yellow Brazil-wood. The bark is used as an epispastic and as a stimulant to sluggish ulcers. [B, 173, 180.]—**C. digyna.** An East Indian climbing species. The seeds yield an illuminating oil. [B, 19.]—**C. echinata** [Lamarck]. Syn.: *Guilandina echinata* [Sprengel]. A tall tree of Brazil, said to furnish the true Brazil-wood, or Pernambuco-wood (*lignum Fernambuci* [seu *brasiliense rubrum*]), a dark-red astringent wood, used as a coloring material, as a test for acids, and, in Brazil, as a medicine. The bark (*Nacasculo-bark*) is astringent and used in tanning. [B, 19, 173, 180, 185, 270.]—**C. nuga** [Aiton]. Syn.: *Guilandina nuga* [Linnæus]. A shrub of the Moluccas, where the root is used as a diuretic and lithontriptic. [B, 173, 180.]—**C. obliqua** [Vogel]. The *C. echinata*. [B, 42.]—**C. oleosperma** [Roxburgh]. An East Indian species. The seeds yield an illuminating oil. [B, 180.]—**C. paniculata** [Desfontaines]. An East Indian shrub or tree. The bark is used in diabetes and gonorrhœa. [B, 180.]—**C. pectinata** [Cavanilles]. The *C. tinctoria*. [B, 173.]—**C. pipai.** A Brazilian species. The pods (*pipi-pods*) are astringent. [B, 19, 185.]—**C. pulcherrima** [Swartz]. Fr., *fleur de paon* (ou *de Paradis*). Ger., *Pfauenblume*, *Paradiesblume*. Syn.: *Poinciana pulcherrima* [Linnæus]. A small tree indigenous to the East Indies, cultivated in the West Indies and South America. The flowers have been used in chronic pulmonary affections, intermittent fevers, and skin diseases. In large doses they (also the seeds and leaves) are diuretic, purgative, and abortifacient. The pods are astringent and furnish a yellow coloring matter. [B, 173, 180.]—**C. sappan** [Linnæus]. Ger., *schiefblättrige Cäsalpinie*. Hind., *bukkum*. The *sappan*, or *braziletto*, a spiny tree of India. The wood—*sappan-wood*, *bukkum-wood*, or *wukkum-wood*; *lignum sappan* (seu *japanense*); the *brésillet des Indes* of the French—is brownish-red and furnishes a red dye. The root also affords a yellow or orange dye. The seeds are said to be stomachic and emmenagogue. [B, 19, 172, 173, 180, 185.] —**C. sepiaria** [Roxburgh]. The Mysore thorn; a climbing prickly shrub of India, used as a hedge-plant. [B, 172.]—**C. tinctoria** [Dombey]. Syn.: *Coulteria tinctoria* [Kunth]. A South American tree. The red-wood is sometimes used as a coloring agent, and the pods are said to furnish the astringent divi-divi. [B, 121, 173.] Cf. *C. coriaria*.—**C. vesicaria.** Of Linnæus, a species identified by Sprengel with *C. sappan*; of Lamarck, the *C. tinctoria*; of Velloz, the *C. echinata*. [B, 42, 173, 180.]

CÆSALPINIACEÆ (Lat.), n. f. pl. Se^{2}z(ka^3-e^{2}s)-a^{2}l(a^{3}l)-pi^{2}n-(pen)-i^2-a(a^3)'se^2(ke^2)-e(a^3-e^3). See CÆSALPINIEÆ.

CÆSALPINIÆ [A. Richard] (Lat.), n. f. pl. Se^{2}z(ka^3-e^{2}s)-a^{2}l-(a^{3}l)-pi^{2}n(pen)'i^2-e(a^3-e^2). A suborder of the *Leguminosæ*, comprising the tribes *Geoffreæ* and *Cassieæ*. [B, 170.] See CÆSALPINIEÆ.

CÆSALPINIEÆ (Lat.), n. f. pl. Se^{2}z(ka^3-e^{2}s)-a^{2}l(a^{3}l)-pi^{2}n-(pen)-i(i^2)'e^2-e(a^3-e^2). Fr., *césalpiniées*. Of Kunth and succeeding authors, a section, subdivision, or suborder of leguminous plants, comprising the tribes *Sclerolobieæ*, *Eucæsalpinieæ*, *Cassieæ*, *Bauhinieæ*, *Amherstieæ*, *Cynometreæ*, and *Dimorphandreæ*. [B, 42, 170.]

CÆSAR (Lat.), n. m. Se'(ka^3'e^2)-za^{3}r(sa^{3}r). Gen., *Cæs'aris*. Fr., *Césare*. Ger., *Kaiser*. A person brought into the world by the Cæsarean operation. [A, 322.]

CÆSAREAN, adj. Se-za're^2-a^{2}n. Lat., *cæsareus*, *cæsarianus*. Fr., *césarien*. Ger., *kaiserlich*. It., *cesareo*. Sp., *cesáreo*. See *C.* OPERATION.

CÆSAREANIST, n. Se-za're^2-a^{2}n-i^{2}st. An advocate of the Cæsarean operation. [A, 81.]

CÆSARELLÆ (Lat.), n. f. pl. Sez(ka^3-e^{2}s)-a^{2}r(a^{3}r)-e^{2}l'le(la^3-e^2). From *Cæsarea*, one of the genera. Of Reichenbach, a subdivision of the *Oxaleæ*. [B, 170.]

CÆSAREUS (Lat.), adj. Sez(ka^3-e^{2}s)-a(a^3)'re^2-u^{3}s(u^{4}s). See CÆSAREAN.

CÆSARIAN, adj. Se-za'ri^2-a^{2}n. See CÆSAREAN.

CÆSARIATUS (Lat.), adj. Sez(ka^3-e^{2}s)-a(a^3)-ri^2-a(a^3)'tu^{3}s(tu^{4}s). From *cæsaries* (*q. v.*). Having long or bushy hair. [A, 318.]

CÆSARIES (Lat.), n. f. Sez(ka^3-e^{2}s)-a(a^3)'ri^2-ez(as). Gen., *cæsari'ei*. Ger., *Haupthaar*. The hair of the head, especially a dark head of hair. [A, 318, 322; G; L, 81.]

CÆSARINUS (Lat.), adj. Se^{2}z(ka^3-e^{2}s)-a^{2}r(a^{3}r)-i(e)'nu^{3}s(nu^{4}s). See CÆSAREAN.

CÆSIOUS, adj. Se'zi^2-u^{3}s. See CÆSIUS.

CÆSIUM (Lat.), n. n. Se'(ka^3'e^2)-zi^2(si^2)-u^{3}m(u^{4}m). From *cæsius*, sky-blue, because of the bright-blue light of its vapor when it is heated to incandescence. Fr., *cæsium*, *césium*. Ger., *Cäsium*. A metallic element (symbol, Cs) discovered by Bunsen in 1860. It usually occurs in conjunction with rubidium in various minerals, but always in minute amount. It is univalent, and forms compounds analogous to those of potassium and rubidium and isomorphous with them. Combining weight, 132·5. [B, 3.]

CÆSIUS (Lat.), adj. Se'(ka^3'e^2)-zi^2(si^2)-u^{3}s(u^{4}s). Light-blue, grayish-blue, lavender-colored; as a n., an old name for glaucoma. [B, 19, 123; F.]

CÆSO (Lat.), n. m. Se'(ka^3'e^2)-zo(so). Gen., *Cæson'is*. See CÆSAR.

CÆSPES (Lat.), n. m. Se^{2}s'(ka^3'e^{2}s)-pez(pe^{2}s). Gen., *cæs'pitis*. Fr., *gazon*. Ger., *Rasen*. A tuft; in botany, an agglomeration of leaves or branches springing from a common base and forming a dense, bushy mass. [B.]

CÆSPITOSE, CÆSPITOUS, adj's. Se^{2}s'pi^{2}t-os, -u^{3}s. Lat., *cæspitosus*. Ger., *rasig*, *rasenartig*, *rasenförmig*. Tufted, forming or resembling a cæspes. [B, 123.]

CÆSULIEÆ (Lat.), n. f. pl. Se^{2}z(ka^3-e^{2}s)-u^{2}l(ul)-i(i^2)'e^2-e(a^3-e^2). Fr., *cæsuliées*. Of De Candolle, Endlicher, and Reichenbach, a division of the *Inuleæ*, comprising the single genus *Cæsulia*. [B, 170.]

CÆSULINEÆ (Lat.), n. f. pl. Se^{2}z(ka^3-e^{2}s)-u^{2}l(ul)-i^{2}n'e^2-e(a^3-e^2). See CÆSULIEÆ.

CAF, CAFA, n's. Old names for camphor. [Ruland, Johnson (A, 325).]

CAFAL (Ar.), n. The *Agrimonia eupatoria*. [B, 88, 121.]

CAFAR, n. See CAF.

CAFARD (Fr.), n. Ka^3-fa^{3}r. The *Blatta orientalis*. [B, 81.]

CAFÉ (Fr.), n. Ka^3-fa. Coffee. [B.]—**C. à la Sultane.** Coffee prepared from the entire fruit of the plant (seeds and pulp). [B, 173.]—**C. au lait.** Coffee with milk.—**C. bâtard.** See *C. marron*.—**C. Bourbon.** The *Coffea borbonica*. [B, 173.]—**C. citrin.** An infusion of unroasted coffee; so called from its yellowish color. It has been used as an antiperiodic. [A, 301, 385; L, 107.]—**C. décortiqué.** Coffee-seed from which the testa has been removed. [B, 121.]—**C. de gland.** See ACORN *coffee*.—**C. des bois.** In Guadeloupe, the *Ixora americana*. [B, 121.]—**C. de Soudan.** See COLA.—**C. diable.** In French Guiana, the *Irancana guianensis*. [B, 121.]—**C. du Soudan.** See COLA.—**C. en cerises.** Coffee-seed still surrounded with the testa and the pulp of the fruit. [B, 121.] —**C. en porche.** Coffee-seed from which the testa has not been removed. [B, 121.]—**C. français.** A common term for various substitutes for coffee, especially the seeds of *Astragalus creticus*, *Cicer arietinum*, *Arachis hypogœa*, *Galium aparine*, and barley. [A, 301; B, 19, 173.]—**C. marron.** In the Isle of Bourbon, the *Coffea mauritiana*; in Martinique, the *Coffea occidentalis*. [B, 19, 88, 121, 173.]—**C. Moka.** Mocha coffee. [B, 173.]—**C. turc.** The *Lupinus angustifolius*. [B, 121.]—**Fleurs de c.** The envelopes of the coffee-seed. [A, 301.]

CAFÉANIQUE (Fr.), adj. Ka^3-fa-a^{3}n-ek. See CAFFEANIC ACID.

CAFÉATE (Fr.), n. Ka^3-fa-a^{3}t. See CAFFEATE.

CAFÉIDINE (Fr.), n. Ka^3-fa-i^{2}d-en. See CAFFEIDINE.

CAFÉIER (Fr.), n. Ka^3-fa-i^2-a. The coffee-tree (*Coffea*). [B, 121.]—**C. d'Arabie.** The *Coffea arabica*. [B, 121.]

CAFÉIFORME (Fr.), adj. Ka^3-fa-i^2-form. Resembling an infusion of coffee. [L, 41.]

CAFEINA [Fr. Cod.] (Lat.), n. f. Ka^{2}f(ka^{3}f)-e^2-i(e)'na^3. See CAFFEINE.

CAFÉINE (Fr.), n. Ka^3-fa-en. See CAFFEINE.—**Chlorhydrate de c.** See CAFFEINE *hydrochloride*.

CAFÉINIQUE (Fr.), adj. Ka^3-fa-i^{2}n-ek. Pertaining to coffee. [A, 385.] See CAFFEIC ACID.

CAFÉIQUE (Fr.), adj. Ka^3-fa-ek. Derived from coffee; in pathology, caused by the abuse of coffee; as a n., a person affected with *caféisme* (*q. v.*). ["N. Y. Med. Jour.," Feb. 18, 1888, p. 187.]—**Acide c.** See CAFFEIC ACID.

CAFÉISME (Fr.), n. Ka^3-fa-ezm. Chronic poisoning with coffee; characterized, according to Guelliot, by anæmia, emaciation, insomnia or disturbed sleep, obstinate neuralgias, and, in men, diminution or abolition of the sexual desire. [Guelliot, "Rev. gén. de clin. et de thérap.," Dec. 15, 1887; "N. Y. Med. Jour.," Feb. 18, 1888, p. 187.]

CAFEL (Ar.), n. See CAFAL.

CAFÉONE (Fr.), n. Ka^3-fa-on. See CAFFEONE.

CAFÉTANNATE (Fr.), n. Ka^3-fa-ta^{3}n-a^{3}t. A salt of caffeotannic acid. [L, 41.]

CAFÉTANNIQUE (Fr.), adj. Ka^3-fa-ta^{3}n-ek. See CAFFEOTANNIC ACID.

CAFFEA [U. S. Ph., 1870] (Lat.), n. f. Ka^{2}f(ka^{3}f)'fe^2-a^3. The seed of *Coffea arabica*. [B, 81.]—**Semen caffeæ.** See *C.*

CAFFEANIC ACID, n. Ka^{2}f-e^2-a^{2}n'i^{2}k. Fr., *acide caféanique.* An acid obtained from coffee, regarded as an oxidation product of caffeotannic acid. [B, 10, 81.]

CAFFEATE, n. Ka^{2}f'e^2-at. Fr., *caféate.* Ger., *caffeesaures Salz.* A salt of caffeic acid.

CAFFEE (Ger.), n. Ka^{3}f'fa. Coffee. [B.]—**C'baum.** See Coffea.—**C'gerbsäure.** See Caffeotannic acid.—**C'säure.** See Caffeic acid.—**C'saures Salz.** See Caffeate.—**C'surrogat.** A substitute for coffee.—**Eichelc'.** See Acorn *coffee.*

CAFFEELIC ACID, n. Ka^{2}f-e^2-e^{2}l'i^{2}k. An acid derived from coffee; thought to be a product of oxidation. [B, 81.]

CAFFEIA (Lat.), n. f. Ka^{2}f(ka^{3}f)-fe(fe^2)'i^2-a^3. See Caffeine.

CAFFEIC ACID, n. Ka^{2}f-e'i^{2}k. Lat., *acidum caffeicum.* Fr., *acide caféique.* Ger., *Caffeesäure.* 1. Of Vlaanderen and Muldar, caffeotannic acid. 2. Of Hlasiwitz, a product, $C_9H_8O_{11}$, occurring as straw-colored crystals, formed by boiling caffeotannic acid with potash and neutralizing with sulphuric acid. [B, 81.]

CAFFEIDINE, n. Ka^{2}f-e'i^{2}d-en. Lat., *caffeidina.* Fr., *caféidine.* Ger., *Coffeïdin.* A non-crystallizable alkaloid, $C_7H_{12}N_4O$, an oily liquid, readily soluble in water, obtained among other products by decomposing caffeine with potash or baryta. Its sulphate and hydrochloride and a compound with ethyl are known. [B, 3, 81, 270.]

CAFFEILIC ACID, n. Ka^{2}f-e^2-i^{2}l'i^{2}k. An acid obtained from coffee; regarded as an oxidation product of caffeotannic acid. [B, 10.]

CAFFEINE, n. Ka^{2}f'e^2-en. Lat., *caffeina* [U. S. Ph., Br. Ph.], *coffeina* [Dan. Ph., Swed. Ph.], *coffeinum* [Ger. Ph., Austr. Ph., Swiss Ph., Gr. Ph., Hung. Ph., Russ. Ph., Netherl. Ph.], *caffeia.* Fr., *caféine* [Fr. Cod.]. Ger., *Coffeïn, Koffeïn.* It., *caffeina.* Sp., *cafeina* [Sp. Ph.]. Syn.: *theine* [Austr. Ph., Ger. Ph., Swiss Ph., Russ. Ph., Swed. Ph., Hung. Ph., Fr. Cod.], *methyltheobromine* [Fr. Cod.]; for purposes of dispensing, *guaranine* [Ger. Ph., Russ. Ph.], *theobromine* [Ger. Ph.]. An alkaloid, $C_8H_{10}N_4O_2 + H_2O$, found in coffee, tea, maté, cola-nuts, and guarana; forming colorless or white, silky, acicular or prismatic crystals, odorless, of a faint bitter taste, sparingly soluble in water, somewhat more soluble in cold alcohol. Physiologically, it retards tissue-metamorphosis, contracts the blood-vessels, and heightens the reflex activity of the spinal cord; used in the treatment of poisoning with alcohol and opium, in paralytic migraine, and as an antispasmodic, diuretic, antiperiodic, and gastro-intestinal stimulant. [B, 81, 95.]—**C. acetate.** Fr., *acétate de caféine.* Ger., *essigsaures Koffeïn.* A salt, $C_8H_{10}N_4O_2(C_2H_4O_2)_2$, or, according to Tanret, only a mechanical mixture, of c. and acetic acid, forming acicular crystals. ["Jour. de pharm."; "Drug. Circ. and Chem. Gaz.," Oct., 1882, p. 156 (B).]—**C. and sodium benzoate.** Fr., *benzoate de caféine et de soude* (ou *sodium*). Ger., *coffeïnbenzoësaures Natron.* A double salt of benzoic acid with c. and sodium. It contains 48·5 per cent. of c., and dissolves in 5 parts of water. [Tanret (B, 270).]—**C. and sodium cinnamate.** Fr., *cinnamate de caféine et de soude* (ou *sodium*). Ger., *coffeïnzimmtsaures Natron.* A double salt of cinnamic acid with c. and sodium. It contains 58·9 per cent. of c., and dissolves in 5 parts of water. [Tanret (B, 270).]—**C. and sodium salicylate.** Fr., *salicylate de caféine et de soude* (ou *sodium*). Ger., *coffeïnsaticylsaures Natron.* A double salt of salicylic acid with c. and sodium. It contains 61 per cent. of c., and dissolves in from 3 to 4 parts of water. [Tanret (B, 270).]—**C. arsenate.** Fr., *arséniate de caféine.* Ger., *arsensaures Coffeïn.* A salt of c. and arsenic acid; used as an antiperiodic. [B, 5.]—**C. citrate.** Lat., *caffeinæ citras* [Br. Ph.], *coffeinum citricum* [Gr. Ph.]. Fr., *citrate de caféine.* Ger., *Coffeïncitrat, citronensaures Coffeïn.* It., *citrato di caffeina.* Sp., *citrato caféico* [Sp. Ph.] (ó *de cafeina*). A mixture (not a true salt) of c. and citric acid; used, especially in the form of effervescent granules, as a remedy for migraine. [B, 3; 14, 95.]—**C. hydrochlorate, C. hydrochloride.** Fr., *chlorhydrate de caféine.* Ger., *salzsaures Coffeïn.* A compound, $C_8H_{10}N_4O_2.HCl + 2H_2O$, forming rhombic prisms. [B, 3.]—**C. hydroxyl.** Fr., *hydroxyle de caféine.* A compound analogous to ethoxycaffeine (*q. v.*). [C. Paul, "Progr. méd.," Apr. 24, 1886, p. 363.]—**C. lactate.** Fr., *lactate de caféine.* Ger., *milchsaures Coffeïn.* A mixture (not a true chemical compound) of c. and lactic acid. [Tanret, "Jour. de pharm."; "Drug. Circ. and Chem. Gaz.," Oct., 1882, p. 156 (B).]—**C. nitrate.** Fr., *azotate de caféine.* Ger., *salpetersaures Coffeïn.* A crystalline compound, $C_8H_{10}N_4O_2.HNO_3 + H_2O$. [Biedermann, "Chem. Ztg.," 1883, 30; "Ann. di chim. appl.," Aug., 1883 (B).]—**C. platinichloride.** Small yellow crystals, $(C_8H_{10}N_4O_2.HCl)_2PtCl_4$. [B, 3.]—**C. sulphate.** Fr., *sulfate de caféine.* Ger., *Coffeïnsulfat, schwefelsaures Coffeïn.* Glistening acicular crystals, $C_8H_{10}N_4O_2.H_2SO_4$. [B, 3.]—**C. valerianate.** Lat., *caffeinæ valerianas, coffeinum valerianicum.* Fr., *valérianate de caféine.* Ger., *Coffeïnvalerianat, baldriansaures Coffeïn.* A mixture (not a true salt) of c. and valerianic acid; said to be useful in hysterical vomiting and in whooping-cough. [B. 81.]—**Gold and c. chloride.** Yellowish Claminæ, $C_8H_{10}N_4O_2.Hl + AuCl_3 + 2_2O$. [Biedermann, *l. c.* (B).]

CAFFEONE, n. Ka^{2}f'fe^2-on. Fr., *caféone.* Ger., *Coffeon.* The aromatic principle of roasted coffee, a brown oil, heavier than water, soluble in ether; said to increase the frequency of the cardiac pulsations in small doses, and to reduce it in large doses; also to cause drowsiness and sleep in mammals. [Boutron, Fremy (A, 301); Faragas, quoted in "Chicago Med. Rev.," June 15, 1882, p. 287; H. A. Hare, J. Marshall, "Med. News," Mar. 31, 1888, p. 337; L, 120.]

CAFFEOTANNIC ACID, n. Ka^{2}f-e^2-o-ta^{2}n'i^{2}k. Fr., *acide cafétannique.* Ger., *Caffeegerbsäure.* An amorphous, gum-like substance, $C_{70}H_{38}O_{34}$, forming one of the chief constituents of coffee. On decomposition with potash, it produces protocatechuic acid. [B, 4, 81.]

CAFFEOTANNIN, CAFFETANNIC ACID, n's. Ka^{2}f-e^2-o-ta^{2}n'i^{2}n, -ta^{2}n'i^{2}k. See Caffeotannic acid.

CAFFOLINE, n. Ka^{2}f'o-len. A substance, $C_5H_9N_3O_2 = \begin{array}{l}\quad\text{OH.C}\text{———N.CH}_3\\ \text{H(CH}_3\text{)N.C}\equiv\text{N}-\text{CO}\end{array}$, formed by the action of baryta water or lead acetate on hypocaffeine; white prismatic crystals. [B, 3.]

CAFFRE-BREAD, n. Ka^{2}fr'bre^{2}d. The *Encephatartos Caffer* and some species of *Zamia.* [B, 275.]

CAFFRE-BUTTER, n. Ka^{2}fr-bu^{3}t'u^{5}r. The *Combretum butyrosum.* [B, 275.]

CAFFREE-MURICH (Hind.), n. The *Capsicum grossum.* [B, 172.]

CAFFURIC ACID, n. Ka^{2}f-u'ri^{2}k. Fr., *acide cafurique.* A monobasic acid, forming efflorescent prismatic crystals, $C_6H_9N_3O_4 = \begin{array}{l}\quad\text{HO.C(CO.OH)}-\text{N.CH}_3\\ \text{H(CH}_3\text{)N.C}\equiv\text{N}\text{———CO}\end{array}$; a by-product in the preparation of hypocaffeine. [B, 3.]

CAFIER (Fr.), n. Ka^3-fi^2-a. See Caféier.

CAFIL (Ar.), n. See Cafal.

CAFIQUE (Fr.), adj. Ka^{3}f-ek. See Caffeic acid.

CAFORA, CAFOUR, CAFUR, n's. Old names for camphor. [A, 322; Ruland, Johnson (A, 325); L, 77.]

CAFURIQUE (Fr.), adj. Ka^3-fu^{6}r-ek. See Caffuric acid.

CAFURO, n. In the Celebes, the *Dioscorea bulbifera.* [B, 121.]

CAGARÈLE (Fr.), **CAGARELLE** (Fr.), n's. Ka^3-ga^{3}r-e^{2}l. Languedoc names for the *Mercurialis annua.* [B, 88, 121, 173.]

CAGARINHAS (Port.), n. Ka^3-ga^3-ren'ya^{3}s. The genus *Scolymus.* [B, 121.]

CAGARRINO, n. A Languedoc name for the *Euphorbia lathyris.* [B, 121.]

CAGASCAS, n. In the Philippines, the *Piper longum.* [B, 88.]

CAGASTRIC, adj. Ka^{2}g-a^{2}st'ri^{2}k. Lat., *cagastricus.* Fr., *cagastrique.* Ger., *cagastrisch.* Of, pertaining to, or caused by, cagastrum. [L, 41, 80.]

CAGASTRUM, n. Of Paracelsus, a contagium or an acquired morbific matter giving rise to certain diseases, such as pleurisy, the plague, fever, etc. [A, 325; L, 84, 119.]

CAGATEIRA, n. In Brazil, the *Eugenia dysenterica.* [B, 121.]

CAGE, n. Kaj. In microscopy, see Cell and Chamber.—**C. thoracique** (Fr.). The bony walls of the thorax. [A, 385.]

CAGNEUX (Fr.), adj. Ka^{3}n-yu^5. Dog-legged; having the knees bent inward and the feet outward. [A, 301; E.]

CAGNOL (Fr.), n. Ka^{3}n-yol. An old term for the larynx. [L, 41.]

CAGNOSITÉ (Fr.), n. Ka^{3}n-yo-se-ta. The state of being *cagneux* (*q. v.*). [A, 385.]

CAGOSANGA, n. A Brazilian name for the *Cephaelis ipecacuanha.* [Chomel (B, 121).]

CAGOT (Fr.), n. Ka^3-go. A *crétin* (*q. v.*). [L, 107.]

CAGUA DE LA VÍBORA (Sp.), n. Ka^3'gwa^3 da la^3 ve'-bo-ra^3. See Caña de la víbora.

CAGUE-SANGUE (Fr.), n. Ka^{3}g-sa^{3}n^2. An old name for dysentery. [L, 41, 109.]

CAHA, n. In Ceylon, the genus *Curcuma.* [B, 88.]

CAHADE (Ar.), n. The *Teucrium potium.* [Dalechamp (B, 121).]

CAHIMITER (Fr.), **CAHIMITIER** (Fr.), n's. Ka^3-e-me-ta, -te-a. The *Chrysophyllum cainito.* [A, 385; B, 121, 173.]

CAHINCA (Lat.), n. f. Ka^2(ka^3)-hi^{2}n^2'ka^3. See Cainca.

CAHINCATE, n. Ka^2-hi^{2}n^2'kat. A salt of cahincic acid. [L, 109.]

CAHINCETIN, n. Ka^2-hi^{2}n'se^{2}t-i^{2}n. Fr., *caïncétine.* A substance, $C_{22}H_{34}O_3$, formed by decomposing cahincic acid. [B, 81, 270.] Cf. Cahincic acid.

CAHINCIC ACID, n. Ka^2-hi^{2}n'si^{2}k. Fr., *acide caïncique.* Ger., *Caïncasäure.* A glucoside, $C_{40}H_{64}O_{18}$, having feebly acid properties, found in the root and especially the root-bark of *Chiococca racemosa;* white acicular crystals of a bitter taste, soluble with difficulty in water, more soluble in alcohol. Strong acids or alkalies decompose it into chiococcic acid and an uncrystallizable sugar, and their further action converts the former into cahincetin and sugar. [B, 81, 270.]

CAHINCIGENIN, n. Ka^2-hi^{2}n-si^{2}j'e^{2}n-i^{2}n. Fr., *caïncigénine.* A substance, $C_{14}H_{24}O_2$, formed, along with butyric acid, by decomposing cahincetin with caustic potash. [B, 81.]

CAHINCIN, n. Ka^2-hi^{2}n'si^{2}n. See Cahincic acid.

CAHIOTA (Port.), n. Ka^3-i^2-o'ta^3. The *Sechium edule.* [B, 19.]

CAHODINÉES (Fr.), n. pl. Ka^3-o-den-a. Of Bory, a family of inferior organisms, including *Nostoc, Batrachospermum, Chætophora,* and other genera of *Algæ* and *Fungi.* [B, 121.]

CAHOUN-NUTS, n. pl. Ka^3-hun'. The fruit of *Attalea cohune.* [B, 19.]

CAHUA (Hind.), n. The *Pentaptera arjuna.* [B, 172.]

CAHUCHU, n. See Caoutchouc.—**Amerikanische C.** (Ger.). The *Siphonia elastica.* [L, 80.]

CAHUCHUM, n. The *Siphonia elastica.* [Richard (B, 121).]

CAHUNA, n. A species of *Ilex,* used to adulterate *maté.* [B, 270.]

CAIAMA, n. The *Caryota urens.* [Oviedo (B, 121).]

CAIANNE (Fr.), n. Ka^3-i^2-a^{3}n. A variety of olive. [B, 19.]

CAIATICA, n. In Brazil, the *Euphorbia capitata*. [B, 88.]

CAIDBEJA [Forskål], n. See Forskalea.

CAIEPUT (Fr.), n. Ka^3-i^2-e^2-pu^6. See Cajuput.

CAÏEU (Fr.), n. Ka^3-i^2-yu^5. A bulbulus. [B, 121.]

CAI-GANA, n. In Cochin-China, the *Pimela alba*. [B, 121.]

CAIGUA, n. In Peru, the *Momordica pedata*. [B, 88.]

CAILCEDRA, n. Fr., *cail-cédra*. The *Khaya senegalensis*. [B, 270.]

CAILCEDRIN, n. Ka^3-i^{2}l-se^{2}d'ri^{2}n. Fr., *cail-cédrin*. A bitter resinous principle obtained from the *Khaya senegalensis*. [B, 270.]

CAILLÉ (Fr.), adj. Ka^{3}l-ya. Curdled, coagulated; as a n., curdled milk or a precipitate resembling it in consistence. [L, 49.]

CAILLEBOT (Fr.), n. Ka^{3}l-y'-bo. The *Viburnum opulus*. [L, 105.]

CAILLEBOTIER (Fr.), n. Ka^{3}l-y'-bo-ti^2-a. The *Viburnum opulus*, var. *roseum*. [B, 173.]

CAILLE-BOTTE (Fr.), n. Ka^{3}l-y'-bot. See Caillebot.

CAILLEBOTTÉ (Fr.), adj. Ka^{3}l-y'-bo-ta. See Caillé.

CAILLE-LAIT (Fr.), n. Ka^{3}l-y'-le^2. The genus *Galium*. [B, 119.]—**C.-l. blanc** [Fr. Cod.]. The *Galium mollugo*. [B.]—**C.-l. des marais.** The *Galium palustre*. [B, 121.]—**C.-l. jaune.** The *Galium verum*. [B, 119.]—**C.-l. roide.** The *Galium rigidum*. [B, 121.]—**C.-l. uligineux.** The *Galium uliginosum*. [B, 121.]—**C.-l. vrai.** See *C.-l. jaune*.

CAILLEMENT (Fr.), n. Ka^{3}l-y'-ma^{3}n^2. Coagulation. [A, 385.]—**C. du lait.** An inflamed state of the mammary gland in lying-in women. [A, 385; L, 109.]

CAILLETTE (Fr.), n. Ka^{3}l-ye^{2}t. See Abomasum.

CAILLI (Fr.), n. Ka^{3}l-ye. The *Nasturtium officinale*. [B, 121, 173.]

CAILLOT (Fr.), n. Ka^{3}l-yo. A clot. [K.]

CAILLOU (Fr.), n. Ka^{3}l-yu. Flint, pebble-stone. [A, 474.]—**Liqueur des c'x.** Potassium water-glass, the *silicate de potasse dissous* of the Fr. Cod. [B.]

CAÏMANS (Fr.), n. pl. Ka^3-i^2-ma^{3}n^2. Of De Blainville, the alligators, a family of the *Emydosauria*. [L, 41, 180.]

CAÏMITE (Fr.), **CAÏMITIER** (Fr.), n's. Ka^3-i^2-met, -met-i^2-a. The *Chrysophyllum cainito*. [B, 121, 173.]

CAINANA (Lat.), n. f. Ka^3-en-a^3'na^3. From the Brazilian name. The *Chiococca densifolia* and *Chiococca anguifuga*. [B, 81.] See also Cainca.—**Radix cainanæ.** The root of *Chiococca racemosa*. [B, 81.]

CAIN-AND-ABEL, n. Kan''a^{2}nd-a'be^{2}l. The tubers of *Orchis latifolia*. [B, 275.]

CAINCA (Lat.), n. f. Ka^3-en'ka^3. From the South American name. The *Chiococca racemosa* and its root. [B, 270.]—**Brazilian c.-root.** See *Radix caincæ brasiliensis*.—**C'bitter** (Ger.), **C'säure** (Ger.). Cahincic acid. [B, 270; L, 81.]—**C'wurzel** (Ger.). See *Radix caincæ brasiliensis*.—**Extractum caincæ.** See *Extrait alcoolique de* caïnca.—**Radix caincæ brasiliensis.** Fr., *racine de caïnca*. Ger., *brasilianische C'wurzel*, *Schneebeerenwurzel*. The root of *Chiococca densifolia* and *Chiococca anguifuga*. [B, 270.]

CAÏNCA [Fr. Cod.] (Fr.), n. Ka^3-a^{2}n^2-ka^3. See Cainca.—**Extrait alcoolique de c.** [Fr. Cod., 1837]. An extract made by digesting the root of *Chiococca anguicida* with brandy and concentrating by distillation and evaporation. [B, 119.]—**Racine de c.** See *Radix* caincæ *brasiliensis*.

CAINCATE, n. Ka^3-i^{2}nk'at. Fr., *caïncate*. A salt of cahincic acid. [L, 41.]

CAINCETIN, n. Ka^3-i^{2}n'se^{2}t-i^{2}n. See Cahincetin.

CAINCIC ACID, n. Ka^3-i^{2}n'si^{2}k. See Cahincic acid.

CAINCIGENIN, n. Ka^3-i^{2}n-si^{2}j'e^{2}n-i^{2}n. See Cahincigenin.

CAINCIN, n. Ka^3-i^{2}n'si^{2}n. Fr., *caïncine*. See Cahincic acid.

CAINITO, n. Ka^3-en-e'to. 1. The *Chrysophyllum c.* 2. Of De Candolle, a section of the genus *Chrysophyllum*. [B, 42, 121.]—**C. chrysophyllum** [Tussac]. See *C.* (1st def.).

CAIOUPOUTI, n. See Cajuput.

CAIOUS, n. The *Cassuvium pomiferum*. [B, 88.]

CAIPA-SCHORA (Malay), n. The *Lagenaria vulgaris*. [B, 172.]

CAI-QUONG (Chinese), n. The *Aralia chinensis*. [Loureiro (B, 121).]

CAIRATA (Tamil), n. The *Andrographis paniculata*. [B, 172.]

CAIRE (Fr.), n. Ka^{2}r. The filamentous envelope of the cocoa-nut. [B, 121, 173.]

CAIRINE (Fr.), n. Ka^3-e-ren. See Kairine.

CAIRTEAL, n. The *Allium sativum*. [B, 88.]

CAISSE (Fr.), n. Ke^{2}s. 1. A case, box, or chest. 2. The tympanum of the ear. 3. The quadrate bone. [D, 76; L, 43, 49.]—**C. de Fallope, C. du tambour, C. du tympan.** See Tympanum.

CAISSON (Fr.), n. Ke^{2}s-o^{2}n^2. A cart or wagon for carrying surgical supplies, etc., in military practice. [E.]—**C. d'ambulant.** A light wagon, containing only a few articles, and those strictly surgical. [A, 385.]—**C. de pharmacie.** A wagon for carrying dressings and medicaments. [A, 385.]—**C. de réserve.** See *C. magasin*.—**C. leger.** See *C. d'ambulant*.—**C. magasin.** A wagon provided with a store of surgical and pharmaceutical appliances for distribution to the different divisions of an army. [A, 385.]—**C. ordinaire.** A *c. d'ambulant* containing also a few medicaments. [A, 385.]

CAITON (Ar.), n. The *Olea europæa*. [B, 88.]

CAJA, n. In Tahiti, the *Spondias lutea*. [B, 121.]

CAJAN (Fr.), n. Ka^3-zha^{3}n^2. See Cajanus.

CAJANEÆ (Lat.), n. f. pl. Ka^3-ja^{3}n'e^2-e(a^3-e^2). A subtribe of leguminous plants, tribe *Phaseoleæ*, comprising *Cajanus*, *Rhynchosia*, etc. [B, 42.]

CAJANUS (Lat.), n. m. Ka^3-ja^{3}n'u^{3}s(u^{4}s). From *catjan*, a native name. Fr., *cajan*. Of De Candolle, a genus of the *Cajaneæ*. [B, 42.]—**C. bicolor** [De Candolle]. See *C. indicus*.—**C. flavus** [De Candolle]. A variety of *C. indicus*. [B, 172.]—**C. indicus** [Sprengel]. The pigeon-pea (Hind., *toor*); a shrub indigenous to the East Indies and cultivated throughout the tropics. There are two varieties: 1. The *C. indicus a* (the *C. flavus* of De Candolle, the *Cytisus cajan* of Linnæus), or no-eye pea, having a uniformly yellow vexillum. 2. The *C. indicus b* (the *C. bicolor* of De Candolle, the *Cytisus pseudo-cajan* of Jacquin), or Congo pea, with the vexillum yellowish within, purplish and veined without. The seeds, pigeon-peas, especially those of the first variety, are much used as an article of food. [B, 19, 172, 173.]

CAJAPUT, n. See Cajuput.

CAJAROU, n. The *Ipomœa umbellata*. [B, 121.]

CAJASEIRA, n. The *Spondias venulosa*. [B.]

CAJEPUT, n. Ka^{2}j'e^2-pu^{3}t. See Cajuput.—**Alcoolat de c.** (Fr.). See *Spiritus* cajuputi.—**C'geist** (Ger.). See *Spiritus* cajuputi.—**C'öl** (Ger.). See *Oil of* cajuput.—**Essence de c.** (Fr.), **Huile volatile de c.** (Fr.) [Fr. Cod.], **Oil of c.** See *Oil of* cajuput.

CAJEPUTENE, n. Ka^{2}j'e^2-pu^{3}t-en. Fr., *cajeputène*. Ger., *Cajeputen*. A liquid, $C_{10}H_{16}$, of hyacinthine odor, boiling at from 160° to 165° C., obtained by distilling oil of cajuput over phosphoric anhydride. Two polymers are formed: *isocajeputene*, dense and boiling at 176° C.; and *paracajeputene*, a thick yellow oil showing a blue fluorescence. [B, 81, 270.]—**C. hydrate.** Fr., *hydrate de cajuputène*. Ger., *Cajeputenhydrat*. See Cajeputol.

CAJEPUTOL, n. Ka^{2}j'e^2-pu^{3}t-o^{2}l. Syn.: *cajeputene hydrate*. A colorless oily liquid, $C_{10}H_{16}.H_2O = C_{10}H_{18}O$, forming the chief part of oil of cajuput, and also found in the oils of *Melaleuca ericifolia*, *Melaleuca linarifolia*, and *Eucalyptus oleosa*. It rotates the plane of polarization to the right. [B, 81, 270.]

CAJEPUTUM (Lat.), n. n. Ka^2(ka^3)-je^2(ye^2)-pu^2(pu)'tu^{3}m-(tu^{4}m). See Cajuput.—**Fructus cajeputi.** Ger., *Cajeputsamen*. The ripe fruit of *Amomum grana Paradisi*. [B, 180.] See Cardamomum *madagascariense*.—**Oleum cajeputi** [Ger. Ph.]. See *Oil of* cajuput.—**Semen (seu Semina) cajeputi.** See *Fructus cajeputi*.

CAJEUNEAM (Malay), n. The *Eclipta erecta*. [B, 172.]

CAJOU (Malay), n. See Caju and Cachou.

CAJOUPOUT, n. See Cajuput.

CAJU (Malay), n. Wood, also a tree. [B, 121.]—**C.-adjaran.** The *Dolichandrone Rheedii*. [B, 121.]—**C.-ager.** The *Aralia chinensis*. [B, 121.]—**C.-api-api.** A species of *Avicennia* growing in India. [B, 121.]—**C.-areng.** Of Rumphius, the wood of several kinds of *Diospyros*. [B, 121.]—**C.-baradan.** Lat., *arbor radulifera*. Fr., *arbre des râpes*. An undetermined tree. The fruit is so hispid that it is used to grate with; the wood often contains the edible larva of some insect. [B, 121.]—**C.-bessi.** Iron-wood, *i. e.*, a species of *Metrosideros* and the genus *Baryxylum*. [B, 121.]—**C.-boba** [Rumphius]. A large tree of Amboyna. A decoction of the seeds is used for fomentations. [B, 121.]—**C.-caloway.** The *arbor spicularum* (*q. v.*), also a species of *Terminalia*. [B, 121.]—**C.-cambinc.** A tree of the Moluccas. The bark is used for dysentery. [B, 88.]—**C.-costuri.** Lit., musk-wood; a tree of Pegu, the root of which has a musk-like odor. [B, 121.]—**C.-coutekka.** In Java, the *Avicennia tomentosa*. [B, 121.]—**C.-cuda.** 1. Of the Malays, the *Dolichandrone Rheedii*. 2. The *Excæcaria agallocha*. [B, 121.]—**C.-iati** [Rumphius]. The *Tectona grandis*. [B, 121.]—**C.-jawa.** The *Æschynomene* (*Agati*) *grandiflora*. [B, 121.]—**C.-kilæ** [Rumphius]. The *Melaleuca minor*. [B, 121.]—**C.-lapia.** The *lignum muscosum* of Rumphius; an undetermined tree of Amboyna. [B, 121.]—**C.-lingoo** [Rumphius]. The *Pterocarpus indicus*. [B, 121.]—**C.-lobé.** The *arbor fucum major* of Rumphius; an East Indian tree, probably a species of *Erythroxylon*. [B, 121.]—**C.-maria.** The genus *Calophyllum*. [B, 121.]—**C.-matta-buta.** See *C.-cuda*.—**C.-mera.** The *arbor rubra* of Rumphius; three different trees with red wood, probably species of *Eugenia*. [B, 121.]—**C.-moni.** A species of *Murraya*. [B, 121.]—**C.-puti.** Lit., white wood; the cajuput (*Melaleuca leucadendron*). [B, 121.]—**C.-radja.** Of Rumphius, the *arbor regis* (*q. v.*); also the *Cassia fistula*. [B, 121.]—**C.-sanga.** The *arbor vernicis* of Rumphius (*q. v.*); according to Lamarck, a species of *Terminalia*. [B, 121.]—**C.-sawo.** A species of *Mimusops*. [B, 121.]—**C.-sommot.** See *C.-radja*.—**C.-soulamoe.** The genus *Soulamea*. [B, 121.]—**C.-sussu.** The *Cerbera manghas*. [B, 121.]—**C.-tijammara** [Rumphius]. Two species of *Casuarina* growing in India. [B, 121.]—**C.-ular.** The *lignum colubrinum* of Rumphius; according to Linnæus, the *Strychnos colubrina*; according to Jussieu, the *Strychnos potatorum*. [B, 121.]

CAJUPUT, n. Ka^{2}j'u^2-pu^{3}t. For deriv., see Caju-*puti*. Lat., *cajuputum* [U. S. Ph., Br. Ph.], *cajeputum* [Ger. Ph.]. Fr., *cajeput*. Ger., *Cajeput*. It., Sp., *caieput*. The *Melaleuca cajuputi* (seu *minor*) or the *Melaleuca leucadendron*. [B, 81.]—**C.-oil.** See *Oil of c.*—**C.-tree.** The *Melaleuca leucadendron*, the *Melaleuca minor*, and the *Oreodaphne californica*. [B, 19.]—**Oil of c.** Lat., *oleum cajuputi* [U. S. Ph., Br. Ph.] (seu *cajeputi* [Ger. Ph.]). Fr.,

essence de cajeput. Ger., *Cajeputöl.* A volatile oil derived from the leaves of *Melaleuca cajuputi* (or *Melaleuca leucadendron*); a limpid, green or bluish-green, neutral liquid, of a penetrating aromatic odor and a bitterish, camphoraceous taste, of a sp. gr. of from 0·914 to 0·930. It consists chiefly of cajeputol tinged green with copper or chlorophyll, and may be obtained colorless by rectification. Used internally and topically as an antispasmodic, anodyne, and stimulant in colic, cholera, dysmenorrhœa, rheumatism, earache, toothache, neuralgia, dyspnœa, and nervous vomiting, also employed in chronic skin diseases. [B, 81.]—**Spirit of c.** See *Spiritus* CAJUPUTI.

CAJUPUTENE, n. Ka^{2}j'u^2-pu^{3}t-en. See CAJEPUTENE.

CAJUPUTI, n. Of Adanson, the genus *Melaleuca*; of Rumphius, the *Melaleuca minor.* [B, 121.]

CAJUPUTOL, n. Ka^{2}j'u^2-pu^{3}t-o^{2}l. See CAJEPUTOL.

CAJUPUTUM (Lat.), n. n. Ka^2(ka^3)-ju^2(yu^4)-pu^2(pu)'tu^{3}m-(tu^{4}m). See CAJUPUT.—**Oleum cajuputi.** See *Oil of* CAJUPUT.—**Spiritus cajuputi** [Br. Ph.]. Fr., *alcoolat de cajeput.* Ger., *Cajeputgeist.* A solution of 1 part (by volume) of oil of cajuput in 49 parts of rectified spirit. [B, 81.]

CAJUR (Hind.), n. The *Phœnix dactylifera.* [B, 172.]

CAK (Ar.), n. A disease allied to pellagra. [A, 385.]

CAKAY, n. A Calmuck name for the *Cassia fistula.* [B, 88.]

CAKE, v. intr. Kak. Fr., *coller, se cailler.* To become "caked"; *i. e.*, formed into a coherent mass (said of powders, exudations, etc.) or affected with lumpy induration (said of the mammary gland).

CAKE, n. Kak. Gr., πλακοῦς. Lat., *placenta.* Fr., *gâteau, bloc.* Ger., *Kuchen.* An agglomeration of matter rendered coherent by desiccation or pressure.—**C.-meal.** Lat., *lini farina* [Br. Ph.]. The meal obtained by grinding linseed-oil cakes (the *placentæ seminis lini* of the Ger. Ph.). [A, 247.]—**Embryonic c.** See *Fœtal* PLACENTA.—**Fruit-c.** See ÆTHALIUM (2d def.).—**Maternal c.** See *Uterine* PLACENTA.—**Oil-c.** A solid mass left after the expression of the oil from linseed, etc.—**Vascular c.** See PLACENTA.

CAKENAN, n. In Coromandel, the *Clitoria ternatea.* [B, 88.]

CAKILE (Lat.), n. f. Ka^{2}k(ka^{3}k)-i(e)'le(la). Gen., *caki'les.* Of Gärtner, a genus of cruciferous plants, tribe *Cakilineæ.* [B, 42.]—**C. ægyptiaca** [Tussac], **C. americana** [Nuttall]. A species growing on the coasts of North America and in the West Indies; used like *C. maritima.* [B, 180.]—**C. domingensis** [Jussieu]. A West Indian species; used as an antiscorbutic. [B, 88, 173.]—**C. maritima** [Scopoli]. The sea-rocket; a species growing along the shores of the United States and Europe; reputed aperient, antiscorbutic, and diuretic. [B, 19, 34, 88, 180.]—**C. sinuatifolia** [De Candolle]. A variety of *C. domingensis.* [B, 173.]—**Herba c's.** The herb of *C. maritima.* [B, 180.]

CAKILEÆ (Lat.), n. f. pl. Ka^{2}k(ka^{3}k)-i^{2}l(el)'e^2-e(a^3-e^2). Of Reichenbach, a division of the *Lomentaceæ* (*Synclistæ*), comprising *Cakile* and other genera. [B, 170.]

CAKILIDÆ [Lindley] (Lat.), n. f. pl. Ka^{2}k(ka^{3}k)-i^{2}l(el)'i^{2}d-e-(a^3-e^2). See CAKILINEÆ.

CAKILINEÆ (Lat.), n. f. pl. Ka^{2}k(ka^{3}k)-i^{2}l(el)-i^{2}n'e^2-e(a^3-e^2). Fr., *cakilinées.* Of De Candolle and succeeding authors, a tribe of the *Cruciferæ* (*Pleurorrhizæ, Lomentaceæ*, etc.), comprising *Cakile, Rapistrum*, and, according to De Candolle, *Chorispora.* According to Bentham and Hooker, who exclude *Chorispora*, it comprises also *Crambe, Erucaria*, and seven other genera. [B, 42, 170.]

CAKODYLE, n. Ka^{2}k'o-di^{2}l. See CACODYL.

CAL, n. An alchemical name for orpiment and for vinegar. [Ruland, Johnson (A, 325).]

CAL (Fr.), n. Ka^{3}l. See CALLUS.—**C. bilatéral, C. définitif, C. d'interposition.** See *Permanent* CALLUS.—**C. mou.** See *Provisional* CALLUS.

CALA, n. The kernel of the nut of *Juglans regia.* [B, 88, 173.]

CALAB (Ar.), n. The *Lithospermum officinale.* [Dalechamps (B, 121).]

CALABA, n. The *Calophyllum c.* [B, 185.]—**C. balsam, C. resin.** See *Bourbon* TACAMAHAC.

CALABAR BEAN, n. Ka^{2}l'a^3-ba^{3}r ben. See PHYSOSTIGMA (2d def.).

CALABARINE, n. Ka^{2}l-a^{2}b'a^{3}r-en. Fr., *calabarine.* Ger., *Calabarin.* An alkaloid contained in small quantities in the *Physostigma venenosum*; not yet obtained pure. In its general physiological action it seems to agree with strychnine. Some writers apply the name to eserine. [A, 385; B, 270.]

CALABARISATION (Fr.), n. Ka^{3}l-a^3-ba^{3}r-e-za^3-si^2-o^{2}n^2. The procedure of bringing a person or an animal under the influence of eserine. [A, 385.]

CALABASH, n. Ka^{2}l'a^3 ba^{2}sh. Fr., *calebasse.* A gourd, also the *Crescentia cujete.* [A, 385; B, 185.]—**C.-nutmeg.** The *Monodora myristica.* [B, 19.]—**C.-tree.** Fr., *calebassier.* The *Crescentia cujete.* [B, 75.]—**Sweet c.** The *Passiflora maliformis.* [B, 19.]

CALABAZA (Sp.), n. Ka^{3}l-a^3-ba^3'th^{2}a^3. The *Cucurbita pepo.* [B, 88.]—**C. larga.** The *Cucurbita lagenaria.* [B, 88.]

CALABAZILLA (Sp.), n. Ka^{3}l-a^3-ba^3-th^{2}el'ya^3. In California, the *Cucurbita perennis.* [B, 66.]

CALABEJA (Sp.), n. Ka^{3}l-a^3-ba'ha^3. See *C.* CINCHONA BARK.

CALABURE (Fr.), n. Ka^{3}l-a^3-bu^{6}r. The genus *Muntingia.* [B, 173.]—**C. soyeux.** The *Muntingia calabura.* [B, 173.]

CALABUR-TREE, n. The *Muntingia calabura.* [B, 185.]

CALAC, n. See KALAPA.

CALADANA (Hind.), n. The *Pharbitis nil.* [B, 172.]

CALADIEÆ (Lat.), n. f. pl. Ka^{2}l(ka^{3}l)-a^{2}d(a^{3}d)-i(i^2)'e^2-e(a^3-e^2). Fr., *caladiées.* Of Schott, Endlicher, Reichenbach, and Kunth, a tribe of the *Araceæ* (*Androgynanthæ*), comprising the subtribes *Colocasieæ* and *Philodendreæ*; of Lindley, nearly the same as the *Colocasieæ* of Bentham and Hooker. [B, 170.]

CALADIUM (Lat.), n. n. Ka^{2}l(ka^{3}l)-a(a^3)'di^2-u^{3}m(u^{4}m). Fr., *caladion.* Of Ventenat, a genus of araceous plants of the tribe *Colocasieæ*, of Engler and of Bentham and Hooker. [B, 42; Engler (B, 245).]—**C. acre** [R. Brown]. The *Colocasia antiquorum*, var. η *acre.* [B, 216.]—**C. aquatile** [Rumphius]. The *C. esculentum.* [B, 173.]—**C. arborescens** [Ventenat]. Probably the *Montrichardia arborescens.* [B, 173, 180.]—**C. auritum** [Willdenow]. The *Syngonium auritum.* [B, 173, 180.]—**C. bicolor** [Ventenat]. Syn.: *Arum bicolor* [Aiton]. A Brazilian species having many varieties. The tuberous rhizome of one variety (the *C. pœcile* of Ventenat, the *Arum pœcile* of Schott) is edible; other varieties are said to be cathartic and anthelminthic. [B, 173, 180; Engler (B, 216, 245); L, 49.]—**C. cochinchinense** [Loureiro]. The *Cassyta aphylla.* [B, 173.]—**C. colocasioides** [Brongniart]. The *Colocasia antiquorum*, var. *Fontanesii.* [Engler (B, 216).]—**C. edule** [Meyer]. The *Xanthosoma edule.* [B, 216.]—**C. esculentum.** Of Linnæus, the *Colocasia antiquorum*, var. α; of Ventenat, the *Colocasia antiquorum*, var. ε *esculenta.* [Engler (B, 216).]—**C. giganteum** [Blume]. The *Colocasia indica.* [B.]—**C. glyzyrrhizum** (*sic*) [Frazer]. The *Alocasia macrorrhiza* (see Supplement). [B.]—**C. macrorrhizon** [Ventenat]. The *banganga nargan* of North Queensland. The rhizome, which is rich in starch, is cooked and eaten by the natives. [B, 121.]—**C. metallicum.** The *Alocasia indica*, var. β *metallica* (see Supplement). [B, 216.]—**C. nymphææfolium** [Ventenat]. The *Colocasia antiquorum*, var. ζ *nymphæifolia.* [B, 216.]—**C. odoratum, C. odorum.** The *Alocasia macrorrhiza* (see Supplement). [B, 216.]—**C. ovatum** [Ventenat]. The *Lagenandra toxicaria.* [B, 216.]—**C. pallidinervium.** The *C. bicolor*, var. *pœcile.* [B, 216.]—**C. petiolatum** [Hooker]. More properly regarded as a species of *Anchomanes.* The tuberous rhizomes are said to be poisonous when raw. [B, 19; Engler (B, 216).]—**C. pœcile.** The *C. bicolor*, var. *pœcile.* [B, 216.]—**C. sagittæfolium.** Of Sieber, one of the varieties of *C. bicolor*; of Sprengel and Ventenat, the *Xanthosoma sagittifolium.* [Engler (B, 216).]—**C. seguinum** [Willdenow, Ventenat]. The *Dieffenbachia seguine.* [B.]—**C. utile.** The *Xanthosoma sagittifolium.* [B, 216.]—**C. violaceum.** The *Colocasia antiquorum*, var. γ *Fontanesii.* [B, 216.]—**C. virginicum** [Hooker]. The *Peltandra undulata.* [B, 216.]—**C. xanthorrhizon** [Willdenow]. The *Xanthosoma sagittifolium.* [B, 216.]

CALAË, CALAËM, CALAËMUM, n's. Alchemical names for a variety of Indian tin capable of transmutation by heat into a sort of cerussa, and by cementation into silver. [A, 325.]

CALAF, n. According to Prosper Alpinus, an Arabic name for the *Salix ægyptiaca* of Forskål, which is probably a species of *Elæagnus.* The flowers furnish a medicinal water called *macahalaf*, esteemed as an aphrodisiac, antiseptic, and cordial, and used in the treatment of pestilential fevers. [B, 121; L, 49.]

CALAFUR (Pers.), n. The *Caryophyllus aromaticus.* [B, 88.]

CALAGANSA (Malay), n. The genus *Cleome.* [B, 121.]

CALAGERI, n. The *Vernonia anthelminthica.* [B, 88, 121.]

CALAGIRAH, n. In India, the *Nigella indica.* [B.]

CALAGUALA (Lat.), n. f. Ka^{3}l-a^3-gwa^{3}l'a^3. From the Peruvian name. The *Polypodium c.* [Ruíz], the *Polypodium crassifolium* [Linnæus], and certain other ferns; used as diuretics. [B, 119, 270.]—**Calagualæ radix, C'wurzel** (Ger.), **Radix calagualæ.** The rhizome of *Polypodium c.* [B, 92.]

CALAGUELLA, CALAGULA, CALAHUALA, CALAHULA, n's. See CALAGUALA.

CALAI-TCHERI, n. In Coromandel, the *Cæsalpinia bonduc.* [B, 88, 121.] Cf. KALICHIKAI.

CALALOS, n. The *Lactarius torminosus.* [B, 173.]

CALALU, n. In the West Indies, the genus *Phytolacca.* [B, 19.]—**Branched c.** The *Solanum nodiflorum.* [B, 19.]—**Green c.** The *Euxolus viridis.* [B, 19.]—**Prickly c.** The *Amarantus spinosus.* [B, 19.]—**Small-leaved c.** The *Euxolus caudatus.* [B, 19.]—**Spanish c.** The *Phytolacca octandra.* [B, 19.]

CALAMAC, n. In Madagascar, the *Phaseolus lunatus.* [B, 121.]—**C. be.** A species of *Dolichos.* [B, 121.]—**C. helic.** The *Dolichos scarabæoides*, now referred to *Cajanus.* [B, 121.]

CALAMAGROSTEÆ (Lat.), n. f. pl. Ka^{2}l(ka^{3}l)-a^{2}m(a^{3}m)-a^{2}g(a^{3}g)-ro^{2}st(rost)'e^2-e(a^3-e^2). Of Koch, a division of grasses (*Loxanthæ*), comprising *Calamagrostis* and *Baldingera.* [B, 170.]

CALAMAGROSTIS (Lat.), n. f. Ka^{2}l(ka^{3}l)-a^{2}m(a^{3}m)-a^{2}g(a^{3}g)-ro^{2}st(rost)'i^{2}s. Gen., *calamagrost'ios* (*-eos, -is*). From κάλαμος, a reed, and ἄγρωστις, grass. Fr., *calamagrostide.* Of Roth, a genus of grasses of the tribe *Agrosteæ* (*Agrostideæ*), subtribe *Euagrosteæ.* [B, 42; Hackel (B, 245).]—**C. arenaria** [Roth]. The *Psamma arenaria.* [B.]—**C. arundinacea** [Roth]. The *Deyeuxia silvatica.* [B, 188.]—**C. colorata** [Sibthorp]. The *Phalaris arundinacea.* [B, 188.]—**C. epigeios** [Linnæus, Roth]. Syn.: *Arundo intermedia.* A species growing in temperate regions throughout the world. [B, 188; Hackel (B, 245); B, 275.]—**C. lagurus** [Koeler]. The *Imperata arundinacea.* [B, 173.]—**C. lanceolata.** Ger., *Wiesenrohr* (1st def.), *Riethgras* (1st def.). Syn.: *C. ramosa* (1st def.), *Arundo c.* (seu *canescens*) (1st def.). 1. Of Roth, a species with several culms springing from a creeping rhizome, growing in swampy meadows in Europe; identified by some with *Stipa c.* The root, stalks, leaves, and flowers (*radix, stipites, folia, et flores arundinis c.*) were formerly used as a diuretic. 2. The *C. epigeios.* [B, 173, 180, 188, 270.]—**C. neglecta.** The *Deyeuxia neglecta.* [B, 188.]—**C. nigricans** [Mérat]. A variety of *Phragmites communis.* [B.]—**C. pyramidalis.** The *Deyeuxia silvatica.* [B, 173.]—**C. ramosa.** The *C. lanceolata* (1st def.). [B, 188.]—**C. silvatica** [Beau-

vois]. The *Deyeuxia silvatica.* [B, 188.]—**C. stricta.** The *Deyeuxia neglecta.* [B, 188.]—**C. variegata** [Withering]. The *Phalaris arundinacea.* [B, 173.]—**C. villosa** [Gmelin]. The *Deyeuxia silvatica.* [B. 173, 188.]

CALAMANDER-WOOD, n. Ka²l-a²m-a²nd'u⁵r-wu⁴d. The wood of *Diaspyros quæsita* and *Diospyros opposititfolia.* [B, 19.]

CALAMANDRINA (Lat.), n. f. Ka²l(ka³l)-a²m(a³m)-a²n(a³n)-dri(dre)'na³. The *Teucrium chamædrys.* [B, 121, 180.]

CALAMANDRINIÉ (Fr.), n. Ka³l-a³-ma³n²-dra²n-i²-a. In the south of France, the genus *Teucrium.* [B, 121.]

CALAMARIÆ (Lat.), n. f. pl. Ka²l(ka³l)-a²m(a³m)-a(a³)'ri²-e-(a³-e²). 1. Of Linnæus, an order of plants, comprising *Scirpus, Carex, Eriaphorum, Cyperus,* and *Schœnus* (all now included in the *Cyperaceæ*), also, according to a later classification, *Sparganium* and *Typha,* which make up the modern order *Typhaceæ.* Succeeding authors added to the *C.* other genera of the *Cyperaceæ* and the genus *Restio* of the *Restiaceæ,* and Wahlenberg divided the *C.* into the *Cyperaceæ* and *Typhinæ.* 2. Of Batsch, a division of the *Culmales,* including *Calamus, Orontium, Typha,* and *Sparganium.* 3. Of Endlicher, a class of the *Acrobrya protophyta,* comprising the orders *Equisetaceæ* and *Calamiteæ,* to which Unger added the *Asterophyllitæ.* Cf. EQUISETINÆ. [B, 170.]

CALAMARIDÆ (Lat.), n. f. pl. Ka²l(ka³l)-a²m(a³m)-a²r(a³r)'-i²d-e(a³-e²). A family of the *Ophidia.* [L, 270.]

CALAMARIEÆ (Lat.), n. f. pl. Ka²l(ka³l)-a²m(a³m)-a²r(a³r)-i(i²)'e²-e(a³-e²). An order of the *Equisetinæ,* including only fossil genera which differed from the *Equisetaceæ* in having fibro-vascular bundles that developed by exogenous growth. [B, 75.]

CALAMARIIDÆ (Lat.), n. f. pl. Ka²l(ka³l)-a²m(a³m)-a²r(a³r)-i(i²)'i²d-e(a³-e²). A family of the *Ophidii colubriformes.* [L, 121.]

CALAMARY, n. Ka²l'a²m-a-ri². From *calamarius,* pertaining to a pen. The cuttle-fish; in the pl., *calamaries,* see TEUTHIDÆ. [L.]

CALAMBA, CALAMBAC, CALAMBAK, CALAMBAR, CALAMBE, n's. See ALOES-WOOD.—**Faux calambac** (Fr.). The wood of *Excœcaria agallacha.* [B, 121.]

CALAMBOUC (Fr.), n. Ka³l-a³m-buk. See *Faux* CALAMBAC.

CALAMBOUR, CALAMBOURG, CALAMBOUX (Fr.), n's. Ka³l-a³m-bur, -burg, -bu. See CALAMBAC.

CALAMBRE (Sp.), n. Ka³l-a³m'bra. An Almaden term for a form of mercurial poisoning characterized by tremor, convulsions, and pain. [A, 301.]

CALAMBRISTE (Fr.), n. Ka³l-a³m-brest. A person affected with calambre. [L, 41.]

CALAMEÆ (Lat.), n. f. pl. Ka²l(ka³l)-a²m(a³m)'e²-e(a³-e²). Fr., *calamées.* Of Kunth and succeeding authors, a section or tribe of palms, comprising *Calamus, Ceratolabus, Plectocomia, Zalacca, Metroxylon, Raphia, Mauritia,* and *Lepidocaryum.* The last three genera are excluded by Bentham and Hooker and by Drude, who make the *C.* a subtribe of the tribe *Lepidocaryeæ* [Bentham and Hooker] or of the tribe *Metroxyleæ,* suborder *Lepidocaryinæ* [Drude]. [B, 42, 170, 188; Drude (B, 245).]

CALAMEDON (Lat.), n. n. Ka²l(ka³l)-a²m(a³m)-e(a)'do²n. Gr., καλαμηδόν. Fr., *calamédon.* An old name for an oblique fracture of a bone. [A, 301, 322, 325; E.]

CALAMÉES (Fr.), n. pl. Ka³l-a³-ma. See CALAMEÆ.

CALAMENDRIER (Fr.), n. Ka³l-a³-ma³n²-dri²-a. The *Teucrium chamædrys.* [B, 173.]

CALAMENT (Fr.), n. Ka³l-a³-ma³n². The genus *Calamintha;* of the Fr. Cod., the *Calamintha officinalis.* [B, 19.]—**C. de montagne, C. des montagnes, C. ordinaire.** The *Calamintha officinalis.* [B, 119, 173.]—**Petit c. des montagnes.** The *Calamintha nepeta.* [B, 173.]

CALAMIDES (Lat.), n. m. pl. Ka²l(ka³l)-a²m(a³m)'i²d-ez(e²s). Fr., *calamides.* A family of polyps having a reed-shaped body. [L. 41.]

CALAMIFEROUS, adj. Ka²l-a²m-i²f'e²r-u³s. From *calamus* (= κάλαμος), a reed, and *ferre,* to bear. Fr., *calamifère.* Having reed-like appendages. [L, 41.]

CALAMIFORM, adj. Ka²l-a²m'i²-fo²rm. Lat., *calamiformis* (from *calamus,* a reed, and *forma,* form). Fr., *calamiforme.* Reed-shaped. [L, 41.]

CALAMINA (Lat.), n. f. Ka²l(ka³l)-a²m(a³m)-i(e)'na³. See CALAMINE; in the pl., *Calaminæ,* of Griffith, the *Calameæ* of Kunth and the *Lepidocaryinæ* of Martius. [B, 121.]—**C. præparata** [U. S. Ph., 1850]. Prepared (finely powdered and calcined) calamine, consisting mainly of oxide of zinc. [B.]—**Ceratum calaminæ** [U. S. Ph., 1850]. Calamine cerate; made by melting together 1 lb. of lard and 3 oz. of yellow wax, and adding 3 oz. of calamine. [B, 5.]

CALAMINARIS (Lat.), adj. Ka²l(ka³l)-a²m(a³m)-i²n-a(a³)'ri²s. Fr., *calaminaire.* Of or pertaining to calamine. [B, 119.] See LAPIS *c.*

CALAMINE, n. Ka²l'a²m-en. Lat., *calamina, lapis calaminaris* (1st def.). Fr., *calamine.* Ger., *Galmei* (1st def.), *Calamin* (2d def.). 1. A native silicate of zinc containing iron oxide, calcium carbonate, and alumina. 2. An alkaloid obtained from *Acorus calamus.* [B, 119, 270.]—**Cerate of c.** See *Ceratum* CALAMINÆ. —**Prepared c.** See CALAMINA *præparata.*

CALAMINT, n. Ka²l'a²m-i²nt. See CALAMINTHA.—**Common c.** The *Calamintha officinalis.* [L, 84.]—**Field c.** The *Calamintha acinos.* [B, 19, 275.]—**Hedge-c.** The *Calamintha clinopodium.* [B, 19.]—**Mountain c.** The *Calamintha grandiflora.* [L, 84, 94.]—**Spotted c.** The *Calamintha nepeta.* [L, 94.]—**Water-c.** The *Calamintha palustris.* [L, 94.]

CALAMINTA (Lat.), n. f. Ka²l(ka³l)-a²m(a³m)-i²n'ta³. See CALAMINTHA.

CALAMINTH, n. Ka²l'a²m-i²nth. See CALAMINT.

CALAMINTHA (Lat.), n. f. Ka²l(ka³l)-a²m(a³m)-i²n'tha³. Gr., καλαμίνθη. Fr., *calament.* Ger., *Bergminze, Bergmünze.* Calamint; of Tournefort and Mönch, a genus of labiate plants of the tribe *Satureineæ.* [B, 215.]—**C. acinos.** Syn.: *Thymus acinos, Acinos vulgaris.* Basil-thyme, field- (or stone-) basil, field-calamint; a European species; aromatic and formerly esteemed as a remedy for melancholy. [B, 19, 275.]—**C. agrestis.** See *C. nepeta.*—**C. aquatica.** The *Mentha arvensis.* [B, 180.]—**C. arvensis** [Lamarck]. See *C. acinos.*—**C. clinopodium** [Bentham]. Syn.: *Clinopodium vulgare* [Linnæus]. Hedge-calamint, horse-thyme, basil-weed, field- (stone-, or wild) basil; an aromatic herb. [B, 19, 215, 275.]—**C. grandiflora** [Mönch]. Ger., *grossblüthige Bergminze.* Syn.: *Melissa grandiflora* [Linnæus], *Thymus grandiflorus* [Scopoli]. A perennial European species. The herb, formerly official as *herba calaminthœ præstantioris,* was used like the mints. [B, 180.]—**C. hederacea** [Scopoli], **C. humilior.** The *Glechoma hederaceum.* [B, 173, 180.]—**C. incana** [Reichenbach]. Syn.: *Thymus incana* [Sibthorp]. A species growing in southern Europe, resembling *C. nepeta,* together with which it has been regarded as the καλαμίνθη of Dioscorides. [B, 180.]—**C. magniflora, C. magno flore, C. menthæfolia, C. montana,** var. α [Lamarck]. See *C. officinalis.*—**C. nepeta** [Link]. Fr., *petit calament.* Ger., *Poleibergminze, katzenminzenartige Bergminze.* Syn.: *Melissa* [Linnæus] (seu *Thymus* [Scopoli]) *nepeta.* Field-calamint, field-balm, basil-thyme; a perennial species growing in southern and western Europe, resembling *C. grandiflora.* The herb—*herba melissæ nepetæ* (seu *calaminthæ agrestis,* seu *calaminthæ pulegii adore*)—has a burning, aromatic taste and a strong odor like that of pennyroyal, but more repulsive; formerly used like *C. officinalis.* [B, 19, 180, 215.]—**C. officinalis** [Mönch]. Fr., *calament* [Fr. Cod.], *calament ordinaire.* Ger., *gebräuchliche Bergminze* (oder *Bergmelisse*). Sp., *calaminta* [Sp. Ph.]. Syn.: *Melissa c.* [Linnæus], *Thymus c.* [De Candolle]. Medicinal calamint, field-balm; a European species resembling *C. nepeta.* The herb—*herba calaminthæ* (seu *calaminthæ vulgaris,* seu *menthæ calaminthæ,* seu *menthæ montanæ*)—is highly aromatic, and was formerly employed as an excitant and nervine and used as a condiment. [B, 119, 180, 270.]—**C. parviflora** [Lamarck]. The *C. nepeta.* [B, 173.]—**C. præstantior.** The *C. grandiflora.* [B, 180.]—**C. pulegii odore.** The *C. nepeta.* [B, 173, 180.]—**C. trichotoma.** See *C. nepeta.*—**C. vulgaris.** The *C. officinalis* and the *Nepeta cataria.* [B.]—**Herba calaminthæ.** The herb of *C. officinalis.* [B, 119.]—**Herba calaminthæ agrestis.** The herb of *C. nepeta.* [B, 180.]—**Herba calaminthæ aquaticæ.** The herb of *Mentha arvensis.* [B, 180.]—**Herba calaminthæ humilioris.** The herb of *Glechoma hederaceum.* [B, 180.]—**Herba calaminthæ montanæ.** The herb of *C. officinalis.* [B, 180.]—**Herba calaminthæ præstantioris.** The herb of *C. grandiflora.* [B, 180.]—**Herba calaminthæ pulegii odore.** The herb of *C. nepeta.* [B, 180.]—**Herba calaminthæ vulgaris.** The herb of *C. officinalis* and that of *Nepeta cataria.* [B, 180.]

CALAMINTHE (Lat.), n. f. Ka²l(ka³l)-a²m(a³m)-i²n'the(tha). Gen., *calamin'thes.* See CALAMINTHA.

CALAMISTRUM (Lat.), n. n. Ka²l(ka³l)-a²m(a³m)-i²st'ru³m-(ru⁴m). From καλαμίς, a curling-iron. A row of curved, spiny bristles on the upper surface of the tarsi of the fourth pair of legs in certain spiders, serving to twine the silk. [A, 385; L, 121.]

CALAMITA (Lat.), n. f. Ka²l(ka³l)-a²m(a³m)-i(e)'ta³. From καλαμίς, a limed reed for catching birds. Fr., *calamite.* 1. See AIMANT *blanc.* [L, 84.] 2. The *Bufo c.* [A, 385.]—**C. alba.** See *C.* (1st def.).

CALAMITEÆ (Lat.), n. f. pl. Ka²l(ka³l)-a²m(a³m)-i²t(et)'e²-e(a³-e²). From *Calamites* (= καλαμίτης), one of the genera. Fr., *calamitées.* Of Unger, Endlicher, and others, an order of fossil *Equisetaceæ;* apparently equivalent to the *Calamarieæ.* [B, 170.]

CALAMOCHNUS (Lat.), n. m. Ka²l(ka³l)-a²m(a³m)-o²k(o²ch²)'-nu³s(nus). From κάλαμος, a reed, and χνόος, down. See ADARCE.

CALAMODENDREÆ (Lat.), n. f. pl. Ka²l(ka³l)-a²m(a³m)-o-(o²)-de²n'dre²-e(a³-e²). From *Calamodendron,* one of the genera. A family of fossil plants having jointed branches. [B, 121.]

CALAMUS (Lat.), n. m. Ka²l(ka³l)'a²m(a³m)-u³s(u⁴s). Gr., κάλαμος. Fr., *canne aromatique* (2d def.). Ger., *Halm* (1st def.), *Kalmus* (3d def.). 1. Of the ancients, a reed or cane, also a pen. See *C. scriptorius.* 2. Of the U. S. Ph., the rhizome of *Acorus c.* 3. Of Linnæus, a genus of palms of the subtribe *Calameæ.* 4. In structural botany, a culm. 5. The quill portion of a feather. [B, 5, 42, 113, 123; Drude (B, 245); L, 14.]—**Ætheroleum calami.** See *Oil of c.*—**C. albus** [Persoon]. See *C. rudentum.*—**C. alexandrinus.** See *C. asiaticus.*—**C. aromaticus** [Fr. Cod.]. See ACORUS *c.* —**C. aromaticus asiaticus** (seu **verus**), **C. asiaticus.** Syn.: *Acorus asiaticus* (seu *indicus,* seu *gramineus*). A drug formerly imported from the East in the form of cylindrical pieces 6 in. long, as thick as a quill, reddish externally, filled with a white pith; considered by Guibourt to be the stem of a species of *Gentiana* akin to *Gentiana chirayta.* [B, 119.]—**C. draco** [Willdenow]. Syn.: *Dæmonoraps draco* [Blume]. A species of *C.* (3d def.) growing in Sumatra and the Moluccas. The concrete juice of the fruit-pulp constitutes the best sort of dragon's-blood. [B, 245, 270.] See SANGUIS *draconis.*—**C. erectus** [Roxburgh]. A species of *C.* (3d def.) indigenous to Silhet, where the seeds are used as a substitute for the betel-nut. [B, 172.]—**C. extensus.** A climbing Silhet species of *C.* (3d def.). [B, 172.]—**C. fasciculatus** [Roxburgh]. The rattan-cane; a Bengal species of *C.* (3d def.). One of the varieties is used like *C. rotang.* [B, 172.]—**C. niger** [Willdenow]. A species of *C.* (3d def.) used like *C. rotang.* [B, 270.]—**C. odoratus.** 1. The *Andropogon schœnanthus.* 2. The *C. asiaticus.* [B, 19, 119.] —**C.-oil.** See *Oil of c.*—**C. petræus** [Willdenow]. A species of *C.*

(3d def.) regarded by Duchesne as comprising *C. rotang* and *C. Scipionum*. [B, 173.]—**C. rotang** [Linnæus], **C. Roxburghii** [Griffith]. The rattan-cane (the *tsjeru-tsjurel* of Rheede) ; a species of *C.* (3d def.) growing in India. The young shoots and the pulp surrounding the seeds are eaten. [B, 172.]—**C. rudentum** [Loureiro]. The cable-cane ; a Molucca species of *C.* (3d def.) furnishing a variety of rattan. [B, 19, 172, 173, 180.]—**C. Scipionum** [Loureiro]. A species of *C.* (3d def.) indigenous to Sumatra and the neighboring East Indies, with a much thicker stem than *C. rotang*, furnishing the so-called Malacca cane. [B, 19, 172, 173.]—**C. scriptorius.** Fr., *plume à écrire*. Ger., *Schreibfeder*. The lower extremity of the fourth ventricle of the brain, terminating in a point resembling that of a pen ; bounded laterally by the diverging posterior pyramids. [I, 6 ; K.]—**C. strictus** [Blume]. A species of *C.* (3d def.) furnishing a variety of rattan. [B, 270.]—**C. verus.** 1. Of Loureiro, a species of *C.* (3d def.) growing in the Moluccas and in Cochin-China, used like *C. rotang*. 2. Of the pharmacopœias, the *Acorus c.* ; also, according to some, the nard. [B, 38, 119, 172.]—**C. viminalis** [Loureiro]. A species of *C.* (3d def.) employed like *C. rotang*. [B, 19, 270.]—**C. vulgaris.** The *Acorus c.* [B, 119.]—**C. zalacca** [Willdenow]. See ZALACCA. — **Confectio** (seu **Conserva**) **calami.** Fr., *conserve de roseau aromatique*. A preparation, formerly official, made by mixing the pulp of the rhizome of *Acorus c.* with sugar and evaporating to a suitable consistence. [B, 119.] — **Essentia calami** (seu **calami aromatici**). See *Tinctura calami*. —**Extractum calami** [Ger. Ph.]. Fr., *extrait de roseau aromatique*. Ger., *Kalmusextrakt* [Ger. Ph.]. Extract of c. ; made by exhausting the bruised rhizome of *Acorus c.* with a mixture of 2 parts of alcohol and 3 of water, filtering, and evaporating to the consistence of a thick extract. [Ger. Ph. (A, 247).]—**Extractum calami fluidum** [U. S. Ph.]. Fr., *extrait liquide d'acore vrai*. Ger., *flüssiges Kalmusextrakt*. Fluid extract of c. ; made by packing 25 oz. (av.) of the rhizome of *Acorus c.* in No. 60 powder firmly in a percolator, then adding enough alcohol to saturate it and leave a layer above it, macerating for forty-eight hours with the lower aperture closed, exhausting by percolation with the gradual addition of alcohol, reserving the first 21¼ fl. oz. of the percolate, and evaporating the remainder to a soft extract, which is then dissolved in the reserved portion, and enough alcohol added to make 24 fl. oz. of the product. [U. S. Ph. (A, 247).]—**Infusum calami.** Fr., *infusion* (ou *hydrolé*) *de roseau aromatique*. A strained infusion of the rhizome of *Acorus c.* in boiling water ; formerly official in several pharmacopœias. [B, 119.]—**Oil of c.** Lat., *oleum* (seu *ætheroleum*) *calami, oleum calami æthereum*. Fr., *oléule* (ou *huile essentielle*) *de roseau aromatique*. Ger., *ätherisches Kalmusöl*. A volatile oil obtained from the rhizome of *Acorus c.* ; formerly official in a number of pharmacopœias. [B, 10, 119.]—**Oleosaccharum calami.** Fr., *oléosucre de roseau aromatique*. A preparation, formerly official, made by triturating 24 drops of oil of c. with 1 oz. of sugar. [B, 119.]—**Oleum calami, Oleum calami æthereum.** See *Oil of c.*—**Radix calami** (seu **calami aromatici**, seu **calami odorati**, seu **calami veri**, seu **calami vulgaris**), **Rhizoma calami** [Ger. Ph.]. Fr., *racine* (ou *rhizome*) *de roseau aromatique*. Ger., *Kalmuswurzel*. The rhizome of *Acorus c.* [B, 119, 180, 205, 270.]—**Spiritus calami.** Fr., *esprit* (ou *alcoolat*) *de roseau aromatique*. A preparation made by distilling the rhizome of *Acorus c.* with alcohol. [B, 119.]—**Sweet c.** The *Acorus c.* ; of Exodus, said to be a species of *Andropogon*. [B, 19.]—**Syrup of c.** Fr., *sirop de roseau aromatique*. An old preparation made by infusing 6 oz. of citron-rind in 41 oz. of apple-juice, and adding a clarified decoction made by boiling down to one half a mixture of 18 oz. each of apple-juice and the rhizome of *Acorus c.* and 72 oz. of water, adding 2 handfuls of the flowers of *Tussilago farfara*, expressing, and adding 12 oz. of sugar and 36 oz. of honey. [Sard. Ph., 1773 (B, 119).]—**Tinctura calami** (Ger. Ph.]. Fr., *alcoolé* (ou *teinture*) *de roseau aromatique*. Ger., *Kalmustinktur*. A tincture made by macerating 1 part of the rhizome of *Acorus c.* in 5 parts of dilute alcohol. Similar preparations were formerly official in several pharmacopœias. [B, 119.]—**Tinctura calami composita.** Fr., *teinture de roseau aromatique composée*. A preparation made by infusing 3 parts of the rhizome of *Acorus c.*, 1 part each of zedoary and ginger, and 2 parts of green oranges in 36 parts of alcohol, and filtering ; official in several old pharmacopœias. [B, 119.]

THE CALAMUS ROTANG. [A, 327.]

CALAMY, n. Ka^{2}l'a^{2}m-i^2. See CALAMINE.

CALANDRA (Lat.), n. f. Ka^{2}l(ka^{3}l)-a^{2}n(a^{3}n)'dra^3. Fr., *calandre*. A genus of the *Curculionidæ*. [A, 321.]—**C. granaria** [Linnæus]. Fr., *calandre* (ou *charançon*) *du blé*. A species destructive to rice and grain. [L, 43.]—**C. oryzæ** [Linnæus]. A species which infests rice. [A, 321.]—**C. palmarum.** Fr., *calandre des palmiers*. A species the larva of which (the palmer-worm of the tropics [Fr., *ver palmiste*]) is said to be eaten by the natives, and an oil that exudes from which on exposure to the sun is used for rheumatism and hæmorrhoids. [A, 321 ; L, 43.]

CALANDRÉIDE (Fr.), adj. Ka^{3}l-a^{3}n^2-dra-ed. Pertaining to or resembling the *Calandra* ; as a n., in the pl., see CALANDRŒIDÆ. [L, 41.]

CALANDRINIEÆ (Lat.), n. f. pl. Ka^{2}l(ka^{3}l)-a^{2}n(a^{3}n)-dri^{2}n-i-(i^2)'e^2-e(a^3-e^2). Fr., *calandriniées*. A tribe of portulaccaceous plants, including the genus *Calandrinia*. [B, 38.]

CALANDRITE (Fr.), adj. Ka^{3}l-a^{3}n^2-dret. See CALANDRÉIDE.

CALANDRITINÆ (Lat.), n. f. pl. Ka^{2}l(ka^{3}l)-a^{2}n(a^{3}n)-dri^{2}t-i-(e)'ne(na^3-e^2). A subfamily of the *Alaudidæ*. [L, 221.]

CALANDRŒIDÆ (Lat.), n. f. pl. Ka^{2}l(ka^{3}l)-a^{2}n(a^{3}n)-dre'-(dro^2'e^2)-i^{2}d-e(a^3-e^2). Fr., *calandréides*. A group of the *Curculionidæ*. [Schoenherr (L, 180).]

CALANGE (Fr.), n. Ka^{3}l-a^{3}n^{2}zh. The *Acorus calamus*. [A, 385.]

CALANTHE (Lat.), n. f. Ka^{2}l(ka^{3}l)-a^{2}n(a^{3}n)'the(tha). Gen., *calan'thes*. Of R. Brown, a genus of orchids of the tribe *Epidendreæ*, subtribe *Cœlogyneæ*. [B, 42.]—**C. veratrifolia** [R. Brown]. Syn. : *Limodorum veratrifolium* [Willdenow]. A species indigenous to the Moluccas, where it is used topically for subcutaneous œdema and internally for chronic diarrhœa. [B, 180.]

CALANTHIDÆ [Lindley], **CALANTHIDEÆ** (Lat.), n's f. Ka^{2}l(ka^{3}l)-a^{2}n(a^{3}n)'thi^{2}d-e(a^3-e^2), -a^{2}n(a^{3}n)-thi^{2}d'e^2-e(a^3-e^2). A tribe or section of orchids (*Vandeæ* [Lindley]), comprising *Calanthe*, etc. [B, 170.]

CALANTHIQUE (Fr.), **CALANTIQUE** (Fr.), n's. Ka^{3}l-a^{3}n-tek. An agaric having a white pileus. [B, 38.]

CALAPITE, n. Ka^{2}l'a^{2}p-it. See *Vegetable* BEZOAR.

CALAPITO, n. The *Teucrium iva*. [L, 105.]

CALÀPNATH (Hind.), n. The *Andrographis paniculata*. [B, 172.]

CALAPPIDÆ (Lat.), n. f. pl. Ka^{2}l(ka^{3}l)-a^{2}p(a^{3}p)'pi^{2}d-e(a^3-e^2). Fr., *calappes, calappiens*. A family of the *Brachyura*, including the genus *Calappa*. [L, 41, 240, 292.]

CALAPPITE, n. Ka^{2}l'a^{2}p-it. See *Vegetable* BEZOAR.

CALASAYA, n. Ka^{3}l-a^3-sa^3'ya^3. See CALISAYA.

CALATHIANA (Lat.), n. f. Ka^{2}l(ka^{3}l)-a^{2}th(a^{3}th)-i^2-a(a^3)'na^3. The *Gentiana pneumonanthe*. [B, 19, 38.]

CALATHIDE (Fr.), n. Ka^{3}l-a^3-ted. See CALATHIDIUM.

CALATHIDIFLORUS (Lat.), adj. Ka^{2}l(ka^{3}l)-a^2(a^3)-thi^{2}d-i^2-flor'u^{3}s(u^{4}s). From *calathidium* (*q. v.*), and *flos*, a flower. Fr., *calathidiflore*. Having flowers in calathidia (said of the involucre in the *Compositæ*). [B, 1.]

CALATHIDIUM (Lat.), n. n. Ka^{2}l(ka^{3}l)-a^2(a^3)-thi^{2}d'i^2-u^{3}m-(u^{4}m). From *καλαθίς*, a little basket. Fr., *calathide* [Mirbel]. Ger., *Körbchen, Blüthenkorb*. The flower-head of the *Compositæ* ; a capitulum (*q. v.*). [B, 1, 123.]

CALATHIFORM, CALATHINE, adj's. Ka^{2}l-a^{2}th'i^2-fo^{2}rm, ka^{2}l'a^{2}th-i^{2}n. Lat., *calathianus, calathinus, calathiformis* (from *calathus* [= *κάλαθος*], a basket, and *forma*, form). Fr., *calathin*. Ger., *korbförmig, napfförmig*. In botany, having the shape of a nearly hemispherical cup, also patelliform. [B, 19, 123 ; L, 116.]

CALATHIPHORUM (Lat.), n. n. Ka^{2}l(ka^{3}l)-a^2(a^3)-thi^{2}f'o(o^2)-ru^{3}m(ru^{4}m). From *κάλαθος*, a basket, and *φορεῖν*, to bear. Fr., *calathiphore*. Ger., *Blüthenkorbträger*. Of a composite plant, the receptacle of the capitulum ; a sort of receptacle bearing several calathidia. [Cassini (B, 1).]

CALATHIPHORUS (Lat.), adj. Ka^{2}l(ka^{3}l)-a^2(a^3)-thi^{2}f'o(o^2)-ru^{3}s(ru^{4}s). Fr., *calathiphore*. Ger., *blüthenkorbtragend*. Bearing calathidia. [L, 116.]

CALATHIS, CALATHIUM, CALATHUS (Lat.), n's f., n., and m. Ka^{2}l(ka^{3}l)'a^2(a^3)-thi^{2}s, ka^{2}l(ka^{3}l)-a(a^3)'thi^2-u^{3}m(u^{4}m), ka^{2}l-(ka^{3}l)'a^2(a^3)-thu^{3}s(thu^{4}s). Gr., *καλαθίς, καλάθιον, κάλαθος*. See CALATHIDIUM.

CALATULSI (Hind.), n. The *Ocimum sanctum*. [B, 172.]

CALBIANUM (Lat.), n. n. Ka^{2}l(ka^{3}l)-bi^2-a(a^3)'nu^{3}m(nu^{4}m). The name of a certain plaster mentioned by Myrepsus. [L, 94.]

CALBOA, n. See QUAMOCLIT.

CALCADINUM, CALCADIS, n's. Of the alchemists, zinc sulphate. [Ruland, Johnson (A, 325).]

CALCAIRE (Fr.), adj. Ka^{3}l-ka^{2}r. Calcareous ; as a n., calcium carbonate ; as a n. in the pl., c's, a group of the *Foraminifera* having a calcareous testa. [A, 301 ; B ; L, 321.]—**C. primitif.** Marble. [A, 301.]

CALCANEAL, CALCANEAN, adj's. Ka^{2}l-kan'e^2-a^{2}l, -a^{2}n. Lat., *calcaneus*. Fr., *calcanéen*. Pertaining to the calcaneum. [A, 385 ; L, 41.]

CALCANEO-ASTRAGALAR, adj. Ka^{2}l-kan''e^2-o-a^{2}s-tra^{2}g'-a^{2}l-a^{3}r. Fr., *calcanéo-astragalien*. Pertaining to the calcaneum and the astragalus. [C.]

CALCANEO-CAVUS (Lat.), n. m. Ka^{2}l(ka^{3}l)-kan(ka^{3}n)''e^2-o(o^2)-ka(ka^3)'vu^{3}s(wu^{4}s). A variety of club-foot in which the features of calcaneus and of cavus are combined.

CALCANEO-CUBOID, adj. Ka^{2}l-kan''e^2-o-ku^{2}b'oid. Fr., *calcanéo-cuboïdien*. Pertaining to the calcaneum and the cuboid bone. [C.]

CALCANEO-SCAPHOID, adj. Ka^{2}l-kan''e^2-o-ska^{2}f'oid. Lat., *calcaneo-scaphoideus*. Fr., *calcanéo-scaphoïdien*. Pertaining to the calcaneum and the scaphoid bone. [C.]

CALCANÉO-SOUS-PHALANGETTIEN COMMUN (Fr.), n. Ka^{3}l-ka^{3}n-a-o-su-fa^{3}l-a^{3}n^2-zhe^{2}t-i^2-a^{3}n ko^{2}m-u^{3}n^2. The flexor brevis digitorum pedis muscle. [C.]

CALCANÉO-SOUS-PHALANGIEN (Fr.), n. Ka^{3}l-ka^{3}n-a-o-su-fa^{3}l-a^{3}n^2-zhi^2-a^{3}n^2. See ADDUCTOR *hallucis* and ABDUCTOR *minimi digiti pedis*.—**C.-s.-p. commun.** See FLEXOR *brevis digitorum pedis*.

CALCANEO-TALAR, adj. Ka^{2}l-kan″e^2-o-tal′a^{3}r. See CALCANEO-ASTRAGALAR.

CALCANEO-VALGO-CAVUS (Lat.), n. m. Ka^{2}l(ka^{3}l)-kan(ka^{3}n)″e^2-o(o^2)-va^{2}l(wa^{3}l)‴go(go^2)-ka(ka^3)′vu^{3}s(wu^{4}s). A variety of club-foot in which the features of calcaneus, valgus, and cavus are combined.

CALCANEUM (Lat.), n. n. Ka^{2}l(ka^{3}l)-kan(ka^{3}n)′e^2-u^{3}m(u^{4}m). Fr., *calcanéum, os du talon*. Ger., *Fersenbein, Fersenknochen*. It., *calcagno*. Sp., *calcáneo*. Syn.: *os calcis*. The heel-bone; the largest bone of the tarsus, forming the posterior extremity of the tarsal arch, articulating with the astragalus above and the cuboid bone in front. [A, 70; C; L, 149, 150.]

CALCANEUS (Lat.), adj. Ka^{2}l(ka^{3}l)-kan(ka^{3}n)′e^2-u^{3}s(u^{4}s). See CALCANEAL; as a n. (*pes* or *talipes* understood [Fr., *pied-bot talus*; Ger., *Hackenfuss*]), a form of club-foot in which the dorsum of the foot is drawn up toward the shin, and only the heel touches the ground. [F. R. Fisher (A, 277).]

CALCANTHE, CALCANTHOS, CALCANTHUM (Lat.), n's f., m., and n. Ka^{2}l(ka^{3}l)-ka^{2}nth(ka^{3}nth)′e(a), -o^{2}s, -u^{3}m(u^{4}m). See CHALCANTHUM.

CALCAR (Lat.), n. n. Ka^{2}l(ka^{3}l)′ka^{3}r. Gen., *calcar′is*. Gr., κέντρον. Fr., *éperon*. Ger., *Sporn*. 1. The calcaneum. 2. A spur or any spur-like structure; in botany, especially an appendage, usually hollow, cylindrical, club-shaped, or saccate, of a portion of a flower, such as a petal; in the *Rotifera*, a group of setose processes arising just below the trochal disc in the median dorsal line, thought to be sensory. [A, 322; B, 1, 123; L, 121.] See also PRÆHALLUX.—**C. avis.** Ger., *Hahnensporn*. The hippocampus minor. [K; L, 115.]—**C. equestre.** The *Delphinium consolida*. [B, 180.]

CALCARATE, adj. Ka^{2}l′ka^{3}r-at. See CALCARATUS (1st def.).

CALCARATUS (Lat.), adj. Ka^{2}l(ka^{3}l)-ka^{3}r-a(a^3)′tu^{3}s(tu^{4}s). From *calcar*, a spur (1st def.), or *calx*, lime (2d def.). Fr., *calcarifère* (1st def.), *éperonné* (1st def.). Ger., *gespornt* (1st def.). 1. Provided with a spur. [B, 1, 123.] 2. Combined with or containing lime. [B, 119.]

CALCAREA (Lat.), n. f. Ka^{2}l(ka^{3}l)-ka(ka^3)′re^2-a^3. See CALCARIA (2d def.).

CALCAREA (Lat.), n. n. pl. Of Bowerbank, see CALCISPONGIÆ.

CALCAREÆ (Lat.), n. f. pl. Ka^{2}l(ka^{3}l)-ka(ka^3)′re^2-e(a^3-e^2). Ger., *Calcareen*. Of Rostafinski, an order of *Myxomycetes*, distinguished by simple or compound sporangeia often provided with a columella and containing violet or brownish spores. The whole fructification contains more or less calcium carbonate. [B, 75.]

CALCAREATUS (Lat.), adj. Ka^{2}l(ka^{3}l)-ka(ka^3)-re^2-a(a^3)′tu^{3}s(tu^{4}s). See CALCARATUS (2d def.).

CALCAREO-CORNEOUS, adj. Ka^{2}l-ka″re^2-o-ko^{2}rn′e^2-u^{3}s. From *calx*, lime, and *cornu*, a horn. Horny and containing calcareous matter. [L, 121.]

CALCAREO-FERRUGINOUS, adj. Ka^{2}l-ka″re^2-o-fe^{2}r-ru^2′ji^{2}n-u^{3}s. From *calx*, lime, and *ferrum*, iron. Fr., *calcaréo-ferrugineux*. Containing iron and calcareous matter. [L, 41.]

CALCAREO-MAGNESIAN, adj. Ka^{2}l-ka″re^2-o-ma^{2}g-ne′zi^2-a^{2}n. Fr., *calcaréo-magnésien*. Containing a magnesium compound and calcareous matter. [L, 41.]

CALCAREO-SABULOUS, adj. Ka^{2}l-ka″re^2-o-sa^{2}b′u^2-lu^{3}s. From *calx*, lime, and *sabula*, sand. Fr., *calcaréo-sableux*. Containing sand and calcareous matter. [L, 41.]

CALCAREO-SILICIOUS, adj. Ka^{2}l-ka″re^2-o-si^{2}l-i^{2}sh′u^{3}s. From *calx*, lime, and *silex*, flint. Fr., *calcaréo-siliceux*. Containing calcareous and silicious matter. [L, 41, 56.]

CALCAREO-SULPHUROUS, adj. Ka^{2}l-ka″re^2-o-su^{3}lf′u^2-ru^{3}s. Containing calcareous and sulphurous matter. [L, 73.]

CALCAREO-THORACIC, adj. Ka^{2}l-ka″re^2-o-tho-ra^{2}s′i^{2}k. From *calx*, lime, and θώραξ (see THORAX). Calcareous and homologous with the gill-covers of fishes (applied by Oken to the shells of the *Lamellibranchiata*). [L, 296.]

CALCAREOUS, adj. Ka^{2}l-ka′re^2-u^{3}s. Lat., *calcarius, calcareus*. Fr., *calcaire*. Ger., *kalkig, kalkicht, kalkartig*. It., *calcareo*. Sp., *calcáreo*. 1. Containing lime or calcium. 2. Chalky in consistence or appearance. 3. Growing in chalk or in chalky localities. [B, 19, 123.]

CALCAREUS (Lat.), adj. Ka^{2}l(ka^{3}l)-ka(ka^3)′re^2-u^{3}s(u^{4}s). Calcareous; as a n., a calcareous mineral. [B.]—**C. lactiformis.** See LAC *lunæ*.

CALCARIA [Ger. Ph.] (Lat.), n. f. Ka^{2}l(ka^{3}l)-ka(ka^3)′ri^2-a^3. Ger., *Kalkerde* (2d def.). 1. An old name for a sort of furnace used in making glass. [A, 325.] 2. Lime. [B.]—**Aqua calcariæ** [Ger. Ph.]. See *Liquor* CALCIS.—**Aqua calcariæ bicarbonicæ.** "Soda-water" (carbonic-acid water). [Bernatzik (A, 319).]—**Aqua calcariæ sulphurato-stibiatæ.** A solution of 1 part of calcium thioantimonate in 360 [Hannover Ph., 1833] or 200 [Pruss. Ph., 1839] parts of water, made by boiling; formerly employed for abdominal engorgements, dyscrasiæ, chronic rheumatism, chronic metallic poisoning, and glandular enlargements. [B, 119.]—**Aqua calcariæ ustæ.** See *Liquor* CALCIS.—**C. acetica.** Calcium acetate. [B.]—**C. animalis.** A material consisting chiefly of calcium carbonate or phosphate, obtained from the skeleton or exo-skeleton of animals, from animal concretions, and from other calcareous animal matter. [B, 270.]—**C. arsenicica.** Calcium arsenate. [B, 270.]—**C. carbonica.** Calcium carbonate. [B.]—**C. carbonica animalis.** Calcium carbonate obtained from the animal kingdom (from oyster-shells, etc.). [B, 270.] See CONCHÆ *marinæ præparatæ*, CORALLIA *alba*, CORALLIA *rubra*, ASTACOLITH, *Os* SEPIÆ *præparatum*, and *Testæ* OVORUM *præparatæ*.—**C. carbonica cruda** [Russ. Ph.]. Native calcium carbonate (chalk and marble). [B, 95.]—**C. carbonica præcipitata** [Russ. Ph.]. See *Precipitated* CALCIUM *carbonate*.—**C. caustica.** Ger., *Aetzkalk*. Quicklime [Bernatzik (A, 319).]—**C. caustica soluta** [Russ. Ph.]. See *Liquor* CALCIS.—**C. chlorata** [Ger. Ph.], **C. chlorica, C. chlorinica, Calcariæ chlorum.** See CALX *chlorata*.—**C. fluorica.** Calcium fluoride. [B, 180.]—**C. glycerino-phosphorica.** A compound of glycerin and calcium phosphate. [Bernatzik (A, 319).]—**C. hydrata, C. hydrica.** Ger., *Kalkhydrat*. Slaked lime. [B; L, 65.]—**C. hydrochlorica.** See CALCIUM *chloride*.—**C. hydroiodica.** See CALCIUM *iodide*.—**C. hypochlorosa.** See CALX *chlorata*.—**C. hypophosphorosa.** See CALCIUM *hypophosphite*.—**C. muriatica.** Dried calcium chloride. [B, 270.]—**C. muriatica oxygenata, C. oxymuriatica.** See CALX *chlorata*.—**C. phosphorica.** Calcium phosphate; of the Russ. Ph., monohydric calcium phosphate. [B, 95, 119.]—**C. phosphorica acida.** Acid calcium phosphate. [Bernatzik (A, 319).]—**C. phosphorica ex ossibus.** See CALCIUM *phosphoricum crudum*.—**C. phosphorico-hydro-chlorata.** See CALCIUM *chlorhydrophosphate*.—**C. phosphorico-lactica.** See CALCIUM *lactophosphate*.—**C. pura.** Quicklime. [B, 119.]—**C. pura liquida.** See *Liquor* CALCIS.—**C. saccharata.** See *Syrupus* CALCIS.—**C. soluta.** See *Liquor* CALCIS.—**C. subsulfurosa.** See CALCIUM *thiosulphate*.—**C. sulfurata.** See CALCIUM *sulphide* and CALX *sulphurata*.—**C. sulfurica usta.** Ger., *gebranntes schwefelsaures Calcium*. Burnt plaster of Paris. [B.]—**C. sulphurata.** See *C. sulfurata*.—**C. sulphurata stibiata Hoffmanni, C. sulphurato-stibiata.** See CALCIUM *sulfurato-stibiatum*.—**C. sulphurica.** See CALCIUM *sulphate*.—**C. usta** [Ger. Ph.]. Quicklime. [B.]—**Citras calcariæ animalis.** Calcium citrate prepared by subjecting oyster-shells or crabs' eyes to the action of lemon-juice or lime-juice. [B, 119.]—**Hydras calcariæ.** Slaked lime. [B, 119.]—**Linimentum calcariæ sulphuratæ.** Fr., *liniment de foie de soufre calcaire*. Syn.: *arcanum Archideti*. A mixture of 1 oz. of calcium sulphide (calx sulphurata), 2 drachms of oil of juniper, and 10 drops of Dippel's animal oil; used in gout. [B, 119.]—**Liquor calcariæ muriaticæ.** See *Liquor* CALCII *chloridi*.—**Liquor calcariæ phosphorico-hydrochloratæ.** Calcium chlorhydrophosphate (*q. v.*) in solution.—**Liquor calcariæ phosphorico-lacticæ.** Syrup of lactophosphate of calcium. [Bernatzik (A, 319).]—**Pilulæ calcariæ sulphurato-stibiatæ.** Fr., *pilules de sulfure d'antimoine et de calcium*. Pills each containing $\frac{1}{16}$ of a grain of calcium thioantimonate mixed with tragacanth mucilage. [Batav. Ph., Niemann's ed., 1811; B, 119.]—**Pulvis calcariæ sulphuratæ cum aconito.** Fr., *poudre antiphthisique*. A powder made up of 4 parts of calcium sulphide (calx sulphurata), 2 parts of licorice-juice, and 1 part of aconite leaves. [B, 119.]—**Solutio calcariæ muriaticæ.** See *Liquor* CALCII *chloridi*.—**Solutio calcariæ sulphurato-stibiatæ.** See *Aqua calcariæ sulphurato-stibiatæ*.—**Subcarbonas calcariæ cretaceus.** Chalk. [B, 119.]—**Sulphuretum calcariæ et stibii.** Calcium thioantimonate. [B, 119.]—**Surphosphas calcariæ.** Calcium superphosphate. [B, 119.]—**Syrupus calcariæ.** See *Syrupus* CALCIS.

CALCARIFEROUS, adj. Ka^{2}l-ka^{2}r-i^{2}f′e^{2}r-u^{3}s. Lat., *calcariferus* (from *calx*, lime, or *calcar*, a spur, and *ferre*, to bear). Fr., *calcarifère*. See CALCARATUS.

CALCARIFORM, adj. Ka^{2}l-ka^{2}r′i^2-fo^{2}rm. Lat., *calcariformis* (from *calcar*, a spur, and *forma*, form). Fr., *calcariforme*. Spur-shaped. [B, 1, 19.]

CALCARINE, adj. Ka^{2}l′ka^{2}r-i^{2}n. Fr., *calcarin*. Pertaining to a spur or to the hippocampus minor. [A, 385; L, 142.]

CALCARIUS (Lat.), adj. Ka^{2}l(ka^{3}l)-ka(ka^3)′ri^2-u^{3}s(u^{4}s). See CALCAREOUS and CALCARATUS; as a n. m. (*lapis* understood), limestone. [A, 325.]

CALCATAR, n. See CALCADINUM.

CALCATON, n. An old name for a troche containing arsenic. [L, 109.]

CALCATOR, n. See CALCADINUM.

CALCATREPPOLA (It.), n. Ka^{3}l-ka^3-tre^{2}p′po-la^3. The *Agaricus prunulus*. [L, 105.]

CALCATRIPA, CALCATRIPPA [Tournefort] (Lat.), n's f. Ka^{2}l(ka^{3}l)-ka^3-tri(tre)′pa^3, -tri^{2}p′pa^3. The genus *Delphinium*. [B.]—**Semen calcatrippæ.** The seed of *Delphinium consolida*. [B, 270.]

CALCEARIA [Blume] (Lat.), n. f. Ka^{2}l(ka^{3}l)-se^2(ke^2)-a(a^3)′ri^2-a^3. Fr., *calcéaire*. See CORYSANTHES.

CALCEDON (Lat.), n. f. Ka^{2}l(ka^{3}l)-se(ka)′do^{2}n(don). See CHALCEDON.

CALCEIFORM, adj. Ka^{2}l′se-i^2-fo^{2}rm. Lat., *calceiformis*. Fr., *calcéiforme*. See CALCEOLATE.

CALCENA, CALCENON, CALCENONIA (Lat.), n's f., n., and f. Ka^{2}l(ka^{3}l)-se(ka)′na^3. -no^{2}n, -se^{2}n(ke^{2}n)-on′i^2-a^3. Terms applied by Paracelsus to a morbific calcareous matter. [A, 325.]

CALCENONIUS, CALCENOS (Lat.), adj's. Ka^{2}l(ka^{3}l)-se^{2}n-(ke^{2}n)-on′i^2-u^{2}s(u^{4}s), -se(ka)′no^{2}s. See CALCETUS.

CALCÉOLAIRE (Fr.), n. Ka^{3}l-sa-o-la^{2}r. See CALCEOLARIA.

CALCEOLAREÆ [Bentham] (Lat.), n. f. pl. Ka^{2}l(ka^{3}l)-se^2-(ke^2)-o(o^2)-la(la^3)′re^2-e(a^3-e^2). See CALCEOLARIEÆ (1st def.).

CALCEOLARIA (Lat.), n. f. Ka^{2}l(ka^{3}l)-se^2(ke^2)-o(o^2)-la(la^3)′ri^2-a^3. From *calceolus* (dim. of *calceus*), a slipper. Fr., *calcéolaire*. The slipperwort (from the slipper-shaped lip of the corolla); of Linnæus, a genus of scrophularineous herbs and shrubs constituting the tribe *Calceolarieæ*. [B, 19, 42.]—**C. corymbosa.** A species used as a diuretic. [L, 49.]—**C. inflexa** [Ruiz and Pavón]. A Peruvian species, used as a vulnerary. [B, 173.]—**C. pinnata** [Linnæus]. A Peruvian species. The leaves are purgative and emetic. [B, 121, 173.]—**C. punctata** [Vahl]. Syn.: *Jovellana punctata* [Ruiz and Pavón]. A shrub of Peru and Chili, where the stalk and leaves are used as a purgative, especially in syphilis. [B, 180.]—**C.**

reseda [Ruiz and Pavón]. A Peruvian species, used as a febrifuge and antiseptic. [B, 121.]—**C. rugosa.** A species used as a vulnerary. [L, 49.]—**C. scabiosæfolia.** A species used as an emetic. [L, 49.]—**C. serrata** [Lamarck]. See *C. inflexa.*—**C. trifida** [Ruiz and Pavón]. A Peruvian species, used as a febrifuge and antiseptic. [B, 173.]

CALCEOLARIEÆ (Lat.), n. f. pl. Ka^{2}l(ka^{3}l)-se^2(ke^2)-o(o^2)-la^3-ri(ri^2)'e^2-e(a^3-e^2). 1. Of D. Don, G. Don, and Bentham, a tribe of the *Scrophularineæ*, comprising *Calceolaria* and other genera since referred to that genus. 2. Of Reichenbach, a subsection of the *Verbasceæ*, comprising the sections *Utricularieæ*, *Pinguiculeæ*, and *C. genuinæ*, the latter being the same as the *C.* (1st def.). [B, 42, 170.]

CALCEOLATE, adj. Ka^{2}l'se^2-o-lat. Lat., *calceolatus*. Fr., *calcéolé*. Ger., *schuhförmig*. Shaped like a shoe or slipper. [B, 19.]

CALCEOLUS (Lat.), n. m. Ka^{2}l(ka^{3}l)-se(ke^2)'o(o^2)-lu^{3}s(lu^{4}s). Fr., *calcéole*. See CYPRIPEDIUM.—**C. marianus** [Mönch]. The *Cypripedium c.* [B, 173.]

CALCEOSTOMA (Lat.), n. n. Ka^{2}l(ka^{3}l)-se^2(ke^2)-o^{2}s'to(to^2)-ma^3. Gen., *calceostom'atos* (*-tis*). Of Van Beneden, a genus of the *Gyrodactylidæ*, having the caudal sucker provided with a single horny structure taking the place of the hooks of the other *Gyrodactylidæ*. [L, 16.]

CALCEOUS, adj. Ka^{2}l'se^2-u^{3}s. Lat., *calceus*. See CALCAREOUS (1st def.).

CALCÉPONGES (Fr.), n. pl. Ka^{3}l-sa-po^{2}n^{2}zh. See CALCISPONGIÆ.

CALCETUS (Lat.), adj. Ka^{2}l(ka^{3}l)-se(ka)'tu^{3}s(tu^{4}s). Affected with calcena (said by Paracelsus of the blood). [A, 325.]

CALCEUM EQUINUM (Lat.), n. n. Ka^{2}l(ka^{3}l)'se^2(ke^2)-u^{3}m-(u^{4}m) e(e^2)-kwi(kwe)'nu^{3}m(nu^{4}m). The *Tussilago farfara.* [L, 84.]

CALCHE (Lat.), n. f. Ka^{2}l(ka^{3}l)'ke(ch^{2}a). Gen., *cal'ches*. Gr., *κάλχη*. An ancient name for a shell-fish which yielded a purple dye, also for the *Caltha palustris*. [A, 387.]

CALCHODES (Lat.), adj. Ka^{2}l(ka^{3}l)-ko(ch^{2}o)'dez(das). From *κάλχη* (see CALCHE), and *εἶδος*, resemblance. Ger., *schneckenförmig*. Snail-shaped. [A, 322.]

CALCIC, adj. Ka^{2}l'si^{2}k. Lat., *calcicus* (from *calx*, lime). Fr., *calcique*. Containing lime or calcium. [B.]

CALCICOLUS (Lat.), adj. Ka^{2}l(ka^{3}l)-si^{2}k(ki^{2}k)'o(o^2)-lu^{3}s(lu^{4}s). From *calx*, lime, and *colere*, to inhabit. Fr., *calcicole*. See CALCAREOUS (3d def.).

CALCIDES (Fr.), n. pl. Ka^{3}l-sed. A group of elements, including barium, strontium, calcium, and magnesium. [Ampère (A, 301, 385).]

CALCIDICUM, n. An alchemical name for a medicament made from arsenic. [Ruland, Johnson (A, 325).]

CALCIFEROUS, adj. Ka^{2}l-si^{2}f'e^{2}r-u^{3}s. Lat., *calciferus* (from *calx*, lime, and *ferre*, to bear). Fr., *calcifère*. Ger., *kalkführend*. Containing lime, calcium, or chalk. [A, 301, 322, 385 ; L, 81.]

CALCIFICATION, n. Ka^{2}l-si^2-fi^2-ka'shu^{3}n. From *calx*, lime. Fr., *calcification*. Ger., *Verkalkung*. The transition of a tissue or part into a chalky or bony state, due to the deposit of calcareous matter. [A, 301.]

CALCIFORM, adj. Ka^{2}l'si^2-fo^{2}rm. From *calx*, lime, and *forma*, form. Chalky, calcareous. [L, 56.]

CALCIFRAGA (Lat.), n. f. Ka^{2}l(ka^{3}l)-si^{2}f(ki^{2}f)'ra^3-ga^3. From *calx*, lime, and *frangere*, to break, because of a supposed lithontriptic power. Fr., *calcifrage*. Of Pliny, the *Globularia alypum* ; of Lobel, the *Crithmum maritimum* ; of Scribonius Largus, the *Scolopendrium*. [B, 121.] Cf. SAXIFRAGA.

CALCIFUGE, CALCIFUGOUS, adj's. Ka^{2}l'si^2-fu^{2}j, ka^{2}l-si^{2}f'-u^2-gu^{3}s. From *calx*, lime, and *fugere*, to avoid. Having a repulsion for chalk (said of certain plants the development of which is hindered or arrested by growth in a chalky soil) ; not found on calcareous rocks (said of saxicole plants). [B, 121.]

CALCIGENOUS, adj. Ka^{2}l-si^{2}j'e^{2}n-u^{3}s. Lat., *calcigenus* (from *calx*, lime, and *gigni*, to be born). Fr., *calcigène*. Ger., *kalkzeugend*. Formed from or of the nature of calcareous matter ; also calciferous. [A, 322, 385 ; L, 41.]

CALCIGEROUS, adj. Ka^{2}l-si^{2}j'e^{2}r-u^{3}s. From *calx*, lime, and *gerere*, to bear. See CALCIFEROUS.

CALCIGRADUS (Lat.), adj. Ka^{2}l(ka^{3}l)-si^{2}g(ki^{2}g)'ra^3-du^{3}s-(du^{4}s). From *calx*, the heel, and *gradus*, a step. Gr., *πτερνοβάτης*. Stepping heavily on the heels in walking. [A, 325 ; L, 84, 108.]

CALCINATION, n. Ka^{2}l-si^{2}n-a'shu^{3}n. Gr., *τέφρωσις*. Lat., *calcinatio*. Fr., *calcination*. Ger., *Calcinirung, Verkalkung, Einascherung*. The process of subjecting an incombustible compound to great heat, in order to drive off its vaporizable constituents, such as water, carbonic acid, etc. [A, 322, 325, 385.]

CALCINATORY, n. Ka^{2}l'si^{2}n-a^{2}t-o-ri^2. Fr., *calcinatoire*. A vessel used in calcination. [L, 56.]

CALCINATUM (Lat.), n. n. Ka^{2}l(ka^{3}l)-si^{2}n(ki^{2}n)-a(a^3)'tu^{3}m-(tu^{4}m). A calcined substance. [L, 119.]—**C. majus.** A substance dulcified artificially, such as mercury, lead, etc. [L, 84.]—**C. majus Poterii.** Mercury dissolved in nitric acid and precipitated with salt-water ; formerly used for the cure of ulcers. [L, 84.]—**C. minus.** A substance that is naturally sweet. [L, 84.]

CALCINED, adj. Ka^{2}l'si^{2}nd. Lat., *calcinatus*. Fr., *calciné*. Ger., *calcinirt, verkalkt*. Having been subjected to calcination. [B, L, 43.]

CALCINONIA (Lat.), n. f. Ka^{2}l(ka^{3}l)-si^{2}n(ki^{2}n)-on'i^2-a^3. See CALCENA.

CALCINONIUS (Lat.), adj. Ka^{2}l(ka^{3}l)-si^{2}n(ki^{2}n)-on'i^2-u^{3}s(u^{4}s). See CALCETUS.

CALCIO-MONOHYDRIC, adj. Ka^{2}l''si^2-o-mo^{2}n-o-hid'ri^{2}k. Containing calcium and one atom of hydrogen. [B.]

CALCIO-TETRAHYDRIC, adj. Ka^{2}l''si^2-o-te^{2}t-ra^3-hid'ri^{2}k. Containing calcium and four atoms of hydrogen. [B.]

CALCIPAROUS, adj. Ka^{2}l-si^{2}p'a^{2}r-u^{3}s. From *calx*, lime, and *parere*, to yield. Fr., *calcipare*. See CALCIFEROUS.

CALCIPHYTA (Lat.), n. n. pl. Ka^{2}l(ka^{3}l)-si^{2}f(ki^{2}f)'i^{2}t(u^{6}t)-a^3. From *calx*, lime, and *φυτόν*, a plant. Fr., *calciphytes*. Ger., *Kalkpflanzen*. Of De Blainville, a class of the *Pseudozoa*, comprising those that are fibrous within and calcareous without. [L, 180.]

CALCIQUE (Fr.), adj. Ka^{3}l-sek. See CALCIC.

CALCISPONGIÆ (Lat.), n. f. pl. Ka^{2}l(ka^{3}l)-si^2(ki^2)-spo^{2}n-(spo^{2}n^2)'ji^2(gi^2)-e(a^3-e^2). Fr., *calcéponges*. Ger., *Kalkschwämme*. The calcisponges ; an order of the *Spongida*, having the skeleton composed of calcium carbonate. [L, 147.]

CALCITRAPA (Lat.), n. f. Ka^{2}l(ka^{3}l)-si^{2}t(ki^{2}t)'ra^3-pa^3. Fr., *calcitrape*. 1. Of Jussieu, a genus of composite plants, now regarded as a section of *Centaurea*. 2. Of Cassini, the *Centaurea c.* [B, 42.]—**C. lanuginosa** [Lamarck]. The *Centaurea benedicta*. [B, 270.]—**C. officinalis.** See *C.* (2d def.).—**C. solstitialis** [Lamarck]. The *Centaurea solstitialis*. [B, 180.]—**C. stellata** [Lamarck]. See *C.* (2d def.).

CALCITRAPEÆ (Lat.), n. f. pl. Ka^{2}l(ka^{3}l)-si^2(ki^2)-tra^{2}p-(tra^{3}p)'e^2-e(a^3-e^2). Of Cassini, a subdivision of composite plants (*Centaurieæ archetypæ*), comprising the *C. veræ* (including the genus *Cnicus* and the genera *Mesocentron, Verutina, Triplocentron*, and *Calcitrapa*, which are all now referred to *Centaurea*) and the *Seridieæ*. [B, 170.]

CALCITRAPIC ACID, n. Ka^{2}l-si^2-tra^{2}p'i^{2}k. Fr., *acide calcitrapique*. Of Colignon, a bitter, non-crystallizable substance obtained from plants of the genus *Centaurea* ; probably not a pure principle. [A, 301.]

CALCITRIPPA (Lat.), n. f. Ka^{2}l(ka^{3}l)-si^2(ki^2)-tri^{2}p'pa^3. See CALCITRAPA.

CALCIUM (Lat.), n. n. Ka^{2}l(ka^{3}l)'si^2(ki^2)-u^{3}m(u^{4}m). From *calx*, lime. Fr., *c.* Ger., *C.* It., Sp., *calcio*. A metallic element occurring in lime, first isolated by Sir H. Davy, in 1808 ; yellowish ; harder than lead ; tough and malleable according to some authors, but very brittle according to others ; of the sp. gr. of 1·5778 ; readily oxidized in moist air ; decomposing water when brought in contact with it ; bivalent ; of the atomic weight 39·9 ; symbol, Ca. [B, 3.]—**Acid c. lactate.** Fr., *lactate acide de c.* Ger., *saures milchsaures C.* A compound of normal c. lactate with lactic acid, $Ca(C_3H_5O_3)_2 \cdot 2C_3H_6O_3 + 2H_2O$, forming fibrous crystalline masses. [B, 3.]—**Acid c. phosphate.** Fr., *phosphate acide de c.* (ou *de chaux*). Ger., *saures phosphorsaures C.* Tetrahydric c. phosphate. [B.] See *C. phosphate.*—**Acid c. succinate.** Fr., *succinate acide de c.* Ger., *saures bernsteinsaures C.* A compound of c. succinate and succinic acid, $(C_4H_4O_4)_2CaH_2 = C_4H_4O_4 + C_4H_6O_4$, forming transparent prismatic crystals. [B, 3.]—**Acid c. tartrate.** Fr., *tartrate acide de c.* Ger., *saures weinsaures C.* A compound,

$$(C_4H_5O_6)_2Ca = \begin{matrix} CH(OH)-CO.OH & & & OH.CO-CH(OH) \\ | & & & | \\ CH(OH)-CO.O & -Ca- & O.CO & -CH(OH) \end{matrix},$$

forming rhombic crystals much more soluble in water than normal c. tartrate. It occurs in the fruit of *Rhus typhinum*, and is prepared artificially by dissolving normal c. tartrate in a solution of tartaric acid. [B, 3.]—**Aethylschwefelsäure-C'ester** (Ger.), **Aethylschwefelsaures C.** (Ger.). See *C. ethylsulphate.*—**Alcoholized solution of chloride of c.** A solution of 1 part of c. chloride in 5 parts of alcohol and 3 of water. [Ferrara Ph., 1832 (B, 119).]—**Ameisensäure-C'ester** (Ger.), **Ameisensaures C.** (Ger.). See *C. formate.*—**Anhydrous c. chloride.** Fused c. chloride. [B.]—**Antimonigsaures C.** (Ger.), **Antimonite de c.** (Fr.). See *C. hypoantimonate.*—**Azotate de c.** (Fr.). See *C. nitrate.*—**Azotite de c.** (Fr.). See *C. nitrite.*—**Basic c. arsenite.** Fr., *arsénite basique de c.* Ger., *basisches arsenigsaures C.* Watts's name for normal c. arsenite, also for certain other arsenites of c., one of which has the formula $Ca_3As_2O_6$. [B, 2.]—**Basic c. chloride.** See *C. oxychloride.*—**Basic c. hypochlorite.** See under *C. hypochlorite.*—**Basic c. phosphate.** Fr., *phosphate basique de c.* Ger., *basisches phosphorsaures C.* Tribasic (normal) c. phosphate. [B.]—**Basic c. sulpharsenate.** See *C. thioarsenate.*—**Basic c. sulpharsenite** [Watts]. Normal c. thioarsenite. [B, 2.]—**Bernsteinsaures C.** (Ger.). See *C. succinate.*—**Bihydrophosphate de c.** (Fr.). Tetrahydric c. phosphate. [B.]—**Bioxyde de c.** (Fr.). See *C. dioxide.*—**Biphosphate de c.** (Fr.). Tetrahydric c. phosphate. [B.]—**Bisulfure de c.** (Fr.). See *C. disulphide.*—**Biurate de c.** (Fr.). Acid c. urate. [B.]—**Brenztraubensaures C.** (Ger.). C. pyroracemate. [B.] See *C. pyruvate.*—**Bromuretum calcii.** C. bromide. [B, 119.]—**Burnt c. sulphate.** See *C. sulfuricum ustum.*—**Calcii acetas.** See *C. acetate.*—**Calcii arsenias.** See *C. arsenate.*—**Calcii binoxydum.** See *C. dioxide.*—**Calcii boras.** See *C. borate.*—**Calcii bromas.** See *C. bromate.*—**Calcii bromidum** [U. S. Ph.], **Calcii bromuretum.** See *C. bromide.*—**Calcii carbonas.** See *C. carbonate.*—**Calcii carbonas præcipitata** [Br. Ph.], **Calcii carbonas præcipitatus** [U. S. Ph.]. See *Precipitated c. carbonate.*—**Calcii chloras.** See *C. chlorate.*—**Calcii chloridum** [U. S. Ph., Br. Ph.], **Calcii chloruretum.** Of the U. S. Ph., fused c. chloride ; of the Br. Ph., dried c. chloride. [B.]—**Calcii citras.** See *C. citrate.*—**Calcii cyanidum, Calcii cyanuretum.** See *C. cyanide.*—**Calcii ferrocyanidum.** See *C. ferrocyanide.*—**Calcii fluoridum, Calcii fluoruretum.** See *C. fluoride.*—**Calcii hydras.** See *C. hydroxide.*—**Calcii hypochloris.** See *C. hypochlorite.*—**Calcii hypophosphis** [U. S. Ph.]. See *C. hypophosphite.*—**Calcii hyposulphis.** See *C. thiosulphate.*—**Calcii iodas.** See *C. iodate.*—**Calcii iodidum, Calcii ioduretum.** See *C. iodide.*—**Calcii monoxi-**

dum, Calcii monoxydum. See LIME.—**Calcii nitras.** See *C. nitrate.*—**Calcii oxalas.** See *C. oxalate.*—**Calcii oxidum, Calcii oxydum.** See *C. oxide* and LIME.—**Calcii oxysulphuretum.** Fr., *sulfure de c.*, *foie de soufre calcaire.* See *Solution of c. sulphide.*—**Calcii peroxidum, Calcii peroxydum.** See *C. dioxide.* —**Calcii phosphas** [Br. Ph.]. See *C. phosphate.*—**Calcii phosphas præcipitatus** [U. S. Ph.]. See *Precipitated c. phosphate.*—**Calcii phosphis.** See *C. phosphite.*—**Calcii quinas.** See *C. quinate.*—**Calcii sulphas** [Br. Ph.]. C. sulphate ; of the Br. Ph., native or unburnt c. sulphate (gypsum). [B, 95.]—**Calcii sulphas ustus.** Burnt c. sulphate. [B, 81.]—**Calcii sulphidum.** See *C. sulphide* and CALX *sulphurata.*—**Calcii sulphis.** See *C. sulphite.* —**Calcii sulphocarbolas.** See *C. sulphocarbolate.*—**Calcii sulphuretum.** See *C. sulphide* and CALX *sulphurata.*—**Calcii tartras.** See *C. tartrate.*—**C. acetate.** Lat., *calcii acetas, c. aceticum, acetas calcis, calx acetata.* Fr., *acétate calcique* (ou *de c.*, ou *de chaux*). Ger., *C'acetat, essigsaures C.* Syn. : *calcic acetate, acetate of lime.* A compound, $(C_2H_3O_2)_2Ca + H_2O$, of c. and acetic acid, forming prismatic acicular crystals or spongy white masses soluble in water ; formerly prepared by the action of vinegar on coral, pearls, mother-of-pearl, etc., and hence called *sal coralliorum* (seu *margaritarum*, seu *matris perlarum*, seu *oculorum cancri*) ; said to be diuretic and resolvent, and used in scrofula. [B, 4, 119.]—**C. aceticum.** See *c. acetate.*—**C. acetoglycollate.** Fr., *acéto-glycolate de c.* Ger., *acetoglycolsaures C.* A substance, $CaH_{10}C_8O_4 + 2H_2O = C(O.C_2H_3O)H_2 - CO.O - Ca - O.CO - H_2\text{-}(O.C_2H_3O)C + H_2O$, occurring as small prismatic crystals. [B, 3.] —**C. acetylide.** Fr., *acétylure de c.* Ger., *C'acetylür.* A body of the composition C_2Ca. [B, 3.]—**C. aconitate.** Fr., *aconitate de c.* Ger., *aconitsaures C.* A compound of c. and aconitic acid. *Normal aconitate of c.*, $(C_6H_3O_6)_2.Ca_3 + 6H_2O$, found in large amount in extract of aconite, forms prismatic crystals soluble with difficulty in water. [B, 2, 4.]—**C. acrylate.** Fr., *acrylate de c.* Ger., *acrylsaures C.* A compound of c. and acrylic acid, $Ca(C_3H_3O_2)$, forming thick acicular crystals. [B, 3.]—**C. adipate.** Fr., *adipate de c.* Ger., *adipinsaures C.* A compound of c. and adipic acid, $Ca.C_6H_8O_4 + H_2O$. [B, 2.]—**C. amidosulphonate.** Fr., *amido-sulfonate de c.* Ger., *amidosulfonsaures C.* A compound, $(NH_2SO_2.O)_2Ca + 4H_2O$, forming laminar crystals very soluble in water. [E. Berglund, "Proc. of the Am. Pharm. Assoc.," 1879, p. 331 (B).]—**C. and ammonium arsenate.** A salt of the composition $Ca(NH_4).AsO_4 + 6H_2O$. [B, 2.]—**C. and ethyl sulphate.** See *C. ethylsulphate.*—**C. and methyl sulphate.** See *C. methylsulphate.*—**C. and potassium lactate.** Fr., *lactate de c. et de potassium.* Ger., *C'kaliumlactat.* A salt of the composition $Ca(C_3H_5O_3)_2.2C_3H_5KO_3$. [B, 4.]—**C. and potassium sulphate.** Fr., *sulfate de c. et de potassium.* A salt of the composition $CaSO_4.K_2SO_4 + H_2O$. Deprived of its water of crystallization by heating, it acquires the property of solidifying with water like plaster of Paris. [B, 3.]—**C. and sodium sulphate.** Fr., *sulfate de c. et de sodium.* A salt of the composition $CaSO_4.Na_2SO_4$, occurring native as glauberite. [B, 3.]—**C. angelate.** Fr., *angélicate de c.* Ger., *angelicasaures C.* A salt of c. and angelic acid, $Ca(C_5H_7O_2)_2 + 2H_2O$, forming shining prismatic crystals soluble in 4 parts of cold water ; less soluble in hot water. [B, 3.]—**C. antimonate.** Fr., *antimoniate de c.* Ger., *antimonsaures C.* A substance of the composition $Ca(SbO_3)_2$. [B, 2.]—**C. antimonite.** Fr., *antimonite de c.* Ger., *antimonigsaures C.* See *C. hypoantimonate.*—**C. antimonio-sulphuratum.** See *C. sulfurato-stibiatum.*—**C. arabate.** Fr., *arabate de c.* Ger., *arabinsaures C.* Syn. : *c. gummate.* A compound of c. and arabic acid constituting gum arabic. [B, 8.] See ACACIA.—**C. arsenate.** Lat., *calcii arsenias, c. arsenicicum.* Fr., *arséniate de c.* Ger., *C'arseniat, arsensaures C.* A compound of c. and arsenic (orthoarsenic) acid. Three such compounds are known : 1. *Normal c. arsenate* (tricalcic arsenate), Ca_3AsO_4. insoluble in water. 2. *Monohydric c. arsenate*, $CaHAsO_4$, occurring native combined with water of crystallization as the minerals haidingerite and pharmacolite. 3. *Tetrahydric c. arsenate*, $CaH_4(AsO_4)_2$. [B, 2, 3.]—**C. arsenite.** Lat., *calcii arsenis, c. arseniosum* (seu *arsenicosum*). Fr., *arsénite de c.* Ger., *C'arsenit, arsenigsaures C.* A compound of c. and arsenious (orthoarsenious) acid. *Normal c. arsenite*, $Ca_3(AsO_3)_2$, was formerly called basic c. arsenite, and the name arsenite of c. was applied to c. metarsenite (*q. v.*). [B, 2, 3.]—**C'äthylsulfat** (Ger.). See *C. ethylsulphate.*—**C. benzoate.** Lat., *calcii benzoas, c. benzoicum.* Fr., *benzoate de c.* (ou *de chaux* [Fr. Cod.]). Ger., *benzoësaures C., C'benzoat.* A compound, $Ca(C_7H_5O_2)_2 + 4H_2O$, forming white efflorescent crystalline grains, soluble in 20 parts of cold water. [B.]—**C. binoxide.** See *C. dioxide.*—**C. biphosphate.** Fr., *biphosphate de c.* (ou *de chaux*). An old name for tetrahydric c. phosphate. [B.]—**C. bisulphide.** See *C. disulphide.*—**C. biurate.** Acid c. urate. [B.] See *C. urate.*—**C. borate.** Lat., *calcii boras, c. boricum.* Fr., *borate de c.* Ger., *C'borat, borsaures C.* A white powder, $Ca(BO_2)_2 + 2H_2O$, prepared by adding neutral sodium borate to a solution of c. chloride. Other borates of c., of varying composition, are obtained by decomposing c. chloride with borax, and several compounds of c. with the acids of boron occur native as minerals. [B, 270.]—**C. bromate.** Lat., *calcii bromas, c. bromicum.* Fr., *bromate de c.* Ger., *C'bromat, bromsaures C.* A crystalline compound of c. and bromic acid, $Ca(BrO_3)_2$. [B, 270.]—**C. bromatum.** See *C. bromide.*—**C. bromicum.** See *C. bromate.*—**C. bromide.** Lat., *calcii bromidum, c. bromatum.* Fr., *bromure de c.* Ger., *C'bromür, Bromc', C'bromid.* A white deliquescent granular substance, $CaBr_2$, of a bitter, saline taste, readily soluble in water and in alcohol ; used as a substitute for potassium bromide in epilepsy and insomnia. [B, 3, 5.]—**C. butyrate.** Fr., *butyrate de c.* Ger., *C'butyrat, buttersaures C.* A compound of c. and butyric acid, $(C_4H_7O_2)_2Ca + H_2O$, forming transparent scales readily soluble in water. The isomeric *c. isobutyrate*, which contains 5 molecules of water of crystallization, forms monoclinic acicular crystals and is less soluble. [B, 3.]—**C. caprate.** Fr., *caprate de c.* Ger., *C'caprat, caprinsaures C.* A crystalline compound of c. and capric acid, $(C_{10}H_{19}O_2)_2Ca$. [B, 3.]—**C. caproate.** Fr., *caproate de c.* Ger., *capronsaures C.* A compound of c. and caproic acid, $(C_6H_{11}O_2)_2Ca + H_2O$, forming thin, shining laminar crystals. [B, 3.]—**C. carbonate.** Lat., *calcii carbonas, c. carbonicum, carbonas calcicus.* Fr., *carbonate de c.* (ou *de chaux*). Ger., *C'carbonat, kohlensaures C., kohlensaurer Kalk.* Syn. : *carbonate of lime.* A compound of c. and carbonic acid, $CaCO_3$, occurring widely diffused in nature in the form of limestone, marble, chalk, calc-spar, and arragonite. It forms either hexagonal (usually hemihedral) crystals (calc-spar) of a sp. gr. of from 2·70 to 2·75, rhombic prisms (arragonite) of a sp. gr. of from 2·92 to 3·28, or an amorphous powder or mass (chalk). This form is official in several pharmacopœias (see *Native c. carbonate* and CHALK). It is also widely distributed in the animal kingdom, forming an important constituent of bones and of the exoskeleton of molluscs and other animals. Pharmaceutical preparations from these sources are numerous (see TESTA *præparata*, etc.). C. carbonate is prepared artificially by precipitating a c. salt with an alkaline carbonate (see *Precipitated c. carbonate*) or by passing carbon dioxide through lime-water, the precipitate occurring either as an amorphous powder or as crystals resembling those of calc-spar or of arragonite, according to the temperature and the proportion of the ingredients. C. carbonate is tasteless and odorless ; it is insoluble in water and in alcohol, but dissolves in acids with decomposition. [B, 3, 5, 95.]—**C. carbonicum.** C. carbonate ; of the Swiss Ph., precipitated c. carbonate. [B, 95.]—**C. carbonicum nativum** [Austr. Ph., Hung. Ph.]. Ger., *natürliches C'carbonat, natürlicher kohlensaurer Kalk.* See *Native c. carbonate.*—**C. carbonicum præcipitatum** [Ger. Ph.], **C. carbonicum purum.** See *Precipitated c. carbonate.*—**C. chinovate.** See *C. quinovate.* —**C. chlorate.** Lat., *calcii chloras, C. chloricum.* Fr., *chlorate de c.* (ou *de chaux*). Ger., *C'chlorat, chlorsaures C.* A deliquescent crystalline compound, $Ca(ClO_3)_2$, used in preparing potassium chlorate. [B, 3.]—**C. chloratum.** C. chloride ; of the Swiss Ph., fused, or amorphous, c. chloride ; of the Ger. Ph., a test-solution of 1 part of c. chloride in 9 parts of water. [B, 205.]—**C. chloratum crystallisatum.** Ger., *krystallisirtes Chlorc'.* Crystallized (hydrated) c. chloride. [B.]—**C. chloratum fusum.** Ger., *geschmolzenes Chlorc'.* Fused (anhydrous) c. chloride. [B.] —**C. chloratum siccum.** Ger., *trockenes Chlorc'.* Dried c. chloride. [B.]—**C. chlorhydrophosphate.** Lat., *calcaria phosphorico-hydrochlorata.* Fr., *chlorhydrophosphate de c.* (ou *de chaux*). The substance obtained in solution by treating c. phosphate (monohydric c. phosphate) with hydrochloric acid. It occurs in the *Sirop de chlorhydrophosphate de chaux* of the Fr. Codex. [B.]—**C. chloricum.** See *C. chlorate.*—**C. chloride.** Lat., *calcii chloridum, c. chloratum.* Fr., *chlorure de c.* Ger., *C'chlorür, C'chlorid, Chlorc'.* It., *cloruro di calcio.* Sp., *cloruro de calcio.* A compound of c. and chlorine, $CaCl_2$. When deposited from an aqueous solution, it forms colorless, deliquescent prismatic or pyramidal crystals, $CaCl_2 + 6H_2O$. This is the *hydrated* (or *crystallized*) *c. chloride* (the *c. chloratum crystallisatum*, the *chloruretum calcicum*, and the *chlorure de c. cristallisé* of the Fr. Cod.). It dissolves in about a quarter of its weight of water with marked absorption of heat. Combined with snow, it forms a freezing mixture. When heated to 200° C. it forms *dried c. chloride* (*calcii chloridum* [Br. Ph.], *c. chloratum siccum* [Russ. Ph.], *chloretum calcicum* [Netherl. Ph.], *chloretum calcicum siccum* [Finn. Ph.], *calcaria muriatica* [Gr. Ph.], *cloruro cálcico* [Sp. Ph.]), a dry, white, crystalline-granular, porous substance, $CaCl_2 + 2H_2O$, having a strong affinity for water and used as a desiccating agent. By fusion this is converted into *fused c. chloride* (*calcii chloridum* [U. S. Ph.], *c. chloratum* [Swiss Ph.], *c. chloratum fusum* [Austr. Ph., Russ. Ph., Hung. Ph.], *chloretum calcicum fusum* [Finn. Ph.], *chlorure de c. fondu* [Fr. Cod.]), CaCl, a colorless, feebly translucent, hard, friable mass or white powder, very deliquescent, devoid of odor, of an acrid, saline taste, soluble in 1¼ parts of cold water and in 8 parts of alcohol. C. chloride is employed as a source of other c. compounds, and has been used as a remedy in scrofulous affections. [B, 3, 5, 95.]—**C. chloruret.** See *C. chloride.*—**C. citrate.** Lat., *calcii citras, c. citricum.* Fr., *citrate de c.* (ou *de chaux*). Ger., *C'citrat, citronensaures C.* It., *citrato di calcio.* Sp., *citrato de calcio.* A compound of c. and citric acid. *Normal c. citrate*, $(C_6H_5O_7)_2Ca_3 + 4H_2O$, occurs as an amorphous white powder, which becomes crystalline on boiling, very sparingly soluble in water, but readily soluble in dilute acids. *Monacid c. citrate*, $C_6H_6O_7.Ca + H_2O$, is crystalline. *Diacid c. citrate*, $(C_6H_7O_7)_2.Ca$, is a gummy mass very difficult to crystallize. A citrate of c. prepared by the action of lime-juice on oyster-shells or crabs'-eyes (*conchœ citratœ, lapides cancrorum citrati*), official in some of the old pharmacopœias, was regarded as a diuretic and a remedy for nephritis and calculous affections. [B, 3, 4, 119.] See also PULVIS *incidens Stahlii.*—**C. cyanide.** Fr., *cyanure de c.* Ger., *C'cyanür, Cyanc'.* A compound of c. and cyanogen, $Ca(CN)_2$. [B, 4.]—**C. diglycollate.** Fr., *diglycolate de c.* Ger., *diglycolsaures C.* A compound of c. and diglycollic acid, $Ca.C_4H_4O_5$, forming crystals containing from 1 to 6 molecules of water of crystallization. [B. 3.] —**C. dihydrophosphate.** Fr., *bihydrophosphate de c.* (ou *de chaux*). Tetrahydric c. phosphate. [B.]—**C. dilactate.** Fr., *dilactate de c.* A substance, $(CH_3.CH)_2O(CO.O)_2 = Ca$, formed from normal c. lactate by the abstraction of the elements of a molecule of water. [B, 3.]—**C. dimetaphosphate.** Fr., *dimétaphosphate de c.* Ger., *C'dimetaphosphat.* A crystalline body, $Ca_2P_4O_{12} + 4H_2O$. [B, 16.]—**C. dioxide.** Lat., *calcii binoxidum.* Fr., *bioxyde* (ou *dioxyde*) *de c.* Ger., *C'dioxyd.* A substance, CaO_2, forming microscopic crystals, obtained by saturating lime-water with hydrogen dioxide. [B, 3.]—**C. disulphide.** Fr., *bisulfure de c.* Ger., *C'disulfid.* A substance, $CaS_2 + 3H_2O$, forming yellow crystals soluble in water, said to be obtained by boiling milk of lime with an excess of sulphur. [B, 3 ; Pauly (B, 270).]—**C. diurate.** Fr., *biurate de c.* Ger., *C'diurat.* Acid c. urate. [B.]—**C. ethylsulphate.** Fr., *éthyl-sulfate de c.* Ger., *Aethylschwefelsäure-C'ester.* A crystalline compound of c. and ethylsulphuric acid, $(C_2H_5.SO_4)_2Ca + 2H_2O$, readily soluble in water and used in

preparing other ethylsulphates. [B, 3.]—**C. ferrocyanide.** Lat., *calcii ferrocyanidum, c. ferrocyanatum.* Fr., *ferrocyanure de c.* Ger., *C'ferrocyanür, Ferrocyanc'.* A substance, $Ca_2Fe(C_3N_3)_2 + 12H_2O$, formed by the action of c. hydrate on the ferrocyanide of a heavy metal. [B, 4.]—**C. fluoride.** Lat., *calcii fluoridum, c. fluoratum.* Fr., *fluorure de c.* Ger., *C'fluorid, Fluorc'.* A substance, CaF_2, forming the chief constituent of fluor-spar and present in minute quantities in some plants, in bones, in the enamel of teeth, and in mineral and sea-water; crystalline, almost insoluble in water and in dilute acids, becoming luminous in the dark after exposure to the sun's rays. [B, 13.]—**C. formate.** Fr., *formiate de c.* Ger., *C'formiat, ameisensaures C.* A crystalline compound of c. and formic acid, $(CHO_2)_2Ca$, readily soluble in water. [B, 3.]—**C. gluconate.** Fr., *gluconate de c.* Ger., *gluconsaures C.* A compound of c. and gluconic acid, $(C_6H_{11}O_7)_2Ca + 2H_2O$, forming warty masses of acicular crystals. [B, 3.]—**C. glycerate.** Fr., *glycérate de c.* A compound of c. and glyceric acid, $(C_3H_5O_4)_2Ca + 2H_2O$, forming crystalline crusts moderately soluble in water. [B, 3.]—**C. glyceroborate.** Fr., *glycéroborate de c.* An antiseptic substance obtained by melting together equal parts of c. borate and glycerin. [Le Bon, "Compt. rend.," xcv, p. 145 (B).]—**C. glycollate.** Fr., *glycolate de c.* Ger., *glycolsaures C.* A compound of c. and glycollic acid, $(C_2H_3O_3)_2.Ca$, forming crystals moderately soluble in water and containing 3 or 4 molecules of water of crystallization. [B, 3.]—**C. glyoxylate.** Fr., *glyoxylate de c.* Ger., *glyoxylsaures C.* A crystalline compound of c. and glyoxylic acid, $(C_2H_3O_4)_2.Ca$. [B, 3.]—**C. gummate.** Fr., *gummate de c.* See *C. arabate.*—**C. heptoate.** Fr., *heptoate de c.* See *C. œnanthylate.*—**C. hippurate.** Fr., *hippurate de c.* Ger., *hippursaures C.* A compound of c. and hippuric acid, $Ca(C_9H_8NO_3)_2$, prepared by the action of hippuric acid on lime-water. A specific action has been imputed to it in affections of the urinary organs, diseases of the liver, certain skin affections depending on hepatic derangements, and some digestive troubles, and it has been used with decided benefit in cases of ascites due to cirrhosis of the liver. [Poulet, "Gaz. hebd. de méd. et de chir."; "N. Y. Med. Jour.," Nov. 29, 1884, p. 624; Dujardin-Beaumetz, "Union méd.," Aug. 19, 1886; "N. Y. Med. Jour.," Sept. 11, 1886, p. 308; B.]—**C. hydracrylate.** Fr., *hydracrylate de c.* Ger., *C'hydracrylat.* A compound, $(C_3H_5O_3)_2.Ca + 2H_2O$, isomeric with c. lactate, forming prismatic crystals. [B, 4.]—**C. hydrate.** Lat., *c. hydricum* [Ger. Ph.]. Fr., *hydrate de c.* Ger., *C'hydrat.* See *C. hydroxide.*—**C. hydricum** [Ger. Ph.]. C. hydroxide; slaked lime, used under this name as a test in the Ger. Ph. [B, 205, 270.]—**C. hydriodate.** See *C. iodide.*—**C. hydrophosphate.** Monohydric c. phosphate. [B, 270.]—**C. hydrosorbate.** Fr., *hydrosorbate de c.* A crystalline compound of c. and hydrosorbic acid, $(C_6H_9O_2)_2.Ca + H_2O$. [B, 3.]—**C. hydrosulphide.** Lat., *c. hydrosulfuratum.* Fr., *sulfhydrate de c.* Ger., *C'hydrosulfid.* A greenish-gray pasty substance, $Ca(SH)_2$, prepared by decomposing c. monosulphide with boiling water, also by the action of hydrogen sulphide on milk of lime; a powerful depilatory and used for that purpose in tanning. [B, 5, 16, 270.]—**C. hydroxide.** Lat., *calcii hydras, c. hydricum.* Fr., *hydroxyde* (ou *hydrate*) *de c.* Ger., *C'hydroxyd.* It., *idrossido* (o *idrato*) *di calcio.* Sp., *hidróxido* (ó *hidrato*) *de calcio.* C. hydrate, slaked lime; a white, finely pulverulent substance, $Ca.(OH)_2$, derived from c. oxide (quick-lime) by hydration and contained in lime-water; soluble in 700 or 800 parts of water and deposited in a crystalline form from its aqueous solution. [B, 3.]—**C. hypoantimonate.** Fr., *hypoantimoniate de c.* Ger., *C'hypoantimoniat.* Syn.: *c. antimonite.* A compound of c. oxide and antimony tetroxide, said to be formed when antimonial powder is boiled in water. [B, 98.]—**C. hypochlorite.** Lat., *calcii hypochloris, c. hypochlorosum.* Fr., *hypochlorite de c.* Ger., *unterchlorigsaures C.* It., *ipoclorito di calcio.* Sp., *hipoclorito de calcio.* A salt, $Ca(OCl)_2$, forming one of the constituents of the so-called chloride of lime (chlorinated lime, calx chlorata). *Basic c. hypochlorite,* said to be present in the same compound, has the formula $Ca(OH)(OCl)$. [B, 3.]—**C. hypochlorosum.** See *C. hypochlorite* and CALX *chlorata.*—**C. hypophosphate.** Fr., *hypophosphate de c.* Ger., *unterphosphorsaures C., C'hypophosphat.* A precipitate, $CaPO_3 + H_2O$, at first gelatinous, afterward granular, obtained by the action of c. chloride on sodium hypophosphate; insoluble in water, readily soluble in hydrochloric acid. [B, 270.]—**C. hypophosphite.** Lat., *calcii hypophosphis* [U. S. Ph.], *calcis hypophosphis* [Br. Ph., 1867], *c. hypophosphorosum* [Swiss Ph., Netherl. Ph.], *hypophosphis calcicus* [Fr. Cod., Finn. Ph.], *calcaria hypophosphorosa* [Russ. Ph.]. Fr., *hypophosphite de c.* (ou *de chaux* [Fr. Cod.]). Ger., *unterphosphorigsaures C.* A compound of c. and hypophosphorous acid, $Ca.(H_2PO_2)_2$, forming shining quadrilateral prismatic crystals of a nauseous, bitter taste, readily soluble in water; used in scrofula, rickets, chlorosis, anæmia, imperfectly united fractures, and other conditions in which the c. salts are supposed to be deficient. [B, 3, 81, 95.]—**C. hypophosphorosum.** See *C. hypophosphite.*—**C. hyposulphite.** See *C. thiosulphate.*—**C. iodate.** Lat., *calcii iodas, c. iodicum.* Fr., *iodate de c.* (ou *de chaux*). Ger., *C'jodat, jodsaures C., jodsaurer Kalk.* It., *iodato di calcio.* Sp., *iodato de calcio.* A crystalline compound, $Ca(IO_3)_2 + 5H_2O$, or $Ca(IO_3)_2 + 6H_2O$, soluble with difficulty in water, insoluble in alcohol; said to be antipyretic and antiseptic. [B, 5, 270.]—**C. iodatum.** See *C. iodide.*—**C. iodicum.** See *C. iodate.*—**C. iodide.** Lat., *calcii iodidum, c. iodatum.* Fr., *iodure de c.* Ger., *C'jodür, Jodc'.* A compound, CaI_2, forming pearly-white deliquescent laminar crystals. It is an irritant, deodorizer, and antiseptic, and has been used internally to arrest erysipelas, to check suppuration, and to cure scrofulous ulceration, also as a remedy for pulmonary consumption. [A, 247; B, 3.]—**C. iodobromide.** Fr., *iodobromure de c.* A compound of c. with iodine and bromine; said to be efficacious in exophthalmic goître. [B, 81.]—**C. isobutyrate.** Fr., *isobutyrate de c.* Ger., *isobuttersaures C.* See under *C. butyrate.*—**C. isosuccinate.** Fr., *isosuccinate de c.* Ger., *isosuccinsaures C.* A crystalline compound of c. and isosuccinic acid, $C_4H_4O_4Ca + H_2O = CH_3.CH(CO.O)_2{=}Ca + H_2O$. [B, 3.]—**C'jodat** (Ger.). See *C. iodate.*—**C'jodid** (Ger.), **C'jodür** (Ger.). See *C. iodide.*—**C'kaliumlactat** (Ger.). See *C. and potassium lactate.*—**C. kinovate.** See *C. quinovate.*—**C. lactate.** Lat., *calcii lactas, c. lacticum.* Fr., *lactate de c.* (ou *de chaux purifié* [Fr. Cod.]). Ger., *C'lactat, milchsaures C., milchsaurer Kalk.* A compound of c. and lactic acid. *Normal c. lactate,* $(C_3H_5O_3)_2Ca + 5H_2O$, forms microscopic acicular crystals aggregated into opaque, white granular or warty masses, soluble in 9·5 parts of cold water. [B, 3.] See also *Acid c. lactate* and *C. dilactate.*—**C. lactonate.** Fr., *lactonate de c.* Ger., *lactonsaures C.* A crystalline compound of c. and lactonic acid, $(C_6H_9O_6)_2Ca + 7H_2O$. [B, 3.]—**C. lactophosphate.** Lat., *calcii lactophosphas, lactophosphas calcicus, c. lactophosphoricum.* Fr., *lactophosphate de c.* (ou *de chaux*). A compound of c. with lactic and phosphoric acids; usually prepared extemporaneously in aqueous solution or as a syrup by adding lactic acid to one of the orthophosphates of c. [B.] See *Lactophosphate de* CHAUX *en solution* and *Syrupus calcii lactophosphatis.*—**C. lævulinate, C. levulinate.** Fr., *lévulinate de c.* A substance, $(C_5H_7O_3)_2Ca$, forming silky acicular crystals readily soluble in water. [B, 3.]—**C. malonate.** Fr., *malonate de c.* Ger., *malonsaures C.* A compound of c. and malonic acid, $2C_3H_2O_4Ca + 7H_2O$, forming transparent acicular crystals very sparingly soluble in water. [B, 3, 4.]—**C. manganite.** Fr., *manganite de c.* A blackish-brown substance, $CaMn_5O_{11}$. [B, 3.]—**C. mesotartrate.** Fr., *mésotartrate de c.* Ger., *mesoweinsaures C.* A crystalline compound, $C_4H_4O_6Ca + 3H_2O$, formed by precipitating mesotartaric acid with c. acetate. [B, 3.]—**C. metacarbonate.** See *C. carbonate.*—**C. metantimonate.** Fr., *métantimoniate de c.* Ger., *C'metantimoniat, metantimonsaures C.* A compound of c. and metantimonic acid, contained in some of the old pharmaceutical preparations made after the model of the calx antimonii cum sulphure. [B, 95, 119.] See *C. thioantimonate.*—**C. metaphosphate.** Fr., *métaphosphate de c.* Ger., *C'metaphosphat, metaphosphorsaures C.* A compound of c. and metaphosphoric acid. *C. monometaphosphate,* $Ca(PO_3)_2$, the ordinary form, is a white pulverulent substance insoluble in water. A polymeric variety is known as *c. dimetaphosphate* (*q. v.*). [B, 16, 270.]—**C. metarsenite.** Fr., *métarsénite de c.* Ger., *metarsenigsaures C.* A compound, $Ca(AsO_2)_2$, termed by Watts *neutral c. arsenite,* obtained by precipitating c. chloride with ammonia satu-

CRYSTALS OF CALCIUM OXALATE. (AFTER PEYER.)

rated with arsenious acid. [B, 2.]—**C. metatungstate.** Fr., *metatungstate de c.* Ger., *C'metatungstat, metawolframsaures C.* A crystalline body, $CaW_4O_{13} + 10H_2O$. [B, 3.]—**C. methylmalonate.** Fr., *méthylmalonate de c.* Ger., *methylmalonsaures C.* See *C. isosuccinate.*—**C. methylsulphate.** Fr., *méthylsulfate de c.* Ger., *methylschwefelsaures C.* A compound of c. and methylsulphuric acid, $(CH_3SO_4)_2Ca$, forming deliquescent octahedral crystals. [B, 3.]—**C. monometaphosphate.** Fr., *monométaphosphate de c.* See *C. metaphosphate.*—**C. monosulphide.** Lat., *c. monosulfuratum.* Fr., *monosulfure de c.* Ger., *C'monosulfid.* See *C. sulphide.*—**C. monoxide.** Lat., *calcii monoxidum.* Fr., *monoxyde de c.* Ger., *C'monoxyd.* See LIME.—**C. muriate.** See *C. chloride.*—**C. nitrate.** Lat., *calcii nitras, c. nitricum.* Fr., *azotate de c.* Ger., *C'nitrat, salpetersaures C.* A white, porous, hygroscopic, deliquescent substance, $Ca(NO_3)_2$, occurring as an efflorescence on walls over which urine or other animal liquids flow, as in stables. [B, 3.]—**C. nitrite.** Lat., *calcii nitris, c. nitrosum.* Fr., *azotite* (ou *nitrite*) *de c.* Ger., *C'nitrit, salpetrigsaures C.* A compound of c. and nitrous acid, $Ca(NO_2)_2 + H_2O$, very deliquescent and readily soluble in water. [B, 270.]—**C. œnanthylate.** Fr., *œnanthylate de c.* A crystalline compound of c. and œnanthylic acid, $(C_7H_{13}O_2)_2Ca + H_2O$. [B, 3.]—**C. orthoarsenate.** Fr., *orthoarséniate de c.* Ger., *orthoarsensaures C.* See *C. arsenate.*—**C. orthophenolsulphonate.** Fr., *orthophénolsulfonate de c.* Ger., *orthophenolsulfonsaures C.* See *C. sulphocarbolate.*—**C. orthophosphate.** Fr., *orthophosphate de c.* Ger., *orthophosphorsaures C.* See *C. phosphate.*—**C. oxalate.** Lat., *calcii oxalas, c. oxalicum.* Fr., *oxalate de c.* (ou *de chaux*). Ger., *C'oxalat, oxalsaures C., oxalsaurer Kalk.* It., *ossalato di calcio.*

Sp., *oxalato de calcio.* Syn.: *oxalate of lime.* A compound of c. and oxalic acid, $CaC_2O_4 + H_2O$ or $CaC_2O_4 + 3H_2O$, usually occurring as a white amorphous precipitate insoluble in water. In the cells of plants and in the urine it occurs in the crystalline form, either as small, brilliant octahedra (envelope-shaped crystals) or in the dumb-bell shape or aggregated into rough, hard, dark masses, as in mulberry calculi. Its excretion in the urine in abnormal amount accompanies a derangement of nutrition termed oxaluria (*q. v.*). [A, 444; B, 4.]—**C. oxide.** Lat., *calcii oxidum, c. oxydatum, oxydum calcicum.* Fr., *oxyde de c.* Ger., *C'oxyd.* It., *ossido di calcio.* Sp., *óxido de calcio.* A compound of c. and oxygen. Ordinary c. oxide (*c. monoxide*), CaO, is lime (*q. v.*). [B.] See also *C. dioxide.*—**C. oxychloride, C. oxychloruret.** Fr., *oxychlorure de c.* Ger., *C'oxychlorür.* A compound, $ClCa - O - Ca(OH) + 7H_2O$, occurring as long, white acicular crystals, obtained by boiling c. chloride with slaked lime. [B, 3.]—**C'oxyd** (Ger.), **C. oxydatum.** See *C. oxide.*—**C. oxydatum hydratum.** See *C. hydroxide.*—**C. oxymuriate.** See *C. oxychloride.*—**C. oxysulfuratum** [Austr. Ph., Hung. Ph.]. A preparation made by slaking 3 parts of quick-lime with 2 of water and mixing with 6 of sublimed sulphur. [B, 95.] Cf. *Calcii oxysulphuretum* and CALX *sulphurata.* —**C. oxysulphide.** Lat., *calcii oxysulphuretum, c. oxysulfuratum.* Fr., *oxysulfure de c.* Ger., *C'oxysulfür.* A compound of c. with oxygen and sulphur. Such a compound is supposed to exist in the preparation known as calcii oxysulphuretum. [B, 81.] See also CALX *sulphurata.*—**C. paralactate.** Fr., *paralactate de c.* Ger., *C'paralactat, paramilchsaures C.* See *C. sarcolactate.*—**C. pentasulphide.** Fr., *pentasulfure* (ou *quintisulfure*) *de c.* Ger., *C'pentasulfid.* A compound, CaS_5, obtained by boiling milk of lime with sulphur. [B, 270.]—**C. peroxide.** Lat., *calcii peroxidum.* Fr., *peroxyde de c.* Ger., *C'superoxyd.* See *C. dioxide.*—**C. phenolsulphonate, C. phenylsulphate.** Fr., *sulfophénate de c.* Ger., *phenylschwefelsaures C.* See *C. sulphocarbolate.*—**C. phosphate.** Lat., *calcii phosphas, c. phosphoricum.* Fr., *phosphate de c.* (ou *de chaux*). Ger., *C'phosphat, phosphorsaures C., phosphorsaurer Kalk.* It., *fosfato di calcio.* Sp., *fosfato de calcio.* Syn.: *phosphate of lime.* A compound of c. and phosphoric (orthophosphoric) acid. Three such compounds are known: 1. *Normal c. phosphate,* $Ca_3(PO_4)_2$—*tricalcic phosphate, tribasic c. phosphate,* the *basic c. phosphate* of the older writers, *calcii phosphas præcipitatus* [U. S. Ph.], *calcii phosphas* [Br. Ph.], *phosphas calcicus* [Fr. Cod., Netherl. Ph.], *c. phosphoricum basicum, phosphate tricalcique* [Fr. Cod.]—a white substance, nearly insoluble in pure water, but readily soluble in water containing salts of ammonium, sodium chloride, and other salts, also in all acids. It is extensively diffused through the mineral kingdom and also forms an important part of many vegetable and animal tissues, constituting nearly 60 per cent. of the tissue of bones (hence called bone-phosphate) and from 66 to 90 per cent. of that of the teeth, and found in some quantity in every tissue and fluid of the human body, except the gastric juice, the sweat, and the urine. It is usually prepared for pharmaceutical purposes by precipitation (see *Precipitated c. phosphate*). 2. *Monohydric c. phosphate,* $CaHPO_4 + 2H_2O$—*dicalcic phosphate,* the *c. phosphate,* or *neutral c. phosphate,* of the older writers, *c. phosphoricum* [Ger. Ph., Austr. Ph., Hung. Ph., Swiss Ph.], *calcaria phosphorica* [Russ. Ph.], *phosphas calcicus* [Finn. Ph.], *phosphate bicalcique* [Fr. Cod.]—occurring native in the crystalline form in certain kinds of guano, in the wood and pith of *Tectona grandis,* and in a certain form of urinary calculus, also sometimes forming a deposit of stellate crystals (stellar phosphate) in urine. It is prepared artificially by precipitating c. chloride with sodium phosphate, as directed by the different pharmacopœias, or by the action of dilute phosphoric acid on c. carbonate. According to some of the older authorities, it has the double formula (adopted in the Fr. Cod.) $Ca_2H_2P_2O_8 + 2H_2O$ or $+ 4H_2O$. 3. *Tetrahydric c. phosphate,* $CaH_4(PO_4)_2$—*acid c. phosphate, monocalcic phosphate, c. phosphoricum acidum, biphosphas calcicus* [Fr. Cod.], *phosphate monocalcique* [Fr. Cod.]—forming rhombic deliquescent laminar crystals readily soluble in cold water. It is found in the brain and in the urine and other acid animal fluids, and is produced artificially by dissolving the other c. phosphates in an acid. In the urine, it is retained in solution as long as the urine remains acid; when the urine becomes alkaline, the tetrahydric phosphate is converted into the normal phosphate, and is thrown down as a dense white precipitate. Tetrahydric c. phosphate is extensively used as a fertilizer, under the name of *superphosphate of lime,* being prepared extemporaneously by treating bone-phosphate with sulphuric acid. The c. phosphates are used medicinally in diseases supposed to be due to a deficiency of c. salts in the system, such as rickets. [B, 3. 5, 9, 16, 95, 270.] See also *C. metaphosphate, C. dimetaphosphate,* and *C. pyrophosphate.*—**C. phosphide.** Fr., *phosphure de c.* Ger., *Phosphorc'.* A compound formed by the union of c. and phosphorus under petroleum. [B, 3.]—**C. phosphite.** Lat., *calcii phosphis, c. phosphorosum.* Fr., *phosphite de c.* Ger., *C'phosphit, phosphorigsaures C.* A compound of c. and phosphorous acid, $(CaHPO_3)_2 + 3H_2O$, forming crystalline crusts. [B, 270.]—**C. phospholactate.** See *C. lactophosphate.*—**C. phosphoricum.** C. phosphate; of the Ger. Ph., Austr. Ph., Hung. Ph., and Swiss Ph., monohydric c. phosphate. [B, 95.]—**C. phosphoricum acidum.** Acid (tetrahydric) c. phosphate. [B, 95.]—**C. phosphoricum basicum.** Basic (normal) c. phosphate. [B, 95.]—**C. phosphoricum crudum** [Ger. Ph.]. Ger., *rohes C'phosphat.* Crude, or commercial, c. phosphate; probably powdered bone-ash. [B, 95.]—**C. phosphoricum ex ossibus præcipitatum.** Tetrahydric c. phosphate prepared by the action of sulphuric acid on calcined bones. [Bernatzik (A, 319).]—**C. phosphoricum gelatinosum.** Freshly prepared and washed c. phosphoricum ex ossibus præcipitatum (*q. v.*); a gelatinous mass containing about 66 per cent. of water. [Bernatzik (A, 319).]—**C. phosphorosum.** See *C. phosphite.*—**C. phosphuret.** See *C. phosphide* and CALX *phosphorata.* —**C. protochloruret.** See *C. chloride.*—**C. protoxide.** See LIME.—**C. protoxychloruret.** See *C. oxychloride.*—**C. pyrophosphate.** Fr., *pyrophosphate de c.* Ger., *C'pyrophosphat, pyrophosphorsaures C.* A substance, $Ca_2P_2O_7$, formed by the incineration of monohydric c. phosphate, also by mixing solutions of c. chloride and sodium pyrophosphate. Combined with 4 molecules of water of crystallization, it occurs crystalline. [B, 270.]—**C. pyroracemate.** Fr., *pyroracémate de c.* Ger., *brenztraubensaures C.* See *C. pyruvate.*—**C. pyrothioarsenate.** Fr., *pyrothioarséniate de c.* Ger., *C'pyrothioarseniat.* A salt, $Ca_2As_2S_7$, called by Watts neutral sulpharsenate of c. [B, 2.]—**C. pyrothioarsenite.** Fr., *pyrothioarsénite de c.* A compound, $Ca_2As_2S_5$, called by Watts neutral sulpharsenite of c. [B, 2.]—**C. pyrovanadate.** Fr., *pyrovanadate de c.* Ger., *pyrovanadinsaures C.* A white amorphous substance, $2Ca_2V_2O_7 + 5H_2O$. [B, 3.]—**C. pyruvate.** Fr., *pyruvate de c.* A compound of c. and pyruvic acid, $(C_3H_3O_3)_2Ca$, forming crystals which are converted by slight warming into a gum-like mass. [B, 3.]—**C. quinate.** Lat., *calcii quinas, quinas calcis.* Fr., *quinate de c.* Ger., *chinasaures C.* A crystalline substance, $Ca(C_7H_{11}O_6)_2 + 10H_2O$. It has been used as a source of the quinates of quinine and cinchonine. [B, 4.]—**C. quinovate.** Fr., *quinovate de c.* Ger., *chinovasaures C.* A compound of c. and quinovic acid. [B, 5.]—**C. quintisulphuret.** Lat., *c. quinquesulfuratum.* Fr., *quintisulfure de c.* See *C. pentasulphide.*—**C. racemate.** Fr., *racémate de c.* Ger., *traubensaures C.* A compound, $C_4H_4O_6Ca + 4H_2O$, forming small acicular crystals, isomeric with c. tartrate, but less soluble in water. [B, 3.]—**C. saccharate.** Fr., *saccharate de c.* Ger., *zuckersaures C.* A name given to three compounds: 1. *Normal c. saccharate,* a salt of c. and dibasic saccharic acid, $C_6H_8CaO_8 + H_2O$, forming fine microscopic crystals. 2. A salt of c. and monobasic saccharic acid. See SACCHARATE. 3. See *C. sucrate.*—[B, 3, 4.]—**C.-saccharose.** See *C. sucrate.*—**C. santonate.** Fr., *santonate de c.* Ger., *C'santonat.* See *C.*-SANTONIN.—**C. sarcolactate.** Ger., *fleischmilchsaures C.* A compound of c. and sarcolactic acid, $2Ca(C_3H_5O_3)_2 + 9H_2O$, isomeric with c. lactate, forming acicular crystals. In solution, it rotates polarized light to the left. [B, 3.]—**C. silicate.** Fr., *silicate de c.* Ger., *kieselsaures C., kieselsaurer Kalk.* A compound of c. and silicic acid. A number of such compounds occur, often in combination with other metallic elements, in many minerals. [B, 3.]—**C. subphosphorosum.** See *C. hypophosphite.*—**C. subsulfurosum.** See *thiosulphate.*—**C. succinate.** Fr., *succinate de c.* Ger., *C'succinat, bernsteinsaures* (oder *succinsaures*) *C.* A compound of c. and succinic acid. *Normal c. succinate,* $C_4H_4O_4Ca = \begin{array}{l} CH_2 - CO.O \\ CH_2 - CO.O \end{array} \!\!>\! Ca$, forms acicular crystals containing 1 or 2 molecules of water of crystallization. It occurs in the bark of *Morus alba,* and is prepared artificially by the action of c. chloride on sodium succinate. [B, 3.] See also *Acid c. succinate* and *C. isosuccinate.*—**C. sucrate.** Fr., *sucrate de c.* (ou *de chaux*). Syn.: *saccharate of c.* (or *of lime*), *c.-saccharose.* A compound of c. and saccharose, produced when lime is dissolved in a solution of cane-sugar, hence occurring in syrupus calcis (*q. v.*). Three such compounds are known: 1. *Monocalcium sucrate* (monobasic sucrate of lime), $C_{12}H_{21}(CaOH)O_{11}$, a white, brittle amorphous substance readily soluble in water. 2. *Dicalcium sucrate,* $C_{12}H_{20}(CaOH)_2O_{11}$, a white crystalline substance only moderately soluble in water. 3. *Tricalcium sucrate* (tribasic saccharate of lime), $C_{12}H_{19}(CaOH)_3O_{11}$, a hard, brittle substance or a granular mass soluble in water with great difficulty. [B, 3.]—**C'sulfarseniat** (Ger.). See *C. thioarsenate.*—**C'sulfarsenit** (Ger.). See *C. thioarsenite.*—**C'sulfoäthylat** (Ger.). See *C. ethylsulphate.*—**C. sulfocarbolicum, C. sulfophenylicum.** See *C. sulphocarbolate.*—**C. sulfurato-stibiatum.** Syn.: *calcaria sulphurato-stibiata* [Gr. Ph.]. A preparation consisting essentially of c. thioantimonate, made by heating together 1 part each of antimony trisulphide and sulphur and 4 parts of slaked lime. [B, 95.]—**C. sulfuratum.** See *C. sulphide* and CALX *sulphurata.*—**C'sulfuret** (Ger.). C. monosulphide. [B, 270.]—**C. sulfuricum.** C. sulphate; of the Ger. Ph., a saturated aqueous solution of c. sulphate, used as a test. [B, 205.]—**C. sulfuricum nativum.** Gypsum; the calcii sulphas of the Br. Ph. [B, 95.]—**C. sulfuricum ustum** [Ger. Ph.]. Ger., *gebranntes schwefelsaures C., gebrannter Gyps.* Burnt c. sulphate; plaster of Paris. [B, 95.]—**C. sulfurosum.** See *C. sulphite.*—**C. sulphantimonate.** See *C. thioantimonate.*—**C. sulpharsenate.** Fr., *sulfarséniate de c.* Ger., *C'sulfarseniat, schwefelarsensaures C.* See *C. thioarsenate* and *C. pyrothioarsenate.*—**C. sulpharsenite.** Fr., *sulfarsénite de c.* Ger., *C'sulfarsenit.* See *C. thioarsenite.*—**C. sulphate.** Lat., *calcii sulphas, c. sulfuricum.* Fr., *sulfate de c.* (ou *de chaux*). Ger., *C'sulfat, schwefelsaures C.* A compound of c. and sulphuric acid, $CaSO_4$. Combined with 2 molecules of water of crystallization, it forms *native c. sulphate,* or gypsum—*calcii sulphas* [Br. Ph.], *sulphas calcicus nativus* [Finn. Ph.], *gypsum* [Gr. Ph.], *yeso* (*ó yeso compacto*) [Sp. Ph.]. This occurs in the form of monoclinic crystals (selenite), in the fibrous form (satin-spar), and as alabaster (*q. v.*). Uncombined with water of crystallization, it constitutes the mineral anhydrite, and is also produced artificially by heating gypsum, thus forming burnt gypsum, or plaster of Paris (*c. sulfuricum ustum* [Ger. Ph.], *calcaria sulfurica usta* [Russ. Ph.], *sulphas calcicus ustus* [Dan. Ph., Norweg. Ph., Swed. Ph.]), a white, amorphous, tasteless, odorless substance which, when brought into contact with water, hardens into a tenacious solid mass. It is largely used in making casts and plaster splints and bandages. C. sulphate has a sp. gr. of from 2·2 to 2·4, and dissolves in from 400 to 500 parts of water. [B, 3, 95, 270.] See also *C. and potassium sulphate* and *C. and sodium sulphate.*—**C. sulphide.** Lat., *calcii sulphidum* (seu *sulphuretum*), *c. sulfuratum.* Fr., *sulfure de c.* Ger., *C'sulfid, Schwefelc'.* A compound of c. and sulphur. Ordinary c. sulphide, *c. monosulphide,* CaS, is a yellowish-white earthy substance having the odor of hydrogen sulphide, almost insoluble in water, constituting a large proportion of calx sulphurata (*q. v.*). [B, 3, 270.] See also *C. disulphide, C. tetrasulphide,* and *C. pentasulphide.*—**C. sulphite.** Lat., *calcii sulphis, c. sulfurosum.* Fr., *sulfite de c.* Ger., *C'sulfit, schwefligsaures C.* A white powder,

$CaSO_3$, nearly insoluble in water. Precipitated from a solution in sulphurous acid, it forms acicular crystals containing 2 molecules of water of crystallization. [B, 3.]—**C. sulphocarbolate.** Lat., *calcii sulphocarbolas*, *c. sulfocarbolicum.* Fr., *sulfophénate* (ou *sulfocarbolate*) *de c.* Ger., *C'sulfocarbolat*, *phenylschwefelsaures C.* Syn.: *c. phenylsulphate*, *c. phenolsulphonate.* A compound of c. and sulphocarbolic acid, $Ca(C_6H_5.SO_4)_2$. *C. orthophenolsulphonate*, $C_6[H_4,OH,SO_2.O,]Ca[O.SO_2,OH,H_4,]C_6 + 6H_2O$, occurs in the form of scaly crystals. [B, 81.]—**C. sulphoethylate.** Fr., *sulfoéthylate de c.* Ger., *C'sulfoäthylat.* See *C. ethylsulphate.*—**C. sulphomethylate.** Fr., *sulfométhylate de c.* Ger., *C'sulfomethylat.* See *C. methylsulphate.*—**C. sulphosulphate.** See *C. thiosulphate.*—**C. sulphovinate.** See *C. ethylsulphate.*—**C. sulphuratum, C. sulphuret.** See *C. sulphide.*—**C. sulphydrate.** See *C. hydrosulphide.*—**C'superoxyd** (Ger.). See *C. dioxide.*—**C. superphosphate.** Lat., *surphosphas calcariæ.* Tetrahydric c. phosphate. [B.]—**C. tartrate.** Lat., *calcii tartras*, *c. tartaricum.* Fr., *tartrate de c.* (ou *de chaux*). Ger., *C'tartrat*, *weinsaures C.* It., *tartrato di calcio.* Sp., *tartrato cálcico* [Sp. Ph.] (*ó de calcio*). A compound of c. and tartaric (dextrotartaric) acid. *Normal c. tartrate*, $C_4H_4O_6Ca + 4H_2O$, occurs in grapes and in senna-leaves, and is prepared artificially by the action of c. chloride on a tartrate. It forms double salts with the tartrates of the alkali metals. [B, 3, 4, 95.] See also *C. mesotartrate*, *C. racemate*, and *Acid c. tartrate.*—**C. tetrasulphide.** Fr., *tétrasulfure de c.* Ger., *C'tetrasulfid.* A compound, CaS_4, obtained only in solution by heating c. monosulphide with water and sulphur. [B, 2:0.]—**C. thioantimonate.** Lat., *sulphostibias calcicus.* Fr., *sulfantimoniate* (ou *thioantimoniate*) *de c.* Ger., *C'thioantimoniat*, *Schwefelantimonc'*, *schwefelantimonsaures C.* It., *solfantimoniato di calcio.* Sp., *sulfantimoniato de calcio.* A compound, $Ca_3(SbS_4)_2$, contained in various preparations formerly official, made, according to Hoffmann's original formula, by calcining together oyster-shells or chalk, sulphur, and antimony trisulphide (*calx antimonii cum sulphure*) or by heating a mixture of antimony trisulphide, sulphur, and slaked lime (*calcaria sulphurato-stibiata*, *c. sulfurato-stibiatum*). A similar preparation, made by evaporating a mixture of quick-lime, antimony pentasulphide, and water, contained also c. metantimonate. This crude c. thioantimonate was employed in rheumatism, gout, scrofula, and engorgements of the abdominal viscera. [B, 2, 119.] See also *Pilulæ* CALCARIÆ *sulphurato-stibiatæ* and *Aqua* CALCARIÆ *sulphurato-stibiatæ.*—**C. thioarsenate.** Fr., *sulfarséniate* (ou *thioarséniate*) *de c.* Ger., *C'thioarseniat.* An uncrystallizable salt, $Ca_3(AsS_4)_2$, called by Watts basic sulpharsenate of c. [B, 2.] See also *C. pyrothioarsenate.*—**C. thioarsenite.** Fr., *thioarsénite de c.* Ger., *C'thioarsenit.* A compound called by Watts basic sulpharsenite of c., occurring as feathery crystals, $Ca_3(AsS_3)_2$, or as a white precipitate, $Ca_3(AsS_3)_2 + 15H_2O$. [B, 2, 3.] See also *C. pyrothioarsenite.*—**C. thiosulphate.** Lat., *calcii hyposulphis*, *c. subsulfurosum.* Fr., *hyposulfite* (ou *thiosulfate*) *de c.* Ger., *C'thiosulfat*, *unterschwefligsaures C.* A substance, $CaS_2O_3 + 6H_2O$, forming six-sided prismatic crystals soluble in water; obtained as a by-product in the preparation of illuminating gas, and used in making sodium thiosulphate. [B, 3, 81.]—**C. tiglate.** Fr., *tiglinate de c.* A compound of c. and tiglic acid, $(C_5H_7O_2)_2Ca + 3H_2O$, forming white laminar crystals; isomeric with c. angelate. [B, 3.]—**C. tungstate.** Fr., *tungstate de c.* (ou *de chaux*). Ger., *C'tungstat*, *wolframsaures C.* A white substance, $CaWO_4$, found native as a mineral and obtainable artificially. [B, 3.]—**C. urate.** Fr., *urate de c.* Ger., *harnsaures C.* A compound of c. and uric acid. *Acid c. urate*, or *c. diurate*, has the composition $(C_5H_3N_4O_3)_2Ca$. [B, 4.]—**C. vanadate.** Fr., *vanadate de c.* Ger., *vanadinsaures C.* See *C. pyrovanadate.*—**Caprinate de c.** (Fr.), **Caprinsaures C.** (Ger.). See *C. caprate.*—**Capronsaures C.** (Ger.). sulphurata.—**Syrupus calcii hypophosphitis.** A mixture of two parts of c. hypophosphite, 19 parts of water, 24 parts of sugar, and 1 part of essence of vanilla. [Proctor (B, 81).]—**Syrupus calcii lactophosphatis** [U. S. Ph.]. Fr., *sirop de lactophosphate de chaux* [Fr. Cod.]. Ger., *C'phospholactatsyrup.* A preparation made by dissolving 22 parts of precipitated c. phosphate in hydrochloric acid, precipitating with ammonia, straining, dissolving the precipitate with 33 parts of lactic acid in 80 parts of orange-flower water and enough water to make 350 parts, filtering, and adding to the filtrate 600 parts of sugar and enough water to make 1,000 parts. The French preparation is made with 12·5 parts of c. phosphate dissolved in sufficient lactic acid, 630 parts of sugar, 10 parts of essence of lemon, and water to 1,000 parts. [B, 81.] Cf. *Sirop de chlorhydrophosphate de* CHAUX and *Sirop de phosphate acide de* CHAUX.—**Test-solution of chloride of c.** [U. S. Ph.]. See under *Liquor calcii chloridi.*—**Test-solution of sulphate of c.** [U. S. Ph.]. Lat., *c. sulfuricum* [Ger. Ph.]. A saturated solution of powdered native crystallized c. sulphate in distilled water, digested for several days with repeated agitation, and decanted. [B, 5.]—**Tetrahydric c. arsenate.** See *C. arsenate.*—**Tetrahydric c. orthophosphate** (or **phosphate**). See *C. phosphate.*—**Tiglinate de c.** (Fr.). See *C. tiglate.*—**Traubensaures C.** (Ger.). See *C. racemate.*—**Tribasic c. phosphate.** Normal c. orthophosphate. [B.] See *C. phosphate.*—**Unterchlorigsaures C.** (Ger.). See *C. hypochlorite.*—**Unterphosphorigsaures C.** (Ger.). See *C. hypophosphite.*—**Unterphosphorsaures C.** (Ger.). See *C. hypophosphate.*—**Unterschwefligsaures C.** (Ger.). See *C. thiosulphate.*—**Vanadinsaures C.** (Ger.). See *C. vanadate.*—**Weinsaures C.** (Ger.). See *C. tartrate.*—**Wolframsaures C.** (Ger.). See *C. tungstate.*—**Zuckersaures C.** (Ger.). See *C. saccharate.*—**Zweifachsaures C'phosphat** (Ger.). Tetrahydric c. phosphate. [B, 270.] See *C. phosphate.*

CALCIVOROUS, adj. Ka^{2}l-si^{2}v′o-ru^{3}s. From *calx*, lime, and *vorare*, to eat. Fr., *calcivore.* Consuming limestone (said of certain lichens which absorb carbonic acid from the air and dissolve limestone, forming a cavity in the rock in which the apothecia of the lichen are imbedded). [B, 121.]

CALCOGLOBULIN [Harting], n. Ka^{2}l-ko-glo^{2}b′u^{2}l-i^{2}n. Fr., *calcoglobuline.* An albuminoid residue left after the calcareous matter of a calcospherite has been dissolved out. [A, 385 ; L, 182.]

CALCOIDEUS (Lat.), adj. Ka^{2}l(ka^{3}l)-ko(ko^{2})-i^{2}d(ed)′e^{2}-u^{3}s-(u^{4}s). From *calx*, the heel, and εἶδος, resemblance. Fr., *calcoïdien.* Pertaining to the heel. [A, 385.] See OSSICULA *calcoidea.*

CALCOPHORE (Fr.), adj. Ka^{3}l-ko-for. From *calx*, lime, and φορεῖν, to bear. See CALCIFEROUS.

CALCOSPHERITE [Harting], n. Ka^{2}l-ko-sfer′it. From *calx*, lime, and *sphæra*, a sphere. Fr., *calcosphérite.* A natural or artificial spheroidal crystallite having a calcareous basis. [A, 385.]

CALC-SPAR, n. Ka^{2}lk′spa^{3}r. A native calcium carbonate occurring in crystals of the rhombohedral system. [B, 270.] Cf. CALCIUM *carbonate.*

CALCUL (Fr.), n. Ka^{3}l-ku^{6}l. See CALCULUS.—**C. biliaire cystique.** A biliary calculus formed within the gall-bladder. [K.]—**C. biliaire hépatique.** See *Hepatic* CALCULUS.—**C. biliaire hépato-cystique.** See *Hepato-cystic* CALCULUS.—**C. chatonné.** See *Encysted* CALCULUS.—**C. crétacé.** See *Chalky* CALCULUS.—**C. de la glande mammaire.** See *Lacteal* CALCULUS.—**C. de la glande pinéale.** See ACERVULUS.—**C. de la prostate.** See *Prostatic* CALCULUS.—**C. de la vessie.** See *Vesical* CALCULUS.—**C. de l'estomac.** See *Gastric* CALCULUS.—**C. de l'oreille.** See *Aural* CALCULUS.—**C. de l'utérus.** See *Uterine* CALCULUS.—**C. des amygdales.** See *Tonsillar* CALCULUS.—**C. des fosses nasales.** See *Nasal* CALCULUS and RHINOLITH.—**C. des intestins.** See *Intestinal* CALCULUS, ENTEROLITH, and BEZOAR.—**C. des mammelles.** See *Lacteal* CALCULUS.—**C. des reins.** See *Renal* CALCULUS.—**C. des veines.** See PHLEBOLITH.—**C. des vésicules séminales.** See *Spermatic* CALCULUS.—**C. des voies lacrymales.** See *Lacrymal* CALCULUS.—**C. du cœur.** See *Cardiac* CALCULUS.—**C. du conduit auditif.** See *Aural* CALCULUS.—**C. du pancréas.** See *Pancreatic* CALCULUS.—**C. du poumon.** See *Pulmonary* CALCULUS.—**C. enchatonné.** See *Encysted* CALCULUS.—**C. mûral, C. mûriforme.** See *Mulberry* CALCULUS and *Oxalate-of-lime* CALCULUS.

CALCULEUX (Fr.), adj. Ka^{3}l-ku^{6}l-u^{5}. See CALCULOUS and CALCULOSUS.

CALCULIFRAGUS (Lat.), adj. Ka^{2}l(ka^{3}l)-ku^{2}l(ku^{4}l)-i^{2}f′ra^{2}g-(ra^{3}g)-u^{3}s(u^{4}s). From *calculus* (*q. v.*), and *frangere*, to break. Fr., *calculifrage.* Ger., *steinbrechend.* See LITHONTRIPTIC.

CALCULOSUS (Lat.), adj. Ka^{2}l(ka^{3}l)-ku^{2}l(ku^{4}l)-o′su^{3}s(su^{4}s). Fr., *calculeux.* Calculous (*q. v.*) ; as a n., a person affected with urinary calculus. [A, 301, 318.]

CALCULOUS, adj. Ka^{2}l′ku^{2}l-u^{3}s. Lat., *calculosus.* Fr., *calculeux.* Ger., *steinig, steinigt, steinartig, steinkrank.* It., *calcoloso.* Sp., *calculoso.* Pertaining to, affected with, dependent on, or giving rise to, calculi. [A, 322.]—**C. acid.** See URIC ACID.

CALCULUS (Lat.), n. m. Ka^{2}l(ka^{3}l)′ku^{2}l(ku^{4}l)-u^{3}s(u^{4}s). Dim. of *calx* (*q. v.*). Gr., λιθίδιον. Fr., *calcul.* Ger., *Stein, Kalkstein, Steinchen, Concrement, steiniges Concrement.* It., *calcolo.* Sp., *cálculo.* An aggregation (generally pathological) of matter forming a concretion, more or less resembling a pebble or a particle of gravel, in a canal or a hollow organ of the body.—**Adherent c.** One that has become attached to the wall of the organ or canal in which it is situated. [L, 213.]—**Alternating c.** One that is made up of alternate layers of the different materials that enter into its composition. [L, 213.]—**Alvine c.** See *Intestinal c.*—**Ammoniaco-magnesian-phosphate c.** A c. composed of phosphate of ammonium and magnesium.—**Ammoniaco-magnesian-and-phosphate-of-lime c.** A c. composed of phosphates of ammonium, magnesium, and calcium. In the bladder, they are gray or white, light, and large, and conform to the organ in shape. Their hardness depends on the proportion of calcium phosphate present. Preputial calculi are of this composition, with the addition of organic matter. [A. Post (A, 473) ; L, 307.]—**Amorphous c.** A c. that shows no definite structure on section. [L, 213.]—**Arthritic** (or **Articular**) **c.** Lat., *calculus arthriticus.* Fr., *calcul arthritique.* Ger., *Gelenkstein.* A chalky concretion of uric acid and urates in the neighborhood of a joint in gouty subjects. [L, 41.]—**Aural c.** Fr., *calcul de l'oreille* (ou *du conduit auditif*). Ger., *Ohrensteinchen.* A hard concretion of cerumen formed in the external auditory canal. [F.]—**Bezoardic c.** See BEZOAR.—**Biliary c.** Lat., *c. biliaris* (seu *biliarius*, seu *biliosus*, seu *felleus*). Fr., *calcul biliaire.* Ger., *Gallenstein.* Syn. : *gall-stone.* A concretion, usually consisting chiefly of cholesterin with bile-pigments, formed either in the gall-bladder, in the hepatic ducts, or in the ductus choledochus communis. [A, 301.]—**Blood c.** A fibrinous c. containing the remains of blood-corpuscles. [L, 213.]—**Bone-earth c.** See *Phosphate-of-lime c.*—**Breast c.** See *Lacteal c.*—**Bronchial c.** A concretion formed in a bronchial tube, also a pulmonary c. (*q. v.*) that has found its way into a bronchial tube. [A, 316, 422.]—**C. bezoar** [Linnæus]. See BEZOAR.—**C. biliaris, C. biliarius, C. biliosus.** See *Biliary c.*—**Calculi cancrorum.** See ASTACOLITH.—**C. cysticus bovinus.** See ÆGAGROPILUS and *German* BEZOAR.—**C. enterolithus.** See ENTEROLITH.—**C. felleus.** See *Biliary c.*—**C. intestini.** See *Intestinal c.*, ENTEROLITH, and BEZOAR.—**Calculus lacrimalis.** See *Lacrymal c.*—**C. mammæ.** See *Lacteal c.*—**C. margarita** [Linnæus]. A pearl. [B, 90.] See MARGARITÆ *præparatæ.*—**C. pancreatis.** See *Pancreatic c.*—**C. podagricus.** See *Arthritic c.*—**C. præputialis.** See *Preputial c.*—**C. prostatæ.** See *Prostatic c.*—**C. pulmonalis, C. pulmoneus.** See *Pulmonary c.* and PHTHISIS *calculosa.*—**Calculi renum.** See *Renal c.*—**C. salivalis.** See *Salivary c.*—**C. sublingualis.** See RANULA.—**C. tonsillaris.** See *Tonsillar c.*—**C. urethralis.** See *Urethral c.*—**C. urinarius.** See *Urinary c.*—**C. vesicæ, C. vesicæ urinariæ.** See *Vesical c.*—**Carbonate-of-lime c.** A c. consisting wholly or largely of calcium carbonate ; common in the *Herbivora*, rare in man. It is friable and light-colored, but sometimes resembles the mulberry c. [A, 475 ; L, 307.]—**Cardiac c.** Fr., *calcul du cœur.* A calcified fibrinous clot in the heart.—**Chalky c.** Fr., *calcul crétacé.* Ger., *Kalkconcrement.* A concretion consisting chiefly of calcium carbonate and phosphate in varying proportions, with small amounts of magnesium carbonate, water, and organic matter, sometimes with a foreign body as a nucleus ; found oftenest in the tonsils, the vermiform process, the veins, dilated bronchi, and cancers, and less frequently in the nose, larynx, uterus, and vagina, and under the prepuce. [D, 3.]—**Cutaneous c.** A hardened mass in the skin, usually composed of altered sebum, but sometimes containing calcium phosphate and carbonate. [A. Van Harlingen (A, 473).] Cf. MILIUM.—**Cystic c.** Fr., *calcul cystique.* 1. A vesical c. 2. A c. of the gall-bladder. 3. A cystine c. [L, 43.]—**Cystic-oxide c., Cystin c.** A rare form of urinary c. consisting largely of cystin (*q. v.*); yellow or fawn-colored when first removed, becoming greenish-gray and sometimes greenish-blue after having been kept long. It feels greasy, breaks readily, and has no decided concentric arrangement. [A, 475 ; E ; L, 213, 307.]—**Dental c.** See *Salivary c.* (2d def.).—**Encysted c.** Fr., *calcul enchatonné.* A vesical c. that has become incarcerated in a sac-like pouch springing from the bladder. [L, 44.]—**Fatty c.** A vesical c. having a fatty or saponaceous nucleus. It has been thought to be due to previous irrigation of the bladder with soap and water. [L, 213.] Cf. URO-STEALITH.—**Felleous c.** See *Biliary c.*—**Fibrinous c.** A urinary c. apparently consisting of dried coagulated albumin ; said to resemble yellow wax and to have a vitreous lustre. [A, 475 ; E, 12.]—**Fusible c., Fusible phosphate c.** See *Ammoniaco-magnesian-and-phosphate-of-lime c.*—**Gastric c.** Fr., *calcul gastrique* (ou *de l'estomac*). Ger., *Magenstein.* A concretion found in the stomach ; usually consisting of material swallowed or brought up by antiperistalsis. [L, 43.]—**Hemp-seed c.** A rare variety of calcium-oxalate c. having a smooth surface ; usually found in the kidney. [E ; L, 213.]—**Hepatic c.** Fr., *calcul hépatique.* A c. situated in a bile-duct in the liver. [A, 301 ; L, 43.]—**Hepato-cystic c.** Fr., *calcul hépato-cystique.* A c. situated in the ductus choledochus communis. [A, 301 ; L, 43.]—**Impacted c.** A c. that has become arrested in its passage through a canal. [A, 295.]—**Incarcerated c.** See *Encysted c.*—**Indigo c.** A c. containing indigo-blue. It has been found in the ureter. [A, 476 ; E. 18 ; L, 213.]—**Intestinal c.** Lat., *c. intestini.* Fr., *calcul intestinal.* Ger., *Darmstein.* A concretion situated in the intestine, consisting usually of a gall-stone, but sometimes calcareous. [A, 301 ; L, 43.] Cf. ENTEROLITH and BEZOAR.—**Joint c.** See *Arthritic c.*—**Lacrymal c.** Lat., *c. lacrimalis.* Fr., *calcul lacrymal* (ou *des voies lacrymales*). Ger., *Thränenwegesteinchen.* Syn. : *dacryolith.* A concretion occasionally formed in the canaliculi, the sac, or the duct of the lacrymal apparatus. [F.]—**Lacteal c.** Lat., *c. mammæ.* Fr., *calcul des mammelles.* A yellowish-white milk-cast of a duct of the mammary gland ; sometimes found in mammary abscesses. [L, 43.]—**Laminated c.** A c. made up of layers of different material, showing an agate-like structure on section. [L, 213.] Cf. *Alternating c.*—**Lithate-of-ammonia c.** See *Urate-of-ammonium c.*—**Lithic-acid c.** See *Uric-acid c.*—**Mammary c.** See *Lacteal c.*—**Meibomian c.** A concretion in a Meibomian duct. [F.]—**Metamorphosed c.** [Ultzmann]. A supposititious variety of urinary c. which, originally composed of uric acid, has lain for a long time in purulent urine and has had its acid crystals replaced by alkaline phosphates. [L, 213.]—**Mixed-phosphate c.** See *Ammoniaco-magnesian-and-phosphate-of-lime c.*—**Mulberry c.** Fr., *calcul mûriforme.* Ger., *Maulbeerstein.* The common form of the oxalate-of-lime c.; exceedingly hard and covered with rough, sharp tubercles. [E ; L.]—**Nasal c.** Fr., *calcul des fosses nasales.* Ger., *Nasenstein.* Syn. : *rhinolith.* A calcareous concretion situated in any of the nasal passages ; usually formed around a foreign body. [G. M. Lefferts (A, 277).]—**Nephritic c.** See *Renal c.*—**Neutral phosphate-of-lime c.** A c. consisting of monohydric calcium

phosphate. [L, 307.]—**Organic c.** A c. consisting of epithelium, blood, etc.; usually serving as the nucleus of some other variety of c. [L, 307.]—**Oxalate-of-lime c.** A urinary c. consisting of calcium oxalate; usually formed in the kidney; commoner in children than in adults; light-colored and fairly smooth when small, dark-brown (occasionally white) and rough when large. [L, 307.] Cf. *Mulberry c.* and *Hemp-seed c.*—**Pancreatic c.** Lat., *c. pancreatis.* Fr., *calcul du pancreas.* Ger., *Pankreasstein.* A calcareous concretion formed in the pancreatic duct; usually multiple and consisting of calcium carbonate or phosphate. [N. Senn (A, 473).]—**Parotid c.** A c. formed in the substance of the parotid gland or in its duct. [T. L. Stedman (A, 473); L, 213.]—**Phosphate-of-lime c.** A rare urinary c. consisting wholly of calcium phosphate. When of renal origin, it is composed of monohydric calcium phosphate; when formed in the bladder, as it more commonly is, it is called bone-earth c., and consists of normal calcium phosphate, constituting irregular, mortar-like infusible masses. [A, 476.]—**Phosphatic c.** See *Ammoniaco-magnesian-phosphate c., Ammoniaco-magnesian-and-phosphate-of-lime c.,* and *Phosphate-of-lime c.*—**Pineal c.** Fr., *calcul de la glande pinéale.* See Acervulus.—**Pisiform c.** A pea-shaped c.; usually of uric acid and multiple, often having facets. [L, 213.]—**Podagric c.** Lat., *c. podagricus.* See *Arthritic c.*—**Preputial c.** Lat., *c. præputialis.* Fr., *calcul préputial.* Ger., *Vorhautstein.* Syn.: *postholith.* A c. formed between the prepuce and the glans penis; consisting of calcified smegma or of products of the ammoniacal decomposition of urine retained beneath the prepuce. [E; L, 44, 213.]—**Primary c.** A urinary c. formed independently of disease of the mucous membrane of the urinary tract. [L, 213.]—**Prostatic c.** Lat., *c. prostatæ.* Fr., *calcul prostatique* (ou *de la prostate*). Ger., *Prostatastein.* A c. formed in the follicles of the prostate gland; either a corpus amylaceum or a calcareous concretion. [L, 307.]—**Prostato-vesical c.** See *Vesico-prostatic c.*—**Pulmonary c.** Lat., *c. pulmoneus.* Fr., *calcul pulmonaire* (ou *du poumon*). Ger., *Lungenstein.* A cretaceous mass formed in the lung or in a bronchial gland. [L, 41, 43, 44.] Cf. Phthisis *calculosa.*—**Renal c.** Lat., *c. renalis* (seu *renum*). Fr., *calcul rénal* (ou *du rein*). Ger., *Nierenstein.* A c. formed in the tubuli uriniferi, the calices, or the pelvis of the kidney. [L, 43.]—**Salivary c.** Lat., *c. salivalis.* Fr., *calcul salivaire.* Ger., *Speichelstein.* 1. A c. formed in the substance or the duct of a salivary gland. [L, 41, 43.] 2. The calcareous deposit ("tartar") forming an incrustation on the teeth. [E.]—**Sanguineous c.** See *Blood c.*—**Saponaceous c.** See *Fatty c.*—**Scrotal c.** Fr., *calcul scrotal* (ou *des bourses*). Ger., *Skrotalstein, Hodensackstein.* 1. A vesical or prostatic c. which has found its way into the scrotum. Gräfe records an instance of such a c. weighing 26 oz. [G. M. Humphry (A, 279).] 2. A cutaneous c. of the scrotum. A remarkable case of such calculi was described by V. Mott in 1827 as one of "calculous degeneration of the scrotum." [D. M. Reese (A, 298).]—**Secondary c.** A urinary c. formed as the result of a diseased state of the mucous membrane of the urinary tract. [L, 213.]—**Seminal c.** See *Spermatic c.*—**Silicious c.** A silicious body (usually a pebble) found in the bladder, into which it has been inserted. Occasionally, according to G. Bird, crystals of silicic acid form a small part of a true urinary c. [A, 476.]—**Spermatic c.** Lat., *c. seminalis.* Fr., *calcul séminal* (ou *des vésicules séminales*). Ger., *Samenstein.* A concretion sometimes found in the seminal vesicles. [L, 43, 44.] See Sympexion.—**Stercoraceous c.** Fr., *calcul stercoral.* Ger., *Kothstein.* A concretion consisting largely of hardened fæcal matter.—**Stomachic c.** See *Gastric c.*—**Sublingual c.** A salivary c. of the sublingual gland.—**Subpreputial c.** See *Preputial c.*—**Symptomatic c.** See *Secondary c.*—**Tonsillar c.** Fr., *calcul de l'amygdale.* A concretion formed in a tonsillar follicle. [L, 43.]—**Triple c., Triple-phosphate c.** See *Ammoniaco-magnesian-phosphate c.*—**Umbilical c.** A c. extracted or voided from the umbilicus. It may be a urinary c. escaping through or formed in a patulous urachus. [L, 213.]—**Urate c.** A c. made up of waters, usually of sodium, ammonium, and calcium. [A, 475.]—**Urate-of-ammonium c.** A finely laminated, slate-colored or clay-colored urinary c., small and almost peculiar to children; by some regarded as a uric-acid c. [A, 476; L, 213.]—**Ureteric c.** Fr., *calcul de l'uretère.* A c. situated in the ureter. [L, 43.]—**Urethral c.** Lat., *c. urethralis.* Fr., *calcul uréthral.* Ger., *Harnröhrenstein.* A c. situated in the urethra; usually of vesical or renal formation. [L, 44.]—**Uric-acid c.** A common form of urinary c., consisting largely of uric acid, yellowish or light-brown. It constitutes the nucleus of most urinary calculi. [A, 476; L, 307.]—**Uric-oxide c.** See *Xanthic-oxide c.*—**Urinary c.** Lat., *c. urinarius.* Fr., *calcul urinaire.* Ger., *Harnstein.* A c. formed in any part of the urinary tract. [L, 43, 44.]—**Uro-stealith c.** See Uro-stealith.—**Uterine c.** Fr., *calcul de l'utérus.* Ger., *Uterusstein.* 1. A calcareous concretion situated in the uterine cavity; either a tumor which has undergone calcareous degeneration or a calcareous deposit upon an intra-uterine tumor or a retained product of conception. 2. A concretion formed in a follicle of the cervical canal of the uterus. [A, 182; L, 41.]—**Venous c.** See Phlebolith.—**Vesical c.** Lat., *c. vesicæ.* Fr., *calcul vésical* (ou *de la vessie*). Ger., *Blasenstein.* A c. situated in the urinary bladder. [L, 43.]—**Vesico-prostatic c.** A c. situated partly in the urinary bladder and partly in the prostate. [L, 213.]—**Xanthic c., Xanthic-oxide c., Xanthin c.** A very rare form of urinary c. composed of xanthin and hypoxanthin; smooth and greasy, varying from gray to brown. [E, 12; L, 307.]

CALDA (Lat.), n., f. of adj. *caldus* (*aqua* understood). Ka^{2}l-(ka^{3}l)'da^{3}. Hot or warm water. [Pliny (A, 318).]

CALDAMENTUM (Lat.), n. n. Ka^{2}l(ka^{3}l)-da^{2}m(da^{3}m)-e^{2}nt'-u^{3}m(u^{4}m). A fomentation. [A, 318.]

CALDANE (It.), n. Ka^{3}l-da^{3}n'a. A place in Corsica, where there is a chalybeate spring. [A, 319.]

CALDANELLE DI CAMPIGLIA (It.), n. Ka^{3}l-da^{3}n-e^{2}l'la de ka^{3}m-pel'ya^{3}. A place in the valley of Cornia, Italy, having a tepid spring containing calcium sulphate, sodium, calcium, and magnesium chlorides, and magnesium and calcium carbonates. [B, 269.]

CALDANICCIA (It.), n. Ka^{3}l-da^{3}n-et'chi^{2}-a^{3}. A place in Corsica, where there is a hot sulphurous and feebly saline spring. [A, 319; L, 87.]

CALDAR, n. An old name for tin. [L, 84.]

CALDARIUM (Lat.), n. n. Ka^{2}l(ka^{3}l)-da(da^{3})'ri^{2}-u^{3}m(u^{4}m). A hot bath; also the hot room of the ancient bath. [A, 318; H.]

CALDAS (Sp., Port.), n. Ka^{3}l'da^{3}s. Hot springs. [L, 41.]—**C.-da-Rainha** (Port.). A place in Portugal, where there is a hot sulphurous spring. [L, 41.]—**C.-de-Besaya** (Sp.). A place in Spain, where there is a warm saline spring. [A, 385; L, 49.]—**C.-de-Bohi** (Sp.). A place in the province of Lerida, Spain, where there are springs containing calcium sulphate, hot sulphurous springs, and a cold ferruginous spring. [A, 321.]—**C.-de-Cuntis** (Sp.). A place in Spain, where there are hot springs containing sodium sulphide. [L, 41.]—**C.-de-Estrac** (Sp.). A place in Spain, where there is a warm saline spring. [L, 49.]—**C.-de-Geres** (Port.). A place in Portugal, where there is a hot sulphurous spring. [L, 105.]—**C.-de-Malavella** (Sp.). A place in Spain, where there are warm springs containing calcium chloride. [A, 385; L, 49.]—**C.-de-Mombuy** (Sp.). A place in Spain, where there are hot saline springs. [A, 385; L, 41, 87.]—**C.-de-Monsortinho** (Port.). See Penagareia.—**C.-de-Montbuy** (Sp.). See *C.-de-Mombuy.*—**C.-de-Oviedo** (Sp.). A place in Spain, where there is a warm spring containing various carbonates. [A. 385; L, 87.]—**C.-de-Reyes** (Sp.). A place in Spain, where there is a hot sulphurous and saline spring. [A, 385.]—**C.-de-Tuy** (Sp.). A place in Spain, where there is a hot saline spring. [A, 385; L, 49.]—**C.-Novas** (Port.). A place in Brazil, where there is a warm sulphurous spring. [A, 385; L, 49.]

CALDEIRA-DE-HEREDIA (Sp.), n. Ka^{3}l-da'e-ra^{3} da a-ra'-di^{2}-a^{3}. See Heredia.

CALDERA-BUSH, n. Ka^{2}l-de'ra-bu^{4}sh. The *Pandanus odoratissimus.* [B, 172.]

CALDERIÆ BALNEÆ, CALDERIÆ ITALICÆ (Lat.), n's f. pl. Ka^{2}l(ka^{3}l)-de(da)'ri^{2}-e(a^{3}-e^{2}) ba^{2}l(ba^{3}l)'ne^{2}-e(a^{3}-e^{2}), i^{2}t-a^{2}l-(a^{3}l)'i^{2}-se(ka^{3}-e^{2}). Ancient names for certain warm baths near Ferrara, Italy. [A, 325; L, 105.]

CALDESIA (Lat.), n. f. Ka^{2}l(ka^{3}l)-dez(das)'i^{2}-a^{3}. See Alisma.

CALDIERO (It.), n. Ka^{3}l-de-a'ro. A place in Italy, where there is a hot spring containing free carbon dioxide, lime, magnesia, alum, magnesium and sodium chlorides, magnesium carbonate, and silica. [A, 385; L, 105.]

CALDILLAS-DE-SAN-MIGUEL (Sp.), n. Ka^{3}l-del'ya^{3}s da sa^{3}n me-gwe^{2}l'. A place in Salamanca, Spain, where there is a warm spring containing sodium chloride and free carbonic acid. [L, 49.]

CALDUS (Lat.), adj., contr. for *calidus.* Ka^{2}l(ka^{3}l)'du^{3}s(du^{4}s). Warm, hot; as a n., a sort of mulled wine; as a n., in the f., see Calda.

CALE, n. Kal. See Cabbage.

CALEA (Lat.), n. f. Kal(ka^{3}l)'e^{2}-a^{3}. Fr., *calée.* 1. Of Linnæus, a genus of composite plants of the *Helianthoideæ*, indigenous to tropical America, comprising seven sections formerly regarded as distinct genera. 2. Of Gärtner, see Neurolæna. [B, 42, 121.]—**C. lobata.** See Neurolæna *lobata.*—**C. Zacatechichi** [Lessing]. Sp., *simonillo* [Mex. Ph.]. A Mexican species. The infusion is used in Mexico as a domestic tonic and antiperiodic, and has been employed for hepatic calculi. [J. M. Maisch, "Am. Jour. of Pharm.," Mar., 1886, p. 122.]

CALEACTE (Lat.), n. f. Ka^{2}l(ka^{3}l)-e^{2}-a^{2}k(a^{3}k)'te(ta). Fr., *caléacte.* Of R. Brown, a section of the genus *Calea*, comprising species with radiate heads. [B, 42.]

CALEÆ (Lat.), n. f. pl. Ka^{2}l(ka^{3}l)'e^{2}-e(a^{3}-e^{2}). Of Lessing, a division of the *Heleniecæ*, comprising *Calea*, etc. [B, 170.]

CALEBASSE (Fr.), n. Ka^{3}l-ba^{3}s. A gourd. [B, 121; L, 41.]—**C. d'Europe** [Fr. Cod.], **C. d'herbe, C. douce.** The *Lagenaria vulgaris.* [B, 113, 121.]—**C. du Sénégal.** The fruit of *Adansonia baobab.* [B, 121.]—**Sirop de c.** A syrup made from the fruit of a *Crescentia*, especially the *Crescentia cujete*; formerly much used in medicine. [B, 38, 121.]

CALEBASSÉ (Fr.), adj. Ka^{3}l-ba^{3}s-a. Gourd-shaped. [A, 385.]

CALEBASSIER (Fr.), n. Ka^{3}l-ba^{3}s-i^{2}-a. A plant, especially a *Crescentia*, furnishing a gourd. [B, 121.]—**C. du Sénégal.** The *Adansonia digitata.* [B, 121.]—**C. rampant.** The genus *Crescentia.* [B.]

CALEBRACHYS (Lat.), n. f. Ka^{2}l(ka^{3}l)-e^{2}b'ra^{3}-ki^{2}s(ch^{2}u^{6}s). Of Cassini, a genus of the *Compositæ*, now referred to *Calea*, including *Calea Zacatechichi.* [B, 42.]

CALECTASIEÆ (Lat.), n. f. pl. Ka^{2}l(ka^{3}l)-e^{2}k-ta^{2}z(ta^{3}s)-i(i^{2})'-e^{2}-e(a^{3}-e^{2}). Fr., *calectasiées.* Of Endlicher, a family of plants comprising the genus *Calectasia*, to which subsequent authors have added two other Australian genera; of Reichenbach, Meissner, and Bentham and Hooker, a suborder or tribe of the *Juncaceæ*; of Engler, a tribe of the *Liliaceæ.* [B, 42, 170; Engler (B, 245).]

CALEDONIA SPRINGS, n. Ka^{2}l-e^{2}-don'i^{2}-a^{3}. A place in Prescott County, Ontario, Canada, where there are three springs (the "Gas," the "Saline," and the "Intermittent") said to resemble those of Dürkheim, Bavaria. [A, 363.]

CALÉE (Fr.), n. Ka^{3}l-a. See Calea.

CALEEKEE, n. In Sumatra, the *Carica papaya.* [B, 121.]

CALEE KUSTOOREE, n. In India, the *Abelmoschus moschatus.* [B, 19.]

CALEFACIENT, adj. Ka^{2}l-e^2-fa′si^2-e^{2}nt. Gr., *θερμαίνων*, *διαθερμαίνων*. Lat., *calefaciens* (from *calefacere*, to make warm). Fr., *caléfacient*. Ger., *erwärmend*. Causing a sensation of heat. [A, 325.]

CALEFACTIO (Lat.), n. f. Ka^{2}l(ka^{3}l)-e^2-fa^{2}k(fa^{3}k)′shi^2(ti^2)-o. Gen., *calefactio′nis*. See CALEFACTION.—**C. virgæ.** See *Simple* CHANCRE.

CALEFACTION, n. Ka^{2}l-e^2-fa^{2}k′shu^{3}n. Gr., *θέρμανσις*. Lat., *calefactio*. Fr., *caléfaction*. Ger., *Erwärmung*. The act of heating or of producing a sensation of heat. [A, 301, 325.]

CALEIA (Lat.), n. f. Ka^{2}l(ka^{3}l)-i′(e^2′i^2)-a^3. Calcium. [B, 180.]

CALEINEÆ (Lat.), n. f. pl. Ka^{2}l(ka^{3}l)-e^2-i^{2}n′e^{2}e(a^3-e^2). Fr., *caléinées*. Of Cassini, a division of the *Compositæ* (*Heleniеæ*), including *Calea* and related genera. [B, 121, 170.] Cf. CALEÆ.

CALEMBERA (Carib), n. The seeds of *Entada scandens*. [B, 88, 121.]

CALENDAR, n. Ka^{2}l′e^{2}n-da^{3}r. Lat., *calendarium*. Fr., *calendrier*. Ger., *Kalender*. An almanac, a book of registration. [A, 318.]—**Floral c., Flora's c.** Lat., *calendarium Floræ* (seu *florum*). Fr., *calendrier de Flore* (ou *du botaniste*). Ger., *Blumenkalender*. A table of plants arranged according to their time of flowering. [A, 322; B, 34, 121; L, 119.]—**Obstetric c.** Lat., *calendarium graviditatis*. Ger., *Schwangerschaftskalender*. A table of dates at which pregnancy may be expected to terminate, the date of conception being known or estimated. [A, 322.]

CALENDULA (Lat.), n. f. Ka^{2}l(ka^{3}l)-e^{2}n′du^2(du^4)-la^3. Said to be from *calendæ*, the first day of the month, from its being fabled to be capable of flowering on the first day of every month. Fr., *calendule*, *souci*. Ger., *Ringelblume*. It., *fiorrancio*. Sp., *caléndula* [Sp. Ph.]. Syn.: *Caltha* [Mönch] (1st def.), *Calthala* (1st def.). 1. The marigold; of Linnæus, a genus of composite plants of the tribe *Calendulaceæ*. 2. Of the U. S. Ph., the flowering herb of *C. officinalis*. [A, 322; B, 5, 19, 42.]—**Acetum calendulæ** [Sard. Ph., 1773]. Fr., *vinaigre de souci*. Ger., *Ringelblumenessig*. A filtered infusion of 1 part of the flowers of *C. officinalis* in 4 parts of vinegar. [B, 119.]—**C. alpina.** Of the authors of the sixteenth century, the *Arnica montana*. [B, 121.]—**C. arvensis** [Linnæus]. Fr., *souci des champs*. Ger., *Ackerringelblume*. A species indigenous to central Europe, much smaller than *C. officinalis*. Its herb (*herba calendulæ silvestris*) is used for the same purposes as the latter. [B, 270.]—**C. martialis, C. mineralis.** See *Flores calendulæ mineralis*.—**C. officinalis** [Linnæus]. Fr., *souci des jardins*, *fleur de tous les mois*. Ger., *Ringelblume*, *Todtenblume*, *Dotterblume*, *Goldblume*. Sp., *caléndula* [Sp. Ph.]. The pot- (or garden-) marigold; an annual herb indigenous to southern Europe. The fresh plant has a heavy, disagreeable odor, which it loses on drying, and a salty, bitter taste. It contains calendulin. The fresh herb—the *c.* of the U. S. Ph., the *herba calendulæ* (seu *calthæ sativæ*, seu *verrucariæ*—and the flowers—*flores calendulæ*, the *caléndula* of the Sp. Ph.—also the achænia, have been used in hepatic disorders, scrofula, and cancer, and as a vulnerary. The flowers have also been employed for coloring butter and cheese and in adulterating saffron. [B, 81, 119, 270.]—**C. palustris.** See CALTHA *palustris*.—**C. silvestris.** See *C. arvensis*.—**Conserva calendulæ** [Palat. Disp., 1764; Sard. Ph., 1773]. Fr., *conserve de souci*. A mixture of 1 part of the flowers of *C. officinalis* and 2 parts of sugar. [B, 119.]—**Extractum calendulæ.** Fr., *extrait de souci*. Ger., *Ringelblumenextract*. An extract made by evaporating the juice of *C. officinalis*. [Hess. Ph., 1827; Sax. Ph., 1837 (B, 119).]—**Flores calendulæ.** The unexpanded flower-heads of *C. officinalis*. [B, 119.]—**Flores calendulæ mineralis.** An old name for chloride of iron and ammonium. [B; L, 85.]—**Herba calendulæ.** The herb of *C. officinalis*. [B, 119.]—**Tinctura calendulæ** [U. S. Ph.]. Fr., *teinture de souci*. A preparation made by moistening 20 parts of the flowers of *C. officinalis*, in No. 20 powder, with 40 of diluted alcohol, macerating for 24 hours, then percolating, with the gradual addition of diluted alcohol, until 100 parts are obtained. [A, 477.]

CALENDULACEÆ (Lat.), n. f. pl. Ka^{2}l(ka^{3}l)-e^{2}nd-u^2(u^4)-la-(la^3)′se^2(ke^2)-e(a^3-e^2). Fr., *calendulacées*. Of Cassini and succeeding authors, a tribe of the *Compositæ*, including *Calendula*, *Dimorphotheca*, and other genera with heterogamous radiate heads surrounded by an involucre of one or two rows of subequal narrow bracts, the receptacle naked, the anthers mucronate-subcaudate at the base, the styles with truncate branches or, in the sterile florets, unbranched, the achænia usually devoid of pappus, and the leaves alternate or radical [Bentham and Hooker]. By Reichenbach it was divided into the *C. genuinæ* (comprising *Calendula* and several genera since referred to *Dimorphotheca*) and the *Osteospermeæ*. Link, who called the *C.* an order, assigned to it *Calendula*, *Silphium*, and *Arctotis*, now placed in three different tribes. [B, 42, 170.]

CALENDULARIÆ (Lat.), n. f. pl. Ka^{2}l(ka^{3}l)-e^{2}nd-u^2(u^4)-la-(la^3)′ri^2-e(a^3-e^2). Fr., *calendulariées*. Of Reichenbach, a subsection of the *Radiatæ*, comprising the divisions *Millerieæ*, *Flaverieæ*, *Melampodieæ*, *Silphieæ*, *Calenduleæ*, and *Madieæ*. [B, 170.]

CALENDULEÆ (Lat.), n. f. pl. Ka^{2}l(ka^{3}l)-e^{2}nd-u^{2}l(u^{4}l)′e^2-e-(a^3-e^2). Of Cassini, Spach, and others, the *Calendulaceæ* (*q. v.*). Cassini divided it into the *C. archetypæ* (comprising *Calendula* and several genera now referred to *Dimorphotheca*) and the *Osteospermeæ*. [B, 170.]

CALENDULIN, n. Ka^{2}l-e^{2}nd′u^2-li^{2}n. Lat., *calendulinum*, *calendulina*. Fr., *calenduline*. Ger., *Kalendulin*. An amorphous principle extracted by Geiger and Stolze from the leaves and flowers of *Calendula officinalis*; in water it swells into a gelatinous mass, and dissolves in aqueous solutions of potash and ammonia. [A, 322; B, 270.]

CALENTURA (Sp.), n. Ka^{3}l-e^{2}n-tur′a^3. Fr., *calenture*. Fever. The term was used by the old Spanish navigators to denote any form of fever with delirium observed in the tropics, and from them Sauvages adopted it as the name of a special disease (which has been described as peculiar to mariners and characterized by a particular form of delirium in which the patient, unless prevented, will jump into the sea, thinking that he is walking into green fields); but its use in this sense has been discarded. [A, 301, 322, 325; B, 117; Le Roy de Méricourt, "Arch. gén. de méd.," 1857, ii, p. 129.]—**C. amarilla.** Yellow fever. [A, 301.]

CALENTURAS, n. A bitter wood of the Philippines, used as a remedy for fever (see CALENTURA). [L, 105, 109.]—**C. palo.** Lit., fever-wood; a name for cinchona and other febrifuge plants. [B, 121.]

CALENUM (Lat.), n. n. Ka^{2}l(ka^{3}l)-e(a)′nu^{3}m(nu^{4}m). An ancient name for a fine variety of wine produced in a town of the same name (now Calvi). [A, 318, 325.]

CALEPINEÆ (Lat.), n. f. pl. Ka^{2}l(ka^{3}l)-e^{2}p-i^{2}n′e^2-e(a^3-e^2). Fr., *calépinées*. Of Reichenbach, a subdivision of cruciferous plants (*Synclistæ* or *Nucamentaceæ*), comprising *Calepina*, *Zilla*, and *Muricaria*. [B, 170.]

CALESIAM, CALESIUM, CALESJAM, n's. In Malabar, the *Odina wodier*. [B, 38, 121; L, 119.]

CALETIEÆ (Lat.), n. f. pl. Ka^{2}l(ka^{3}l)-e^{2}t-i(i^2)′e^2-e(a^3-e^2). Fr., *caletiées*. Of Müller, a tribe of the *Euphorbiaceæ* (*Stenolobieæ*); of Baillon, a subseries of the *Phyllantheæ*, comprising *Caletia* and other genera of the *Stenolobieæ* [Bentham and Hooker] in which the cells of the ovary are bi-ovulate. [B, 42, 121.]

CALEYA (Lat.), n. f. Ka^{2}l(ka^{3}l)-e(a)′ya^3. Fr., *caléye*. Of Endlicher, the genus *Caleana*. [B.]

CALEYIDÆ (Lat.), n. f. pl. Ka^{2}l(ka^{3}l)-e(a)′yi^{2}d-e(a^3-e^2). Of Lindley, a section of orchids (*Arethuseæ*), including *Caleya* and two other genera. [B, 170.]

CALEZAN, n. See CALESIAM.

CALF, n. Ka^{3}f. O. Sax., *calf*. A.-S., *cealf*. Gr., *ἰταλός* (1st def.), *κνήμη* (2d def.). Lat., *vitulus* (1st def.), *sura* (2d def.). Fr., *veau* (1st def.), *mollet* (2d def.). Ger., *Kalb* (1st def.), *Wade* (2d def.). 1. The young of any animal of the genus *Bos*, especially *Bos taurus*; sometimes applied also to the young of other mammals. 2. The rounded posterior fleshy part of the leg in man.—**C's-foot.** The *Arum maculatum*. [B, 275.]—**C's-snout.** 1. The *Antirrhinum orontium*. 2. The *Linaria cymbalaria*. [B, 19, 121.]

CALI, n. See KALI.

CALI-APOCARO, n. According to Rumphius, a shrub of Malabar. [Bory (B, 121).]

CALIATURHOLZ (Ger.), n. Ka^{3}l-i^2-a^3-tur′ho^{3}ltz. The wood of *Pterocarpus santalinus*. [B, 270.]

CALIBRATION, n. Ka^{2}l-i^2-bra′shu^{3}n. Ger., *Calibrirung*. The process of ascertaining the calibre of a tube (as of a burette) or of definite portions of it; usually by observing the length of a column of liquid of known volume in different parts of the tube. [B.]

CALICAL, adj. Ka^{2}l′i^{2}k-a^{2}l. For deriv., see CALYX. Lat., *calicalis*. Fr., *c.* More properly written calycal. Of or pertaining to the calyx; of stamens, inserted on the calyx. [B, 1.]

CALICANTHACEÆ (Lat.), **CALICANTHEÆ** (Lat.), n's f. pl. Ka^{2}l(ka^{3}l)-i^{2}k-a^{2}n(a^{3}n)-tha(tha^3)′se^2(ke^2)-e(a^3-e^2), -a^{2}n(a^{3}n)′the^2-e(a^3-e^2). See CALYCANTHACEÆ and CALYCANTHEÆ.

CALICANTHUS (Lat.), n. m. Ka^{2}l(ka^{3}l)-i^{2}k-a^{2}n(a^{3}n)′thu^{3}s-(thu^{4}s). Fr., *calicanthe*. See CALYCANTHUS.

CALICARPIDE (Fr.), n. Ka^{3}l-i^2-ka^{3}rp-ed. From *κάλυξ* (see CALYX), and *καρπός*, a fruit. A fruit composed of several hard, horny achænia inclosed in a calyx that has become enlarged and fleshy. [A, 301, 385.]

CALICATE, adj. Ka^{2}l′i^{2}k-at. Lat., *calicatus*. Fr., *calicé*. See CALYCATE.

CALICE, n. Ka^{2}l′i^{2}s. For deriv.. see CALIX. A cup-shaped depression at the upper end of a corallum, which lodges the gastric sac of the living animal. [L, 121.] Cf. CALIX.

CALICE (Fr.), n. Ka^{3}l-es. See CALIX and CALYX.—**C. commun.** See CALYX *communis*.—**C. interne.** Of Magnol, the envelope of a seed. [B, 121.]

CALICÉ (Fr.), adj. Ka^{3}l-e-sa. See CALYCATE.

CALICÈRE (Fr.), n. Ka^{3}l-e-sar. See CALYCERA.

CALICERIEÆ (Lat.), n. f. pl. Ka^{2}l(ka^{3}l)-i^{2}s(i^{2}k)-e^{2}r-i(i^2)′e^2-e-(a^3-e^2). Fr., *calicériées*. See CALYCEREÆ.

CALICES (Lat.), n. m., pl. of *calix* (*q. v.*). Ka^{2}l(ka^{3}l)′i^{2}s(i^{2}k)-ez(e^{2}s).

CALICHE (Sp.), n. Ka^{3}l-e′cha. A commercial term in South America for crude sodium nitrate. [B, 270.]

CALICHIMATHEIA (Lat.), n. f. Ka^{2}l(ka^{3}l)-i^{2}k(i^{2}ch^2)-i^{2}m-a^{2}th(a^{3}th)-i′(e^2′i^2)-a^3. Of C. Bauhin, the *Marrubium pseudo-dictamnus*. [B, 121.]

CALICHIRI (Carib), n. The *Hecastophyllum*. [B, 121.]

CALICHIRICHIBOU (Carib), n. The *Cornutia pyramidata*. [B, 121.]

CALI-CHIRONE (Carib), n. The *Indigofera tinctoria* and the *Datura sarmentosa*. [B, 121.]

CALICIA (Lat.), n. n. pl. Ka^{2}l(ka^{3}l)-i^{2}s(i^{2}k)′i^2-a^3. Of Fries, a series of lichens, comprising *Calicium* and other genera. [B, 170.]

CALICIACEÆ (Lat.), n. f. pl. Ka^{2}l(ka^{3}l)-i^{2}s(i^{2}k)-i^2-a(a^3)′se^2-(ke^2)-e(a^3-e^2). Fr., *caliciacées*. Of Arnold, a series of *Mycolichenes*, comprising the tribes *Caliciеæ*, *Coniocybeæ*, and *Acolieæ*. [B, 170.]

CALICIACEI (Lat.), n. m. pl. Ka^{2}l(ka^{3}l)-i^{2}s(i^{2}k)-i^2-a(a^3)′se^2-(ke^2)-i(e). Of Tuckerman, a tribe of lichens distinguished by the turbinate-lentiform or globose, often stipitate apothecia surrounded by a proper exciple and breaking up into naked spores which unite into a compact mass. [B, 75.]

CALICIDEÆ (Lat.), **CALICIDIÆ** (Lat.), n's f. pl. Ka^{2}l(ka^{3}l)-i^{2}s(i^{2}k)-i^{2}d'e^2-e(a^3-e^2), -i^2-e(a^3-e^2). Of Gray, a division of lichens (*Cœnothalameœ*), the *Caliciei* of Nylander. [B, 121, 170.]

CALICIEÆ (Lat.), n. f. pl. Ka^{2}l(ka^{3}l)-i^{2}s(i^{2}k)-i(i^2)'e^2-e(a^3-e^2). Fr., *caliciées*. Of Fries, Reichenbach, and Arnold, a tribe or family of lichens, corresponding to the *Caliciei* of Nylander. [B, 170.]

CALICIEI (Lat.), n. m. pl. Ka^{2}l(ka^{3}l)-i^{2}s(i^{2}k)-i(i^2)'e^2-i(e). Fr., *caliciés*. Of Nylander and Tuckerman, a family or tribe of lichens, including *Calicium*, *Coniocybe*, etc. [B, 75, 121.]

CALICIFLORÆ (Lat.), n. f. pl. Ka^{2}l(ka^{3}l)-i^{2}s(i^{2}k)-i^2-flo're-(ra^3-e^2). See CALYCIFLORÆ.

CALICIFLORE (Fr.), adj. Ka^{3}l-i^{2}s-i^2-flor. Calycifiorous; as a n., in the pl., *c's*, the *Calyciflorœ*. [B.]

CALICIFLORIA (Lat.), n. f. Ka^{2}l(ka^{3}l)-i^{2}s(i^{2}k)-i^2-flo'ri^2-a^3. From *calyx* (*q. v.*), and *flos* a flower. Of Dumortier, an order of the *Bitegmia*, comprising the families *Ephemereœ*, *Hydrocharideœ*, *Alismaceœ*, *Bromelideœ*, and *Narcisseœ*; *i. e.*, those in which the external row of perianth segments is calycine. [B, 121, 170.]

CALICIFORM, adj. Ka^{2}l-i^{2}s'i^2-fo^{3}rm. See CALYCIFORM.

CALICIN, n. Ka^{2}l'i^{2}s-i^{2}n. For deriv., see CALICIUM. Also written, improperly, *calycin*. A golden-yellow, crystalline, neutral substance, obtained by treating the *Calicium chrysocephalum* with boiling ligroin. [B, 270.]—**C'säure** (Ger.). See CALICINIC ACID.

CALICIN (Fr.), adj. Ka^{3}l-i^{2}s-a^{2}n^2. See CALYCINE.

CALICINAL, adj. Ka^{2}l-i^{2}s'i^{2}n-a^{2}l. See CALYCINE and CALYCATE.

CALICINAR, adj. Ka^{2}l-i^{2}s'i^{2}n-a^{3}r. See CALYCINAR.

CALICINE, adj. Ka^{2}l'i^{2}s-i^{2}n. Fr., *calicin*. 1. Of or resembling a calice. 2. See CALYCINE. [B; L, 121.]

CALICINIANUS (Lat.), adj. Ka^{2}l(ka^{3}l)-i^{2}s(i^{2}k)-i^{2}n-i^2-a(a^3)'nu^{3}s-(nu^{4}s). Fr., *calicinien*. Derived from or consisting of the calyx; as the envelope of the fruit consisting of a persistent calyx. [B, 1.]

CALICINIC ACID, n. Ka^{2}l''i^{2}s-i^{2}n'i^{2}k. Fr., *acide calicinique*. Ger., *Calicinsäure*, *Calycinsäure*. Also (improperly) written *calycinic acid*. An acid produced by heating calicin with a solution of an alkaline carbonate. [B, 270.]

CALICIOIDEÆ [Agardh, Nylander] (Lat.), **CALICIOIDEI** [Schärer, Fries] (Lat.), n's f. and m. pl. Ka^{2}l(ka^{3}l)-i^{2}s(i^{2}k)-i^2-o(o^2)-i^{2}d(ed)'e^2-e(a^3-e^2), -i(e). From *Calicium* and εἶδος, likeness. See CALICIEI.

CALICION (Fr.), n. Ka^{3}l-i^{2}s-e-o^{2}n^2. See CALICIUM.

CALICIPARE (Fr.), adj. Ka^{3}l-es-e-pa^{3}r. Producing or developing into a calyx; said of a flower all the parts of which have assumed the form of a calyx. [B, 38.]

CALICITUBIA (Lat.), n. f. Ka^{2}l(ka^{3}l)-i^{2}s(i^{2}k)-i^2-tu^2(tu^4)'bi^2-a^3. From *Calyx* (*q. v.*), and *tubus*, a pipe. Of Dumortier, an order of the *Bitegmia* comprising the families *Nyclagineœ*, *Jasionideœ*, *Chisantheœ*, *Campanulaceœ*, *Gessneridiœ*, *Vaccinidiœ*, *Ericineœ*, *Ebenaceœ*, *Cucurbitaceœ*, and *Passifloreœ*. [B, 121, 170.]

CALICIUM (Lat.), n. n. Ka^{2}l(ka^{3}l)-i^{2}s(i^{2}k)'i^2-u^{3}m(u^{4}m). From κάλιξ, a cup, from the cupuliform apothecia. Often wrongly written *Calycium*. Of Persoon, a genus of lichens belonging to the tribe *Caliciei*. [B, 121.]—**C. chrysocephalum.** A species forming yellow spots on birches, oaks, and other trees. It furnishes calicin. [B, 270.]

CALICLE, n. Ka^{2}l'i^2-kl. See CALYCLE.

CALICOBLASTS, n. pl. Ka^{2}l''i^{2}k-o-bla^{2}sts. A more correct spelling for *calycoblasts* (*q. v.*). [B.]

CALICO-BUSH, n. Ka^{2}l'i^2-ko bu^{4}sh'. The *Kalmia latifolia*. [B, 215.]

CALICOCCA (Lat.), n. f. Ka^{2}l(ka^{3}l)-i^2-ko^{2}k'ka^3. See CALLICOCCA.

CALICOPHORIDÆ (Lat.), n. f. pl. Ka^{2}l(ka^{3}l)-i^{2}k-o(o^2)-fo^{2}r'-i^{2}d-e(a^3-e^2). From κάλιξ, a cup, and φορεῖν, to bear. Also written *Calycophoridœ*. An order of the *Siphonophora*. [L, 147.]

CALICO-TREE, n. Ka^{2}l'i^2-ko tre. See CALICO-BUSH.

CALICOZOA (Lat.), n. n. pl. Ka^{2}l(ka^{3}l)-i^{2}k-o(o^2)-zo'a^3. From κάλιξ, a cup, and ζῷον, an animal. Also written *Calycozoa*. Ger., *Kelchquallen*. A legion of the *Hydromedusœ*. [L, 121, 173.]

CALICULA (Lat.), n. f. Ka^{2}l(ka^{3}l)-i^{2}k'u^2(u^4)-la^3. Dim. of *calix* (= *calyx*). See CALYCLE.

CALICULAR, adj. Ka^{2}l-i^{2}k'u^2-la^{3}r. From κάλιξ, a cup. Lat., *calicularis*. Fr., *caliculaire*. 1. Cup-shaped. [B.] 2. Pertaining to a calice. [L, 121.] 3. See CALYCULAR.

CALICULATE, adj. Ka^{2}l-i^{2}k'u^2-lat. See CALYCULATE.

CALICULE (Fr.), n. Ka^{3}l-e-ku^{6}l. See CALYCLE.

CALICULÉ (Fr.), adj. Ka^{3}l-e-ku^{6}l-a. See CALYCULATE.

CALICULUS (Lat.), n. m. Ka^{2}l(ka^{3}l)-i^{2}k'u^2(u^4)-lu^{3}s(lu^{4}s). See CALYCLE.

CALICUNGULIA (Lat.), n. n. pl. Ka^{2}l(ka^{3}l)-i^{2}k-u^{3}n^2(u^{4}n^2)-gu^{2}l-(gu^{4}l)'i^2-a^3. Of Dumortier, an order of the *Bitegmia*, comprising the families *Calycrateœ*, *Tithymaleœ*, *Nopaleœ*, *Grossularieœ*, *Crassulaceœ*, *Cunoniaceœ*, *Dicerocarpeœ*, *Portulaceœ*, *Ficoidœ*, *Cercodineœ*, *Rhexideœ*. *Tamariscineœ*, *Lythrariœ*. *Agrimonidiœ*, *Drupaceœ*, *Pomaceœ*, *Rosaceœ*, *Spirœaceœ*, *Leguminosœ*, *Terebintaceœ*, *Zanthozyleœ*, and *Frangulaceœ*. [B, 121, 170.]

CALIDÆ AQUÆ (Lat.), n. f. pl. Ka^{2}l(ka^{3}l)'i^{2}d-e(a^3-e^2) ak-(a^{3}k)'we(wa^3-e^2). The "hot springs"; a bathing-place in ancient Zeugitana mentioned by Pliny. [B.]

CALIDARIUM (Lat.), n. n. Ka^{2}l(ka^{3}l)-i^{2}d-a(a^3)'ri^2-u^{3}m(u^{4}m). See CALDARIUM.

CALIDAY-TOMBAY, n. In Malabar, the *Hydrophylax maritima*. [B, 121.]

CALIDUM (Lat.), n., n. of adj. *calidus* = τὸ θερμόν. Ka^{2}l(ka^{3}l)'-i^{2}d-u^{3}m(u^{4}m). Also written *caldum*. Heat, also anything hot, such as a hot drink, a mixture of wine and hot water. [B.]—**C. innatum.** A term the Greek equivalent of which was used by Hippocrates to designate vital heat, *i. e.*, the inherent heat existing in the body and regarded by him as the principle of life. [D, 3.]

CALIETA, CALIETTE, n's. Of Paracelsus, certain small yellow fungi found in juniper-berries. [Ruland, Johnson (A, 325).]

CALIFORNIA SELTZER SPRINGS, n. Ka^{2}l-i^2-fo^{2}rn'i^2-a^3 se^{2}ltz'u^{5}r spri^{2}ngz. Alkaline springs in Mendocino County, California, containing gaseous carbon dioxide, sodium, magnesium, calcium, and iron carbonates, sodium chloride, alumina, silica, and minute quantities of lithium carbonate, calcium sulphate, boric acid, and organic matter. [A, 363.]

CALIFORNIN, n. Ka^{2}l-i^2-fo^{3}r'ni^{2}n. Fr., *californine*. A bitter substance obtained by Winckler from the bark of the *Symplocos racemosa*. [B, 270.]

CALIGACEA (Lat.), n. n. pl. Ka^{2}l(ka^{3}l)-i^{2}g-a(a^3)'se^2(ke^2)-a^3. See SIPHONOSTOMA.

CALIGATION, n. Ka^{2}l-i^{2}g-a'shu^{3}n. Lat., *caligatio*. See CALIGO.

CALIGIDÆ (Lat.), **CALIGIDEÆ** (Lat.), **CALIGIDES** (Lat.), n's f. pl. Ka^{2}l(ka^{3}l)-i^{2}j(i^{2}g)'i^{2}d-e(a^3-e^2), -i^{2}j(i^{2}g)-i^{2}d'e^2-e(a^3-e^2), -i^{2}j-(i^{2}g)'i^{2}d-ez(e^{2}s). Fr., *caligidées*. A family of the *Peltocephala*. [L, 303.]

CALIGINOUS, adj. Ka^{2}l-i^{2}j'i^{2}n-u^{3}s. Gr., ἀχλυόεις, ἀχλυώδης. Lat., *caliginosus*. Fr., *caligineux*. Ger., *dunkel*. Pertaining to or affected with caligo. [A, 301, 385.]

CALIGNI, n. See LICANIA and MOQUILEA.

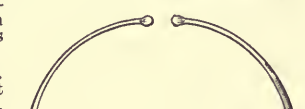
CALIGO (Lat.), n. f. Ka^{2}l(ka^{3}l)-i(e)'go. Gen., *calig'inis*. From the root *cal-*, to conceal. Gr., ζόφος, ἀχλύς. Fr., *obscurité*, *éblouissement*. Ger., *Verdunkelung*, *Dunkelwerden*. Literally, a thick mist. An obsolete term for obscurity or aberration of vision. [A, 322, 325; L, 102; F.]—**C. corneæ.** Syn.: *macula*, *nebula*, *leucoma*, *albugo oculorum*. C. due to opacity of the cornea. [L, 97.]—**C. humorum.** Blindness from opacity or defect in the humors of the eye. [L, 107.]—**C. lentis.** Cataract. [F.]—**C. palpebrarum.** C. due to opacity having its origin in or about the lids. [L. 102.]—**C. pupillæ, C. synizesis.** C. due to closure of the pupil; synizesis. [F.]—**C. tenebrarum.** Hemeralopia, or night-blindness. [F.]

CALIGULA (Lat.), n. f. Ka^{2}l(ka^{3}l)-i^{2}g'u^2(u^4)-la^3. Dim. of *caliga*, a boot. Fr., *caligule*. Ger., *Stiefel*. Literally, a little boot; of Illiger, the skin covering the tarsus of birds. [L, 180.]

CALIMERIS (Lat.), n. f. Ka^{2}l(ka^{3}l)-i^{2}m'u^{5}r(e^{2}r)-i^{2}s. Gen., *calimer'idis*. Fr., *caliméride*. Of Cassini and Nees, a genus of composite plants, now regarded as a section of *Aster*. [B, 42, 121.]

CALINEA (Lat.), n. f. Ka^{2}l(ka^{3}l)-i^{2}n'e^2-a^3. Fr., *calinée*, *calinier*, *caliniée*. See DOLIOCARPUS.

CALINUX [Rafinesque] (Lat.), n. f. Ka^{2}l(ka^{3}l)'i^2-nu^{3}x(nux). Gen., *cali'nucis*. See PYRULARIA.



CALIOLOGY, n. Ka^{2}l-i^2-o^{2}l'o^{2}j-i^2. From καλία, a hut, and λόγος, understanding. That branch of ornithology devoted to the study of birds' nests. [L, 221.]

CALIOS, n. In the Philippines, the *Calius lactescens*. [B, 121.]

CALIPASH, n. Ka^{2}l-i^2-pa^{2}sh'. From Fr., *carapace*. The portion of a turtle's meat belonging to the upper shell, which contains a greenish gelatinous substance. [L, 56.]

CALIPEE, n. Ka^{2}l-i^2-pe'. The portion of a turtle's meat belonging to the lower shell, containing a light-yellowish gelatinous substance. [L, 56.]

CALIPERS, n. pl. Ka^{2}l'i^{2}p-u^{5}rz. Probably altered from *calibers*, which through the old French *qualibre* is from *qua libra* (= of what weight). Fr., *compas d'épaisseur*. Ger., *Dickemesser*, *Tasterzirkel*. An instrument, usually in the form of a pair of compasses with curved legs, for measuring the diameter of a round body. Baudelocque's c. are used in pelvimetry. [A, 15; B.]

BAUDELOCQUE'S CALIPERS. (AFTER CHARPENTIER.)

CALIPHYLLUM (Lat.), n. n. Ka^{2}l(ka^{3}l)-i^2-fi^{2}l(fu^{6}l)'lu^{3}m-(lu^{4}m). From καλός, beautiful, and φύλλον, a leaf. Fr., *caliphylle*. See PORPHYRIUM.

CALIRIBA (Carib), n. The *Lantana involucrata*. [B, 121.]

CALISAYA (Sp.), n. Ka^{3}l-e-sa^3'ya^3. From the Indian words *colli*, red, and *saya*, shaped [Weddell], or *calla*, a remedy, and *salla*, a "rocky foundation" [Pöppig], or the name of an Indian chief [Markham]. [B, 23.] A name applied to several species of *Cinchona* furnishing yellow bark and also to the bark itself; usually and more properly restricted to the *Cinchona c.* [B, 23.]—**Bolivian c.** A variety of flat c. bark distinguished by its thinness and close texture and by the presence of numerous laticiferous ducts. [B,

18.]—**C. alta, C. amarilla.** South American names for varieties of the *Cinchona c.* (*q. v.*). [B, 5.]—**C. arrolada.** In South America, quilled c. bark. [B, 5.] See *Yellow* CINCHONA *bark.*—**C. bark.** Ger., *C'rinde.* The bark of the *Cinchona c.*; yellow cinchona bark. [B.]—**C'china** (Ger.). See *C. bark.*—**C. fibrosa.** See *Fibrous c. bark.*—**C. fina.** See *C. amarilla.*—**C. ledgeriana.** The *Cinchona c.*, var. *ledgeriana.* [B.]—**C. morada.** In South America, a variety of yellow cinchona bark. [B, 23.]—**C. of Santa Fé de Bogotá.** The bark of *Cinchona lancifolia.* [B. 5, 23.]—**C. plancha** (Sp.), **C. plat** (Fr.). See *Flat c. bark.*—**C'rinde** (Ger.). See *C. bark.*—**C. tecta, C. tubulata.** Quilled c. bark. [B.] See *Yellow* CINCHONA *bark.*—**C. verde.** See *C. alta.*—**Falsche C.** (Ger.). See *Spurious c. bark.*—**Fibrous c. bark.** Lat., Sp., *c. fibrosa.* The bark of *Cinchona scrobiculata* and *Cinchona lancifolia*; so called on account of its fibrous fracture. [B, 81.]—**Flat c. bark.** Fr., *c. plat.* Sp., *c. plancha.* Yellow cinchona bark (the bark of *Cinchona c.*) in flat pieces. [B, 5, 81.]—**Infusion of c. bark.** See *Infusum* CINCHONÆ.—**Light c.** The bark of *Cinchona scrobiculata.* [B, 23.]—**Peruvian c. bark.** A sort of c. bark derived from the *Cinchona scrobiculata*, var. δ *delondriana.* [B, 19.]—**Quill c., Quilled c. bark.** Lat., *cortex chinæ convolutus.* Sp., *c. arrolada.* Yellow cinchona bark in quills. [B.] See *Yellow* CINCHONA *bark.*—**Reddish c.** (or **C.**) **bark.** The bark of *Cinchona scrobiculata.* [B, 23.]—**Spurious c. bark.** See under CINCHONA.

CALISAYINE, n. Ka^{2}l-i^2-sa'yen. Fr., *calisayne*, c. Ger., *Calisayin.* A name for several reddish amorphous bases derived from cinchona bark. They consist chiefly of quinine. [B, 270.]

CALISAYQUE (Fr.), adj. Ka^{3}l-e-sa^3-ek. Of or pertaining to calisayine. [B, 38.]

CALISPERMUM (Lat.), n. n. Ka^{2}l(ka^{3}l)-i^2-spu^{6}r(spe^{2}r)'mu^{3}m-(mu^{4}m). Of Loureiro, a genus of plants, by some referred to the *Berberideæ*, by others to the *Flacourtieæ.* [B, 121.]

CALISTA (Lat.), n. f. Ka^{2}l(ka^{3}l)-i^{2}s'ta^3. A variety of fungus growing on the juniper-tree. [L, 41.]

CALISTACHYA (Lat.), n. f. Ka^{2}l(ka^{3}l)-i^{2}s-ta^{2}k(ta^{3}ch^2)'i^2(u^6)-a^3. From καλός, beautiful, and στάχυς, an ear of corn. Of Rafinesque, see LEPTANDRA.

CALISTHENICS, n. Ka^{2}l''i^{2}s-the^{2}n'i^{2}x. See CALLISTHENICS.

CALISTOGA HOT SPRINGS, n. Ka^{2}l-i^{2}s-to'ga^3 ho^{2}t' spri^{2}n^{2}gz'. Hot springs in Napa County, California. They contain in 1 pint:

Sodium carbonate	6·671 grains.
Ammonium carbonate	8·613 "
Sodium chloride	10·577 "
Magnesium iodide	0·011 "
Sodium pyroborate (anhydrous)	12·911 " (equivalent to 24·417 grains of the hydrated salt or commercial borax).
Alumina	0·157 grains.
Silicic acid	1·029 "
Matters volatile at a red heat	8·221 "
Total solids	48·190 "
Gaseous carbon dioxide	9·60 cu. in.

These springs probably contain a higher percentage of ammonium salts than any other known. They are said to be very efficacious in gout, rheumatism, paralysis, dartrous affections of the skin, chronic lead-poisoning, and tertiary syphilis. [B, 15.]

CALIUS (Lat.), n. m. Kal(ka^{3}l)'i^2-u^{3}s(u^{4}s). From *calios*, the native name. Of Blanco, a genus of plants growing in the Philippines; doubtfully referred to the *Moreæ*, and by Bentham and Hooker regarded as akin to or identical with the genus *Pseudostrebius.* [B, 42, 121.]—**C. lactescens** [Blanco]. A tree of the Philippines with milky juice; the *calios* of the natives. [B, 121.]

CALI-VALLI (Hind.), n. The *Convolvulus hastatus.* [B, 121.]

CALIX (Lat.), n. m. Kal(ka^{3}l)'i^{2}x. Gen., *cal'icis.* Gr., κάλιξ. Fr., *calice.* Ger., *Kelch.* Also (but improperly for the 1st and 2d def's.) written *calyx.* 1. A cup. 2. A cup-shaped organ or depression; hence (*a*) the depression in the corallum which lodges the gastric sac (see CALICE), (*b*) a c. of the kidney (*q. v.*, *infra*), and (*c*) the cavity left on the surface of the ovary by the rupture of a Graafian vesicle. 3. A calyx (*q. v.*). [A, 66; B.]—**Calices majores.** The larger, primary calices of the kidney, connecting directly with its pelvis. [L, 31.]—**Calices minores.** The lesser, secondary calices of the kidney, receiving the papillæ. [L, 31.]—**Calices of the kidney.** Lat., *calices* (seu *infundibula*) *renis.* Fr., *calices* (ou *entonnoirs*) *du rein.* Ger., *Nierenkelche*, *Nierenbecher.* The cup-like prolongations of the pelvis of the kidney which surround the papillæ and receive the urine discharged from the orifices of the latter. [C.]—**Calices vomitorii.** Ger., *Brechbecher.* Syn.: *pocula emetica.* Emetic cups; cups made of antimony, the latter imparting emetic properties to the contained liquid. [B, 98.]

CALIXENE (Lat.), n. f. Ka^{2}l(ka^{3}l)-i^{2}x'e^{2}n-e(a). See CALLIXENE.

CALLA (Lat.), n. f. Ka^{2}l(ka^{3}l)'la^3. From κάλλος, beauty. Of Linnæus, a genus of aquatic araceous herbs of the tribe *Calleæ.* [B, 42; Engler (B, 245).]—**C. æthiopica.** 1. Of Linnæus, the *Richardia africana.* 2. Of Gärtner, the *C. palustris.* [Engler (B, 216).]—**C. aromatica** [Roxburgh]. The *Homalonema aromaticum.* [B, 172.]—**C. des marais** (Fr.). The *C. palustris.* [B.]—**C. d'Éthiopie** (Fr.). The *Richardia æthiopica* (*africana*). [B, 19.]—**C. dracontium** [Meyer]. The *Monstera pertusa.* [B, 216.]—**C. lily.** The *Richardia africana.* [B.]—**C. palustris** [Linnæus]. Fr., *chou-calle.* Ger., *Sumpf-Schlangenkraut*, *Drachenschwanz.* A species growing in swampy districts of central and northern Europe and of the western part of North America. The rhizome—*radix dracunculi aquatici* (seu *palustris*)—has been used as a stimulating diaphoretic and contains an acrid volatile principle which is dissipated by cooking, the rhizome then becoming edible and being actually used as a food-stuff in northern Europe in times of scarcity. [B, 42, 180, 245.]—**C. sagittæfolia** [Michaux]. The *Xanthosoma sagittifolium.* [Engler (B, 216).]—**C. virginica** [Michaux]. The *Peltandra virginica.* [B, 216.]—**Egyptian c.** The *Richardia africana.* [B, 34.]

CALLACEÆ (Lat.), n. f. pl. Ka^{2}l(ka^{3}l)-la(la^3)'se^2(ke^2)-e(a^3-e^2). Fr., *callacées.* A division, order, suborder, family, or tribe of araceous plants comprising, according to Reichenbach, the subdivisions *Lemneæ*, *Pistiaceæ*, *Calleæ*, and *Pothoinæ*, or, in a later classification, the subdivisions *Richardieæ*, *Calleæ*, and *Orontieæ*; according to Bartling, followed by Meissner, the tribes *Cyclantheæ* (now usually referred elsewhere), the *Calleæ*, and the *Pothoinæ*; according to Schott, the genera *Calla*, *Monstera*, and *Scindapsus*; according to Endlicher, who regards it as characterized by the hermaphrodite flowers, the tribes *Calleæ*, *Orontiaceæ*, and *Acoroideæ*; according to Brongniart, the genera *Acorus*, *Symplocarpus*, *Dracontium*, *Anthurium*, *Monstera*, and *Calla*; and according to Spach, the tribes *Pistiaceæ*, *Cryptocoryneæ*, *Dracunculineæ*, *Thompsonieæ*, *Caladieæ*, *Anaporeæ*, and *Calleæ.* [B, 121, 170.]

CALLALU, CALLALUH, n's. In Amboyna, a species of *Amarantus* (according to Mérat and De Lens, the *Amarantus oleraceus*) which is there eaten as spinach. [Rumphius (B, 88, 121).]

CALLANDOULÉ (Fr.), n. Ka^{3}l-la^{3}n-du-la. The French form of a Coromandel name for the *Glycine monophylla.* [B, 121.]

CALLE (Fr.), n. Ka^{3}l. See CALLA.

CALLEÆ (Lat.), n. f. pl. Ka^{2}l(ka^{3}l)'le^2-e(a^3-e^2). Fr., *callées.* 1. Of Reichenbach (1828) and Bartling, a subdivision of the *Callaceæ*, comprising *Ambrosinia*, *Cryptocoryne*, *Arisarum*, *Arum*, *Symplocarpus*, *Calla*, *Richardia*, and *Caladium.* Afterward by Reichenbach divided into the *C.* (2d def.) and the *Orontieæ.* 2. Of Endlicher, Spach, Kunth, Lindley, and others, a tribe of araceous plants (*Callaceæ*, *Orontiaceæ*), comprising *Calla*, *Monstera*, *Scindapsus*, and other genera characterized, according to Bentham and Hooker, by the inappendiculate spadix and by the hermaphrodite naked flowers with 4 or more stamens, which are distinct and have flattened linear filaments and terminal anthers, and with an ob-pyramidal or prismatic ovary upon whose dilated vertex is placed the depressed subsessile sulcate stigma. Cf. CALLACEÆ [Schott]. By Schott it is divided into the subtribes *Callineæ* and *Monsterineæ.* 3. Of Engler, a tribe of the *Araceæ* (suborder *Calloideæ*), consisting of the single genus *Calla*, distinguished by its naked flowers, albuminous seeds, and parallel-veined leaves. [B, 42, 121, 170; Engler (B, 245).]

CALLE-CALLE, n. In Chili, the *Libertia ixioides.* [B, 121.]

CALLECAMENON (Lat.), n. n. Ka^{2}l(ka^{3}l)-e^{2}k-a^{2}m(a^{3}m)'e^{2}n-o^{2}n. Burnt copper. [L, 84.] See *Æs usta.*

CALLEIRION (Lat.), n. n. Ka^{2}l(ka^{3}l)-lir'(le^2'i^{2}r)-i^2-o^{2}n. Of Dioscorides, the *Lilium candidum.* [B, 121.]

CALLENA, CALLERIA, n's. A sort of saltpetre. [Ruland, Johnson (A, 325); L, 84.]

CALLERYA [Endlicher] (Lat.), n. f. Ka^{2}l(ka^{3}l)-le^{2}r'i^2(u^6)-a^3. See MILLETTIA.

CALLESIS (Lat.), n. f. Ka^{2}l(ka^{3}l)'e^{2}s-i^{2}s. Gen., *calles'eos* (*cal'lesis*). Of Dioscorides, a plant supposed to be the *Verbena.* [B, 121.]

CALLEUX (Fr.), adj. Ka^{3}l-lu^6. See CALLOSE and CALLOUS.

CALLI, n. In Malabar, the milky juice of several plants. [B, 121.]

CALLIANIRIDÆ (Lat.), n. f. pl. Ka^{2}l(ka^{3}l)-li^2-a^{2}n(a^{3}n)-i^{2}r-(er)'i^{2}d-e(a^3-e^2). Fr., *callianiridées.* A family of the *Stenostoma* (*Ciliograda*), having 2 wing-like lobes bearing the stenophores and 2 lateral tentacles turned from the mouth. [L, 147, 296.]

CALLIANO (It.), n. Ka^{3}l-le-a^{3}n'o. A cold mineral spring in a valley of Casale, Piedmont, containing calcium carbonate and sulphate, sulphur, gaseous hydrogen sulphide, and carbon dioxide. [L, 135.]

CALLIANTHEMUM (Lat.), n. n. Ka^{2}l(ka^{3}l)-li^2-a^{2}n(a^{3}n)'the^{2}m-u^{3}m(u^{4}m). Fr., *calliantheme.* Of C. A. Meyer, a genus of ranunculaceous plants belonging to the tribe *Anemoneæ.* [B, 42, 121.]

CALLIAN-TOUVERAI, n. See CALIANDOULÉ.

CALLIAS (Lat.), n. f. Ka^{2}l(ka^{3}l)'li^2-a^{2}s(a^{3}s). Gen., *calli'ados* (*-dis*). 1. Of Dioscorides, the *Anthemis cotula.* 2. Of Cassini, a genus of plants now referred to *Heliopsis.* [B, 42, 121.]

CALLIASTRUM (Lat.), n. n. Ka^{2}l(ka^{3}l)-li^2-a^{2}s(a^{3}s)'tru^{3}m-(tru^{4}m). Fr., *calliastre.* Of Torrey and Gray, a section of the genus *Aster*, now comprised in the section *Aster* proper. [B, 42, 215.]

CALLIBLEPHARON (Lat.), **CALLIBLEPHARUM** (Lat.), n's n. Ka^{2}l(ka^{3}l)-li^2-ble^{2}f'a^{2}r(a^{3}r)-o^{2}n, -u^{3}m(u^{4}m). Gr., καλλιβλέφαρον (from κάλλος, beauty, and βλέφαρον, the eyelid). An ancient application for beautifying the eye by darkening the edges of the lids and the lashes. [A, 387; Pliny (A, 318); F; L, 84.]

CALLIBOTRYS (Lat.), n. f. Ka^{2}l(ka^{3}l)-li^2-bo^{2}t'ri^{2}s(ru^{6}s). Gen., *callibot'ryos* (*-is*). From κάλλος, beauty, and βότρυς, a bunch of grapes. A section of the genus *Erica.* [B, 121.] See SYRINGODEA.

CALLIBRACHOA (Lat.), n. f. Ka^{2}l(ka^{3}l)-li^2-bra^{2}k(bra^{3}ch^2)-o'a^3. See CALIBRACHOA.

CALLICANTHUS (Lat.), n. m. Ka^{2}l(ka^{3}l)-li^2-ka^{2}n(ka^{3}n)'thu^{3}s-(thu^{4}s). See CALYCANTHUS.

CALLICARPA (Lat.), n. f. Ka^{2}l(ka^{3}l)-li^2-ka^{3}r'pa^3. From κάλλος, beauty, and καρπός, a fruit. Fr., *callicarpe.* Ger., *Wirbelbeere.* Of Linnæus, a genus of verbenaceous trees and shrubs of the tribe *Viticeæ.* [B, 42, 215.]—**C. acuminata** [Kunth]. See *C. bonplandiana.*—**C. americana** [Linnæus]. Syn.: *Burchardia americana* [Duhamel]. French mulberry; a low shrub of the southern United States and the West Indies, with stellate-branching scurfy pubescence, ovate-oblong, acuminate, serrate leaves,

many-flowered cymes of small blue flowers, and violet berries. The leaves (*folia callicarpæ*) have been used as a remedy for dropsy. [B, 180, 215.]—**C. bonplandiana** [Schultes]. A species growing in the United States of Colombia, where the leaves are employed as a diaphoretic and purgative. [B, 173, 180.]—**C. cana** [Linnæus]. Syn.: *Tomex tomentosa* [Linnæus]. An East Indian species, by some identified with *C. lanata*. The leaves are diuretic and diaphoretic and are used in cutaneous affections. [B, 172, 180.]—**C. lanata** [Kahl]. A shrub or small tree of India having ovate leaves and purple flowers. The bark, which is somewhat bitter and aromatic, is used in Ceylon as a masticatory instead of the betel, and from the inner bark a fibre (*aroosha fibre*) is obtained. [B, 172.] The leaves are said to be employed by the Malays as a diuretic and emollient [B, 180], and the root as a remedy in skin- iseases. [B, 172.]—**C. Rheedii** [Kostel]. A Malabar species. The acrid root together with the bark is used in decoction for fevers, hepatic disorders, and skin-diseases. The leaves are employed in aphthæ. [B, 180.]—**C. tomentosa.** 1. Of Lamarck, the *C. cana*. 2. Of Murray, the *C. lanata*.—**C. tomex** [Poiret]. The *C. cana*. [B, 173.]—**Folia callicarpæ.** The leaves of *C. americana*. [B, 180.]

CALLICARPOUS, adj. Ka^{2}l-i^2-ka^{3}rp'u^{3}s. Gr., καλλίκαρπος (from κάλλος, beauty, and καρπός, a fruit). Lat., *callicarpus*. Producing fine fruit. [A, 322.]

CALLICARPUS (Lat.), n. m. and adj. Ka^{2}l(ka^{3}l)-li^2-ka^{3}r'pu^{3}s-(pu^{4}s). See CALLICARPOUS; as a n., see CALLICARPA.

CALLICEPHALUS [C. A. Meyer] (Lat.), n. m. Ka^{2}l(ka^{3}l)-li^2-se^{2}f(ke^{2}f)'a^{2}l(a^{3}l)-u^{3}s(u^{4}s). From κάλλος, beauty, and κεφαλή, the head. Fr., *callicéphale*. See CENTAUREA.

CALLICHLOE [Willdenow] (Lat.), n. f. Ka^{2}l(ka^{3}l)-li^2'klo-(ch^{2}lo^2)-e(a). See ANDROPOGON.

CALLICHROMA (Lat.), n. n. Ka^{2}l(ka^{3}l)-li^2-kro(ch^{2}ro)'ma^3. Gen., *callichro'matos* (*-is*). From κάλλος, beauty, and χρῶμα, color. Fr., *callichrome*. 1. Of Bentham, a section of the genus *Castilleia*. 2. Of Latreille, a genus of coleopterous insects. [B, 121, 180.]—**C. moschata** [Latreille]. The *Cerambyx moschatus*. [B, 180.]

CALLICHROMI (Lat.), n. m. pl. Ka^{2}l(ka^{3}l)-li^2-kro(ch^{2}ro)'mi-(me). Fr., *callichromes*. Of Savi, a tribe of the *Passeres*, so named on account of their brilliant plumage. [L, 180.]

CALLICOCCA (Lat.), n. f. Ka^{2}l(ka^{3}l)-li^2-ko^{2}k'ka^3. From κάλλος, beauty, and κόκκος, a grain. Fr., *callicoque*. Of Schreber and Brotero, De Candolle, and Gmelin, different genera of rubiaceous plants, now all referred to *Cephaelis*. [B, 42, 121.]—**C. eveas** [Brotero], **C. ipecacuanha** [Brotero]. The *Cephaelis ipecacuanha*. [B, 42, 173, 180.]

CALLICORE [Link] (Lat.), n. f. Ka^{2}l(ka^{3}l)-li^{2}k'o^{2}r-e(a). From κάλλος, beauty, and κόρη, a virgin, the pupil of the eye. See AMARYLLIS.

CALLICOSTEÆ (Lat.), n. f. pl. Ka^{2}l(ka^{3}l)-li^2-ko^{2}st'e^2-e(a^3-e^2). From *Callicosta*, the single genus. A family of mosses made by C. Mueller. [B, 121.]

CALLICREAS (Lat.), n. m. Ka^{2}l(ka^{3}l)-li^{2}k're^2-a^{2}s(a^{3}s). Gen., *callicre'atos* (*-tis*). Gr., καλλίκρεας (from κάλλος, beauty, and κρέας, flesh). The pancreas. [Galen (B, 115).]

CALLICYSTHUS [Endlicher] (Lat.), n. m. Ka^{2}l(ka^{3}l)-i^2-si^{2}s-(ku^{6}s)'thu^{3}s(thu^{4}s). Fr., *callicysthe*. See VIGNA.

CALLIELÆUS (Lat.), adj. Ka^{2}l(ka^{3}l)-li^2-e^{2}l e'(a^3'e^2)-u^{3}s(u^{4}s). Gr., καλλιέλαιος (from κάλλος, beauty, and ἔλαιον, oil). Producing fine oil; as a n., the cultivated olive-tree. [A, 322, 387.]

CALLIFERUS (Lat.), adj. Ka^{2}l(ka^{3}l)-li^{2}f'e^{2}r-u^{3}s(u^{4}s). From *callus* (*q. v.*), and *ferre*, to bear. Fr., *callifère*. Ger., *schwielentragend*. Bearing a callosity or firm coriaceous thickening upon the surface. [B, 121, 123.]

CALLIFLORÉES (Fr.), n. pl. Ka^{3}l-i^2-flor-a. Of Dumortier, a division of gramineous plants in which the flowers are inserted along with the glumes so that there is no proper spikelet nor secondary rhachis (rhachilla). [B, 121.]

CALLIFORMIS (Lat.), adj. Ka^{2}l(ka^{3}l)-li^2-fo^{3}r(for)'mi^{2}s. From *callus* and *forma*, a shape. Fr., *calliforme*. Ger., *schwielenartig*. Having the form or aspect of a callous prominence. [B, 123.]

CALLIGEUM (Lat.), n. n. Ka^{2}l(ka^{3}l)-li^2-je(ga)'u^{3}m(u^{4}m). From κάλλος, beauty, and *Geum* (*q. v.*). Fr., *calligée*. Of Fischer and Meyer, a section of the genus *Geum*. [B, 121.]

CALLIGONEÆ (Lat.), n. f. pl. Ka^{2}l(ka^{3}l)-li^2-gon(go^{2}n)'e^2-e-(a^3-e^2). Fr., *calligonées*. Of C. A. Meyer, a subtribe of the *Polygonaceæ* (tribe *Pterygocarpeæ*), comprising 3 genera (all now referred to *Calligonum*), distinguished by the tetragonal ovary with 4 capitate stigmas and the tetraquetrous achænia with variously prolonged or appendaged angles. [B, 121.]

CALLIGONON [Pliny] (Lat.), **CALLIGONUM** (Lat.), n's n. Ka^{2}l(ka^{3}l)-li^{2}g'o^{2}n-o^{2}n, -u^{3}m(u^{4}m). Fr., *calligone*. 1. Of Pliny, probably the *Polygonum*. 2. Of Linnæus, a genus of polygonaceous shrubs of the tribe *Eupolygoneæ*. It includes the genera *Pterococcus* [Pallas], *Pallasia* [Linnæus], and *Calliphysa* [Fischer and Meyer], formerly regarded as distinct. 3. Of Pursh, see OBIONE. [B, 42, 121.]—**C. canescens** [Pursh]. The *Atriplex Nuttallii*. [B, 228.]—**C. pallasia** [L'Héritier], **C. polygonoides** [Pallas]. Syn.: *Pallasia caspica* [Linnæus] (seu *pterocarpus* [Pallas]), *Pterocarpus aphyllus* [Pallas]. A species of *C.* (2d def.) indigenous to northern Asia. The wood is used by the Calmucks to make a fumigation used in diseases of the eyes. The acid fruit is used to quench thirst, and the root, which contains a sweetish gummy material, is eaten. [B, 121, 173.]

CALLIGORGIADÆ (Lat.), n. f. pl. Ka^{2}l(ka^{3}l)-li^2-go^{2}r-ji(gi^2)'-a^{2}d(a^{3}d)-e(a^3-e^2). From κάλλος, beauty, and *Gorgiadæ* (*q. v.*). A family of the *Lithophyta*. [L, 245.]

CALLIMERIS (Lat.), n. f. Ka^{2}l(ka^{3}l)-li^{2}m'e^{2}r-i^{2}s. See CALIMERIS.

CALLIMORPHIDÆ (Lat.), n. f. pl. Ka^{2}l(ka^{3}l)-li^2-mo^{2}r'fi^{2}d-e(a^3-e^2). From κάλλος, beauty, and μόρφη, form. A family of the *Lepidoptera Heterocera*. [B, 248.]

CALLINEÆ (Lat.), n. f. pl. Ka^{2}l(ka^{3}l)-li^{2}n'e^2-e(a^3-e^2). Fr., *callinées*. Of Schott, a subtribe of the *Calleæ*, comprising the single genus *Calla*. [B, 121.] Cf. CALLEÆ (3d def.).

CALLINUX [Rafinesque] (Lat.), n. f. Ka^{2}l(ka^{3}l)'li^2-nu^{3}x(nu^{4}x). Gen., *calli'nucis*. From κάλλος, beauty, and *nux*, a nut. See PYRULARIA.

CALLIOMARCUS (Lat.), n. m. Ka^{2}l(ka^{3}l)-li^2-o(o^2)-ma^{3}r'ku^{3}s-(ku^{4}s). A Gaulish name for coltsfoot (*Tussilago*). [L, 84.]

CALLION (Lat.), n. n. Ka^{2}l(ka^{3}l)'li^2-o^{2}n. Of Pliny, the *Physalis alkekengi*. [Bory (B, 121).]

CALLIONYMIDÆ [Gray] (Lat.), **CALLIONYMINA** (Lat.), n's f. and n. pl. Ka^{2}l(ka^{3}l)-i^2-o^{2}n-i^{2}m(u^{6}m)'i^{2}d-e(a^3-e^2), -i^{2}m(u^{6}m)-i(e)'na^3. From κάλλος, beauty, and ὄνομα, name. A family of the *Acanthopterygii*. [L, 303.]

CALLIONYMOS (Lat.), n. m. Ka^{2}l(ka^{3}l)-li^2-o^{2}n'i^{2}m(u^{6}m)-o^{2}s. From κάλλος, beauty, and ὄνομα, name. Also wrongly written *callyonimus*. An old name for the *Convallaria maialis*. [B, 88, 121.]

CALLIPÆDIA (Lat.), n. f. Ka^{2}l(ka^{3}l)-li^2 pe(pa^3'e^{2}d)-i^2-a^3. From κάλλος, beauty, and παίς, child. Fr., *callipédie*. The art of begetting beautiful children. [L, 41, 119.]

CALLIPÉDIQUE (Fr.), adj. Ka^{3}l-i^2-pa-dek. Of or pertaining to callipædia. [L, 41.]

CALLIPERS, n. Ka^{2}l'i^{2}p-u^{5}rz. See CALIPERS.

CALLIPETALON (Lat.), n. n. Ka^{2}l(ka^{3}l)-li^2-pe^{2}t'a^{2}l(a^{3}l)-o^{2}n. From κάλλος, beauty, and πέταλον, a petal. Of Dioscorides, an herb, probably a species of *Potentilla* or of *Geum*. [B, 121.]

CALLIPHORA (Lat.), n. f. Ka^{2}l(ka^{3}l)-li^{2}f'o(o^2)-ra^3. A genus of the *Muscidæ cæruleæ*. [L, 301.]—**C. anthropophaga.** A South American species. It deposits its larvæ in the nasal fossæ and on wounds. [L, 320.]

CALLIPHYLLON (Lat.), **CALLIPHYLLUM** (Lat.), n's n. Ka^{2}l(ka^{3}l)-li^2-fi^{2}l(fu^{6}l)'o^{2}n, -u^{3}m(u^{4}m). Gr., καλλίφυλλον, from κάλλος, beauty, and φύλλον, a leaf. 1. Of Hippocrates, the *Adiantum*. 2. Of Gaudichaud, a group of plants, regarded as a section of the genus *Saxifraga*. [B, 115, 121.]

CALLIPHYSA [Fischer and Meyer] (Lat.), n. f. Ka^{2}l(ka^{3}l)-li^{2}f'i^{2}s(u^{6}s)-a^3. Fr., *calliphyse*. See CALLIGONUM.

CALLIPTERIS (Lat.), n. f. Ka^{2}l(ka^{3}l)-li^{2}p'tu^{5}r(te^{2}r)-i^{2}s. Gen., *callipter'idos* (*-is*). From κάλλος, beauty, and *Pteris* (*q. v.*). Fr., *calliptéride*. Of J. Smith, a genus of ferns, by Hooker referred to *Asplenium*. [B, 19, 242.]

CALLIPYGOS (Lat.), adj. Ka^{2}l(ka^{3}l)-li^2-pi(pu^6)'go^{2}s. Gr., καλλίπυγος, from κάλλος, beauty, and πυγή, the buttock. Having beautiful buttocks (said of a mollusc with a white stellate spot at its base). [L, 41.]

CALLIRHOE [Nuttal] (Lat.), **CALLIROE** [Link] (Lat.), **CALLIRRHOE** (Lat.), n's f. Ka^{2}l-li^{2}r'o(o^2)-e(a), -ro(ro^2)-e(a). Gr., Καλλιῤῥόη, the name of a fountain, from κάλλος, beauty, and ῥεῖν, to flow. Fr., *callirhoé*. 1. Of Link, a section of the genus *Amaryllis*, comprising the *Amaryllis belladonna*. 2. Of Nuttall, a genus of North American malvaceous plants (the *Nuttallia* of Barton), differing from *Malva*, to which it is sometimes referred, in the frequent suppression of some or all of the 3 bracteoles and in its rostrate appendiculate carpels. [B, 19, 42, 121.]

CALLISACE (Lat.), n. f. Ka^{2}l(ka^{3}l)-li^{2}s'a^{2}s(a^{3}k)-e(a). Gen., *callis'aces*. Of Fischer, a genus of umbelliferous plants, by Bentham and Hooker referred to *Angelica*. [B, 42, 121.]—**C. cantabrigiensis** [Hoffmann]. The *Selinum silvestre*. [Duchesne (B, 173).]

CALLISEMÆA (Lat.), n. f. Ka^{2}l(ka^{3}l)-li^2-sem(sam)-e(a^3'e^2)-a^3. From κάλλος, beauty, and σημαία, a banner. Fr., *callisémée*. Of Bentham, see PLATYPODIUM.

CALLISPERMUM (Lat.), n. n. Ka^{2}l(ka^{3}l)-li^2-spu^{5}r(spe^{2}r)'-mu^{3}m(mu^{4}m). See CALISPERMUM.

CALLISTA (Lat.), n. f. Ka^{2}l(ka^{3}l)-li^{2}s'ta^3. From καλλίστα, very beautiful. Fr., *calliste*. 1. Of Loureiro, a genus of plants now referred to *Dendrobium*. 2. Of Don, a genus of plants now referred to *Erica*. [B, 42.] 3. A genus of molluscs. [L, 41.]

CALLISTA (Lat.), n. n. pl. Of Poli, a family of the *Phyllopoda*. [L, 30.]

CALLISTACHYS (Lat.), n. f. Ka^{2}l(ka^{3}l)-li^{2}s'ta^{2}k(ta^{2}ch^2)-i^{2}s-(u^{6}s). Gen., *callistach'yos* (*-yis*, *-ydis*). From κάλλος, beauty, and στάχυς, an ear of corn. Fr., *callistachyde*. 1. Of Heuffel, see CAREX. 2. Of Ventenat, see OXYLOBIUM.

CALLISTEMMA (Lat.), n. n. Ka^{2}l(ka^{3}l)-li^2-ste^{2}m'ma^3. Gen., *callistem'matos* (*-tis*). From κάλλος, beauty, and στέμμα, a garland. Fr., *callistemme*. Of Cassini, see CALLISTEPHUS. 2. Of Mertens and Koch, see SCABIOSA. 3. Of Reichenbach, see METROSIDEROS.—**C. hortense** [Cassini]. The *Callistephus chinensis*. [B, 214.]

CALLISTEMON (Lat.), n. m. Ka^{2}l(ka^{3}l)-li^{2}s-te(ta)'mo^{2}n(mon). Gen., *callistem'onos* (*-nis*). From κάλλος, beauty, and στήμων, a column (stamen). Fr., *callistémon*. Of R. Brown, a genus of myrtaceous shrubs or small trees of New Caledonia and Australia. [B, 42.]

CALLISTEMONEÆ (Lat.), n. f. pl. Ka^{2}l(ka^{3}l)-li^{2}s-te^{2}m(tam)-on'e^2-e(a^3-e^2). Fr., *callistémonées*. Of Schauer, a subtribe of myrtaceous plants (tribe *Leptospermeæ*), comprising the genera *Callistemon*, *Kunzea*, *Eucalyptus*, and *Symphomyrtus* (the last being now comprised in the genus *Eucalyptus*). [B, 121.]

CALLISTEMUM (Lat.), n. n. Ka^{2}l(ka^{3}l)-li^{2}s-te(ta)′mu^{3}m-(mu^{4}m). See Boltonia.—**C. indicum** [G. Don]. The *Boltonia indica.* [B, 42, 214.]

CALLISTEPHUS (Lat.), n. m. Ka^{2}l(ka^{3}l)-li^{2}s′te^{2}f-u^{3}s(u^{4}s). From κάλλος, beauty, and στέφος, a crown. Fr., *callistèphe.* Of Cassini, a genus of composite plants of the tribe *Asteroideæ*, subtribe *Heterochromeæ.* [B, 34, 42.]—**C. chinensis** [Nees], **C. hortensis** [Cassini]. Fr., *reine-marguerite.* Syn.: *Aster chinensis* [Linnæus], *Callistemma hortense* [Cassini], *Diplopappus chinensis* [Lessing]. The China aster; an erect annual herb indigenous to Asia and much cultivated in gardens. The leaves are said to be vulnerary and resolvent. [B, 34, 42, 173, 214.]

CALLISTHENICS, n. sing. Ka^{2}l-i^{2}s-the^{2}n′i^{2}ks. Lat., *callisthenia* (from καλλισθενής, of great strength). Fr., *callisthénie.* Ger., *Kallisthenie.* A system of light gymnastics, designed more particularly for the use of young women, to prevent or correct deviations of the vertebral column.. [Clias (A, 301).]

CALLISTITE (Fr.), adj. Ka^{3}l-les-tet. Resembling the *Callista* (3d def.). As a n. pl., *c's*, a section of the *Carabidæ* including the genus *Callista.* [L, 41.]

CALLISTODERMA (Lat.), n. n. pl. Ka^{2}l(ka^{3}l)-li^{2}s-to(to^2)-du^{5}r(de^{2}r)′ma^3. Of Poli, a family of the *Phyllopoda.* [L, 30.]

CALLITHAMNEÆ (Lat.), n. f. pl. Ka^{2}l(ka^{3}l)-li^2-tha^{2}m-(tha^{3}m)′ne^2-e(a^3-e^2). Fr., *callithamnées.* Of Hassall, a family of *Algæ.* [B, 121, 170.]

CALLITHAMNIEÆ (Lat.), n. f. pl. Ka^{2}l(ka^{3}l)-li^2-tha^{2}m-(tha^{3}m)-ni(ni^2)′e^2-e(a^3-e^2). Fr., *callithamniées.* Of Harvey, a tribe of *Algæ* (*Ceramiaceæ*), comprising genera in which the tetraspores (formed by the metamorphosis of an entire branch or article) are external and either sessile or pedicellate. According to Kützing, who makes it a family of the *Florideæ*, it is characterized by the confervaceous frond, naked, corticate, or furnished with ramusculi, and by its quadrigeminous exserted tetrachocarpi. [B, 121.]

CALLITHAUMA [Herbert] (Lat.), n. n. Ka^{2}l(ka^{3}l)-li^2-tha^4-(tha^3′u^4)-ma^3. Gen., *callithau′matos* (*-tis*). See Stenomesson.

CALLITHRIC (Fr.), n. Ka^{3}l-li^2-trek. See Callitriche.

CALLITHRIX (Lat.), n. f. Ka^{2}l(ka^{3}l)′li^2-thri^{2}x. Gen., *calli′thricis.* Gr., καλλίθριξ (from κάλλος, beauty, and θρίξ, hair). Of Pliny, a plant with colored hair. [B.] See Callitrichon.

CALLITRICHACEÆ (Lat.), n. f. pl. Ka^{2}l(ka^{3}l)-li^2-tri^{2}k-(tri^{2}ch^2)-a(a^3)′se^2(ke^2)-e(a^3-e^2). Of Lindley, an order of the euphorbial alliance. [B, 170.] See Callitrichinæ.

CALLITRICHAL, adj. Ka^{2}l-i^{2}t′ri^{2}k-a^{2}l. Lat., *callitrichalis.* Of or resembling *Callitriche.* [B.]—**C. alliance.** Lat., *nixus callitrichalis.* See Callitrichales.

CALLITRICHALES (Lat.), n. f. pl. Ka^{2}l(ka^{3}l)-li^{2}t-ri^{2}k(ri^{2}ch^2)-al(a^{3}l)′ez(e^{2}s). Of Lindley, an alliance of the *Achlamydeæ*, comprising the single order *Callitrichinæ.* [B, 170.]

CALLITRICHE (Lat.), n. f. Ka^{2}l(ka^{3}l)-li^{2}t′ri^{2}k(ri^{2}ch^2)-e(a). Gen., *callit′riches.* From κάλλος, beauty, and θρίξ, hair, from its cosmetic properties. 1. Of Pliny, see Callitrichon. 2. Of Linnæus, a genus of slender terrestrial or aquatic plants having opposite linear leaves and minute unisexual solitary axillary flowers without calyx or corolla, the male flowers consisting of a single stamen usually supported by 2 bracts (by some regarded as a perianth), the female flowers composed of a naked or bracteolate, short-stipitate or sessile, 4-lobed and 4-celled ovary with 2 subulate filiform styles and a single pendulous ovule in each cell. The fruit is coriaceous, indehiscent, 4-lobed and 4-seeded. By Bentham and Hooker the genus is referred to the *Halorageæ*, by Baillon to the *Euphorbiaceæ*, and by others it is made the type of a special order, the *Callitrichinæ* (*q. v.*). The species of *C.* secrete a mucilaginous material which is used in hair-dressing, and they are said to be employed in the preparation of cataplasms to promote suppuration and as emollients. [B, 19, 42, 121.]—**C. aquatica** [Hudson]. A species frequent in fresh-water ponds, very variable in its structural characters. [B, 19, 121.]—**C. heterophylla** [Pursh]. An aquatic species common in the southern United States, with broad spatulate, stalked leaves. Used like *C. verna.* [B, 81.]—**C. verna** [Linnæus]. Water fennel, water star-wort. A species found in ponds and sluggish streams in Europe and the northern United States. Used as a diuretic in dropsy. [B, 81.]

CALLITRICHEÆ (Lat.), n. f. pl. Ka^{2}l(ka^{3}l)-li^{2}t-ri^{2}k(ri^{2}ch^2)′-e^2-e(a^3-e^2). Fr., *callitrichées.* Of Reichenbach, a division of the *Onagreæ*; of Bartling and Spach, a tribe or division of the *Halorageæ*; of Baillon, a series of the *Euphorbiaceæ*, comprising the single genus *Callitriche.* [B, 170.] See Callitrichinæ.

CALLITRICHIDEÆ [Baillon] (Lat.), n. f. pl. Ka^{2}l(ka^{3}l)-li^{2}t-ri^{2}k(ri^{2}ch^2)-i^{2}d′e^2-e(a^3-e^2). See Callitrichinæ.

CALLITRICHINA (Lat.), n. n. pl. Ka^{2}l(ka^{3}l)-li^{2}t-ri^{2}k(ri^{2}ch^2)-in(en)′a^3. Of Gray, a tribe of the *Cebidæ.* [L, 272.]

CALLITRICHINÆ [Link, Lindley] (Lat.), **CALLITRICHINEÆ** [De Candolle, Koch, Endlicher] (Lat.), n's f. pl. Ka^{2}l(ka^{3}l)-li^{2}t-ri^{2}k(ri^{2}ch^2)-in(en)′e(a^3-e^2), -i^{2}n′e^2-e(a^3-e^2). Fr., *callitrichinées.* Syn.: *Callitrichaceæ* [Lindley], *Callitricheæ* [Reichenbach, Baillon, and others], *Callitrichideæ* [Baillon]. An order of achlamydeous plants (*Aquaticæ* [Lindley, Endlicher]) or of the *Calycifloræ* [Koch], comprising the single genus *Callitriche* (*q. v.*). By De Candolle (followed by Bartling, Spach, and Bentham and Hooker) this genus was referred to the *Halorageæ*, the *C.* being regarded as a tribe of that order; by Reichenbach, followed by Baillon, it is regarded as forming a section or series of the *Euphorbiaceæ* (*Euphorbiaceæ biovulatæ* [Baillon]). According to the last-named author, this series comprises aquatic plants with unisexual, or rarely polygamous, flowers having a single dimerous perianth (the bracteoles of Bentham and Hooker), 1 or 2 stamens, and a 2-carpelled ovary each carpel of which divides into 2 one-ovuled cells, and with a 4-celled fruit, each cell containing a single albuminous seed. [B, 42, 121, 170.] See also Callitrichaceæ, Callitricheæ, and Callitriche.

CALLITRICHON (Lat.), **CALLITRICHUM** (Lat.), n's n. Ka^{2}l(ka^{3}l)-li^{2}t′ri^{2}k(ri^{2}ch^2)-o^{2}n, -u^{3}m(u^{4}m). Gr., καλλίτριχον. [Dioscorides (B, 115).] Syn.: *Callithrix*, *Callitriche* (1st def.). Of Pliny, the *Adiantum capillus Veneris*; so called because used to dye the hair. [Bory (B, 121).]—**Herba callitrichi.** The herb of *Salvia sclarea.* [B, 180.]

CALLITRIS (Lat.), n. f. Ka^{2}l(ka^{3}l)′li^{2}t-ri^{2}s(res). Gen., *call′itris.* From κάλλος, beauty, and τρεῖς, three, on account of the ternately whorled leaves of the original species. [B, 42.] Of Ventenat, a genus of coniferous trees of the tribe *Cupressineæ* and the subtribe *Actinostrobinæ.* Under *C.* are now included several sections such as *Octoclinis*, *Hexaclinis* (*Frenela*), and *Pachylepis*, which were formerly regarded as distinct genera. [B, 42; Eichler (B, 245).]—**C. articulata.** See *C. quadrivalvis.*—**C. juniperoides** [Linnæus]. Syn.: *Cupressus juniperoides* [Linnæus], *Juniperus capensis* [Lamarck]. The *Cederboom* of the Boers; a south African tree 30 to 40 feet high. [B, 245.]—**C. quadrivalvis** [Ventenat]. Syn.: *Thuja articulata* [Vahl]. A shrub or tree growing in the mountains of northwestern Africa. It is said to be the θύον of the Greeks, used in their sacrifices, and the *arbor citri* of Pliny. Its dried resinous secretion is *sandarac* (*q. v.*). [B, 19, 180, 245.]

CALLIXENE [Commerson] (Lat.), n. f. Ka^{2}l(ka^{3}l)-li^{2}x′e^{2}n-e(a). Gen., *callix′enes.* Fr., *callixène.* The genus *Enargea.* [B, 42, 121.]

CALL-ME-TO-YOU, n. Ka^{4}l′me-tu-yu. The *Viola tricolor.* [B, 275.]

CALLOIDEÆ (Lat.), n. f. pl. Ka^{2}l(ka^{3}l)-lo(lo^2)-i^{2}d(ed)′e^2-e-(a^3-e^2). A suborder of the *Araceæ.* [Engler (B, 245).]

CALLOPHYLOS (Lat.), n. m. Ka^{2}l(ka^{3}l)-lo^{2}f′i^{2}l(u^{6}l)-o^{2}s. A name proposed by Beckmann for *Calophyllum.* [B, 121.]

CALLOSAL, adj. Ka^{2}l-os′a^{2}l. Of or pertaining to the corpus callosum (said of a cerebral convolution). [L, 14.]

CALLOSE, adj. Ka^{2}l′os. See Callous.

CALLOSITAS (Lat.), n. f. Ka^{2}l(ka^{3}l)-lo^{2}s(los)′i^{2}t-a^{2}s(a^{3}s). Gen., *callosita′tis.* See Callosity.—**C. palpebrarum.** Fr., *callosité des paupières.* Ger., *Augenlidschwiele.* An old term for a hardened condition of the eyelids. [F.]

CALLOSITY, n. Ka^{2}l-o^{2}s′i^{2}t-i^2. Gr., τύλωσις (1st def.), τύλωμα (2d def.). Lat., *callositas.* Fr., *callosité*, *durillon* (2d def.). Ger., *Verhärtung*, *Schwiele*, *Schwieligsein* (1st def.), *Callosität.* It., *callosità.* Sp., *callosidad.* 1. The state of being indurated. 2. A callous lump or excrescence. [B, 121; L, 81.]

CALLÖSKÖRPER (Ger.), n. Ka^{3}l′lu^{6}s-ku^{5}rp-e^{2}r. See Corpus *callosum.*

CALLOSO-MARGINAL, adj. Ka^{2}l-o″so-ma^{3}r′ji^{2}n-a^{2}l. Pertaining to the callosal and marginal convolutions of the cerebrum (said of a sulcus that separates them). [L, 142.]

CALLOSO-SERRATE, adj. Ka^{2}l-o″so-se^{2}r′at. Having serrations consisting of callous protuberances. [B, 19.]

CALLOSUS (Lat.), adj. Ka^{2}l(ka^{3}l)-los′u^{3}s(u^{4}s). See Callous.

CALLOTROPIS [G. Don] (Lat.), n. f. Ka^{2}l(ka^{3}l)-lo^{2}t′ro(ro^2)-pi^{2}s. See Galega.

CALLOUS, adj. Ka^{2}l′u^{3}s. Gr., τυλώδης. Lat., *callosus.* Fr., *calleux.* Ger., *callös*, *schwielig.* It., Sp., *calloso.* 1. Hard and tough. 2. Covered with hard protuberances or rugosities. [B, 121, 123.]

CALLOU (Fr.), n. Ka^{3}l-u. See Callu.

CALLU, n. The juice exuding from incisions into the inflorescence of *Cocos nucifera*, forming a variety of *toddy.* [B, 121.]

CALLUM (Lat.), n. n. Ka^{2}l(ka^{3}l)′lu^{3}m-(lu^{4}m). See Callus.

CALLUMPOTTIE (Tamil), n. The *Melastoma malabaricum.* [B, 172.]

CALLUNA (Lat.), n. f. Ka^{2}l(ka^{3}l)-lu^2(lu)′-na^3. From καλλύνειν, to sweep, because brooms are made of it. A genus of ericaceous plants of the tribe *Ericeæ.* [B, 215.]—**C. atlantica** [Seemann], **C. erica** [De Candolle], **C. vulgaris** [Salisbury]. Fr., *bruyère commune*, *grosse bruyère*, *bucane*, *pétrole.* Ger., *gemeine Haidekraut*, *Haidegras*, *Immerschönkraut.* Syn.: *Erica vulgaris* [Linnæus]. The common heather, ling; the only species. The leafy branches (*herba ericæ*, seu *ericæ vulgaris*) were formerly thought to have solvent properties and were used as a lithontriptic; a decoction of the flowers was used to relieve abdominal pain, and the juice of the leaves as a remedy for weak eyes. Tonic properties have been assigned to the plant, which is also astringent and has been used in tanning, in dyeing, and as a substitute for hops in making beer. [B, 173, 180, 215.]

THE CALLUNA VULGARIS. (AFTER BAILLON.)

CALLUNEÆ (Lat.), n. f. pl. Ka^{2}l(ka^{3}l)-lu^{2}n(lun)′e^2-e(a^3-e^2). Of Reichenbach (1827), a division of the *Ericeæ*, comprising *Blæria*, *Calluna*, *Erica*, *Menziesia*, *Azalea*, *Andromeda*, *Epigæa*, *Arctostaphylos*, and *Arbutus*; afterward made by him a subsection comprising only *Calluna.* [B, 170.]

CALLUS (Lat.), n. m. Ka^{2}l(ka^{3}l)′lu^{3}s(lu^{4}s). Gr., *τύλος*, *πῶρος*. Fr., *cal*. Ger., *Schwiele*, *Knochennarbe* (3d def.). It., Sp., *callo*. 1. A callosity (2d def.), especially one due to thickening of the epidermis from friction. 2. In botany, any part of a plant that has become hard and tough; a hard protuberance (verruca); in certain *Fungi*, the hymenium. 3. The plastic material which is exuded between and about the ends of a fractured bone in the process of repair. [A, 301, 322; B, 19, 121, 123; C; E.]—**Aeusserer C.** (Ger.). See *Provisional c.*—**C'bildung** (Ger.). The formation of c. [L, 43.]—**C'wucherung** (Ger.). An over-production of c. [L, 80.]—**Definitive c.** See *Permanent c.*—**Ensheathing c.** [Paget], **External c.** See *Provisional c.*—**Interior c., Internal c.** Fr., *cal interne*. Ger., *innerer C.* Provisional c. deposited in the medullary canal of a fractured bone. [Paget (L).]—**Interposed c., Knochen-C.** (Ger.). Fr., *cal d'interposition*. See *Permanent c.*—**Mark-C.** (Ger.). See *Internal c.*—**Mittlerer C.** (Ger.), **Permanent c.** Fr., *cal définitif*. Ger., *definitiver C.* The c. which is deposited between the ends of a broken bone and is ultimately converted into new bone serving for the permanent repair of the fracture. [A, 385; E.]—**Provisional c., Temporary c.** Fr., *cal provisoire* [Dupuytren] (ou *mou*). Ger., *provisorischer C.* The c. deposited around a fracture and within the medullary canal, serving the temporary purpose of holding the fragments in position until union has taken place, after which it is absorbed. Little if any such c. is formed when the fragments are kept steadily in apposition. [A, 301, 385; E.]

CALLUTANNIC ACID, n. Ka^{2}l-u^2-ta^{2}n′i^{2}k. Fr., *acide callutannique*. Ger., *Callutansäure*. An acid, $C_{14}H_{14}O_9$, obtained from *Calluna vulgaris*. [A, 385.]

CALLUXANTHIN, n. Ka^{2}l-u^2-za^{2}n′thi^{2}n. Lat., *calluxanthinum*. Fr., *calluxanthine*. Ger., *Calluxanthin*. A yellowish-red coloring matter, $C_{14}H_{10}O_7$, obtained by the decomposition of callutannic acid. [A, 385; L, 41, 81.]

CALLYMMIDÆ (Lat.), n. f. pl. Ka^{2}l(ka^{3}l)-li^{2}m(lu^{6}m)′i^{2}d-e-(a^3-e^2). A family of the *Stenostomata*. [L, 147.]

CALMATIVE, adj. Ka^{3}m′a^{2}t-i^{2}v. Lat., *calmans*. Fr., *calmant*. See SEDATIVE.

CALMET, n. See COSMET.

CALMEY (Ger.), n. Ka^{3}l′mi. See CALAMINE.

CALMONTANA (Lat.), n. f. Ka^{2}l(ka^{3}l)-mo^{2}nt-a(a^3)′na^3. The *Calamintha officinalis*. [B, 119.]

CALMUS (Ger.), n. Ka^{3}l′mus. The *Acorus calamus*. [B.]—**C'extract.** See *Extractum* CALAMI.—**C'gerten.** The rhizome of *Carex arenaria*. [B, 180.]—**C'öl.** See *Oil of* CALAMUS.—**C'tinctur.** See *Tinctura* CALAMI.—**C'wein.** See ACORITES.—**C'wurzel.** The rhizome of *Acorus calamus*. [B.]

CALO-APOCARO, n. The *Uvaria zeylanica*. [B, 121.]

CALOCATANOS (Lat.), **CALOCATANUS** (Lat.), n's m. Ka^{2}l-(ka^{3}l)-o(o^2)-ka^{2}t(ka^{3}t)′a^{2}n(a^{3}n)-o^{2}s, -u^{3}s(u^{4}s). The wild poppy. [L, 84, 102.]

CALOCEDRUS (Lat.), n. m. Ka^{2}l(ka^{3}l)-o(o^2)-se^{2}d(ke^{2}d)′ru^{3}s-(ru^{4}s). See LIBOCEDRUS.

CALOCEPHALUS (Lat.), adj. Ka^{2}l(ka^{3}l)-o(o^2)-se^{2}f(ke^{2}f)′a^{2}l-(a^{3}l)-u^{3}s(u^{4}s). From *καλός*, beautiful, and *κεφαλή*, the head. Fr., *calocéphale*. Having a beautiful head, top-knot, or calathidium; as a n., a genus of Australian composite plants of the tribe *Inuloideæ*. [B, 42; L, 41, 180.]

CALOCERA (Lat.), n. f. Ka^{2}l(ka^{3}l)-o^{2}s(o^{2}k)′e^{2}r-a^3. Fr., *calocère*. Of Fries, a genus of hymenomycetous *Fungi*. [B, 121.]

CALODIUM (Lat.), n. n. Ka^{2}l(ka^{3}l)-o′di^2-u^{3}m(u^{4}m). Gr., *καλώδιον*. See CASSYTHA.—**C. cochinchinense** [Loureiro]. The *Cassytha filiformis*. [B, 172.]

CALO-DOTIRO (Hind.), n. A species of *Stramonium*, differing from *Datura metel* in its smooth fruit. [B, 121.]

CALOMBA, CALOMBO, n's. See CALUMBA.

CALOMECON (Lat.), n. f. Ka^{2}l(ka^{3}l)-o(o^2)-me(ma)′ko^{2}n(kon). Gen., *calomecon'os* (*-is*). Fr., *calomécon*. See PAPAVER.

CALOMEL, n. Ka^{2}l′o-me^{2}l. Lat., *calomelas* (from *καλός*, beautiful, and *μέλας*, black, because of the black color which it gives when treated with an alkali, or in honor of a young negro who assisted Turquet de Mayerne, or because it was good (*καλός*) for black (*μέλας*) bile; or from *καλός*, beautiful, and *mel*, honey [= *mercurius dulcis*]), *hydrargyri chloridum mite*. Fr., c., *calomélas*. Ger., *C.*, *Kalomel*. It., *calomelano*. Sp., *calomélanos*. Mercurous chloride. Hg_2Cl_2. [B.] See under MERCURY *chloride*.—**C. à la vapeur** (Fr.). C. by vaporization; the *protochlorure de mercure par vaporisation* of the Fr. Cod. [B, 113.]—**Collyre sec au c.** [Fr. Cod.] (Fr.). Lat., *collyrium cum chlorureto hydrargyroso*. An impalpable powder made by triturating together equal parts of c. and powdered sugar. [B, 113.]—**Compound c. pill.** Lat., *pilula calomelanos composita* [Br. Ph., 1864]. See *Pilulæ* ANTIMONII *compositæ*.—**Jewell's c.** C. prepared by volatilization in a current of steam; finer and whiter than c. prepared by the simple elutriation or levigation of sublimed c., corresponding nearly to the *protochlorure de mercure par vaporisation* of the Fr. Cod. [B, 5.]—**Ointment of c., Pommade de c.** (Fr.). See *Unguentum* HYDRARGYRI *subchloridi*.—**Precipitated c., Sublimed c.** See under MERCURY *chloride*.—**Tablettes de c.** [Fr. Cod.] (Fr.). Lat., *tabellæ cum chlorureto hydrargyroso*. Tablets each containing 5 centigrammes of c. prepared by vaporization, 90 of powdered sugar, 10 of mucilage of tragacanth, and a very small amount of carmine. [B, 113.]—**Vegetable c.** See *Resina* PODOPHYLLI.

CALOMELÆNOS (Lat.), **CALOMELAINOS** (Lat.), n's m. Ka^{2}l(ka^{3}l)-o(o^2)-me^{2}l-e′(a^3′e^2)-no^{2}s, -a′(a^3′i^2)-no^{2}s. From *καλός*, beautiful, and *μελαίνειν*, to blacken. Of J. Hartmann, the discoverer of calomel, a variety of calomel made by him, called also *mercurius zoticus*. [A, 301, 322.]

CALOMELANOS (Lat.), n. m. Ka^{2}l(ka^{3}l)-o(o^2)-me^{2}l′a^{2}n(a^{3}n)-o^{2}s. Properly, the gen. of *calomelas* (*q. v.*). 1. Calomel. 2. Of Presl, a section of the genus *Gymnogramma*. [B, 121.]—**C. Torqueti.** See CALOMELAS *Torqueti*.

CALOMELAS (Lat.), n. n. Ka^{2}l(ka^{3}l)-o^{2}m′e^{2}l-a^{2}s(a^{3}s). Gen., *calomel'anos*. See CALOMEL.—**C. Torqueti.** In some of Sydenham's formulæ, calomel. [B, 90.]—**C. præcipitatum, C. sublimatum.** See under MERCURY *chloride*.—**C. vapore paratum, C. vaporosum.** Calomel prepared by vaporization (sublimation in a current of air). [B.]—**C. via humida.** Precipitated calomel. [B.] See under MERCURY *chloride*.—**Collyrium calomelanos.** See *Collyre sec au* CALOMEL.—**Pilula calomelanos composita** [Br. Ph., 1864]. See *Pilulæ* ANTIMONII *compositæ*.—**Unguentum calomelanos** [Br. Ph., 1864]. See *Unguentum* HYDRARGYRI *subchloridi*.

CALOMELI, CALOMELIS, n's. See CALOMEL.

CALOMELISSA (Lat.), n. f. Ka^{2}l(ka^{3}l)-o(o^2)-me^{2}l-i^{2}s′sa^3. From *καλός*, beautiful, and *μέλισσα* (see MELISSA). Of Bentham, a section of the genus *Melissa*, comprising *Melissa caroliniana* (*Calamintha grandiflora*). [B, 121.]

CALOMYRTUS (Lat.), n. f. Ka^{2}l(ka^{3}l)-o(o^2)-mu^{5}rt(mu^{6}rt)′u^{3}s-(u^{4}s). Of Blume, a genus of myrtaceous plants made for two species of *Myrtus*. [B, 121.]

CALONEMEÆ (Lat.), n. f. pl. Ka^{2}l(ka^{3}l)-o(o^2)-ne^{2}m′e^2-e(a^3-e^2). Of Rostafinski, an order of the *Myxomycetes*. [B, 75.]

CALONEURA (Lat.), n. f. Ka^{2}l(ka^{3}l)-o(o^2)-nu^{2}r′a^3. From *καλός*, beautiful, and *νεῦρον*, a nerve, from the well-marked regular nervures of the leaves. Of De Candolle, a section of the genus *Myristica*. [B, 121.]

CALONIA (Lat.), n. f. Ka^{2}l(ka^{3}l)-on′i^2-a^3. Gr., *καλωνία*. Myrrh. [Hippocrates (A, 325); L, 84, 105.]

CALONYCTION (Lat.), n. n. Ka^{2}l(ka^{3}l)-o(o^2)-ni^{2}k(nu^{6}k)′ti^2-o^{2}n. From *καλός*, beautiful, and *νύξ*, night. Of Choisy, a genus of convolvulaceous plants, now made a section of *Ipomœa*. [B, 42, 215.]—**C. speciosum** [Choisy]. The *Ipomœa bona nox*. [B, 215.]

CALOOL-TREE, n. The *Sterculia quadrifida*. [B, 275.]

CALOOSE, n. In Sumatra, the *Urtica tenacissima* and the *Bœhmeria nivea*. [B, 19.]

CALOPAPPUS (Lat.), n. m. Ka^{2}l(ka^{3}l)-o(o^2)-pa^{2}p(pa^{3}p)′pu^{3}s-(pu^{4}s). See NASSAUVIA.

CALOPE (Fr.), adj. Ka^{3}l-op. See CALOPUS.

CALOPETALON (Lat.), n. n. Ka^{2}l(ka^{3}l)-o(o^2)-pe^{2}t′a^{2}l(a^{3}l)-o^{2}n. From *καλός*, beautiful, and *πέταλον*, a leaf. Fr., *calopétalon*. The genus *Marianthus*. [B, 121.]

CALOPHACA (Lat.), n. f. Ka^{2}l(ka^{3}l)-o^{2}f′a^3-ka^3. From *καλός*, beautiful, and *φακῆ*, the lentil. Of Fischer, a genus of Asiatic leguminous plants of the tribe *Galegeæ*. [B, 42, 121.]

CALOPHANES (Lat.), n. f. Ka^{2}l(ka^{3}l)-o^{2}f′a^{2}n(a^{3}n)-ez(as). From *καλός*, beautiful, and *φαίνεσθαι*, to appear. Fr., *calophane*. Of Don, a genus of North American acanthaceous herbs of the tribe *Ruellieæ*. [B, 42, 121, 215.]

CALOPHYLLE (Fr.), adj. Ka^{3}l-o-fel. See CALOPHYLLOUS; as a n., see CALOPHYLLUM.

CALOPHYLLEÆ (Lat.), n. f. pl. Ka^{2}l(ka^{3}l)-o(o^2)-fi^{2}l(fu^{6}l)′le^2-e(a^3-e^2). Fr., *calophyllées*. A tribe of the *Guttiferæ*, comprising *Calophyllum*, *Mammea*, *Mesua*, etc. [B, 42, 170.]

CALOPHYLLIEÆ [G. Don] (Lat.), n. f. pl. Ka^{2}l(ka^{3}l)-o(o^2)-fi^{2}l(fu^{6}l)-li(li^2)′e^2 e(a^3-e^2). See CALOPHYLLEÆ.

CALOPHYLLODENDRON [Vaillant] (Lat.), n. n. Ka^{2}l(ka^{3}l)-o(o^2)-fi^{2}l(fu^{6}l)-o(o^2)-de^{2}n′dro^{2}n. From *καλός*, beautiful, *φύλλον*, foliage, and *δένδρον*, a tree. See CALOPHYLLUM.

CALOPHYLLOIDES (Lat.), adj. Ka^{2}l(ka^{3}l)-o(o^2)-fi^{2}l(fu^{6}l)-lo-(lo^2)-i(e)′dez(das). From *καλός*, beautiful, *φύλλον*, foliage, and *εἶδος*, resemblance. Resembling the *Calophyllum*; a botanical species-name. [B, 121.]

CALOPHYLLOS (Lat.), n. m. Ka^{2}l(ka^{3}l)-o(o^2)-fi^{2}l(fu^{6}l)′lo^{2}s. See CALOPHYLLUM.

CALOPHYLLOUS, adj. Ka^{2}l-o-fi^{2}l′u^{3}s. Fr., *calophylle*. Ger., *schönblätterig*. Having beautiful foliage. [B, 38, 121; L, 41.]

CALOPHYLLUM (Lat.), n. n. Ka^{2}l(ka^{3}l)-o(o^2)-fi^{2}l(fu^{6}l)′lu^{3}m-(lu^{4}m). From *καλός*, beautiful, and *φύλλον*, foliage. Fr., *calophylle*. Ger., *Schönblatt*. A Linnæan genus of guttiferous trees or shrubs of the tribe *Calophylleæ*. [B, 42.]—**C. bintagor** [Roxburgh]. An East Indian species resembling *C. inophyllum* (according to some, identical with it) and having the same uses. [B, 172, 180.]—**C. calaba** [Jacquin]. Fr., *bois-Marie*. Ger., *westindischer Schönbaum*. A West Indian tree from 20 to 60 feet high. A dark-green, aromatic resinous balsam (*baume-Marie*) obtained by incising the bark has been used as a substitute for ccpaiba and balsam of Peru, as a stimulant, expectorant, and diaphoretic, and as a remedy for gonorrhœa and leucorrhœa. The seeds furnish an illuminating oil. In Mexico the resin (*ocuje de la Habana*) is popularly believed to cure hernia. [J. M. Maisch, "Am. Jour. of Pharm.," Jan., 1886, p. 20; B, 180, 185.]—**C. edule** [Seemann]. A species now referred to *Rheedia*. [B, 42.]—**C. elatum** [Beddome]. The poonspar, a large tree of British India. [B, 172.]—**C. inophyllum** [Linnæus]. Fr., *bois-canot*. Ger., *grosses Schönblatt*. The Alexandrian laurel; a tree of British India and the Pacific islands, 100 feet high. A resinous substance resembling myrrh, thought to be a variety of tacamahac, exudes from incisions into the bark, and is used as an application to indolent ulcers and for other medicinal purposes. A dark-green oil, of a disagreeable odor (*pinnay oil*, or *bitter oil*: the *dilo* of the Fiji Islands; the *tamann* of Tahiti), obtained from the kernels of the fresh seeds, is much used medicinally, especially in rheumatism, and for illumination. The bark is said to be diuretic.

[B, 172, 180, 185.]—**C. nagassaricum** [Rumphius]. The *Mesua ferrea.* [B, 173.]—**C. spurium** [Choisy]. A tree of India. The fruit is edible and furnishes an illuminating oil. [B, 172.]—**C. tacamahaca** [Willdenow]. A tree of Madagascar and the Mauritius, resembling *C. inophyllum* and furnishing Bourbon tacamahac. [B, 173, 180.]—**C. thuriferum.** A Peruvian species furnishing incense. [B, 121.]

CALOPHYTÆ (Lat.), n. f. pl. Ka^{2}l(ka^{3}l)-o^{2}f'i^{2}t(u^{6}t)-e(a^3-e^2). From καλός, beautiful, and φυτόν, a plant. Of Bartling, a class of the *Gymnoblasti*, comprising the orders *Pomaceæ, Rosaceæ, Dryadeæ, Spiræaceæ, Amygdaleæ,* and *Chrysobalaneæ* (all now comprised in the *Rosaceæ*) and the *Papilionaceæ, Swartzieæ, Cæsalpineæ,* and *Mimoseæ* (now included under the *Leguminosæ*). [B, 170.]

CALOPODIUM (Lat.), n. n. Ka^{2}l(ka^{3}l)-o(o^2)-pod(po^{2}d)'i^2-u^{3}m-(u^{4}m). Gr., καλοπόδιον. Fr., *calopode.* Ger., *Kolbenhülle.* Lit., a shoemaker's last; of Rumphius, the spathe of the *Araceæ.* [B, 1, 121.]

CALOPS (Lat.), adj. Ka^{2}l(ka^{3}l)'o^{2}ps(ops). From καλός, beautiful, and ὤψ, the eye. Having large, brilliant eyes. [L, 180.]

CALOPTEROUS, adj. Ka^{2}l-o^{2}p'te^{2}r-u^{3}s. Lat., *calopterus* (from καλός, beautiful, and πτερόν, a wing). Fr., *caloptère.* Having beautiful wings. [L, 41, 180.]

CALOPTERYGINA (Lat.), **CALOPTERYGINÆ** (Lat.), n's n. pl. and f. pl. Ka^{2}l(ka^{3}l)-o^{2}p-te^{2}r-i^2(u^6)-ji(ge)'na^3, -ne(na^3-e^2). A sub-family of the *Agrionidæ.* [L, 121, 250.]

CALOPTILIUM [Lagasca] (Lat.), n. n. Ka^{2}l(ka^{3}l)-o^{2}p-ti^{2}l'i^2-u^{3}m(u^{4}m). Fr., *caloptilion.* See NASSAUVIA.

CALOPUS (Lat.), adj. Ka^{2}l(ka^{3}l)'o(o^2)-pu^{3}s(pus). Gr., καλόπους (from καλός, beautiful, and πούς, the foot). Fr., *calope.* Ger., *schönfüssig.* Having a beautiful stipes or foot. [L, 180.]

CALOPYXIS (Lat.), n. f. Ka^{2}l(ka^{3}l)-o(o^2)-pi^{2}x(pu^{6}x)'i^{2}s. See COMBRETUM.

CALOR (Lat.), n. m. Ka(ka^3)'lo^{2}r. Gen., *calo'ris.* Gr., θέρμη, θερμότης. Fr., *chaleur.* Ger., *Hitze, Wärme.* Heat. [D.]—**C. animalis.** Animal heat. [L, 135.]—**C. fervens.** Boiling heat (212° F.). [L, 107.]—**C. innatus.** See CALIDUM *innatum.*—**C. lenis.** A gentle heat (from 90° to 100° F.). [L, 107.]—**C. mordax, C. mordicans.** Lit., a biting heat; a pungent heat of the skin. [L, 107.]—**C. nativus.** See CALIDUM *innatum.*

CALORESCENCE, n. Ka^{2}l-o^{2}r-e^{2}s'e^{2}ns. Fr., *calorescence.* Ger., *Calorescenz.* The process of transformation of rays of low refrangibility (non-luminous rays) into those of higher refrangibility (luminous rays) by the interposition of a body to be heated, such as a piece of platinum or carbon. [B, 21.]

CALORHABDOS (Lat.), n. f. Ka^{2}l(ka^{3}l)-o^{2}r-a^{2}b(a^{3}b)'do^{2}s. See CALORRHABDOS.

CALORIC, adj. and n. Ka^{2}l-o^{2}r'i^{2}k. Lat., *caloricus* (adj.), *caloricum* (n.). Fr., *calorique.* Ger., *calorisch* (adj.), *Wärmestoff* (n.). It., *calorico.* Sp., *calórico.* Pertaining to or dependent on heat; as a n., heat (as formerly used, the supposititious imponderable substance supposed to be contained in all warm bodies and by its emission from them to produce the phenomena of heat). [B.]

CALORICITY, n. Ka^{2}l-o^{2}r-i^{2}s'i^{2}t-i^2. Lat., *caloricitas.* Fr., *caloricité.* Ger., *Caloricität.* It., *caloricità.* Sp., *caloricidad.* The heat-producing faculty of living organisms. [Dana (B, 116); L, 41.]

CALORIDUCT, n. Ka^{2}l-o^{2}r'i^2-du^{3}kt. From *calor,* heat, and *ducere,* to lead. A passage through which heat is conducted. [B, 116.]

CALORIE (Fr.), n. Ka^{3}l-o^{2}r-e. Ger., *Kalorie.* The French unit of heat; the amount of heat required to raise the temperature of a kilogramme of water 1° C. [B, 21.]

CALORIFACIENT, adj. Ka^{2}l-o^{2}r-i^2-fa'si^2-e^{2}nt. Lat., *calorifaciens* (from *calor,* heat, and *facere,* to make). Fr., *calorifacient.* Ger., *wärmemachend.* Heat-producing (said of certain non-nitrogenous foods). [K.]

CALORIFÈRE (Fr.), adj. Ka^{3}l-o^{2}r-i^2-fe^{2}r. From *calor,* heat, and *ferre,* to bear. Having the property of conducting heat; as a n., an apparatus for the conduction and distribution of heat, especially a system of hot-water pipes. [Ure (B, 116); L, 41.]

CALORIFIANT, adj. Ka^{2}l-o^{2}r-i^{2}f'i^2-a^{2}nt. Lat., *calorifians.* See CALORIFACIENT.

CALORIFIC, adj. Ka^{2}l-o^{2}r-i^{2}f'i^{2}k. Lat., *calorificus* (from *calor,* heat, and *facere,* to make). Fr., *calorifique.* Ger., *erwärmend.* Heating, generating heat. [B, 116.] See also *C.* RAYS.—**C. capacity.** See *Specific* HEAT.

CALORIFICATION, n. Ka^{2}l-o^{2}r-i^2-fi^2-ka'shu^{3}n. Lat., *calorificatio.* Fr., *c.* Ger., *C.* The production of heat, especially of vital heat. [B, 116.]

CALORIFICIENT, adj. Ka^{2}l-o^{2}r-i^2-fi^{2}s'i^2-e^{2}nt. See CALORIFACIENT.

CALORIFICS, n. sing. Ka^{2}l-o^{2}r-i^{2}f'i^{2}ks. Fr., *calorifique.* The physics of heat. [L, 73.]

CALORIFIQUE (Fr.), adj. Ka^{3}l-o^{2}r-i^2-fek. See CALORIFIC; as a n., see CALORIFICS.

CALORIMETER, n. Ka^{2}l-o^{2}r-i^{2}m'e^{2}t-u^{6}r. Lat., *calorimetrum* (from *calor,* heat, and μέτρον, a measure). Fr., *calorimètre.* Ger., *Calorimeter, Wärmemesser.* It., Sp., *calorimetro.* An apparatus for measuring quantities of heat, or for determining the specific heat of bodies. [B, 21.]—**Ice-c.** A c. which measures the heat that a body loses in cooling by the quantity of ice which it melts. [A, 376.]

CALORIMETRIC, CALORIMETRICAL, adj's. Ka^{2}l-o^{2}r-i^2-me^{2}t'ri^{2}k, -ri^{2}k-a^{2}l. Fr., *calorimétrique.* Ger., *kalorimetrisch.* Of or pertaining to calorimetry. [B, 116.]

CALORIMETRY, n. Ka^{2}l-o^{2}r-i^{2}m'e^{2}t-ri^2. Lat., *calorimetria.* Fr., *calorimétrie.* Ger., *Calorimetrie, Wärmemesserkunst.* The determination of quantities of heat or of specific heat, especially by the use of a calorimeter. [B, 21.]—**Direct c.** A method of ascertaining the relation of the production and loss of heat in an animal placed in a closed ventilated box surrounded on all sides by a compartment containing water or air. The amount of heat discharged is determined by the amount imparted to the water or air. [W. H. Welch, "N. Y. Med. Jour.," April 7, 1888, p. 365.]—**Indirect c.** A method of computing the heat produced in an animal from the known quantity and heat-producing value of the substances ingested by it during a given time. [W. H. Welch, *l. c.*]

CALORIMOTOR [Hare], n. Ka^{2}l-o^{2}r-i^2-mo'to^{2}r. From *calor,* heat, and *movere,* to set in motion. Fr., *calorimoteur.* Ger., *Calorimotor.* See *Hare's* BATTERY.

CALORINÈSES [Baumes] (Fr.), n. pl. Ka^{3}l-o^{2}r-i^{2}n-e^{2}s. A class of diseases characterized by morbid increase or diminution of animal heat. [A, 301, 385; L, 41.]

CALORIPUNCTURE (Fr.), n. Ka^{3}l-o^{2}r-i^2-pu^{6}n^{2}k-tu^{6}r. Puncture with a red-hot needle. [L, 88.]

CALORIQUE (Fr.), adj. and n. Ka^{3}l-o^{2}r-ek. See CALORIC.

CALORITION (Fr.), n. Ka^{3}l-o^{2}r-i^{2}s-i^2-o^{2}n^2. The faculty of perceiving changes of temperature, considered as a special sense; the temperature sense. [De Blainville (A, 301; L, 49).]

CALORRHABDOS (Lat.), n. f. Ka^{2}l(ka^{3}l)-o^{2}r-ra^{2}b(ra^{3}b)'do^{2}s. From καλός, beautiful, and ῥάβδος, a rod. Fr., *calorrhabde.* Of Bentham, a genus of Asiatic scrophulariaceous plants of the tribe *Digitaleæ.* [B, 42, 121.]

CALORY, n. Ka^{2}l'o^{2}r-i^2. See CALORIE.

CALOSACME [Wallich] (Lat.), n. f. Ka^{2}l(ka^{3}l)-o^{2}s-a^{2}k(a^{3}k)'-me(ma). See CHIRITA.

CALOSANTHES (Lat.), n. f. Ka^{2}l(ka^{3}l)-o^{2}s-a^{2}n(a^{3}n)'thez(thas). Fr., *calosanthe.* 1. See OROXYLUM. 2. Of Haworth, see CRASSULA.

CALOSANTHUS (Lat.), n. n. Ka^{2}l(ka^{3}l)-o^{2}s-a^{2}n(a^{3}n)'thu^{3}s-(thu^{4}s). From καλός, beautiful, and ἄνθος, a flower. See OROXYLUM.—**C. indicum** [Blume]. See OROXYLUM *indicum.*

CALOSCILLA (Lat.), n. f. Ka^{2}l(ka^{3}l)-o(o^2)-si^{2}l(ski^{2}l)'la^3. See SCILLA.

CALOSCORDUM [Salisbury] (Lat.), n. n. Ka^{2}l(ka^{3}l)-o(o^2)-sko^{2}rd'u^{3}m(u^{4}m). See NOTHOSCORDUM.

CALOSMA (Lat.), n. f. Ka^{2}l(ka^{3}l)-o^{2}s'ma^3. From καλός, fine, and ὀσμή, an odor. Fr., *calosme.* Of Presl, the genus *Benzoin.* [B, 121.]

CALOSOMA (Lat.), n. n. Ka^{2}l(ka^{3}l)-o(o^2)-so'ma^3. Gen., *calosom'atos (-is).* From καλός, beautiful, and σῶμα, the body. Fr., *calosome.* A genus of coleopterous insects of the family *Carabidæ.* [L, 43, 105.]—**C. sycophanta.** See BUPRESTIS.

CALOSPHACE (Lat.), n. f. Ka^{2}l(ka^{3}l)-o^{2}s'fa^{2}s(fa^{3}k)-e(a). Of Bentham, a section of the genus *Salvia.* [B, 121.]

CALOSTACHYS (Lat.), n. m. Ka^{2}l(ka^{3}l)-o^{2}s'ta^{2}k(ta^{3}ch^2)-i^{2}s-(u^{6}s). Gen., *calostach'yos (-is).* From καλός, beautiful, and στάχυς, a spike. Of Bentham, a section of the genus *Stachys.* [B, 121.]

CALOSTELMA [Don] (Lat.), n. n. Ka^{2}l(ka^{3}l)-o(o^2)-ste^{2}l'ma^3. Gen., *calostel'matos (-is).* From καλός, beautiful, and στέλμα, a girdle. See LIATRIS.

CALOSTEMMA (Lat.), n. n. Ka^{2}l(ka^{3}l)-o(o^2)-ste^{2}m'ma^3. Gen., *calostem'matos (-is).* From καλός, beautiful, and στέμμα, a crown. Fr., *calostemme.* Of R. Brown, a genus of Australian amaryllidaceous plants of the tribe *Amarylleæ,* subtribe *Cyathiferæ,* of Bentham and Hooker, or the tribe *Narcisseæ,* subtribe *Eucharidinæ* of Pax. [B, 42; Pax (B, 245).]

CALOSTIGMA (Lat.), n. n. Ka^{2}l(ka^{3}l)-o(o^2)-sti^{2}g'ma^3. Gen., *calostig'matos (-is).* From καλός, beautiful, and στίγμα, a mark. 1. Of De Caisne, a genus of Brazilian asclepiadaceous plants of the tribe *Cynancheæ.* 2. Of Schott, a section of the genus *Philodendron.* [B, 42, 121.]

CALOTHAMNEÆ (Lat.), n. f. pl. Ka^{2}l(ka^{3}l)-o(o^2)-tha^{2}m-(tha^{3}m)'ne^2-e(a^3-e^2). Of Schauer, a division of myrtaceous plants of the tribe *Leptospermeæ.* [B, 121.]

CALOTHAMNUS (Lat.), n. m. Ka^{2}l(ka^{3}l)-o(o^2)-tha^{2}m(tha^{3}m)'-nu^{3}s(nu^{4}s). From καλός, beautiful, and θάμνος, a bush. Of Labillardière, the Australian net-bush; a genus of myrtaceous shrubs of the tribe *Leptospermeæ.* [B, 42, 275.]

CALOTHRICEÆ [Hassall] (Lat.), **CALOTHRICHEÆ** [Kützing] (Lat.), n's f. pl. Ka^{2}l(ka^{3}l)-o(o^2)-thri^{2}s(thri^{2}k)'e^2-e(a^3-e^2), -thri^{2}k(thri^{2}ch^2)'e^2-e(a^3-e^2). See CALOTRICHEÆ.

CALOTHRIX (Lat.), n. f. Ka^{2}l(ka^{3}l)'o(o^2)-thri^{2}x. Gen., *calot'richos (-is).* From καλός, beautiful, and θρίξ, hair. Of Agardh, a genus of *Algæ* (*Oscillariaceæ* [Harvey] or *Scytonemaceæ* [Rabenhorst]). [B, 29, 121.]

CALOTHYRSUS (Lat.), n. m. Ka^{2}l(ka^{3}l)-o(o^2)-thu^{6}rs(thu^{6}rs)'-u^{3}s(u^{4}s). From καλός, beautiful, and θύρσος, a young shoot. See ÆSCULUS.

CALOTIS (Lat.), n. f. Ka^{2}l(ka^{3}l)-ot'i^{2}s. Gen., *calot'idos (-is).* Of R. Brown, a genus of Australian composite shrubs of the tribe *Asteroideæ.* [B, 19, 42, 121.]

CALOTRICHEÆ [Kützing] (Lat.), n. f. pl. Ka^{2}l(ka^{3}l)-o(o^2)-tri^{2}k(tri^{2}ch^2)'e^2-e(a^3-e^2). A section or family of *Algæ,* including *Calothrix* (*q. v.,* for deriv.), etc. [B. 121, 170.]

CALOTROPE (Fr.), **CALOTROPIDE** (Fr.), n's. Ka^{3}l-o-trop, -trop-ed. See CALOTROPIS.

CALOTROPIDEÆ (Lat.), n. f. pl. Ka^{2}l(ka^{3}l)-o(o^2)-trop(tro^{2}p)-i^{2}d'e^2-e(a^3-e^2). Of Endlicher and Reichenbach, a section of as-

clepiadaceous plants of the tribe *Cynancheæ*, comprising *Calotropis*, etc. [B, 121, 170.]

CALOTROPIS (Lat.), n. f. Ka2l(ka3l)-o2t'rop(ro2p)-i2s. Gen., *calotrop'idos* (*-is*), *calot'ropis* [Ind. Ph.]. From καλός, beautiful, and τροπίς, a keel. Fr., *calotrope, calotropide*. Ger., *Kielkrone*. Of R. Brown, a genus of asclepiadaceous shrubs or trees of the tribe *Cynancheæ*. [B, 42.]—**C. cortex** [Ind. Ph.]. The bark of *C. gigantea* or the root-bark of *C. procera*. [B, 8.]—**C. gigantea.** Ger., *ostindische Kielkrone*. Syn.: *Asclepias gigantea* [Linnæus]. The gigantic swallow-wort (Hind., *madār*, or *mudar*; Tamil, *yercum*), the *ericu* of Rheede, the *vegetable mercury* of the Hindoos; an arborescent shrub from 6 to 10 feet high, growing throughout southern India, having rose-colored and purple flowers. The variety *alba* (Tamil, *vella-yercum*; Malay, *belerica*) has white flowers. All parts of the plant contain an acrid milky juice which has been used as a remedy for epilepsy, many cutaneous diseases, especially leprosy, the bites of venomous animals, syphilis, dropsy, and typhus, hectic, and intermittent fevers, and as an anthelminthic, also topically for paralyzed limbs and for toothache and earache. The inspissated juice, the bark, and the root are reputed alterative and purgative, the root (*mudar, radix mudarii*) being also used in making an ointment for chronic ulcers. The leaves are employed as a fomentation for abdominal pain and as a rubefacient. The plant also yields a kind of manna (*mudar sugar*), and the inspissated juice is said to have many of the properties of caoutchouc. The medicinal virtues of the plant have been attributed to a principle called *mudarin*. ["Indian Med. Gaz.," Dec., 1885, p. 387 (B); B, 172, 180, 212.]—**C. Hamiltoni** [Wallich], **C. heterophylla** [Wallich]. See *C. procera*.—**C. madarii indico-orientalis, C. mudarii** [Buchanan]. A species thought by Duncan to be the source of mudar; probably the *C. gigantea*. [B, 180.]—**C. procera** [R. Brown]. A shrub growing in northern India and along the Dead Sea; similar in properties and uses to *C. gigantea*, the root-bark being diaphoretic and expectorant, and used as a substitute for ipecac as an emetic and in dysentery, and the juice as an epispastic and counter-irritant. The leaves are considered a cure for the Guinea-worm. The comose follicle is sometimes called apple of Sodom. [B, 172, 185].—**C. pulvis.** See *Pulvis c.*—**C. Wallichii** [Wight]. See *C. procera*.—**Pulvis c.** [Ind. Ph.]. Powder of mudar (see under *C. gigantea*). [L, 120.]

CALOTTE (Fr.), n. Ka3l-ot. Lat., *pileolus*. Ger., *Käppchen, Plattmutze*. It., *calotta*. Sp., *calota*. 1. An adhesive plaster formerly used in France for rapid epilation in the treatment of favus. The head was first shaved, and then the plaster (in the form of a cap) was pressed on to the head until it adhered firmly, when it was torn off forcibly, dragging with it the crusts and the hair-bulbs. The operation was known as *picacismus*. [G.] 2. The calvaria. [I, 28.] 3. In cerebral anatomy, see TEGMENTUM.—**C. aponévrotique.** The tendinous expansion of the occipito-frontalis muscle. [L, 41.]—**C. céphalique.** See CUCUPHA—**C. d'assurance.** See CONDOM.—**C. du crâne.** The vault of the skull. [A, 385.]

CALOU (Fr.), n. Ka3l-u. See CALLU.

CALOUBOULI (Carib.), n. The genus *Banistera*. [B, 121.]

CALPA [Necker] (Lat.), n. f. Ka2l(ka3l)'pa3. From κάλπη, an urn. The urn of a genus of mosses [B, 1.]

CALPANDRIEÆ (Lat.), n. f. pl. Ka2lp(ka3lp)-a2n(a3n)-dri-(dri2)'e2-e(a3-e2). Of Reichenbach, a section of the *Trichilieæ*, comprising *Calpandria* (*Camellia*) and *Stemmatosiphon* (now referred to *Symplocos*). [B, 42, 170.]

CALPIDÆ (Lat.), n. f. pl. Ka2l(ka3l)'pi2d-e(a3-e2). Fr., *calpides*. A family of the *Variegatæ*. [L, 248.]

CALSA (Lat.), n. f. Ka2l(ka3l)'sa3. A word (for which some read *calla*) found in Pliny's MSS.; regarded as a synonym of the *Anisarum vulgare*. [B, 121.]

CALTHA (Lat.), n. f. Ka2l(ka3l)'tha3. Fr., *calthe*. 1. Of Linnæus, the marsh-marigold; a genus of ranunculaceous herbs of the tribe *Helleboreæ*. 2. Of Mönch and Vaillant, the genus *Calendula*. 3. Of Endlicher, the genus *Celastrus*. [B, 42, 121.]—**C. alpina.** In pharmacy, the *Arnica montana*. [B, 180.]—**C. arvensis** [Mönch]. The *Calendula arvensis*. [B, 180.]—**C. bishma, C. bisma** [Hamilton]. A perennial species of *C.* (1st. def.) indigenous to the mountains of northern India, where the root is used as a febrifuge. [B, 173, 180.]—**C. cadua, C. codua** [Hamilton]. A perennial Nepal species of *C.* (1st def.). The root, a variety of *bish*, is very poisonous, the acrid juice being used as an arrow-poison. [B, 173, 180.]—**C. luteola.** Of Vergil, the *Calendula officinalis*. [B, 49.]—**C. major** [Miller]. See *C. palustris*.—**C. montana.** The *Arnica montana*. [B, 180.]—**C. nirbisha** [Hamilton]. A species of *C.* (1st def.) growing in the mountains of northern India; used like *C. bishma*. [B, 180.]—**C. officinalis** [Mönch]. The *Calendula officinalis*. [B, 173.]—**C. palustris** [Linnæus]. Fr., *populage, souci d'eau* (ou *des marais*), *gannible, giron, coccusau*. Ger., *Sumpfdotterblume, Kuhblume, Wiesenblume, Moosblume, grosse Butterblume, Sumpfschmirgel*. Syn.: *populago*. The marsh-marigold, meadow-bright, golds, water-buttercup, yellow (or water-) gowan; a perennial species of *C.* (1st def.) growing in swamps and damp meadows in Europe, central Asia, and North America. The whole plant is acrid and probably poisonous. The herb, flowers, and buds—*herba, flores, et gemmæ calthæ palustris* (seu *populaginis*)—were formerly official. The young flower-buds are used as capers; the flowers yield a yellow pigment used in painting and for coloring butter. [B.]—**C. sativa, C. vulgaris** [C. Bauhin]. The *Calendula officinalis*. [B, 180.]

CALTHACEÆ (Lat.), n. f. pl. Ka2l(ka3l)-tha(tha3)'se2(ke2)-e(a3-e2). Of Presl, a tribe of the *Ranunculaceæ*, including the single genus *Caltha*. [B, 170.]

CALTHÆ (Lat.), n. f. pl. Ka2l(ka3l)'the(tha3-e2). Of Adanson, a section of the *Compositæ*, comprising *Caltha* (*Calendula*), etc. [B, 170.]

CALTHE (Fr.), n. Ka3lt. See CALTHA.

CALTHEÆ (Lat.), n. f. pl. Ka2l(ka3l)'the2-e(a3-e2). Fr., *calthées*. 1. Of Reichenbach (1827), a subdivision of the *Helleboreæ*, comprising *Adonis, Knowltonia, Hydrastis, Trollius, Caltha, Eranthis*, and *Helleborus*. 2. Of Reichenbach (1832, 1841), a subsection of the *Ranunculaceæ* (*Isopyreæ* or *Helleborinæ*), comprising *Caltha, Psychorophila* (now included under *Caltha*), and *Nirbisia* (now referred to *Aconitum*). [B, 42, 170.]

CALTHINEÆ [Spach] (Lat.), n. f. pl. Ka2l(ka3l)-thi2n'e2-e(a3-e2). A section of the *Helleboreæ*, comprising *Caltha* and *Trollius*. [B, 170.]

CALTHOIDES (Lat.), n. f. Ka2l(ka3l)-tho(tho2)-i(e)'dez(das). Fr., *calthoïde*. Of the ancients, the *Othonna cheirifolia*; of Jussieu, see OTHONNA. [B, 121.]

CALTHULA (Lat.), n. f. Ka2l(ka3l)'thu2l(thu4l)-a3. See CALTHA.

CALTRAP, CALTRAPS, CALTROPS, n's. Ka2l'tro2p, -tro2ps. A.-S., *coltræppe*. Fr., *chausse-trape*. The *Centaurea calcitrapa* and the *Tribulus terrestris*. [B, 19, 121; L, 56.]—**Water-c.** The *Potamogeton densus, Potamogeton crispus*, and *Trapa natans*. [B, 275.]

CALUCU, n. In Macassar, the *Cocos nucifera*. [L, 105.]

CALUMBA (Lat.), n. f. Ka2l(ka3l)-u3m(um)'ba3. From *kalumb*, the African name. Fr., *colombo*. Ger., *Kolombo, Ruhrwurzel*. It., *colombo*. Sp., *columbo*. The root of *Jateorrhiza palmata* (*Jateorrhiza c.* [U. S. Ph.]). It occurs in discs from 1 in. to 2½ in. in diameter and from ¼ to ½ in. thick, light-yellowish internally, brownish-yellow toward the periphery, of a feeble odor and a slightly aromatic, very bitter taste. It contains calumbin, berberine, calumbic acid, starch, pectin, gum, and resin. Used in medicine as a bitter tonic. [A, 286; B, 81.]—**American c.** The *Frasera Walteri* (seu *caroliniensis*). [B, 81, 97.]—**Calumbæ radix** [Br. Ph.]. See *C.*—**C.-wood.** The wood of *Coscinium fenestratum*. [E. J. Waring, "Brit. Med. Jour.," June 6, 1885, p. 1145 (B).]—**Extractum c.** [Netherl. Ph.], **Extractum calumbæ** [Br. Ph., Austr. Ph., Hung. Ph.]. Fr., *extrait de colombo* [Fr. Cod.]. Ger., *Kolomboëxtract*. An extract made by exhausting c. with alcohol [most pharmacopœias], or with alcohol and water [Ger. Ph., 1st ed., Swiss Ph., Gr. Ph.], or with water [Netherl. Ph.], and evaporating to a pilular consistence [Br. Ph.], or to the consistence of a soft extract [Fr. Cod.] or of a thick extract, or to dryness [Ger. Ph., 1st ed., Swed. Ph., Swiss Ph.]. [B, 10, 81, 113.]—**Extractum calumbæ fluidum** [U. S. Ph.]. Fr., *extrait liquide de colombo*. Ger., *flüssiges Kolomboextract*. A preparation made by exhausting 1 part (by weight) of c. with dilute alcohol, evaporating to the consistence of a soft extract, and dissolving in enough dilute alcohol to make 1 part by volume. [B, 81.]—**False c.** See *American c.*—**Fluid extract of c.** See *Extractum calumbæ fluidum*.—**Infusum calumbæ** [Br. Ph.]. Fr., *infusion* (ou *tisane*) *de colombo*. Ger., *Kolomboinfusion*. A preparation made by macerating 1 part of c. in 20 parts of cold distilled water. Similar preparations made by treating 1 drachm of c. with ½ pint of boiling water were official in several old formularies. [B, 5, 97.]—**Marietta c.** Fr., *racine de colombo de Mariette*. See *American c.*—**Tinctura calumbæ** [U. S. Ph., Br. Ph.]. Fr., *teinture de colombo* [Fr. Cod.]. Ger., *Kolombotinctur*. A preparation made by exhausting 10 parts of c. with 100 of a 2-to-3 mixture of alcohol and water [U. S. Ph.]; or by exhausting 2½ oz. av. of c. with enough alcohol to make 1 imp. pint [Br. Ph.]; or by macerating 1 part of c. with 5 parts of alcohol of 60 per cent. by volume [Fr. Cod.]. [B, 81, 113.]

CALUMBÉ (Fr.), n. Ka3l-u6n2-ba. An old name for calumba. [L, 41.]

CALUMBIC ACID, n. Ka2l-u3mb'i2k. A straw-colored bitter principle, $C_{22}H_{24}O_7$, found in calumba. [B, 81.]

CALUMBIN, n. Ka2l-u3mb'i2n. A substance, $C_{42}H_{44}O_{141}$, obtained from calumba; very bitter, odorless, colorless prismatic crystals, almost insoluble in water, moderately soluble in ether and in alcohol. [B, 81.]

CALUMBO, CALUMBRE, n's. Ka2l-u3mb'o, -u3mbr'. See CALUMBA.

CALUMBUK (Ar.), n. See CALAMBACK.

CALUMET (Fr.), n. Ka3l-u6-ma. A provincial name for certain *Gramineæ*. [B, 38.]—**C. de Cayenne.** The *Mabea piriri*. [B, 121.]—**Petit c.** The *Ophioglossum scandens*. [B, 121.]

CALUNGA, n. In Brazil, the wood and root of *Simaba columbo*. [B, 121.]

CALUNGEN (Ar.), **CALUNGIA** (Ar.), n's. The *Maranta galanga*. [B, 121; L, 105.]

CALURANA (Cingalese), n. The *Helleborus niger*. [L, 105.]

CALUS (Fr.), n. Ka3l-u6. See CALLUS and CALLOSITY.

CALVA (Lat.), n. f. Ka2l(ka3l)'va3(wa3). See CALVARIA.

CALVANELLA DI MOSI (It.), n. Ka3l-va3n-e2l'la3 de mo'se. A place in Corsica, where there is a warm spring containing sodium sulphate. [A, 385; L, 87.]

CALVARIA (Lat.), n. f. Ka2l(ka3l)-va(wa3)'ri2-a3. Fr., *calotte du crâne*. Ger., *Kappchen der Schädel*. The vault of the cranium. [L, 115.]

CALVATA (Lat.), n. f. sing. and n. pl. Ka2l(ka3l)-va(wa3)'ta3. 1. (Sing.) see CALVITIES. 2. (Pl.) an old name for blunt-pointed instruments (*e. g.*, probes). [Hippocrates, Galen (A, 325); L, 102, 119.]

CALVEGIA, CALVEGIAM, n's. See CALUNGIA.

CALVITIES (Lat.), n. f. Ka2l(ka3l)-vi2sh(wi2t)'i2-ez(as). Gen., *calvitie'i*. Gr., φαλάκρα, φαλακρότης. Fr., *calvitie, chauveté*. Ger., *Kahlheit*. Baldness. [G, 49.]—**C. adnata.** Congenital baldness. [G.]—**C. febrisequa.** Fr., *alopécie de convalescence*. Baldness following acute fevers. [G, 11.]—**C. juvenilis.** See ALOPECIA *præ-*

senilis.—**C. palpebrarum.** Fr., *calvitie des paupières.* Ger., *Kahlheit der Augenlider.* Absence of the eyelashes. [F.] See MADAROSIS.—**C. præmatura.** See ALOPECIA *præsenilis.*—**C. senilis, C. senum.** The baldness of old persons. [G, 11.]

CALVITIUM (Lat.) n. n. Ka²l(ka³l)-vi²sh(wi²t)'i²-u³m(u⁴m). See CALVITIES.

CALVITY, n. Ka²l'vi²t-i². See CALVITIES.

CALVOUS, adj. Ka²l'vu³s. Gr., φαλακρός. Lat., *calvus.* Fr., *chauve.* Ger., *kahl, kahlköpfig, schopflos.* Bald, also having the hair shaven off; in botany, very smooth and devoid of hair, having no pappus or other hairy process. [A, 318; B, 19, 121, 123.]

CALX (Lat.), n. f. (sometimes m.). Ka²lx(ka³lx). Gen., *cal'cis.* Gr., χάλξ (1st def.), πτέρνα (3d def.). Fr., *chaux* (1st def.). Ger., *Kalk* (1st def.), *Ferse* (3d def.). Syn.: *calcaria* (1st def.). 1. Lime; of the U. S. Ph., purified quick-lime (calcium monoxide) obtained by calcining calcium carbonate. In chemical nomenclature the word was formerly used in combination to denote the salts of calcium. 2. Of the old chemists, an incombustible residue obtained by burning a substance in contact with the air (applied to several metallic oxides). [B.] 3. The heel. [A, 318.] See CALCANEUM.—**Acetas calcis.** Calcium acetate. [B, 119.]—**Aqua calcis** [Austr. Ph., Belg. Ph., Finn. Ph., Hung. Ph.]. See *Liquor calcis.*—**Aqua calcis cerata.** Fr., *eau de chaux à la cire.* A preparation made by gently heating 1 part of yellow wax with 48 parts of lime-water and straining; used as a fomentation for ill-conditioned and sluggish ulcers. [Würtzb. Ph., 1796 (B, 119).]—**Aqua calcis vivæ.** See *Liquor calcis.*—**Balneum cum calce.** A bath to which 3 lbs. of slaked lime are added at the time of using; employed in gout, the itch, etc. [B, 199.]—**Benzoas calcis.** See CALCIUM *benzoate.*—**Calcis carbonas præcipitata** [Br. Ph., 1867]. Precipitated calcium carbonate. [B.]—**Calcis chloridum.** See *C. chlorata.*—**Calcis hydras.** Slaked lime. [B.]—**Calcis phosphas** [Br. Ph., 1867]. Normal (tribasic) calcium phosphate. [B, 95.]—**C. acetata.** Calcium acetate. [B, 119.]—**C. antimonii, C. antimonii Anglorum,** etc. See under ANTIMONIUM.—**C. arsenici alba.** See under ARSENICUM.—**C. bismuthi.** Bismuth subnitrate. [B, 88, 97.]—**C. caustica.** Quick-lime. [B.]—**C. chlorata** [U. S. Ph., Br. Ph., 1867], **C. chlorinata** [U. S. Ph., 1870, Br. Ph.]. Fr., *chlorure de chaux sec* [Fr. Cod.]. Ger., *Chlorkalk.* Syn.: *calcaria chlorata* [Ger. Ph.], *hypochloris calcicus* [Fr. Cod.]. Chlorinated lime, chloride of lime; a compound resulting from the action of chlorine on calcium hydrate. According to the U. S. Ph., it should contain at least 25 per cent. of chlorine available for bleaching purposes. It is a damp whitish powder or lumpy mass, giving off chlorine and becoming more moist on exposure to the air. Used as a disinfectant and bleaching agent. [B.]—**C. cinereus mercurii.** See under MERCURIUS.—**C. citrata.** Calcium citrate. [B, 119.]—**C. cum cali (seu kali) puro.** See POTASSA *cum calce.*—**C. cupri viridis.** See under CUPRUM.—**C. extincta.** Fr., *chaux éteinte.* Ger., *gelöschter Kalk.* Slaked lime. [B, 119.]—**C. ferri nigra.** See under FERRUM.—**C. fluorata, C. fluorica.** Calcium fluoride, fluor-spar. [B, 180.]—**C. hydrargyri alba, C. hydrargyri rubra.** See under HYDRARGYRUM.—**C. Jovis.** Melted tin stirred till it is calcined. [L, 119.]—**C. lota.** See *C. extincta.*—**C. mercurii, C. mercurii cinerea,** etc. See under MERCURIUS.—**C. oxymuriatica.** See *C. chlorata.*—**C. præparata.** See *C. extincta.*—**C. pura, C. recens.** Quick-lime. [L, 45.]—**C. saccharata.** 1. Scheele's name for calcium oxalate occurring in rhubarb and other plants. [B, 3.] 2. See *Syrupus calcis.*—**C. salita.** Calcium chloride. [B, 119.]—**C. stibii cum sulphure.** See under STIBIUM.—**C. sulphurata** [U. S. Ph., Br. Ph.]. Fr., *foie de soufre calcaire, sulfure de calcium.* Ger., *Kalkschwefelleber, Schwefelcalcium.* Syn.: *hepar sulphuris calcareum, calcaria sulphurata* [Gr. Ph.], *sulphuretum calcium* [Finn. Ph., Netherl. Ph.] (seu *calcii* [Belg. Ph.]), *calcium sulfuratum* [Russ. Ph.]. Sulphurated lime, consisting largely of calcium monosulphide (hence often improperly called calcium sulphide), made by calcining 10 parts of lime with 9 of sulphur, or gypsum with charcoal [Belg. Ph., Finn. Ph.]; a grayish or yellowish-white powder smelling like hydrogen sulphide and of a repulsive alkaline taste, sparingly soluble in water; used to prevent or limit suppuration. [B, 5, 81, 95, 119.]—**C. sulphurica.** Calcium sulphate. [B, 119.]—**C. usta, C. venalis.** Quick-lime. [B, 119.]—**C. Veneris.** Verdigris. [L, 119.]—**C. vismuthi.** Bismuth subnitrate. [B, 88, 97.]—**C. vitriolata.** Calcium sulphate. [B, 180.]—**C. viva.** Quick-lime. [B, 119.]—**C. viva philosophorum.** See *C.* HYDRARGYRI.—**C. zinci, C. zinci præcipitata.** See under ZINCUM.—**Carbonas calcis.** Calcium carbonate. [B, 119.]—**Carbonas calcis depuratus** [Belg. Ph.]. See CRETA *præparata.*—**Carbonas calcis nativus pulverulentus.** Chalk. [B, 119.]—**Chloruretum calcis.** See *C. chlorata.*—**Citras calcis.** Calcium citrate. [B.]—**Decoctum sulphureti calcis Hoffmanni.** See *Aqua* CALCARIÆ *sulphurato-stibiatæ.*—**Hepar calcis.** See *C. sulphurata.*—**Linctus calcis chloratæ** [Swed. Ph.]. A mixture of 1 part of chlorinated lime, 4 parts of distilled water, and 5 of purified honey. [B, 95.]—**Linimentum calcis** [U. S. Ph., Br. Ph.], **Linimentum ex aqua calcis.** Fr., *liniment* (ou *savon*) *calcaire.* Ger., *Kalkliniment.* Syn.: *linimentum calcicum* [Fr. Cod., Belg. Ph., Finn. Ph., Norweg. Ph., Swed. Ph.] (seu *calcarium* [Russ. Ph.]). Lime liniment, calcium soap, carron-oil; a preparation consisting of equal parts by weight of lime-water and cotton-seed oil [U. S. Ph.], or equal parts by volume of lime-water and olive-oil [Br. Ph.], or equal parts by weight of lime-water and sweet-almond oil [Fr. Cod., Belg. Ph.]; or 2 parts of lime-water and 1 part of almond-oil [Sp. Ph.]; or equal parts of lime-water and linseed-oil, as in the original carron-oil [Norweg. Ph., Swed. Ph., Russ. Ph., Swiss Ph., Finn. Ph.]. The oil is saponified, forming a curdy mass which separates on standing. [B.] See also *Linimentum calcium cum* OPIO.—**Liquor calcis** [U. S. Ph., Br. Ph.]. Fr., *eau de chaux c.* Ger., *Kalkwasser.* Syn.: *aqua calcariæ* [Ger. Ph., Gr. Ph.], *aqua calcis* [Fr. Cod.], *liquor calcii oxydati* [Swiss Ph.], *calcaria caustica soluta* [Russ. Ph.], *solutio hydratis calcici* [Dan. Ph., Netherl. Ph., Norweg. Ph., Swed. Ph.]. Lime-water; a saturated solution of lime in water; prepared by treating lime with water, rejecting the first washing, to remove dissolved alkalies and other impurities [U. S. Ph., Fr. Cod., Ger. Ph., etc.], and then treating with from 16 to 300 parts of water; a clear, colorless, odorless liquid containing 1 part of calcium oxide in 800 parts. [B, 81, 95.]—**Liquor calcis chloratæ** [Br. Ph., 1867, Swed. Ph.] (seu **chlorinatæ** [Br. Ph.]). Fr., *chlorure de chaux liquide, soluté d'hypochlorite de chaux* [Fr. Cod.]. Ger., *Chlorkalklösung.* Syn.: *hypochloris calcicus aqua solutus* [Fr. Cod.], *hypochloris calcii liquidus* [Belg. Ph.], *solutio calcis chloratæ* [Norweg. Ph.], *solutio hypochloritis calcici* [Netherl. Ph.], *calcaria hypochlorosa soluta* [Russ. Ph.]. A filtered solution of 1 lb. av. of chlorinated lime in 1 gallon of distilled water. The French preparation is made by triturating 1 part of chlorinated lime with 45 parts of distilled water. The Netherl. Ph. orders 30 parts, the Sp. and Swed. Ph's 40, the Belg. Ph. 45·45, and the Norweg. Ph. 49·5 of water. The preparation of the Russ. Ph. is of about the same strength as that of the Br. Ph., but the former orders also a dilute solution (*calcaria hypochlorosa soluta diluta*), made by diluting 1 part of the strong solution with 4 parts of water. [B, 81, 95.]—**Liquor calcis muriatis.** See *Liquor* CALCII *chloridi.*—**Liquor calcis saccharatus.** See *Syrupus calcis.*—**Murias calcis.** Calcium chloride. [B, 119.]—**Oleum calcis.** The thick, oily liquid produced by the deliquescence of crystals of calcium chloride. [B, 3.]—**Phosphas calcis.** Calcium phosphate. [B, 119.]—**Phosphas calcis stibiatus.** See PULVIS *antimonialis.* [B, 119.]—**Potassa cum calce.** See under POTASSA.—**Potio carbonatis calcis.** See *Mistura* CRETÆ.—**Quinas calcis.** Calcium quinate. [B, 119.]—**Solutio calcis chloratæ.** See *Liquor calcis chloratæ.*—**Solutio calcis muriatis.** See *Liquor* CALCII *chloridi.*—**Sulphas calcis.** Calcium sulphate. [B, 119.]—**Sulphis calcis.** Calcium sulphite. [B, 119.]—**Sulphuretum calcis stibiatum, Sulphuretum stibii cum calce.** Calcium thioantimonate. [B, 119.]—**Syrupus calcis** [U. S. Ph.]. Fr., *sirop de chaux.* Ger., *Kalksyrup.* Syn.: *liquor calcis saccharatus* [Br. Ph.]. Syrup (or saccharated solution) of lime; made by triturating 1 part of slaked lime with 6 parts [U. S. Ph.] or 2 parts [Br. Ph.] of sugar and dissolving in enough water to make 20 parts [U. S. Ph.] or 23 parts [Br. Ph.]; a thin, colorless syrup, of a sweetish-bitter taste and alkaline reaction, containing the sucrates of calcium. [B, 5, 81.]

CALY, n. In India, the *Euphorbia tirucalli.* [L, 105.]

CALYBIO (Lat.), **CALYBIUM** (Lat.), n's f. and n. Ka²l(ka³l)-i²b(u⁶b)'i²-o, -u³m(u⁴m). Gen., *calybio'nis, -yb'ii.* Gr., καλύβιον (dim. of καλύβη, a pavilion [from καλύπτειν, to envelop]). Fr., *calybion* [Mirbel]. Ger., *Becherfrucht.* A cupulate fruit; a one-celled dry fruit immersed in a cupula (*e. g.*, an acorn). [B, 1, 121, 123.]

CALYCANDRIA (Lat.), n. f. Ka²l(ka³l)-i²(u⁶)-ka²n(ka³n)'dri²-a³. From κάλυξ (see CALYX), and ἀνήρ, a man. Fr., *calycandrie.* Ger., *Kalycandrie.* A name suggested by Richard for members of the Linnæan classes *Icosandria* and *Dodecandria*, comprising genera with more than ten stamens, which are inserted on the perigynous calyx, and with the ovary free or parietal. [B, 1.]

CALYCANT (Fr.), n. Ka³l-i²-ka³n². See CALYCANTHUS.

CALYCANTHACEÆ [Lindley] (Lat.), n. f. pl. Ka²l(ka³l)-i²-(u⁶)-ka²n(ka³n)-tha(tha³)'se²(ke²)-e(a³-e²). See CALYCANTHEÆ (1st def.).

CALYCANTHE (Fr.), n. Ka³l-i²-ka³nt. See CALYCANTHUS.

CALYCANTHEÆ (Lat.), n. f. pl. Ka²l(ka³l)-i²(u⁶)-ka²n(ka³n)'-the²-e(a³-e²). 1. Of Lindley, De Candolle, and others, an order of dicotyledonous plants, comprising *Calycanthus* and *Chimonanthus.* Bentham and Hooker, who place it in the cohort *Ranales*, series *Thalamifloræ*, subclass *Polypetalæ*, between the *Dilleniaceæ* and the *Magnoliaceæ*, define it as including shrubs having opposite, undivided, exstipulate leaves; solitary, axillary, hermaphrodite flowers with the sepals and petals, each in several rows, an indefinite number of stamens, of which the interior ones are sterile, inserted on the apex of the tubular torus, and an ovary of several distinct carpels, each bearing a single filiform style and containing either one or two anatropous ascending ovules; and a fruit consisting of one or more achænia, each containing a single erect exalbuminous seed with convolute cotyledons, and all included within the torus, which bears the remains of the petals and stamens and is surrounded and closed in by the remains of the stamens. By other authors the *C.* have been placed among the *Rosales.* Reichenbach, who made them a division of the *Nyctagineæ*, included with them the genus *Atherosperma*, dividing the *C.* into the *Atherospermeæ* and the *Chimonantheæ genuinæ* (the *C.* of Lindley). Baillon makes them a series of the *Monimiaceæ.* 2. Of Reichenbach (1827), a class of plants (*Phylloblasti*), comprising the orders *Varifloræ, Confines*, and *Concinnæ.* [B, 42, 121, 170.]

CALYCANTHEMÆ (Lat.), n. f. pl. Ka²l(ka³l)-i²(u⁶)-ka²n-(ka³n)'the²m-e(a³-e²). 1. Of Linnæus, an order of plants, comprising *Epilobium, Œnothera, Ammania, Frankenia, Lythrum, Melastoma*, and other genera now referred to the *Onagarieæ, Lythrarieæ, Melastomaceæ, Frankeniaceæ*, and *Loaseæ.* 2. Of Ventenat, the *Lythrarieæ.* [B, 121, 170.]

CALYCANTHEMI (Lat.), n. m. pl. Ka²l(ka³l)-i²(u⁶)-ka²n(ka³n)'-the²m-i(e). Of Linnæus, see CALYCANTHEMÆ (1st def.).

CALYCANTHEMUM [Klotzsch] (Lat.), n. n. Ka²l(ka³l)-i²(u⁶)-ka²n(ka³n)'the²m-u³m(u⁴m). A section of the genus *Ipomœa.* [B, 121.]

CALYCANTHIN, n. Ka²l-i²-ka²nth'i²n. Fr., *calycanthine.* A glucoside, $C_{50}H_{28}O_{22}$, found in certain of the *Calycantheæ.* [A, 385.]

CALYCANTHINÆ (Lat.), n. f. pl. Ka²l(ka³l)-i²(u⁶)-ka²n(ka³n)-thi(the)'ne(na³-e²). 1. Of Link, see CALYCANTHEÆ (1st def.). 2. Of Bartling, a class of the *Gymnoblasti*, comprising the orders *Granateæ* and *Calycantheæ.* [B, 121, 170.]

CALYCANTHINE [R. G. Eccles], n. Ka²l-i²-ka²nth'en. See under CALYCANTHUS *floridus.*

CALYCANTHINEÆ [Spach] (Lat.), n. f. pl. Ka^{2}l(ka^{3}l)-i^2(u^6)-ka^{2}n(ka^{3}n)-thi^{2}n′e^2-e(a^3-e^2). See CALYCANTHINÆ (2d def.).

CALYCANTHUS (Lat.), n. m. Ka^{2}l(ka^{3}l)-i^2(u^6)-ka^{2}n(ka^{3}n)′-thu^{3}s(thu^{4}s). From κάλυξ, a covering, and ἄνθος, a flower. Fr., *calycanthe*, *calycant*. Ger., *Kelchblume*. A Linnæan genus of the *Calycantheæ*, comprising three North American species. [B, 42.]—**C. floridus** [Linnæus]. Fr., *Pompadour*, *arbre aux anémones*. Ger., *gewürzhafte Kelchblume*. Sweet-scented shrub, Carolina allspice, bubby; a shrub from 3 to 7 feet high, growing in the southern States. The bark and leaves have a camphoraceous odor. The var. β *lævigatus* has narrower leaves and erect branches; the var. γ *glaucus* has very acuminate and large leaves, which are glaucous and almost glabrous inferiorly; and the var. δ *inodorus* has lanceolate, scabrous leaves, smooth inferiorly, and inodorous flowers. The bark (*cortex calycanthi*) has been used as a bitter tonic in fevers, and the leaves afford a yellow dye. In the seeds of the var. *glaucus* (bubby seeds) three alkaloids have been found by R. G. Eccles, one of which he has named calycanthine, and another of which he thinks may be identical with pyridine. [B, 34, 173, 180; R. G. Eccles, "Brooklyn Med. Jour.," March, 1888, p. 232.]—**C. fragrans**. See *C. floridus*.—**C. glaucus** [Willdenow]. The *C. floridus*, var. γ *glaucus*. [B, 34, 180.]—**C. inodorus** [Willdenow]. The *C. floridus*, var. δ *inodorus*. [B, 34.]—**C. lævigatus** [Willdenow]. The *C. floridus*, var. β *lævigatus*. [B, 34, 180.]—**C. occidentalis**. A California species, distinguished by its long floral peduncles and cordate leaves. [B, 19.]—**B. sterilis** [Walter]. The *C. floridus*. [B, 173.]

THE CALYCANTHUS FLORIDUS. (AFTER BAILLON.)

CALYCARIA (Lat.), n. f. Ka^{2}l(ka^{3}l)-i^2(u^6)-ka(ka^3)′ri^2-a^3. See CLADONIA.

CALYCATA (Lat.), n. n. pl. Ka^{2}l(ka^{3}l)-i^2(u^6)-ka(ka^3)′ta^3. An order of the *Ciliata*. [Lankester, "Quart. Jour. of Micr. Sci.," 1877, p. 442 (L).]

CALYCATE, adj. Ka^{2}l′i^2-kat. Lat., *calycatus*. Fr., *calicé*. Furnished with a calyx. [B, 1, 19.]

CALYCE (Fr.), n. Ka^{3}l-es. See CALYX and CALICE.

CALYCELLA [Fries] (Lat.), n. f. Ka^{2}l(ka^{3}l)-i^{2}s(u^{6}k)-e^{2}l′la^3. A section of the genus *Helotium*. [B, 121.]

CALYCERACEÆ [Lindley], **CALYCEREÆ** [R. Brown] (Lat.), n's f. pl. Ka^{2}l(ka^{3}l)-i^2(u^6)-se^{2}r(ke^{2}r)-a(a^3)′se^2(ke^2)-e(a^3-e^2), -se^{2}r(ke^{2}r)′e^2-e(a^3-e^2). Fr., *calycéracées*, *calycérées*. An order of gamopetalous dicotyledons, comprising *Calycera* and two other genera intermediate in characters between the *Dipsaceæ* and the *Compositæ*. [B, 42, 170.]

CALYCIACEÆ [Theobald] (Lat.), **CALYCIDÆ** [Lindley] (Lat.), **CALYCIEÆ** [Endlicher] (Lat.), n's f. pl. Ka^{2}l(ka^{3}l)-i^{2}s-(u^{6}k)-i^2-a(a^3)′se^2(ke^2)-e(a^3-e^2), -i^{2}s(u^{6}k)′i^{2}d-e(a^3-e^2), -i^{2}s(u^{6}k)-i(i^2)′e^2-e-(a^3-e^2). An order, tribe, or suborder of lichens, comprising *Calicium* and other genera. [B, 170.] See CALICIEI.

CALYCIFLORÆ (Lat.), n. f. pl. Ka^{2}l(ka^{3}l)-i^{2}s(u^{6}k)i^2-flor′e-(a^3-e^2). From κάλυξ (see CALYX), and *flos*, a flower. Fr., *calyciflores*. Ger., *Kelchblüthige*. 1. Of Linnæus, an order of plants, comprising *Osyris*, *Trophis*, *Hippophae*, and *Elæagnus*. 2. Of Gmelin, a class (of Crantz, an order) of plants, comprising genera now included under the *Rosaceæ*, also the genus *Ribes*. 3. Of De Candolle, followed by Lindley and others, a subclass of polypetalous dicotyledons. As defined by Bentham and Hooker, it includes plants with sepals more or less united into a peristent tube which is adnate to the ovary or includes it; the petals of the same number as the segments of the calyx or fewer, attached at the apex of the calyx-tube or upon the disc lining it; the stamens definite or indefinite in number and inserted toward the margin or on the inner face of a disc which is adnate to the tube of the calyx and either is entirely free from the ovary or connects the latter with the calyx; and an ovary composed of either united or distinct carpels. It comprises twenty-seven orders grouped in the cohorts *Rosales*, *Myrtales*, *Passiflorales*, *Ficoidales*, and *Umbellales*. [B, 42, 121, 170.]

CALYCIFLORAL, **CALYCIFLORATE**, adj's. Ka^{2}l-i^{2}s-i^2-flor′a^{2}l, -at. See CALYCIFLOROUS.

CALYCIFLORES (Lat.), n. m. pl. Ka^{2}l(ka^{3}l)-i^{2}s(u^{6}k)-i^2-flor′ez-(e^{2}s). See CALYCIFLORÆ.

CALYCIFLOROUS, adj. Ka^{2}l-i^{2}s-i^2-flor′u^{3}s. Lat., *calyciflorus*. Fr., *calyciflore*. Ger., *kelchblüthig*. Having cup-shaped flowers with a perigynous calyx and corolla inserted upon the margin of the receptacle, or, according to former ideas, upon the calyx or the junction of the calyx and the receptacle; of or belonging to the *Calycifloræ*. [B, 121, 123.]

CALYCIFORM, adj. Ka^{2}l-i^{2}s′i^2-fo^{2}rm. Lat., *calyciformis*. Fr., *calyciforme*. Ger., *kelchförmig*. Resembling a calyx. [B, 1, 123.]

CALYCIN, n. Ka^{2}l′i^{2}s-i^{2}n. See CALICIN.

CALYCINÆ (Lat.), n. f. pl. Ka^{2}l(ka^{3}l)-i^2(u^6)-si(ke)′ne(na^3-e^2). 1. Of Fries, a subdivision of the *Pezizæ*. 2. Of Bentham and Hooker, a series of monocotyledons, including the orders *Flagellarieæ*, *Juncaceæ*, and *Palmæ*. [B, 42, 121.]

CALYCINAL, adj. Ka^{2}l-i^{2}s′i^{2}n-a^{2}l. Lat., *calycinalis*. Fr., *c*. See CALYCINE.

CALYCINAR, adj. Ka^{2}l-i^{2}s′i^{2}n-a^{3}r. Lat., *calycinaris*. Fr., *calycinaire*. Having the sepals of the calyx transformed into petals. [De Candolle (B, 1, 121).]

CALYCINE, adj. Ka^{2}l′i^{2}s-i^{2}n. Lat., *calycinus*. Fr., *calycinal*. Ger., *kelchig*. Of, pertaining to, or corresponding to, a calyx; resembling a calyx in texture, appearance, morphology, or functions; of flowers, having an unusually large calyx. [B, 19, 121, 123.]

CALYCINIANUS (Lat.), **CALYCINUS** (Lat.), adj's. Ka^{2}l-(ka^{3}l)-i^2(u^6)-si^{2}n(ki^{2}n)-i^2-a(a^3)′nu^{3}s(nu^{4}s), -si(ke)′nu^{3}s(nu^{4}s). See CALYCINE.

CALYCIPETALÆ (Lat.), n. f. pl. Ka^{2}l(ka^{3}l)-i^{2}s(u^{6}k)-i^2-pe^{2}t′-a^{2}l(a^{3}l)-e(a^3-e^2). From κάλυξ (see CALYX), and πέταλον (see PETAL). Of Wilbrand, a class of dicotyledonous plants. [B, 170.]

CALYCIUM (Lat.), n. n. Ka^{2}l(ka^{3}l)-i^{2}s(u^{6}k)′i^2-u^{3}m(u^{4}m). 1. See CALICIUM. 2. Of Elliott, the genus *Heterotheca*. [B, 42, 121.]

CALYCLE, n. Ka^{2}l′i^2-kl. Lat., *calyculus* (dim. of *calyx* [*q. v.*]). Fr., *calicule*. Ger., *Aussenkelch*, *Afterkelch*, *Nebenkelch*. 1. A partial or incomplete involucre inclosing only one or two flowers. 2. The outer bracts of the involucre of a flower-head forming a distinct row and constituting a sort of accessory involucre. 3. A sort of accessory perianth composed of a whorl of leaflets exterior to the calyx and near enough to it to be regarded as one of the whorls of the floral envelope. [B, 1, 19, 121, 123.]

CALYCLED, adj. Ka^{2}l′i^2-kld. See CALYCULATE.

CALYCOBLASTS, n. pl. Ka^{2}l′i^2-ko-bla^{2}sts. From κάλυξ (see CALYX), and βλαστός, a germ. Cells which, in the *Madreporaria*, secrete the corallum. [V. Heider (J).]

CALYCOCARPÆ (Lat.), n. f. pl. Ka^{2}l(ka^{3}l)-i^2(u^6)-ko(ko^2)-ka^{3}rp′e(a^3-e^2). From κάλυξ (see CALYX), and καρπός, a fruit. Of Nees, a division of the *Rosaceæ*, comprising *Calycanthus*, *Rosa*, *Punica*, etc. [B, 170.]

CALYCOID, **CALYCOIDEOUS**, adj's. Ka^{2}l′i^2-koid, ka^{2}l-i^2-ko-i^{2}d′e^2-u^{3}s. Gr., καλυκώδης. Lat., *calycodes*. Fr., *calicoïde*. Ger., *kelchförmig*. Resembling a calyx. [B, 19.]

CALYCOPETALÆ (Lat.), n. f. pl. Ka^{2}l(ka^{3}l)-i^2(u^6)-ko(ko^2)-pe^{2}t′a^{2}l(a^{3}l)-e(a^3-e^2). See CALICOPETALÆ.

CALYCOPHORIDÆ (Lat.), n. f. pl. Ka^{2}l(ka^{3}l)-i^2(u^6)-ko(ko^2)-fo^{2}r′i^{2}d-e(a^3-e^2). See CALICOPHORIDÆ.

CALYCOSÆ (Lat.), n. f. pl. Ka^{2}l(ka^{3}l)-i^2(u^6)-kos′e(a^3-e^2). Of Lindley, a cohort of the *Polypetalæ*, comprising the alliances *Guttales*, *Theales*, *Acerales*, *Cistales*, and *Berberales*. [B. 170.]

CALYCOSTEGIA [Lemaire] (Lat.), n. f. Ka^{2}l(ka^{3}l)-i^2(u^6)-ko-(ko^2)-ste^{2}j(ste^{2}g)′i^2-a^3. See CALYSTEGIA.

CALYCOSTEMONEUS (Lat.), adj. Ka^{2}l(ka^{3}l)-i^2(u^6)-ko(ko^2)-ste^{2}m(stam)-on(o^{2}n)′e^2-u^{3}s(u^{4}s). From κάλυξ (see CALYX), and στήμων, a filament. Fr., *calycostemone*. Having the stamens inserted on the calyx; as a n. pl., *Calycostemonei*, a class of plants (the *Calicostemonis* of Gleditsch) having the stamens so inserted. [A, 322; B, 121, 170.]

CALYCOZOA (Lat.), n. n. pl. Ka^{2}l(ka^{3}l)-i^2(u^6)-ko(ko^2)-zo′a^3. See CALICOZOA.

CALYCRATEÆ (Lat.), n. f. pl. Ka^{2}l(ka^{3}l)-i^2(u^6)-kra^{2}t(kra^{3}t)′-e^2-e(a^3-e^2). Of Dumortier, a family of the *Calicungulia*, comprising the single genus *Tropæolum*. [B, 170.]

CALYCULAR, adj. Ka^{2}l-i^{2}k′u^{2}l-a^{3}r. Lat., *calycularis* (from *calyculus* [see CALYCLE]). Fr., *caliculaire*. Of a flower, having an involucre in two rows, the outer of which covers in only the base of the inner one (*i. e.*, in the form of a calyculus). [B, 1, 19.]

CALYCULARIS (Lat.), adj. Ka^{2}l(ka^{3}l)-i^{2}k(u^{6}k)-u^{2}l(u^{4}l)-a(a^3)′-ri^{2}s. Calycular (*q. v.*); as a n., an old name for *Hyoscyamus*. [Apuleius (B, 121).]

CALYCULATE, adj. Ka^{2}l-i^{2}k′u^{2}l-at. Fr., *caliculé*. Ger., *aussenkelchig*, *nebenkelchig*. Provided with a calycle. [B, 121, 123.]

CALYCULE, n. Ka^{2}l′i^{2}k-u^{2}l. See CALYCLE.

CALYDOR, n. Ka^{2}l′i^{2}d-o^{2}r. An English cosmetic preparation, said to have been a solution of corrosive sublimate or of acetate of lead in an aromatic water. [A, 322.]

CALYMELLACEÆ (Lat.), n. f. pl. Ka^{2}l(ka^{3}l)-i^2(u^6)-me^{2}l-la-(la^3)′se^2(ke^2)-e(a^3-e^2). Of Corda, a division of gleicheniaceous ferns. [B, 170.]

CALYMENIDÆ (Lat.), n. f. pl. Ka^{2}l(ka^{3}l)-i^2(u^6)-me^{2}n′i^{2}d-e-(a^3-e^2). Fr., *calyméniens*. A family of trilobite crustaceans. [L, 41.]

CALYMMA (Lat.), n. n. Ka^{2}l(ka^{3}l)-i^{2}m(u^{6}m)′ma^3. Gen., *calymmatos* (*-tis*). Gr., κάλυμμα. A covering (*e. g.*, a husk, the eyelid, the vault of the cranium, etc.). [A, 322.]

CALYMPERACEÆ (Lat.), n. f. pl. Ka^{2}l(ka^{3}l)-i^{2}m(u^{6}m)-pe^{2}r-a(a^3)′se^2(ke^2)-e(a^3-e^2). Of C. Müller, a subtribe of mosses of the *Pottioideæ*. [B, 121, 170.]

CALYMPEREÆ (Lat.), n. f. pl. Ka^{2}l(ka^{3}l)-i^{2}m(u^{6}m)-pe^{2}r′e^2-e(a^3-e^2). Of Hampe, a tribe of acrocarpous mosses. [B, 170.]

CALYMPEROIDEÆ (Lat.), n. f. pl. Ka^{2}l(ka^{3}l)-i^{2}m(u^{6}m)-pe^{2}r-o(o^2)-i^{2}d(ed)′e^2-e(a^3-e^2). See CALYMPERACEÆ.

CALYPHYOMY, n. Ka2l-i2-fi'o-mi2. From κάλυξ (see CALYX), and φῦναι, to be formed. Abnormal adhesion of the calyx to the corolla. [L, 73.]

CALYPTER (Lat.), n. m. Ka2l(ka3l)-i2p(u6p)'tu6r(tar). Gen., *calypter'os (-is)*. Gr., καλυπτήρ. A covering; of Hippocrates, the fleshy covering of a hæmorrhoidal vein constituting a pile. [A, 322, 325; L, 41, 84.]

CALYPTERATÆ (Lat.), n. f. pl. Ka2l(ka3l)-i2p(u6p)-te2r-a-(a3)'te(ta3-e2). Fr., *calyptérées* [Robineau-Desvoidy]. A family of the *Diptera*. [L, 180.]

CALYPTERIA (Lat.), n. n. pl. Ka2l(ka3l)-i2p(u6p)-te(ta)'ri2-a3. Gr., καλυπτήρια (from καλύπτειν, to cover). Fr., *calyptères*. Ger., *Schwanzdecken*. The tail-coverts of a bird. [L, 14, 180.]

CALYPTOBLASTEA (Lat.), n. n. pl. Ka2l(ka3l)-i2p(u6p)-to-(to2)-bla2st(bla3st)'e2-a3. From καλύπτειν, to cover, and βλαστός, a bud. A suborder of the *Hydroida*, in which the nutritive or generative buds are contained within a hydrotheca or gonangeium. [L, 193.]

CALYPTOPSEUDOMORPHOSIS (Lat.), n. f. Ka2l(ka3l)-i2p(u6p)''to(to2)-su2d(psu2d)-o(o2)-mo2rf-o'si2s. Gen., *calyptopseudomorpho'seos (-sis)*. From καλύπτειν, to cover, ψευδής, false, and μόρφωσις, formation. Ger., *Kalyptopseudomorphose*, *Umhüllungsafterbildung*. The enlargement of a crystal by incrustation. [A, 322.]

CALYPTRA (Lat.), n. f. Ka2l(ka3l)-i2p(u6p)'tra3. Gen., *calyp'tras (-træ)*. Gr., καλύπτρα. Fr., *calyptre*, *coiffe*. Ger., *Mooshaube* (1st def.), *Mutze* (1st def.). 1. The dry membranous covering which, in mosses, covers the sporangeium from above, and in liver-mosses incloses it at the base. 2. Of Tournefort, an aril. [B, 1, 121, 123.]

CALYPTRACEA (Lat.), n. n. pl. Ka2l(ka3l)-i2p(u6p)-tra(tra3)'-se2(ke2)-a3. Fr., *calyptracées*, *calyptraciens*. A family of the *Gasteropoda*. [L, 41.]

CALYPTRÆACEA (Lat.), n. n. pl. Ka2l(ka3l)-i2p(u6p)-tre-(tra3-e2)-a(a3)'se2(ke2)-a3. Fr., *calyptréacés*. Of Menke, a suborder of the *Gasteropoda*. [L, 180.]

CALYPTRÆFORMIS (Lat.), adj. Ka2l(ka3l)-i2p(u6p)-tre-(tra3-e2)-fo2rm'i2s. From *calyptra* (*q. v.*), and *forma*, form. Fr., *calyptriforme*. Ger., *mooshaubenförmig*. Resembling the calyptra of a moss; shaped like a hood or an extinguisher. [B, 1, 123.]

CALYPTRÆIDÆ (Lat.), n. f. pl. Ka2l(ka3l)-i2p(u6p)-tre'-(tra3'e2)-i2d-e(a3-e2). A family of the *Podophthalma*. [L, 282.]

CALYPTRAINA (Lat.), n. n. pl. Ka2l(ka3l)-i2p(u6p)-tra3-i(e)'-na3. A subfamily of the *Calyptrœidœ*. [L, 282.]

CALYPTRAL (Fr.), adj. Ka3l-i2p-tra3l. Pertaining to a calyptra. [A, 301.]

CALYPTRANOLENA (Lat.), n. n. pl. Ka2l(ka3l)-i2p(u6p)-tra2n(tra3n)-o2l-e(a)'na3. Fr., *calyptranolènes*. Of Ranzani, an order of the *Mollusca*. [L, 180.]

CALYPTRANTHES (Lat.), n. f. Ka2l(ka3l)-i2p(u6p)-tra2n-(tra3n)'thez(thas). From καλύπτρα (see CALYPTRA), and ἄνθος, a flower. Fr., *calyptranthe*. 1. Of Swartz, a genus of myrtaceous trees and shrubs of the tribe *Myrteœ*, indigenous to tropical America. 2. Of Willdenow, a genus now referred to *Syzygium*. [B, 42, 121.]—**C. aromatica** [A. St.-Hilaire]. Fr., *piment couronné*. A Brazilian shrub; the flower-buds or fruit are highly aromatic and are used instead of cloves. [B, 173, 180.]—**C. caryophyllata** [Persoon]. The *Syzygium caryophyllaceum*. [B, 180.]—**C. caryophyllifolia** [Blume], **C. cumini** [Swartz]. The *Syzygium caryophyllifolium*. [B, 173, 180.]—**C. guineensis** [Willdenow]. The *Syzygium guineense*. [B, 173.]—**C. jambolana** [Willdenow]. The *Syzygium jambolanum*. [B, 180.]—**C. paniculata** [Ruíz and Pavón]. A Peruvian species, used like *C. aromatica*. [B, 121.]—**C. schlechtendahliana** [Berg]. A Mexican species, used like *C. aromatica*. [B, 121.]

CALYPTRATA (Lat.), n. n. pl. Ka2l(ka3l)-i2p(u6p)-tra(tra3)'ta3. Of Hoffmann, a group of cryptogamous plants. [B, 121.]

CALYPTRATE, adj. Ka2l-i2p'trat. Lat., *calyptratus*. Fr., *calyptré*, *coiffé*. Ger., *behaubt*, *gehaubt*. Provided with a calyptra. [B, 121, 123.]

CALYPTRATELY, adv. Ka2l-i2p'trat-li2. Lat., *calyptratim*. Ger., *haubenartig*. In the form, or after the manner, of a hood (calyptra); *e. g.*, c. deciduous. [B, 42, 121, 123.]

CALYPTRATI (Lat.), n. m. pl. Ka2l(ka3l)-i2p(u6p)-tra(tra3)'-ti(te). Fr., *calyptrés*. Mosses. [B, 121.]

CALYPTRÉ (Fr.), adj. Ka3l-i2p-tra. Calyptrate; as a n., in the pl., c's, see CALYPTRATI. [B, 121.]

CALYPTRIFORM, adj. Ka2l-i2p'tri2-fo2rm. See CALYPTRÆFORMIS.

CALYPTROBOTRYA (Lat.), n. n. pl. Ka2l(ka3l)-i2p(u6p)-tro-(tro2)-bo2t'ri2(ru6)-a3. Of Reichenbach, the *Bryaceœ* of Endlicher. [B, 121.]

CALYPTROGAMIA (Lat.), n. n. pl. Ka2l(ka3l)-i2p(u6p)-tro-(tro2)-ga2m(ga3m)'i2-a3. Of Bridel, a class of plants, comprising the divisions *Musci* and *Hepaticœ*. [B, 170.] Cf. BRYOPHYTA.

CALYPTROGEN, n. Ka2l-i2p'tro-je2n. From καλύπτρα, a hood, and γεννᾶν, to beget. The tissue which develops into the root-cup of the root in the angeiosperms. [B, 270.]

CALYPTROPHORIDÆ (Lat.), n. f. pl. Ka2l(ka3l)-i2p(u6p)-tro(tro2)-fo2r'i2d-e(a3-e2). A family of the *Lithophyta*. [L, 245.]

CALYSACCION (Lat.), n. n. Ka2l(ka3l)-i2(u6)-sa2k(sa3k)'si2-(ki2)-o2n. Of Wight, a genus of clusiaceous plants, now referred to *Ochrocarpus*. [B, 42, 121.]—**C. longifolium** [Wight]. The *Ochrocarpus longifolius*. [B, 172.]

CALYSAIA (Lat.), n. f. Ka2l(ka3l)-i2(u6)-sa(sa3)'i2-a3. See CALISAYA.

CALYSTEGIA (Lat.), n. f. Ka2l(ka3l)-i2s(u6s)-tej(te2g)'i2-a3. Fr., *calystégie*. A genus of convolvulaceous plants, separated by R. Brown from *Convolvulus*, of which it is made a section by Gray. [B, 42, 121, 215.]—**C. reniformis** [R. Brown]. The *Convolvulus soldanella*. [B, 215.]—**C. sepium** [R. Brown]. The *Convolvulus sepium*. [B, 215.]—**C. soldanella** [R. Brown]. The *Convolvulus soldanella*. [B, 215.]

CALYX (Lat.), n. m. Ka(ka3)'li2x(lu6x). Gen., *cal'ycis*. Gr., κάλυξ. Fr., *calice*. Ger., *Kelch*, *Blumenkelch* (1st def.). It., *calice*. Sp., *caliz*. 1. The outermost of the whorls of leaflets forming a flower. It is composed of one or more series of metamorphosed leaves (sepals), either united into a tube (monosepalous c., gamosepalous c.) or separate (polysepalous c., dialysepalous c.). When the corolla is present, the c. usually differs from it in color and texture, being more or less green and herbaceous, sometimes membranaceous or scarious. In apetalous plants the c. is frequently colored and of a delicate texture, like a corolla. In relation to the ovary, the c. is either inferior (hypogynous), half-inferior (perigynous), or superior (epigynous); in shape it is regular or irregular; and in duration it is either caducous (falling in the beginning of anthesis), deciduous (falling at the completion of anthesis), or persistent (remaining attached to the fruit), in which latter case it is sometimes accrescent (increasing in size after the anthesis is completed). 2. In certain *Fungi*, the receptacle. 3. In renal anatomy, see CALIX. 4. See OVISAC. [B, 19, 28; L, 221.]—**C. communis**. Fr., *calice commun*. Of Linnæus, the involucre of the flower-head in composite plants, which, however, is bracteate and not calycine in character. [B, 121.]—**Calyces renales.** See CALICES *of the kidney* (under CALIX).—**Calyces vomitorii**. See CALICES *vomitorii* (under CALIX).

CALZONES DE ZORRA (Sp.), n. Ka3l-th2on'as da th2or'ra3. See DIGITALIS.

CAMACARI, n. An unclassified Brazilian tree. The glutinous juice is rubbed upon the skin to keep insects away. [B, 88, 121.]

CAMACÉS (Fr.), n. pl. Ka3m-a3-sa. See CHAMACEA.

CAMACHIE-PILLOO (Tamil), **CAMACHIE-PILOO** (Tamil), n's. The *Andropogon schœnanthus*. [B, 88, 172.]

CAMACOAN, n. Of Rumphius, the *Canarium silvestre*. [B, 121.]

CAMADJARA, n. In Java, the *Andropogon schœnanthus*. [B, 88, 121.]

CAMÆLEONA (Lat.), **CAMÆLEONIDÆ** (Lat.), **CAMÆLEONIDEI** (Lat.), **CAMÆLEONII** (Lat.), **CAMÆLEONOIDEA** (Lat.), n's n. pl., f. pl., m. pl., m. pl., and n. pl. Ka2m-(ka3m)-e2l(a3-e2l)-e2-on'a3, -o2n'i2d-e-(a3-e2), -o2n-i2d'e2-i(e), -on'i2-i(e), -o2n-o(o2)-i2d(ed)'e2-a3. See CHAMÆLEONIDÆ.

CAMAGNOC, n. The *Jatropha manihot*. [B, 121.]

CAMAGON, n. In the Philippines, the *Diospyros kaki*. [B, 121.]

CAMAH (Ar.), n. The *Triticum sativum*. [B, 121.]

CAMAJONDURO, n. In Carthagena, the *Helicteres apetala*. [B, 121.]

CAMAL (Hind.), n. The *Nelumbium speciosum*. [B, 172.]

CAMALANGA, n. A Sumatra cucurbitaceous plant, from which a kind of sweet-meat is made. [B, 88, 121.]

CAMALEON (Sp.), n. Ka3m-a3-la-on'. The *Lacerta chamæleon*, also the genus *Carlina*. [A, 361.]—**C. blanco**. The *Carlina acaulis*. [A, 361.]—**C. negro**. The *Carlina corymbosa*. [A, 361.]—**C. rojo**. Potassium permanganate. [A, 447.]

CAMAMBAYA, n. In Brazil, the *Tillandsia usneoides*. [B, 88, 121.]

CAMAMILLA (Lat.), **CAMAMILLE** (Lat.), **CAMAMILLINA** (Lat.), n's f. Ka2m(ka3m)-a3-mi2l'la3, -mi2l'le(la), -mi2l-li(le)'na3. Old names for the *Anthemis nobilis*. [B, 88, 121.]

CAMAMINE (Fr.), n. Ka3m-a3-men. The *Camelina sativa*. [B, 121.]

CAMANBAYA, n. See CAMAMBAYA.

CAMANDAG, **CAMANDANG**, n's. An undetermined tree of the Philippines. The juice (*taguc*) is a very fatal arrow-poison. [B, 88, 121.]

CAMANIOC, n. See CAMAGNOC.

CAMANTOURAY, n. In Coromandel, the *Pharnaceum distichum*. [B, 121.]

CAMANU, n. A variety of *Psidium*. The bark is febrifuge. [L, 105.]

CAMARA (Lat.), n. f. Ka2m(ka3m)'a3-ra3. Gr., καμάρα. Fr., *camare* (4th def.). Ger., *Kammer* (1st, 2d, and 3d defs.), *Wölbung* (1st, 2d, and 3d defs.). 1. In general, an arched or vaulted chamber (see CAMERA). [A, 318, 387.] 2. The fornix of the brain. [Galen (A, 325); L, 84.] 3. The hollow of the external ear, surrounding the external auditory meatus. [A, 325; L, 84.] 4. A carpel; also a more or less membranous dry fruit consisting of two united valves with one or more seeds attached to the inner angle. If one-seeded, the c. is usually indehiscent, and then corresponds to the caryopsis or achænium; if several-seeded, it is generally dehiscent, and then forms a variety of the follicle. It is rarely solitary, several being usually aggregated to form a compound fruit. [B, 1, 19, 123.] 5. Of Plumier, the genus *Lantana*; of Chamisso, a section of that genus. [B, 121.]

CAMARA, n. In Guiana, the *Acrodiclinium c.*, also the wood of *Dipteryx odorata*. [B, 19, 121.]

CAMARANBAYA, n. A Brazilian species of *Jussiœa* or *Ludwigia*. [B, 121.]

CAMARATED, adj. Ka^{2}m'a^{2}r-at-e^{2}d. From *camara* (*q. v.*). Dome-shaped. [E.]

CAMARATIO (Lat.), n. f. Ka^{2}m(ka^{3}m)-a^{3}r-a(a^3)'shi^2(ti^2)-o. Gen., *camaratio'nis.* See CAMAROSIS.

CAMARD (Fr.), adj. Ka^{3}m-a^{3}r. Having a flat nose. [L, 180.]

CAMARE (Fr.), n. Ka^{3}m-a^{3}r. See CAMARA (4th def.).

CAMAREA (Lat.), n. f. Ka^{2}m(ka^{3}m)-a(a^3)'re^2-a^3. Of A. St.-Hilaire, a genus of Brazilian malpighiaceous plants of the tribe *Gaudichaudieæ.* [B, 42, 121.]

CAMARÈS (Fr.), n. Ka^{3}m-a^{3}r-e^{2}z. A place in the department of Aveyron, France, where there is a spring containing sodium bicarbonate. [A, 385; L, 105.]

CAMARIEN (Fr.), adj. Ka^{3}m-a^3-ri^2-a^{3}n^2. See CAMARIUS.

CAMARIGNE (Fr.), n. Ka^{3}m-a^{3}r-en. The *Empetrum nigrum.* [B, 88, 121.]

CAMARILLA (Sp.), n. Ka^{3}m-a^3-rel'ya^3. The *Teucrium polium.* [B, 121.]

CAMARINE (Fr.), **CAMARINHEIRA** (Port.), n's. Ka^{3}m-a^{3}r-en, -en-ya'i^2-ra^3. See CAMARIGNE.

CAMARION (Lat.), **CAMARIUM** (Lat.), n's n. Ka^{2}m(ka^{3}m)-a(a^3)'ri^2-o^{2}n, -u^{3}m(u^{4}m). Gr., καμάριον (dim. of καμάρα). See CAMARA (2d def.).

CAMARIUS (Lat.), adj. Ka^{2}m(ka^{3}m)-a(a^3)'ri^2-u^{3}s(u^{4}s). Fr., *camarien.* Resembling or analogous to a camara (4th def.); of Mirbel, having an external longitudinal sulcus corresponding to a lateral placenta inside (said of a berry). [B, 1.]

CAMAROCH [Rumphius] (Pers.), n. The *Averrhoa carambola.* [B, 88, 121.]

CAMAROMA (Lat.), n. n. Ka^{2}m(ka^{3}m)-a^{3}r-o'ma^3. Gen., *camarom'atos* (*-is*). Gr., καμάρωμα (from καμαροῦν, to arch). Ger., *Gewölbbruch.* An old term for a fracture of the vault of the cranium in which the fragments are displaced outward in the form of a vault. [A, 322, 325; E; L, 41.]

CAMAROSIS (Lat.), n. f. Ka^{2}m(ka^{3}m)-a^{3}r-o'si^{2}s. Gen., *camaro'seos* (*-sis*). Gr., καμάρωσις. Fr., *camarose.* Ger., *Verwölbung.* The formation of a camaroma (*q. v.*). [A, 322; L, 41.]

CAMARU, n. In Brazil, the *Physalis pubescens* and *Physalis angulata.* [B, 121.]

CAMARUNA, n. The tonka bean. [B, 121.]

CAMASS, n. Of the Nez Percés Indians, the *Camassia esculenta.* [B, 121.]—**C.-root.** 1. See *C.* 2. In southern Africa, the root of *Gonioma kamassi.* [B, 121.]

CAMASSIA (Lat.), n. f. Ka^{2}m(ka^{3}m)-a^{2}s(a^{3}s)'si^2-a^3. 1. Of Lindley, a genus of liliaceous plants (the *Cyanotris* of Rafinesque, the *Sitocodium* of Salisbury) of the tribe *Scilleæ*, distinguished from *Scilla* by its several-nerved perianth. 2. See GONIOMA. [B, 42, 121; Engler (B, 245).]—**C. esculenta** [Lindley]. The *quamash*, or *camass*; a species of *C.* (1st def.) growing in the western United States. [B, 121, 245.]—**C. Fraseri** [Torrey]. Syn.: *Scilla esculenta* [Ker.]. A species of *C.* (1st def.) growing in the United States east of the Mississippi, having an edible bulb about as large as an onion. [B, 34, 245.]

CAMATA, n. The unripe acorns of *Quercus ægilops.* [B, 275.]

CAMATCHILI, n. In Manila, the *Inga c.* [L, 105.]

CAMATENA, n. See CAMATA.

CAMATODES (Lat.), adj. Ka^{2}m(ka^{3}m)-a^{2}t(a^{3}t)-o'dez(das). Gr., καματώδης (from κάματος, weariness, exhaustion, and εἶδος, resemblance). Causing or affected with debility. [A, 322, 387.]

CAMATOS (Lat.), n. m. Ka^{2}m(ka^{3}m)'a^3-to^{2}s. Gr., κάματος. Fatigue, exhaustion, disease. [A, 322, 387.]

CAMAX [Schreber] (Lat.), n. f. Ka(ka^3)'ma^{2}x(ma^{3}x). Gen., *cam'acos* (*-is*). Gr., κάμαξ. See ROUPOUREA.—**C. fraxinea** [Willdenow], **C. guianensis** [Gmelin]. The *Roupourea guianensis.* [B, 173.]

CAMAYAN, n. In Sumatra, benzoin. [B, 88, 121.]

CAMAZA, n. In the Philippines, the *Croton c.* [L, 105.]

CAMBAIBA, n. In Brazil, the *Curatella c.* [L, 105.]

CAMBAIBINHA (Port.), n. Ka^{3}m-ba^3-e-ben'ya^3. Probably a corruption of *Campainha* (*q. v.*). [a, 14.]

CAMBANG-CUNING (Malay), n. A species of *Cassia* the leaves of which are edible. [B, 88, 121.]

CAMBANG-TSINLANG, n. In Ceylon, a species of *Aglaia.* [B, 121.]

CAMBAR, n. 1. A spagyrical term of unknown meaning. [A, 325.] 2. The *Dioscorea sativa.* [B, 121.]

CAMBARE (Malay), n. The *Tacca pinnatifida.* [B, 121.]—**C. maron.** The *Cyathea excelsa.* [B, 88.]

CAMBÉ (Fr.), n. Ka^{3}m-ba. In Gascony, the *Cannabis sativa.* [B, 88, 121.]

CAMBEA (Lat.), n. f. Ka^{2}m(ka^{3}m)'be^2-a^3. Fr., *cambée.* See CAREYA.

CAMBERY, n. In Brazil, the *Myrtus pimenta.* [Pison (B, 88, 121).]

CAMBI, n. See C.-RESIN PLANT.

CAMBIAL, adj. Ka^{2}m'bi^2-a^{2}l. Lat., *cambialis.* Fr., *cambial.* Of or pertaining to cambium. [B, 121.]

CAMBIE-LEAF, n. Ka^{2}m'bi^2. The *Nymphæa alba* and the *Nuphar lutea.* [B, 275.]

CAMBIFORM, adj. Ka^{2}m'bi^2-fo^{2}rm. Fr., *cambiforme.* Resembling cambium (applied by Nägeli to elongated, thin-walled cells containing a clear liquid found in the liber of plants, now generally called cribrose or sieve-cells; restricted by De Bary to those cells of the sieve-tissue that are smaller and more sharply prismatic than ordinary sieve-cells). [B, 75, 121, 229.]

CAMBIL, n. Of the alchemists, terra rubra. [Ruland (A, 325).]

CAMBING, n. In the Moluccas, an unclassified tree the bark of which contains a gum-resinous juice and is used as a remedy for dysentery. [B, 121; L, 49, 97.]

CAMBIREA [Paracelsus], n. A venereal bubo. [L, 84, 102.]

CAMBI-RESIN PLANT, n. Ka^{2}m'bi^2-re^{2}z''i^{2}n. The *Gardenia lucida.* [B, 275.]

CAMBIUM (Lat.), n. n. Ka^{2}m(ka^{3}m)'bi^2-u^{3}m(u^{4}m). From *cambire*, to change. Fr., *cambium.* Ger., *Nahrungssaft, Bildungssaft.* It., *cambio.* 1. Of the old writers, a nutritive substance serving for the growth of the organs of the body. [H, 12.] Cf. PROTOPLASM. 2. In botany, of Grew, a clear, viscid liquid found beneath the bark of a growing tree, supposed to be the elaborated sap on the point of transformation into cellular tissue. The c. was afterward ascertained to be itself a tissue, and the term has since been applied to the special form of vegetable tissue (meristem-tissue) constituting this liquid substance, made up of a mass of narrow, thin-walled cells united into a mass which forms one of the layers of the fibro-vascular bundle. The c. layer contains an abundance of protoplasm and other materials necessary for the growth of the plant, and constitutes the generative layer, or portion capable of further differentiation. [B, 1, 75, 121, 229.] 3. Of Billroth, the osteogenetic layer of periosteum, the layer lying next the bone. ["Arch. f. klin. Chir.," vi, p. 723 (J); J, 26, 35.]—**Fascicular c.** The layer of c. found in a fibro-vascular bundle. [B, 229.]—**Interfascicular c.** The layer of c. formed between the fibro-vascular bundles; serving, with the fascicular c., to complete the c. ring. [B, 75, 229.]

CAMBO, n. Ka^{3}m-bo. A place in the department of the Basses-Pyrénées, France, where there is a sulphurous and also a chalybeate spring. [A, 385; B, 270; L, 105.]

CAMBO, n. A sort of tea, highly perfumed, of the odor of violets. [B, 121.]

CAMBOC, n. Aloes-wood. [L, 49.]

CAMBODIA (Lat.), **CAMBODIUM** (Lat.), n's f. and n. Ka^{2}m(ka^{3}m)-bod'i^2-a^3, -u^{3}m(u^{4}m). Gamboge. [B, 119, 180.]

CAMBOGE, n. Ka^{2}m'boj. See GAMBOGE.

CAMBOGIA (Lat.), n. f. Ka^{2}m(ka^{3}m)-bo'ji^2(gi^2)-a^3. 1. Of the U. S. and Br. Ph's, gamboge. 2. Of Linnæus, a genus of trees producing gamboge, now referred to *Garcinia.* [B, 5, 42, 121, 180.]—**C. gutta** [Linnæus]. The *Garcinia c.* and *Garcinia morella.* [B, 121, 172, 180.]—**C'harz** (Ger.), **C'säure** (Ger.). See CAMBOGIC ACID.—**C. siamensis.** Siam gamboge. [L, 130.]—**C. zeylanica.** Ceylon or Cingalese gamboge. [L, 130.]—**Gummi cambogiæ.** Gamboge. [B, 180.]—**Pilula cambogiæ composita** [Br. Ph.]. A pill mass of 1 part each of gamboge, Barbadoes aloes, and compound powder of cinnamon, 2 parts of hard soap, and enough syrup to give the proper consistence. [B, 81.]

CAMBOGIC ACID, n. Ka^{2}m-boj'i^{2}k. Fr., *acide cambogique.* Ger., *Cambogiasäure, Cambogiaharz.* The orange-yellow acid resin derived from gamboge; soluble in alcohol, in ether, in chloroform, in carbon disulphide, and in dilute solutions of the alkalies, from which it is precipitated by acids. Its solution is intensely red. [B, 10, 270.]

CAMBOGIEÆ (Lat.), n. f. pl. Ka^{2}m(ka^{3}m)-bo-ji(gi^2)'e^2-e(a^3-e^2). Of Reichenbach, a division of the *Mangostaneæ*, comprising *Garcinia, Stalagmites*, and *Pentadesma.* [B, 170.]

CAMBOGIER (Fr.), n. Ka^{3}m-bo-zhi^2-a. See GARCINIA.

CAMBOGIUM (Lat.), n. n. Ka^{2}m(ka^{3}m)-bo'ji^2(gi^2)-u^{3}m(u^{4}m). Gamboge. [B, 180.]

CAMBOH, n. The *Holcus spicatus.* [Leschenault (B, 121).]

CAMBON (Fr.), n. Ka^{3}m-bo^{2}n^2. A place in the department of Cantal, France, where there is an alkaline and saline spring. [A, 385; L, 105.]

CAMBON, n. The *Holcus spicatus.* [B, 19.]

CAMBONG-SANTAL, n. The *Pavetta indica* or a related species of *Pavetta.* [B, 121.]

CAMBOU, n. See CAMBOH.

CAMBOUIS (Fr.), n. Ka^{3}m-bu-e. 1. An old ointment of rancid lard and oxide of iron, sometimes used by charlatans for resolving indolent swellings and hastening the maturation of abscesses. [L, 105.] 2. Sebaceous matter accumulated in a horse's sheath. [A, 301.]

CAMBRIC-GRASS PLANT, n. Kam'bri^{2}k-gra^{3}s. The *Bœhmeria nivea.* [B, 275.]

CAMBRURE (Fr.), n. Ka^{3}m-bru^{6}r. An arch-like or vault-like formation. [A, 301.]

CAMBUATA, n. In Brazil, a species of *Cupania.* [B, 121.]

CAMBUC, n. See CAMBOC.

CAMBUCA (Lat.), **CAMBUCCA** [Paracelsus] (Lat.), n's. f. Ka^{2}m(ka^{3}m)-bu^2(bu)'ka^3, -bu^{3}k(buk)'ka^3. A venereal ulcer on the genitals or in the groin, also a suppurating bubo. [Proksch, "Med.-chir. Centr.-Bl.," June 9, 1882, p. 265; G; H; L, 97, 102, 104.]—**C. membranata, C. membrata.** See *C.*

CAMBUI, n. See CAMBUY (2d def.).

CAMBURA, n. See CHAMBURU.

CAMBURI, n. Of Rumphius, the *Musa regia.* [A, 385.]

CAMBUY, n. 1. See CAMBO. 2. The name of several Brazilian species of *Eugenia.* [Pison (B, 121, 180).]

CAM-CHAIN, n. The fruit of a Tonquin tree, apparently a variety of orange. [B, 121; L, 41.]

CAMEAA, n. In Malabar, cinnamon. [L, 105.]

CAMEACTIS (Ar.), n. The *Sambucus obulus.* [L, 105.]

CAMÉCERISIER (Fr.), n. Ka^{3}m-a-se^{2}r-es-i^2-a. See CAMÉRISIER.

CAMEELLING, n. A Sumatra fruit the kernel of which is eaten. [B, 121; L, 105.]

CAMELMIA, n. See MEMPHITES.

CAMEL, n. Ka^{2}m'e^{2}l. Gr., κάμηλος. Lat., *camelus.* Fr., *chameau.* Ger., *Kameel.* It., *cammello.* Sp., *camello.* An animal of the genus *Camelus*, especially the *Camelus bactrianus.* Its brain, dried and steeped in vinegar, was said by Galen to cure epilepsy; its bile, drank with honey, was said to have the same virtue; its dried tail was reputed aperient; and its knotted tail was worn on the left arm as a cure for quartan ague. [A, 301, 325.]—**C's-hay.** Ger., *Kameelstroh.* The *Andropogon schœnanthus.* [B, 19, 275.]—**C's-thorn.** The *Alhagi camelorum.* [B, 19.]—**C.-tree.** The *Acacia giraffe.* [B, 275.]

CAMELANNE, CAMELAUN, n's. In the Moluccas, the *Piper malimiri.* [B, 121.]

CAMÉLÉE (Fr.), n. Ka^{3}m-a-la. The genus *Cneorum.* [B, 121.]—**C. à trois coques.** The *Cneorum tricoccum.* [B, 121.]—**C. noire.** The *Daphne gnidium.* [B, 121.]

CAMÉLÉON (Fr.), n. Ka^{3}m-a-la-o^{2}n^2. See CHAMÆLEON.—**C. blanc.** The *Atractylis gummifera.* [B, 121.]—**C. minéral.** Potassium permanganate. [L, 32.]—**C. végétal.** The genus *Atractylis.* [A, 301.]—**C. violet.** See *C. minéral.*

CAMÉLÉONIDES (Fr.), **CAMÉLÉONIENS** (Fr.), **CAMÉLÉONOÏDES** (Fr.), n's. Ka^{3}m-a-la-on-ed, -i^2-a^{3}n^2, -o-ed. See CHAMÆLEONIDÆ.

CAMELIA (Lat.), n. f. Ka^{2}m(ka^{3}m)-e(a)'li^2-a^3. See CAMELLIA.

CAMELIACEÆ (Lat.), n. f. pl. Ka^{2}m(ka^{3}m)-e^{2}l(al)-i^2-as(a^{3}k)'-e^2-e(a^3-e^2). See CAMELLIACEÆ.

CAMELIDA (Lat.), n. n. pl. Ka^{2}m(ka^{3}m)-e^{2}l(al)'i^{2}d-a^3. A family of the *Tylopoda*, including only the true camels. [L, 173.]

CAMELIDÆ (Lat.), n. f. pl. Ka^{2}m(ka^{3}m)-e^{2}l(al)'i^{2}d-e(a^3-e^2). Fr., *camélidées, cameliens.* A group of the *Ruminantia*, including the camels and llamas. [L, 147.]

CAMELIEÆ (Lat.), n. f. pl. Ka^{2}m(ka^{3}m)-e^{2}l(al)-i(i^2)'e^2-e(a^3-e^2). See CAMELLIEÆ.

CAMELII (Lat.), n. m. pl. Ka^{2}m(ka^{3}m)-e^{2}l(al)'i^2-i(e). See CAMELIDÆ.

CAMELINA (Lat.), n. f. Ka^{2}m(ka^{3}m)-e^{2}l(al)-i(e)'na^3. Fr., *cameline.* Of Crantz, a genus of cruciferous plants indigenous to central Europe and the temperate regions of Asia. [B, 121.]—**C. dentata** [Persoon]. A species closely allied to *C. sativa*, differing from it chiefly in its sinuately or pinnatifidly dentate, narrower leaves. [B, 180.]—**C. microcarpa.** A European species, regarded by Koch as a variety of *C. sativa*, having the same properties as the latter. [B, 180.]—**C. sativa** [Crantz]. Fr., *camamine, camomille, rouge-bé, sesame bâtard* (ou *d'Allemagne*). Ger., *Flachsdotter, Leindotter, Dotterkraut, Finkensame.* Syn.: *Alyssum* [Scopoli (seu *Myagrum* [Linnæus]) *sativum*, *Mœnchia sativa* [Roth]. A species growing wild in Europe and northern Asia. The herb (*herba sesami vulgaris*) was formerly used in ophthalmia; the leaves have been substituted for those of the mulberry in silk-worm culture; the seeds (*semen camelinæ* [seu *myagri*, seu *sesami vulgaris*) contain a bland oil used for illumination and in making soap, and have been employed as food for geese and sometimes for men, also as an emollient and protective, especially in skin diseases. [B, 173, 180, 270.]—**C. silvestris** [Wallroth]. See *C. microcarpa.*—**Semen camelinæ.** The seeds of *C. sativa.* [B, 270.]

CAMELINEÆ (Lat.), n. f. pl. Ka^{2}m(ka^{3}m)-e^{2}l(al)-i^{2}n'e^2-e(a^3-e^2). Fr., *camelinées.* Of De Candolle and others, a tribe of the *Cruciferæ* (*Notorrhizeæ*), comprising *Camelina*, etc. [B, 121, 170.]

CAMELINIDÆ [Lindley] (Lat.), n. f. pl. Ka^{2}m(ka^{3}m)-e^{2}l(al)-i^{2}n'i^{2}d-e(a^3-e^2). See CAMELINEÆ.

CAMELLIA (Lat.), n. f. Ka^{2}m(ka^{3}m)-e^{2}l'li^2-a^3. From *Camelli*, a Jesuit traveler and botanist. Ger., *Camellie.* Of Linnæus, the tea-rose; a genus of ternstrœmiaceous trees or shrubs closely related to *Thea*, of which some botanists make it a section; indigenous to southern and eastern Asia and the Indian Archipelago. [B, 19, 121.]—**C. anemonæflora, C. anemoniflora** [Sims]. The anemone-flowered c.; an Asiatic species. The seeds yield an oil used by the Japanese, and the leaves are substituted for those of tea. [B, 173.]—**C. drupifera** [Loureiro]. A small Cochin-China tree. The seeds yield a fixed oil used like that of *C. japonica.* [B, 173, 180.]—**C. japonica** [Linnæus]. The Japan rose; a branching shrub or tree indigenous to China and Japan. The seeds are considered poisonous in Japan, and contain camellin (*q. v.*) and a fixed oil which is used for many purposes in China. [B, 34, 173, 180, 270.]—**C. kissi** [Wallich], **C. oleifera** [Wallich]. See *C. drupifera.*—**C. sasanqua** [Thunberg], **C. sesanqua** [Thunberg]. Ger., *stumpfblätterige Camellie.* A China and Japan tree. The fragrant leaves are used to scent tea and as a substitute for it. The seeds yield an oil resembling olive-oil. [B, 180.]—**C. thea, C. theifera** [Griffith]. Syn.: *Thea chinensis* [Linnæus] (seu *assamica* [Masters]), *Eurya angustifolia* [Miquel]. The tea-plant; an evergreen shrub or small tree growing wild and also extensively cultivated in China and Japan. Several varieties (the *Thea viridis* [Linnæus], *Thea bohea* [Linnæus], and *Thea stricta* [Hayne]) are described. The dried leaves constitute tea. [B, 180, 185, 212.] See TEA and THEA.—**Lady Banks c.** See *C. sasanqua.*

CAMELLIACEÆ [Bartling, Link] (Lat.), **CAMELLIDEÆ** [Dumortier] (Lat.), n's f. pl. Ka^{2}m(ka^{3}m)-e^{2}l-li^2-a(a^3)'se^2(ke^2)-e-(a^3-e^2), -e^{2}l-li^{2}d'e^2-e(a^3-e^2). Fr., *camelliacées.* See CAMELLIEÆ.

CAMELLIE (Ger.), n. Ka^{3}m-e^{2}l-le'. See CAMELLIA.—**Stumpfblätterige C.** The *Camellia sasanqua.* [L, 80.]

CAMELLIA JAPONICA. [A, 327.]

CAMELLIEÆ (Lat.), n. f. pl. Ka^{2}m(ka^{3}m)-e^{2}l-li(li^2)'e^2-e(a^3-e^2). Fr., *camelliées.* The tea-worts; of De Candolle, an order of the *Thalamifloræ*, comprising *Camellia* and *Thea.* By more recent authors the *C.* are regarded as a tribe of the *Ternstrœmiaceæ*, and by some as identical with the latter. [B, 34, 121, 170.]

CAMELLIN, n. Ka^{2}m-e^{2}l'i^{2}n. Fr., *camelline.* A substance, $C_{53}H_{84}O_{19}$, having properties like those of a glucoside, obtained from the seeds of *Camellia japonica.* [B, 270.]

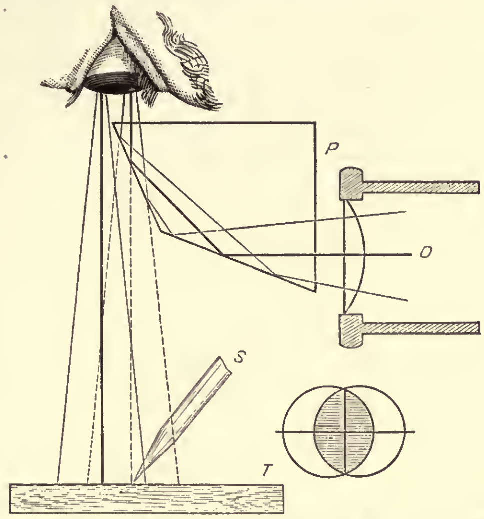
CAMELOPARDALIDÆ (Lat.), **CAMELOPARDALINA** (Lat.), **CAMELOPARDIDÆ** (Lat.), **CAMELOPARDINEÆ** (Lat.), n's f. pl., n. pl., f. pl., and f. pl. Ka^{2}m(ka^{3}m)-e^{2}l(al)-o(o^2)-pa^{3}rd-a^{2}l(a^{3}l)'i^{2}d-e(a^3-e^2), -a^{2}l(a^{3}l)-i(e)'na^3, -pa^{3}rd'i^{2}d-e(a^3-e^2), -pa^{3}rd-i^{2}n'e^2-e(a^3-e^2). From καμηλοπάρδαλις, the giraffe. A family of ruminants, including only the giraffe.

CAMELOPODIUM (Lat.), n. n. Ka^{2}m(ka^{3}m)-e^{2}l(al)-o(o^2)-pod-(po^{2}d)'i^2-u^{3}m(u^{4}m). Of Dioscorides, the *Marrubium creticum* or *Marrubium peregrinum.* [B, 121.]

CAMELORNITHES (Lat.), n. m. pl. and f. pl. Ka^{2}m(ka^{3}m)-e^{2}l(al)-o^{2}r-ni(ne)'thez(the^{2}s). From κάμηλος, the camel, and ὄρνις, a bird. Fr., *camélornithes.* The ostriches. [L, 180.]

CAMELUS (Lat.), n. m. Ka^{2}m(ka^{3}m)-e(a)'lo^{2}s. Gr., κάμηλος. Fr., *chameau.* Ger., *Kameel.* A genus of the *Camelida* and of the *Camelidæ.* [B, 180.]—**C. bactrianus** [Linnæus]. Fr., *chameau bactrien* (ou *à deux bosses*). The Bactrian, or double-humped, camel. [A, 301; B, 180.]—**C. dromedarius** [Linnæus]. Fr., *chameau arabe* (ou *à une bosse*), *dromadaire.* The dromedary, or one-humped camel. [A, 301.]—**C. llama.** See AUCHENIA *llama.*—**C. vicugna, C. vicunna.** See AUCHENIA *vicunna.*

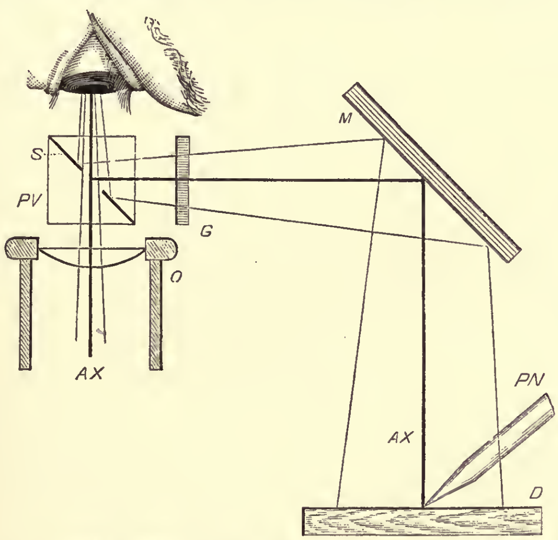
CAMENINE (Fr.), n. Ka^{3}m-e^{2}n-en. The *Camelina sativa.* [L, 41.]



CÄMENT (Ger.), n. Tsa-me^{2}nt'. See CEMENT.

CÄMENTIREN (Ger.), n. Tsa-me^{2}nt-er'e^{2}n. See CÆMENTATIO.

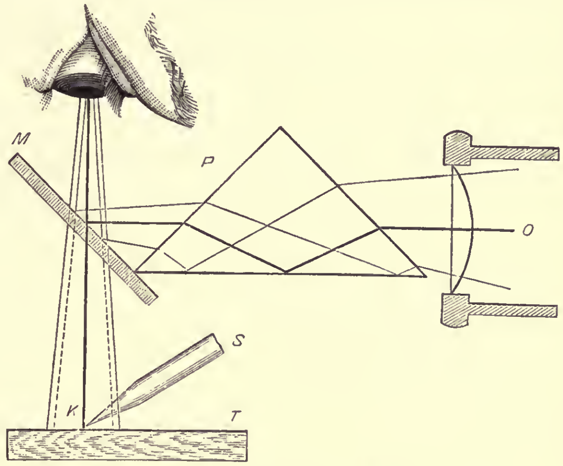
CAMEPITIS (Lat.), n. f. Ka^{2}m(ka^{3}m)-e^{2}p(ap)'i^{2}t-i^{2}s. See CHAMÆPITYS and TEUCRIUM.



CAMERA (Lat.), n. f. Ka^{2}m(ka^{3}m)'e^{2}r-a^3. For deriv., see CAMARA. Fr., *chambre.* Ger., *Kammer.* A chamber. [B.] See also CAMARA.—**C. anterior ventriculorum.** See *Anterior* CORNU.—**C. arteriosa.** The right ventricle of the heart exclusive of the conus arteriosus. [C. C. Wolff (L, 31).]—**C. lucida.** Fr., *chambre claire.* Ger., *helle Kammer.* An apparatus for drawing microscopic objects by projecting their image upon a sheet of paper and tracing the outlines thus depicted with a pencil. It was invented by Wollaston in 1804, and consists of a four-angled prism, *P*, through which the ray from the object, *O*, passes, undergoing total reflection and thus reaching the observer's eye. The image is thus projected upon the table, *T*, where it is traced with the pencil, *S*. A lens is interposed in order to make the rays from the object and from the point of the pencil have the same divergence and hence appear as if coming from the same point. Amici's c. lucida consists of a right-angled prism, *P*, through which the ray from the object, *O*, passes, undergoing total reflection at the base of the prism, and as it emerges strikes a plate of glass, *M*, and is thence reflected to the observer's eye so that the image of *O* is projected on the table, *T*, at the point *K*, where it can be traced with the pencil, *S*. Abbé's c. lucida consists of a cubical prism and a plane mirror. The prism is composed of two equal rectangular prisms, one of which is silvered on the diagonal surface except at a small circular spot in the centre. The prism is placed over the ocular of the microscope, and the rays pass directly through the opening in the silvered surface to the eye. The mirror is placed at a considerable distance from the prism, with its centre opposite the circular opening in the silvered surface of the prism. The mirror

reflects the rays from the drawing surface to the prism, whence they are reflected by the silvered diagonal surface to the eye in connection with the rays from the microscope. Drawing with

WOLLASTON'S CAMERA LUCIDA. (DRAWN BY MRS. S. H. GAGE.)



high powers is facilitated by placing a piece of tinted glass in the path of the rays from the drawing surface. This form of c. lucida is designed for use with a vertical microscope, and is very efficient and easily employed in drawing with both low and high powers. [B, 21; J.]—**C. medullaris** [Winslow]. See CENTRUM *ovale*.—**C. obscura.** Fr., *chambre noire.* Ger., *dunkle Kammer.* An apparatus invented by Porta for obtaining pictures of objects. It consists essentially of a box with a small opening closed by a convex lens. The rays from the object, striking upon the lens, are brought to a focus on a plate of ground glass, either directly or after reflection from a mirror. Here the image can either be traced by hand or, if a sensitive plate is introduced, photographed (see *Photographic c.*). The eye is essentially a c. obscura. [B.]—**Cameræ oculi.** See *Anterior* CHAMBER *of the eye* and *Posterior* CHAMBER *of the eye.*—**C. oculi tertia.** See CANAL *of Petit.*—**C. septi lucidi.** The fifth ventricle of the brain. [I,

ABBÉ'S CAMERA LUCIDA. (DRAWN BY MRS. S. H. GAGE.)

AX, the axial or central ray from the microscope and the drawing surface; *D*, the drawing surface; *G*, a piece of tinted glass in the course of the rays from the drawing surface; *M*, the mirror reflecting the rays from the drawing surface to the prism; *O*, the ocular of the microscope; *PN*, the drawing pencil; *PV*, the cubical prism over the ocular; *S*, the silvered diagonal surface of the cubical prism serving to reflect the rays from the mirror to the eye.

61; K.]—**Photographic c.** A c. obscura specially adapted to photographing; consisting of a box fitted for the introduction of a sensitive plate designed to receive the image, and provided with a telescopic slide for bringing the rays passing through the lens to a focus on the plate. Special precautions are taken against the admission of light, except through the lens, during the operation of photographing; and, in order to cut off the light when the process is finished, the lens is covered with a cap or (in instantaneous photography) by an automatic drop or shutter which reduces the

AMICI'S CAMERA LUCIDA. (DRAWN BY MRS. S. H. GAGE.)

period of exposure to a small fraction of a second. Diaphragms of various sizes are also used to regulate the amount of light admitted. [B.]

CAMERARIA (Lat.), n. f. Ka^{2}m(ka^{3}m)-e^{2}r-a(a^3)'ri^2-a^3. From *camerarius*, climbing over arbors. Fr., *caméraire, camérier.* Of Plumier, a genus of apocynaceous shrubs of the tribe *Plumierieæ.* [B, 121.]—**C. latifolia** [Jacquin]. A West Indian species. The milky juice is used as an arrow-poison by the aborigines of the West Indies and South America, and is said to furnish a sort of caoutchouc. [B, 121, 173.]—**C. lucida** [Jacquin]. A West Indian species. The juice is said to furnish caoutchouc. [B, 121.]

CAMERARIÆ (Lat.), n. f. pl. Ka^{2}m(ka^{3}m)-e^{2}r-a(a^3)'ri^2-e-(a^3-e^2). A group of the *Aranidæ.* [L, 150.]

CAMERATED, adj. Ka^{2}m'e^{2}r-at-e^{2}d. See POLYTHALAMOUS and CAMARATED.

CAMERATIO (Lat.), n. f. Ka^{2}m(ka^{3}m)-e^{2}r-a(a^3)'shi^2(ti^2)-o. Gen., *cameratio'nis.* See CAMAROSIS.

CAMERI (Jap.), n. The genus *Aleurites*, or, according to Baillon, an undetermined euphorbiaceous plant of the East Indies. [B, 121; L, 87.]

CAMÉRIER (Fr.), n. Ka^{3}m-a-ri^2-a. See CAMERARIA.

CAMÉRINE (Fr.), n. Ka^{3}m-a-ren. See CAMELINA.

CAMÉRISIER (Fr.), n. Ka^{3}m-a-res-i^2-a. The genus *Lonicera.* [L, 41.]—**C. des bois, C. des buissons.** The *Lonicera xylosteum.* [B, 121.]

CAMERITELÆ (Lat.), n. f. pl. Ka^{2}m(ka^{3}m)-e^{2}r-i^2-te(ta)'le-(la^3-e^2). From *camera*, a chamber, and *tela*, a web. Fr., *caméritèles, caméritèlées.* See CAMERARIÆ.

CAMEROSTOMA (Lat.), n. n. Ka^{2}m(ka^{3}m)-e^{2}r-o^{2}st'o(o^2)-ma^3. Gen., *camerostom'atos (-is).* From **καμάρα** (see CAMARA), and **στόμα**, a mouth. Fr., *camérostome.* Of Latreille, a cavity of the anterior portion of the cephalo-thorax in the *Arachnidæ*, from its forming a sort of roof over the manducatory organs. [L, 180.]

CAMERULA (Lat.), n. f. Ka^{2}m(ka^{3}m)-e^{2}r'u^2(u^4)-la^3. Dim. of *camera* (*q. v.*). Fr., *camérule.* A loculus, or small cavity, in any vegetable organ. [B, 38.]

CAMERY, n. Ka^{2}m'e^{2}r-i^2. See FROUNCE.

CAMES, CAMET, n's. Of the alchemists, silver. [Ruland, Johnson (A, 325).]

CAMETTI (Malay), n. See CAMMETTI.

CAMFE (Fr.), n. Ka^{3}n^{2}f. In Auvergne, the *Aira*, also probably several other species of grasses. [B, 121.]

CAMFORA (Lat.), n. f. Ka^{2}m(ka^{3}m)-fo'ra^3. See CAMPHORA.

CAMFORATA (Lat.), n. f. Ka^{2}m(ka^{3}m)-fo-ra(ra^3)'ta^3. The *Polycnemum arvense.* [Tabernæmontanus (B, 121).]

CAMFORELÆA (Lat.), n. n. pl. Ka^{2}m(ka^{3}m)-fo^{2}r(for)-e^{2}l-e'(a^3'e^2)-a^3. See KAMFORELÆA.

CAMFOROSMA [C. A. Meyer] (Lat.), n. f. Ka^{2}m(ka^{3}m)-fo^{2}r-(for)-o^{2}z(o^{2}s)'ma^3. See CAMPHOROSMA.

CAMHA (Ar.), n. The *Tuber cibarium.* [B, 88, 121.]

CAMIAS, n. In the Philippines, the *Averrhoa bilimbi.* [B, 121.]

CAMIFITIUS, CAMIFITUS, n's. In Barbary, the *Teucrium chamædrys.* [B, 88, 121.]

CAMILLE (Ger.), n. Ka^{3}m-el'le^2. The *Matricaria chamomilla.* [B, 121.]—**C'nöl.** Oil of chamomile. [B.]

CAMINET (Fr.), n. Ka^{3}m-i^{2}n-a. The *Erica tetralix.* [B, 121.]

CAMINGA, n. The *Canella alba.* [L, 84.]

CAMINUS (Lat.), n. m. Ka^{2}m(ka^{3}m)-i(e)'nu^{3}s(nu^{4}s). Gr., *κάμινος*. An oven, furnace, or forge; of the alchemists, a bell. [A, 318, 387; Ruland (A, 325); L, 119.]

CAMINYAN, n. In Sumatra, benzoin. [B, 121.]

CAMION, n. Ka^{2}m'i^2-o^{2}n. An unglazed earthen vessel used in the preparation of magnesia. [L, 117.]

CAMIRIUM (Lat.), n. n. Ka^{2}m(ka^{3}m)-i^{2}r(er)'i^2-u^{3}m(u^{4}m). From *camiri*, the Javanese name of *Aleurites moluccana*. Fr., *camirion*. See ALEURITES.—**C. cordifolium** [Gärtner]. See ALEURITES *moluccana*.

CAMISIA FŒTUS (Lat.), n. f. Ka^{2}m(ka^{3}m)-i^{2}s'i^2-a^3. Lit., the shirt of the fœtus; the chorion. [A, 325; L, 84.]

CAMISOLE (Fr.), n. Ka^{3}m-i^2-sol (as an Eng. word, ka^{2}m'i^{2}s-ol). Ger., *Kamisol, Zwangsjacke*. A strait-jacket; a garment having sleeves much longer than the arms, used for restraining insane and delirious persons, the arms being crossed in front and the sleeves tied together behind. [A, 301, 385.]—**C. de force.** See *C.*

CAMISSONIEÆ (Lat.), n. f. pl. Ka^{2}m(ka^{3}m)-i^{2}s-so^{2}n-i(i^2)'e^2-e-(a^3-e^2). Of Reichenbach, a section of the *Epilobieæ*. [B, 170.]

CAMIUM (Ar.), n. The *Cuminum cymimum*. [B, 88, 121.]

CAMLINE, n. Ka^{2}m'li^{2}n. The *Camelina sativa*. [L, 73.]

CAMMARON [Pliny] (Lat.), n. n. Ka^{2}m(ka^{3}m)'ma^{3}r-o^{2}n. See CAMMARUM.

CAMMAROS (Lat.), n. m. Ka^{2}m(ka^{3}m)'ma^{3}r-o^{2}s. Gr., *κάμμαρος*. See ASTACUS *fluviatilis*.

CAMMARUM (Lat.), n. n. Ka^{2}m(ka^{3}m)'ma^{3}r-u^{3}m(u^{4}m). Gr., *κάμμαρον*. Fr., *cammare*. 1. Of Dioscorides, the *Delphinium* or perhaps the *Mandragora*. 2. Of Pliny, probably the *Arnica scorpioides*; according to some, the *Aconitum*. 3. Of De Candolle, a section of the genus *Aconitum*. [B, 121.]

CAMMAS, n. See CAMASSIA *esculenta*.

CAMMETTI (Malay), n. Of Rheede, a Malabar tree of the *Euphorbiaceæ*. The leaves are used externally for chronic ulcers, baths prepared from the bark are employed in gout, and the milky juice is given internally in dropsy. According to Drury, it is the *Excœcaria cammetia*. [B, 88, 121, 172.]

CAMMOCK, n. Ka^{2}m'o^{2}k. The *Ononis spinosa*. [B, 121.]

CAMMON (Heb.), n. See CAMIUM.

CAMMORUM Lat.), n. n. Ka^{2}m(ka^{3}m)'mo^{2}r-u^{3}m(u^{4}m). See CAMMARUM.

CAMOCHAYOTE, n. In Mexico, the *Sechium edule*. [A, 447.]

CAMOINS (Fr.), n. Ka^{3}m-wa^{3}n^2. A place in the department of Bouches-du-Rhône, France, where there is a cold sulphurous spring, also a bathing establishment. [A, 319, 385.]

CAMOLANGA, CAMOLENGA, n's. The *Benicasa cerifera*. [Rumphius (B, 121).]

CAMOMELE, n. In southern Europe, the *Matricaria chamomilla* and the *Anthemis nobilis*. [B, 121.]

CAMOMEN, n. In Flanders, the *Camelina sativa*. [B, 121.]

CAMOMILE, n. Ka^{2}m'o-mil. See CHAMOMILE.

CAMOMILLA (It.), n. Ka^{3}m-o-mel'la^3. Chamomile; the genus *Anthemis*. [B.]

CAMOMILLE (Fr.), n. Ka^{3}m-o-mel. Chamomile (*Matricaria chamomilla*) and related species of plants, especially *Anthemis nobilis* and *Camelina sativa*; of the Fr. Cod., *Matricaria chamomilla* and *Anthemis nobilis*. [B, 121, 173.]—**Alcoolé de c.** See *Tinctura* CHAMÆMELI.—**C. bâtarde.** The *Anthemis* (*Maruta*) *cotula*. [B, 93.]—**C. bicolore.** The *Ormenis mixta*. [B, 93.]—**C. commune** [Fr. Cod.]. The *Matricaria chamomilla*. [B, 113, 121.]—**C. d'Allemagne** [Fr. Cod.]. German chamomile (*Matricaria chamomilla*). [B, 121.]—**C. de Paris.** A double-flowered variety of *Anthemis nobilis*, regarded as superior for pharmaceutical purposes. [B, 92.]—**C. de Perse.** The *Pyrethrum* (*Chrysanthemum*) *roseum*. [B, 81.]—**C. de Picardie.** The *Camelina sativa*. [B, 121.]—**C. des Allemands.** See *C. d'Allemagne*.—**C. des champs.** The *Anthemis arvensis*. [B, 121.]—**C. des chiens.** See *C. bâtarde*.—**C. des teinturiers.** The *Anthemis tinctoria*. [B, 97; L, 87.]—**C. du Nord.** A single-flowered variety of *Anthemis nobilis* growing in Belgium and the adjacent parts of France. [B, 92.]—**C. jaune.** See *C. des teinturiers*.—**C. noble.** The *Anthemis nobilis*. [B, 121.]—**C. ordinaire.** See *B. commune*.—**C. puante.** See *C. bâtarde*.—**C. pyrèthre.** See *Grande c.*—**C. romaine** [Fr. Cod.]. Roman chamomile; the *Anthemis nobilis*. [B, 121.]—**C. tinctoriale.** See *C. des teinturiers*.—**Conserve de c.** See *Conserva* CHAMÆMELI.—**Décoction de c.** See *Decoction of* CHAMOMILE.—**Eau de c.** See *Eau distillée de c.*—**Eau de c. anisée.** See *Aqua* CHAMÆMELI *anisata*.—**Eau de c. vineuse.** See *Aqua florum* CHAMOMILLÆ *vinosa*.—**Eau distillée de c.** [Fr. Cod.]. A preparation made by distilling 1 part of chamomile flowers with water until 4 parts of distillate are obtained. A similar preparation (*aqua chamœmeli* [seu *chamomillæ*]), in which 2 parts of the distillate represented 1 part of the flowers, was formerly official in many formularies. [B, 113, 119.]—**Essence de c.** Volatile oil of chamomile. [B.]—**Extrait alcoolique de c.** An alcoholic extract made by evaporating a tincture of chamomile flowers; official in several old formularies. [B, 119.]—**Extrait aqueux de c., Extrait de c.** [Fr. Cod.]. An aqueous extract made from chamomile flowers. [B, 113.] See *Extractum* ANTHEMIDIS.—**Fausse c.** See *C. des champs*.—**Grande c.** The *Pyrethrum* (*Matricaria*) *parthenium*. [B, 93.]—**Huile de c.** [Fr. Cod.]. Lat., *oleum anthemidis*. A preparation made by digesting 1 part of chamomile flowers in 10 parts of olive-oil on a water-bath, and filtering. Similar preparations (*oil of chamomile by coction, oleum chamœmelinum*) were formerly official in several pharmacopœias. [B, 113, 119.]—**Huile de c. camphrée** [Fr. Cod.]. Lat., *oleum anthemidis camphoratum*. A solution of 1 part of finely divided camphor in 9 parts of *huile de c.* [B, 113.]—**Huile de c. par coction.** See *Huile de c.*—**Huile de c. pétrolée.** See *Oleum cœruleum* CHAMÆMELI *compositum*.—**Huile essentielle de c.** Volatile oil of chamomile. [B, 119.]—**Huile essentielle de c. citronée.** See *Oleum* CHAMÆMELI *citratum*.—**Huile volatile de c.** [Fr. Cod.]. Volatile oil of chamomile. [B, 113.]—**Hydrolat de c.** See *Aqua* CHAMÆMELI.—**Hydrolé de c.** See *Tisane de c.*—**Infusion de c.** See *Tisane de c.* and *Infusum* ANTHEMIDIS.—**Infusion de c. composée.** See *Compound infusion of* CHAMOMILE.—**Oléo-sucre de c.** See *Elæosaccharum* CHAMÆMELI.—**Oléule de c.** Volatile oil of chamomile. [B, 119.]—**Petite c.** See *C. commune*.—**Poudre de c.** [Fr. Cod.]. Dried chamomile leaves powdered in an iron mortar and passed through a sieve of 120 meshes to the inch (Fr.). [B, 113.]—**Sirop d'eau distillée de c.** A solution of 2 parts of sugar in 1 part of aqua chamæmeli. [Antw. Ph., 1812 (B, 119).]—**Sirop de c.** [Fr. Cod.], **Sirop d'infusion de c.** A syrup made by infusing 100 parts of chamomile flowers in 1,500 of boiling distilled water, straining, decanting, adding 18 of sugar to 10 of the infusion, and boiling. Similar preparations (*syrupus chamœmeli*, etc.) were formerly official in several formularies. [B, 113, 119.]—**Teinture de c.** See *Tinctura* CHAMÆMELI.—**Tisane de c.** [Fr. Cod.]. An infusion of 5 parts of chamomile flowers in 1,000 of boiling distilled water. [B, 113.] See *Infusum* ANTHEMIDIS.

CAMOMILLÈNE (Fr.), n. Ka^{3}m-o-mi^{2}l-e^{2}n. An oxidation product of volatile oil of chamomile. [A, 301, 385.]

CAMON (Lat.), n. m. Ka(ka^3)'mo^{2}n(mon). Gen., *camon'os* (*-is*). Gr., *κάμων*. Scammony. [A, 322.]

CAMONA (Sp.), n. Ka^{3}m-o'na^3. In Peru, the *Iriarta deltoidea*. [B, 121.]

CAMOOYNE, n. The *Anthemis nobilis* and *Anthemis cotula*. [B, 275.]

CAMOTE [Mex. Ph.] (Sp.), n. Ka^{3}m-o'ta. The *Ipomœa batatas*. [B, 19, 88.] See AMOTES.

CAMOUBROULOE (Carib), n. The *Convolvulus brasiliensis*. [B, 121.]

CAMOVYNE, CAMOWYNE, n's. See CAMOOYNE.

CAMPAGNE (Fr.), n. Ka^{3}m-pa^{3}n. A place in the department of the Aude, France, where there are hot saline and chalybeate springs. [A, 319; L, 105.]

CAMPAGNOUL (Fr.), **CAMPAGNOULE** (Fr.), n's. Ka^{3}m-pa^{3}n-yul. In the south of France, several species of *Agaricus*. [B, 121.]

CAMPAINHA (Port.), n. Ka^{3}m-pa^3'en-ya^3. The *Convallaria maialis*. [B, 121.]—**C. amarella.** The *Digitalis purpurea*. [a, 14.]

CAMPAIROLE (Fr.), n. Ka^{3}m-pa^{2}r-ol. The *Agaricus cæsareus*. [B, 121.]

CAMPANA (Lat.), n. f. Ka^{2}m(ka^{3}m)-pa(pa^3)'na^3. Gr., *κώδων*. Fr., *cloche*. Ger., *Glocke*. 1. A bell-glass; a bell-shaped vessel, especially one used in making sulphuric acid. [A, 325; L, 107, 119.] 2. A name applied to various plants with bell-shaped flowers (*e. g.*, the *Campanulæ*, certain *Solanaceæ*, the *Narcissus pseudo-narcissus*, and *Inula helenium*). [B, 121.]

CAMPANACEÆ (Lat.), n. f. pl. Ka^{2}m(ka^{3}m)-pa^{2}n(pa^{3}n)-a-(a^3)'se^2(ke^2)-e(a^3-e^2). 1. Of Linnæus, a natural order of plants, comprising *Evolvulus*, *Convolvulus*, *Ipomœa*, *Polemonium*, *Campanula*, *Lobelia*, *Viola*, and other genera now referred to several different orders. 2. Of Scopoli, a genus of the *Campanulatæ*, comprising *Campanula* and other genera now referred to the *Campanulaceæ*. [B, 170.]

CAMPANACEI [Linnæus] (Lat.), n. m. pl. Ka^{2}m(ka^{3}m)-pa^{2}n-(pa^{3}n)-a(a^3)'se^2(ke^2)-i(e). See CAMPANACEÆ (1st def.).

CAMPANACEOUS, adj. Ka^{2}m-pa^{2}n-a'shu^{3}s. Lat., *campanaceus*. See CAMPANULATE.

CAMPANAL, adj. Ka^{2}m'pa^{2}n-a^{2}l. Lat., *campanalis*. Of, pertaining to, or resembling the genus *Campanula*. [B.]—**C. alliance.** Lat., *nixus campanalis*. See CAMPANALES (2d and 3d def's).

CAMPANALES (Lat.), n. f. pl. Ka^{2}m(ka^{3}m)-pa^{2}n(pa^{3}n)-a(a^3)'-lez(le^{2}s). 1. Of Batsch, an order of the *Liliaceæ*, comprising the families *Hyacinthinæ*, *Aloideæ*, *Bromeliæ*, *Draconeæ*, and *Tulipaceæ*. 2. Of Lindley, (1833), an alliance of the *Epigynæ*. comprising the orders *Lobeliaceæ*, *Campanulaceæ*, *Belvisieæ*, and *Columelliaceæ*. 3. Of Lindley (1847), an alliance of epigynous exogens, including the orders *Campanulaceæ*, *Lobeliaceæ*, *Goodeniaceæ*, *Stylidiaceæ*, *Valerianaceæ*, *Dipsacaceæ*, *Calyceraceæ*, and *Asteraceæ*. 4. Of Bentham and Hooker, a cohort of the *Gamopetalæ*, comprising the orders *Stylidieæ*, *Goodenovieæ*, and *Campanulaceæ* (including the *Lobelieæ*). [B, 42, 170.]

CAMPANATÆ (Lat.), n. f. pl. Ka^{2}m(ka^{3}m)-pa^{2}n(pa^{3}n)-a(a^3)'-te(ta^3-e^2). Of Necker, a group of plants, comprising *Jasione* and *Campanula*. [B, 121.]

CAMPANE (Fr.), n. Ka^{3}m-pa^{3}n. 1. The genus *Campanula*. 2. A rounded tumor of the hock in horses. [A, 301, 385.]

CAMPANELLE (Fr.), n. Ka^{3}m-pa^{3}n-e^{2}l. The *Convolvulus arvensis*. [B, 121.]

CAMPANELLATE, adj. Ka^{2}m-pa^{2}n'e^{2}l-at. Fr., *campanellé*. See CAMPANULATE.

CAMPANÉLO, n. A Languedoc name for several species of *Campanula*. [B, 121.]

CAMPANETO, n. A Languedoc name for several species of *Convolvulus* and for other plants with bell-shaped flowers. [B, 121.]

CAMPANETTA (It.), **CAMPANETTI** (It.), n's. Ka^{3}m-pa^{3}n-e^{2}t'ta^3, -te. The *Convolvulus arvensis*. [B, 121.]

CAMPANG-SAPPADOE, n. In Java, the *Hibiscus rosa sinensis*. [B, 121.]

CAMPANIEÆ (Lat.), n. f. pl. Ka^{2}m(ka^{3}m)-pa^{2}n(pa^{3}n)-i(i^2)'e^2-e(a^3-e^2). Of G. Don, a tribe of the *Goodenovieæ*, comprising only *Pentaphragma*. [B, 121, 170.]

CAMPANIFLOROUS, adj. Ka^{2}m-pa^{2}n-i^2-flor'u^{3}s. Lat., *campaniflorus* (from *campana*, a bell, and *flos*, a flower). Fr., *campaniflore*. Ger., *glockenblüthig*. Having bell-shaped flowers. [L, 41.]

CAMPANIFORM, adj. Ka^{2}m-pa^{2}n'i^2-fo^{2}rm. Lat., *campaniformis* (from *campana*, a bell, and *forma*, form). Fr., *campaniforme*. Ger., *glockenförmig*. Having a regular bell-shape (said especially of a calyx or corolla). [B, 121.]

CAMPANIFORMÆ (Lat.), **CAMPANIFORMES** [Linnæus] (Lat.), n's f. pl. Ka^{2}m(ka^{3}m)-pa^{2}n(pa^{3}n)-i^2-fo^{2}rm-e(a^3-e^2), -ez(e^{2}s). The first class of plants in Tournefort's classification, comprising *Atropa*, *Mandragora*, etc. [B, 1, 170.]

CAMPANILE (Fr.), n. Ka^{3}m-pa^{3}n-el. See CAMPANULA.

CAMPANILIFORM, adj. Ka^{2}m-pa^{2}n-i^{2}l'i^2-fo^{2}rm. See CAMPANIFORM.

CAMPANILLA (Sp.), n. Ka^{3}m-pa^{3}n-el'ya^3. The genus *Campanula*; applied also in the Spanish colonies to several convolvulaceous plants. [B, 121.]

CAMPANIOLA, n. In Languedoc, the *Agaricus fimetarius*. [B, 121.]

CAMPANULA (Lat.), n. f. Ka^{2}m(ka^{3}m)-pa^{2}n(pa^{3}n)'u^2(u^4)-la^3. Dim. of *campana*, a bell. Fr., *campanule*, *clochette*. Ger., *Glockenblume*. 1. A name applied by the older botanists to various plants with bell-shaped flowers, including *C.* (2d def.). 2. Of Linnæus, the blue-bell; a genus of campanulaceous plants of the tribe *Campanuleæ*, having blue or white flowers. [B, 121, 215.] 3. In zoology, a bell-shaped structure. [L.] See. *C. Halleri*.—**C. aggregata** [Reichenbach], A variety of *C. glomerata*. [B, 214.]—**C. alba.** Of the older botanists, the *Convolvulus sepium*. [B, 121.]—**C. alpina linifolia cærulea** [Bauhin]. The *C. rotundifolia*. [B, 211.]—**C. angustifolia cærulea** [Bauhin]. The *C. persicifolia*. [B, 211.]—**C. arvensis** [Persoon]. The *C. speculum*. [B, 173.]—**C. autumnalis.** Of the older botanists, the *Gentiana pneumonanthe*. [B, 121.]—**C. bononiensis** [Linnæus]. A perennial species occurring in eastern Europe and western Asia, of which several varieties are described. The leaves were formerly applied like those of *C. trachelium*, and were sometimes called *folia cervicariæ majoris*. [B, 180, 214.]—**C. canariensis** [Linnæus]. The *Canarina c.* [B, 173, 214.]—**C. cervicaria** [Linnæus. Ger., *mittleres Halskraut, borstige Glockenblume, Generkraut*. A biennial species growing in temperate and northern Europe and in Siberia. The leaves (*folia cervicariæ minoris*) were formerly employed in inflammations of the throat. [B, 180, 214.]—**C. cervicarioides** [Römer and Schultes]. A variety of *C. glomerata*. [B, 214.]—**C. chilensis** [Presl and Molin]. The *Wahlenbergia linarioides*. [B, 180, 214.]—**C. collina** [Bieber]. A Caucasian species, by some identified with *C. glomerata*. [B, 173, 214.]—**C. cordata** [Vis.]. The *Specularia speculum*. [B, 214.]—**C. decurrens** [Linnæus]. The *C. persicæfolia*. [B, 214.]—**C. elliptica** [Kitaibel]. A variety of *C. glomerata*. [B, 214.]—**C. exotica** [Ald.]. The *Convolvulus tricolor*. [B, 214.]—**C. filiformis** [Ruíz and Pavón]. The *Wahlenbergia linarioides*. [B, 180, 214.]—**C. flore conglomerato.** The *C. glomerata*. [B, 211.]—**C. glauca** [Thunberg]. An imperfectly known Japanese species. The milky root is eaten and employed like ginseng. [B, 180, 214.]—**C. glomerata** [Linnæus]. A species indigenous to Europe and Asia and sparingly naturalized in the United States, of which several varieties are described. The leaves (*folia cervicariæ minoris*) were formerly used in inflammations of the throat, and the Russians considered the plant a remedy for rabies. [B, 173, 180, 214, 215.]—**C. graminifolia** [Linnæus]. The *Wahlenbergia graminifolia*. [B, 42, 180, 214.]—**C. Halleri.** A pyriform enlargement, against the posterior surface of the lens, of the processus falciformis in certain fishes. [L, 200.]—**C. hirta** [Römer and Schultes]. A variety of the *Specularia speculum*. [B, 215.]—**C. hortensis** [Meerburgh]. The *C. rapunculoides*. [Duchesne (B, 173).]—**C. hortensis folio et flore oblongo** [Bauhin]. The *C. medium*. [B, 211.]—**C. hortensis rapunculi radice** [Bauhin]. See *C. hortensis*.—**C. indica** [Bauhin]. The *Convolvulus purpureus*. [B, 211.]—**C. latifolia** [Linnæus]. A perennial species growing in Europe, Persia, and Nepal, having an edible root. [B, 180, 214.]—**C. lilifolia** [Linnæus]. Syn.: *Floerkea lilifolia* [Sprengel]. A Siberian species with an edible root, properly referred to *Adenophora*. [B, 42, 173, 214.]—**C. linarioides** [Lamarck]. The *Wahlenbergia linarioides*. [B, 180, 214.]—**C. lutea.** Of the older botanists, the *Linum campanulatum*. [B, 121.]—**C. major vulgatior**, etc. [Morison]. The *C. trachelium*. [B, 211.]—**C. medium.** Fr., *carillon, violette de Marie* (ou *marine*). Syn.: *Viola mariana*. Canterbury bells; a biennial species growing in mountainous places in Europe, having an edible root. [B, 121, 180, 214.]—**C. minima flore cæruleo** [Rudb.], **C. minor** [Lamarck], **C. minor rotundifolia alpina** [Bauhin], **C. minuta** [Savi]. The *C. rotundifolia*. [B, 173, 211, 214.]—**C. nutans.** 1. Of Lamarck, according to Duchesne, the *C. rapunculoides*. 2. Of Sieber, a species now referred to *Symphyandra*. [B, 173, 214.]—**C. pentagonia** [Linnæus], **C. pentagonia flore amplissimo thracica** [Tournefort]. The *Specularia pentagonia*. [B, 173, 214.]—**C. persicæfolia** [Linnæus], **C. persicifolia** [Linnæus]. Syn.: *Rapunculus persicifolius magno flore* [Bauhin]. A European species, considered edible. [B. 121, 173, 214.]—**C. pratensis flore conglomerato** [Bauhin]. The *C. glomerata*. [B, 211.]—**C. pyramidalis** [Linnæus]. A perennial species indigenous to Syria and growing in Austria. [B, 121, 214.]—**C. radice esculenta, flore cæruleo** [Herm.] The *C. rapunculus*. [B, 211.]—**C. rapunculoides** [Linnæus]. Fr., *fausse raiponce, raiponcette*. A perennial species indigenous to Europe and naturalized in the United States. Several varieties are described. The root is edible. [B, 173, 180, 214, 215.]—**C. rapunculus** [Linnæus]. Fr., *raiponce, petite raiponce de carême, bâton de Jacob, cheveux d'évêque, pied de sauterelle, rampon, rave sauvage*. Syn.: *Rapunculus esculentus* [Bauhin] (seu *vulgaris campanulatus* [Bauhin]). Rampion; a biennial species growing about the Mediterranean, having a white, fleshy, turnip-like root, which, with the young stalks, is eaten as a salad. [B, 121, 173, 180.]—**C. rotundifolia** [Linnæus]. Fr., *clochette des murs*. The hare-bell, Scotch blue-bell; a species growing along streams in the northern

THE CAMPANULA ROTUNDIFOLIA. [A, 327.]

and western United States and in British America, Europe, and northern Asia. The flowers furnish a blue coloring matter used as an ink and a pigment. [B, 173, 180, 215.]—**C. secunda** [Schmidt]. The *C. rapunculoides*. [B, 173.]—**C. serpyllifolia.** 1. Of C. Bauhin, the *Linnæa borealis*. 2. Of recent authors, a species now referred to *Edraianthus* (*Wahlenbergia*). [B, 214.]—**C. silvestris.** Of the older botanists, the genus *Digitalis*. [B, 121.]—**C. silvestris minima** [Dodonæus]. The *C. rotundifolia*. [B, 211.]—**C. speculum** [Linnæus]. The *Specularia speculum*. [B, 42, 215.]—**C. trachelium.** Fr., *gant de Notre-Dame, gantelet, gantelée, gantillier, herbe aux trachées* (ou *de Notre-Dame*), *ortie bleue*. A perennial European species. The whole plant is astringent and was formerly used as a detersive and vulnerary, the leaves (*folia cervicariæ majoris*) being especially employed in inflammations of the throat; the root and young shoots are sometimes eaten. [B, 121, 173, 180.]—**C. urticæ foliis oblongis**, etc. [Bauhin]. The *C. rapunculoides*. [B, 211.]—**C. urticifolia** [Schmidt]. The *C. trachelium*. [B, 214.]—**C. vulgaris minor** [Morison]. The *C. rotundifolia*. [B, 211.]—**C. vulgatior foliis urticæ**, etc. [Bauhin]. The *C. trachelium*. [B, 211.]

CAMPANULACEÆ (Lat.), n. f. pl. Ka^{2}m(ka^{3}m)-pa^{2}n(pa^{3}n)-u^2(u^4)-la(la^3)'se^2(ke^2)-e(a^3-e^2). Fr., *campanulacées*. Ger., *Campanulaceen*. The bell-worts; of Jussieu and succeeding authors, an order of gamopetalous dicotyledons, comprising *Campanula* and related genera. According to De Candolle, it comprises the *C. veræ* (*C.-Campanuleæ*), with a regular carolla, including the tribes *Wahlenbergieæ*, *Campanuleæ*, and *Merciereæ*; and the *Lobeliaceæ* (*C.-Lobelieæ*), with an irregular corolla, including the tribes *Delisseaceæ*, *Clintonieæ*, *Lysipomeæ*, and *Lobelieæ*. Bentham and Hooker divide the *C.* into the *Lobelieæ*, with an irregular corolla and adherent anthers; the *Cyphieæ*, with an irregular corolla and free anthers; and the *Campanuleæ*, with a regular corolla. According to Gray, who limits them to the *C. veræ* of De Candolle and the *Campanuleæ* of Bentham and Hooker, they comprise herbs with a bland, milky juice; with alternate, exstipulate, simple leaves; with regular pentamerous flowers having a gamosepalous calyx adnate to the ovary; a valvate, induplicate, or rarely imbricate gamopetalous corolla; five stamens, usually free and alternate with the corolla-lobes and each bearing a two-celled introrse anther; one style with from two to five introrse stigmas; and a two- to five-celled ovary containing numerous anatropous ovules on axile placentæ; and with a capsular fruit containing numerous small albuminous seeds with a straight axile embryo. [B, 121, 170, 215.]

CAMPANULACEOUS, adj. Ka^{2}m-pa^{2}n-u^2-la'shu^{3}s. Lat., *campanulaceus*. Fr., *campanulacé*. Of or pertaining to the genus *Campanula*; of or belonging to the *Campanulaceæ*. [B, 1.]

CAMPANULÆ (Lat.), n. f. pl. Ka^{2}m(ka^{3}m)-pa^{2}n(pa^{3}n)'u^2(u^4)-le(la^3-e^2). Of B. Jussieu and Adanson, an order of plants corresponding in part to the *Campanulaceæ*; of A. Richard, a section of that order. [B, 170.]

CAMPANULARIADÆ (Lat.), n. f. pl. Ka^{2}m(ka^{3}m)-pa^{2}n-(pa^{3}n)-u^2(u^4)-la^{2}r(la^{3}r)-i(i^2)'a^{2}d(a^{3}d)-e(a^3-e^2). See CAMPANULARIDÆ.

CAMPANULARIÆ (Lat.), n. f. pl. Ka^{2}m(ka^{3}m)-pa^{2}n(pa^{3}n)-u^2(u^4)-la(la^3)'ri^2-e(a^3-e^2). Fr., *campanulaires*. 1. Of Reichenbach, a division of the *Campanulaceæ*, comprising the subdivisions *Cyphieæ* and *Campanuleæ*. [B, 170.] 2. See CALYPTOBLASTEA.

CAMPANULARIDA (Lat.), **CAMPANULARIDÆ** (Lat.), n's n. pl. and f. pl. Ka^{2}m(ka^{3}m)-pa^{2}n(pa^{3}n)-u^2(u^4)-la^{2}r(la^{3}r)'i^{2}d-a^3, -e(a^3-e^2). A family of the *Calyptoblastea*. [L, 121, 292.]

CAMPANULARIEÆ (Lat.), n. f. pl. Ka^{2}m(ka^{3}m)-pa^{2}n-(pa^{3}n)-u^2(u^4)-la^{2}r(la^{3}r)-i(i^2)'e^2-e(a^3-e^2). See CAMPANULARIÆ.

CAMPANULATA (Lat.), n. n. pl. Ka^{2}m(ka^{3}m)-pa^{2}n(pa^{3}n)-u^2-(u^4)-la(la^3)'ta^3. Fr., *campaniformes* [Latreille]. A family of the *Polypi*. [L, 180.]

CAMPANULATÆ (Lat.), n. f. pl. Ka^{2}m(ka^{3}m)-pa^{2}n(pa^{3}n)-u^2-(u^4)-la(la^3)'te(ta^3-e^2). 1. Of Scopoli, a tribe of plants, comprising the gentes *Campanulaceæ* and *Cucurbitaceæ*. 2. Of Batsch, a family corresponding generally to the *Campanulaceæ*. [B, 121, 170.]

CAMPANULATE, adj. Ka^{2}m-pa^{2}n'u^2-lat. Lat., *campanulatus*. Fr., *campanulé*. Ger., *glockenartig*, *glockenförmig*. Bell-shaped, cup-shaped. [B, 19, 121 ; L, 147.]

CAMPANULE (Fr.), n. Ka^{3}m-pa^{3}n-u^{6}l. See CAMPANULA.

CAMPANULÉ (Fr.), adj. Ka^{3}m-pa^{3}n-u^{6}l-a. See CAMPANULATE ; as a n., in the f. pl., *C'es*, see CAMPANULEÆ.

CAMPANULEÆ (Lat.), n. f. pl. Ka^{2}m(ka^{3}m)-pa^{2}n(pa^{3}n)-u^2-(u^4)'le^2-e(a^3-e^2). Fr., *campanulées*. 1. Of J. St.-Hilaire, the *Campanulaceæ* (in the widest sense). 2. Of Sprengel and others, an order of plants, comprising *Campanula* and other genera of the *Campanulaceæ* (in the restricted sense), also *Cyphia*. 3. Of other authors, a tribe or division of the *Campanulaceæ*. As defined by Bentham and Hooker, it corresponds to the whole of the order in the restricted sense adopted by A. Gray and the continental authors ; as defined by Gray, it comprises those genera of the *Campanulaceæ* (in the restricted sense) which have usually a centripetal inflorescence, a corolla valvate or induplicate in the bud, stamens either free or adnate to the very base of the corolla, and a hairy style. [B, 42, 170, 215.]

CAMPANULIFLOROUS, adj. Ka^{2}m-pa^{2}n-u^{2}l-i^2-flor'u^{3}s. Lat., *campanuliflorus* (from *campanula*, a little bell, and *flos*, a flower). Fr., *campanuliflore*. Having bell-shaped flowers. [L, 42.]

CAMPANULINÆ (Lat.), n. f. pl. Ka^{2}m(ka^{3}m)-pa^{2}n(pa^{3}n)-u^2-(u^4)-li(le)'ne(na^3-e^2). Fr., *campanulinées*. Of Bartling, a class of the *Gymnoblasti*, comprising the orders *Goodenovieæ*, *Stylideæ*, *Lobeliaceæ*, and *Campanulaceæ*. Endlicher, who made it a class of the *Acramphibrya gamopetala*, and Meissner, who made it a class of the *Diplochlamydeæ*, divided it into the orders *Brunoniaceæ*, *Goodeniaceæ*, *Lobeliaceæ*, *Campanulaceæ*, *Pongatieæ*, and *Stylideæ*. [B, 170.]

CAMPANULINÉ (Fr.), adj. Ka^{3}m-pa^{3}n-u^6-le-na. Campanulate ; as a n., in the f. pl., *c'es*, the *Campanulinæ* or the *Campanulineæ*. [B, 88.]

CAMPANULINEÆ (Lat.), n. f. pl. Ka^{2}m(ka^{3}m)-pa^{2}n(pa^{3}n)-u^2(u^4)-li^{2}n'e^2-e(a^3-e^2). Fr., *campanulinées*. Ger., *Glockenblüthige*. Of Spach, a class of monopetalous dicotyledons, comprising the families *Campanulaceæ*, *Lobeliaceæ*, *Stylideæ*, and *Goodenovieæ* (*Goodeniaceæ*). Cf. CAMPANULINÆ. Brongniart divided it into the same families with the addition of the *Calycereæ* and *Brunoniaceæ*, and Sachs, in a recent classification, includes under it the four families of Spach and the *Cucurbitaceæ*. [B, 170, 279.]

CAMPARELLE (Fr.), **CAMPAROLE** (Fr.), n's. Ka^{3}m-pa^{3}r-e^{2}l, -ol. The *Agaricus campestris*. [B, 88, 121.]

CAMPE (Lat.), n. f. Ka^{2}m(ka^{3}m)'pe(pa). Gen., *cam'pes*. Gr., *κάμπη*. Flexion, a flexure. [A, 325, 387 ; L, 84.]

CAMPEACHY-WOOD, n. Ka^{2}m-pe'chi^2. See CAMPECHE-WOOD.

CAMPECHEHOLZ (Ger.), n. Ka^{3}m-pa'ch^{2}a-ho^{3}ltz. See CAMPECHE-WOOD.—**C'baum, Gemeiner C., Gemeiner C'baum.** The *Hæmatoxylon campechianum*. [B, 180.]

CAMPECHE-WOOD, n. Ka^{2}m-pe'che. Fr., *bois de Campêche*. Ger., *Campecheholz*. It., *campeggio*. Sp., *campeche*. Logwood ; the wood of *Hæmatoxylon campechianum*. [B, 19, 121, 180.]

CAMPECHIA [Adanson] (Lat.), n. f. Ka^{2}m(ka^{3}m)-pe(pa)'ki^2-(ch^{2}i^2)-a^3. The *Hæmatoxylon campechianum*. [B, 121.]

CAMPECHIUM (Lat.), n. n. Ka^{2}m(ka^{3}m)-pe(pa)'ki^2(ch^{2}i^2)-u^{3}m(u^{4}m). An old name for hæmatoxylin. [B, 88.]

CAMPECIA (Lat.), n. f. Ka^{2}m(ka^{3}m)-pe(pa)'si^2(ki^2)-a^3. Fr., *campécie*. Of Adanson, the *Hæmatoxylon campechianum* ; applied also to several species of *Cæsalpinia*. [B, 121.]

CAMPELIA [L. C. Richard] (Lat.), n. f. Ka^{2}m(ka^{3}m)-pe(pa)'-li^2-a^3. Fr., *campélie*. See COMMELINA.

CAMPELLA [Link] (Lat.), n. f. Ka^{2}m(ka^{3}m)-pe^{2}l'la^3. Fr., *campelle*. See DESCHAMPSIA.

CAMPEPHAGIDÆ (Lat.), **CAMPEPHAGINA** (Lat.), n's f. pl. and n. pl. Ka^{2}m(ka^{3}m)-pe^2(pa)-fa^{2}j(fa^{3}g)'i^{2}d-e(a^3-e^2), -fa^{2}j(fa^{3}g)-i-(e)'na^3. From *κάμπη*, a caterpillar, and *φαγεῖν*, to eat. The caterpillar-eaters ; a family or group of the *Dentirostrata*. [L, 121, 180.]

CAMPERNELLE (Fr.), n. Ka^{3}m-pe^{2}r-ne^{2}l. The *Narcissus odorus*. [B, 275.]

CAMPESTER (Lat.), **CAMPESTRIS** (Lat.), adj's. From *campus*, a field or plain. Fr., *champêtre*. Lit., of or pertaining to a field ; in botany, growing wild in uncultivated ground (opposed to *arvensis*). [B, 121.]

CAMPHAMIDE, n. Ka^{2}m'fa^{2}m-i^{2}d(id). See CAMPHORAMIDE.

CAMPHAMINSÄURE (Ger.), n. Ka^{3}m-fa^{3}m-en'zoir-e^2. See CAMPHORAMIC ACID.

CAMPHANIC ACID, n. Ka^{2}m-fa^{2}n'i^{2}k. Fr., *acide camphanique*. An acid first prepared by Wreden. On distillation it is converted into carbon dioxide, campholactone, and lauronolic acid. [L. Woringer "Annalen" 227, 1 ; "Jour. of the Am. Chem. Soc.," March, 1885, p. 82 (B).]

CAMPHATE, n. Ka^{2}m'fat. A salt of camphic acid. [B, 46.]

CAMPHENE, n. Ka^{2}m'fen. Lat., *camphenum*. Fr., *camphène*. Ger., *Camphen*, *Kamphen*. A name applied to a series of solid hydrocarbons of the formula $C_{10}H_{16}$, formed by heating with caustic potash and alcohol the addition products of oil of turpentine with hydrochloric acid. Four varieties are known : 1. *Lævorotary c.* (terecamphene) derived from lævorotary oil of turpentine. 2. *Dextrorotary c.* (austracamphene) derived from American oil of turpentine. 3. *Optically inactive c.*, of which there are two varieties, designated α and β, formed by the action of sodium benzoate on the hydrochloride compound of oil of turpentine. The name is also sometimes applied generically to the terebenes, which are then divided into several orders, the c's of the second order, or *camphenes*, being derived from the natural c's (or those of the first order), with which they are isomeric, by the action of acids ; and the c's of the third order, or *camphilenes*, being formed from the hydrochlorides of other c's by the action of lime or baryta. [B, 4, 38, 270.]

CAMPHENIC, adj. Ka^{2}m-fe^{2}n'i^{2}k. Fr., *camphénique*. Of or pertaining to camphene ; according to De Chambre, a term applied to the series of alcohols of the general formula $C_nH_{2n-2}O$, of which Borneo camphor is a member. [B, 93.]

CAMPHER (Ger.), n. Ka^{3}m'fe^{2}r. Camphor. [B.]—**Alantc'.** See under ALANT.—**Anemonenc'.** See ANEMONIN.—**Borneoc'.** See *Borneo* CAMPHOR.—**C'ammoniumliniment.** The linimentum ammoniato-camphoratum. [B.] See *Linimentum* CAMPHORÆ *compositum*.—**C'baum.** The *Cinnamomum camphora*. [B, 48.] —**C'cymol.** See CAMPHOR*cymene*.—**C'eis.** See CAMPHOR *ice*.—**C'essig.** See ACETUM *camphoratum*.—**C'geist.** See *Spiritus* CAMPHORÆ.—**C'liniment.** See *Linimentum* CAMPHORÆ.—**C'lorbeer, C'lorbeerbaum.** The *Cinnamomum camphora*. [B, 49.] —**C'methylsäure.** Methylcamphoric acid. [B.]—**C'milch.** See *Emulsio* CAMPHORÆ.—**C'natrium.** Sodium camphor. [B, 207.]—**C'öl.** See CAMPHOR *oil* and *Linimentum* CAMPHORÆ.—**C'ölbaum.** The *Dryobalanops*. [B, 49.]—**C'phoron.** See *Camphor*-PHORONE. —**C'quecksilbersalbe.** See *Unguentum* HYDRARGYRI *compositum*. [B, 81, p. 157.]—**C'salbe.** See *Ceratum* CAMPHORÆ.—**C'salz.** See CAMPHATE.—**C'sauer.** Of or pertaining to camphoric acid ; with the name of a base, the camphorate of that base. [B.]—**C'säure.** Camphoric acid. [B, 4.]—**C'säureanhydrid.** Camphoric anhydride. [B.]—**C'seife.** A solution of camphor in a caustic alkali or in ammonia-water. [B, 48.]—**C'seifenliniment.** See *Linimentum* SAPONIS.—**C'spiritus** [Ger. Ph.]. The spiritus camphoratus of the Ger. Ph. [B, 205.] See *Spiritus* CAMPHORÆ.—**C'wasser** (Ger.). See *Aqua* CAMPHORÆ.—**C'wein** [Ger. Ph.]. See VINUM *camphoratum*.—**C'weinsäure.** See METHYL*camphoric acid*.—**Einfachbromirter C.** See CAMPHORA *monobromata*.—**Flüchtiges C'öl.** See CAMPHOR *oil*.—**Japanc'.** See *Japan* CAMPHOR.—**Kistenc'.** Chinese camphor ; so called because exported in chests. [B, 270.]—**Künstlicher C.** See *Artificial* CAMPHOR.—**Laurineenc'.** See *Laurel* CAMPHOR.—**Linksdrehende C'säure.** Lævocamphoric acid. [B.] See CAMPHORIC *acid*.—**Linksdrehender C.** Matricaria camphor (from the *Matricaria parthenium*). [B, 48.]—**Optisch-inactive C'säure, Optisch-unwirksame C'säure.** Optically inactive camphoric (paracamphoric) acid. [B.] See CAMPHORIC *acid*.—**Rechtsdrehende C'säure.** Dextrocamphoric acid. [B.] See CAMPHORIC *acid*.—**Rohc'.** See *Crude* CAMPHOR.—**Röhrenc'.** Japanese camphor which is exported packed in bamboos. [B, 270.]—**Salicylirter C.** See CAMPHORA *salicylata*.—**Wasserfreie C'säure.** See CAMPHORIC *anhydride*.

CAMPHERENE, n. Ka^{2}m'fe^{2}r-en. Fr., *camphérène*. A camphene of the second order. [B, 38.] See under CAMPHENE.

CAMPHEROL, n. Ka^{2}m'fe^{2}r-o^{2}l. A dextrorotary derivative of camphoglycuronic acid, $C_{20}H_{16}O_4$. [A, 385.]

CAMPHERONE, n. Ka^{2}m'fe^{2}r-on. Ger., *Campheron*. See *Camphor*-PHORONE.

CAMPHERYL, n. Ka^{2}m'fe^{2}r-i^{2}l. Fr., *camphéryle* [Laurent]. See *Camphor*-PHORONE.

CAMPHIC ACID, n. Ka^{2}m'fi^{2}k. Fr., *acide camphique*. Ger., *Camphinsäure*. According to Berthelot and Montgolfier, an acid of the constitution $C_{10}H_{16}O_{21}$, formed by the action of an alcoholic solution of soda on camphor. According to other authors, probably no such acid is formed, but a substitution compound of camphor and sodium. [B, 4, 38, 207.]

CAMPHIDE, n. Ka^{2}m'fi^{2}d(fid). Of Laurent, a nucleus in which combustible hydrogen is replaced by oxygen. [B, 38 ; L, 41.]

CAMPHILENE, n. Ka^{2}m'fi^{2}l-en. Fr., *camphilène*. Ger., *Camphilen*. It., *canfilene*. An optically inactive liquid terpene, $C_{10}H_{16}$, formed by the decomposition of optically inactive camphene with lime at 200° C. The name is also applied generically to any terpene similarly formed, *e. g.*, to the camphenes of the third order. See CAMPHENE. It forms with hydrochloric acid a solid compound, $C_{10}H_{16}HCl$, like artificial camphor (*q. v.*). [B, 4, 38.]

CAMPHIMIDE, n. Ka^{2}m'fi^{2}m-i^{2}d(id). See CAMPHORIMIDE.

CAMPHIN, n. Ka^{2}m'fi^{2}n. Lat., *camphinum*. Fr., *camphine*. Ger., *Camphin*. A colorless oily liquid, $C_{10}H_8$, formed by distilling camphor with iodine. It forms substitution products with the halogens. [B, 38, 270.]—**C'bad** (Ger.). See CAMPHINE *bath*.—**C'sauer** (Ger.). Of or pertaining to camphic acid ; with the name of a base, the camphate of that base. [B.]—**C'säure** (Ger.). Camphic acid. [B, 207.]

CAMPHINE, n. Ka^{2}m'fen. A commercial term for French oil of turpentine, formerly used as an illuminating agent. [B, 38, 270.]—**C. bath.** Ger., *Camphinbad*. A bath used in Sweden, formed by the addition of 500 grammes of soda and 4 to 10 grammes of oil of turpentine to a common bath. [B, 270.]

CAMPHIQUE (Fr.), adj. Ka^{3}m-fek. See CAMPHIC ACID.

CAMPHIRE, n. Ka^{2}m'fir. 1. The *Crithmum maritimum*. 2. Of Scripture, probably the *Lawsonia alba*. 3. An obsolete form of *camphor*. [B, 117, 185, 275.]

CAMPHOCARBONATE, n. Ka^{2}m-fo-ka^{3}rb'o^{2}n-at. A salt of camphocarbonic acid. [B.]

CAMPHOCARBONIC ACID, n. Ka^{2}m-fo-ka^{3}rb-o^{2}n'i^{2}k. Fr., *acide camphocarbonique*. Ger., *Camphocarbonsäure*. A monobasic crystalline acid, $C_{11}H_{16}O_3$, or $C_{10}H_{15}O - CO.OH$, formed by the decomposition of sodium camphocarbonate. [B, 4.]

CAMPHOCRÉOSOTE (Fr.), n. Ka^{3}m-fo-kra-o-sot. A body formed, along with camphin, by decomposing camphor with iodine; according to Schweizer, probably identical with carvacrol. [B, 38.]

CAMPHOGEN, n. Ka^{2}m′fo-je^{2}n. Lat., *camphogenium.* Fr., *camphogène.* Ger., *Camphogen, Kamphogen.* Cymene formed by the action of phosphoric anhydride on camphor. [B, 38.]

CAMPHOGLYCURONIC ACID, n. Ka^{2}m-fo-gli^{2}k-u^{2}r-o^{2}n′-i^{2}k. Fr., *acide camphoglycuronique.* Ger., *Camphoglykuronsäure.* An acid, $C_{16}H_{24}O_8$, discovered by Schmiedeberg and Meyer in the urine after the ingestion of camphor. There are two isomeric varieties, α and β c. a., the former of which, is lævorotary. On treatment with dilute acids, they are converted into campherol and glycuronic acid. ["Annal. di chim.," July, 1883, p. 29 (B); B, 207.]

CAMPHOKREOSOT (Ger.), n. Ka^{3}m-fo-kra-o-zot′. See CAMPHOCRÉOSOTE.

CAMPHOL, n. Ka^{2}m′fo^{2}l. According to some, ordinary camphor, $C_{10}H_{16}O$; according to Watts, borneol, $C_{10}H_{18}O$. [B, 2, 270.]—**C'sauer** (Ger.). Of or pertaining to campholic acid; with the name of a base, the campholate of that base. [B.]—**C'säure** (Ger.). Campholic acid. [B, 4.]

CAMPHOLACTONE, n. Ka^{2}m-fo-la^{2}k′ton. A lactone, $C_9H_{14}O_2$, produced, along with lauronolic acid, by the distillation of camphanic acid; a solid melting at 50° C. [L. Woringer, "Annalen," 227, 1; "Jour. of the Am. Chem. Soc.," March, 1885, p. 82 (B).]

CAMPHOLATE, n. Ka^{2}m′fo^{2}l-at. A salt of campholic acid. [B.]

CAMPHOLENE, n. Ka^{2}m′fo^{2}l-en. Lat., *campholenum.* Fr., *campholène.* Ger., *Campholen.* An oily liquid, C_9H_{16}, formed by the action of phosphoric anhydride on campholic acid. [B, 4.]

CAMPHOLÉULE [Béral] (Fr.), n. Ka^{3}m-fo-la-u^{6}l. A mixture of 1 part of camphor and 3 parts of an essential oil. [B, 119.]

CAMPHOLIC, adj. Ka^{2}m-fo^{2}l′i^{2}k. Fr., *campholique.* Of or pertaining to camphol. [B.]—**C. acid.** Fr., *acide campholique.* Ger., *Campholsäure.* A monobasic crystalline acid, $C_{10}H_{18}O_2$, isomeric with borneol, and formed with the latter when camphor is boiled with an alcoholic solution of caustic potash. [B, 4.]—**C. alcohol.** Fr., *alcool campholique.* Borneo camphor. [B, 93.]—**C. aldehyde.** Fr., *aldéhyde campholique.* Ordinary camphor regarded as the aldehyde of campholic alcohol. [B, 93.]

CAMPHOLONE, n. Ka^{2}m′fo^{2}l-on. A substance, $C_{19}H_{34}O$, analagous to the ketones in structure, produced by the dry distillation of calcium campholate. [B, 46, 93.]

CAMPHOLURETHANE, n. Ka^{2}m fo^{2}l-u^2′re^{2}th-an. Fr., *camphol-uréthane.* Ger., *Campholurethan.* A name applied to two crystalline bodies of the composition of urethanes, physically isomeric, one of which is lævorotary and the other dextrorotary, derived from Ngai camphor. [Halles, "Bull. de la Soc. chim.," xli, 327; "Jour. of the Am. Chem. Soc.," May, 1884, p. 163 (B).]

CAMPHOMETHYLIC ACID, n. Ka^{2}m-fo-me^{2}th-i^{2}l′i^{2}k. Fr., *acide camphométhylique.* Ger., *Camphermethylsäure.* See METHYL-*camphoric acid.*

CAMPHONE, n. Ka^{2}m′fon. Cymene. [B, 2.]

CAMPHOR, n. Ka^{2}m′fo^{2}r. From old Lat., *caphura,* from Ar., *Kâfûr,* and this probably from Sansc. *karpura,* white. [B, 18.] Lat., *camphora, camphora depurata* [Finn. Ph.] Fr., *camphre, camphre du Japon* [Fr. Cod]. Ger., *Campher, Kampher.* It., *canfora.* Sp., *alcanfor.* Syn.: *laurinol, Chinese c.* 1. A concrete volatile oil (stearoptene), $C_{10}H_{16}O$, obtained from the wood of the *Cinnamomum camphora* by distillation with water. That exported from Formosa (Formosa or Chinese c.) comes usually in chests lined with lead foil; Japan c., which is more valued and contains fewer impurities, comes packed in bamboos. The crude c. is purified by sublimation, forming flowers of c. (*camphora depurata*), the process being performed either in glass jars, when the c. is obtained in the form of cakes, or in iron retorts, when the c. is procured in flat discs. It forms tough, white, lustrous masses, composed of tubular or prismatic doubly refracting crystals, having a peculiar, well-marked odor and taste, imparting to the mouth a sensation of warmth, followed by that of coolness. It is volatile at ordinary temperatures and burns readily with a bright, smoky flame. Thrown into water, it exhibits peculiar gyratory movements. It is readily soluble in alcohol, in ether, in chloroform, and in the fixed and volatile oils; nearly insoluble in water. Its solution is highly lævorotary. It is thought to possess stimulant, antispasmodic, and anodyne properties. Taken in excess, it acts as an irritant narcotic poison, producing epigastric pain, nausea, vomiting, maniacal delirium, and convulsions. Its structural formula, according to Kekulé, is $C_6[H_2,H(C_3H_7),H_2,H,CH_3,O]$. Other structural formulæ have been deduced; by Kachler, $CH_2.CH_2.C(C_3H_7) - CO - CH.CH_2.CH_2$; by Armstrong, $CH_2.CH_2.CH = CH - O - CH = C(CH_3).CH_2.CH.CH_3$. 2. A name applied to a series of solid volatile principles obtained by distillation from vegetable substances, having the constitution of oxygenated hydrocarbons and in many ways acting as alcohols. They comprise four classes: (*a*) Substances of the composition $C_{10}H_{20}O$, such as menthol; (*b*) substances of the composition $C_{10}H_{18}O$, (Borneo c., Ngai c., oil of valerian, oil of cajuput, and numerous other oils, together with the homologous oil of angustura, $C_{13}H_{24}O$); (*c*) substances of the composition $C_{15}H_{28}O$, (patchouli c., etc.); (*d*) substances of the composition $C_{10}H_{16}O$, (ordinary c., Matricaria c., alant c., oil of eucalyptus, oil of wormwood, etc.). [B, 4, 5, 172, 270.]—**Acid of c.** An old name for camphoric acid. [B, 86.]—**Acidulated mixture of c.** See *Mixtura e* CAMPHORA *cum aceto.*—**Alyxia c.** See under ALYXIA.—**Anise c.** See ANISE *c.* and ANETHOL.—**Artificial c.** Fr., *camphre artificiel.* Ger., *künstlicher Campher.* A terpene hydrochloride, $C_{10}H_{16}HCl$. formed by the action of hydrochloric acid on oil of turpentine; a solid closely resembling ordinary c. [B, 4, 270.] See also *Liquid artificial c.*—**Asarabacca c., Asarum c.** See ASARONE.—**Barosma c.** Diosphenol; a stearoptene, $C_{14}H_{22}O_3$, of a somewhat aromatic odor and peculiar taste. [B, 5, 81, 303.]—**Barus c.** See *Borneo c.*—**Bergamot c.** See BERGAPTENE.—**Birch c.** See BETULIN.—**Blumea c.** See *Ngai c.*—**Bornean c., Borneo c.** Fr., *camphre de Bornéo.* Ger., *Borneocampher.*: Syn.: *borneol.* A substance, $C_{10}H_{18}O$, of the structural formula $C_6[H_2,H(C_3H_7),H_2,H,CH_3,H,OH]$, derived from the *Dryobalanops aromatica* and obtained from ordinary c. by heating with an alcoholic solution of caustic potash; brittle, white, transparent crystalline masses, less volatile and harder and more solid than ordinary c.; readily soluble in alcohol and in ether, insoluble in water; dextrorotary. By oxidation with nitric acid it is converted into ordinary c., which stands to it in the relation of a ketone to an alcohol. An isomeric compound distinguished from Borneo c. by being lævorotary (lævorotary borneol) is contained in the spirit distilled from madder-root. Borneo c. is much more costly than ordinary c., and is rarely exported. It is used in Japan, China, and the East Indies as a medicine and in embalming. [B, 4, 172, 270.] See also *C. oil of Borneo.*—**Bromated c., Brominated c., Brominized c., Bromized c.** See CAMPHORA *monobromata.*—**C. balls.** See *C. cakes.*—**C. bibromide.** See *C. dibromide.*—**C. bromide.** See CAMPHORA *monobromata.*—**C. cakes.** Balls of spermaceti, white wax, and olive-oil mixed with small pieces of camphor and melted together. [L, 120.]—**C. cerate.** See *Ceratum* CAMPHORÆ.—**C.-chloral.** See under CHLORAL.—**C'cymene.** Ger., *Camphercymol.* Cymene obtained from camphor. [Ziegler, "Arch. f. exp. Path. u. Pharmakol.," 1873 (B).]—**C. dibromide.** Fr., *bibromure de camphre.* Ger., *Campherdibromür.* An addition product, $C_{10}H_{16}OBr_2$, of c. and bromine, formed by the interaction of these two substances, and hence prepared in the manufacture of monobromated c. [B, 81.]—**C. dihydrochloride.** A crystalline compound, $C_{10}H_{14}.HCl_2$, of c. and hydrochloric acid, formed by the action of phosphoric chloride on c. [B, 4.]—**C. emulsion.** See *Emulsio* CAMPHORÆ.—**C.-gland.** See under GLAND.—**C. hydrochlorate, C. hydrochloride.** A compound of c. and hydrochloric acid, $C_{10}H_{14}.HCl$, formed by the action of phosphoric chloride on c. [B, 4.]—**C. ice.** Ger., *Camphereis.* A cosmetic preparation made by melting together 16 parts of white wax and 48 of benzoated suet, and adding 8 parts of c. and 1 part of oil of lavender. [B, 81.]—**C. julep.** See *Mixtura* CAMPHORÆ.—**C. laurel.** Ger., *Campherlorbeerbaum.* The *Cinnamomum camphora.* [B, 81.]—**C. liniment** (U. S. Ph., Br. Ph.). See *Spiritus* CAMPHORÆ.—**Tub c.** Japan c., so called because imported in tubs. [B, 81.]—**Turpentine c.** Terpin. a compound, $C_{10}H_{20}O_2$, obtained by treating oil of turpentine with alcohol and nitric acid. [B, 81.]—**Wine of c.** See VINUM *camphoratum*.

CAMPHORA (Lat.), n. f. Ka[2]m(ka[3]m)-fo'ra[3]. 1. Camphor; the official term for Chinese camphor in the U. S. Ph., the Br. Ph., and most of the continental pharmacopœias. [B, 95.] 2. In botany a genus of plants, made by Nees, equivalent to *Cinnamomum*; of Meissner, a section of that genus. [B, 121.]—**Acetum camphoræ.** See ACETUM *camphoratum*. ACIDUM ACETICUM *camphoratum*, and *Mixtura e c. cum aceto*.—**Alcohol camphoræ saponaceum.** The linimentum saponato-camphoratum. [B.] See *Linimentum* SAPONIS.—**Aqua camphoræ** [U. S. Ph., Br. Ph.]. Fr., *eau camphrée*. Ger., *Campherwasser*. It., *acqua di canfora*. Sp., *agua de alcanfor*. Syn.: *aqua camphorata* [Fr. Cod.]. Camphor-water; a solution of camphor in water. In the U. S. Ph. preparation, 8 parts of camphor are dissolved in 1,000 of water, the camphor being first finely subdivided by solution in alcohol and diffusion through cotton; in the Br. Ph. preparation, a little over 3 parts of powdered camphor are treated with 1,000 of water; in the Fr. Cod. preparation, 2 parts of camphor are powdered and washed with 1,000 of water. [B, 5, 113.]—**C. bromata** [Russ. Ph.]. See *C. monobromata*.—**C. capensis.** Of the pharmacists, the *Osmites camphorina*. [B, 121.]—**C. carbolisata.** Fr., *camphre phénolé*. Ger., *Phenolcampher*. An oily, colorless liquid, miscible with oils, but not with water or alcohol, obtained by rubbing up 100 parts of camphor with a solution of 36 of carbolic acid in 4 of alcohol; used instead of carbolic acid as an antiseptic, both locally and internally. It has been particularly applied in diphtheria. [B, 81, 107.]—**C. de Baros, C. de Borneo.** See *Borneo* CAMPHOR.—**C. chinensis.** See *Chinese* CAMPHOR.—**C. cruda.** See *Crude* CAMPHOR.—**C. depurata** [Finn. Ph.]. Camphor purified for medicinal use. [B, 95.]—**Camphoræ hydrochloras.** See CAMPHOR *hydrochloride*.—**C. elaborata.** See *Refined* CAMPHOR.—**Camphoræ elixir.** See AQUA *pestilentialis*.—**Camphoræ flores.** See *Flowers of* CAMPHOR.—**Camphoræ flores compositi.** Camphor sublimed with benzoin. [L, 119.]—**Camphora glandulifera** [Nees and Wallich]. The *Cinnamomum glanduliferum*. [B, 214.]—**C. inuncta** [Nees]. The *Cinnamomum inunctum*. [B, 214.]—**C. japonica.** See *Japanese* CAMPHOR.—**C. monobromata** [U. S. Ph.]. Fr., *camphre monobromé* [Fr. Cod.]. Ger., *Monobromcampher*, *einfach bromirter Campher*. It., *canfora monobromurata*. Sp., *alcanfor monobromurado*. Syn.: *c. bromata* [Russ. Ph.], *monobromated camphor*, *monobromcamphor*. A compound, $C_{10}H_{15}BrO$, formed by the action of bromine on camphor heated upon the water-bath; a colorless, crystalline substance of camphoraceous odor and taste, insoluble in water, soluble in alcohol, in ether, in chloroform, and in the fixed oils; used as a sedative in delirium tremens and related conditions. [B, 4, 270.]—**C. officinarum.** 1. Of C. Bauhin, the *Cinnamomum c.* 2. Of the Fr. Cod., ordinary c. [B, 113, 214.]—**C. parthenoxylon** [Nees]. The *Cinnamomum parthenoxylon*. [B, 214.]—**C. phenolata.** See *C. carbolisata*.—**C. pseudo-sassafras** [Miquel]. The variety β *glaucescens* of the *Cinnamomum c.* and the *Cinnamomum pseudo-sassafras*. [B, 214.]—**C. purificata.** See *Magisterium camphoræ* and *C. depurata*.—**C. raffinata.** See *Refined* CAMPHOR.—**C. rudis.** See *Crude* CAMPHOR.—**C. salicylata.** Fr., *camphre salicylé*. Ger., *salicylirter Campher*. Salicylated camphor; a colorless, oily liquid made by heating together on a water-bath 84 parts of camphor and 65 of salicylic acid; or made up of equal parts of salicylic acid and camphor mixed with a little alcohol and some vaseline; used as an application for weak and phagedænic ulcers. [B, 81.]—**C. sumatrana** [Miquel]. The *Cinnamomum sumatranum*. [B, 214.]—**C. sumatrensis.** See *Borneo* CAMPHOR.—**Ceratum camphoræ** [U. S. Ph.]. Fr., *cérat camphré*. Ger., *Camphersalbe*. It., *cerato canforato*. Syn.: *ceratum camphoratum* [Belg. Ph.]. Camphor cerate; a mixture of 3 parts of camphor liniment, 12 of olive-oil, and 85 of cerate [U. S. Ph.], or of 10 of camphor and 90 of simple cerate [Belg. Ph., 1854]. [B, 10, 81.] Cf. UNGUENTUM *camphoratum*.—**Elixir camphoræ.** See AQUA *pestilentialis*.—**Emulsio camphoræ** [Swed. Ph.]. Fr., *émulsion camphrée*. Ger., *Camphermilch*. Syn.: *emulsio camphorata* [Finn. Ph.]. An emulsion made of 1 part of camphor and 12 parts each of blanched almonds and sugar, official in the Ed. Ph., 1826. Similar preparations made with camphor, mucilage, and simple emulsion, or with camphor mixed with water, were official in a number of the older formularies, and the preparation of the Finn. Ph. and the Swed. Ph. is in like manner made of camphor, gum arabic, and simple emulsion, that of the Sp. Ph. being made of camphor, sweet almonds, sugar, and water. [B, 95, 97, 119.]—**Gummi c.** See CAMPHOR (1st def.).—**Julapium e c.** See *Mixtura camphoræ*.—**Julapium e c. cum aceto.** See *Mixtura e c. cum aceto*.—**Linimentum camphoræ** [U. S. Ph., Br. Ph.]. Camphor liniment; camphorated oil; a preparation consisting of 1 part of camphor dissolved in 4 parts of cotton-seed oil [U. S. Ph.]; or of 1 oz. (av.) of camphor dissolved in 4 fl. oz. of olive-oil [Br. Ph.]. The German and French preparations are composed of 1 part of camphor dissolved in 9 parts of olive-oil. Similar preparations in which 1 part of camphor was dissolved in from 1 to 16 parts of olive, linseed, or rape-seed oil were formerly official. Employed as a stimulant and anodyne application to bruises and sprains and in rheumatism and other painful affections. One variety, official in the Disp. fuldens., 1791, made by dissolving 1 part of camphor in 8 parts of oil of ben, was also used internally in doses of from 3 to 6 drops. [B, 5, 97, 113, 119, 205.]—**Linimentum camphoræ ammoniatum, Linimentum camphoræ compositum** [Br. Ph.]. Compound liniment of camphor; made by dissolving 2¼ oz. (av.) of camphor and 1 fluidrachm of oil of lavender in 15 fl. oz. of rectified spirit, and adding 5 fl. oz. of strong solution of ammonia [Br. Ph.]. It contains about 1 part in 8 of camphor. The corresponding German preparation, the *linimentum ammoniato-camphoratum*, is made up of 1 part of caustic solution of ammonia, 1 part of oil of poppies, and 3 parts of camphorated oil (containing 0·3 part of camphor). It contains about 1 part in 17 of camphor. The French preparation, *liniment ammoniacal camphré*, is made up of 1 part of concentrated ammonia solution and 9 parts of camphorated oil, and contains about 1 part in 11 of camphor. [B, 5, 113, 205.]—**Magisterium camphoræ.** Fr., *magistère de camphre*. Camphor purified by washing with water and drying. [B, 119.] Cf. *C. depurata*.—**Mixtura camphoræ.** Fr., *julep camphré*. Syn.: *julapium camphoratum*, *mixtura camphorata*. A mixture made by rubbing up ½ drachm of camphor with 10 minims of rectified spirit, and adding a pint of water [Lond. Ph., 1824]; or by rubbing 20 grains of camphor with 10 drops of the spirit, and adding ½ oz. of sugar and 1 pint of water [U. S. Ph., 1820, Dubl. Ph., 1830]. Similar preparations, in which the camphor, with or without the addition of the water to pulverize it, was triturated with mucilage, elder honey, or gum arabic and sugar, were formerly official in a number of formularies. [B, 97, 119.]—**Mixtura camphoræ cum magnesia** [Dubl. Ph., 1830]. A preparation made by triturating 12 grains of camphor with 30 of magnesium carbonate and adding 6 oz. of water. [B, 97.]—**Mixtura e c. cum aceto.** Syn.: *julapiam e c. cum aceto*. A preparation made by pulverizing 1 part of camphor with a little alcohol and adding 2 parts each of gum arabic and water and 128 of vinegar [Palat. Disp., 1764; Würtemb. Ph., 1798; Oldenb. Ph., 1801]. or by adding to the camphor, pulverized with alcohol, 4 parts of gum arabic, 6 of sugar, 8 of vinegar, and 96 of water [Mil. Ph. of Copenh., 1818]. [B, 97.]—**Oleum camphoræ.** 1. Of the U. S. Ph., 1870, see CAMPHOR *oil*. 2. See *Oleum camphoræ nitricatum*.—**Oleum camphoræ factitium, Oleum camphoræ nitricatum.** Fr., *nitrate de camphre*. The oily liquid obtained by saturating camphor with nitric acid; formerly employed internally in chronic pleurisy and locally as a stimulant application in rheumatism and paralysis. [B, 119.]—**Pulvis camphoræ** [Fr. Cod.]. See *Poudre de* CAMPHRE.—**Solutio camphoræ ætherea.** Fr., *teinture éthérée de camphre* [Fr. Cod.], *Ether camphré*. Syn.: *tinctura ætherea camphorata* [Fr. Cod.], *liquor nervinus Bangii*, *spiritus sulphurico-æthereus camphoratus*, *naptha vitrioli camphorata*. A solution of 1 part of camphor in from 2 to 9 parts of ether (the Fr. Cod. prescribing 9 parts): official in several formularies. Similar preparations, in which a mixture of alcohol and ether or the compound spirit of ether formed the excipient, were formerly official. [B, 97, 113, 119.] See also AQUA *camphorata ætherea*.—**Solutio camphoræ aquosa.** See *Aqua camphoræ*.—**Solutio camphoræ oleosa.** See *Linimentum camphoræ*.—**Spiritus camphoræ** [U. S. Ph., Br. Ph.]. Fr., *alcoolé* (ou *teinture*) *de camphre*, *alcool camphré*, *eau-de-vie camphrée*. Ger., *Camphergeist*, *Campherspiritus* [Ger. Ph.]. It., *spirito canforato*, Sp., *espiritu alcanforado*. Syn.: *tinctura camphoræ*, *spiritus camphoratus* [Ger. Ph.], *alcohol camphoratum*, *alcool camphoratus* [Fr. Cod.]. Spirit of camphor; made by dissolving 1 part of camphor in 7 parts of alcohol, and adding 2 of water [U. S. Ph., Ger. Ph.], or by dissolving 1 oz. of camphor in 9 fl. oz. of rectified spirit [Br. Ph.]. The Fr. Cod. directs two preparations: The *teinture de camphre concentrée*, in which 9 parts of 90-per-cent. alcohol, and the *teinture de camphre faible*, in which 39 parts of 60-per-cent. alcohol are employed, to dissolve 1 part of camphor. The preparations of the Austr. Ph. (1869) and the Dan. Ph. (1868–1876) contain 1 part of camphor to 9 parts of alcohol, and that of the Russ. Ph. (1880) contains 1 part of camphor to 9 parts of alcohol and 3 parts of water. Similar preparations, containing 1 part of camphor in from 6 to 50 parts of alcohol or brandy, were official in most of the older formularies. [B, 10, 81, 97, 113, 119, 205.]—**Tinctura camphoræ** [U. S. Ph., 1850; Ed. Ph., 1826]. See *Spiritus camphoræ*.—**Tinctura camphoræ composita** [Br. Ph., 1864]. See *Tinctura* OPII *camphorata*.

CAMPHORACEA (Lat.), n. f. Ka[2]m(ka[3]m)-fo[2]r(for)-a(a[3])'se[2]-(ke[2])-a[3]. The *Cinnamomum camphora*. [L, 130.]

CAMPHORACEOUS, adj. Ka[2]m-fo[2]r-a'shu[3]s. Lat., *camphoraceus*, *camphoreus*. Fr., *camphoré*. Ger., *campherartig*. Of the nature of, containing, or resembling, camphor. [A, 301.]

CAMPHORALE (Lat.). n. n. Ka[2]m(ka[3]m)-fo[2]r(for)-a(a[3])'-le(la). The *Camphorosma monspeliaca*. [A, 322.]

CAMPHORAMIC ACID, n. Ka[2]m-fo[2]r-a[2]m'i[2]k. Fr., *acide camphoramique*. Ger., *Camphoramsäure*. A monobasic crystalline acid, $C_{10}H_{17}NO_3$, or $C_8H_{14}(CO.OH)(CO.NH_2)$, or camphoric acid in which a molecule of hydroxyl is replaced by amidogen. [B, 38.]

CAMPHORAMIDE, n. Ka[2]m-fo[2]r'a[2]m-i[2]d(id). The amide of camphoric acid, $C_{10}H_{18}N_2O_2$ or $C_8H_{14}(CO.NH_2)_2$; a syrupy substance. [B, 38.]

CAMPHORAMSÄURE (Ger.), n. Ka[3]m-fo[2]r-a[3]m'zoir-e[2]. Camphoramic acid. [B, 48.]

CAMPHORANIL, n. Ka[2]m-fo[2]r'a[2]n-i[2]l. The anil of camphoric acid, $C_{16}H_{19}NO_2$, forming acicular crystals. [B, 48.]

CAMPHORANILIC ACID, n. Ka[2]m-fo[2]r-a[2]n-i[2]l'i[2]k. Fr., *acide camphoranilique*. Ger., *Camphoranilsäure*. Phenylcamphoramic acid. [B, 2.]

CAMPHORATA (Lat.), n. f. Ka[2]m(ka[3]m)-fo[2]r(for)-a(a[3])'ta[3]. 1. Of Tournefort, the genera *Herniaria* and *Camphorosma*. 2. The *Camphorosma monspeliaca*. 3. Of Commelin, the *Selago corymbosa*. [B, 121; L, 84.]—**C. hirsuta** [Mönch], **C. monspeliensium** [Crantz]. See *C.* (2d def.).—**Herba camphoratæ.** The herb of *Camphorosma monspeliaca*. [B, 180.]

CAMPHORATE, n. Ka[2]m'fo[2]r-at. A salt of camphoric acid. [B.]

CAMPHORATED, adj. Ka[2]m'fo[2]r-at-e[2]d. Lat., *camphoratus*. Fr., *camphré*. Ger., *mit Campher angemacht*. It., *canforato*. Sp., *alcanforado*. Containing camphor. [A, 301.]

CAMPHORATO-ÆTHEREUS (Lat.), adj. Ka[2]m(ka[3]m)-fo[2]r-(for)-a(a[3])''to(to[2])-e(a[3]-e)-the(the[2])'re[2]-u[3]s(u[4]s). Containing camphor and ether. [B.] See AQUA *camphorato-ætherea*.

CAMPHORATO-CROCATUS (Lat.), adj. Ka[2]m(ka[3]m)-fo[2]r-(for)-a(a[3])''to(to[2])-krok(kro[2]k)-a(a[3])'tu[3]s(tu[4]s). Containing camphor and saffron. [B, 270.]

CAMPHORATUS (Lat.), adj. Ka[2]m(ka[3]m)-fo[2]r(for)-a(a[3])'tu[3]s-(tu[4]s). See CAMPHORATED.

CAMPHORE (Fr.), n. Ka[3]m-for. See CAMPHOR (2d def.).

CAMPHORÉ (Fr.), adj. Ka[3]m-for-a. Camphoraceous; resembling the camphor-tree; as a n., in the f. pl., *c'es*, the *Camphoreæ*. [B, 38.]

CAMPHOREÆ (Lat.), n. f. pl. Ka[2]m(ka[3]m)-fo're[2]-e(a[3]-e[2]). Fr., *camphorées*. Of Nees and succeeding authors, a tribe of the *Lauraceæ*, comprising the single genus *Camphora* (*Cinnamomum*). [B, 121, 170.]

CAMPHORESIN, n. Ka[2]m-fo-re[2]z'i[2]n. Of Claus, a non-volatile substance produced by the action of iodine on camphor. [B, 2.]

CAMPHORÉSINIQUE (Fr.), adj. Ka[3]m-fo-ra-zi[2]n-ek. See CAMPHRESINIC ACID.

CAMPHORETIC ACID, n. Ka[2]m-fo[2]r-e[2]t'i[2]k. Fr., *acide camphorétique*. See CAMPHRESINIC ACID.

CAMPHOREUS (Lat.), adj. Ka[2]m(ka[3]m)-fo're[2]-u[3]s(u[4]s). See CAMPHORACEOUS.

CAMPHORIC, adj. Ka[2]m-fo[2]r'i[2]k. Lat., *camphoricus*. Fr., *camphorique*. Of or pertaining to camphor. [B.]—**C. acid.** Lat., *acidum camphoricum* (seu *camphoræ*). Fr., *acide camphorique*. Ger., *Camphersäure*. A dibasic acid, $C_{10}H_{16}O_4$; according to Wreden, tetrahydrometaxylenedicarbonic acid, $C_6(C_3H_5)H_6,H_4$-$(CO.OH)_2$; according to Strecker, $C(C_3H_7)H(CO.OH)-CH_2-CH=C(CH_3)(CO.OH)$; produced by the action of oxidizing agents, such as nitric acid, on camphor. It forms shining tabular crystals. When prepared from ordinary camphor it is dextrorotary, and is then called *dextrocamphoric acid*; when prepared from matricaria camphor it is lævorotary (*lævocamphoric acid*), and when the two varieties are mingled an optically inactive variety (*paracamphoric acid*) is produced. Another inactive variety (*mesocamphoric acid*), occurring under the form of interlaced acicular crystals, is formed by heating dextrorotary c. acid with hydrochloric acid. C. acid has been used topically in catarrhs. [M. Niesel, "Allg. med. Ctrl.-Ztg.," 1888, No. 80; B, 4, 207, 270.]—**C. anhydride.** Fr., *anhydride camphorique*. Ger., *Camphersäure-Anhydrid*. The anhydride, $C_{10}H_{14}O_3$, of c. acid; occurring as a viscous mass when the crude c. acid prepared by treating camphor with nitric acid is strongly heated. [B, 2.]—**C. oxide.** See *C. anhydride*.

CAMPHORIDE, n. Ka[2]m'fo[2]r-i[2]d(id). A substance resembling camphor. [B, 38.]

CAMPHORIFÈRE (Fr.), adj. Ka[3]m-for-i[2]-fe[2]r. Producing camphor. [B, 38.]

CAMPHORIMIDE, n. Ka[2]m(ka[3]m)-fo[2]r'i[2]m-i[2]d(id). A crystalline substance, $C_{10}H_{15}NO_2=C_8H_{14}(CO-NH-CO)$, an imide of camphoric acid; formed by distilling camphoramic acid. [B, 38.]

CAMPHORIN, n. Ka[2]m'fo[2]r-i[2]n. Fr., *camphorine*. Ger., *Camphorin*. Glyceryl camphorate; produced by heating glycerin with camphoric acid. [B, 38.]

CAMPHORINA (Lat.), n. f. Ka[2]m(ka[3]m)-for-i(e)'na[3]. A pharmaceutical name for some plants. [B.]—**C. capensis.** The *Osmites c.* [B, 121.]

CAMPHORMETHYLIC ACID, n. Ka[2]m-fo[2]r-me[2]th-i[2]l'i[2]k. Fr., *acide campho-méthylique*. Ger., *Camphermethylsäure*. See METHYL*camphoric acid*. [B.]

CAMPHOROID, CAMPHOROIDAL, adj's. Ka[2]m'fo[2]r-oid, -oid'a[2]l. Fr., *camphoroïde*. Camphoraceous; resembling camphor, as in odor. [B, 2, 121.]

CAMPHORONATE, n. Ka[2]m-fo[2]r'o[2]n-at. A salt of camphoronic acid. [B.]

CAMPHORONE, n. Ka[2]m'fo[2]r-on. Ger., *Camphoron*. See *Camphor*PHORONE.

CAMPHORONIC ACID, n. Ka[2]m-fo[2]r-o[2]n'i[2]k. Fr., *acide camphoronique*. Ger., *Camphoronsäure*. A tribasic lævorotary acid, $C_9H_{12}O_5$, formed, along with camphoric acid, by the action of nitric acid on camphor; forming white acicular microscopic crystals readily soluble in water and in alcohol. [B. 207.]

CAMPHOROSMA (Lat.), n. f. Ka[2]m(ka[3]m)-fo[2]r(for)-o[2]z(o[2]s)'-ma[3]. From *camphora*, camphor, and ὀσμή, odor. Fr., *camphorosme*. A genus of chenopodiaceous plants of the *Camphorosmeæ*, growing in southern Europe and central Asia. [B, 121, 214.]—**C. hirsuta** [Mönch], **C. monspeliaca** [Linnæus], **C. monspeliensis**, **C. perennis.** Fr., *camphrée de Montpellier*. Syn.: *camphorata*. A heath-like undershrub growing along the shores of the Mediterranean, distinguished by its feeble camphoraceous odor and warm biting taste. The leaves and tops (*herba camphorosmæ* [seu *camphoratæ*]) are regarded as carminative, diuretic, diaphoretic, and emmenagogue, and are used especially in dropsy and asthma. [A, 319; B, 121, 173, 180.]

CAMPHOROSMEÆ (Lat.), n. f. pl. Ka[2]m(ka[3]m)-fo[2]r(for)-o[2]z-(o[2]s)'me[2]-e(a[3]-e[2]). Fr., *camphorosmées*. Of Endlicher and others, a tribe of chenopodiaceous plants, including *Camphorosma* and related genera. Bentham and Hooker restrict the tribe to genera with erect embryos.

CAMPHOROUS, adj. Ka[2]m'fo[2]r-u[3]s. See CAMPHORACEOUS.

CAMPHORYL, n. Ka[2]m'fo[2]r-i[2]l. See *Camphor*PHORONE.—**C. chloride.** A liquid, $C_9H_{13}Cl$, isomeric with camphryl chloride. [B, 2.]

CAMPHOVINIC ACID, n. Ka[2]m-fo-vi'ni[2]k. Fr., *acide camphovinique*. See METHYL*camphoric acid*.

CAMPHRE (Fr.), n. Ka[3]mfr. Camphor. [B, 113.]—**Acétolé de c.** [Fr. Cod.]. See ACETUM *camphoratum*.—**Alcoolé de c.**, **Alcoolé de c. concentré** [Fr. Cod.], **Alcoolé de c. faible** [Fr. Cod.]. See under *Spiritus* CAMPHORÆ.—**Azotate de c.** See *Oleum* CAMPHORÆ *nitricatum*.—**Bibromure de c.** See CAMPHOR *dibromide*.—**Bromure de c.** See CAMPHORA *monobromata*.—**C. artificiel.** See *Artificial* CAMPHOR.—**C. bibromé.** Dibromcamphor. dibromated camphor. [B.]—**C. bromé.** See CAMPHORA *monobromata*.—**C. d'asarum.** See ASARIN.—**C. d'aunée.** See ALANT*campher*.—**C. de Bornéo.** See *Borneo* CAMPHOR.—**C. de copahu.** An optically inactive crystalline body, $C_{10}H_9Cl$, formed by the action of hydrochloric acid on copaiba. [A, 301.]—**C. de garance.** Lævorotary Borneol. [B, 46.] See under *Borneo* CAMPHOR.—**C. de girofle.** See EUGENIN.—**C. de Japon.** See *Japan* CAMPHOR.—**C. de Java.** See *Borneo* CAMPHOR.—**C. de lédum.** See *Ledum* CAMPHOR.—**C. de menthe.** See MENTHOL.—**C. des fleurs de muscade.** See MYRISTICIN.—**C. d'essence.** A stearoptene. [B, 92.]—**C. de Sumatra.** See *Borneo* CAMPHOR.—**C. de Tonka.** See COUMARIN.—**C. du Japon** [Fr. Cod.] Japan (ordinary) camphor. [B, 113.]—**C. liquide.** See CAMPHOR *oil*.—**C. minéral des goudrons.** Carbolic acid. [B, 92.]—**C. monobromé** [Fr. Cod.]. See CAMPHORA *monobromata*.—**C. monochloré.** See CHLORCAMPHOR.—**C. phéniqué, C. phénolé.** See CAMPHORA *carbolisata*.—**C. salicylé.** See CAMPHORA *salicylata*.—**Dibromure de c.** See CAMPHOR *dibromide*.—**Éléolé de c.** See *Linimentum* CAMPHORÆ.—**Esprit de c.** [Fr. Cod.]. See under *Spiritus* CAMPHORÆ.—**Éthérolé de c.** [Fr. Cod.]. See *Solutio* CAMPHORÆ *ætherea*.—**Huile volatile de c.** See CAMPHOR *oil*.—**Hydrolé de c.** See *Aqua* CAMPHORÆ.—**Hydrolé de c. éthéré.** See EAU *camphrée éthérée*.—**Magistère de c.** See *Magisterium* CAMPHORÆ.—**Monobromure de c.** See CAMPHORA *monobromata*.—**Nitrate de c.** See *Oleum* CAMPHORÆ *nitricatum*.—**Œnolé de c.** See VINUM *camphoratum*.—**Oléule de c.** See CAMPHOLÉULE.—**Oxéolé de c.** See ACETUM *camphoratum*.—**Poudre de c.** [Fr. Cod.]. Lat., *pulvis camphoræ*. A powder made by grating camphor and passing it through a No. 1 hair sieve. [B, 113.]—**Teinture de c. concentrée** [Fr. Cod.], **Teinture de c. faible** [Fr. Cod.]. See under *Spiritus* CAMPHORÆ.—**Teinture éthérée de c.** [Fr. Cod.]. See *Solutio* CAMPHORÆ *ætherea*.

CAMPHRÉ (Fr.), adj. Ka[3]m-fra. See CAMPHORATED.

CAMPHRÉE (Fr.), n. Ka[3]m-fra. See CAMPHOROSMA.—**C. de Montpellier.** See CAMPHOROSMA *monspeliaca*.

CAMPHRENATE, n. Ka[2]m'fre[2]n-at. A salt of camphrenic acid. [B, 46.]

CAMPHRENE, n. Ka[2]m'fren. Fr., *camphrène*. Ger., *Camphren*. A substance, $C_9H_{14}O$ (according to early authors $C_9H_{12}O$), isomeric or, according to Ganswindt, identical with camphorphorone (*q. v.*, under PHORONE). [B, 5, 207, 270.]

CAMPHRENIC ACID, n. Ka[2]m-fre[2]n'i[2]k. Fr., *acide camphrénique*. Ger., *Camphrensäure*. A crystalline acid, $C_9H_8O_4$, formed by the prolonged action of nitric acid on the cymene formed from camphor. [B, 207.]

CAMPHRESINIC ACID, n. Ka[2]mf-re[2]z-i[2]n'i[2]k. Fr., *acide camphrésinique*. Ger., *Camphresinsäure*. A tribasic acid, $C_{20}H_{14}O_{14}$, prepared by the prolonged action of nitric acid on oil of turpentine and camphor; a pale yellow, tenacious, turpentine-like substance, soluble in water, in alcohol, and in ether, and by warming decomposed into camphoric anhydride; probably a mixture of camphoric and camphoronic acids. [B, 2, 81, 207.]

CAMPHRETIC ACID, n. Ka[2]m-fre[2]t'i[2]k. See CAMPHRESINIC ACID.

CAMPHRIER (Fr.), n. Ka[3]m-fri[2]-a. 1. Any tree producing camphor. 2. A slang term for a brandy-drinker. [B, 38, 121, 173; L, 41.]—**C. de Bornéo.** The *Dryobalanops aromatica*. [B, 121.]—**C. du Japon.** The *Cinnamomum camphora*. [B, 121.]

CAMPHRONE, n. Ka[2]m'fron. Ger., *Camphron*. A colorless oily liquid of peculiar odor, $C_{30}H_{44}O$, formed, along with naphthaline, by passing camphor vapor over red-hot quicklime. [B, 48.]

CAMPHRYL CHLORIDE, n. Ka[2]m'fri[2]l. A colorless neutral liquid, $C_9H_{13}Cl$, produced by treating camphrene with phosphorus pentachloride; isomeric with camphoryl chloride. [B, 2.]

CAMPHURA (Lat.), n. f. Ka[2]m(ka[3]m)-fu[2]r(fur)'a[3]. See CAMPHOR.

CAMPHYL, n. Ka[2]m'fi[2]l. A suppositious univalent radical, $C_{10}H_{17}$, found in the derivatives of Borneo camphor. [Berthelot (B, 2).]—**C. alcohol.** Borneo camphor; so called from its formula, $C_{10}H_{17}OH$. [B, 9, 81, 7.]—**C. chloride.** A substance, $C_{10}H_{17}Cl$,

isomeric with artificial camphor, obtained by heating Borneo camphor in sealed tubes with hydrochloric acid. [B, 2.]—**C'säure** (Ger.). Camphoric acid. [B, 207.]

CAMPHYLENE, n. Ka^{2}m'fi^{2}l-en. See CAMPHILENE.

CAMPHYMIDE, n. Ka^{2}m'fi^{2}m-i^{2}d(id). See CAMPHIMIDE.

CAMPICOLOUS, adj. Ka^{2}mp-i^{2}k'o-lu^{3}s. From *campus*, a field, and *colere*, to inhabit. Fr., *campicole*. In zoology, living in open fields or plains. [L, 42.]

CAMPIMETER, n. Ka^{2}mp-i^{2}m'e^{2}t-u^{5}r. From *campus*, a field, and μέτρον, a measure. Fr., *campimètre*. Ger., *Campimeter*. An apparatus for measuring the field of vision; similar to the Utrecht perimeter, but in the form of a blackboard graduated on one side like the projection of a part of a hemisphere, and on the other simply in a rectangular system of co-ordinates. [F.]

CAMPIMETRIC, adj. Ka^{2}mp-i^2-me^{2}t'ri^{2}k. Fr., *campimétrique*. Ger., *campimetrisch*. Pertaining to campimetry.

CAMPION, n. Ka^{2}m'pi^2-o^{2}n. A popular name for various plants, especially of the genera *Lychnis* and *Silene*. [B, 275.]—**Berry-bearing c.** The *Cucubulus bacciferus*. [B, 275.]—**Bladder-c.** The *Silene inflata*. [B, 19, 275.]—**C. of Constantinople.** The *Lychnis chalcedonica*. [B, 19, 275.]—**Corn-c.** The *Agrostemma githago*. [B, 19.]—**Double red c.** The *Lychnis dioica*. [B, 275.]—**Meadow-c.** The *Lychnis flos cuculi*. [B, 19.]—**Moss-c.** The *Silene acaulis*. [B, 19, 275.]—**Red c.** The *Lychnis diurna*. [B, 19, 275.]—**Rose-c.** The *Lychnis (Agrostemma) coronaria*. [B, 19.]—**Senna-c.** The *Lychnis senna*. [B, 275.]—**Spanish c.** The *Silene otites*. [B, 275.]—**Starry c.** The *Silene stellata*. [B, 275.]—**White c.** The *Lychnis vespertina*. [B, 19, 275.]

CAMPKIT, n. In Cochin-China, a certain cultivated species of orange-tree. [B, 121.]

CAMPODEÆ [Meinert] (Lat.), **CAMPODEIDÆ** (Lat.), n's f. pl. Ka^{2}m(ka^{3}m)-pod(po^{2}d)'e^2-e(a^3-e^2), -e(e^2)'i^{2}d-e(a^3-e^2). A family of the *Thysanura*. [L, 196.]

CAMPOMANESIA (Lat.), n. f. Ka^{2}m(ka^{3}m)-po(po^2)-ma^{2}n-(ma^{3}n)-e(a)'zi^2(si^2)-a^3. Fr., *campomanésie*. Of Ruíz and Pavón, a genus of myrtaceous plants indigenous to tropical America. [A, 385; B, 121.]—**C. linearifolia** [Ruíz and Pavón]. Syn.: *Psidium linearifolium* [Persoon]. A Peruvian species with an edible fruit about as large as an apple. [B, 88, 173.]

CAMPOMORPHE (Fr.), adj. Ka^{3}m-po-mo^{2}rf. From κάμπη, a caterpillar, and μορφή, shape. Shaped like a caterpillar. [A, 385.]

CAMPONTIADÆ (Lat.), n. f. pl. Ka^{2}m-po^{2}n-ti(ti^2)'a^{2}d(a^{3}d)-e(a^3-e^2). Fr., *campontiens*. See TUBICOLA.

CAMPONY, n. A kind of black tea. [L, 105.]

CAMPOPHAGIDÆ (Lat.), n. f. pl. Ka^{2}m(ka^{3}m)-po(po^2)-fa^{2}j-(fa^{3}g)'i^{2}d-e(a^3-e^2). A family of the *Cichlomorphæ*. [Sundevall (L).]

CAMPSANEMA, n. An old name for rosemary. [B, 121.]

CAMPSIDE (Fr.), n. Ka^{3}mp-sed. See CAMPSIS (2d def.).

CAMPSIS (Lat.), n. f. Ka^{2}mp(ka^{3}mp)'si^{2}s. Gen., *camp'seos* (*-is*). Gr., κάμψις. Fr., *campsis* (1st def.), *campside* (2d def.). Ger., *Biegung* (1st def.), *Verbiegung* (1st def.). 1. An abnormal curvature of a limb or other part of the body. [A, 322; E; L, 41.] 2. Of Loureiro, a genus of bignoniaceous shrubs of the tribe *Tecomeæ*. [B, 121.]—**C. radicans** [Seemann]. The *Tecoma radicans*. [B, 121.]

CAMPSURUS, n. The *Sciurus vulgaris*. [L, 105.]

CAMPTELEPHAS (Lat.), n. m. Ka^{2}mp(ka^{3}mp)-te^{2}l'e^2-fa^{2}s-(fa^{3}s). Gen., *camptelephant'os* (*-is*). From καμπτός, flexible, and ἐλέφας, ivory. Ger., *biegsames Elfenbein*. Flexible (decalcified) ivory. [A, 322.]

CAMPTER (Lat.), n. m. Ka^{2}mp(ka^{3}mp)'tu^{5}r(tar). Gen., *campte'ros* (*-is*). Gr., καμπτήρ. A flexion, flexure. [A, 325.]

CAMPTICUS (Lat.), adj. Ka^{2}mp(ka^{3}mp)'ti^{2}k-u^{3}s(u^{4}s). From κάμπτειν, to crook. Pertaining to, dependent on, causing, or affected with, flexion. [A, 322.]

CAMPTIS (Lat.), n. f. Ka^{2}mp(ka^{3}mp)'ti^{2}s. See CAMPSIS (2d def.).

CAMPTOCARPUS [Decaisne] (Lat.), n. m. Ka^{2}mp(ka^{3}mp)-to(to^2)-ka^{3}rp'u^{3}s(u^{4}s). From κάμπτειν, to crook, and καρπός, a fruit, from the arcuate fruit. A genus of asclepiadaceous shrubs of the tribe *Periploceæ*, growing in the Mascarene Islands. [B, 42, 121, 212.]—**C. mauritianus** [Decaisne]. Fr., *liane à café*. A climbing shrub of the Island of Bourbon. [B, 214.]

CAMPTOLOMA (Lat.), n. n. Ka^{2}mp(ka^{3}mp)-to(to^2)-lo'ma^3. Gen., *camptolom'atos* (*-is*). Of Bentham, a genus of scrophulariaceous plants of the tribe *Digitaleæ*. [B, 42, 121.]

CAMPTOPUS [Hooker] (Lat.), n. m. Ka^{2}mp(ka^{3}mp)'to(to^2)-pu^{3}s(pus). Gen., *camptop'odos* (*-is*). From καμπτός, flexible, and πούς, the foot. See CEPHAELIS.

CAMPTOTHECIEÆ (Lat.), n. f. pl. Ka^{2}mp(ka^{3}mp)-to(to^2)-the^{2}s(thak)-i(i^2)'e^2-e(a^3-e^2). From καμπτός, bent, and θήκη, an urn. Of Schimper, a family of mosses of the tribe *Hypnaceæ*. [B, 121.]

CAMPTOTROPAL, CAMPTOTROPOUS, adj. Ka^{2}mp-to^{2}t'ro-pa^{2}l, -pu^{3}s. Lat., *camptotropus* (from καμπτός, bent, and τρέπειν, to turn). Fr., *camptotrope*. In botany, curved abruptly into the shape of a horse-shoe (said by Schleiden of very elongated orthotropal ovules). [B, 19, 121.]

CAMPU, n. A variety of tea. [B, 180.]

CAMPULITROPOUS, adj. Ka^{2}mp-u^2-li^{2}t'ro-pu^{3}s. Fr., *campulitrope*. See CAMPYLITROPAL.

CAMPYLANTHEÆ (Lat.), n. f. pl. Ka^{2}m(ka^{3}m)-pi^{2}l(pu^{6}l)-a^{2}n(a^{3}n)'the^2-e(a^3-e^2). From *Campylanthus*, the only genus. Fr., *campylanthées*. Of Webb, a tribe or subtribe of scrophulariaceous plants of the *Salpiglossideæ*. [B, 170.]

CAMPYLE (Lat.), n. f. Ka^{2}m(ka^{3}m)'pi^{2}l(pu^{6}l)-e(a). Gen., *cam'pyles*. Gr., καμπύλη. A curvature. [A, 322.]

CAMPYLOCARPUS (Lat.), n. m. Ka^{2}m(ka^{3}m)-pi^{2}l(pu^{6}l)-o(o^2)-ka^{3}rp'u^{3}s(u^{4}s). From καμπύλος, crooked, and καρπός, a fruit. Fr., *campylocarpe*. See ARABIS.

CAMPYLOCARYUM [De Candolle] (Lat.), n. n. Ka^{2}m(ka^{3}m)-pi^{2}l(pu^{6}l)-o(o^2)-ka(ka^3)'ri^2(ru^6)-u^{3}m(u^{4}m). From καμπύλος, crooked, and κάρυον, a nut. Fr., *campylocarye*. See ALKANNA and ANCHUSA.

CAMPYLOCHEIRUS (Lat.) **CAMPYLOCHIRUS** (Lat.), adj's. Ka^{2}m(ka^{2}m)-pi^{2}l(pu^{6}l)-o(o^2)-kir'(ch^{2}e^2'i^{2}r)-u^{3}s(u^{4}s), -kir-(ch^{2}er)'u^{3}s(u^{4}s). From καμπύλος, crooked, and χείρ, the hand. Having distorted hands or upper limbs. [A, 322.]

CAMPYLOCLINIUM (Lat.), n. n. Ka^{2}m(ka^{3}m)-pi^{2}l(pu^{6}l)-o(o^2)-kli^{2}n(klen)'i^2-u^{3}m(u^{4}m). Fr., *campylocline*. Of De Candolle, a genus of composite plants, referred by Bentham and Hooker to *Eupatorium*. [B, 42, 121.]

CAMPYLOMELE (Lat.), n. f. Ka^{2}m(ka^{3}m)-pi^{2}l(pu^{6}l)-o^{2}m'e^{2}l-e(a). See MELOCAMPYLE.

CAMPYLON (Lat.), n. n. Ka^{2}m(ka^{3}m)'pi^{2}l(pu^{6}l)-o^{2}n. See CAMPYLOTES.

CAMPYLOPHYTE (Fr.), adj. Ka^{3}m-pi^{2}l-o-fet. From καμπύλος, crooked, and φυτόν, a plant. Having the superior part of the corolla curved obliquely. [B, 38.]

CAMPYLOPODES [Bridel] (Lat.), **CAMPYLOPODIA** [Reichenbach] (Lat.), n's f. pl. and n. pl. Ka^{2}m(ka^{3}m)-pi^{2}l(pu^{6}l)-o^{2}p'-o^{2}d-ez(e^{2}s), -o^{2}p-od(o^{2}d)'i^2-a^3. From καμπύλος, crooked, and πούς, a foot. A family or section of mosses, including *Campylopus*. [B, 170.]

CAMPYLOPTÈRE (Fr.), adj. Ka^{3}m-pi^{2}l-o^{2}p-te^{2}r. From καμπύλος, crooked, and πτερόν, a pinion. Having the shafts of the flying feathers curved; as a n. f., the botanical genus *Campyloptera*. [B; L, 41, 42.]

CAMPYLORRHACHIS (Lat.), n. f. Ka^{2}m(ka^{3}m)-pi^{2}l(pu^{6}l)-o^{2}r'ra^{2}k(ra^{3}ch^2)-i^{2}s. Gen., *campylorrhach'idos* (*-is*). From καμπύλος, crooked, and ῥάχις, the backbone. A fœtus deformed by a curvature of the spine. [A, 322.]

CAMPYLORRHINUS (Lat.), n. m. Ka^{2}m(ka^{3}m)-pi^{2}l(pu^{6}l)-o^{2}r-ri(re)'nu^{3}s(nu^{4}s). From καμπύλος, crooked, and ῥίς, the nose. A fœtus deformed by crookedness of the nose. [A, 322.]

CAMPYLORRHYNCHINÆ (Lat.), n. f. pl. Ka^{2}m(ka^{3}m)-pi^{2}l-(pu^{6}l)-o^{2}r-ri^{2}n^2(ru^{6}n^2)-ki(ch^{2}e)'ne(na^3-e^2). From καμπύλος, crooked, and ῥύγχος, the snout. A subfamily of the *Troglodytidæ*. [L, 211.]

CAMPYLOSCELUS (Lat.), adj. Ka^{2}m(ka^{3}m)-pi^{2}l(pu^{6}l)-o^{2}s'-se^{2}l(ke^{2}l)-u^{3}s(u^{4}s). From καμπύλος, crooked, and σκέλος, the leg. Having crooked legs. [A, 322.]

CAMPYLOSOME (Fr.), adj. Ka^{3}m-pi^{2}l-o-som. From καμπύλος, crooked, and σῶμα, the body. Having a flexible body; as a n., in the pl., *c's*, an order of the cirripedes. [L, 41.]

CAMPYLOSPERMÆ (Lat.), n. f. pl. Ka^{2}m(ka^{3}m)-pi^{2}l(pu^{6}l)-o(o^2)-spu^{5}rm(spe^{2}rm)'e(a^3-e^2). From καμπύλος, crooked, and σπέρμα, a seed. Fr., *campylospermées*. Ger., *Krummsamigen*. Of De Candolle *et al.*, a suborder of umbelliferous plants, comprising the tribes *Elæoselineæ*, *Caucalineæ*, *Scandicineæ*, and *Smyrneæ*, having the edge of the fruit turned inward so as to form a longitudinal furrow on the commissural face. [B, 121, 170.]

CAMPYLOSPERMATE, CAMPYLOSPERMOUS, adj's. Ka^{2}m-pi^{2}l-o-spu^{5}rm'at, -u^{3}s. Lat., *campylospermus*. Fr., *campylosperme*. Ger., *krummsamig*. Having a gutter along the edge, formed by the rolling in of the latter (said of seeds and seed-like fruits). [B, 19, 38; L, 73.] Cf. CAMPYLOSPERMÆ.

CAMPYLOSTELIACEÆ (Lat.), n. f. pl. Ka^{2}m(ka^{3}m)-pi^{2}l-(pu^{6}l)-o(o^2)-ste^{2}l(stal)-i^2-a(a^3)'se^2(ke^2)-e(a^3-e^2). From *Campylostelium*, the only genus. Of Bruch, Schimper, and Gümbert, a family of mosses. [B, 170.]

CAMPYLOTES (Lat.), n. f. Ka^{2}m(ka^{3}m)-pi^{2}l(pu^{6}l)'o^{2}t-ez(as). Gen., *campylote'tos* (*-is*). Gr., καμπυλότης. Crookedness, distortion, particularly of the eyelids (καμπυλότης βλεφαρίδων). [A, 325.]

CAMPYLOTROPAL, CAMPYLOTROPOUS, adj's. Ka^{2}m-pi^{2}l-o^{2}t'ro-pa^{2}l, -pu^{3}s. Lat., *campylotropus* (from καμπύλος, crooked, and τρέπειν, to turn). Fr., *campylotrope*. Ger., *krummläufig*, *krummwendig*. In botany, having a reniform shape by the greater development of one side (said of an ovule when the micropyle is almost in contact with the hilum). [B, 19, 34, 121.]

CAMPYLOTROPIE (Fr.), n. Ka^{3}m-pi^{2}l-o-trop-e. The state of being campylotropous. [B, 121.]

CAMPYLUM (Lat.), n. n. Ka^{2}m(ka^{3}m)'pi^{2}l(pu^{6}l)-u^{3}m(u^{4}m). See CAMPYLOTES.

CAMPYNEMACEÆ [Dumortier] (Lat.), **CAMPYNEMATOIDEÆ** [Pax] (Lat.), n's f. pl. Ka^{2}m(ka^{3}m)-pi^2(pu^6)-ne^{2}m(nam)-a(a^3)'se^2(ke^2)-e(a^3-e^2), -a^{2}t(a^{3}t)-o(o^2)-i^{2}d(ed)'e^2-e(a^3-e^2). From καμπύλος, crooked, and νῆμα, a thread. Of Dumortier, an order of plants (of Pax, a suborder of the *Amaryllidaceæ*), consisting of the single genus *Campynema*. [B, 170; Pax (B, 245).]

CAMRHAKH (Hind.), **CAMRUC, CAM-RUNGA,** n's. The *Averrhoa carambola*. [B, 19, 121, 172.]

CAM-SANH, n. In Cochin-China, a cultivated species of orange. [B, 88, 121.]

CAMSIA (Chinese), **CAMTIA** (Chinese), n's. The *Saccharum officinarum*. [L, 105.]

CAMUL, n. The *Rottlera tinctoria*. [B, 172.]

CAMUM (Ar.), n. The *Cuminum cyminum*. [L, 105.]

CAMUNIUM (Lat.), n. n. Ka^{2}m(ka^{3}m)-u^{2}n(un)'i^2-u^{3}m(u^{4}m). See MURRAYA.—**C. japonense** [Rumphius]. The *Murraya exotica*. [B, 173.]

CAMURIEN, n. In the Philippines, a large vine said to act medicinally like guaiacum. [B, 88.]

CAMWOOD, n. Ka^{2}m'wu^{4}d. The *Baphia nitida* and its wood. [B, 19, 185.]

CAM-XA, n. See CAM-SANH.

CANA (Chinese), n. The *Pimela alba.* [B, 121.]

CAÑA (Sp.), n. Ka^{3}n'ya^3. The *Arundo donax.* [B, 121.]—**C. de la víbora.** In South America, the *Kunthia montana.* [B, 19, 88.]—**C. fistula.** The *Cassia fistula.* [B, 121.]

CANAB (Ar.), n. The *Cannabis sativa.* [B, 121.]

CANABA, n. In Bolivia and Peru, a species of *Chenopodium*, resembling the *Chenopodium quinoa*, having an edible seed. [B, 121.]

CANABÉ (Fr.), n. Ka^{3}n-a^3-ba. In Provence, the *Cannabis sativa.* [B, 121.]

CANABERGE (Port.), n. Ka^{3}n-a^3-be^{2}r'je^2. The *Vaccinium oxycoccos.* [B, 88.]

CANABIER (Fr.), n. Ka^{3}n-a^3-bi^2-a. See CANABÉ.

CANABIL (Ar.), n. See ERETRIA.

CANABINASTRUM (Lat.), n. n. Ka^{2}n(ka^{3}n)-a^3-bi^{2}n-a^{2}st-(a^{3}st)'ru^{3}m(ru^{4}m). The *Galeopsis galeobdolon.* [B, 121.]

CANABINUS (Lat.), adj. Ka^{2}n(ka^{3}n)-a^{2}b(a^{3}b)'i^{2}n-u^{3}s(u^{4}s). See CANNABINUS.

CANABIS (Lat.), n. f. Ka^{2}n(ka^{3}n)'a^{2}b(a^{3}b)-i^{2}s. See CANNABIS.

CANABON, n. In Languedoc, the hemp or hemp-seed. [B, 38, 121.]

CANABRAZ (Port.), n. Ka^{3}n-a^3-bra^{3}th'. The *Heracleum sphondylium.* [B, 121.]

CANADA, n. A French provincial name for the *Helianthus tuberosus.* [B, 121.]

CANADO DE PARYA, n. The *Rauwolfia canescens.* [B, 121.]

CANADOL, n. Ka^{2}n'a^{2}d-o^{2}l. One of the more volatile products of the fractional distillation of petroleum; it boils at 60° C., has a sp. gr. of 0·650 to 0·700, and consists chiefly of hexane. It has been used with success as a local anæsthetic in the form of spray. [J. P. Plüshkoff, "Vratch," 1887, No. 28, p. 544; "Med. Chron.," May, 1888, p. 147; "Am. Jour. of Pharm.," Feb., 1888, p. 103; B, 2, 270.]

CANAHEIA (Sp.), n. Ka^{3}n-a^3-a'e-a^3. A provincial name for several *Umbelliferæ*, especially *Thapsia* and *Ferula.* [B, 121.]

CANAHIA, n. See KANAHIA.

CANAL, n. Ka^{2}n-a^{2}l'. Gr., σωλήν. Lat., *canalis.* Fr., *c.*, *conduit.* Ger., *C.*, *Gang*, *Schlauch.* It., *canale.* Sp., *c.* A channel, tube, or duct; a long, narrow passage. In veterinary language, see *Lingual c.* [A, 325; L.] Cf. FORAMEN.—**Abdominal c.** See *Inguinal c.*—**Abital c.** See *Aphodal c.*—**Abzugsc'** (Ger.). See under ABZUG.—**Accessory posterior palatine c's.** One or two small c's often found in the horizontal plate of the palate bone near the groove entering into the formation of the posterior palatine c. [A, 478.]—**Adital c.** See *Prosodal c.*—**Aerial c.** See *Air-c.*—**Afferent c.** See *Incurrent c.*—**Air-c.** Lat., *canalis aeriferus.* Fr., *c. aérifère.* An intercommunicating cavity such as exists in most vegetable organs, containing air; formed by a lacuna between the cells (an intercellular c.) or by an arrest of development or a destruction of some of the anatomical elements. [B, 121.] Cf. *Air-*CELLS.—**Alimentary c.** Lat., *canalis alimentarius.* Fr., *canal alimentaire.* Ger., *Verdanungscanal.* The whole digestive tube, from the mouth to the anus. [L, 44, 142.]—**Alisphenoid c.** In comparative anatomy, a c. in the alisphenoid bone, opening anteriorly into the foramen rotundum, for the passage of the external carotid artery. [L, 153.]—**Alveolo-dental c's.** See *Dental c's.*—**Ambulacral c's.** In the *Echinodermata*, branches of the circular c. which run outward along the middle of the inner surface of the ambulacral plates. [L, 11, 121, 147.]—**Anal c.** Fr., *c. de l'anus.* The c. leading from the rectum to the external opening of the anus, corresponding in length to the thickness of the pelvic floor.—**Anterior dental c.** Fr., *c. dentaire antérieure.* A c. of the superior maxilla which runs down into the facial portion of the bone and conveys the anterior dental vessels and nerves. [C.]—**Anterior ethmoidal c., Anterior internal orbital c.** Lat., *canalis ethmoidalis anterior.* A c. formed between the ethmoid and frontal bones, transmitting the nasal branch of the ophthalmic nerve and the anterior ethmoidal vessels. [L, 31, 142.]—**Anterior palatine c.** See *Incisor* FORAMEN and APERTURA *inferior canalis incisivi.*—**Anterior semicircular c., Anterior vertical semicircular c.** See *Superior semicircular c.*—**Aphodal c.** In certain sponges, a c. connecting a chamber with an excurrent c. [L, 121.]—**Apical c's.** In the *Ctenophora*, two c's given off from the funnel and terminating in the apical pores near the apical pole. [L, 147.]—**Aquiferous c's.** Fr., *canaux aquifères.* Simple or branched c's which, in many molluscs, traverse the substance of the foot, opening externally by pores, or, in many instances, internally into the blood-sinuses; in the *Entozoa*, a series of ramifying excretory c's with blind extremities, converging to a common c. that opens externally. [L, 11, 16.]—**Arachnoid c.** Lat., *canalis arachnoideus.* Fr., *c. arachnoïdien* (ou *de Bichat*). A space formed beneath the arachnoid membrane of the brain, as it crosses the transverse and longitudinal fissures; it lodges the venæ magnæ Galeni. [I, 3; K.]—**Arterial c.** See DUCTUS *arteriosus.*—**Auditory c's.** See *External auditory c.* and *Internal auditory c.*—**Auricular c.** See *External auditory c.*—**Avant-c.** (Fr.). The anterior portion of the male urethra. [L, 88.]—**Axenc' der Gehörschnecke** (Ger.). See *Central c. of the modiolus.*—**Axenc' des Rückenmarks** (Ger.). See *Central c. of the spinal cord.*—**Axial c.** In certain *Echinodermata*, the central canal of a brachium, opening into the alimentary c. [L, 121.]—**Bartholin's c.** See DUCT *of Bartholin.*—**Beckenc'** (Ger.). See *Pelvic c.*—**Befruchtungsc'** (Ger.). See *Fertilizing c.*—**Bichat's c.** See *Arachnoid c.*—**Biflex c.** Fr., *c. biflexe.* See *Interungulate* GLAND.—**Biliary c's.** See *Hepatic c's.*—**Bogig gewundene C'stücken** (Ger.). See *Convoluted* TUBULES.—**Bone-c's.** See CANALICULI *of bone.*—**Breschet's c's.** See CANALES *diploici.*—**Bruchc'** (Ger.). See *Hernial c.*—**Bullular c. of Petit.** See *C. of Petit.*—**Calciferous c's.** See CANALICULI *calciferi.*—**C. aérien** (Fr.). The trachea, a bronchus, or a bronchial tube. [L, 41.] Cf. *Pneumatic* DUCT.—**C. aérifère** (Fr.). See *Air-c.*—**C. albuminifère** (Fr.), **C. albuminigène** (Fr.). See *Vitellarian* DUCT.—**C. alimentaire** (Fr.). See *Alimentary c.*—**C. annulaire** (Fr.). See *Circular c.*—**C. arachnoïdien** (Fr.), **C. arachnoïdien de Bichat** (Fr.). See *Arachnoid c.*—**C. artériel** (Fr.). See DUCTUS *arteriosus.*—**C. azygos pancréatique** (Fr.). See DUCTUS *pancreaticus minor.*—**Canaux branchiaux afférents** (Fr.). In the *Crustacea*, the afferent branchial vessels. [L, 321.]—**Canaux branchiaux efférents** (Fr.). In the *Crustacea*, the efferent branchial vessels. [L, 321.]—**C. carotidien** (Fr.). See *Carotid c.*—**C. central de la moëlle épinière** (Fr.). See *Central c. of the spinal cord.*—**C. central de l'axe du limaçon** (Fr.). See *Central c. of the modiolus.*—**C. central du bulbe** (Fr.). The embryonic central c. of the medulla oblongata. Petit] (Fr.). See *C. of Petit.*—**C. hépatique** (Fr.). See *Hepatic* DUCT.—**C. hyaloïdien** (Fr.). See *Hyaloid c.*—**C. inflexe du temporal** (Fr.). See *Carotid c.*—**C. intermédiaire des ventricules** (Fr.). The aqueduct of Sylvius. [L.]—**C'luft** (Ger.). The air contained in sewers. [B, 270.]—**Canaux maxillaires** (Fr.), **Canaux maxillo-dentaires** (Fr.). See *Dental c's.*—**Canaux médullaires** (Fr.). See *Haversian c's.*—**C. nasal** (Fr.). See *Nasal* DUCT.—**C. naso-branchial** (Fr.). In the *Myxinidæ*, a c. connecting the nasal capsule and the branchial chamber. [L, 321.]—**Canaux nourriciers** (Fr.). See *Haversian c's.*—**C. of Arantius.** See DUCTUS *venosus.*—**C. of Bichat.** See *Arachnoid c.*—**C's of Breschet.** See CANALES *diploici.*—**C. of Cloquet.** See *Hyaloid c.*—**C's of communication.** Fr., *canaux de communication.* C's which, in the embryo of the fowl, run from the cavity of each protovertebra to the pleuro-peritoneal space, constituting the rudiments of the secretory system. [Renson, "Arch. f. mikr. Anat.," xxii, 4; "Rev. des sci. méd.," Jan., 1885, p. 3.]—**C. of Cuvier.** See DUCTUS *venosus.*—**C's of Cuvier.** See *Cardinal* VEINS.—**C. of Ferrein.** A triangular channel supposed by Ferrein to exist between the free edges of the eyelids when they are closed, and to serve for conducting the tears toward the puncta lacrimalia during sleep. [F.]—**C. of Fontana.** Syn.: *ciliary c.* A series of passages or spaces (very small in man, but of great size in some of the lower animals) formed by the interlacing of the connective-tissue fibres forming the framework of the peripheral processes, or roots, of the iris; situated in the angle of the anterior chamber and serving as the medium of transudation of the aqueous humor from the interior to the exterior of the eye. [F.]—**C. of Gartner** (not Gärtner). See *Gartner's c.*—**C's of Havers.** See *Haversian c's.*—**C. of Huguier.** See CANALIS *chordæ tympani.*—**C. of Jacobson.** See *Tympanic c.* and *Jacobson's* ORGAN.—**C. of Laufer.** In cer-

tain worms, a c. by which the oviduct opens externally on the dorsal surface; according to some, the vitellarian duct. [L, 121, 322.]—**C. of Müller.** See *Müllerian* duct.—**C. of Nuck.** A pouch of peritonæum which, in the female fœtus, descends for a short distance along the round ligament of the uterus into the inguinal c.; the analogue of the processus vaginalis in the male. It sometimes persists after birth. [A, 301; C.]—**C. of Petit.** Fr., *c. godronné* [F. Petit]. A supposed c. (properly a space intersected by numerous fine interlacing fibres) existing between the anterior and posterior laminæ of the suspensory ligament of the crystalline lens, or zonule of Zinn; extending from the periphery of the lens nearly to the apices of the ciliary processes. [F.]—**C. of Reissner.** See *Membranous c. of the cochlea.*—**C. of Rivinus.** The duct of the sublingual gland. [A, 301.]—**C. of Rosenthal.** See *Spiral c. of the modiolus.*—**C. of Schlemm.** Syn.: *sinus vinosus.* An irregular space or plexiform series of spaces occupying the sclero-corneal region of the eye; regarded by some as a venous sinus, by others as a lymph-channel. On section, it is sometimes circular, sometimes irregularly ovoid, and in places consists of several channels. [F.] See illustration under *Ciliary* muscle.—**C. of Stenson** (not Stenon or Steno). See *Stenson's* duct.—**C. of Stiega.** See *C. of Laurer.*—**C. of Stilling.** See *Hyaloid c.* and *Central c. of the spinal cord.*—**C. of the anus.** See *Anal c.*—**C. of the cervix uteri.** Lat., *canalis cervicis* (seu *colli*) *uteri.* Fr., *c. cervical* (ou *du col*) *de l'utérus.* That portion of the uterine c. which extends from the os externum to the os internum.—**C. of the cochlea.** See *Cochlear c.*—**C. of the epididymis.** Lat., *canalis epididymidis.* Fr., *c. de l'épididyme.* Ger., *Nebenhodencanal.* A convoluted tube, about 20 feet long when straightened, constituting the epididymis and being continued as the vas deferens. [C; L, 142.]—**C. of the spinal cord** (or **marrow**). See *Central c. of the spinal cord.*—**C. of Wharton.** See *Wharton's* duct.—**C. of Wirsung.** See *Pancreatic* duct.—**C. of Wolff.** See *Wolffian* duct.—**C. olfactif** (Fr.). The nasal fossæ at an early stage of development. [L, 49.]—**C. oviducte** (Fr.). See Oviduct.—**C. pancréatique** (Fr.). See *Pancreatic* duct.—**C. pancréatique azygos** (Fr.). See Ductus *pancreaticus minor.*—**C. pancréatique récurrent** [Bernard] (Fr.). The accessory pancreatic duct, regarded by Bernard as constant in man. [K, 30.]—**C. péritonéo-vaginal** (Fr.). See *Inguinal c.*—**C. pierreux** (Fr.). See *Madreporic c.*—**Canaux plasmatiques** (Fr.). See *Serous* canaliculi.—**C. pneumatique** (Fr.). See *Pneumatic* ducts.—**Canaux ponctués** (Fr.). See *Pore c's.*—**Canaux poreux** (Fr.). See *Intercellular* channels and *Pore c's.*—**C. préputial** (Fr.). In the lower animals, the sheath of the penis. [L, 321.]—**Canaux rayonnants.** See *Radial c's.*—**C. rhachidien** (Fr.). See *Vertebral c.*—**C. sacré** (Fr.). See *Sacral c.*—**C. sécréteur** (Fr.). See *Thoracic* duct.—**C. tubaire** (Fr.), **C. tubo-ovarien** (Fr.). See Oviduct.—**C. utéro-vagino-vulvaire** (Fr.). See *Parturient c.*—**C. vagino-péritonéal** (Fr.). See *Inguinal c.*—**Canaux vasculaires** (Fr.). See *Haversian c's.*—**C. vecteur** (Fr.). See Oviduct.—**C. veineux** (Fr.). See Ductus *venosus.*—**C. vertébral** (Fr.). See *Vertebral c.*—**C. vestibulaire** (Fr.). See *Urogenital* sinus.—**C. vitellin** (Fr.). A supposed c. leading from the central cavity of the vitellus, in birds' eggs, to that part of the surface of the vitellus at which the cicatricula is situated. [A, 4.]—**C. vulvaire** [Dolbeau] (Fr.). The vestibule of the vagina. [L, 31.]—**C. vulvo-utérin** (Fr.). See *Parturient c.*—**Carinal c.** An air-c. in the *Equiseta*, situated on the inner side of the xylem and opposite a ridge on the surface of the stem. [B, 279.]—**Carotic c., Carotid c.** Lat., *canalis caroticus.* Fr., *c. carotidien.* Ger., *carotischer Canal, Kopfpulsadercanal.* The c. in the petrous portion of the temporal bone for the transmission of the internal carotid artery. [C; L, 31.]—**Cartilage-c's.** Ger., *Knorpelcanäle.* Syn.: *cartilage-channels.* The c's, or channels, formed in ossifying cartilage during its vascularization, to receive prolongations of the osteogenetic layer of the periosteum. They radiate in all directions from the centre of ossification. [J, 32, 35.]—**Centralc' des Glaskörpers** (Ger.). See *Hyaloid c.*—**Central c. of the modiolus.** Lat., *canalis centralis modioli.* Fr., *c. central de l'axe du limaçon.* Ger., *Axencanal der Gehörschnecke.* A c. running from the base to the apex of the modiolus of the cochlea. [L, 142.]—**Central c. of the spinal cord.** Lat., *canalis centralis medullæ spinalis.* Fr., *c. central de la moëlle épinière.* Ger., *Axencanal des Rückenmarks.* Syn.: *myelocœle* [B. G. Wilder], *c. of Stilling, ventricle of the cord.* The small c. which extends through the centre of the spinal cord from the conus medullaris to the lower part of the fourth ventricle, where it expands at the calamus scriptorius. It represents the embryonic ectodermal c. [I, 68; "Med. News," Dec. 15, 1883 (I); K.]—**Cervical c.** See *C. of the cervix uteri.*—**Cervico-uterine c.** See *Uterine c.*—**Chyle aqueous c's.** In certain invertebrates, a system of c's containing water and digestive products. [L, 147.]—**Ciliary c.** Fr., *c. ciliaire.* Ger., *Ciliarcanal.* See *C. of Fontana.*—**Circular c.** Fr., *c. annulaire.* Syn.: *ambulacral ring.* In the *Echinodermata*, a vessel surrounding the œsophagus, connected with the exterior by the madreporic c. and giving off the ambulacral c's. [L, 147.]—**Cloacal c's.** See *Excurrent c's.*—**Cloquet's c.** See *Hyaloid c.*—**Cochlear c.** Lat., *canalis cochleæ* (seu *cochlearis*). Fr., *c. du limaçon.* Ger., *Schneckenc'.* The spiral cavity or c. of the cochlea, 28 to 30 mm. long, gradually tapering toward the upper end, making two turns and a half, showing on cross-section the form of a garden snail. The base is turned inward toward the internal auditory meatus, and the apex outward toward the tympanum. [F.]—**Coiled c's.** See *Segmental* organs.—**Connecting c.** Fr., *c. d'union, tube contourné.* Ger., *geschlungene Uebergangscanälchen, Schaltstück, Schaltewindung, Verbindungscanal.* It., *canalicolo urinifero flessuoso.* Syn.: *intercalated portion, junctional tubule.* The arched, often coiled, part of a uriniferous tubule joining with a collecting tubule. [J.]—**Convoluted c's.** See *Convoluted* tubules.—**Corti's c.** The triangular c. or tunnel formed by the pillars or arches of Corti, the base of which corresponds to the membrana basilaris. It extends over the entire length of the lamina spiralis. [F.]—**Cotunnius's c.** See Aqueduct *of the vestibule.*—**Crural c.** Lat., *canalis cruralis.* See *Femoral c.* (1st def.).—**Ctenophoral c's.** Fr., *canaux cténophoriques.* In the *Ctenophora*, eight c's connected at right angles with the tertiary radial c's, corresponding in their course with the eight locomotive bands. [L, 147.]—**Cuvier's c.** See Ductus *venosus.*—**Cystic c.** See *Cystic* duct.—**Darmc'.** (Ger.). See *Intestinal c.*—**Deferent c.** Lat., *canalis deferens.* Fr., *c. déférent.* The vas deferens or any c. representing it. [L, 321.]—**Demicircular c's.** See *Semicircular c's.*—**Dental c's.** See *Anterior dental c., Inferior dental c.* (to which the term is sometimes restricted), and *Posterior dental c's.*—**Dentinal c's.** Lat., *canaliculi dentium.* Fr., *canalicules dentaires* (ou *de l'ivoire*). Ger., *Zahncanälchen, Zahnröhrchen.* Syn.: *dentinal channels* (or *tubules*, or *tubes*), *dental canaliculi* (or *tubuli*), *calcigerous tubes.* The minute c's, or tubules, in dentine, extending approximately at right angles to the surface of a tooth from the pulp-cavity, into which they open, to the cementum and enamel. They anastomose by fine lateral branches and divide toward the periphery, becoming finer and more numerous. Some of these peripheral branches unite; others seem to end blindly. [J, 24, 35.]—**Descending palatine c.** See *Palato-maxillary c.*—**Digestive c.** Fr., *c. digestif.* See *Alimentary c.*—**Efferent c's.** Fr., *canaux efférents.* 1. See *Excurrent c's.* 2. In the *Cestoda*, c's connecting the testicles with the deferent c. [L, 321.]—**Ejaculatory c.** See *Ejaculatory* duct.—**Ernährungscanäle** (Ger.). See *Haversian c's.*—**Eschricht's yellow c's.** In certain of the *Cestoda*, a branching system of c's opening into the fertilizing c. and terminating in round or oval sacs lying between the subcuticula and the longitudinal muscles. [L, 182.]—**Ethmoidal c's.** See *Anterior ethmoidal c.* and *Posterior ethmoidal c.*—**Eustachian c.** A c. in the petrous portion of the temporal bone, containing a portion of the Eustachian tube. [C; L, 142.]—**Excurrent c's.** The c's which, in sponges, carry water from the ciliated chambers to the exterior. [L, 121, 147.]—**External auditory c.** Lat., *meatus auditorius externus, alvearium.* Fr., *conduit auditif externe.* Ger., *äusserer Gehörgang.* Syn.: *external auditory meatus.* The passage leading from the auricle to the drum membrane of the ear. [F.]—**External semicircular c.** Lat., *canalis semicircularis externus.* Fr., *c. demi-circulaire externe.* Ger., *äusserer Bogengang.* That one of the semicircular c's of the labyrinth which has its plane horizontal and its convexity directed backward. [F, 32.]—**External small palatine c.** A small c. in the pyramidal process of the palate bone, close to its connection with the horizontal plate, transmitting the external palatine nerve. [C; L, 142.]—**Facial c.** Lat., *canalis facialis.* See Aqueduct *of Falloppius.*—**Falloppian c.** See Aqueduct *of Falloppius* and Oviduct.—**Fat-c.** See *Fat*-column.—**Femoral c.** Lat., *canalis femoralis* (seu *cruralis*). Fr., *c. fémoral* (ou *crural*). Ger., *Schenkelcanal.* 1. The inner compartment of the sheath of the femoral vessels, behind Poupart's ligament, into which a femoral hernia descends. [L, 142.] 2. See *Hunter's c.*—**Ferrein's c.** See *C. of Ferrein.*—**Fertilizing c.** Ger., *Befruchtungscanal.* A c. connecting the vagina and the uterus in most of the *Cestoda.* [L, 182.]—**Fibro-adipose c.** A c. filled with adipose tissue, on the dorsal side of the neural c. in certain fishes, included between some of the neurapophyses of the neural arch. [L, 14.]—**Fontana's c.** See *C. of Fontana.*—**Frontal semicircular c.** See *Superior semicircular c.*—**Galactophorous c's.** Fr., *canaux galactophores.* The lactiferous tubules of the mammary gland. [L, 49.]—**Gartner's** (not Gärtner's) **c.** In the female, a relic of the main or middle portion of the Wolffian duct of the embryo; a tube running down from the broad ligament of the uterus to be incorporated with the wall of the uterus and vagina and to be lost on the latter. In some of the lower animals its orifice remains patulous in adult life. [A. Thomson (A, 5).]—**Gastro-vascular c's.** Fr., *canaux gastro-vasculaires.* In the *Hydrozoa*, c's extending from the stomach into the substance of the disc of the umbrella, opening externally. [L, 210.]—**Gaumenc'** (Ger.). See *Pterygo-palatine c.*—**Geburtsc'** (Ger.). See *Parturient c.*—**Genital c.** Lat., *canalis genitalis.* In comparative anatomy, any channel or c. designed for copulation or for the discharge of ova. [L, 121.]—**Germigene c.** Fr., *germiducte.* In comparative anatomy, the true oviduct, *i. e.*, the c. leading to the ovary, as distinguished from the vitelligene c's. [L, 16.]—**Gewundener C.** (Ger.). See *Convoluted* tubule.—**Gonocalycine c's.** A system of c's found in the gonocalyx of the *Hydrozoa.* [L, 147.]—**Groin c.** See *Inguinal c.*—**Guidi's c.** See *Vidian c.*—**Gynæcophoric c.** Fr., *vitelloducte.* In *Bilharzia*, a crease or slit extending from a little below the ventral sucker to the end of the tail. It lodges the female during copulation. [L, 16.]—**Hæmal c.** A c. on the ventral surface of the vertebral column, inclosed by the hæmal arches; incomplete in certain portions. [L, 14.]—**Halbzirkelförmige Canäle** (Ger.). See *Semicircular c's.*—**Häutiger Schneckenc'** (Ger.). See *Membranous c. of the cochlea.*—**Haversian c's.** Lat., *canaliculi haversiani* (seu *medullares*, seu *vasculosi*), *ductus nutritii.* Fr., *canaux* (ou *canalicules*) *de Havers, canaux* (ou *conduits*) *vasculaires* (ou *médullaires*, ou *nourriciers*). Ger., *Haversische canälchen, Gefässcanälchen, Markcanälchen.* Syn.: *c's of Havers, medullary* (or *nutritive*, or *vascular*) *c's.* C's in the compact substance of bone which form a wide-meshed network and establish communication between the medullary cavity and the surface of the bone, giving passage to the blood-vessels, lymph-vessels, and nerves supplying the bone. Their average diameter is $\frac{1}{500}$ inch, and they are lined by a continuation of the endosteum. They are wanting in very thin, paper-like bones. [A, 70; J, 30, 42; "Arch. f. mikr. Anat.," 1870, p. 182 (J).]—**Henle's c's.** See *Henle's loop*-tubes and *Uriniferous* tubules.—**Hepatic c.** The excretory duct of the liver or its analogue. [L, 321.]—**Hepatic c's.** Fr., *canaux hépatiques.* The radicles of the hepatic duct. [A, 385.]—**Hernial c.** Ger., *Bruchc'.* A c. through which a hernia passes. See *Inguinal c.* and *Femoral c.*—**Horizontal semicircular c.** See *External semicircular c.*—**Hovius's c.** See *C. of Fontana.*—**Huguier's c.** See Iter *chordæ anterius.*—**Hunter's c.** A tri-

angular c. running through the adductor magnus muscle of the thigh, giving passage to the femoral artery and vein and the internal saphenous nerve. [A, 5; C; L, 142.] See cut under ADDUCTORS *of the thigh.*—**Hyaloid c.** Fr., *c. hyaloïdien.* Ger., *C.* (oder *Centralc'*) *des Glaskörpers.* Syn.: *c. of Stilling, c. of Cloquet.* An irregularly cylindrical c. running antero-posteriorly through the vitreous body, through which, in the fœtus, the hyaloid artery passes to ramify on the posterior surface of the crystalline lens. [F.] —**Hyapophyseal c.** In birds, a c. formed by the inferior spinous processes of the upper cervical vertebræ, transmitting the carotid artery. [L, 14.]—**Hygrophthalmic c's.** See under *Lacrymal c.*—**Incisive c., Incisor c.** Lat., *canalis incisivus.* Ger., *Nasengaumenc'* (1st def.). 1. A c. which opens by the apertura inferior canalis incisivi into the mouth, just behind the incisor teeth of the upper jaw; formed by a groove (incisura incisiva) on the adjoining surfaces of the superior maxillæ and having two branches which open into the nasal fossæ. 2. In the pl., the lateral branches mentioned above. 3. See *Incisor* FORAMEN. [L, 31, 142.]—**Incurrent c's.** In sponges, the c's that convey water from the exterior to the ciliated chambers. [L, 121, 147.]—**Inferior dental c.** Lat., *canalis alveolaris inferior.* Fr., *c. dentaire inférieure.* Ger., *Unterkieferc'.* The dental c. of the inferior maxilla, which lodges the dental nerve and vessels. [A, 5; C.]—**Inferior semicircular c.** Lat., *canalis semicircularis inferior.* Fr., *c. demi-circulaire inférieure.* Ger., *unterer Bogengang.* See *Posterior semicircular c.*—**Infra-orbital c.** Lat., *canalis infraorbitalis.* Fr., *c.* (ou *conduit*) *infra-orbitaire* (ou *sous-orbitaire*). Ger., *Infraorbitalc', Unteraugenhöhlenc'.* A small c. running obliquely through the bony floor of the orbit. It begins behind as a groove, and divides anteriorly into two branches, one of which descends into the anterior wall of the maxillary sinus, while the other terminates in the infra-orbital foramen. It transmits the infra-orbital artery and nerve. [F; L, 31, 142.]—**Inguinal c.** Lat., *canalis inguinalis.* Fr., *c. inguinal.* Ger., *Leistenc', C. der Scheidenhaut.* A c. about 1¼ inch long, running obliquely downward and inward from the internal abdominal ring to the external abdominal ring, transmitting the spermatic cord in the male and the round ligament of the uterus in the female, and constituting the channel by which an inguinal hernia descends; covered in front by the skin, the superficial abdominal fascia, the aponeurosis of the external oblique muscle, and in its outer third by the internal oblique, and behind by the conjoined tendon of the internal oblique and transversalis muscles, the triangular ligament, the transversalis fascia, and the peritonæum. [C; L, 142, 177.]—**Inner semicircular c.** See *Posterior semicircular c.*—**Inter-c's.** See *Incurrent c's.*—**Intercellular c's.** 1. See *Intercellular* CHANNELS. 2. In botany, c's formed of the interspaces between the vegetable cells. [B, 75.] Cf. *Secretory c.*—**Interlobular biliary c's.** C's situated between the acini of the liver, containing small branches of the portal vein, etc. [L, 318.]—**Internal auditory c.** Lat., *meatus auditorius internus.* Fr., *conduit auditif interne.* Ger., *innerer Gehörgang.* Syn.: *internal auditory meatus.* A c. beginning by a large orifice of varying size on the posterior surface of the petrous bone, and running outward and backward for a distance of about 4 lines, transmitting the auditory and facial nerves and the auditory artery. [F.]—**Internal semicircular c.** See *Posterior semicircular c.*—**Intestinal c.** Lat., *canalis intestinalis.* Fr., *c. intestinal.* Ger., *Darmc'.* That portion of the alimentary c. which is included between the pylorus and the anus. [L, 115.]—**Intrafascicular c.** A c. formed in a fibro-vascular bundle by the destruction of the vascular tissue and parenchyma of the latter. [B, 75.]—**Intralobular biliary c's.** Ger., *Gallencanälchen, Gallencapillaren.* Syn.: *capillary bile ducts.* The radicles of the bile ducts, forming a fine network in and around the hepatic cells and communicating with vacuoles in the cells. [L, 142, 318.]—**Jacobson's c.** See *Tympanic c.* and *Jacobson's* ORGAN. —**Juice-c's.** See *Serous* CANALICULI.—**Knorpelcanäle** (Ger.). See *Cartilage c's.*—**Kopfpulsaderc'** (Ger.). See *Carotid c.*—**Kidney c's.** Ger., *Nierencanäle.* In the *Platelminthes,* tubes which take up excrementitious matter from the tissues and discharge it externally. [L, 146.]—**Kreuzbeinc'** (Ger.). See *Sacral c.* —**Lacrymal c.** Lat., *canalis lacrimalis.* Fr., *c. lacrymal.* Ger., *Thränenc'.* The bony c. (see *Lacrymal* GROOVE) which lodges the nasal duct; in the pl., see CANALICULI *lacrimales.* [L, 13, 31, 142, 172.]—**Lateral c's.** Fr., *canaux latéraux.* Two c's, one on each side, which, in most fishes, communicate with cavities in the head and with the exterior by apertures in each overlying scale; probably sensory in function. [L, 14, 147, 321.]—**Lateral semicircular c.** See *External semicircular c.*—**Laurer-Stiega c.** See *C. of Laurer.*—**Leberblasenc'** (Ger.). See DUCTUS *choledochus communis.*—**Leistenc'** (Ger.). See *Inguinal c.*—**Lingual c.** Fr., *auge.* Ger., *Kehlganggegend.* In the horse, etc., the floor of the mouth, from its lodging the tongue. [L, 13, 32, 44.]—**Loewenberg's c.** That portion of the cochlear c. which is situated above the membrane of Corti. ["Gaz. hebd. de méd. et de chir.," 1864, p. 694 (F).]—**Longitudinal c's.** In the *Cestoda,* c's one on each side of a joint; of uncertain function. [L, 321.]—**Looped c's.** In the *Annulata,* the segmental organs. [L, 176.]—**Macro-myelonal c.** The central c. of the spinal cord. [I, 14; K.]—**Madreporic c.** Fr., *c. madréporique* (ou *pierreux.* In the *Echinodermata,* a c. opening by one end at the madreporite, either exteriorly or into the circumvisceral cavity, and by the other into the circular c. [L, 147.]—**Malar c.** Lat., *canalis zygomatico-facialis.* Fr., *c. malaire.* A c. in the malar bone transmitting the malar division of the temporo-malar branch of the superior maxillary nerve. [C; L, 142.]—**Maxillary c's.** See *Dental c's.*—**Median c.** Lat., *canalis medianus.* 1. The central c. of the spinal cord. 2. The aqueduct of Sylvius. [I, 3, 62; K.]—**Marrow-c's.** See *Cartilage-c's.*—**Medullary c.** Lat., *cavum medullare* (1st def.). Fr., *c. médullaire.* Ger., *Markhöhle* (1st def.). 1. The hollow of a long bone, containing the marrow. [C.] 2. See *Vertebral c.* 3. The central c. of the spinal cord. [I, 2; K.] 4. An Haversian c. [L.] 5. Of De Candolle, the c. inclosing the pith in the stem of plants. [B, 121.] 6. In embryology, see *Medullary* TUBE.—**Medullary cerebro-spinal c.** The central c. of the spinal cord. [I, 23; K.]—**Membranous c. of the cochlea.** Lat., *canalis cochleæ membranaceus, ductus cochlearis.* Ger., *häutiger Schneckenc'.* A c. in the cochlea which follows the turns of the lamina spiralis. It is bounded by the basilar membrane, the membrane of Reissner, and the wall of the cochlea, and communicates with the cavity of the saccule by the canalis reuniens. [L, 142.]—**Membranous semicircular c's.** Lat., *canales semicirculares membranacei.* Fr., *canaux demi-circulaires membraneux.* Ger., *häutige halbkreisförmige Gänge* (oder *halbzirkelförmige Canäle*). See under *Semicircular c's.*—**Muciparous c's.** Fr., *canaux mucipares.* In zoology, see under *Mucous c's.*—**Mucous c's.** Fr., *canaux muqueux.* In general, c's lined with mucous membrane; in zoology, c's found beneath the scales of fishes and other scaly animals, furnishing the mucus which lubricates the surface. [L 14, 147.]—**Müller's c.** See *Müllerian* DUCT.—**Myelonal c.** The central c. of the spinal cord. [I, 14; K.]—**Nasal c.** Lat., *canalis nasalis.* An occasional c. (usually a groove) found in the posterior portion of the nasal bone, transmitting the nasal nerve. [L, 142, 146, 172.] See also *Nasal* DUCT.—**Nasengaumenc'** (Ger.). See *Incisor c.* (1st def.).—**Naso-lacrymal c.** See *Lacrymal c.*—**Naso-palatine c.** See *Incisor c.* (1st def.).—**Nebenhodenc'** (Ger.). See *C. of the epididymis.*—**Neural c.** See *Vertebral c.* and *Medullary* TUBE.—**Neurenteric c.** Lat., *canalis neurentericus.* In the embryo, a passage leading from the posterior part of the medullary tube into the archenteron. [I, 15; K; L.]—**Neuro-central c.** See *Vertebral c.*—**Nuck's c.** See *C. of Nuck.*—**Nutritive c's.** See *Haversian c's* and *Nutrient* FORAMINA.—**Obstetric c.** See *Parturient c.*—**Obturator c.** Lat., *canalis obturatorius.* A c. in the ilium, transmitting the obturator nerve and vein. [L, 31.]—**Ohrc'** (Ger.). See CANALIS *auricularis.*—**Olfactory c.** Fr., *c. olfactif.* In the embryo, the nasal fossæ at an early period of development. [A, 385.]—**Omphalo-mesenteric c.** Fr., *c. omphalo-mésentérique.* In the embryo, a c. which connects the cavity of the intestine with the umbilical vesicle. [L, 49.]—**Optic c.** See *Optic* FORAMEN.—**Osseous semicircular c's.** Lat., *canales semicirculares ossei.* Fr., *canaux demi-circulaires osseux.* Ger., *knöcherne halbzirkelförmige Canäle* (oder *halbkreisförmige Gänge*). See under *Semicircular c's.*—**Palato-maxillary c.** Lat., *canalis palato-maxillaris.* A c. formed by the outer surface of the palate bone and the adjoining surface of the superior maxilla, transmitting the large palatine nerve and blood-vessels. [L, 142.]—**Paragastric c.** In the *Ctenophora,* a c. which branches off on each side of the funnel, runs parallel with the digestive sac, and terminates near the oral extremity. [L, 147.]—**Parturient c.** Fr., *c. de l'accouchement* (ou *vulvo-utérin,* ou *utéro-vagino-vulvaire*). Ger., *Geburtsc', Geburtsweg.* Syn.: *obstetric c.* The channel through which the fœtus passes in parturition, including the pelvic c. and the uterus and vagina considered as a single c.—**Pelvic c.** Fr., *c. pelvien.* Ger., *Beckenc'.* The c. of the pelvis, from the superior to the inferior strait.—**Pericardio-peritoneal c's.** C's which, in some of the lower vertebrates, connect the pericardium and the peritoneal cavity. [L, 200.]—**Perigastric c's.** Fr., *canaux périgastriques.* In the *Hydrozoa,* two c's running parallel to the stomach from the infundibulum, terminating in culs-de-sac near the mouth. [L, 321.]—**Peritoneal c's.** Fr., *canaux péritonéaux.* In the *Plagiostomata,* etc., two c's leading from the peritoneal cavity, one to each side of the cloaca. [A, 385.]—**Perivascular c's.** The circumvascular lymph-spaces. [L, 13.]—**Petit's c.** See *C. of Petit.*—**Petro-mastoid c.** A small c., not always present, at the angle of union between the mastoid and petrous bones, transmitting a small vein from the middle fossa of the skull to the transverse sinus. [F.]—**Plasmatic c's.** Fr., *canaux plasmatiques.* Ger., *plasmatische Canäle.* 1. See *Serous* CANALICULI. 2. See *Haversian c's.* 3. In the *Tæniadæ,* vessels given off from the longitudinal vessels, containing a homogeneous plasmatic fluid and supposed to serve for the nutrition of the animal. [L, 14, 182, 210.]—**Poison-c.** In snakes, the c. in the poison-fang, serving for the ejaculation of the venom. [L, 14.]—**Pore c's, Porous c's.** Fr., *canaux ponctués.* Ger., *Porencanälen.* Fine c's in the ovule, supposed to serve for the entrance of the spermatozooids in fecundation. Similar c's exist also in many other cells. [L, 146.]—**Portal c's.** See *Interlobular biliary c's.* —**Posterior dental c's.** Lat., *canales alveolares posteriores.* Two c's in the superior maxilla which transmit the superior posterior dental vessels and nerves. [L, 31.]—**Posterior ethmoidal c., Posterior internal orbital c.** Lat., *canalis ethmoidalis posterior.* The posterior of two c's formed by the ethmoid bone and the orbital plate of the frontal, transmitting the posterior ethmoidal vessels. [A, 478; L, 31, 142.]—**Posterior palatine c.** Lat., *canalis palatinus posterior.* See *Palato-maxillary c.*—**Posterior semicircular c., Posterior vertical semicircular c.** That one of the semicircular c's (*q. v.*) which has its convexity directed backward and its plane nearly parallel to the posterior wall of the pyramid. [F, 32.]—**Primitive c.** A rudimentary c., especially the neural c. of the embryo. [L.]—**Primitive kidney c's.** Ger., *Urnierencanäle.* C's which, in some of the lower animals, appear to replace the kidneys. [L, 146.]—**Prosodal c.** In sponges, a c. connecting the chamber with the prosopyle. [L, 121.]—**Pseudostomatous c's** [Klein]. The processes of branched cells which extend from a subepithelial or endothelial layer to the free surface, their free ends forming the pseudostomata. [J, 73.]—**Pterygoid c.** Lat., *canalis pterygoideus.* Fr., *conduit ptérygoïdien.* See *Vidian c.*—**Pterygo-palatine c.** Lat., *canalis pterygo-palatinus.* Fr., *c. ptérygo-palatin.* Ger., *Gaumenc'.* A c. formed by the root of the internal pterygoid plate of the sphenoid bone and the sphenoidal process of the palate bone, transmitting the pterygo-palatine artery. [C; L, 31, 142.]—**Pulmo-aortic c.** See DUCTUS *arteriosus.*—**Radial c's.** Fr., *canaux radiaires* (ou *rayonnants*). In the *Ctenophora,* two c's which branch off laterally from the funnel. Each divides into two (the *secondary radial c's*), which themselves divide into two (the *tertiary radial c's*), which open into the ctenophoral c's. [L, 147.]—**Recklinghausen's c's.** See *Serous* CANALICULI (1st def.).—**Reissner's c.** See *Membranous c. of the*

cochlea.—**Resin-c., Resiniferous c.** Fr., *c. résinifère.* A secretory c. in which resin is secreted. [B, 75.]—**Rhachidian c.** Fr., *c. rhachidien.* See *Vertebral c.*—**Rosenthal's c.** See *Spiral c. of the modiolus.*—**Rivinius's c's.** See DUCTS *of Rivini.*—**Rückenmarksc'** (Ger.), **Rückgratsc'** (Ger.). See *Vertebral c.*—**Sacculo-cochlear c.** A c. connecting the sacculus and the cochlea. [L, 294.]—**Sacculo-utricular c.** A c. connecting the sacculus and the utricle. [L, 294.]—**Sacral c.** Lat., *canalis sacralis.* Fr., *c. sacré.* Ger., *Kreuzbeinc'.* The continuation of the vertebral c. in the sacrum. [L, 142.]—**Sagittal semicircular c.** See *Posterior semicircular c.*—**Sand-c.** See *Madreporic c.*—**Schenkelc'** (Ger.). See *Femoral c.*—**Schlemm's c.** See *C. of Schlemm.*—**Schneckenc'** (Ger.). See *Cochlear c.*—**Secondary radial c's.** See under *Radial c's.*—**Secretory c.** Fr., *c. sécréteur.* A passage or interspace between the cells of vegetable tissue, not provided with a proper wall, but lined with special cells secreting various products such as oils, balsams, gum-resins, etc. [B, 121.]—**Semicircular c's.** Lat., *canales semicirculares.* Fr., *canaux demi-circulaires.* Ger., *Bogengänge, halbzirkelförmige Canäle, halbkreisförmige Gänge.* The *osseous semicircular c's* form the second division of the osseous labyrinth of the internal ear lying in the petrous bone, behind the vestibule. They are three in number, known as the *external,* the *superior,* and the *posterior* (*q. v.*). Each begins by an ellipsoidal dilatation, the so-called osseous ampulla. They open into the vestibule by two orifices, the superior and the posterior c's having become united before reaching that point. The *membranous semicircular c's* are contained within the osseous c's, and are of about one fifth the diameter of the latter. Each ampullary dilatation has a sharply defined macula acustica with otoconia, like the utricle, and on its inner side an elevation (crista acustica) covered with ciliated auditory cells, connected with the auditory nerve. [F, 32.]—**Seminal c's.** See CANALES *seminales.*—**Serous c's.** See *Serous* CANALICULI.—**Side c's.** Ger., *Seitencanäle.* Blind c's in two parallel folds of the ventral skin of *Amphioxus,* which have been supposed to have a urinary function. [L, 146.]—**Smaller palatine c.** See *Posterior palatine c.*—**Spermatic c.** Fr., *conduit spermatique.* 1. The vas deferens. [A, 301.] 2. The inguinal c. in the male, from its transmitting the spermatic cord. [A, 478.]—**Spinal c.** See *Vertebral c.*—**Spiral c. of the cochlea.** Lat., *canalis spiralis cochleæ.* Fr., *c. spiral du limaçon.* Ger., *Schneckenc', Schneckengang.* A c. which runs spirally around the modiolus (from left to right in the right ear, from right to left in the left ear, the cochlea being viewed from its base), taking two turns and a half, diminishing in size from the base to the apex, where it terminates in the cupola. The lowermost coil forms the promontory. [L, 142, 172.]—**Spiral c. of the modiolus.** Lat., *canalis spiralis modioli.* A small c. winding around the modiolus in the base of lamina spiralis. [L, 142.]—**Spiroid c. of the temporal bone.** Fr., *c. spiroïde du temporal.* See AQUEDUCT *of Falloppius.*—**Stenson's c.** (not Stenon's or Steno's). See *Stenson's* DUCT.—**Sternal c.** Fr., *c. sternal.* In the *Crustacea,* a c. formed by the union of the mesophragms of the endosternites. [L, 11.]—**Stiebel's c.** The embryonic renal organ in certain *Mollusca.* [L, 121.]—**Stilling's c.** See *Hyaloid c.* and *Central c. of the spinal cord.*—**Stone c.** See *Madreporic c.*—**Suborbital c.** See *Infra-orbital c.*—**Superior-palatine c.** A c. formed by the palate bone and the superior maxilla, transmitting the large palatine nerve and blood-vessels. [C.]—**Superior semicircular c.** Lat., *canalis semicircularis superior.* Fr., *c. demi-circulaire supérieure.* Ger., *oberer Bogengang.* That one of the semicircular c's which has its convexity turned toward the upper surface of the pyramid. [F, 32.]—**Supra-orbital c.** Lat., *canalis supraorbitalis.* A c. at the upper margin of the orbit, transmitting the supra-orbital artery and nerve. [L, 31, 142.] Cf. *Supra-orbital* NOTCH.—**Temporal c.** See CANALIS *zygomatico-temporalis.*—**Temporo-malar c's.** See *Zygomatic c's.*—**Tertiary radial c's.** See under *Radial c's.*—**Thränenc'** (Ger.). See *Lacrymal c.*—**Thoracic c.** Fr., *c. thoracique.* See *Thoracic* DUCT.—**Turpentine-c.** A secretory c. in which turpentine is secreted. [B, 75.]—**Tympanic c.** Lat., *canalis tympanicus.* Fr., *c. tympanique.* Syn.: *Jacobson's c.* A c. which opens on the lower surface of the petrous bone, between the carotid c. and the groove for the internal jugular vein; containing Jacobson's nerve. [F.]—**Unteraugenhöhlenc'** (Ger.). See *Infra-orbital c.*—**Unterkieferc'** (Ger.). See *Inferior dental c.*—**Urethro-sexual c.** The vagina when, as in some mammals, the urethra opens into it. [L, 14.]—**Urinary c.** The urethra. [L, 146.]—**Uro-genital c.** Lat., *canalis uro-genitalis.* Fr., *c.* (ou *sinus*) *uro-génital.* See *Uro-genital* SINUS.—**Uterine c.** Fr., *c. utérin.* The c. of the uterus, including that of its body and that of its neck.—**Utero-cervical c.** [Sims]. Fr., *c. utéro-cervical.* The cavity of the cervix uteri at the time of labor. [A, 301.]—**Utero-vaginal c.** The common c. formed by the uterus and vagina (see *Parturient c.*); in embryology, see *Müllerian* DUCT.—**Vaginal c.** The c. of the vagina.—**Vascular c's.** See *Haversian c's* and *Cartilage-c's.*—**Vector c.** See OVIDUCT.—**Venous c.** See DUCTUS *venosus.*—**Verbindungsc'** (Ger.). See *Connecting c.*—**Vertebral c.** Lat., *canalis vertebralis.* Fr., *c. vertébral.* Ger., *Wirbelc', Rückenmarksc'.* Syn.: *rhachidian c.* The c. which lodges the spinal cord, formed by the vertebræ. [C.]—**Vertebrarterial c.** The osseous c. through which the vertebral artery runs. [L, 14, 153.]—**Vestibular c's.** See *Incurrent c's.*—**Vidian c.** Lat., *canalis vidianus.* Fr., *conduit vidien.* Ger., *Vidi'scher C., Flügelnervgang.* A c. of the sphenoid bone, at the base of the internal pterygoid plate, opening anteriorly into the spheno-maxillary fossa and posteriorly into the foramen lacerum, transmitting the Vidian nerve and vessels. [L, 117.]—**Vitelligene c's.** In comparative anatomy, c's leading to the vitelligene glands. [L, 16.]—**Vulvar c.** Fr., *c. vulvaire* [Dolbeau]. The vestibule of the vagina. [L, 31.]—**Vulvo-uterine c.** Fr., *c. vulvo-utérin.* The vagina. [A, 301.]—**Vulvo-vaginal c.** 1. The vagina and the vulva considered as a single c. 2. The orifice of the hymen. [A, 301.]—**Water-vascular c's.** See *Aquiferous c's* (2d def.).—**Wharton's c.** See *Wharton's* DUCT.—**Wirbelc'** (Ger.). See *Vertebral c.*—**Wirsung's c.** See *Pancreatic* DUCT.—**Zygomatic c's.** See CANALIS *zygomatico-facialis* and CANALIS *zygomatico-temporalis.*—**Zygomatico-facial c.** Lat., *canalis zygomatico-facialis.* See *Malar c.*—**Zygomatico-temporal c.** See CANALIS *zygomatico-temporalis.*

CANALA [Pohl] (Lat.), n. f. Ka^{2}n(ka^{3}n)-a(a^3)′la^3. See SPIGELIA.

CANÄLCHEN (Ger.), n. Ka^{3}n-al′ch^{2}e^{2}n. A little canal. [L, 304.] See CANALICULUS.—**Helle C.** The intercalated convolutions of a uriniferous tubule. [L, 31.]—**Kalkc'.** See CANALICULI *calciferi.*—**Knochenc'.** See CANALICULI *of bone.*—**Saftc'.** See *Serous* CANALICULI.—**Sammelc'.** A collecting tubule of the kidney. [L, 31.]—**Schleifenförmige C.** (oder **Harnc'**). See *Henle's loop-*TUBES and *Uriniferous* TUBULES.—**Verbindungsc'.** A junctional tubule of the kidney. [L, 31.]

CANALICULA (Lat.), n. f. Ka^{2}n(ka^{3}n)-a^{2}l(a^{3}l)-i^{2}k′u^{2}l(u^{4}l)-a^3. See CANALICULUS.

CANALICULAR, adj. Ka^{2}n-a^{2}l-i^{2}k′u^{2}l-a^{3}r. Lat., *canalicularis.* Fr., *canaliculaire.* Permeated with channels. [A, 385.]

CANALICULATE, adj. Ka^{2}n-a^{2}l-i^{2}k′u^{2}l-at. Lat., *canaliculatus.* Fr., *canaliculé, cannelé.* Ger., *gerinnt, gerinnelt.* Channeled or furrowed, having a longitudinal furrow. [A, 301, 385; B, 34, 121.]

CANALICULATI (Lat.), n. m. pl. Ka^{2}n(ka^{3}n)-a^{2}l(a^{3}l)-i^{2}k-u^{2}l-(u^{4}l)-a(a^3)′ti(te). A subsection of the *Gastrocœli.* [L, 227.]

CANALICULE (Fr.), n. Ka^{3}n-a^{3}l-i^2-ku^{6}l. See CANALICULUS.—**C's biliares.** See *Bile-*CANALICULI.—**C's calcifères.** See CANALICULI *calciferi.*—**C's contournés.** See *Convoluted* TUBULES.—**C's de Bellini.** See TUBES *of Bellini.*—**C's de Havers.** See *Haversian* CANALS.—**C's de l'ivoire, C's dentaires.** See *Dentinal* CANALS.—**C's de Rosenmüller.** The canals of the organ of Rosenmüller.—**C. droit.** See *Collecting* TUBULE.—**C's médullaires.** See *Haversian* CANALS.—**C's osseux.** The canaliculi of bone. [J.]—**C's poreux.** See *Pore-*CANALS.—**C's primitifs.** The canaliculi of bone. [J.]—**C's récurrents** [Ranvier]. Those canaliculi of bone which extend nearly to an Haversian canal, but, instead of opening into it, curve sharply and communicate with the other canaliculi. [J, 31.]—**C's urinaires, C's urinifères.** See *Uriniferous* TUBULES.—**C's vasculaires.** See *Haversian* CANALS.

CANALICULÉ (Fr.), adj. Ka^{3}n-a^{3}l-i^{2}k-u^{6}l-a. See CANALICULATE. As a n., in the pl., *c's,* a family of the *Calcaria.* [L, 321.]

CANALICULIZATION, n. Ka^{2}n-a^{2}l-i^{2}k-u^{2}l-i^{2}z-a′shu^{3}n. The formation in calcified cartilage of the canals into which the periosteal processes extend. [J.]

CANALICULUS (Lat.), n. m. Ka^{2}n(ka^{3}n)-a^{2}l(a^{3}l)-i^{2}k′u^{2}l(u^{4}l)-u^{3}s(u^{4}s). Dim. of *canalis,* a canal. Fr., *canalicule.* Ger., *Canälchen.* A small channel.—**Bile-canaliculi, Biliary canaliculi.** Fr., *canalicules biliaires.* See *Intralobular biliary* CANALS.—**Canaliculi accessorii.** Inconstant canals for the transmission of veins at the outer edge of the canalis condyloideus anterior. [L, 31.]—**C. arteriosus.** See DUCTUS *arteriosus.*—**Canaliculi biliferi.** See *Intralobular biliary* CANALS.—**Canaliculi calciferi.** Fr., *canalicules calcifères.* Ger., *Kalkcanälchen.* An old term for the canaliculi of bone (from the mistaken notion that they were filled with lime). [J, 35.]—**C. carotico-tympanicus.** See CANALIS *carotico-tympanicus.*—**Canaliculi chalicophori.** See *Canaliculi calciferi.*—**C. chordæ tympani.** See CANALIS *chordæ tympani.*—**C. communicationis** [Verga]. Syn.: *aquæductus communicationis.* A small canal at the margin of the temporal bone, at the junction of the mastoid and petrous portions, which transmits a vein from the middle fossa of the skull to the transverse sinus. [L, 30.]—**Canaliculi dentium.** See *Dentinal* CANALS.—**Canaliculi haversiani.** See *Haversian* CANAL.—**C. innominatus.** See CANALIS *innominatus.*—**Canaliculi lacrimales.** Fr., *canalicules lacrymaux.* Ger., *Thränenwege, Thränenröhrchen.* Two small excretory channels for the tears, one in the inner third of each lid, running from the puncta lacrimalia to the lacrymal sac, which they enter by a double or a single opening. [F.]—**C. lacrimalis.** See *Lacrymal* CANAL.—**C. laqueiformis.** See *Henle's* LOOP-TUBE.—**C. mastoideus.** See CANALIS *mastoideus.*—**Canaliculi medullares.** See *Haversian* CANALS.—**Canaliculi of bone.** Lat., *canaliculi ossei* (seu *ossium*). Fr., *canalicules osseux* (ou *primitifs*). Ger., *Knochencanälchen.* Minute canals in bone connecting the lacunæ with one another and with the Haversian canals. [J, 30, 32.]—**C. pharyngeus** [Arnold]. A canal formed between the body of the sphenoid bone, the sphenoidal process of the palate bone, and the ala vomeris. [L, 31.]—**Canaliculi pterygoidei.** Certain canals in front of the lingula of the sphenoid bone. [L, 115.]—**C. pteryo-palatinus.** See *Pterygo-palatine* CANAL.—**Canaliculi semicirculares.** See *Semicircular* CANALS.—**Canaliculi seminales.** See *Seminiferous* TUBULES.—**Canaliculi seminales recti.** The straight tubules of the testicle. [L.]—**Canaliculi seminiferi.** See *Seminiferous* TUBULES.—**Canaliculi sphenoidales.** See *Canaliculi pterygoidei.*—**C. spheno-palatinus** [Hyrtl], **C. spheno-pharyngeus.** See *Pterygo-palatine* CANAL.—**C. tympanicus.** See *Tympanic* CANAL.—**Canaliculi vasculosi.** See *Haversian* CANALS.—**Canaliculi vomero-sphenoidales laterales.** See CANALES *vomero-basilares.*—**C. vomero-sphenoidalis medianus.** See CANALIS *vomeris.*—**Collecting c.** A collecting tube of the kidney. [L, 31.]—**Dental canaliculi.** See *Dentinal* CANALS.—**Intercellular canaliculi.** See *Intercellular* CHANNELS.—**Juice-canaliculi, Lymphatic canaliculi.** See *Serous canaliculi.*—**Porous canaliculi.** See *Pore-*CANALS.—**Sapcanaliculi.** See *Serous canaliculi.*—**Serous canaliculi.** Lat., *vasa serosa.* Fr., *canaux* (ou *tubes*) *plasmatiques* (ou *du suc*). Ger., *plasmatische Canäle, Saftcanälchen. Saftröhren, Saftbahnen.* Syn.: *cell-spaces, juice-canals* (or *canaliculi*), *lymphatic channels* (or *canaliculi*), *plasmatic canals* (or *channels,* or *vessels*), *sap-canals* (or *canaliculi*), *serous canals.* 1. Of von Recklinghausen (1862), minute channels supposed to exist in all connective tissue, which are directly continuous with lymphatic vessels and hence may be said to form their origin. 2. Any minute channels supposed to be filled with lymph and connected with the lymph-vessels (*e. g.,* the serous canals supposed to be connected with the cell

cavities in cartilage). See also *Intercellular* SPACES. 3. Minute channels, too small for blood-corpuscles, which were formerly supposed to supply parts with lymph or plasma and to form a direct communication between lymphatic and blood-capillaries. [J, 21, 30, 31, 35, 42.]

CANALIFERUS (Lat.), adj. Ka^{2}n(ka^{3}n)-a^{2}l(a^{3}l)-i^{2}f'e^{2}r-u^{3}s(u^{4}s). From *canalis*, a canal, and *ferre*, to bear. Fr., *canalifère*. Provided with a canal or with canals; in the n. pl., *Canalifera*, as a n., see MURICIDÆ. [L, 108, 180.]

CANALIFORM, adj. Ka^{2}n-a^{2}l'i^2-fo^{2}rm. Lat., *canaliformis* (from *canalis*, a canal, and *forma*, form). Fr., *canaliforme*. Canal-shaped. [B, 121; L, 109.]

CANALIS (Lat.), n. m. and f. Ka^{2}n(ka^{3}n)-a(a^3)'li^{2}s. 1. A canal (*q. v.*). 2. Anciently, a channeled instrument or appliance (*e. g.*, a guttered splint). [A, 325.]—**Canales accessorii c. condyloidei anterioris** [Schwegel]. See *Canales condyloidei antici*.—**Canales aeriferi.** See *Air*-CANALS.—**C. alimentarius.** See *Alimentary* CANAL.—**C. alveolaris anterior.** See *Anterior dental* CANAL.—**C. alveolaris inferior.** See *Inferior dental* CANAL.—**Canales alveolares posteriores.** See *Posterior dental* CANALS.—**C. animæ.** An old name for the trachea. [L, 119.]—**C. arachnoideus.** See *Arachnoid* CANAL.—**C. arteriosus.** See DUCTUS *arteriosus*.—**C. auricularis.** Ger., *Ohrcanal.* The channel produced by a constriction between the auricular and ventricular portions of the fœtal heart at the time of its division into a single auricle and ventricle. [A. Thomson (A, 5); H; L, 142.]—**C. Bichatii.** See *Arachnoid* CANAL.—**C. biflexus.** See *Interungulate* GLAND.—**C. Botalli.** See DUCTUS *arteriosus*.—**C. canaliculatus.** See DUCTOR *canaliculatus*.—**C. carotico-tympanicus.** A canal opening into the carotid canal, transmitting the carotid branch of the tympanic plexus. [L, 31.]—**C. caroticus.** See *Carotid* CANAL.—**C. centralis.** See *Central* CANAL *of the spinal cord*.—**C. centralis cochleæ.** See *Central* CANAL *of the modiolus*.—**C. centralis medullæ spinalis, C. centralis medullaris.** See *Central* CANAL *of the spinal cord*.—**C. centralis modioli.** See *Central* CANAL *of the modiolus*.—**C. centralis myelonis.** See *Central* CANAL *of the spinal cord*.—**C. cervicis uteri.** See CANAL *of the cervix uteri*.—**C. choledochus.** See DUCTUS *choledochus communis*.—**C. chordæ tympani.** A c. in the outer wall of the tympanum, transmitting the chorda tympani. [A, 478; L, 31.]—**Canales circulares.** See *Semicircular* CANALS.—**C. cochleæ.** Fr., *canal du limaçon.* Ger., *Schneckencanal.* See *Cochlear c.*—**C. cochleæ membranaceus.** See *Membranous* CANAL *of the cochlea*.—**C. cochleæ spiralis.** See *Spiral* CANAL *of the cochlea*.—**C. cochlearis.** See *Cochlear c.*—**C. communis nervorum auditus.** See *Internal auditory* MEATUS.—**C. condyloideus.** See *Posterior condylar* FORAMEN.—**C. condyloideus anterior.** See *Anterior condylar* FORAMEN.—**Canales condyloidei antici** [Schwegel]. One or two canals sometimes found near the anterior condylar foramen. [L, 31.]—**C. condyloideus posticus inferior** [Schwegel]. A canal sometimes found in the occipital bone between the condyle and the jugular foramen. [L, 31.]—**C. corporum quadrigeminorum.** See AQUEDUCT *of Sylvius*.—**C. cranio-pharyngeus** [Landzert]. A canal perforating the posterior portion of the body of the sphenoid bone in the fœtus, containing a prolongation of the dura mater; sometimes persistent in infancy. [L, 31.]—**C. cruralis.** See *Femoral* CANAL.—**C. cysticus.** See *Cystic* DUCT.—**C. deferens.** See VAS *deferens*.—**C. eminentiæ quadrigeminæ.** See AQUEDUCT *of Sylvius*.—**C. endolymphaticus** [Hasse]. See AQUEDUCT *of the vestibule*.—**C. epididymidis.** See CANAL *of the epididymis*.—**C. ethmoidalis anterior.** See *Anterior internal orbital* CANAL.—**C. ethmoidalis posterior.** See *Posterior internal orbital* CANAL.—**C. excretorius linguæ.** An occasional blind canal running backward into the substance of the tongue from the foramen cæcum. [L, 31.]—**C. facialis, C. Falloppii.** See AQUEDUCT *of Falloppius*.—**C. fibrosus vasorum tibialum anticorum** [Hyrtl]. A canal formed by the tibio-fibular interosseous ligament behind and by the connective tissue in front, containing the anterior tibial artery and its venæ comites. [L, 31.]—**C. Fontanæ.** See CANAL *of Fontana*.—**C. ganglionaris** [Claudius]. See *Spiral* CANAL *of the modiolus*.—**C. genitalis.** See *Genital* CANAL.—**C. gutturalis.** See *Eustachian* TUBE.—**C. hepatico-cysticus.** See DUCTUS *choledochus communis*.—**C. hyaloideus.** See *Hyaloid* CANAL.—**C. hypoglossi.** See *Anterior condylar* FORAMEN.—**C. incisivus.** See *Incisor* CANAL.—**C. infraorbitalis.** See *Infra-orbital* CANAL.—**C. inguinalis.** See *Inguinal* CANAL.—**C. innominatus** [Arnold]. An occasional canal situated between the foramen ovale and the foramen rotundum, transmitting the superficial petrosal nerve. [L, 31.]—**C. intestinalis, C. intestinorum.** See *Intestinal* CANAL.—**C. lacrimalis.** See *Lacrymal* CANAL; in the pl., *canales lacrimales*, an old name for the secreting duct of the lacrymal gland, for the canaliculi lacrimales, and for the nasal or lacrymal ducts. [F.]—**Canales laqueiformes.** See *Henle's loop*-TUBES and *Uriniferous* TUBULES.—**C. mandibularis.** See *Inferior dental* CANAL.—**C. mastoideus.** The canal for Arnold's nerve; opening just above the stylo-mastoid foramen and transmitting the auricular branch of the pneumogastric nerve. [L, 31.]—**C. maxillaris, C. maxillaris inferior.** See *Inferior dental* CANAL.—**C. maxillaris superior.** See FORAMEN *rotundum*.—**C. medianus, C. medius.** See *Median* CANAL (2d def.).—**C. medullæ spinalis.** See *Vertebral* CANAL.—**C. medullaris.** See *Medullary* CANAL.—**C. membranaceus.** See *Membranous* CANAL *of the cochlea*.—**C. musculo-peroneus** [Hyrtl]. The space between the origins of the flexor longus hallucis and the tibialis posticus, for the lower portion of the peroneal artery. [L, 31.]—**C. musculo-tubarius.** A canal in the petrous bone, containing a portion of the stapedius muscle. [L, 31.]—**C. nasalis, C. nasolacrimalis.** See *Nasal* DUCT.—**C. nasopalatinus membranaceus.** See *Incisor* CANAL.—**C. nervi petrosi profundi minoris.** A canal in the petrous bone, transmitting the small deep petrosal nerve. [L, 31.]—**C. nervi petrosi superficialis majoris.** A canal opening into the aqueduct of Falloppius, transmitting the large superficial petrosal nerve. [L, 31.]—**C. neurentericus.** See *Neurenteric* CANAL.—**C. Nuckii.** See CANAL *of Nuck*.—**Canales nutritii.** See *Haversian* CANALS.—**C. obturatorius.** See *Obturator* CANAL.—**C. opticus.** See *Optic* FORAMEN.—**C. orbitæ nasalis.** See *Nasal* DUCT.—**C. palatinus descendens (seu posterior).** See *Posterior palatine* CANAL.—**C. palatinus tympani.** See *Eustachian* TUBE.—**C. pancreaticus azygos.** See DUCTUS *pancreaticus minor*.—**C. periphericus modioli.** See *Spiral* CANAL *of the modiolus*.—**C. Petiti, C. petitianus.** See CANAL *of Petit*.—**C. pharyngo-tympanicus.** A canal of the embryo which is developed into the Eustachian tube and the tympanum. [Kölliker (H).]—**C. pro tensore tympani.** A rounded canal lying in the anterior wall of the tympanum, close to the hiatus Falloppii. Its tympanic end forms a conical eminence which is prolonged backward into the tympanum and perforated at its summit by an aperture transmitting the tendon of the tensor tympani. [F, 31.]—**C. pterygoideus.** See *Vidian* CANAL.—**C. pterygo-palatinus.** See *Pterygo-palatine* CANAL.—**C. quadrigeminæ.** See AQUEDUCT *of Sylvius*.—**C. radicis.** The canal in the fang of a tooth. [L, 304.]—**C. recurrens.** See *Vidian* CANAL.—**C. Reissnerii.** See *Membranous* CANAL *of the cochlea*.—**C. reuniens** [Hensen]. A narrow canal leading from the saccule into the cochlear canal. [A, 5, 8.]—**C. Rosenthalii.** See *Spiral* CANAL *of the modiolus*.—**C. rotundus.** See FORAMEN *rotundum*.—**C. sacralis.** See *Sacral* CANAL.—**Canales sanguiferi.** The blood-vessels. [L, 146.]—**C. scalarum communis.** See INFUNDIBULUM *cochleæ*.—**C. Schlemmii.** See CANAL *of Schlemm*.—**Canales semicirculares.** See *Semicircular* CANALS.—**Canales seminales.** The seminiferous tubules. [L, 115.]—**C. spheno-palatinus** [Hyrtl], **C. sphenopharyngeus** [Gray]. See *Pterygo-palatine* CANAL.—**C. spinalis.** See *Vertebral* CANAL and *Central* CANAL *of the spinal cord*.—**C. spiralis membranaceus.** See *Membranous* CANAL *of the cochlea*.—**C. spiralis modioli** [Rosenthal]. See *Spiral* CANAL *of the modiolus*.—**C. supraorbitalis.** See *Supra-orbital* CANAL.—**C. tarsi.** See SINUS *tarsi*.—**C. tensoris tympani.** See *C. pro tensore tympani*.—**Canales tubæformes.** See *Semicircular* CANALS.—**C. tuberculorum quadrigeminorum.** See AQUEDUCT *of Sylvius*.—**C. tubo-tympanicus** [Kölliker]. The upper and outer part of the c. pharyngo-tympanicus, above the malleus. [H.]—**C. tympanicus.** See *Tympanic* CANAL.—**C. uro-genitalis.** See *Urogenital* SINUS.—**C. vasculosus epididymidis.** See CANAL *of the epididymis*.—**C. venosus.** See DUCTUS *venosus*.—**C. vidianus.** See *Vidian* CANAL.—**C. vomeris.** A canal situated between the lower surface of the sphenoid bone and the vomer, transmitting blood-vessels to the nose. [L, 31.]—**Canales vomero-basilares, Canales vomero-sphenoidales laterales.** Several small lateral canals situated between the sphenoid bone and the vomer, transmitting small blood-vessels. [L, 31.]—**C. zygomatico-facialis.** See *Malar* CANAL.—**C. zygomatico-temporalis.** The temporal canal of the malar bone, running from its orbital (sometimes by a common opening with the malar canal) to its temporal surface, transmitting a branch of the superior maxillary nerve. [L, 31.]

CANALIZATION, n. Ka^{2}n-a^{2}l-i^{2}z-a'shu^{3}n. Fr., *canalisation*. Ger., *Canalisation, Canalisirung.* 1. The process of the formation of channels, as in the development of blood-vessels; the hollowing out of cells (vasifactive cells) which subsequently unite to form the capillaries and smallest vessels; also the formation of tubes in the solid cords of cells representing the larger vessels by the liberation of the central cells, the latter in many instances becoming blood-corpuscles. [J, 1, 75, 84.] 2. A system of sewerage. [Soyka (A, 319).] 3. Of Neuber, a method of draining wounds without the use of tubes; including (1) *shallow c.*, effected by punching holes in the skin overlying the cavity of the wound; (2) *deep c.*, by securing the edges of skin-flaps in the deep part of a wound, so as to line the cavity with skin. [A. G. Gerster, "N. Y. Med. Jour.," March 8, 1884, p. 261.]

CANALOTTO (It.), n. Ka^{3}n-a^{3}l-ot'to. A place in Sicily, where there is a saline and chalybeate spring. [L, 105.]

CANAMELLE (Fr.), n. Ka^{3}n-a^3-me^{2}l. The *Saccharum officinarum*. [B, 88, 121.]

CAÑAMO (Sp.), n. Ka^{3}n'ya^3-mo. Of the Sp. Ph., cannabis (the fruit and the herb). [B, 95.]

CANANG, n. The *Uvaria* (*Unona*) *odorata*. [B, 88, 121.]

CANANGA, n. In India, the *Ipomœa batatas*. [B, 121.]

CANANGA (Lat.), n. f. Ka^{2}n(ka^{3}n)-a^{2}n^2(a^{3}n^2)'ga^3. 1. Of Aublet, a genus of anonaceous trees and shrubs of tropical America. See GUATTERIA. 2. Of Rumphius, the genus *Unona*. 3. Of Hooker and Thompson, a genus including three species separated from *Unona* and by Baillon made a section of that genus, under the name of *Canangium*. [B, 121, 245.]—**C. odorata** [Roxburgh]. The *Unona odorata*. [B, 121.]

CANANGIUM (Lat.), n. n. Ka^{2}n(ka^{3}n)-a^{2}n(a^{3}n^2)'ji^2(gi^2)-u^{3}m-(u^{4}m). See CANANGA (Lat., 3d def.).

CANAPA (It.), n. Ka^{3}n'a^3-pa^3. See CANAPE.

CANAPACIA [Cæsalpinus] (Lat.), n. f. Ka^{2}n(ka^{3}n)-a^3-pa-(pa^3)'si^2(ki^2)-a^3. The *Artemisia vulgaris*. [B, 88, 121.]

CANAPE (It.), n. Ka^{3}n'a^3-pa. The *Cannabis sativa*. [B, 121.]

CANAPIS (Lat.), n. f. Ka^{3}n(ka^{3}n)'a^3-pi^{2}s. See CANNABIS.

CANAPUCCIA (It.), n. Ka^{3}n-a^3-put'chi^2-a^3. The *Cannabis sativa*. [B, 88, 121.]

CANARD (Fr.), n. Ka^{3}n-a^{3}r. See ANAS.

CANARI (Fr.), n. Ka^{3}n-a^{3}r-e. See CANARIUM.—**C. macaque.** The fruit of *Lecythis grandiflora*. [B, 88, 121.]

CANARIA (Lat.), n. f. Ka^{2}n(ka^{3}n)-a(a^3)'ri^2-a^3. Of mediæval writers, the *Cynodon dactylon*; of Linnæus, the genus *Canarina*. [B, 88, 121.]

CANARIENBAUM (Ger.), n. Ka^{3}n-a^{3}r'i^2-e^{2}n-ba^3-u^{4}m. See CANARIUM.—**Gemeiner C.** See CANARIUM *commune.*

CANARIENGRAS (Ger.), n. Ka^{3}n-a^{3}r'i^2-e^{2}n-gra^{3}s. See CANARY-GRASS.

CANARIENHARZ (Ger.), n. Ka^{3}n-a^{3}r'i^2-e^{2}n-ha^{3}rtz. The gum-resin obtained from *Canarium commune.* [B, 121.]

CANARIENPFLASTER (Ger.), n. Ka^{3}n-a^{3}r'i^2-e^{2}n-pfla^{3}st-e^{2}r. See *Emplastrum* SAPONIS *rubrum.*

CANARIENSAMEN (Ger.), n. Ka^{3}n-a^{3}r'i^2-e^{2}n-za^{3}m-e^{2}n. See CANARY-SEED.

CANARIENVOGEL (Ger.), n. Ka^{3}n-a^{3}r'i^2-e^{2}n-fog-e^{2}l. The *Fringilla canaria.* [B, 180.]

CANARIENZUCKER (Ger.), n. Ka^{3}n-a^{3}r'i^2-e^{2}n-tzuk-e^{2}r. The *Saccharum canariense*, also a popular term for any finely powdered white sugar. [B, 180, 270.]

CANARI-LAUT (Malay), n. The *Terminalia catappa.* [B, 88, 121.]

CANARINA (Lat.), n. f. Ka^{2}n(ka^{3}n)-a^{2}r(a^{3}r)-i(e)'na^3. Fr., *canarine.* Of Linnæus, a genus of campanulaceous herbs of the tribe *Campanuleæ.* [B, 42, 121.]—**C. campanulata** [Linnæus]. A lactescent herb of the Canary Islands, where the buds are eaten. [B, 88, 173, 214.]

CANARINEÆ (Lat.), n. f. pl. Ka^{2}n(ka^{3}n)-a^{2}r(a^{3}r)-i^{2}n'e^2-e-(a^3-e^2). Of Reichenbach and Webb, a subdivision or tribe of the *Campanuleæ*, comprising *Canarina*, etc. [B, 170.]

CANARION (Fr.), **CANARIS** (Fr.), n's. Ka^{3}n-a^{3}r-i^2-o^{2}n^2, -a^{3}r-e. See CANARIUM.

CANARIUM (Lat.), n. n. Ka^{2}n(ka^{3}n)-a(a^3)'ri^2-u^{3}m(u^{4}m). Fr., *canarion, canari, canaris.* Ger., *Canarienbaum.* Of Linnæus, a genus of tropical burseraceous plants. [B, 121.]—**C. album** [Räuschel]. Syn.: *Pimela alba* [Loureiro]. A shrub of China, Cochin-China, and the Philippine Islands, furnishing árbol-a-brea resin. [B, 2, 214.]—**C. balsamiferum.** Of Willdenow, the *Bosweltai glabra;* of Moore, the *C. zeylanicum.* [B, 212, 214.]—**C. bengalense** [Roxburgh]. A tree of Silhet, furnishing a clear amber-colored resin which, on hardening, becomes brittle and resembles copal, for which it is said to be used in Calcutta. [B, 172, 180.]—**C. commune** [Linnæus]. Ger., *gemeiner Canarienbaum.* The Java almond-tree, elemi-tree, growing throughout the East Indies. A yellowish-white fragrant gum (Manila elemi) exudes from the stem and is used as an application to sluggish ulcers. The bark yields a limpid oil of a terebinthaceous odor which, on standing, congeals into a buttery substance resembling camphor and having properties like those of copaiba balsam. The 3-sided nut (Chinese almond) contains a single edible seed of almond-like taste, from which bread is made in the Celebes, although too free indulgence in the nut is said to cause diarrhœa. An oil expressed from the kernels is used for illumination and, when fresh, as a condiment. [B, 172, 185.]—**C. decumanum** [Gärtner]. A Molucca tree. [B, 214.]—**C. mauritianum.** Syn.: *Colophonia mauritiana* [De Candolle], *Bursera orientalis* [Lamarck] (seu *paniculata* [Lamarck]). A tree of the Mauritius. The wood yields a resinous juice, smelling like camphor and turpentine, used by the natives like colophony. [B, 42, 93, 173.]—**C. mehenbethene** [Gärtner]. The *C. commune.* [B, 214.]—**C. microcarpum** [Willdenow]. See AMYRIS *oleosa.*—**C. pimela** [König]. Syn.: *Pimela nigra* [Loureiro]. A tree of China and Cochin-China. [B, 214.]—**C. silvestre** [Gärtner]. The camacoan-tree of Amboyna; said to furnish Caragua gum. [B, 121, 214.]—**C. sinense** [Rumphius]. See *C. album.*—**C. strictum** [Roxburgh]. The black-dammar-tree; a large Malabar tree furnishing black dammar. [B, 172.]—**C. vulgare.** See *C. commune.*—**C. zephyrinum** [Rumphius]. The *Canary barat* of Rumphius; a variety of *C. commune.* [B, 214.]—**C. zeylanicum** [Blume]. A Cingalese species closely related to and perhaps identical with *C. commune.* [B, 212.]

CANARY ARCHIL, n. Ka^{2}n-a'ri^2 a^{3}rk'i^{2}l. See ROCCELLA *tinctoria.*

CANARY BARAT, n. See CANARIUM *zephyrinum.*

CANARY-CREEPER, n. The *Tropæolum aduncum* (*canariense*). [B, 34, 275.]

CANARY-FLOWER, n. The *Tropæolum peregrinum.* [B, 185.]

CANARY-GRASS, n. Ger., *Canariengras.* The *Phalaris canariensis.* [B, 34.]

CANARY-SEED, n. Ger., *Canariensamen.* The hulled seeds of *Phalaris canariensis.* [B, 270, 275.]

CANARY-WEED, n. A Canary Island species of *Roccella.* [B.]

CANARY WINE, n. See under WINE.

CANARY-WOOD, n. The *Persea indica* (*canariensis*). [B, 19, 185, 275.]

CANATTE-CORONDE, n. A Ceylon tree producing a bitter variety of cinnamon. [Bory (B, 121).]

CANAVALI, n. 1. In India, the *Canavalia ensiformis.* 2. Of Adanson, the genus *Canavalia.* 3. Of Commerson, an undetermined species of *Commelina.* [B, 42, 88, 121.]

CANAVALIA (Lat.), n. f. Ka^{3}n-a^3-va^{3}l'i^2-a^3. From *canavali* (*q. v.*). Fr., *canavalie.* Of Adanson, a genus of tropical papilionaceous prostrate or twining herbs of the tribe *Phaseoleæ.* [B, 42, 121.]—**C. cathartica** [Dupetit-Thouars]. Syn.: *Canavali cathartica.* An East Indian species; purgative. [B, 121, 173.]—**C. ensiformis** [De Candolle], **C. gladiata** [De Candolle], **C. incurva** [De Candolle]. Syn.: *Dolichos ensiformis* [Linnæus] (seu *acinaciformis* [Jacquin], seu *gladiatus* [Jacquin]). The horse-bean or sword-bean, the "overlook" of the West Indies (so called because planted on the boundaries of plantations and supposed to act as a watchman); a perennial twining species growing in India, the West Indies, and South America. Several varieties are cultivated for their edible pods. The seeds are said to be poisonous. The plant has been used for various cachexiæ. [B, 172, 180, 212.]—**C. lineata** [De Candolle]. See *C. obtusifolia.*—**C. Loureirii** [G. Don]. See *C. ensiformis.*—**C. maritima** [Dupetit-Thouars]. Syn.: *Canavali maritima.* An East Indian purgative species. The leaves are applied to glandular swellings. [B, 121, 173.]—**C. obtusifolia** [De Candolle], **C. rosea** [De Candolle], **C. rutilans** [De Candolle]. Syn.: *Rhynchosia rosea* [De Candolle], *Dolichos obcordatus* [Roxburgh] (seu *rotundifolius* [Roxburgh]). The seaside bean; a species found on tropical sea-shores. [B, 172, 180, 212.]—**C. virosa** [Wight and Arnott]. Syn.: *Dolichos virosus* [Roxburgh]. A wild variety of *C. ensiformis*, distinguished by its bitter seeds. [B, 180, 212.]

CANAVEILLES (Fr.), n. Ka^{3}n-a^3-ve^{2}l-y'. A place in the department of the Pyrenées-Orientales, France, where there is a spring containing sodium sulphide. [A, 385; L, 49.]

CANCALE (Fr.), n. Ka^{3}n^2-ka^{3}l. A maritime health-resort in the department of Ile-et-Vilaine, France. [A, 385; L, 49.]

CANCAMON (Lat.), **CANCAMUM** (Lat.), n's n. Ka^{2}n^2(ka^{3}n^2)'-ka^{2}m(ka^{3}m)-o^{2}n, -u^{3}m(u^{4}m). Gr., κάγκαμον. Fr., *cancame.* Syn.: *balsamum c.* 1. Of Dioscorides, a resinous gum of Arabia; supposed to have been derived from *Balsamodendron Kataf.* 2. Gum anime. [B, 88, 119, 121, 180.] Cf. BALSAMUM *c.*—**C. Graecorum.** See COURBARIL.

CANCANON (Lat.), n. n. Ka^{2}n^2(ka^{3}n^2)'ka^{2}n(ka^{3}n)-o^{2}n. See CACALIA.

CANCAVI, n. The *Jatropha manihot.* [B, 88.]

CANCELLARIA [Lamarck] (Lat.), n. n. pl. Ka^{2}n(ka^{3}n^2)-se^{2}l-(kel)-la(la^3)'ri^2-a^3. A family of the *Siphonochlamyda.* [L, 121.]

CANCELLARIADÆ (Lat.), n. f. pl. Ka^{2}n(ka^{3}n^2)-se^{2}l(ke^{2}l)-la^{2}r(la^{3}r)-i(i^2)'a^{2}d(a^{3}d)-e(a^3-e^2). A family of the *Proboscidifera.* [L, 282.]

CANCELLARIDÆ (Lat.), n. f. pl. Ka^{2}n(ka^{3}n^2)-se^{2}l(ke^{2}l)-la^{2}r-(la^{3}r)'-i^{2}d-e(a^3-e^2). A family of the *Toxiglossa.* [L, 121.]

CANCELLATE, CANCELLATED, CANCELLOUS, adj's. Ka^{2}n'se^{2}l-at, -at-e^{2}d, -se^{2}l-u^{3}s. Lat., *cancellatus.* Fr., *cancellé, criblé, ridé.* Ger., *gitterig, gitterartig, gitterförmig.* Having a lattice-like structure. [A, 318; B, 19, 121.] See CANCELLUS.

CANCELLUS (Lat.), n. m. Ka^{2}n(ka^{3}n^2)-se^{2}l(ke^{2}l)'lu^{3}s(lu^{4}s). Dim. of *cancer* (*q. v.*). Gr., κιγκλίς. Fr., *cancelle.* Ger., *Gitter.* An individual element of a lattice-like structure. The cancelli of bone are the columns or plates making up the framework of its spongy substance, so arranged in arches as to combine great strength with lightness and elasticity. [A, 70.]

CANCER (Lat.), n. m. Ka^{2}n(ka^{3}n^2)'su^{5}r(ke^{2}r). Gen., *can'cri, can'ceris.* Gr., καρκῖνος, καρκίνωμα (3d def.). Heb., *deest* (1st def.), *ikut* (3d def.). Ar., *acrabb* (1st def.), *ikila* (3d def.). Fr., *c., crabe* (1st def.), *écrevisse* (1st def.), *cancre* (1st def.). Ger., *Krebs* (1st and 3d def's). It., *cancro* (1st and 3d def's). Sp., *cangrejo* (1st def.), *c.* (3d def.). 1. A crab, including the zodiacal sign so called. [A, 325.] 2. A cancellus (*q. v.*). [Apuleius (A, 318).] 3. A general term for malignant tumors, infiltrations, and ulcers (perhaps from the fancied resemblance of the enlarged veins often surrounding the lesion to a crab's claws, or from an ancient belief that an animal was devouring the diseased part); restricted by Virchow to those that are partly or wholly of epithelial origin. 4. An old name for a certain bandage for the head (from its having been cut into a number of tails resembling a crab's legs). [A, 301, 322, 325, 385; L, 313.]—Cf. CARCINOMA.—**Acinous c., Acute c.** See *Medullary* CARCINOMA and *Medullary* SARCOMA.—**Adenoid c.** See ADENO-CARCINOMA and *Cylindrical* EPITHELIOMA.—**Alveolar c.** Lat., *c. alveolaris.* Fr., *c. alvéolaire.* Any c. of an alveolar structure; one in which the cells of epithelial origin are packed in regular alveoli bounded by trabeculæ of fibrous tissue. The term has been improperly restricted to colloid c. [E; L, 44, 314.]—**Apinoid c.** A variety of scirrhus resembling an unripe pear in section. [L, 317.]—**Aquatic c.** See *C. aquaticus.*—**Areolar c.** Fr., *c. aréolaire* [Cruveilhier]. See *Colloid c.*—**Atrophic c., Atrophying c.** See *Cicatrizing c.*—**Black c.** See *Melanotic c.*—**Bunioid c.** Fr., *c. bunioïde.* An old term for a turnip-shaped scirrhus. [A, 301.]—**Calcifying c.** A c. in which calcareous matter has been deposited. [L, 314.]—**Calculi cancrorum.** See ASTACOLITH.—**C. albus.** See *C. aquaticus.*—**C. à myéloplaxes** (Fr.). See OSTEOSARCOMA.—**C. anthracinus.** A c. which begins as a blackish speck and develops into a mulberry-like excrescence. [L, 135.]—**C. apertus.** Gr., καρκίνος ἑλκωθείς. Fr., *c. ouvert.* Ger., *offener Krebs, Krebsgeschwür.* An open c.; one in a state of ulceration. [L, 44, 135.]—**C. aquaticus.** Fr., *c. aquatique, c. aqueux.* Ger., *Wasserkrebs.* Water-c. (or canker); an old term for various gangrenous affections of the mouth, perhaps from the profuse flow of saliva. [D, 75; E; L, 41, 44.]—**C. aréolaire** [Cruveilhier] (Fr.). See *Colloid c.*—**C. aréolaire pultacé** [Cruveilhier] (Fr.). A variety of colloid c. in which the areolæ contain an opaque, yellowish, tallow-like material resembling casein. [L, 316.]—**C. astacus** [Linnæus]. See ASTACUS *fluviatilis.*—**C. atrophique** (Fr.). See *Cicatrizing c.*—**C. Bassii.** An eighteen-tailed bandage. [L, 135.]—**C. bâtard** [Ecker] (Fr.). See EPITHELIOMA.—**C. Bernhardus** [Linnæus]. See PAGURUS *Bernhardus.*—**C. blastema.** A supposititious structureless fluid from which c. has been supposed to be developed. [L, 317.]—**C. caminariorum londinensium.** See *Chimney-sweepers' c.*—**C. cartilagineux** (Fr.). See *Chondroid c.*—**C. cell.** See under CELL.—**C. cérébriforme** (Fr.). See *Medullary* SARCOMA.—**C. chondro-fibreux** (Fr.). See *Chondroid c.*—**C. cysticus.** See *Colloid c.* and *Cysto*-CARCINOMA.—**C. de Galien** (Fr.). See *C.* (4th def.).—**C. dendritique** (Fr.). See PAPILLOMA.—**C. des fumeurs** (Fr.). See *Smokers' c.*—**C. des ramoneurs** (Fr.). See *Chimney-sweepers' c.*—**C. dur** (Fr.). See *Scirrhous c.*—**C. e fuligine.** See *Chimney-sweepers' c.*—**C. encéphaloïde** (Fr.). See *Medullary* SARCOMA.—**C. en cuirasse** (Fr.). See SQUIRRHE *en cuirasse.*—**C.**

en nappe (Fr.). A c. which extends in the form of a layer, as on a mucous surface, without penetrating to any considerable depth. [A, 273.]—**C. en plaque** (Fr.). See Squirrhe *en cuirasse*.—**C. exulceratus.** See *C. apertus.*—**C. fibreux** (Fr.), **C. fibroïde** (Fr.), **C. fibro-plastique** (Fr.). See *Fibrous c.* and *Scirrhous c.*—**C. fluviatilis.** See Astacus *fluviatilis*.—**C. fragile** (Fr.). See Epithelioma.—**C. fongoïde** (Fr.), **C. fungoides, C. fungosus.** See Fungus *hæmatodes* and *Scirrhous c.*—**C. Galeni.** See *C.* (4th def.).—**C. gammarus.** See Homarus *vulgaris*.—**C. gélatiniforme** [Cruveilhier] (Fr.). See *Colloid c.*—**C. genuinus occultus.** See *C. occultus.*—**C. glaucoïde** (Fr.). See Chloroma.—**C. globosus.** A c. of a globular shape. [L, 135.]—**C. gommeux** (Fr.). See *Colloid c.*—**C. hématoïde** (Fr.). See Fungus *hæmatodes*.—**C. juice.** Fr., *suc cancéreux.* Ger., *Krebsmilch.* A thick, glairy, or oily liquid, of a creamy, yellow, or pink color, contained in the cavities of a c. or infiltrated into the tissue, holding the c. cells in suspension. [A, 2.]—**C. kystique** (Fr.). See *Colloid c.*—**C. latens.** See *C. occultus.*—**C. latro** [Linnæus]. See Birgus *latro*.—**C. lenticularis** [Schuh]. See Squirrhe *en cuirasse*.—**C. leuce.** Medullary sarcoma. [G, 15.]—**C. lupus.** Lupia cancrosa (*q. v.*). [G, 17.]—**C. mænas** [Linnæus]. The common crab. [L, 303.]—**C. manifestus.** See *C. apertus.*—**C. marinus.** See Homarus *vulgaris*.—**C. médullaire** (Fr.), **C. medullaris.** See *Medullary* carcinoma and *Medullary* sarcoma.—**C. melæneus, C. mélane** (Fr.), **C. mélanique** (Fr.), **C. melanodes, C. mélanoïde** (Fr.), **C. mélanotique** (Fr.). See *Melanotic* c. and Keloid.—**C. mollis, C. mou** (Fr.). See *Medullary* carcinoma and *Medullary* sarcoma.—**C. mundatorum.** See *Chimney-sweepers'* c.—**C. myrmecia.** See *C. verrucosus.*—**C. napiforme** (Fr.). See *Bunioid c.*—**C. nobilis** [Schrank]. See Astacus *fluviatilis*.—**C. noir** (Fr.). See *Melanotic c.*—**C. occultus.** Gr., κρυπτὸς καρκῖνος. An old term for a c. that had not yet assumed the gross characteristic features, especially a scirrhous c. of the mamma in which the veins about the nipple had not yet become enlarged; also for a c. that had not ulcerated. [A, 301; L, 135.]—**C's of cicatrices.** A variety of epithelioma growing in or upon scars. [Paget (L).]—**C. of the blood.** Leucocythæmia. [Bard, "Lyon méd.," 1888, No. 7; "Lancet," Mar. 3, 1888; "N. Y. Med. Jour.," Mar. 24, 1888, p. 326.]—**C. oris.** See *C. aquaticus.*—**C. ossis.** See *Fungous* arthritis.—**C. ouvert** (Fr.). See *C. apertus.*—**C. pagurus** [Linnæus]. A Mediterranean variety of *C.* (1st def.), furnishing chelæ cancrorum. [B, 119; L, 105.]—**C. par infection** (Fr.). See *Secondary c.*—**C. phagedæna.** A c. that begins as a pustule which suddenly ulcerates and progresses rapidly. [G, 17.]—**C. primitif** (Fr.). See *Primary c.*—**C. pullulans.** A c. that, having ulcerated, occasionally granulates and gives rise to delusive hopes of a cure. [L, 83.]—**C. pultacé** (Fr.). See *Colloid c.*—**C. purgatoris infumiculi.** See *Chimney-sweepers' c.*—**C.-root.** A popular name for various plants that are applied to cancerous ulcers, including *Conopholis* (*Orobanche*) *americana*, *Epiphegus* (*Orobanche*) *virginiana*, and *Aphyllon uniflorum.* [B, 19.]—**C. ruricola.** A species of *C.* (1st def.) from which, when exposed to heat, an oil exudes that is used for rheumatism by the negroes in the French colonies. [L, 105.]—**C. scirrhosus.** See *Scirrhous* c.—**C. scroti.** See *Chimney-sweepers'* c.—**C. serum.** See *C. juice.*—**C. sous-cutané** (Fr.). See Carcinoma *tuberosum* and Keloid.—**C. spongiosus.** See Fungus *hæmatodes*.—**C. squilla.** See Palæmon *squilla*.—**C. squirrheux** (Fr.). See *Scirrhous c.*—**C. terebrans.** See Epithelioma.—**C. tuberosus.** See Carcinoma *tuberosum* and Keloid.—**C. verrucosus.** Fr., *carcine verruqueuse.* Epithelioma with warty hypertrophy of the epidermis. [G.]—**C. vulgaris.** See *Scirrhous c.*—**C'wort.** The *Linaria spuria* and *Linaria elatine*, also the genus *Veronica.* [B, 275.]—**C. xanthosus.** See Chloroma.—**Cancrorum chelæ.** See *Chelæ cancrorum.*—**Cancrorum concrementa** (seu **lapides,** seu **lapilli,** seu **oculi**). See Astacolith.—**Cauliflower c.** A form of ulcerated epithelioma in which the surface is deeply fissured, so as to look like a cauliflower. [A, 365.]—**Cavernous c.** A c. containing one or more cavities formed by fatty metamorphosis or simple atrophy. [A, 291.]—**Cellular c., Cerebriform c.** See *Medullary* carcinoma and *Medullary* sarcoma.—**Chelæ cancrorum.** Crabs' claws; the ends of the claws of *C. pagurus*; formerly official. [B, 119.]—**Chimney-sweeps'** (or **sweepers'**) **c.** Lat., *c. caminariorum*, *c. e fuligine*, *carcinoma asbolicum.* Fr., *c. des ramoneurs.* Ger., *Schornsteinfegerkrebs, Hodensackskrebs, Russkrebs, Theerkrebs.* Syn.: *oscheocarcinoma.* A form of epithelioma of the scrotum, so called from its having been generally observed in the chimney-sweepers of London, in whom it was attributed to the irritant action of soot. It begins as a tubercle, generally at the lower and fore part of the scrotum, which becomes covered with a crust, ulcerates, and spreads so as to expose the testicles, which are said to undergo destruction occasionally, but not until after the inguinal glands have become involved. In some cases a verrucous condition takes place, with hardly any ulceration. It is commonly met with in middle life, but has been observed in childhood. [A, 326; G. M. Humphry (A, 279).]—**Chondroid c.** Fr., *c. chondroïde* [Récamier]. A variety of scirrhous c. which, on section, presents a shining, bluish-white look. [L, 317.] See also Chondroma.—**Chronic c.** See *Scirrhous c.*—**Cicatricial pavement-cell c.** A variety of superficial epithelioma, of slow growth, occurring mostly on the face in old persons, characterized by gradual retrogression and resorption of a great portion of the cells and cicatricial contraction of the stroma, so that superficial infiltrated cicatrices are formed at the periphery without previous ulceration. [A, 291.]—**Cicatrizing c.** A variety of c., especially scirrhus, in which atrophy and shrinking are prominent phenomena. [L, 311.]—**Clay-pipe c.** See *Smokers' c.*—**Colloid c.** Lat., *c. alveolaris*, *carcinoma alveolare.* Fr., *c. colloïde* (ou *gélatiniforme*, ou *gommeux*, ou *aréolaire*, ou *pultacé*). Ger., *Gallertkrebs.* A form of c. in which the alveoli contain colloid material (see Colloid) regarded as arising from a transformation of the epithelial cells; commonly found in the viscera. [E.]—**Connective-tissue c.** See *Scirrhous c.*—**Cylinder-cell c., Cylindriform epithelial c.** See *Cylindrical* epithelioma.—**Cystic c.** Lat., *c. cysticus.* Fr., *c. cystique.* See *Colloid c.* and *Cysto*-carcinoma.—**Dendritic c.** Fr., *c. dendritique.* See Papilloma.—**Duct c.** A subvariety of columnar epithelioma. [E.]—**Eburneous c.** Lat., *carcinus eburneus.* See Sclerema.—**Embolic c.** Ger., *embolischer Krebs.* A secondary c. due to embolic infection. [Birch-Hirschfeld (A, 319).]—**Encephaloid c.** [Laennec], **Encephalomatous c.** See *Medullary* sarcoma.—**Endothelial c.** See Endothelioma.—**Epithelial c.** See Epithelioma.—**Epithelial c. with cylindrical cells.** See *Cylindrical* epithelioma.—**Fasciculated c.** See *Spindle-celled* sarcoma.—**Faux c.** (Fr.). See Epithelioma.—**Fibrous c.** Fr., *c. fibreux*, *c. fibroïde.* Ger., *Faserkrebs.* 1. See *Scirrhous c.* 2. Of Paget, a recurrent fibroid tumor. [L, 88.]—**Flat epithelial c.** [Thiersch]. Ger., *Plattenepithelkrebs, Oberhautcarcinom, Hautkrebs.* A superficial cutaneous epithelioma with flat cells. [L, 44, 309, 310, 311.]—**Fungous c.** See Fungus *hæmatodes*.—**Gelatiniform c., Gelatinous c.** See *Colloid c.*—**Gland c., Glandular c., Glandular-cell c.** See Adeno-carcinoma and *Cylindrical* epithelioma.—**Green c.** Fr., *c. glaucoïde.* See Chloroma.—**Gum c., Gummous c.** See *Colloid c.*—**Hæmatoid c.** See Fungus *hæmatodes*.—**Hard c.** See *Scirrhous c.*—**Hidden c.** See *C. occultus.*—**Lapides cancri** [Dan. Ph.] (seu **cancrorum**). See Astacolith.—**Lapides cancrorum acetati.** Calcium acetate formed by the action of vinegar on astacoliths. [B, 119.]—**Lapides cancrorum citrati.** Calcium citrate formed by the action of lime-juice on astacoliths. [B, 119.]—**Lapides cancrorum præparati** [Gr. Ph., Russ. Ph.]. A fine whitish powder prepared by treating crabs' eyes after the method used for testa præparata. [B, 95.]—**Lapilli** (seu **Lapis** [Netherl. Ph.] **cancrorum**). See Astacolith.—**Lardiform c., Larinoid c.** Fr., *c. lardiforme*, *c. larinoïde.* A variety of scirrhous c. resembling lard. [A, 301.]—**Latent c.** See *C. occultus.*—**Lenticular c.** Lat., *c. lenticularis* [Schuh]. Fr., *squirrhe pustuleux* (ou *disseminé*). See Squirrhe *en cuirasse*.—**Lipomatous c.** A c. with an abundance of fat-cells in the stroma. [L, 314.]—**Lupous c.** See Lupia *cancrosa*.—**Magisterium oculorum cancri.** Calcium carbonate made by washing astacoliths with water and pulverizing. [B, 119.] See Creta *præcipitata*.—**Mammary c.** 1. C. of the mammary gland. 2. See *Mastoid c.* [L, 317.]—**Mastoid c.** A variety of medullary sarcoma which, on section, looks like the boiled udder of a cow. [L, 316.]—**Medullary c.** See *Medullary* sarcoma and *Medullary* carcinoma.—**Melanoid c., Melanotic c.** Lat., *c. melanodes.* Fr., *c. mélanique.* Ger., *melanotischer Krebs, Pigmentkrebs.* Black c.; a malignant growth (carcinomatous or sarcomatous) in which there is a deposit of melanin. [L, 311.]—**Metastatic c.** See *Secondary c.*—**Milt-like c.** See *Medullary* sarcoma.—**Mucous c.** Ger., *Schleimgerüstkrebs.* See *Colloid c.*—**Multicellular c.** See *Medullary* carcinoma and *Medullary* sarcoma.—**Myxomatous c.** A c. in which the stroma has undergone myxoid transformation. [L, 314.]—**Napiform c.** Fr., *c. napiforme.* See *Bunioid c.*—**Nephroid c.** A variety of medullary sarcoma resembling a kidney in section. [L, 316.]—**Obsolescent c.** See *Cicatrizing c.*—**Occult c.** See *C. occultus.*—**Oculi cancrorum.** See Astacolith.—**Open c.** See *C. apertus.*—**Osteoid c.** Fr., *c. ostéoïde.* Ger., *Osteoidkrebs.* 1. A variety of c. in which there is a deposit of osseous matter. 2. Osteoid chondroma. 3. Osteosarcoma. [L, 311, 315, 317.]—**Osteolytic c.** Cancerous infiltration of bone without the formation of a distinct tumor, resembling a local osteomalacia. [L, 315.]—**Pancreatic c.** A variety of schirrhus resembling the pancreas in structure. [L, 317.]—**Papillary c., Papillary epithelial c.** See *Papillary* epithelioma.—**Pavement-cell c.** See Cancroïde.—**Pigmentary c., Pigment c.** See *Melanotic c.*—**Placental c.** A variety of medullary sarcoma resembling the placenta in structure. [L, 312.]—**Primary c.** Fr., *c. primitif.* Ger., *primärer Krebs.* A c. occurring as the original manifestation of cancerous disease; one that is not due to infection from a preceding c.—**Pulpy c., Pultaceous c.** Fr., *c. pultacé.* See *Colloid c.*—**Pulvis e chelis cancrorum compositus.** Fr., *poudre de pinces de cancre.* An old preparation consisting of 1 part each of prepared mother of pearl, prepared crabs' eyes, prepared red coral, white amber, and hartshorn prepared without fire (impure calcium phosphate) and 5 parts of crabs' claws [Würtemb. Ph., 1798]; or of 1 part each of oriental bezoar, oriental pearls, red coral, white amber, calcined hartshorn, and crabs' eyes and 6 parts of crabs' claws [Palat. Disp., 1764]; frequently mentioned by Sydenham. [B, 90, 119.]—**Ramose c.** A branching variety of scirrhus. [L, 312.]—**Rapiform c.** Fr., *c. rapiforme.* See *Bunioid c.*—**Retractile c.** Fr., *c. rétractile. c. avec rétraction du mamelon.* A c. of the mamma with retraction of the nipple. [A, 301.]—**Rodent c.** See Epithelioma.—**Sal oculorum cancri.** See *Lapides cancrorum acetati.*—**Sarcomatous c.** Lat., *carcinoma sarcomatodes.* Ger., *sarkomatöses Carcinom.* An adeno-carcinoma with sarcomatous degeneration of the interstitial connective tissue. [Rindfleisch (A, 326); G.]—**Scirrho-c., Scirrhous c.** Fr., *c. dur*, *squirrhe.* Ger., *Skirrhus.* Hard c., scirrhus; a form of carcinoma in which induration is a prominent feature, forming a tumor of a stony feel which creaks under the knife on section and presents a bluish-white or grayish-white appearance. Its characteristics are those of texture, not of essential structure, being due to an abundance of fibrous tissue in the stroma. [A, 385; L.] Cf. Scirrhus.—**Secondary c.** Fr., *c. par infection.* Ger., *secundärer Krebs.* Syn.: *metastatic c.* A c. formed as the result of infection from a preceding c. in another situation.—**Shrinking c.** See Scirrhus.—**Simple c.** See *Scirrhous c.*—**Smokers' c.** Fr., *c. des fumeurs.* Epithelioma of the lips or mouth attributed to the action of tobacco smoke or the mechanical irritation of a pipe. [L, 49.]—**Soft c.** Lat., *c. mollis.* Fr., *c. mou.* See *Medullary* carcinoma and *Medullary* sarcoma.—**Solanoid c.** A c. resembling a potato in section. [L, 316.]—**Soot c.** Lat., *c. e fuligine.* Epithelioma due to the irritant action of soot on the skin; most common in the form of chimney-sweepers' c. (*q. v.*). [L, 312.]—**Squamous-celled c., Squamous epithelial c.** See Cancroïde.—**Stone c.** See Scirrhus.—**Teleangiectatic c.** Ger., *teleangiektatischer Krebs.* Fungus hæmatodes (*q. v.*). [A, 326.]—**Tinctura oculorum cancrorum.** See *Tinctura* coral-

LIORUM.—**Tuberous c.** See CARCINOMA *tuberosum* and KELOID.—**Tubular epithelial c.** See CYLINDROMA.—**Ungulæ cancrorum.** See *Chelæ cancrorum*.—**Villous c.** Fr., *c. villeux*, *c. dendritique*. Ger., *Zottenkrebs* [Rokitansky]. See PAPILLOMA.—**Wart-like c.** See *Papillary* EPITHELIOMA.—**Water c.** See *C. aquaticus*.—**Withering c.** See *Cicatrizing c.*

CANCÉREUX (Fr.), adj. Ka^{3}n^2-sa-ru^5. See CANCEROUS.

CANCERHEMIE (Fr.), n. Ka^{3}n^2-se^{2}r-a-me. The supposed presence of cancer elements in the blood. [A, 385.]

CANCERIDÆ (Lat.), n. f. pl. Ka^{2}n(ka^{3}n^2)-se^{2}r(ke^{2}r)'i^{2}d-e-(a^3-e^2). Fr., *cancériens*, *cancérides*. A family of the *Cyclometopita*. [L, 303.]

CANCERIDEOUS, adj. Ka^{2}n-su^{5}r-i^{2}d'e-u^{3}s. Lat., *cancerideus*. Fr., *cancéridé*. Resembling a crab. [L, 180.]

CANCERIDES (Lat.), n. m. pl. Ka^{2}n(ka^{3}n^2)-se^{2}r(ke^{2}r)'i^{2}d-ez-(e^{2}s). Fr., *cancérides*. See BRACHYURA.—**C. littorales** [Duméril]. See DROMIADÆ.—**C. pelagii** [Latreille]. See PORTUNIDÆ.—**C. vigiles** [Latreille]. See PINNOTHERIDÆ.

CANCÉRIENS (Fr.), n. pl. Ka^{3}n^2-sa-re-a^{3}n^2. See CANCERIDÆ.

CANCÉRIFORME (Fr.), adj. Ka^{3}n^2-sa-re-fo^{2}rm. See CANCERIDEOUS; as a n., in the pl., of Duméril, see CATOMETOPITA.

CANCÉRILLE (Fr.), n. Ka^{3}n^2-sa-re-y'. The *Daphne mezereum*. [B, 121.]

CANCERILLO (Sp.), n. Ka^{3}n-the^{2}r-el'yo. The *Asclepias curassavica*. [A, 447.]

CANCÉRISME (Fr.), n. Ka^{3}n^2-sa-rezm. The cancerous state. [A, 301; E.]

CANCEROMA [Celsus] (Lat.), n. n. Ka^{2}n(ka^{3}n^2)-se^{2}r(ke^{2}r)-o'-ma^3. Gen., *cancerom'atos* (*-tis*). See CARCINOMA.

CANCEROUS, adj. Ka^{2}n'su^{5}r-u^{3}s. Lat., *cancrosus*, *cancrinus*. Fr., *cancéreux*. Ger., *krebsartig*, *krebsig*. It., *canceroso*, *cancerigno*. Pertaining to, of the nature of, or affected with, cancer. [A, 385; E.]

CANCETILLE (Fr.), n. Ka^{3}n^{2}s-te-y'. See CANCÉRILLE.

CANCHALAGUA (Lat.), n. f. Ka^{3}n-cha^{3}l-a^{3}g'wa^3. From the Colombian name, *cancha-lahua* or *cachen-lahuen*. Sp., *c.* Of the Sp. Ph., the *Erythræa chilensis*; of the Mex. Ph., the *Erythræa chilensis*, *Erythræa stricta*, and *Erythræa jorullensis*; also the *Euphorbia hypericifolia*. [A, 447; B, 88, 95, 121.]—**Herba canchalaguæ.** The herb of *Erythræa chilensis*. [B, 95.]

CANCHASMUS (Lat.), n. m. Ka^{2}n^2(ka^{3}n^2)-ka^{2}z(ch^{2}a^{3}s)'mu^{3}s-(mu^{4}s). Gr., καγχασμός. Immoderate or hysterical laughter. [A, 322.]

CANCHE (Fr.), n. Ka^{3}nsh. See AIRA (2d def.).—**C. à feuilles d'œillet.** See AIRA *caryophyllea*.—**C. aquatique.** See AIRA *aquatica*.—**C. blanchâtre.** See AIRA *canescens*.—**C. des gazons, C. élevée.** See AIRA *cæspitosa*.—**C. flexible.** See AIRA *flexuosa*.

CANCHE (Chinese), n. The *Saccharum officinarum*. [B, 121.]

CANCHICA (Sanscr.), n. Vinegar or acetic acid. [L, 105.]

CANCHILAGUA (Sp.), n. Ka^{3}n-chel-a^{3}g'wa^3. In Aragon, the *Linum catharticum*. [B, 121.]

CANCHORIE (Tamil), n. The *Tragia involucrata*. [B, 172.]

CANCHRYS (Lat.), n. f. Ka^{2}n^2(ka^{3}n^2)'kri^{2}s(ch^{2}ru^{6}s). Gr., κάγχρυς. See CACHRYS.

CANCINPERICON, n. An old name for hot horse-dung. [Ruland (A, 325); L, 94.]

CANCONG (Malay), n. The *Convolvulus reptans* and *Convolvulus medium*. [B, 88, 121.]

CANCRA (Hind.), n. The *Pavetta indica*. [B, 172.]

CANCRASTACOIDES (Lat.), n. m. pl. Ka^{2}n^2(ka^{3}n^2)-kra^{2}s-(kra^{3}s)-ta^{2}k(ta^{3}k)-o(o^2)-i(e)'dez(de^{2}s). For deriv., see CANCER, ASTACUS, and *-oid*.* Fr., *cancrastacoïdes* [De Blainville]. A family of decapods. [L, 180.]

CANCRE (Fr.), n. Ka^{3}n^{2}kr. 1. A popular name for various crustaceans, particularly the common crab. 2. A chancre. 3. Cancer. [A, 385; L, 105, 109.]—**Pinces de c.** See *Chelæ* CANCRORUM (under CANCER).—**Poudre de pinces de c.** See *Pulvis e chelis* CANCRORUM *compositus* (under CANCER).

CANCRELAT (Fr.), n. Ka^{3}n^{2}kr-la^3. The *Blatta orientalis*. [A, 385.]

CANCRENA [Paracelsus] (Lat.), n. f. Ka^{2}n^2(ka^{3}n^2)-kre(kra)'-na^3. See GANGRENE.

CANCRIDE (Fr.), adj. Ka^{3}n^2-kred. Pertaining to or resembling a crab; as a n., in the pl., see CANCERIDÆ. [A, 385.]

CANCRIFORM, adj. Ka^{2}n^2'kri^2-fo^{2}rm. Lat., *cancriformis* (from *cancer*, a crab, and *forma*, form). Fr., *cancriforme*. See CANCERIDEOUS.

CANCRIFORMES (Lat.), **CANCRIFORMIA** (Lat.), n's m. pl. and n. pl. Ka^{2}n^2(ka^{3}n^2)-kri^2-fo^{2}rm'ez(e^{2}s), -i^2-a^3. Of Duméril, a family of the *Decapoda*; of Latreille, a family of the *Trichostema*. [L, 180.]

CANCRINE, adj. Ka^{2}n^2'kri^{2}n. Lat., *cancrinus*. Ger., *cancrinisch*. See CANCEROUS.

CANCRIVORUS (Lat.), adj. Ka^{2}n^2(ka^{3}n^2)-kri^2'vo(wo^2)-ru^{3}s-(ru^{4}s). From *cancer*, a crab, and *vorare*, to devour. Fr., *cancrivore*. Ger., *krebsfressend*. Feeding on crabs and other *Crustacea*. [L, 180.]

CANCRODES (Lat.), adj. Ka^{2}n^2(ka^{3}n^2)-krod'ez(as). From *cancer* (*q. v.*), and εἶδος, resemblance. See CANCROID.

CANCROID, adj. and n. Ka^{2}n^2'kroid. Gr., καρκινώδης (adj.). Lat., *cancrodes*. Fr., *cancroïdal* (adj.), *cancroïde* (n.). Ger., *krebsartig* (adj.), *Warzenkrebs* (n.). Resembling a crab or a cancer; as a n., see CANCROÏDE.—**C'körper** (Ger.). Fr., *globes épidermiques*. Globules consisting of concentric layers of flattened epithelial cells found in cancer of the derma (the *Hornkörpercarcinom* of Waldeyer). [Birch-Hirschfeld (A, 319).]

CANCROÏDE (Fr.), n. Ka^{3}n^2-kro-ed. Of Alibert, a variety of keloid (*q. v.*); of Lebert, epithelioma. [A, 301, 322, 326, 385; G, 7.] Cf. CYLINDROMA.—**C. dermique.** Epithelioma affecting the whole thickness of the skin. [L, 88.]—**C. folliculaire** [Lebert]. Epithelioma originating in the cutaneous glands or the hair follicles. [L, 88.]—**C. papillaire.** Epithelioma affecting at first the papillary layer and afterward the other layers of the skin. [L, 88.]

CANCROIDEA (Lat.), n. n. pl. Ka^{2}n(ka^{3}n^2)-kro(kro^2)-i^{2}d(ed)'-e^2-a^3. See CATOMETOPITA and CORYSTIDÆ.

CANCROIDES (Lat.), adj. Ka^{2}n^2(ka^{3}n^2)-kro(kro^2)-id(ed)'ez-(as). See CANCROID; as a n. pl., of De Blainville, a family of the *Decapoda*; of Degeer, a family of spiders. [A, 322; L, 180.]

CANCROIS (Lat.), n. f. Ka^{2}n^2(ka^{3}n^2)'kro(kro^2)-i^{2}s(es). Gen., *cancroid'os* (*-is*). See CANCROÏDE.

CANCROLOGY, n. Ka^{2}n^2-kro^{2}l'o-ji^2. From *cancer* (*q. v.*), and λόγος, understanding. Fr., *cancrologie*. See CARCINOLOGY.

CANCROMA (Lat.), n. n. Ka^{2}n^2(ka^{3}n^2)-kro'ma^3. Fr., *cancrome*. See CARCINOMA.

CANCROMIDÆ (Lat.), n. f. pl. Ka^{2}n^2(ka^{3}n^2)-kro^{2}m'i^{2}d-e-(a^3-e^2). A family of the *Herodii*. [L, 221.]

CANCROPHAGUS (Lat.), adj. Ka^{2}n^2(ka^{3}n^2)-kro^{2}f'a^{2}g(a^{3}g)-u^{3}s(u^{4}s). From *cancer* (*q. v.*), and φάγειν, to eat. Fr., *cancrophage*. See CANCRIVORUS.

CANCROSUS (Lat.), adj. Ka^{2}n^2(ka^{3}n^2)-kros'u^{3}s(u^{4}s). See CANCEROUS and CANCROID.

CANCRUM (Lat.), n. n. Ka^{2}n^2(ka^{3}n^2)'kru^{3}m(kru^{4}m). Fr., *chancre*. Canker; any spreading ulceration. [A, 385.]—**C. oris, C. pudendi.** See under NOMA.

CANDALO (Hind.), n. The *Rhizophora*. [B, 121.]

CANDALOO (Teloogoo), n. The *Cajanus indicus*. [B, 172.]

CANDALU, n. In India, the *Avicennia tomentosa*. [B, 88, 121.]

CANDA-PANI (Tamil), n. The *Corypha umbraculifera*. [B, 121.]

CANDAREÆ (Lat.), n. f. pl. Ka^{2}n(ka^{3}n)-da(da^3)'re^2-e(a^2-e^2). Of Reichenbach, a section of the *Dracunculinæ*, comprising *Pythonium* and *Candarum*. [B, 170.]

CANDÉ (Fr.), n. Ka^{3}n-da. 1. A small village in the department of Marne-et-Loire, France, near which there is a spring containing iron and sulphate and chloride of calcium. 2. A cold mineral spring in the department of Vienne, France, containing sulphate of calcium, carbonate of iron, chloride of magnesium, and free carbonic acid; slightly aperient and diuretic. [L, 49, 105.]

CANDEL, n. See CANDALO.

CANDELA (Lat.), n. f. Ka^{2}n(ka^{3}n)-de(da)'la^3. From *candere*, to glow. Gr., λύχνος, κηρός. A bougie, also a candle. [B.]—**C. candelaria.** See VERBASCUM.—**Candelæ camphoratæ.** Candles for the administration of camphor by inhalation, containing 6 parts each of charcoal and camphor, and 3 of potassium nitrate. [B, 270.]—**Candelæ carbolisatæ.** Candles for the administration of carbolic acid by inhalation, containing 7 parts of charcoal, 2 parts of potassium nitrate, and 1 part of carbolic acid. [B, 270.]—**C. cerea.** A wax bougie. [A, 322.]—**Candelæ contra subitanea.** An old preparation consisting of candles made of male and female frankincense, white and yellow amber, camphor, mastic, red myrrh, benzoin, hartshorn, angelica, burnet (*Poterium sanguisorba*), and wax. [B, 200.]—**Candelæ fumales** [Gr. Ph.]. Fr., *clous fumants* [Fr. Cod.]. Ger., *Räucherkerzen*. Sp., *trociscos balsámicos fumantes* [Sp. Ph.]. Pyramidal bodies consisting of powdered aromatic substances with sufficient mucilage of tragacanth to secure the proper consistence. The preparation of the Fr. Cod. contains 1 part each of balsam of Tolu and yellow sandal-wood, 4 parts of benzoin, 2 of potassium nitrate, and 25 of wood charcoal. That of the Gr. Ph. contains 1 part of potassium nitrate, 1·5 part each of flowers of *Laurus cassia* and sugar, 3 parts of styrax calamita, 2 each of cubebs and cloves, 5 each of benzoin and cascarilla-bark, 6 each of mastic and olibanum, and 96 of wood charcoal. The Sp. Ph. orders 4 parts each of styrax calamita, cascarilla-bark, and potassium nitrate, 3 of gum tragacanth, 2 of ladanum, 8 each of olibanum and sugar, 32 of benzoin, and 96 of charcoal. [B, 95.]—**Candelæ fumales Francofurtensium.** Candles made of benzoin, aloes-wood, rose-wood, yellow sandal-wood, ladanum, olibanum, mastic, cloves, sugar, lime-tree charcoal, and mucilage of tragacanth, scented with several aromatics. [B, 200.]—**Candelæ fumales medicinales.** Candles containing medicinal ingredients intended to be administered by inhalation. [B, 270.] See *Candelæ iodatæ*, *Candelæ camphoratæ*, *Candelæ carbolisatæ*, *Candelæ* STRAMONII, etc.—**Candelæ iodatæ.** Candles for the administration of iodine by inhalation; made of 11 parts of charcoal, 6 parts of potassium nitrate, and 1 part of iodine dissolved in ether. The candles, after drying, are painted with tincture of benzoin to prevent evaporation of the iodine. [B, 270.]—**C. medicata.** See *Medicated* BOUGIE.—**C. mercurialis.** See *Mercurial* CANDLE.—**Candelæ odoriferæ.** See *Candelæ fumales*. The preparation so called in the old Antw. Ph. contained, among other ingredients, musk and camphor. [B, 200.]—**C. pro suffitu odorata.** See *Candelæ odoriferæ*.—**Candelæ pro suffitu secundæ.** Of the Ph. augustana, candles made of styrax calamita, willow charcoal, benzoin, cloves, ladanum, Cyprian turpentine, mucilage of tragacanth, and rose-water. [B, 200.]—**C. regis.** The *Verbascum thapsus*. [B, 180.]—**C. uterina.** A uterine bougie. [Scultetus (A, 325).]

CANDELARES (Lat.), n. f. pl. Ka^{2}n(ka^{3}n)-de^{2}l(dal)-a(a^3)'rez-(ras). Of Linnæus, an order of plants, comprising *Rhizophora*, *Mimusops*, and *Nyssa*. [B, 170.]

CANDELARIA (Sp.), n. Ka^{3}n-de^{2}l-a^3'ri^2-a^3. Any thick, woolly plant serviceable for making lamp-wicks (*e. g.*, *Phlomis* and *Verbascum*). [B, 121.]

CANDELETTE (Fr.), n. Ka^{3}n-de^{2}l-e^{2}t. A urethral bougie. [L, 105.]

CANDELILLA [Mex. Ph.] (Sp.), n. Ka^{3}n-de^{2}l-el'ya^3. See PEDILANTHUS *pavonis*.

CANDELULA (Lat.), n. f. Ka^{2}n(ka^{3}n)-de^{2}l(dal)'u^2(u^4)-la^3. Dim. of *candela* (*q. v.*).

CANDENS (Lat.), adj. Ka^{2}n(ka^{3}n)'de^{2}nz(de^{2}ns). From *candere*, to glow. Glowing, incandescent. See FERRUM *c.*

CANDI, n. 1. See CANDY. 2. In Languedoc, the *Cannabis sativa*. [B, 88, 121.]

CANDIANUS (Lat.), adj. Ka^{2}n(ka^{3}n)-di^2-a(a^3)'nu^{3}s(nu^{4}s). Lit., of or pertaining to Candia (Crete); as a n. m., the *Athamanta cretensis*. [B, 180.]—**Semen candiani.** The fruit of *Athamanta cretensis*. [B, 180.]

CANDICATIO (Lat.), n. f. Ka^{2}n(ka^{3}n)-di^2-ka(ka^3)'shi^2(ti^2)-o. Gen., *candicatio'nis*. From *candicare*, to be white. See BLANCHING.

CANDIDULUS (Lat.), adj. Ka^{2}n(ka^{3}n)-di^{2}d'u^2(u^4)-lu^{3}s(lu^{4}s). Dim. of *candidus*, white. Fr., *blanchâtre*. Ger., *weisslich*. Whitish, shining-white. [A, 312.]

CANDIDUM (Lat.), n., n. of adj. *candidus* (*q. v.*). Ka^{2}n(ka^{3}n)'-di^{2}d-u^{3}m(u^{4}m). Anything white.—**C. ovi.** Fr., *blanc d'œuf*. Ger., *Eiweiss*. White of egg. [B.] See ALBUMEN.

CANDIDUS (Lat.), adj. Ka^{2}n(ka^{3}n)'di^{2}d-u^{3}s(u^{4}s). Pure white, lily-white. [B, 19, 121.]

CANDIFICUS (Lat.), adj. Ka^{2}n(ka^{3}n)-di^{2}f'i^{2}k-u^{3}s(u^{4}s). From *candificare*, to make dazzlingly white. Making white. [A, 312.] See PULVISCULUS *c.*

CANDILERA (Sp.), n. Ka^{3}n-di^{2}l-a'ra^3. See CANDELARIA.

CANDIN (Sp.), n. Ka^{3}n'den. A place in Spain, where there is a chalybeate spring. [L, 49.]

CANDIOL, n. Ka^{2}n'di^2-o^{2}l. The pods of *Ceratonia siliqua*. [B, 180.]

CANDIREN (Ger.), **CANDISATION** (Fr.), n's. Ka^{3}n-der'e^{2}n, -de-za^3-si^2-o^{2}n^2. The process of making sugar candy, also that of coating objects with sugar. [A, 385; B; L, 80.]

CANDISSOIRE (Fr.), n. Ka^{3}n-des-wa^{3}r. A vessel for candisation. [L, 32.]

CANDIZUCKER (Ger.), n. Ka^{3}n'de-tzuk-e^{2}r. Sugar candy; rock candy. [B.]

CANDLE, n. Ka^{2}ndl. Lat., *candela*. Fr., *chandelle*. Ger., *Kerze*. See BOUGIE and CANDELA.—**C'berry, C'berry-myrtle.** The *Myrica cerifera*. [B.]—**C'berry-tree.** The *Myrica cerifera* and the *Aleurites triloba*. [B, 19; L, 56.]—**C.-fish.** See EULACHON.—**C'mas-bells.** The *Galanthus nivalis*. [B, 275.]—**C'nut.** The fruit of *Aleurites triloba* and *Aleurites moluccana*. [B, 75, 185; L, 56.]—**C'nut-tree.** The *Aleurites moluccana* and the *Viola sebifera*. [B, 275.]—**C.-plant.** The *Cacalia coccinia*. [B, 275.]—**C.-rush.** The *Juncus communis*. [B, 275.]—**C.-tree.** The *Parmentiera cerifera*. [B, 19, 185.]—**C.-tree oil.** A solid oil obtained from the seeds of *Stillingia sebifera* or the *Croton sebiferum*, used for making candles. [L, 107.]—**C.-wick.** The *Verbascum thapsus*. [B, 275.]—**C'wood.** The *Fouquiera splendens* and the *Gomphia guianensis*. [B. 121, 275.]—**Electric c.** Ger., *elektrische Kerze*. A rod of charcoal or other material used in producing an electric light. [B.]—**Jablochkoff c.** Fr., *bougie Jablochkoff*. An electric lighting apparatus consisting of two parallel charcoal rods separated except at the top by a layer of gypsum or some other feeble conductor. A current passing through the carbons produces a luminous arc between their extremities, which are connected at first by a little piece of charcoal. The latter, which is used to establish the current, soon burns up, and in proportion as the carbons are consumed the non-conducting substance melts away. [B, 22.]—**Mercurial c.** Lat., *candela mercurialis*. A c. containing cinnabar mixed with melted wax, with a wick, to be burnt under a curved glass funnel in the administration of mercury by inhalation. [L, 130.]—**Jamaica c'wood.** The *Gomphia guianensis*. [B, 19, 275.]—**South American c'wood.** The *Sciadophyllum capitatum*. [B, 275.]—**White c'wood.** The *Amyris balsamifera*. [B, 275.]—**Yellow c'wood.** The *Amyris maritima*. [B.]

CANDOCK, n. Ka^{2}n'do^{2}k. The *Nuphar lutea* and the *Nymphæa alba*. [B, 275.]

CANDOLAY, n. In the Philippines, a plant thought to be the *Pœderia fœtida*. A decoction of the leaves is used for urinary affections, vertigo, fevers, etc., also in baths. [L, 105.]

CANDOLLEÆ (Lat.), n. f. [Ka^{3}n-dol'le^2-e(a^3-e^2). From the genus *Candollea*, named after *De Candolle*, the French botanist. Fr., *candollées*. Of Baillon, a series of the *Dilleniaceæ*.

CANDUA, n. In Brazil, the *Cladonia sanguinea*. [B, 88, 121.]

CANDUM, n. See CANDY.

CANDY, n. Ka^{2}n'di^2. Ar., *kand*, *kandat*. Ger., *Candizucker*, *Candis*. A concrete mass consisting wholly or chiefly of sugar.—**Bitter c'tuft.** The *Iberis amara*. [B, 285.]—**Broad-leaved c'tuft.** The *Iberis semperflorens*. [B, 275.]—**C'tuft.** The genus *Iberis*. [B, 19, 75.]—**Glaucous c'tuft, Lebanon c'tuft.** The *Iberis jucunda* (*Æthionema coridifolium*). [B, 275.]—**Rock c.** An aggregation of crystals of cane-sugar constituting a translucent hard mass.—**Rock c'tuft.** The *Iberis saxatilis*. [B, 275.]—**Wild c'tuft.** See *Bitter c'tuft*.

CANE, n. Kan. Heb., *kaneh*. Gr., κάννα. Lat., *canna*. Fr., *canne*. Ger., *Rohr*. It., *canna*. Sp., *caña*. A common commercial name for the stems of various grasses, palms, etc., especially the *Arundinaria*. [B, 19, 34, 185.]—**Bamboo c.** The *Bambusa arundinacea*. [B, 19.]—**Cable c.** The *Calamus rudentum*. [L, 73.]—**C.-apple.** The *Arbutus unedo*. [B, 275; L, 73.]—**C.-brake.** The *Arundinaria*. [B, 19.]—**C. juice.** The juice of the sugar-cane. [L, 73.]—**C.-piece.** The *Cassia glandulosa*. [B, 282.]—**C. sugar.** See under SUGAR.—**Chair-bottom c.** The *Calamus rotang*, *Calamus rudentum*, *Calamus versus*, and *Calamus viminalis*. [B, 275.]—**Chinese sugar-c.** The *Sorghum saccharatum*. [B, 275.]—**Dragon c.** The *Calamus draco*. [B, 19.]—**Dumb c.** The *Dieffenbachia seguine*. [B, 19.]—**Great rattan-c.** The *Calamus rudentum*. [B, 19, 275.]—**Ground rattan-c.** The *Rhapis flabelliformis*. [B, 19, 275.]—**Imphee c.** The *Sorghum saccharatum*. [B, 275.]—**Indian c.** See CANNA *indica*.—**Large American c.** The *Arundinaria macrosperma*. [B, 275.]—**Malacca c.** The stem of *Calamus scipionum*. [B, 19, 172.]—**Rattan c.** The *Calamus draco*, *Calamus rotang*, *Calamus fasciculatus*, and their stems. [B, 19, 172.]—**Small American c.** The *Arundinaria tecta*. [B, 275.]—**Snake-c.** The *Kunthia montana*. [B, 275.]—**Sugar-c.** The *Saccharum officinarum*. [B, 19.]—**Sweet c.** The *Andropogon calamus aromaticus*. [B, 19.]—**Tobago c.** The stalk of *Bactris minor*. [B, 19.]—**Wanghee** (or **Whangee**) **c.**—The *Phyllostachys nigra*. [B, 275.]—**Wild c.** The *Arundo occidentalis* and *Arundo saccharoides*. [B, 275.]

CANEBA (Fr.), n. Ka^{3}n-e^2-ba^3. In the central part of France, the *Cannabis sativa*. [B, 38, 88, 121; L, 41.]

CANEBAS, n. In Provence, the *Althœa officinalis* and *Althœa cannabina*. [B, 88, 121.]

CANÈBE (Fr.), **CANEBÉ** (Fr.), n's. Ka^{3}n-e^{2}b, -e^{2}b-a. See CANEBA.

CANEBERGE (Fr.), n. Ka^{3}n-e^2-be^{2}rzh. See CANNEBERGE.

CANEEL (Ger.), n. Ka^{3}n-al'. The bark of *Cinnamomum cassia*. [B, 270.]—**C'blüthen.** The flowers of *Cinnamomum cassia*. [B, 270.] See also *Flores* CASSIÆ.—**C'rinde.** See CANELLA *alba*.—**C'syrup.** See *Syrupus* CINNAMOMI.—**C'tinctur.** See *Tinctura* CINNAMOMI.—**Weisser c.** The bark of *Canella alba*. [B, 270.]

CANÉFICE (Fr.), **CANÉFICIER** (Fr.), n's. Ka^{3}n-a-fes, -fes-i^2-a. The *Cassia fistula*. [B, 38, 121, 173.]—**Canéficier bâtard.** The *Cassia bicapsularis*. [B, 88, 121.]—**Canéficier sauvage.** An American species of *Galega*. [B, 88, 121.]

CANÉFICT (Fr.), n. Ka^{3}n-a-fi^{2}kt. See CANÉFICIER.

CANEHL (Ger.), n. Ka^{3}n-al'. See CANEEL.

CANELA (Sp.), n. Ka^{3}n-a'la^3. Cinnamon; in the tropics, the *Cascarilla Pavonii*. [B, 121.]—**C. de ema.** The *Phrugmites communis*. [B, 121.]—**C. de Paramo.** The *Drimys granatensis*. [B, 121.]

CANELILLA, n. In Brazil, the bark of *Mespilodaphne pretiosa*. [Humboldt (B, 180).]

CANELL (Ger.), n. Ka^{3}n-e^{2}l'. See CANEEL.

CANELLA (Lat.), n. f. Ka^{2}n(ka^{3}n)-e^{2}l'la^3. Dim. of *canna*, a reed; more properly written *cannella*. Fr., *cannelle*. Ger., *Kaneelbaum* (1st def.). It., *cannella*. Sp., *canela*. 1. Of P. Browne, a genus of shrubs or trees of the *Canelleæ*, indigenous to tropical America. 2. Of the U. S. Ph., 1870, the bark of *C. alba*. 3. In Port., cinnamon; a name applied to several plants of Brazil. [B.]—**C. alba.** Fr., *cannelle blanche*. Ger., *weisser Caneel*. It., *cannella bianca*. Sp., *canela blanca*. 1. Of Murray, the *Winterana c.*, white wood, wild cinnamon-tree; an evergreen tree about 40 feet high, indigenous to the West Indies and to southern Florida, with lanceolate leaves, pale-violet aromatic flowers, and dark-blue baccate fruit. The bark—*Canellæ cortex* [Br. Ph.], *canellæ albæ cortex* [Br. Ph., 1867], *c. alba* [Gr. Ph.], *cortex canellæ albæ* [Swed. Ph.]; Fr., *cannelle blanche* [Fr. Cod.]; Ger., *weisser Zimmt*, *weisse Caneelrinde*; It., *corteccia di cannella bianca*; Sp., *corteza de canela blanca*—occurs in quills or half-quills yellowish-red without and white within, presenting a white, yellow-dotted surface on fracture, of an agreeable cinnamon-like odor and an aromatic, bitterish, somewhat biting taste. It contains a bitter principle, a volatile oil, and a resin, and is used as a tonic and stimulant, chiefly as an adjuvant to stomachic tonics and to purgatives. 2. Of Swartz, the *C. laurifolia*. 3. Of the Gr. Ph., the bark of *C. alba*. [B, 81, 95, 180.]—**C. amara.** The bark of *Cinnamomum culilawan*. [B, 180.]—**C. amarella.** In Brazil, a variety of *Nectandra nitidula*. [B, 214.]—**C. axillaris.** Of Nees and Martin, a Brazilian tree with oval leaves and nodding axillary flowers. The highly aromatic bark, Paratudo bark (*cortex paratudo*, *cortex paratodo*), occasionally comes into commerce. [B, 180.]—**C. bark.** The bark of *C. alba*. [B.]—**C. branca do Brejo.** In Brazil, the *Nectandra leucothyrsus*. [B, 214.]—**C. capitão.** In Brazil, a species of *Nectandra*. [B, 121.]—**C. caryophyllata.** The *Pimenta acris*, *Syzygium caryophyllœum*, and *Dicypellium caryophyllatum*. [B, 180.]—**C. Cheiro.** See *C. de Cheiro*.—**C. columnæ.** Of Joust, the *Cinnamomum zeylanicum*, var. *cassia*. [B, 180.]—**C. cubana.** The bark of *Calyptranthes caryophyllata*. [B, 119.]—**C. culilabani.** The bark of *Cinnamomum culilawan*. [B, 180.]—**C. de Cheiro.** The *Oreodaphne opifera*. [B, 88, 121.]—**C. de ema** [Port.]. Certain species of *Vellozia*. [B, 121.]—**C. de folha minda Madeira de Rey.** The *Gœppertia cantagallana*. [B, 214.]—**C. de veado.** In Brazil, the *Excœcaria lanceolata* (*Actinostemon lanceolatum*). [B, 121.]—**C. do mato.** The *Cinnamomum* (*Laurus*) *cassia*. [B, 121.]—**C. dulcis.** The bark of *C. alba*. [B, 180.]—**Canellæ albæ cortex** [Br. Ph., 1867], **Canellæ cortex** [Br. Ph.]. See *C. alba*.—**C. fœdorenti.** Of Reid, the *Nectandra myriantha*. [B, 214.]—**C. jamaicensis.** The *C. alba*. [L, 104.]—**C. laurifolia.** A tropical American tree very similar to *C. alba*,

with which, by some, it is identified. Its bark is employed like that of *C. alba*, and has the same names. [B, 180.]—**C. magellanica.** The bark of *Drimys Winteri.* [B, 180.]—**C. malabarica** [Piso]. The *Cinnamomum* (*Laurus*) *cassia.* [B, 180.]—**C. marcanahyba** (Port.). In Brazil, the *Cassia marcanahyba.* [B, 121.]—**C. optima.** Cinnamon. [B, 180.]—**C. preta** [Peckolt] (Port.). The *Nectandra amara.* [B, 214.]—**C. sassafras** [Schott]. The *Mespilodaphne indecora.* [B, 214.]—**C. silvestris.** A name for several East Indian species of *Cinnamomum.* [B, 180.]—**C. tubis minoribus alba, C. winterana** [Gärtner]. The *C. alba.* [B, 200, 270.]—**C. Zeylanica.** 1. Of the pharmacists, cinnamon. [B, 119, 180.] 2. Of Hermann, the *Daphnidium myrrha.* [B, 214.]—**Calyces canellæ.** See *Flores* CASSIÆ. [B, 180.]—**Cortex canellæ albæ** [Swed. Ph.]. The bark of *C. alba.* [B, 95, 180.]—**Cortex canellæ albæ spurius.** A name applied to several barks also designated costus. [B, 180.]—**Essentia canellæ albæ.** See *Tinctura canellæ alba.*—**Flores canellæ.** See *Flores* CASSIÆ. [B, 180.]—**Folia canellæ silvestris.** The leaves of several species of cinnamon ; *folia malabathri* (*q. v.*). [B, 180.]—**Laurel-leaved c.** The *C. alba*, or rather, perhaps, the *C. laurifolia.* [B ; L, 102.]—**Semen canellæ.** See *Semen* CASSIÆ. [B, 180.]—**Tinctura canellæ albæ.** Fr., *teinture* (ou *alcoolé*) *de cannelle blanche.* A tincture made with 1 part of *C. alba* and 8 parts of alcohol. [Amsterd. Ph., 1792 (B, 119).]—**White c. bark.** The bark of *C. alba.* [B.]

CANELLACEÆ (Lat.), n. f. pl. Ka^{2}n(ka^{3}n)-e^{2}l-la(la^3)'se^2(ke^2)-e(a^3-e^2). More properly written *Cannellaceæ.* Fr., *canellacées.* Ger., *Canellaceen.* Of Martius, Endlicher, and succeeding authors, an order of plants comprising *Canella* and *Cinnamodendron*, to which some authors add *Cinnamosma.* The *C.* have been variously regarded as akin to the *Guttiferæ*, the *Magnoliaceæ* (by Baillon), and the *Bixaceæ.* [B, 19, 121, 170.]

CANELLBAUM (Ger.), n. Ka^{3}n-e^{2}l'ba^3-um. The *Canella alba.* [B, 48.]

CANELLE (Fr.), n. Ka^{3}n-e^{2}l. See CANELLA and CANNELLE.

CANELLEÆ (Lat.), n. f. pl. Ka^{2}n(ka^{3}n)-e^{2}l'le^2-e(a^3-e^2). More properly written *Cannelleæ.* Fr., *cannellées.* Ger., *Canelleen.* See CANELLACEÆ.

CANELLIER (Fr.), n. Ka^{3}n-e^{2}l-i^2-a. See CANNELLIER.

CANELLIFERA (Lat.), n. f. Ka^{2}n(ka^{2}n)-e^{2}l-li^{2}f'e^{2}r-a^3. See CANELLA.

CANELLIN, n. Ka^{2}n-e^{2}l'i^{2}n. A principle found by Petroz and Robinet in the bark of *Canella alba;* according to Meyer and v. Reiche, identical with mannite. [B, 81.]

CANELLINA (Lat.), n. f. Ka^{2}n(ka^{3}n)-e^{2}l-li(le)'na^3. More properly written *cannellina.* Cinnamon-bark. [B, 121.]

CANELO (Sp.), n. Ka^{3}n-a'lo. In Chili, the *Drimys chilensis.* [B, 121.]—**C's de quixos.** A South American tree having an aromatic bark of a biting taste. [B, 121.]

CANENA (Sp.), n. Ka^{3}n-a'na^3. A place in Spain, where there is a chalybeate spring. [L, 49.]

CANEON (Lat.), n. n. Ka^{2}n(ka^{3}n)'e^2-o^{2}n, ka^{2}n(ka^{3}n)-e(a)'o^{2}n. Gr., κάνεον, κάνειον, κανεῖον, κανίον, κανοῦν. The lid of a vessel through which a reed was inserted for fumigating the uterus. [Hippocrates (A, 311, 325).]

CANEPIN (Fr.), n. Ka^{3}n-pa^{2}n^2. A very thin variety of sheepskin, used to test the sharpness of instruments. [L, 105.]

CANER (Hind.), n. The *Nerium odorum.* [B, 172.]

CANESCENT, adj. Ka^{2}n-e^{2}s'e^{2}nt. Lat., *canescens, incanescens* (from *canescere* and *incanescere*, to grow white). Fr., *c.* Ger., *weissgraulich.* Whitish or hoary ; grayish-white, from the presence of scattered hairs. [B, 19, 121.]

CAÑETE (Sp.), n. Ka^{3}n-ya'ta. A variety of the *Allium sativum.* [D, 98.]

CANETILLE (Fr.), n. Ka^{3}n-e^2-tel-y'. The *Marchantia polymorpha.* [B, 173.]

CANEULÉ (Fr.), n. Ka^{3}n-u^{5}l-a. The *Cornus mascula.* [B. 173.]

CANFOR, n. Ka^{2}n'fo^{2}r. An old name for camphor (the Sp. *alcanfor* without the Ar. article *al*). [B, 180.]

CANGAN (Hind.), n. The *Panicum italicum.* [B, 172.]

CANGAN-GOUPI (Hind.), n. The *Randia malabarica.* [B, 121.]

CANGERANE, n. In Brazil, the *Cabralea cangerana.* [B, 121.]

CANGNI, n. See CANGAN.

CANGULULU, n. In the Congo country, the *Polygonum fagopyrum.* [B, 121.]

CANHAYAWL, n. A Gaulish name for the *Parietaria officinalis.* [L, 105.]

CANI, n. The sun-dried tubers of *Oxalis tuberosa.* [B, 19.]

CANIB (Ar.), n. The *Triticum monococcum.* [B, 121.]

CANICA (Sp.), n. Ka^{3}n-ek'a^3. A tree of Cuba, apparently the *Myrtus pimenta.* [B, 88, 121.]

CANICACEOUS, adj. Ka^{2}n-i^2-ka'shu^{3}s. Lat., *canicaceus* (from *canicæ* [*q. v.*]). Furfuraceous. [G.]

CANICÆ (Lat.), n. f. pl. Ka^{2}n(ka^{3}n)'i^2-se(ka^3-e^2). A kind of bran. [A, 312.]

CANICIDA (Lat.), n. f. Ka^{2}n(ka^{3}n)-i^2-si(ke)'da^3. From *canis*, a dog, and *cædere*, to kill. Fr., *canicide.* An old name for aconite, from its being fatal to dogs. [L, 109.]

CANICIDIUM (Lat.), n. n. Ka^{2}n(ka^{3}n)-i^2-si^{2}d(ked)'i^2-u^{3}m-(u^{4}m). For deriv., see CANICIDA. Fr., *canicide.* The vivisection of dogs. [L, 109, 119.]

CANICULARIS (Lat.), adj. Ka^{2}n(ka^{3}n)-i^{2}k-u^2(u^4)-la(la^3)'ri^{2}s. From *canicula*, the dog-star. Fr., *caniculaire.* Occurring during the dog-days ; as a zoological species-name, common at the close of summer (said of insects). [L, 180.]

CANICULE (Fr.), n. Ka^{3}n-i^2-ku^{6}l. A provincial name for the large-sized *Confervæ*, which are supposed to produce fermentation in water during the dog-days. [B, 121.]

CANIDÆ (Lat.), n. f. pl. Ka^{2}n(ka^{3}n)'i^{2}d-e(a^3-e^2). From *canis*, a dog. Fr., *canins.* A family of the *Cynoidea* or of the *Digitigrada*, including the dog, fox, wolf, and jackal. [L, 121, 147.]

CANIDÉ (Fr.), adj. Ka^{3}n-e-da. See CANINE.

CANIFICIER (Fr.), n. Ka^{3}n-i^2-fe-si^2-a. See CANÉFICIER.

CANILLÉE (Fr.), n. Ka^{3}n-e-ya. A provincial name for the *Lemna.* [B, 121 ; L, 41.]

CANILLEJAS (Sp.), n. Ka^{3}n-el-ya'ha^{3}s. A place in Spain, near Madrid, where there is a saline spring. [L, 49.]

CANINA [J. E. Gray] (Lat.), n. n. pl. Ka^{2}n(ka^{3}n)-i(e)'na^3. See CANIDÆ.

CANINÆ (Lat.), n. f. pl. Ka^{2}n(ka^{3}n)-i(e)'ne(na^3-e^2). A group of the *Ursidæ.* [L, 253.]

CANINANA (Lat.), n. f. Ka^{2}n(ka^{3}n)-i^{2}n-a(a^3)'na^3. The *Chiococca racemosa.* [B, 121, 180.]

CANINE, adj. Kan'i^{2}n(in). Gr., κυνικός. Lat., *caninus* (from *canis*, a dog), *cynicus.* Fr., *canin.* Ger., *hündisch.* Of, pertaining to, or resembling, a dog ; resembling some structure in a dog, particularly a dog's teeth. [C ; L.]

CANINERO (It., Sp.), n. Ka^{3}n-en-a'ro. The *Sambucus nigra.* [B, 88.]

CANINIFORM, adj. Ka^{2}n-i^{2}n'i^2-fo^{2}rm. Lat., *caniniformis* (from *caninus*, canine, and *forma*, form). Resembling a canine tooth. [L, 121.]

CANINI-LABIALIS [E. Coues] (Lat.), n. m. Ka^{2}n(ka^{3}n)-i(e)'ni(ne)-la(la^3)-bi^2-a(a^3)'li^{2}s. The levator anguli oris. [L.]

CANINS (Fr.), n. pl. Ka^{3}n-a^{2}n^2. See CANIDÆ.

CANINUS (Lat.), adj. Ka^{2}n(ka^{3}n)-i(e)'nu^{3}s(nu^{4}s). See CANINE ; as a n. (*musculus* understood), the levator anguli oris. [L.]

CANION (Lat.), n. n. Ka^{2}n(ka^{3}n)'i^2-o^{2}n. See CANEON.

CANIRAM, n. According to Rheede, a Malabar name for the *Strychnos nux vomica ;* of Dupetit Thouars, the genus *Strychnos.* [B, 121.]—**C. à crochet** (Fr.), **Modira c.** [Rheede]. The *Strychnos colubrina.* [L, 49.]

CANIRAMINE, n. Ka^{2}n-i^{2}r'a^{2}m-en. Lat., *caniramina, caniriminum.* An old name for brucine. [B, 270.]

CANIRI-UTAM, n. In Java, the *Rumphia amboinensis.* [B, 121.]

CANIRUBUS (Lat.), n. m. Ka^{2}n(ka^{3}n)-i^{2}r'u^2(u^4)-bu^{3}s(bu^{4}s). From *canis*, a dog, and *rubus*, a bramble-bush. See CYNOSBATOS.

CANIS (Lat.), n. m. and f. Ka(ka^3)'ni^{2}s. Gr., κύων. Fr., *chien.* Ger., *Hund.* It., *cane.* Sp., *perro.* 1. The dog, various parts of which were formerly used in medicine. 2. A genus including the dog, wolf, and jackal. 3. An old name for the frenum præputii. 4. Of Suidas and Eustathius, the vulva (κύνα). [A, 325 ; L, 121.]—**C. Aristoteli** (seu **carcharias**). The *Squalus carcharias.* [L, 105.]—**C. familiaris** [Linnæus]. Fr., *chien.* Ger., *Haushund.* The common dog, the flesh, fat, and dung of which were formerly used medicinally. [B, 180 ; L, 105.] See also *Hepar c. rabidi*, AXUNGIA *c.*, and ALBUM *græcum.*—**C. intersector.** A plant of the genus *Cevadilla.* [L, 97, 119.]—**C. lupus** [Linnæus]. The wolf. Its liver (*hepar lupi*) was once considered a remedy for rabies, and its fat (*axungia lupi*) was thought a very choice medicine in various affections. [B, 180.]—**C. marinus.** An old name for the *Phoca vitulina.* [L, 105.]—**C. ponticus.** The beaver. [L, 119.] See CASTOR *fiber.*—**C. vulpes** [Linnæus]. Fr., *renard.* Ger., *Fuchs.* The fox. Its flesh, its spine, and especially its dried lungs (*caro, spinæ* et *pulmones siccati*), were formerly much employed as a remedy for phthisis ; and the fat (*axungia vulpis*) in earache. [B, 180.]—**Hepar c. rabidi.** A mad dog's liver ; formerly used for rabies. [B, 180.]

CANITIA (Lat.), n. f. Ka^{2}n(ka^{3}n)-i^2'shi^2(ti^2)-a^3. See CANITIES.

CANITIES (Lat.), n. f. Ka^{2}n(ka^{3}n)-i^2'shi^2(ti^2)-ez(e^{2}s). From *canus*, white. Gr., πολιά, πολιός. Fr., *canitie, blanchissure des cheveux.* Ger., *Ergrauen der Haare.* It., *canizie, canutezza.* Sp., *canicie.* Grayness, deficient pigmentation, of the hair. [G.]—**C. præmatura.** C. appearing at an earlier period of life than usual. [G.]—**C. senilis.** The c. of aged persons. [G.]

CANITUDO (Lat.), n. f. Ka^{2}n(ka^{3}n)-i^2-tu^2(tu)'do. Gen., *canitu'dinis.* See CANITIES.

CANJALAT (Malay), **CANJULUT** (Malay), n's. A bitter plant of Amboyna, the *Urbium polypoides* of Rumphius ; according to Loureiro, a species of *Stemona.* [B, 121.]

CANJAN-CORAI, n. In Coromandel, the *Ocimum basilicum.* [B, 121.]

CANKER, n. Ka^{2}n^2'ku^{5}r. Lat., *cancrum.* Fr., *chancre.* 1. Any spreading, corroding, or virulent ulceration. 2. An obstinate and often incurable disease of the horse's foot. 3. A disease in the ears of dogs. 4. A caterpillar. 5. A toadstool. 6. A kind of wild rose. 7. In vegetable pathology, a name applied to a variety of diseases, some due to animal parasites, others to the decay of adventitious roots and consequent contamination of the adjacent tissues, and still others probably to vitiation of the juices of the plant by principles derived from an unsuitable soil. In the human subject several conditions have been included under this term. [B, 19 ; L, 56, 73.] See STOMATITIS, APHTHA, and CANCER *aquaticus.*—**C.-berry.** The fruit of the *Rosa canina* and of the *Solanum baha-*

mense. [B, 275.]—**C.-flower.** The *Rosa canina.* [L, 73.]—**C.-nail.** See Hang-nail.—**C.-rash.** A variety of scarlet fever with an ulcerated throat. [L.]—**C.-root.** The common sorrel. [L, 73.]—**C.-rose.** The *Papaver rhœas* and the *Rosa canina.* [B, 121, 275; L, 73.]—**C.-weed.** A name given to various composite plants, including the *Senecio jacobœa*, the *Senecio silvaticus*, and the *Senecio tenuifolius.* [B, 275; L, 73.]—**C'wort.** The *Linaria spuria*, the *Linaria elatine*, and the *Leontodon taraxacum.* [B, 275; L, 73.]—**Water-c.** See Cancer *aquaticus.*

CANKRIENIA [De Vries] (Lat.), n. f. Ka^{3}n^2-kren'i^2-a^3. See Primula.

CANNA (Lat.), n. f. Ka^{2}n(ka^{3}n)'na^3. Heb., *kaneh.* Gr., **κάννα.** Fr., *canne* (1st def.), *balisier* (2d def.). Ger., *Rohr* (1st def.), *Blumenrohr* (2d def.). It., *c.* Sp., *caña.* 1. Anciently, a cane or any hollow vegetable stalk, also the genus *Arundo*, the tibia, the fibula, and any tubular article. 2. Of Linnæus, a genus of marantaceous plants of the tribe *Canneœ.* 3. Of the U. S. Ph., 1870, c. starch. [A, 325; B, 81, 121.]—**Amylum cannæ.** See *C. starch.*—**C. achiras** [Gillies]. The achiras; a Peruvian species said to furnish arrow-root, perhaps identical with *C. edulis*, which also is said to be termed achiras. [B, 5, 121, 270.]—**C. angustifolia** [Linnæus]. A Brazilian species. The tubers are edible, and the plant is said to be used as a diaphoretic and excitant, especially in rheumatism. [B, 180.]—**C. arrow-root.** See C. *starch.*—**C. aurantiaca.** An ornamental species said to have properties like those of *C. edulis* and *C. indica.* [B, 121.]—**C. carganna.** In pharmacy, the *Arundo donax.* [B, 121, 180.]—**C. coccinea** [Aiton, Roscoe]. One of the species said to furnish c. starch. [B, 121, 270.]—**C. dei giardini** (It.). The *Arundo donax.* [B.]—**C. discolor.** A cultivated species said to have properties like those of *C. edulis* and *C. indica.* [B, 121.]—**C. domestica cruris, C. domestica major cruris.** See *C. major.*—**C. edulis** [Ker]. Fr., *balisier comestible.* A species indigenous to Peru and Brazil and cultivated in the West Indies. The tuberous rhizomes, which are eaten like potatoes, are probably the source of c. starch. [B, 81, 121.]—**C. fistula.** The *Cassia fistula.* [L, 84.]—**C. glauca.** A cultivated species said to have properties resembling those of *C. edulis* and *C. indica.* [B, 121.]—**C. gutturis.** The trachea. [Cælius Aurelianus (A, 318).]—**C. hispanica.** In pharmacy, the *Arundo donax.* [B, 180.]—**C. indica** [Linnæus]. Fr., *canne Congo* (ou *d'Inde*), *balisier des Indes*, *faux sucrier*, *gingembre* (ou *safran*) *marron.* Indian shot (from the hard and shin-

THE CANNA INDICA. [A, 327.]

ing seeds); a shrub growing throughout the tropics, having many varieties. The rhizome (*radix cannœ indicœ*) is said to be acrid and stimulant when raw. It is used in India in veterinary practice, and is said to be employed in the West Indies as a diuretic and diaphoretic, especially in skin diseases and gonorrhœa. Emollient cataplasms are also made from it. [B, 121, 172, 173, 180.]—**C. lutea** [Roscoe]. An East Indian species. The tubers are edible. [B, 121, 180.]—**C. major.** The tibia. [A, 322; L, 31.]—**C. minor.** The fibula. [A, 322; L, 31, 97, 115.]—**C. odorifera.** The *Acorus calamus.* [B, 88, 121.]—**C. orientalis** [Roxburgh]. A species referred to *C. indica.* The juice of the fruit is used for earache and in the treatment of the after-effects of corrosive sublimate. [B, 172, 180.]—**C. palustris.** The *Arundo phragmites* (*Phragmites communis*). [B, 88, 121.]—**C. paniculata** [Ruíz and Pavón]. A Peruvian species with edible tubers. [B, 180.]—**C. pulmonis.** The trachea. [L, 119.]—**C. speciosa** [Roscoe]. A species supposed to furnish the rhizome, resembling turmeric, used by the natives of the Sierra Leone as a yellow dye. [W. F. Daniell, "Pharm. Jour. and Trans.," Nov., 1859, p. 258 (A, 308).]—**C. starch.** Lat., *amylum cannœ.* Fr., *tous-les-mois*, *amidon de canne.* Ger., *C'stärke.* Queensland arrow-root, tulema, tolomane; a starch derived from the tuberous rhizomes of some species of *C.*, probably *C. edulis* and perhaps also *C. achiras*, *C. coccinea*, and *C. indica*; a white, satiny powder composed of large, somewhat flattened, ovate or oblong granules with an inconspicuous hilum surrounded by a number of concentric rings. It contains 17 per cent. of water. Boiled with water, it forms a tenacious jelly less transparent than that formed by ordinary arrow-root. [B, 81.]—**C. variabilis** [Willdenow]. The *C. indica.* [B, 173.]—**Siroppo di c.** (It.). Of the Sard. Ph., a solution of equal parts of c. starch and sugar in boiling water, evaporated to the proper consistence. [B.]

CANNAB (Fr.), n. Ka^{3}n-a^{3}b. The *Cannabis sativa.* [B, 121.]

CANNABACEÆ (Lat.), n. f. pl. Ka^{2}n(ka^{3}n)-na^{2}b(na^{3}b)-a(a^3)'-se^2(ke^2)-e(a^3-e^2). See Cannabinaceæ.

CANNABARE, n. In Malabar, the *Commelina bengalensis.* [B, 121.]

CANNABENE, n. Ca^{2}n'a^{2}b-en. Fr., *cannabène.* Ger., *Cannaben.* A liquid, $C_{18}H_{20}$, found by Personne, along with c. hydride, in the volatile oil of *Cannabis indica.* [B, 81.]—**C. hydride.** Fr., *hydrure de cannabène.* Ger., *Cannabenwasserstoff.* According to Stillé and Maisch, a solid, $C_{18}H_{22}$, found, along with c., in the volatile oil of *Cannabis indica*; according to Fronmüller, a thin, golden-yellow liquid of repulsive odor, highly irritant and poisonous. [B, 81; "Memorabil.," xxvii, p. 257 (B).]

CANNABIN, n. Ka^{2}n'a^{2}b-i^{2}n. Lat., *cannabinum*, *cannabina.* Fr., *cannabine.* Ger., *C.* 1. A brown, amorphous resinous substance obtained by T. and H. Smith from Indian hemp, containing the active principles. 2. A glucoside contained in the watery extract made from Indian hemp after the volatile oil has been driven off. [B, 2, 81, 270.]—**C. tannate.** Lat., *cannabinum tannicum.* Fr., *tannate de cannabine.* Ger., *C'tannat*, *gerbsaures C.* An improper name for a substance obtained by precipitating with tannic acid a watery extract made from Indian hemp after the volatile oil has been driven off; a yellowish-brown, almost odorless powder, of a bitter, very astringent taste, nearly insoluble in water and in ether, soluble with difficulty in alcohol, burning almost without residue; said to be an efficient and safe narcotic and hypnotic in doses of from 7 to 15 grains. [B, 81, 270; Fronmüller, "Memorabil.," xxvii, p. 257 (B).]

CANNABIN (Fr.), adj. Ka^{3}n-a^3-ba^{2}n^2. See Cannabinus.

CANNABINA (Lat.), n. f. Ka^{2}n(ka^{3}n)-na^{2}b(na^{3}b)'i^{2}n-a^3. 1. The *Datisca c.* 2. See Cannabin and Cannabine. [B, 121; L, 84.]—**C. aquatica** [J. Bauhin, C. Bauhin]. 1. The *Bidens tripartita.* 2. The *Eupatorium cannabinum.* [B, 121, 200.]—**Herba cannabinæ.** The herb of *Datisca c.* [B, 180.]—**Herba cannabinæ aquaticæ, Radix cannabinæ aquaticæ.** The herb and root of *Eupatorium cannabinum.* [B, 180.]

CANNABINACEÆ (Lat.). n. f. pl. Ka^{2}n(ka^{3}n)-na^{2}b(na^{3}b)-i^{2}n-a(a^3)'se^2(ke^2)-e(a^3-e^2). The hempworts; of Lindley, an order of the urtical alliance, corresponding to the tribe *Cannabineœ.* [B, 170.]

CANNABINÆ [Blume, Bartling] (Lat.), n. f. pl. Ka^{2}n(ka^{3}n)-na^{2}b(na^{3}b)'i^{2}n-e(a^3-e^2). See Cannabineæ.

CANNABINE, n. Ka^{2}n'a^{2}b-en. Lat., *cannabina*, *cannabinum.* Fr., *c.* Ger., *Cannabin.* A clear, transparent, brown, syrupy alkaloid obtained from *Cannabis indica*; said to be a pure hypnotic "free from all deleterious accessory symptoms," given in doses of from 1½ to 4½ grains. ["Merck's Bulletin," June, 1888, p. 14.]

CANNABINÉ (Fr.), adj. Ka^{3}n-a^3-ben-a. See Cannabinus; as a n. f. pl., *c'es*, see Cannabineæ.

CANNABINEÆ (Lat.), n. f. pl. Ka^{2}n(ka^{3}n)-na^{2}b(na^{3}b)-i^{2}n'e^2-e(a^3-e^2). Fr., *cannabinées.* Of Gaudichaud *et al.*, a tribe, division, or suborder of the *Urticaceœ* (according to Baillon, of the *Ulmaceœ*), comprising *Cannabis* and *Humulus*; made a distinct order by Endlicher and Brongniart (the *Cannabinaceœ* of Lindley). [B, 19, 34, 121, 170.]

CANNABINEUS (Lat.), adj. Ka^{2}n(ka^{3}n)-na^{2}b(na^{3}b)-i^{2}n'e^2-u^{3}s-(u^{4}s). See Cannabinus.

CANNABININE, n. Ka^{2}n-a^{2}b'i^{2}n-en. A volatile alkaloid found by Siebold and Bradbury in Indian hemp, having an odor like that of conium. [B, 81, 270.]

CANNABINONE, n. Ka^{2}n-a^{2}b'i^{2}n-on. Fr., *c.* Ger., *Cannabinon.* A substance of the consistence of a soft resin, obtained from Indian hemp; insoluble in water, soluble in alcohol, in ether, in chloroform, and in the fixed and volatile oils; said to be a hypnotic and, in doses of from 2 to 5 grains, to produce symptoms of poisoning like those due to *Cannabis indica.* [B, 270; "Pharm. Rundsch.," Feb., 1886, p. 45.]

CANNABINUM (Lat.), n. n. Ka^{2}n(ka^{3}n)-na^{2}b(na^{3}b)'i^{2}n-u^{3}m-(u^{4}m). See Cannabin and Cannabine.—**C. tannicum.** See Cannabin *tannate.*

CANNABINUS (Lat.), adj. Ka^{2}n(ka^{3}n)-na^{2}b(na^{3}b)'i^{2}n-u^{3}s(u^{4}s). Fr., *cannabin*, *cannabiné.* Hempen; resembling hemp or the genus *Cannabis.* [A, 318; B, 121.]

CANNABIS (Lat.), n. f. Ka^{2}n(ka^{3}n)'na^{2}b(na^{3}b)-i^{2}s. Gen., *can'nabis* (*cannab'ios*, *-eos*). Gr., **κάνναβις.** Fr., *chanvre.* Ger., *Hanf.* It., *canapa.* Sp., *cáñamo.* 1. Hemp; a genus of annual urticaceous herbs of the tribe *Cannabineœ*, distinguished by the opposite or alternate digitate leaves and the axillary diœcious flowers, the male flowers being in cymose panicles and consisting of a 5-parted calyx and five stamens, and the female flowers being in sessile spikes and consisting of a single oblong-acuminate sepal investing the 2-styled, 1-ovuled ovary. The fruit is a bivalve caryopsis invested by the permanent calyx and containing a single exalbuminous seed with a curved embryo. [B, 34.] 2. Of the Netherl. Ph., the fruit of *C. sativa.* [B, 95.]—**American c.** [U. S. Ph.], **C. americana** [U. S. Ph.]. Fr., *chanvre* [Fr. Cod.], *chanvre de l'Amérique.* Ger., *amerikanischer Hanf.* It., *canapa americana.* Sp., *cáñamo americano.* The American variety of *C. sativa*; of the U. S. Ph., the herb of this variety grown in the Southern States and collected while flowering. [A, 477; B, 5, 81, 113.]—**C. indica** [U. S. Ph., Br. Ph., Austr. Ph., Hung. Ph.]. Fr., *chanvre de l'Inde* [Fr. Cod.], *chanvre indien.* Ger., *indischer Hanf.* It., *canapa indica.* Sp., *cáñamo* [Sp. Ph.], *marihuana* [Mex. Ph.]. Of Lamarck, the East Indian variety of *C. sativa*; of the pharmacopœias, the tops and leaves of the stalks of the female plant. [B, 95, 180.] See *C. sativa.*—**C. lutea.** The *Datisca cannabina.* [B, 121.]—**C. sativa** [Lin-

næus]. Fr., *chanvre.* Ger., *gemeiner Hanf.* It., *canapa.* Sp., *cáñamo.* The common hemp, indigenous to Asia and cultivated throughout Europe and America, where it has become naturalized so as to grow spontaneously; an erect branching herb from 4 to 10 feet high, with a rough, angular stem, small green or whitish flowers, and petiolate leaves divided into from 5 to 9 lanceolate or linear, acuminate, serrate leaflets. The American variety, *C. sativa*, var.

THE CANNABIS SATIVA. [A, 327.]

americana (*C. americana*), is less branching, has finer bast fibres, and contains less of the peculiar resinous principle than the Indian sort. The fruiting tops of the latter, agglutinated with resin, constitute the *gunjah*, or *guaza*, of the Hindoos, while the leaves or small stalks are the *bhang*, *siddi*, or *hasheesh.* The impure resin, obtained by scraping the tops of the plant or the clothes of men who have run through hemp fields, is known as *charas* or *churrus.* The herb of the Indian plant has a peculiar heavy odor and a bitter, acrid taste, and contains a volatile oil composed, according to Personne, of cannabene, cannabene hydride, several alkaloids (cannabinine, tetano-cannabinine, etc.), cannabinone, and cannabin, the latter being the chief active ingredient. The European and American varieties are less active and contain less of the resinous constituent. The herb of Indian hemp is extensively used in the East as an intoxicant, producing peculiar delusions in which the perception of the proper relations of things in time and space is decidedly perverted. Anæsthesia and analgesia are observed, also, in cases of acute poisoning, stupor with collapse, a cataleptic condition, or convulsions. The plant is used medicinally as an antispasmodic, antipruritic, and antalgesic and as a remedy in various nervous conditions (delirium tremens, the delirium of fever, insanity, tetanus, and migraine) and in uterine hæmorrhage. The fruit—hemp-seed, *fructus c.* [Ger. Ph., 1st ed., Russ. Ph., Dan. Ph., Swiss Ph., Norweg. Ph., Finn. Ph.], *c.* [Netherl. Ph.], *c. semen* [Belg. Ph., 1854, Gr. Ph.], *chènevis* [Fr. Cod.], *canepa* [Roum. Ph.], *cáñamon* [Sp. Ph.]—is a broadly ovate, smooth, somewhat compressed caryopsis containing about 30 per cent. of a fixed oil (*oil of hemp-seed*, *oleum c.*, *oleum expressum c.*), a greenish or brownish-yellow drying oil of peculiar odor, used in the preparation of emulsions, as an illuminating oil, and for varnishes. The seed itself is used as a food for birds and is sometimes eaten by men in northwestern Europe. [B, 34, 81, 95, 172, 270.]—**C. semen** [Belg. Ph., 1854, Gr. Ph.]. See *Fructus c.*—**C. silvatica, C. silvestris.** The *Galeopsis tetrahit.* [B, 121, 180.]—**C. spuria.** A species of *Galeopsis.* [B, 121.]—**Emulsio c.** [Austr. Ph., Russ. Ph.], **Emulsio seminum c.** [Belg. Ph., 1854]. Fr., *émulsion de chènevis* [Fr. Cod.]. Sp., *emulsion de semilla de cáñamo* [Sp. Ph.]. An emulsion made with hemp-seed and water alone [Russ. Ph.], or a mixture of water and sugar [Fr. Cod., Sp. Ph., Austr. Ph., Belg. Ph.], or simple syrup [Swed. Ph.]. [B, 95.]—**Extractum c. americanæ** [U. S. Ph., 1870]. Extract of American hemp, made by evaporating an alcoholic tincture of *C. americana.* [B, 81.]—**Extractum c. indicæ** [U. S. Ph., Br. Ph., Ger. Ph., Austr. Ph., Hung. Ph., Belg. Ph., 1854, Swiss Ph., Gr. Ph., Russ. Ph., Norweg. Ph., Swed. Ph.]. Fr., *extrait de chanvre de l'Inde* [Fr. Cod.]. It., *estratto di canapa indica.* Roum., *extractu de canepa indica* [Roum. Ph.]. An extract of pilular consistence [U. S. Ph.] made by exhausting the herb of *C. indica* with strong alcohol by percolation and evaporating the tincture so prepared. The Fr. Cod. directs dilute alcohol (sp. gr., 0·912). The Hung. Ph. directs that the thick extract obtained, as ordered in the other pharmacopœias, by maceration in alcohol, extraction by filtration, and subsequent evaporation, be converted into the dry extract (*extractum c. indicæ siccum*) by the addition of dextrin. [B, 95.]—**Extractum c. indicæ fluidum** [U. S. Ph.]. A fluid extract made by exhausting 100 parts of the herb of *C. indica* in No. 20 powder with alcohol by percolation, reserving the first 90 parts of the percolate, evaporating the remainder to the consistence of a soft extract, dissolving the latter in the reserved portion, and adding enough alcohol to bring the whole up to 100 parts by volume. [B, 81.]—**Extractum c. indicæ siccum** [Swed. Ph.]. Syn.: *extractum c. indicæ* [Hung. Ph.]. Dry extract of Indian hemp; made by adding to extractum c. indicæ enough licorice [Swed. Ph.] or dextrin [Hung. Ph.] to double [Swed. Ph.] or triple [Hung. Ph.] its weight. [B, 95.]—**Fructus c.** Fr., *chènevis.* Ger., *Hanfsamen, Hanfkörner.* Hemp-seed; the fruit of *C. sativa* (*q. v.*). [A, 301, 319; B, 95.]—**Herba c.** The herb of the European variety of *C. sativa.* [B, 95, 180.]—**Herba c. americanæ.** The herb of the American variety of *C. sativa.* [B, 95.]—**Herba c. aquaticæ.** The herb of *Bidens tripartita.* [B, 180.]—**Herba c. indicæ** [Ger. Ph., Austr. Ph., etc.]. The fruiting tops of the female plant of *C. indica.* [B, 95.]—**Herba c. silvestris.** The herb of *Galeopsis tetrahit.* [B, 180.]—**Indian c.** [U. S. Ph.]. See *C. indica.*—**Infusum c. indicæ** [Russ. Ph.]. An infusion of the herb of *C. indica* made with boiling distilled water, 167 parts of the product to represent 1 part of the herb. [B, 95.]—**Oleum c.** See *Oleum expressum c.*—**Oleum c. indicæ.** A preparation made by exhausting the herb of *C. indica* with oil. [B, 270.]—**Oleum expressum c.** Fr., *huile de chènevis.* Ger., *Hanföl.* Oil of hemp-seed; a fixed oil obtained by expression from the fruit of *C. sativa.* [B, 119, 180.]—**Semen c.** See *Fructus c.*—**Tinctura c.** [U. S. Ph., 1870], **Tinctura c. indicæ** [Br. Ph., Ger. Ph.]. Fr., *teinture de chanvre de l'Inde* [Fr. Cod.]. Ger., *Indischhanf-Tinctur.* It., *tintura di canapa indica.* A preparation made by exhausting 1 part of the herb of *C. indica* with enough strong alcohol to make 5 parts [U. S. Ph.], or with 5 parts of 52-per-cent. alcohol [Fr. Cod.], or by dissolving 1 part of extractum c. indicæ in 19 [Ger. Ph.] or 16$\frac{2}{3}$ [Br. Ph.] parts of strong alcohol. [B, 81, 113.]

CANNABIUM (Lat.), n. n. Ka^{2}n(ka^{3}n)-na^{2}b(na^{3}b)'i^2-u^{3}m(u^{4}m). See CANNABIN and CANNABINE.

CANNABOIDEÆ (Lat.), n. f. pl. Ka^{2}n(ka^{3}n)-na^{2}b(na^{3}b)-o(o^2)-i^{2}d(ed)'e^2-e(a^3-e^2). Of Engler, a suborder of the *Moraceæ*, corresponding to the *Cannabineæ.* [B, 245.]

CANNA-BOSCH, n. In Africa, the *Caroxylon salsola.* [B, 121.]

CANNABUS (Lat.), n. m. Ka^{2}n(ka^{3}n)'na^{2}b(na^{3}b)-u^{3}s(u^{4}s). See CANNABIS.

CANNACEÆ (Lat.), n. f. pl. Ka^{2}n(ka^{3}n)-na(na^3)'se^2(ke^2)-e(a^3-e^2). Fr., *cannacées.* Of Agardh and Lindley, the *Canneæ.* [B, 19, 121.]

CANNACORUS [Tournefort] (Lat.), n. m. Ka^{2}n(ka^{3}n)-na^{2}k-(na^{3}k)'o^{2}r-u^{3}s(u^{4}s). Fr., *cannacore.* See CANNA (2d def.).—**C. radice crocea.** See CURCUMA.

CANNA-DOWN, n. Ka^{2}n'na^3-du^5-u^{4}n. The *Eriophorum vaginatum.* [B, 275.]

CANNÆ [Roscoe, Kunth] (Lat.), n. f. pl. Ka^{2}n(ka^{3}n)'ne(na^3-e^2). See CANNEÆ.

CANNAMELLEA [Cæsalpinus] (Lat.), n. f. Ka^{2}n(ka^{3}n)-na^3-me^{2}l'le^2-a^3. From *canna* (*q. v.*), and *mel*, honey. Fr., *cannamelle.* The genus *Saccharum*, especially *Saccharum officinarum.* [B, 121, 173; L, 49.]

CANNA-POUDRE, CANNA-POUDU, n's. Coromandel names for certain species of *Crotalaria.* [B, 121; L, 109.]

CANNA-POULOE, n. The *Cynosurus lagopoides.* [B, 121.]

CANNARIEÆ [Dumortier] (Lat.), n. f. pl. Ka^{2}n(ka^{3}n)-na^2-(na^3)-ri(ri^2)'e^2-e(a^3-e^2). See CANNEÆ.

CANNE (Fr.), n. Ka^{3}n. See CANNA.—**Amidon de c.** See CANNA *starch.*—**C. à main.** The genus *Calamus.* [B, 121.]—**C. aromatique.** Syn.: *roseau aromatique.* The stem or root of *Calamus aromaticus* or, according to Guibourt, *Gentiana chyraita;* now applied in commerce to the root of *Acorus calamus.* [A, 301.]—**C. à sucre** [Fr. Cod.]. The sugar-cane (*Saccharum officinarum*). [B, 19.]—**C. bamboche.** The *Bambusa arundinaria.* [B, 173.]—**C. Congo.** The *Canna indica* and the *Amomum petiolatum* (*Costus spicatus*). [B, 121, 173.]—**C. de Batavia.** The *Saccharum violaceum.* [B, 121, 173.]—**C. de jonc.** The *Typha latifolia.* [B, 19.]—**C. de Madère.** The *Caladium seguinum* (*Dieffenbachia seguine*). [B, 121, 173.]—**C. de Provence** [Fr. Cod.]. Syn.: *roseau à grenouilles.* The *Arundo donax.* [B, 113, 121, 173.]—**C. de rivière.** See *C. Congo.*—**C. de vipère.** The *Kunthia montana.* [B, 121, 173.]—**C. d'Haïti.** See *C. de Batavia.*—**C. d'Inde.** See *C. Congo.*—**C. épineuse.** The genus *Calamus.* [B, 121.]—**C. marine.** See *C. marronne.*—**C. marone des Antilles.** The *Caladium esculentum* and the *Dieffenbachia seguine.* [B, 93, 173.]—**C. marronne.** In the West Indies, the *Dieffenbachia seguine;* in the Mauritius, the *Scirpus iridifolius;* in French Guiana, the *Alpinia occidentalis.* [B, 121.]—**C. royale.** The *Arundo donax*, var. *variegata.* [B, 121, 173.]—**C. vèle.** In the south of France, the *Arundo donax.* [B, 121.]—**Sucre de c.** [Fr. Cod.]. Cane-sugar. [B, 113.]—**Tisane de c.** [Fr. Cod.], **Tisane de c. de Provence.** A strained decoction of 20 parts of the sliced rhizome of *Arundo donax* in enough water to make 1,000 parts. [B, 113.]

CANNEÆ (Lat.), n. f. pl. Ka^{2}n(ka^{3}n)'ne^2-e(a^3-e^2). Fr., *cannées, balisiers.* Of R. Brown, a family of plants, now usually regarded as a tribe or suborder of the *Scitamineæ* (*Amomeæ, Marantaceæ*), comprising *Canna* and other genera. [B, 75, 170.]

CANNEBERGE (Fr.), n. Ka^{3}n-be^{2}rzh. The genus *Vaccinium*, especially the *Vaccinium oxycoccus.* [B, 121, 173.]—**C. de la Tasmanie.** The *Astroloma humifusum.* [L, 49.]—**C. des marais.** The *Vaccinium oxycoccus.* [B, 119.]—**C. ponctuée.** The *Vaccinium vitis idæa.* [B, 119.]—**Rob de c. des marais.** See *Rob* OXYCOCCOS.—**Rob de c. ponctuée.** See *Rob* VITIS *idææ.*—**Sirop de c. des marais.** See *Syrup of* CRANBERRY.

CANNÉES (Fr.), n. pl. Ka^{3}n-a. See CANNEÆ.

CANNEIRA (Port.), n. Ka^{3}n-a'ra^3. The *Arundo donax.* [B, 121.]

CANNELÉ (Fr.), adj. Ka^{3}n-e^{2}l-a. Grooved, channeled; as a n., the corpus striatum; as a n. in the f. pl., *c'es*, see CANALICULATI. [A, 301; B, 121; L, 41.]

CANNELLA (Lat.), n. f. Ka^{2}n(ka^{3}n)-ne^{2}l'la^3. See CANELLA and CINNAMON.

CANNELLACEÆ (Lat.), n. f. pl. Ka^{2}n(ka^{3}n)-ne^{2}l-la(la^3)'se^2-(ke^2)-e(a^3-e^2). See CANELLACEÆ.

CANNELLE (Fr.), n. Ka^{3}n-e^{2}l. See CANELLA and CINNAMON.—**Alcoolat de c.** See *Spiritus* CINNAMOMI.—**Alcoolat de c. composé.** See ELIXIR *vitæ Matthioli.*—**Alcoolé de c.** See *Tinc-*

tura CINNAMOMI.—**Alcoolé de c. blanche.** See *Tinctura* CANELLÆ *albæ*.—**Alcoolé de c. et de cardamome composé.** See TINCTURA *aromatica*.—**Alcoolé de c. et de carvi composé.** See *Tinctura* CARDAMOMI *composita*.—**Alcoolé de c. lavandulé.** See *Spiritus* LAVANDULÆ *compositus*.—**Baume de c.** See *Balsamum* CINNAMOMI.—**C. bâtarde.** 1. The bark of *Canella alba*. 2. The bark of *Syzygium caryophyllœum*. [B, 173.]—**C. blanche** [Fr. Cod.]. The bark of *Canella alba*. [B, 113, 173.]—**C. brûlante.** The bark of *Drimys granatensis*. [B, 121.]—**C. de Cayenne.** Cinnamon bark obtained from the *Cinnamomum zeylanicum* when grown in Guiana and the West Indies. [B, 121.]—**C. de Ceylan** [Fr. Cod.]. Ceylon cinnamon, the bark of *Cinnamomum zeylanicum*. [B, 113, 173.]—**C. de Chine.** A bark derived, according to some, from *Cinnamomum cassia*, according to others from the older branches of *Cinnamomum zeylanicum*. [B, 121, 173.] See CASSIA *lignea* and *Chinese* CINNAMON.—**C. de Cochin-Chine, C. de Coromandel.** The *Cinnamomum cassia* and its bark. [B, 88, 121, 173.]—**C. de Java.** An aromatic bark, inferior to ordinary cinnamon, probably of a Java species of *Cinnamomum*. [B, 121.]—**C. de Magellan.** The bark of *Drimys Winteri*. [B, 121.]—**C. de Malabar.** See *C. de Cochin-Chine*.—**C. de Padang.** A variety of cinnamon resembling Chinese and Ceylon cinnamon. [B, 93.]—**C. des Indes.** See *C. de Cochin-Chine*.—**C. de Sumatra.** An aromatic bark of Sumatra, inferior to ordinary cinnamon, probably that of a species of *Cinnamomum*. [B, 121.]—**C. du Malabar.** See *C. de Cochin-Chine*.—**C. giroflée.** 1. The bark of *Dicypellium caryophyllatum*. 2. The bark of *Syzygium caryophyllœum*. 3. According to some, the bark of *Eugenia caryophyllata*. [B, 121, 173.]—**C. giroflée du Brésil.** Probably the c. giroflée (1st def.). [B.]—**C. mate.** See CASSIA *lignea*.—**C. noire.** 1. The *Eugenia caryophyllus*. 2. The bark of *Syzygium caryophyllœum*. [B, 121, 173.]—**C. plate.** See *C. de Cochin-Chine*.—**C. poivrée.** The *Canella alba* and its bark. [B, 88, 121.]—**C. sauvage.** The bark of a wild cinnamon-tree of Ceylon, perhaps the *Cinnamomum zeylanicum*. [B, 121.]—**Chocolat à la c.** [Fr. Cod., 1837]. A preparation of 72 parts each of pasta cacao caracensis and pasta cacao insularum, 120 parts of sugar, and 1 part of cinnamon. [B, 119 (*a*, 21).]—**Cire de c.** A concrete wax-like substance obtained by boiling the fruit of *Cinnamomum zeylanicum*; used for making sweet-scented candles. [B, 173.]—**Eau de c.** See *Aqua* CINNAMOMI.—**Eau de c. alcoolisée.** See *Aqua* CINNAMOMI *spirituosa*.—**Eau de c. buglossée.** See *Aqua* CINNAMOMI *buglossata*.—**Eau de c. cordiale.** See *Aqua* CINNAMOMI *cordialis*.—**Eau de c. cydoniée.** See *Aqua* CINNAMOMI *cydoniata*.—**Eau de c. vineuse.** See *Aqua* CINNAMOMI *vinosa*.—**Eau distillée de c.** [Fr. CANNELLINE (Fr.), n. Ka^{3}n-e^{2}l-en. See CANELLIN.

CANNELLIQUE (Fr.), adj. Ka^{3}n-e^{2}l-ek. See CINNAMIC ACID.

CANNELURE (Fr.), n. Ka^{3}n-e^{2}l-u^{6}r. A groove (*e. g.*, of a director). [A. 301, 385 ; L, 109.]

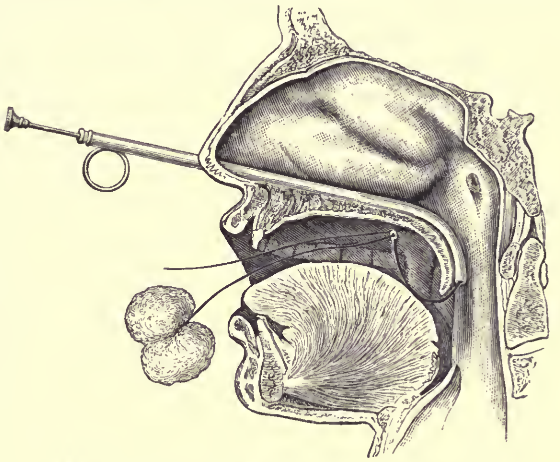
CANNES (Fr.), n. Ka^{3}n. A seaside winter health resort in the department of the Alpes-Maritimes, France. [A, 385 ; L, 49.]

CANNETTE (Fr.), n. Ka^{3}n-e^{2}t. The *Phragmites communis*. [B, 121.]

CANNIBAL-APPLE, n. Ka^{2}n′i^{2}-ba^{2}l-a^{2}pl. The *Solanum anthropophagorum*. [B, 185.]

CANNIHERBA, n. An old name for the *Santolina chamæcyparissus*. [B, 88, 121.]

CANNON-BALL-TREE, n. Ka^{2}n′o^{2}n-ba^{4}l-tre. The *Couroupita guianensis*. [B, 19, 185, 275.]



CANNON-BONE, n. Ka^{2}n′o^{2}n-bo^{3}n. See under BONE.

CANNOSTOMÆ [Lankester] (Lat.), n. f. pl. Ka^{2}n(ka^{3}n)-no^{2}s′-tom(to^{2}m)-e(a^{3}-e^{2}). An order of the *Octomeralia*. [L, 121.]

CANNSTATT (Ger.), n. Ka^{3}n′sta^{3}t. A place in Würtemberg, near Stuttgart, of a mild, equable temperature, where there are saline springs, the more important of which are the *Wilhelmsbrunnen* (formerly called the *Sulzerrainquelle*) and the two *Fröschner'schen Quellen* (the *Männlein* and the *Weiblein*). [A, 319 ; L, 49.]

CANNUCCIA (It.), n. Ka^{3}n-nut′chi^{2}-a^{3}. The *Phragmites communis*. [B, 121.]

CANNULA (Lat.). n. f. Ka^{2}n(ka^{3}n)′nu^{2}(nu^{4})-la^{3}. Dim. of *canna* (*q. v.*). Gr., αὐλισκος. Fr., *canule*, *cannule*. Ger., *Canüle*, *Röhrchen*. It., *c*. Sp., *cánula*. A tube (*e. g.*, one that incloses a trocar or some other instrument for making a puncture, the latter to be withdrawn after the puncture is made, in order that any liquid that may be present may flow off through the c. ; a tracheotomy tube, etc.). [A, 385 ; E.]—**Bellocq's c., Belloq's c.** (not *Belloc's*).

BELLOCQ'S CANNULA. (AFTER SÉDILLOT AND LEGOUEST.)

Fr., *sonde de Bellocq* (ou *Belloq*). Syn. : *Bellocq's* (or *Belloq's*) *sound*. An instrument used for plugging the posterior nares. It consists of a tube somewhat curved at one end and having a ring attached at the other end, traversed by a stylet which is continuous with a piece of curved watch-spring terminating in a button having an eye for carrying a thread. The stylet having been pulled back until the button closes the end of the tube, the instrument is passed along the floor of the nasal passage into the pharynx ; the stylet is then pressed farther into the tube, and a finger passed in by the mouth guides the button, armed with the thread, past the soft palate ; the thread is then brought out through the mouth, a piece of sponge or a wad of lint is secured to it, and the stylet is again withdrawn together with the tube, the sponge or lint being guided with the finger to its position against the posterior naris ; the thread is then detached from the instrument and secured to another plug placed against the nostril for the purpose of counter-pressure. [A, 278.]—**Bernard's c.** A short tube having a flange at each end ; used in making gastric and other fistulæ for experimental purposes. [L, 44.]—**C. pulmonum.** The trachea. [A, 322.]—**Durham's c.** A tracheotomy tube having a short tracheal arm joined to the horizontal arm by a sharp curve approaching a right angle, the inner tube being jointed. [A, 418.]—**Fuller's c.** A tracheotomy tube in which the outer tube is split above and below, so that, on being compressed, the extremity is easily inserted. [A, 418.]—**Gendron's c.** A tracheotomy tube similar to Fuller's c., the tracheal tube consisting of two segments, which are separated by means of a screw after the instrument has been introduced. [A, 418.]—**Gooch's c.** A double c. formerly much used in the ligation of uterine polypi. It consists of two straight silver cannulæ about 8 inches long, each adapted to pass through rings attached to a rod lying between the two. A strong ligature is passed through the two cannulæ, and the loop is thrown around the pedicle of the tumor. The cannulæ are then passed through the rings, and the ligature is tightened and tied to certain rings attached to the central rod. [A, 162.]—**Hartmann's c.** A slender silver tube fitted with a piece of rubber tubing for adapting it to the nozzle of a syringe ; used in washing out the tympanum through a perforation in the membrana tympani. [F, 32.]—**Lacrymal c.** A small tube with an expanded upper end, to be worn in the lacrymal duct in cases of stenosis. [L. 44.]—**Meissner's c.** A small c. with a needle for puncturing the fœtal envelopes.—**Reybard's c.** A c. with a trocar for the operation of paracentesis thoracis, opening into a small bag of goldbeater's skin. [A, 385.]—**Right-angled c.** See *Durham's c.*—**Trachea c.** A tracheotomy tube. [E.]—**Trendelenburg's rubber tampon-c.** See *Trendelenburg's trachea* TAMPON.

CANNULAR, CANNULATE, CANNULATED, adj's. Ka^{2}n′u^{2}l-a^{3}r, -at, -at-e^{2}d. Lat., *cannulatus*. Fr., *canellé*. Ger., *cannelirt*. Channeled, tubular. [L, 56, 81.]

CANNUTUM (Lat.), n. n. Ka^{2}n(ka^{3}n)-nu^{2}(nu)′tu^{3}m(tu^{4}m). See CALAMUS and CANNA.

CANO-CANO (Malay), n. The *Aira arundinacea*. [B, 121.]

CANOE-WOOD, n. Ka^{2}n-u′wu^{4}d. The *Liriodendron tulipifera*. [B, 19, 275.]

CANOKERSAIA, n. A name supposed to have been applied by Dioscorides to the *Parietaria.* [Bory (B, 121).]

CANON (Lat.), n. m. Ka(ka^3)'no^{2}n(non). Gen., *can'onis.* Gr., *κανών.* 1. A fundamental rule, a canon (*e. g.*, a rule of proportion, as that the head is of one eighth the height of the body). [A, 322, 385.] 2. The beam of a balance. [A, 387.] 3. An old instrument for adjusting sutures. [A, 322.]—**C.-bone.** See *Cannon*-BONE.

CANONIAS (Lat.), n. m. Ka^{2}n(ka^{3}n)-on(o^{2}n)'i^2-a^{2}s(a^{3}s). Gen., *canon'iæ.* Gr., *κανονίας.* A thin, lank person. [Hippocrates (A, 387).]

CANONICA (Lat.), n. f. Ka^{2}n(ka^{3}n)-o^{2}n'i^{2}k-a^3. From *canonicus*, canonical, because cultivated in monasteries. The *Geum urbanum.* [B, 121.]

CANÓNIGOS (Sp.), n. Ka^{3}n-on'e-gos. The *Valeriana toluccana.* [A, 447.]

CANOPIACEÆ (Lat.), n. f. pl. Ka^{2}n(ka^{3}n)-op-i^2-a(a^3)'se^2(ke^2)-e(a^3-e^2). Of Presl, an order of plants, consisting of the genus *Canopus.* [B, 170.]

CANOPICON (Lat.), n. n. Ka^{2}n(ka^{3}n)-o^{2}p(op)'i^{2}k-o^{2}n. Of Dioscorides, the *Euphorbia helioscopia.* [B, 121.]

CANOPITE, n. A sort of collyrium mentioned by Celsus. [L, 109.]

CANOPUM (Lat.), n. n. Ka^{2}n(ka^{3}n)-op'u^{3}m(u^{4}m). Gr., *κάνωπον.* The *Sambucus nigra.* [Paulus Ægineta (B, 121).]

CANOR (Lat.), n. m. Ka(ka^3)'no^{2}r. Gen., *cano'ris.* From *canere*, to sing. A musical sound. [A, 318.]—**C. stethoscopicus.** The auscultatory sound known as metallic tinkling. [A, 322.]

CANORUS (Lat.), adj. Ka^{2}n(ka^{3}n)-o'ru^{3}s(ru^{4}s). Sonorous. [A, 318, 322.].

CANOTA (Sp.), n. Ka^{3}n-o'ta^3. The *Panicum italicum.* [B, 121.]

CANOTTE (Fr.), n. Ka^{3}n-ot. A provincial name for the *Nenuphar.* [B, 121.]

CANSCHENAPOU (Malay), n. The *Bauhinia tomentosa.* [Rheede (B, 121); B, 172.]

CANSCHI (Malay), n. The *Truvia nudiflora.* [B, 121, 172.]

CANSCORA [Lamarck] (Lat.), n. f. Ka^{2}n(ka^{3}n)-sko'ra^3. From *cansjan-coure*, the Malabar name. A genus of tropical gentianaceous plants of the tribe *Chironieæ.* [B, 42, 121.]

CANSJAN-COURE, CANSJAN-KERA, n's. Malabar names for the *Canscora.* [B, 121.]

CANSJAVA (Malay), **CANSJAVAS** (Malay), n's. The *Cannabis sativa.* [B, 88, 121.]

CANTABRICA (Lat.), n., f. of adj. *cantabricus*, pertaining to *Cantabria* (the ancient name of a region in Spain now called Biscaya). Ka^{2}n(ka^{3}n)-ta^{2}b(ta^{3}b)'ri^{2}k-a^3. A name variously applied by the ancients to a species of *Convolvulus*, of *Dianthus*, and of *Campanula ;* of Celsus, according to Milligan, the *Convolvulus c.* [B, 45, 121.]

CANTABRUM (Lat.), n. n. Ka^{2}n(ka^{3}n)'ta^{2}b(ta^{3}b)-ru^{3}m(ru^{4}m). Bran. [Cælius Aurelianus (A, 318).]

CANTACON, n. Of the alchemists, garden-saffron. [Ruland (A, 325).]

CANTALEUP, CANTALOUP, CANTALOUPE, n's. Ka^{3}nt'a^{3}l-up. From the castle of *Cantalupo*, in Italy. Fr., *cantaloupe.* A variety of the *Cucumis melo.* [B, 88, 121, 173.]

CANTAMEN (Lat.), n. n. Ka^{2}n(ka^{3}n)-ta(ta^3)'me^{2}n. Gen., *cantam'inis.* From *cantare*, to sing. An incantation, a charm. [A, 318.]

CANTAPERDRIS, n. In Languedoc, the *Daphne gnidium.* [B, 121.]

CANTARA, n. The *Strychnos ignatia.* [L, 84.]

CANTARELLA (It.), n. Ka^{3}n-ta^{3}r-e^{2}l'la^3. Fr., *cantarelle.* A term variously applied to acqua Tofana, to a variety of that poison containing cantharides, and to a poison said to be made from the saliva of a rabid pig ; also a popular name for the *Meloe proscarabæus.* [A, 322 ; L, 41.]

CANTARELLUS (Lat.), n. m. Ka^{2}n(ka^{3}n)-ta^{3}r-e^{2}l'lu^{3}s(lu^{4}s). See CANTHARELLUS and MELOE *proscarabæus.*

CANTÁRIDA (Sp.), **CANTARIDO** (It.), n's. Ka^{3}n-ta^{3}r'i^{2}d-a^3, -o. The genus *Cantharis ;* in the pl. (Sp., *cantáridas ;* It., *cantaridi*), cantharides. [Sp. Ph. (B. 95).]

CANTARILLOS (Sp.), n. pl. Ka^{2}n-ta^{3}r-el'yos. The *Androsace maxima.* [B, 121.]

CANTARIS (Lat.), n. f. Ka^{2}n(ka^{3}n)'ta^{3}r-i^{2}s. Gen., *cantar'idos (-is).* Of Dioscorides, the *Fumaria officinalis.* [B, 121.]

CÁNTARO (Sp.), n. Ka^{3}n'ta^3-ro. The *Cordia gerascanthus.* [B, 121.]

CANTATIO (Lat.), n. f. Ka^{2}n(ka^{3}n)-ta(ta^3)'shi^2(ti^2)-o. Gen., *cantatio'nis.* See CANTAMEN.

CANTELEUP, CANTELOUP, CANTELOUPE, n's. See CANTALOUPE.

CANTE-MORGARO, n. In the East Indies, the *Achyranthes prostrata.* [B, 121.]

CANTERBURY, n. Ka^{2}nt'u^{5}r-be^{2}r-i^2. A place in England, where there is a mineral spring. [L, 94.]—**C.-bell.** The *Campanula medium, Campanula trachelium*, and *Campanula pratensis.* [B, 275.]

CANTERINUS (Lat.), adj. Ka^{2}n(ka^{2}n)-tu^{5}r(tar)-i(e)'nu^{3}s(nu^{4}s). From *canterius*, a gelding. Pertaining to horses (*e. g.*, *hordeum canterinum*). [A, 318.]

CANTERIUM (Lat.), **CANTERIUS** (Lat.), n's n. and m. Ka^{2}n-(ka^{3}n)-te(te^2)'ri^2-u^{3}m(u^{4}m), -u^{3}s(u^{4}s). Gr., *κάντεριος.* A bar resting on two posts, used by Hippocrates in reducing dislocations of the humerus. [A, 325 ; L, 94.]

CANTHA-JATHI (Bengal.), n. The *Barleria prionitis.* [B, 172.]

CANTHAL, adj. Ka^{2}n'tha^{2}l. From *κανθός* (see CANTHUS). Pertaining to the angle of the eyelids.

CANTHARELLUS (Lat.), n. m. Ka^{2}n(ka^{3}n)-tha^{3}r-e^{2}l'lu^{3}s-(lu^{4}s). Fr., *cantharelle, chanterelle.* Ger., *Faltenpilz.* Of Adanson, a genus of hymenomycetous *Fungi* of the *Agaricini.* [B, 121, 270.]—**C. aurantiacus** [Fries]. Fr., *fausse chanterelle.* Ger., *orangefarbener Faltenpilz.* Syn.: *Merulius aurantiacus* [Persoon], *Agaricus alectorolophoides* [Schäffer]. A species thought to be poisonous, resembling *C. cibarius*, but distinguished from it by its orange-red color, its colored flesh, and the absence of a fatty feel. [B, 180, 270.]—**C. cibarius** [Fries]. Fr., *chanterelle, chanterelle comestible, cheville, chevrette, gallinace, girandolle, girolle ordinaire, manne terrestre, moëlle de terre, oreille de lièvre jaune, roussane, virolle.* Ger., *Eierschwamm, Pfefferling, gemeiner Faltenpilz.* The chanterelle ; a European species distinguished by its bright-yellow color, its white flesh, its pleasant fruity odor, and its fatty feel ; highly esteemed as an article of food. [B, 19, 121, 180.]—**C. lacteus** [Fries]. A variety of *C. aurantiacus.* [B, 173.]—**C. nigripes** [Duhamel]. See *C. aurantiacus.*

CANTHARATE, n. Ka^{2}n'tha^{2}r-at. A salt of cantharic acid. [A, 385.]

CANTHARIASIS (Lat.), n. f. Ka^{2}n(ka^{3}n)-tha^{3}r-i^2-a(a^3)'si^{2}s. Gen., *canthariasʼeos (-is).* The state of being infested with the larvæ of coleopterous insects. [A, 385 ; "Lond. Med. Gaz.," xx, p. 94 (L).]

CANTHARIC ACID, n. Ka^{2}n'tha^{2}r-i^{2}k. Fr., *acide cantharique.* Ger., *Cantharsäure.* A monobasic acid, $C_{10}H_{12}O_4 = C_9H_{11}O_2 - CO.OH$, isomeric with cantharidic acid, formed from cantharidin by the action of hydriodic acid. [B, 81, 270.]

CANTHARIDAL, adj. Ka^{2}n-tha^{2}r'i^{2}d-a^{2}l. Lat., *cantharidalis.* Fr., *cantharidien.* Pertaining to or containing cantharides. [B.] See *C.* COLLODION.

CANTHARIDATE, n. Ka^{2}n-tha^{2}r'i^{2}d-at. A salt of cantharidic acid. [B.]

CANTHARIDATED, adj. Ka^{2}n-tha^{2}r'i^{2}d-at-e^{2}d. Lat., *cantharidatus.* Fr., *cantharidé.* Combined with or containing cantharides. [B.]

CANTHARIDE (Fr., Ger.), n. Ka^{3}n^2-ta^{3}r-ed, ka^{3}n-ta^{3}r-ed'e^2. 1. (Fr., Ger.) the genus *Cantharis* and the drug cantharides. 2. (Fr.) of Paulet, the *Agaricus cyaneus* or some related species of *Agaricus.* [B, 121.]—**Acétolé de c's** (Fr.). See *Acetum* CANTHARIDIS.—**Aetherische C'ntinctur** (Ger.). See *Tinctura* CANTHARIDUM *ætherea.*—**Aetherisches C'nextract** (Ger.). See *Extractum* CANTHARIDUM *spirituosum.*—**Alcoolé de c.** (ou de c's) (Fr.). See *Tinctura* CANTHARIDIS. — **Blaue C'n** (Ger). See LYTTA *gigas.* —**C. à bandes** (Fr.). See LYTTA *vittata.*—**C. à tête rouge** (Fr.). The *Cantharis* (*Lytta*) *ruficeps.* [B, 38.]—**C. à vésicatoires** (Fr.)., **C. des boutiques** (Fr.). The *Cantharis vesicatoria.* [B, 119.]—**C. marginée** (Fr.). The *Cantharis* (*Lytta*) *marginata.* [B, 180.]—**C'ncampher** (Ger.). Cantharidin. [B, 180.]—**C'nessig** (Ger.). See *Acetum* CANTHARIDIS.—**C'nextract** (Ger.). See *Extractum* CANTHARIDIS.—**C'nextract-Cerat** (Ger.). See *Ceratum extracti* CANTHARIDIS.—**C'npflaster** (Ger.). See *Emplastrum* CANTHARIDIS. — **C'nsalbe** (Ger.). See *Unguentum* CANTHARIDIS.—**C'ntinctur** (Ger.). See *Tinctura* CANTHARIDIS.— **C. officinale** (Fr.), **C. ordinaire** (Fr.). See CANTHARIS *vesicatoria.*—**C. tachetée** (Fr.). The *Cantharis vittata.* [B, 119.]— **Cérat avec l'alcoolé de c's** (Fr.). Cerate of tincture of cantharides. [B, 119.] See under *Ceratum extracti* CANTHARIDIS.— **Cérat avec l'hydrolé de c's** (Fr.). Cantharidal cerate made with an aqueous decoction or infusion of cantharides. [B, 119.] See *Ceratum* CANTHARIDIS.—**Cérat d'extrait de c's** (Fr.). See *Ceratum extracti* CANTHARIDIS.—**Chinesische C'n** (Ger.). See MYLABRIS *cichorii* and MYLABRIS *phalerata.*—**Éléolé de c's** (Fr.). See *Oleum* CANTHARIDUM.—**Emplâtre de c's** (Fr.). See *Emplastrum* CANTHARIDIS.—**Éthérolé de c's** (Fr.). See *Tinctura* CANTHARIDUM *ætherea.*—**Extrait acéto-alcoolique de c's** [Trousseau] (Fr.). A syrupy preparation made by digesting 4 parts of coarsely powdered cantharides, 1 part of concentrated pyroligneous acid, and 16 parts of 85-per-cent. alcohol over a water-bath at from 40° to 50° C., expressing, filtering, and evaporating at a gentle heat. Bibulous paper soaked in this preparation was recommended by Trousseau as a very convenient and certain application for drawing a blister. [A, 290.]—**Extrait de c.** [Fr. Cod.] (Fr.). See *Extractum* CANTHARIDIS.—**Extrait de c. alcoolique** [Fr. Cod.] (Fr.). See *Extractum* CANTHARIDIS *spirituosum.*—**Geistiges C'nextract** (Ger.). See *Extractum* CANTHARIDUM *spirituosum.*—**Huile de c's** (Fr.). See *Oleum* CANTHARIDUM.—**Huile de c's térébinthinée** (Fr.). See *Linimentum* CANTHARIDIS.— **Hydrolé (ou Infusion) de c's** (Fr.). See *Infusum* CANTHARIDIS. —**Liparolé de c's** (Fr.). See *Unguentum* CANTHARIDIS.—**Oléule de c's** (Fr.). See *Linimentum* CANTHARIDIS.—**Ostindische C'n** (Ger.). See CANTHARIDES *cœruleæ* (under CANTHARIS).—**Oxéolé de c's** (Fr.). See *Acetum* CANTHARIDIS.—**Papier à vésicatoire aux c's.** See *Charta* CANTHARIDIS.—**Poudre de c.** [Fr. Cod.] (Fr.). Lat., *pulvis cantharidis* [Fr. Cod.]. A powder made by pulverizing cantharides warmed in an oven to 50° C., and passing through a No. 1 or No. 3 hair sieve or a silk sieve of 80 meshes to the inch (French). [B, 113.]—**Schwarze C'n** (Ger.). A name for several species of *Meloe* used like cantharides. [B, 270.]— **Spirituöses C'nextract** (Ger.). See *Extractum* CANTHARIDUM *spirituosum.*—**Teinture de c's** (Fr.). See *Tinctura* CANTHARIDIS. —**Teinture de c's camphrée** (Fr.). See *Tinctura* CANTHARIDUM *camphorata.*—**Teinture de c's composée** (Fr.). See *Tinctura*

CANTHARIDUM *composita.*—**Teinture éthérée camphrée de c's** (Fr.). See *Camphorated ethereal tincture of* CANTHARIDES.—**Teinture éthérée de c's** (Fr.). See *Tinctura* CANTHARIDUM *ætherea.*—**Zusammengesetzte C'ntinctur** (Ger.). See *Tinctura* CANTHARIDUM *composita.*

CANTHARIDES (Lat.), n. f. pl. Ka²n(ka³n)-tha²r(tha³r)'i²d-ez(e²s). The pl. of *cantharis* (*q. v.* [2d def.]).

CANTHARIDIÆ (Lat.), **CANTHARIDIANI** (Lat.), n's f. pl. and m. pl. Ka²n(ka³n)-tha³r-i²d'i²-e(a³-e²), -i²d-i²-a(a³)'ni(ne). Fr., *cantharidies, cantharidiens.* A tribe of the *Trachelidæ* or a division of the *Coleoptera* having *Cantharis* as the type. [L, 180.]

CANTHARIDIC, adj. Ka²n-tha²r-i²d'i²k. Lat., *cantharidicus.* Fr., *cantharidique.* Of, pertaining to, or derived from, cantharides. [B.]—**Anhydrous c. acid.** Fr., *acide cantharidique anhydre.* Ger., *wasserfreie Cantharidinsäure.* See CANTHARIDIN.—**C. acid.** Lat., *acidum cantharidicum.* Fr., *acide cantharidique.* Ger., *Cantharidinsäure.* It., *acida cantaridico.* Sp., *ácido cantarídico.* A dibasic acid, $C_{10}H_{14}O_4 = C_8H_{12}(CO.OH)_2$, formed from cantharidin by the addition of the elements of a molecule of water. [B, 81, 270.]—**C. anhydride.** Fr., *anhydride cantharidique.* Ger., *Cantharidinsäure-Anhydrid.* See CANTHARIDIN.—**C. ether.** Fr., *éther cantharidique.* Ger., *Cantharidinsäure-Ester.* A compound of c. acid with an alcohol radicle. [B.]

CANTHARIDIEN (Fr.), adj. Ka³n-ta³r-ed-i²-a³n². Pertaining to the genus *Cantharis* or to cantharides; as a n., in the pl., see CANTHARIDIÆ. [A, 301, 385.]

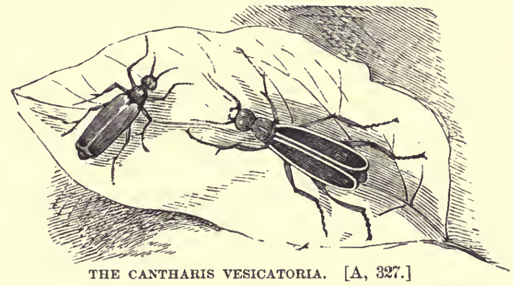
CANTHARIDIN, n. Ka²n-tha²r'i²d-i²n. Lat., *cantharidinum, cantharidina.* Fr., *cantharidine.* Ger., *Cantharidin.* It., Sp., *cantaridina.* Syn.: *vesicatorin.* The active principle of cantharides, $C_{10}H_{12}O_4$, forming odorless and colorless scales or prismatic crystals, almost insoluble in water, readily soluble in alcohol, in ether, in acetic ether, in chloroform, in oil of turpentine, in the fats and fatty oils, in wax, and in resins; chemically, the anhydride, $C_8H_{12}O\langle{}^{CO}_{CO}\rangle O$, of cantharidic acid. [B, 81, 270.]—**C.-ammonia.** See AMMONIUM *cantharidate.*—**C'sauer** (Ger.). Of or pertaining to cantharidic acid; with the name of a base, the cantharidate of that base. [B.]—**C'säure** (Ger.). Cantharidic acid. [B, 270.]—**C'säure-Anhydrid** (Ger.). See *C.*—**C'säure-Dimethyläther** (Ger.). Methyl cantharidate. [B, 270.]—**C'säure-Ester** (Ger.). See CANTHARIDIC *ether.*—**C'säure-Methylester** (Ger.). Methyl cantharidate. [B.]—**Wasserfreie C'säure** (Ger.). See *C.*

CANTHARIDINA (Lat.), n. f. sing. and n. pl. Ka²n(ka³n)-tha³r-i²d-i(e)'na³. 1. (F. sing.) see CANTHARIDIN. 2. (N. pl.) a subfamily of the *Trochidæ.* [L, 282.]

CANTHARIDINIC ACID, n. Ka²n-tha²r-i²d-i²n'i²k. See CANTHARIDIC *acid.*

CANTHARIDINUM (Lat.), n. n. Ka²n(ka³n)-tha³r-i²d-i(e)'-nu³m(nu⁴m). See CANTHARIDIN.—**C. oleosum.** See *Oleum* CANTHARIDIS *viride.*

CANTHARIDISM, n. Ka²n-tha²r'i²d-i²zm. Lat., *cantharidismus.* Fr., *cantharidisme.* Poisoning with cantharides, either by their ingestion by the mouth or by absorption from a cantharidal blister. The chief symptoms are strangury, burning pain in the urethra, swelling or even gangrene of the genitals, and the passage of bloody and albuminous urine, together with the usual gastro-intestinal signs of irritant poisoning if the drug has been taken by the mouth. The lesions are inflammatory conditions of the kidneys and bladder. Death may occur from the primary irritant effect upon the gastro-intestinal canal or from the subsequent renal and cystic inflammation. The treatment consists in the removal of the poison, the administration of water and mucilaginous drinks, and the use of opiates, the bromides, and hot sitz-baths for the relief of the pain. [B, 81, 270.]



CANTHARIDISMUS (Lat.), n. m. Ka²n(ka³n)-tha²r(tha³r)-i²d-i²z(i²s)'mu³s(mu⁴s). See CANTHARIDISM.—**C. externus.** Cantharidism from absorption of cantharides applied to the skin. [B, 270.]

CANTHARIDITES, n. pl. Ka²n-tha²r'i²d-itz. See CANTHARIDIÆ.

CANTHARIN, n. Ka²n'tha²r-i²n. Lat., *cantharinum.* Fr., *cantharine.* Ger., *Cantharin.* A substance, C_8H_{12}, formed by the distillation of cantharic acid with lime. [B, 270.]

CANTHARINA (Lat.), n. n. pl. Ka²n(ka³n)-tha²r(tha³r)-i(e)'-na³. A group of the *Sparidæ.* [L, 207.]

CANTHARIS (Lat.), n. f. Ka²n(ka³n)'tha²r(tha³r)-i²s. Gen., *canthar'idis.* Gr., *κανθαρίς.* Fr., *cantharide.* Ger., *Cantharide, spanische Fliege* (2d def.). It., *cantarida.* Sp., *cantárida.* 1. A genus of coleopterous insects, now referred to *Lytta* (*q. v.* for species not here given). 2. The Spanish fly (see LYTTA *vesicatoria*). In English it is usually written in the pl., *cantharides,* which is also the official title in the German and some other pharmacopœias. Applied externally, the preparations act as rubefacients and vesicants; taken by the mouth, in ordinary medicinal doses, they stimulate the gastro-intestinal and genito-urinary tracts, and, given in minute doses, they have been used for the mitigation of strangury. For the poisonous effects, see CANTHARIDISM. [A, 322; B.]—**Acetum cantharidis** [Br. Ph.], **Acetum cantharidum, Acidum aceticum cantharidum.** Fr., *acétolé de cantharide, vinaigre cantharidé.* Ger., *Cantharidenessig.* Vinegar of cantharides; made by digesting 2 oz. of cantharides with 2 fl. oz. of glacial acetic acid and 13 fl. oz. of acetic acid at a temperature of 200° C., percolating, expressing the residue with 5 fl. oz. of acetic acid, mixing the percolate and the expressed liquid, and adding acetic acid to 1 pint. A similar preparation, made with vinegar, was official in the old Lond. Ph., and the *vinaigre rubéfiant* of the Formulary of the Paris Hospitals (1839) was also similar, containing, besides the cantharides and acetic acid, alcohol, garlic, mustard, black pepper, and camphor. All these preparations are powerful vesicants. [Vogl (A, 319); B, 95, 119.]—**Adeps cantharidibus medicatus.** See *Unguentum cantharidis.*—**Alcoholic extract of cantharides.** See *Extractum cantharidum spirituosum.*—**Ash-colored c.** The *Lytta cinerea.* [B, 5.]—**Camphorated cantharides plaster.** See *Emplastrum cantharidum camphoratum.*—**Camphorated ethereal tincture of cantharides.** Fr., *teinture éthérée camphrée de cantharides.* Of the Brunsw. Ph., 1777, a preparation made by triturating together 1 part each of camphor and cantharides, and digesting the mixture on a water-bath with 56 parts of alcohol and 4 of nitric acid; used internally in dropsy. [B, 119.]—**Camphorated tincture of cantharides.** See *Tinctura cantharidum camphorata.*—**C. aurata.** A species used in the Deccan. ["Pharm. Jour. and Trans.," 1871, p. 424 (L).]—**C. aurulenta.** See LYTTA *Rouxii.*—**Cantharides cæruleæ.** Ger., *blaue Cauthariden.* The purplish-blue specimens of *Lytta gigas* occasionally found in commerce. [B, 180.]—**Cantharides camphor.** See CANTHARIDIN.—**Cantharides cerate.** See *Ceratum cantharidis.*—**C. erythrocephala.** A Chinese species. ["Pharm. Jour. and Trans.," 1871, p. 424 (L).]—**C. hirtipes** [Waterhouse]. A species closely allied to *Lytta nepalensis.* ["Pharm. The *Meloe proscarabæus* and the *Meloe violaceus.* [B, 180.]—**C. syriaca.** Probably the *Lytta syriaca;* said to have been used formerly in southern Europe as a substitute for *Lytta vesicatoria,* and by Forskål to be employed in Arabia. [B, 270; L, 130.] Cf. LYTTA *segetum.*—**C. trimaculata.** The *Lydus trimaculatus.* [B, 180.]—**C. vesicatoria** [Latreille]. Fr., *mouche d'Espagne* (ou *vésicante*), *cantharide.* Ger., *spanische Fliege, Blasenzieher, Laubkäfer, Graskäfer, Goldkäfer.* Syn.: *Lytta vesicatoria* [Fabricius], *Meloe vesicatorius* [Linnæus], *musca hispanica.* The Spanish fly, or blister-beetle, of southern and central Europe. It is from ½ inch to 1 inch long; broad, flattened-cylindrical in shape; of a copper-green or shining brass-color above and below; with two lateral eyes; having filiform antennæ of eleven joints; the

THE CANTHARIS VESICATORIA. [A, 327.]

wing-cases covering the body; wings membranous and brownish; claws bifid. It constitutes the drug c. or *cantharides.* The insects are captured before sunrise by spreading cloths under the trees that they frequent; persons protected with gloves and masks shake the trees violently, and the beetles fall on to the cloths, after which they are killed with the vapor of vinegar and dried. Thus prepared, they have a peculiar, somewhat disagreeable odor. [A, 290; B, 180, 270; L, 65.]—**C. violacea.** Probably the *Lytta violacea.* [B.]—**C. viridi-aurata.** The *C.* (*Lytta*) *vesicatoria.* [B, 180.]—**Ceratum cantharidis** [U. S. Ph.]. Fr., *cérat cantharidé* (ou *vésicant*). Ger., *Cantharidencerat.* Cantharides (or blistering) cerate; made by melting together 20 parts each of yellow wax and resin and 25 of lard, and adding 35 of powdered cantharides. Similar preparations—made from cantharides and simple cerate; from an aqueous decoction or infusion of cantharides mixed with resin cerate or with lard, yellow wax, resin, and turpentine; or from an infusion of cantharides in olive-oil mixed with wax—were formerly official. [B, 81, 119.] See also *Emplastrum cantharidis.*—**Ceratum extracti cantharidis** [U. S. Ph.]. Fr., *cérat d'extrait de cantharides.* Ger., *Cantharidenextract-Cerat.* Cerate of extract of cantharides; made by extracting 30 parts of cantharides with alcohol of the sp. gr. of 0·820, distilling off the alcohol, evaporating the extract on a water-bath to 15 parts, and mixing it with 15 of resin and 35 each of yellow wax and lard. A similar preparation of the Bavarian Ph., 1822—a *cerate with tincture of cantharides* (*cérat avec alcoolé de cantharides*)—was made by digesting 2 parts of cantharides with 4 of brandy, adding 8 of almond-oil, boiling until the alcohol was dissipated, straining, and adding 3 parts of white wax. [B, 81, 95, 119.]—**Charta cantharidis** [U. S. Ph.]. Fr., *papier épispastique* [Fr. Cod.]. Ger., *Spanisch-Fliegen-Papier.* It., *carta vesicatoria.* Sp., *papel epispástico* [Sp. Ph.]. Syn.: *charta epispastica* [Br. Ph., Fr. Cod., Belg. Ph., Netherl. Ph.]. Cantharides (or blistering) paper; paper spread with a preparation of cantharides. The U. S. Ph. orders a mixture of 8 parts of white wax, 3 of spermaceti, 4 of olive-oil, 1 part each of Canada balsam and cantharides, and 10 parts of water, boiled together and strained. The Br. Ph. orders 4 parts of powdered cantharides, 24 of distilled water, 16 of white wax, 6 of spermaceti, 3 of rosin, and 7½ of olive-oil, digested on a water-bath and, after removal of the watery liquid, melted and mixed with 1 part of Canada balsam. The Netherl. Ph. orders a mixture of 3 (in the *charta epispastica No.* 1) or 4 (in the *charta epispastica No.* 2) parts of cantharides, 30 of water, 24 of yellow wax, 9 of spermaceti, and 12 of olive-oil, to which, after heating, 3 of larch turpentine are added. The Fr. Cod. directs an ointment of 10 parts of cantharides, 24 of mutton

tallow, and 36 of benzoated lard; of this ointment 36 parts for the *papier épispastique No. 1*, 45 for the *papier épispastique No. 2*, and 60 for the *papier épispastique No. 3*, are mixed with 6 of white wax, also, for the *papier épispastique No. 1*, with 15 of benzoated lard and 10 of mutton tallow, while, for the *papier épispastique No. 2*, 9 parts of benzoated lard and 6 of tallow are employed. The Belg. Ph. directs that 78 parts of cantharides for the *charta epispastica No. 1*, and 90 for the *charta epispastica No. 2*. be boiled three successive times with 10 times the quantity of water, and the strained decoctions mixed, evaporated to a sixth, and then mixed with 433 parts of yellow wax, 217 each of spermaceti and elemi, and 133 of larch turpentine. The Sp. Ph. orders cantharides to be heated with 16 parts of lard, and the filtered mixture melted with 9 of white wax and 4 of spermaceti, tartar emetic being added subsequently; the three preparations of the Sp. Ph. contain, respectively, 3, 3·5, and 4 parts of cantharides, and 1, 1·5, and 2 of tartar emetic. [B, 81, 95, 113.] Cf. *Extrait acéto-alcoolique de* CANTHARIDES (under CANTHARIDE).—**Collodium cum cantharide** [U. S. Ph.]. See under COLLODIUM.—**Compound tincture of cantharides.** See *Tinctura cantharidum composita.*—**Emplastrum cantharidis** [Br. Ph.], **Emplastrum cantharidum** [Austr. Ph., Belg. Ph., Dan. Ph., Finn. Ph., Gr. Ph., Swiss Ph., Hung. Ph., Netherl. Ph.]. Fr., *emplâtre vésicatoire* [Fr. Cod.]. Ger., *Spanisch-Fliegen-Pflaster*, *Blasenpflaster.* Sp., *emplasto de cantáridas* [Sp. Ph.]. Roum., *emplastru de cantharide* [Roum. Ph.]. Syn.: *emplastrum cantharidum ordinarium* [Ger. Ph., Norweg. Ph., Russ. Ph.] (seu *epispasticum*, seu *vesicatorium*, seu *vesicans*). Cantharides (or blistering) plaster; made by melting together 12 parts of lard, 15 each of yellow wax and suet, and 3 of resin with 12 of cantharides [Br. Ph.]; or by melting together 20 parts of yellow wax, 5 of elemi, 2 of olive-oil, 15 of basilicon ointment, and 21 of cantharides [Fr. Cod.]; or by digesting 4 parts of yellow wax with 1 part each of olive-oil and turpentine and 2 parts of cantharides [Ger. Ph.]. The Belg. Ph., Netherl. Ph., and Russ. Ph. substitute larch turpentine for common turpentine, and the Belg. Ph. and Netherl. Ph. add 3 per cent. of balsam of Peru. The percentages of cantharides are: 20 [Swiss Ph.], 25 [Ger. Ph., Gr. Ph.], $26\frac{2}{3}$ [Russ. Ph.], 27·27 [Dan. Ph., Finn. Ph., Norweg. Ph., Roum. Ph.], 30 [Sp. Ph.], $33\frac{1}{3}$ [Br. Ph., Fr. Cod., Austr. Ph., Hung. Ph.], 35·82 [Netherl. Ph.], and 36 [Belg. Ph.]. [B, 95.]—**Emplastrum cantharidum anglicum** [Belg. Ph.]. A preparation made by melting together 203 parts each of yellow wax and mutton tallow, 94 of purified pine resin, and 168 of lard, and adding 332 of cantharides. [B, 95.] Cf. EMPLASTRUM *calefaciens.*—**Emplastrum cantharidum camphoratum** [Belg. Ph.]. Fr., *emplâtre vésicatoire camphré* [Fr. Cod.]. A mixture of 96 parts of emplastrum cantharidis with 4 of camphor [Belg. Ph.]; or a plaster made by covering a cantharidal plaster with a thin layer of camphor [Fr. Cod.]. Similar preparations were the *camphorated blistering cerate*, made by mixing 1 part of camphor, 20 parts of cantharides, and 60 of yellow wax; and the *camphorated blistering plaster*, made of 11 parts of cantharides and 1 part of camphor mixed with 32 parts of plaster of melilotus, or with 7 parts each of oil of roses and turpentine and 27 of yellow wax. [B, 95, 119.]—**Emplastrum cantharidum colatum** [Norweg. Ph., 1870, Swed. Ph., 1879]. A preparation made by melting together 5 parts of yellow wax, 8 of rosin, and 2 of suet, mixing with 8 parts of cantharides, and, after heating, adding 1 part of common turpentine, straining, and pouring into paper molds. [B, 95.]—**Emplastrum cantharidum cum euphorbio.** See *Emplastrum cantharidum perpetuum.*—**Emplastrum cantharidum extensum.** See SPARADRAP *vesicans.*—**Emplastrum cantharidum ordinarium** [Ger. Ph., Norweg. Ph., Russ. Ph.]. See *Emplastrum cantharidis.*—**Emplastrum cantharidum perpetuum** [Ger. Ph., Austr. Ph., Hung. Ph., Russ. Ph., Belg. Ph., Swiss Ph.]. Fr., *emplâtre vésicant de Janin*, *vésicatoire perpetuel.* Ger., *immerwährendes Zugpflaster*, *ewiges Pflaster.* Sp., *vejigatorio perpétuo.* Roum., *emplastru perpetuu de cantharide.* Syn.: *emplastrum cantharidum cum euphorbio* [Dan. Ph., Finn. Ph., Norweg. Ph., Swed. Ph.] (seu *euphorbii* [Gr. Ph.]). A plaster of 10 parts of yellow wax, 14 of rosin, 4 of suet, 7 of turpentine, 4 of cantharides, and 1 part of euphorbium [Ger. Ph.]. Other pharmacopœias replace the turpentine with larch turpentine, or direct lard instead of suet, or omit both these ingredients, or add mastic or sandarac. The percentages of cantharides are: 10 [Ger. Ph.], 12·9 [Belg. Ph.], 12·96 [Russ. Ph.], 13·2 [Roum. Ph.], 13·33 [Dan. Ph., Finn. Ph., Swiss Ph., Norweg. Ph., Swed. Ph.], 18·18 [Austr. Ph., Hung. Ph.], and 24·24 [Gr. Ph.]; those of euphorbium are: 2·5 [Ger. Ph.], 3·03 [Gr. Ph.], 5·55 [Russ. Ph.], 6·4 [Belg. Ph., Roum. Ph.], 6·67 [Dan. Ph., Finn. Ph., Swiss Ph., Norweg. Ph., Swed. Ph.], and 9·09 [Austr. Ph., Hung. Ph.]. [B, 95; *a*, 14.]—**Emplastrum picis cum cantharide** [U. S. Ph.]. Ger., *Cantharidenöl.* Sp., *aceite de cantáridas.* Syn.: *oleum cantharidatum* [Ger. Ph.]. A filtered infusion of 1 part of cantharides in 10 parts of olive-oil [Fr. Cod.]. The preparation of the Ger. Ph. is made with 3 parts of cantharides and 10 of rapeseed-oil. [B; *a*, 14.] Cf. *Linimentum cantharidis.*—**Oleum cantharidum viride.** See *Extractum cantharidum æthereum.*—**Pomatum cum cantharide, Pomatum luteum de cantharide** [Fr. Cod.], **Pomatum viride cum cantharide** [Fr. Cod.]. Fr., *pommade épispastique jaune* (et *verte*). See *Unguentum cantharidis.*—**Pulvis cantharidis** [Fr. Cod.]. See *Poudre de* CANTHARIDE.—**Tinctura ætherea cantharidis** [Fr. Cod.]. See *Tinctura cantharidum ætherea.*—**Tinctura cantharidis** [U. S. Ph., Br. Ph., Fr. Cod.], **Tinctura cantharidum** [Ger. Ph.]. Fr., *teinture* (ou *alcoolé*) *de cantharide.* Ger., *Cantharidentinctur*, *Spanisch-Fliegen-Tinctur.* A tincture containing 5 per cent. [U. S. Ph.], rather less than 2 per cent. [Br. Ph.], 9 per cent. [Fr. Cod.], or 10 per cent. [Ger. Ph.] of cantharides. Various old similar tinctures contained from 1 to 20 per cent. [B, 81, 119.]—**Tinctura cantharidum acetica.** A tincture of cantharides made with acetic acid and alcohol. [Vogl (A, 319).]—**Tinctura cantharidum ætherea.** Fr., *éthérolé* (ou *teinture étherée*) *de cantharide* [Fr. Cod.]. Ger., *ätherische Cantharidentinctur.* A preparation made by digesting 1 part of cantharides in 10 of acetic ether [Fr. Cod.]; in various old formularies it was from four to eight times as strong. Used as an epispastic. [B, 113, 119.] Cf. LIQUOR *epispasticus.*—**Tinctura cantharidum camphorata.** Fr., *teinture de cantharides camphrée.* An old preparation made by dissolving camphor in tincture of cantharides. [B, 119.]—**Tinctura cantharidum composita.** Fr., *teinture de cantharides composée.* Ger., *zusammengesetzte Cantharidentinctur.* Compound tincture of cantharides; made with 10 parts of cantharides, 1 part of capsicum, and 120 parts of brandy [U. S. Ph., 1820]; or 8 parts of cantharides, 576 parts of alcohol, 1 part of ambergris, and 48 parts of tincture of cinnamon [Sp. Ph., 1798]. [B, 119.]—**Unguentum cantharidis** [Br. Ph.], **Unguentum cantharidum** [Ger. Ph.]. Fr., *pommade épispastique* [Fr. Cod.]. Ger., *Cantharidensalbe*, *Spanisch-Fliegen-Salbe.* Sp., *unguento de cantáridas.* An ointment made by mixing 1 oz. of yellow wax with a strained infusion of 1 oz. of cantharides in 6 fl. oz. of olive-oil [Br. Ph.]. The Ger. Ph. orders a similar procedure with 2 parts of cantharides, 8 of olive-oil, and 3 of yellow wax. The Fr. Cod. recognizes two preparations: the *pommade épispastique jaune*, made by mixing a filtered infusion of 4 parts of cantharides in 56 of lard (1 part of turmeric being added) with 30 parts of melted yellow wax, and scenting with 2 parts of oil of lemon; and the *pommade épispastique verte*, made with 1 part of cantharides, 28 parts of poplar ointment, and 4 of wax. Similar preparations were formerly known as *unguentum vesicatorium* (seu *irritans*), made with cantharides and basilicon ointment; and *green epispastic ointment*, made with cantharides, pitch, turpentine, yellow wax, mustard, and black pepper, or with cantharides and basilicon ointment, colored with verdigris. [B, 81, 119; *a*, 14.] Cf. UNGUENTUM *acre.*—**Vinegar of cantharides.** See *Acetum cantharidis.*

CANTHAROPHAGA (Lat.), n. n. pl. Ka^{2}n(ka^{3}n)-tha^{2}r(tha^{3}r)-o^{2}f′a^{2}(a^{3})-ga^{3}. From κανθαρίς, a beetle, and φαγεῖν, to eat. Ger., *insectenfressende Beutelthiere.* An order of the *Marsupialia.* [L, 173.]

CANTHARSÄURE (Ger.), n. Ka^{3}n′ta^{3}r-zoir-e^{2}. Cantharic acid. [B, 270.]

CANTHARULUS (Lat.), n. m. Ka^{2}n(ka^{3}n)-tha^{2}r(tha^{3}r)′u^{2}(u^{4})-lu^{3}s(lu^{4}s). See CANTHARELLUS.

CANTHARUS (Lat.), n. m. Ka^{2}n(ka^{3}n)′tha^{2}r(tha^{3}r)-u^{3}s(u^{4}s). Gr., κάνθαρος. 1. A beetle. 2. A cup or other like vessel. [A, 387.]—**Canthari figulini.** Earthen cucurbits. [L, 84, 97.]

CANTHECTOMY, n. Ka^{2}nth-e^{2}k′to-mi^{2}. From κανθός (see CANTHUS), and ἐκτομή, a clipping. Fr., *canthectomie.* See CANTHOTOMY.

CANTHERIUM (Lat.), n. n. Ka^{2}n(ka^{3}n)-the(the^{2})′ri^{2}-u^{3}m(u^{4}m). The *Hordeum hexastichum.* [B, 121.]

CANTHERIUS (Lat.), n. m. Ka^{2}n(ka^{3}n)-the(the^{2})′ri^{2}-u^{3}s(u^{4}s). See CANTERIUM.

CANTHITIS (Lat.), n. f. Ka^{2}nth(ka^{3}nth)-i(e)′ti^{2}s. Gen., *canthit′idis.* Fr., *canthite.* Ger., *Augenwinkelentzündung.* Inflammation of the angle of the eyelids. [A, 301, 322; L, 107.]

CANTHIUM (Lat.), n. n. Ka^{2}n(ka^{3}n)′thi^{2}-u^{3}m(u^{4}m). Fr., *canti.* Of Lamarck, the genus *Plectronia.* [B, 121.]—**C. coronatum** [Lamarck]. The *Gardenia dumetorum.* [B, 173.]—**C. parviflorum** [Lamarck]. The *Webera tetrandra.* [B, 172, 173.]

CANTHOLYSIS (Lat.), n. f. Ka^{2}n(ka^{3}n)-tho^{2}l′i^{2}s(u^{6}s)-i^{2}s. Gen., *cantholys′eos* (*thol′ysis*). From κανθός (see CANTHUS), and λύειν, to loosen. The operation of canthotomy combined with division of the external canthal ligament. [F.]

CANTHOPLASTIC, adj. Ka^{2}n-tho-pla^{2}st′i^{2}k. Fr., *canthoplastique.* Ger., *canthoplastisch.* Pertaining to canthoplasty.

CANTHOPLASTY, n. Ka^{2}n′tho-pla^{2}st-i^{2}. Lat., *canthoplastice* (from κανθός [see CANTHUS], and πλάσσειν, to form). Fr., *canthoplastie.* Ger., *Canthoplastik.* Any plastic operation in the vicinity of the canthus of the eye (almost always the outer canthus); strictly, the reconstruction or re-establishment of the canthus by a plastic operation that lengthens the palpebral fissure. Von Ammon simply divided the canthus, leaving a rhomboid wound to heal by

granulation. Pagenstecher's method consists of a combination of canthotomy and the use of Gaillard's ligature ; the tissues are lifted with a forceps so as to form a fold parallel with the margin of the lid, through the base of which the ligatures are passed. [" Ztschr. f. Ophth.," i, 2, p. 533 (F) ; Pagenstecher (F).]

CANTHORRHAPHY, n. Ka^{2}n-tho^{2}r'a^{2}f-i^2. Lat., *canthorrhaphe, canthorrhaphia* (from κανθός [see CANTHUS], and ῥαφή, a seam). Fr., *canthorrhaphie.* Ger., *Canthorrhaphie.* Suture of the canthus to restore the normal condition of the interpalpebral aperture. [F.]

CANTHOTOMY, n. Ka^{2}n-tho^{2}t'o-mi^2. From κανθός (see CANTHUS), and τέμνειν, to cut. Fr., *canthotomie.* Ger., *Canthotomie, Augenwinkelschnitt.* The operation of simply dividing the canthus (usually the external), without division of the tarsal ligament or any plastic operation. [F.]

CANTHROPE (Fr.), n. Ka^{3}n-trop. See CANTHUS.

CANTHUM (Lat.), n. n. Ka^{2}n(ka^{3}n)'thu^{3}m(thu^{4}m). See CANTUM.

CANTHUS (Lat.), n. m. Ka^{2}n(ka^{3}n)'thu^{3}s(thu^{4}s). Gr., κανθός. Fr., *angle oculaire, coin de l'œil.* Ger., *Augenwinkel.* It., *coda dell'occhio.* Sp., *canto, ángulo del ojo.* The palpebral commissure, the angle formed by the junction of the upper and lower lids. [A, 301 ; F.]—**Anterior c.** In birds, the inner c. [L, 221.]—**C. externus.** See *Outer c.*—**C. internus, C. major.** See *Inner c.*—**C. minor.** See *Outer c.*—**C. nasalis.** See *Inner c.*—**C. temporalis, External c.** See *Outer c.*—**Greater c.** Fr., *grand c.* See *Inner c.*—**Inner c., Internal c.** Lat., *c. internus.* Fr., *grand c.* Ger., *innerer Augenwinkel.* The inner commissure of the lids. [F.]—**Lesser c.** Fr., *petit c.* See *Outer c.*—**Nasal c.** See *Inner c.*—**Outer c.** Fr., *petit c.* Ger., *äusserer Augenwinkel.* The outer commissure of the lids. [F.]—**Posterior c.** In birds, the outer c. [L, 221.]—**Temporal c.** See *Outer c.*

CANTIANUS (Lat.), adj. Ka^{2}nt(ka^{3}nt)-i^2-a(a^3)'nu^{3}s(nu^{4}s). From the name *Kent.* See *Lady Kent's* POWDER.

CANTILAGUA (Sp.), n. Ka^{3}n-ti^{2}l-a^{3}g'wa^3. The *Linum catharticum.* [B, 121.]

CANTINE (Fr.), n. Ka^{3}n-ten. See *Sac d'*AMBULANCE.

CANTINOSA (Sp.), n. Ka^{3}n-ti^{2}n-o'sa^3. The *Lavandula stœchas.* [B, 121.]

CANTION (Lat.), n. n. Ka^{2}n(ka^{3}n)'ti^2-o^{2}n. See CANTUM.

CANTIUM, n. Ka^{2}n'ti^2-u^{3}m. See CANTUM.

CANTO (It.), n. Ka^{3}n'to. A plant of Guinea, a decoction of which is used in gonorrhœa. [L, 105.]

CANTONG, n. A plant of the Philippines, resembling the *Soldanella.* A variety of it is said to be laxative, to be used for dropsy, and to be edible when young ; another is employed as a remedy for wounds, burns, and scrofula. [B, 88, 121 ; L, 105.]

CANTORBALSAM (Ger.), n. Ka^{3}n'tor-ba^{3}l-za^{3}m. See UNGUENTUM *ophthalmicum rubrum.*

CANTORES (Lat.), n. m. pl. Ka^{2}n(ka^{3}n)-to'rez(re^{2}s). Pl. of *cantor,* a singer. Fr., *chanteurs.* See PASSERES.

CANTSANU, n. In India, the *Bauhinia tomentosa.* [B, 121.]

CANTUA (Lat.), n. f. Ka^{2}n(ka^{3}n)'tu^2(tu^4)-a^3. Of Jussieu, a genus of polemoniaceous plants, comprising several South American species. Certain North American species that have been included under it are referred by Gray to *Collomia* and *Gilia.* [B, 42, 121, 215.]—**C. coccinea** [Poiret], **C. hoitzia** [Willdenow]. Syn. : *Hoitzia coccinea* [Cavanilles] (seu *mexicana* [Lamarck]). A Mexican species, used as a topical application for fluxions of the face. [B, 121, 173.]—**C. pinnatifida** [Lamarck], **C. thyrsoidea** [Jussieu]. The *Gilia coronopifolia.* [B, 215.]

CANTUELLO (It.), **CANTUESO** (Sp.), **CANTUESSO** (It.), n's. Ka^{2}n-tu-e^{2}l'lo, -a'zo, -e^{2}s'so. The *Lavandula stœchas.* [A, 447 ; B, 121.]

CANTUM (Lat.), n. n. Ka^{2}n(ka^{3}n)'tu^{3}m(tu^{4}m). Med. Gr., καντόν, καντίον. An old name for crystallized sugar. [A, 325 ; L, 94.]

CANTURINON (Lat.), **CANTYRION** (Lat.), n's n. Ka^{2}n-(ka^{3}n)-tu^2(tu)'ri^{2}n-o^{2}n, -ti^{2}r(tu^{6}r)'i^2-o^{2}n. Of Dioscorides, a plant supposed to have been a species of *Ballota.* [B, 121 ; L, 105.]

CANULA (Lat.), n. f. Ka^{2}n(ka^{3}n)'u^2(u^4)-la^3. See CANNULA.

CANULE (Fr.), n. Ka^{3}n-u^{6}l. See CANNULA.—**C. à chemise.** A metallic catheter incased in a linen sleeve to be stuffed with lint for the purpose of making pressure and preventing hæmorrhage from the urethra. [E.]

CANUS (Lat.), adj. Ka(ka^3)'nu^{3}s(nu^{4}s). White, gray, hoary ; in botany, white with appressed hairs. [B, 121.]

CANUTILLO (Sp.), n. Ka^{3}n-u-tel'yo. A shrub of the genus *Ephedra* (probably *Ephedra antisyphilitica* or *Ephedra trifurcata*), growing in Texas, where it is much used in gonorrhœa, leucorrhœa, and kidney diseases, also as a styptic and vulnerary. [" New Comm. Plants and Drugs," 1886, No. 9, p. 31 (B).]

CANUTUM (Lat.), n. n. Ka^{2}n(ka^{3}n)-u^2(u)'tu^{3}m(tu^{4}m). See CANNUTUM.

CANVUM, n. An old name for the *Cannabis sativa.* [B, 121.]

CAN-XU, n. In Cochin-China, the orange-tree. [B, 121.]

CAOBA (Sp.), **CAOBO** (Sp.), n's. Ka^3-ob'a^3, -o. In Carthagena, the *Anacardium ;* of the Mex. Ph., the *Swietenia mahogoni.* [A, 447 ; B, 121.]

CAOCIA, n. A West Indian seed of unknown botanical origin, perhaps from a species of *Euphorbium,* used as a remedy for snake-bites. [B, 121.]

CAO-KEN (Chin.), n. The cardamom. [L, 49.]

CAOL, n. In Ceylon, a sort of gruel made of the young shoots of a species of *Borassus.* [A, 385.]

CAO-LEAMKIAM, CAO-LUONG-KUONG, n's. In China and Cochin-China, the genus *Galanga.* [B, 121.]

CAOPIA [Piso], **CAOPOIBA**, n's. See VISMIA.

CAOU, n. In Gascony, the cabbage. [B, 121.]

CAOUA (Ar.), n. Infusion of coffee. [B, 121.]

CAOUANIDÆ (Lat.), n. f. pl. Ka^3-u-a^{3}n'i^{2}d-e(a^3-e^2). A family of the *Oiacopodes.* [L, 256.]

CAOUANINA (Lat.), n. n. pl. Ka^3-u-a^{3}n-i(e)'na^3. A tribe of the *Caouanidæ.* [L, 256.]

CAOULE, CAOULET, n's. See CAOU.

CAOULICAOU, n. In Languedoc, the *Cucubalus behen.* [B, 121.]

CAOURET, n. See CAOU.

CAOUROUBALI, (Carib), n. The *Hymenœa courbaril.* [B, 121.]

CAOUSSIDA, CAOUSSIDOS, n's. In Provence and Languedoc, the genus *Cirsium.* [B, 121.]

CAOUTCHENE, n. Ka^3-ut'chen. Fr., *caoutchène.* According to Bouchardat, one of the constituents of caoutchoucin ; an oily liquid of the sp. gr. of 0·65, boiling at 14·5° C., probably isomeric with tetrylene (butylene), C_4H_8. [B, 2.]

CAOUTCHIN, n. Ka^3-ut'chi^{2}n. Fr., *caoutchine.* According to Himly, one of the constituents of caoutchoucin ; a transparent, colorless, oily liquid, $C_{10}H_{16}$, of the sp. gr. of 0·842 at 0° C., boiling at 175·5° C., of an odor like that of orange-oil and an aromatic taste. [B, 2.]

CAOUTCHOUC, n. Ka^3-ut'chuk. Said to be from the South American words *cate,* a tree, and *chu,* juice. Lat., *resina elastica* (seu *cayennensis*), *gummi elasticum.* Fr., *c.* [Fr. Cod.], *gomme élastique.* Ger., *Kautschuk, elastisches Gummi, Ledergummi, Federharz.* It., *cautchuc.* Sp., *goma elástica.* India-rubber, rubber, gum elastic, gum ; a substance obtained by drying the milky juice of various plants, particularly, according to the Fr. Cod., of the *Castilloa elastica* and other artocarpaceous trees, the *Hevea guayanensis* (*Siphonia elastica*), *Hevea lutea, Hevea* (*Siphonia*) *brasiliensis,* and *Hevea spruceana,* and of several species of *Apocynaceæ,* especially of the genera *Hancornia* and *Vahea.* Other trees furnishing c. are the *Ficus elastica* (*Urostigma elasticum*), *Ficus indica, Ficus religiosa, Urostigma Vogelii, Landolphia gummifera, Landolphia florida, Urceola elastica, Urceola esculenta, Willoughbeia edulis,* and various plants of the *Apocynaceæ, Asclepiadaceæ, Urticaceæ,* and *Euphorbiaceæ.* It forms variously shaped, tough, highly elastic, amorphous, somewhat porous masses, black or dark-brown externally and white or brownish within, of a sp. gr. varying from 0·92 to 0·96 ; insoluble in water, softened by treatment with hot alcohol ; partially soluble in ether, in chloroform, in benzene, in oil of turpentine, and in carbon disulphide, the undissolved portion forming a soft, jelly-like mass, while that in solution is highly adhesive and ductile. The best solvents are chloroform, carbon disulphide, and caoutchoucin. C. melts at 125° C., and is readily inflammable, burning with a smoky flame. Chemically, it is a hydrocarbon, or a mixture of hydrocarbons, of the empirical formula $C_{20}H_{32}$. It is used in surgery and in the arts wherever elasticity or protection from air or liquids is desired, as in elastic stockings, elastic bandages, protective coverings, etc. Combined with sulphur and other ingredients, it is used for making tubing and innumerable other articles. [A, 301 ; B, 2, 81, 95, 113.] See *Vulcanized c.* and *Hard* RUBBER.—**Bornean c., Borneo c.** C. obtained from Borneo, from different species of *Urceola.* [B, 81, 275.]—**C. des Papayanais** (Fr.). A variety derived from the *Lobelia* (*Siphocampylus*) *caoutchouk.* [B, 93.]—**C. dur** (Fr.), **C. durci** (Fr.). See *Hard* RUBBER.—**C. minéral** (Fr.). See ELATERITE.—**C. soufré** (Fr.), **C. volcanisé** (Fr.), **C. vulcanisé** (Fr.). See *Vulcanized c.* and *Hard* RUBBER.—**Ceara c.** C. obtained from the *Manihot Glaziovii.* [B, 81.]—**Chittagong c.** C. derived from the *Willoughbeia edulis* and allied apocynaceous plants. [B, 81.]—**East Indian c.** C. derived from the *Ficus elastica.* [B, 275.]—**Empyreumatic oil of c.** See CAOUTCHOUCIN.—**Hardened c.** See *Hard* RUBBER.—**Indian c.-tree.** The *Ficus indica.* [B, 172.]—**Madras c.** C. derived from the *Euphorbia catimandoo.* [B, 275.]—**Mangabeira c.** C. derived from the *Hancornia speciosa.* [B, 81.]—**Mexican c.** See *Mexican* CHICLE.—**Mineral c.** See ELATERITE.—**Oil of c.** See CAOUTCHOUCIN.—**Panama c.** C. derived from the *Castilloa elastica* and the *Castilloa markhamiana.* [B, 275.]—**Para c.** One of the best varieties, derived from the *Siphonia elastica* (*Hevea guianensis*), a tree indigenous to Guiana and northern Brazil. [B, 81.]—**Penang c.** See *Borneo c.*—**Sulphured c., Vulcanized c.** Fr., *c. vulcanisé* (ou *soufré*). Ger., *vulkanisirtes Kautschuk.* Vulcanized rubber ; c. mixed intimately with sulphur and heated. It is not affected by the ordinary solvents of c., and does not, like the latter, lose its elasticity at low temperatures. When of good quality, it preserves its properties for a long time, but the poorer qualities soon become worthless. It is injured by contact with oil, but it is said that the injury may be repaired by washing with ammonia-water. It is largely used in the manufacture of most articles for which c. is suitable. By long-continued vulcanization at a high temperature, it is converted into hard rubber (*q. v.*). [B, 2, 81.]

CAOUTCHOUCIN, n. Ka^3-ut'chu-si^{2}n. Oil (or empyreumatic oil) of caoutchouc ; produced by the distillation of caoutchouc. According to Bouchardat, it consists of a very volatile oil, probably of the constitution of butylene, and of caoutchene and heveene ; according to Himly, of faradayin, caoutchin, and a mixture of oils boiling at 96° C. Williams found in it also isoprene, a polymer of caoutchin. According to others, it is a mixture of hydrocarbons of the formula C_8H_8, or polymers of this formula. It is a good solvent for caoutchouc and resins. [B, 2, 81.]

CAOUTCHOUK, CAUTSCHOUC, n's. See CAOUTCHOUC.

CAOVA, n. An old name for coffee. [B, 121.]

CAP, n. Ka^{2}p. A.-S., *cappe.* 1. In botany, the pileus of the *Basidiomycetes*, also the calyptra of mosses. [B, 19, 275, 279.] 2. Of a lymph follicle (Ger., *Kuppe eines Follikels*), the bluntly conical end of the follicle, which projects toward or into the lumen of the part in which it is situated, or the epithelial and adenoid tissue covering the conical end. [J, 21, 35.] 3. Of the cerebral peduncle, see TEGMENTUM.—**Friar's c., Soldier's c.** The *Aconitum napellus.* [B, 275; L, 73.]

CAP (Fr.), n. Ka^{3}p. In the north of France, an excrescence on birch-trees. [B, 38, 121.]—**C. de Broca, C. de la troisième circonvolution frontale** [Broca]. The præoperculum (*q. v.*). ["Rev. d'anthropol.," 2d ser., i, 20 (I).]

CAPACITAS (Lat.), n. f. Ka^{2}p(ka^{3}p)-a^{2}s(a^{3}k)'i^{2}t-a^{2}s(a^{3}s). Gen., *capacita'tis.* See CAPACITY.

CAPACITÄT (Ger.), n. Ka^{3}p-a^{3}t-set-at'. See CAPACITY.—**Vitale C.** See BREATHING *capacity.*

CAPACITÉ (Fr.), n. Ka^{3}p-a^{3}s-e-ta. See CAPACITY.—**C. absolue des poumons.** The entire capacity of the lungs, represented by the sum of the breathing capacity (3,500 c. c.) and the residual air (1,800 c. c.). [J, 28.]—**C. des aliénés.** The legally recognized capability of insane persons to dispose of property, etc., during lucid intervals. [A, 385.]—**C. de saturation.** See CAPACITY *of saturation.*—**C. globulaire.** See *Blood-corpuscle* CAPACITY.—**C. inspiratrice extrême.** See BREATHING *capacity.* —**C. inspiratrice ordinaire.** See *Tidal* AIR.—**C. pulmonaire.** See *Stationary* AIR.—**C. respiratoire, C. vitale.** See BREATHING *capacity.*

CAPACITY, n. Ka^{2}p-a^{2}s'i^{2}t-i^2. Gr., χώρησις. Lat., *capacitas.* Fr., *capacité.* Ger., *Capacität, Annehmungsvermögen, Aufnehmungsvermögen, Fasskraft.* It., *capacità.* Sp., *capacidad.* Capability, either functional or that of containing or combining with or absorbing another body. [A, 301.]—**Blood-corpuscle c.** Fr., *capacité globulaire* [Malassez]. A condition expressed by the quotient obtained by dividing the entire number of red blood-corpuscles in an animal by the number of grammes that the animal weighs. ["Jour. of Anat. and Physiol.," 1877 (J).]—**Breathing c.** See under BREATHING.—**Calorific c.** See *Specific* HEAT.—**C. of saturation.** Fr., *capacité de saturation.* Of a base, the degree of its capability of combining with an acid to form a neutral salt. [A, 301, 385.]—**Combining c.** See ATOMICITY.—**Electrical c.** The amount of electricity which a body can acquire when placed in contact with another body which charges it to a certain electric potential. [α, 17.]—**Extreme breathing c., Extreme differential c., Lung c., Pulmonary c., Pulmonic c., Respiratory c.** Fr., *capacité respiratoire.* Ger., *Athmungscapacität des Blutes.* The c. of the blood for absorbing oxygen in the respiratory organs and supplying it to the tissues, depending directly on the amount of hæmoglobin present. The expression should also denote the c. of the blood for removing carbon dioxide from the tissues. ["N. Y. Med. Jour.," xlviii (J); "Arch. de physiol. norm. et path.," 1888, 2 (J).] Cf. BREATHING *c.*—**Specific inductive capacity.** Inductive power; the degree of capability of transmitting electrical induction, air being taken as the standard. [α, 17.]—**Testamentary c.** The degree of soundness of mind requisite for making a valid will.—**Thermal c.** Ger., *Wärmecapacität.* See *Specific* HEAT.—**Thoracic c., Vital c.** See BREATHING *c.*

CAPAIBA, n. See COPAIBA.

CAPA-ISIAKKA, n. See CAPA-TSJACCA.

CAPAIVA, n. See COPAIBA.

CAPALAGA (Malay), n. The cardamom. [B, 88, 125.]

CAPALOE (Ger.), n. Ka^{3}p'a^{3}l-o-e^2. Cape aloes. [B, 81.]

CAPA-MOLAGA (Malay), n. The *Capsicum frutescens.* [B, 172.]

CAPARAS (Sp.), n. Ka^{3}p'a^{3}r-a^{3}s. The *Delphinium staphisagria.* [B, 88, 121.]

CAPARROSA (Sp.), n. Ka^{3}p-a^{3}r-ro'sa^3. Vitriol. [A, 447.]—**C. azul.** Copper sulphate. [A, 447.]—**C. blanca.** Zinc sulphate. [A, 447.]—**C. verde.** Iron sulphate. [A, 447.]

CAPAS (Malay), n. The *Gossypium indicum.* [B, 121.]—**C.-antu.** Literally, devil's cotton; a shrub, supposed to be a species of *Ketinia*, the root of which is used for the itch. Rumphius calls it the *Gossypium dæmonis.* [B, 88, 121.]

CAPA-TSJACCA, n. In Malabar, the *Ananassa.* [B, 121.]

CAPAUNENSCHMALZ (Ger.), n. Ka^{3}p-a^3'un-e^{2}n-shma^{3}ltz. Capon's fat. [B, 88.]

CAPAVELLA, n. The *Cleome pentaphylla.* [B, 121.]

CAPBERN (Fr.), n. Ka^{3}p-be^{2}rn^2. See CAPVERN.

CAP-BRETON (Fr.), n. Ka^{3}p-bre^2-to^{2}n^2. A sea-bathing station in the department of the Landes, France. [L, 87.]

CAP DE COBRA (Port.), n. Ka^{3}p-da-ko'bra^3. The *Croton acutum.* [B, 121.]

CAPEL-À-TEIGNEUX (Fr.), n. Ka^{3}p-e^{2}l-a^3-te^{2}n-yu^5. The *Galium aparine.* [B, 173.]

CAPELAN (Fr.), n. Ka^{3}p-e^{2}l-a^{3}n^2. 1. A silk-worm which dies before having completed or shed its cocoon. 2. A popular name in central France for the glow-worm. 3. The *Agaricus colubrinus.* [B, 121; L, 41.]

CAPELET (Fr.), n. Ka^{3}p-e^{2}l-a. Ger., *Stollbeule* (1st def.). It., *capelletto.* Sp., *esparaván.* 1. See SPAVIN. 2. The *Myrtus caryophyllata.* [B, 88.] 3. A Languedoc name for the *Paliurus australis*; in the pl., *c's*, its fruit. [B, 121, 173.]

CAPELINA (Lat.), n. f. Ka^{2}p(ka^{3}p)-e^{2}l-i(e)'na^3. See *Capeline* BANDAGE.

CAPELINE, adj. Ka^{2}p'e^{2}l-en. From *caput*, the head. See *C.* BANDAGE.

CAPELINE (Fr.), n. Ka^{3}p-e^{2}l-en. A recurrent, cap-like bandage, especially one for the head. [A, 301.] See *C.* BANDAGE.—**C. de la clavicule.** An old form of bandage used for fractures of the acromion, the spine of the scapula, and the clavicle. [A, 301.]—**C. de la tête, C. d'Hippocrate.** See *C.* BANDAGE.—**C. des amputations, C. des membres amputés, C. des moignons.** A recurrent bandage for a stump after amputation. [A, 301; α, 18.]

CAPELLA (Lat.), n. f. Ka^{2}p(ka^{3}p)-e^{2}l'la^3. See CUPEL and ALEMBIC.

CAPELLACI, n. The *Nymphæa lotus.* [B, 88, 121.]

CAPELLAN (Fr.), n. Ka^{3}p-e^{2}l-a^{3}n^2. See CAPELAN.

CAPELLINA (Lat.), n. f. Ka^{2}p(ka^{3}p)-e^{2}l-li(le)'na^3. See *Capeline* BANDAGE.

CAPER, n. Ka'pu^{5}r. Probably from *capparis* (*q. v.*). Fr., *câpre.* Ger., *Kaper.* It., *cappero.* Sp., Port., *alcaparra.* The *Capparis spinosa* and related species of *Capparis*; also the flower-buds, used as a condiment. [B, 19, 75; α, 14.]—**Bean c.** The *Zygophyllum fabago*; in the pl., the *Zygophyllaceæ.* [B, 34.]—**C.-bush.** The *Capparis spinosa*; also the *Euphorbia lathyris.* [B, 79, 275.]—**C. family.** The *Capparidaceæ.* [B.]—**C.-plant.** See *C.-bush.*—**C.-spurge.** The *Euphorbia lathyris.* [B, 19.]—**C.-tree.** 1. The *Capparis.* 2. The *Busbeckia arborea.* [B, 19.]—**False c., Wild c.-bush.** See *C.-spurge.*

CAPER (Lat.), n. m. Ka(ka^3)'pu^{5}r(pe^{2}r). 1. A goat. 2. The goat-like odor of the armpits; bromidrosis. [G, 49.] Cf. HIRCUS, GRASUS, and CINABRA.

CAPERON (Fr.), n. Ka^{3}p-e^{2}r-o^{2}n^2. The fruit of *Fragaria moschata.* [A, 385.]

CAPERONIEÆ (Lat.), n. f. pl. Ka^{2}p(ka^{3}p)-e^{2}r-o^{2}n-i(i^2)'e^2-e(a^3-e^2). A sub-tribe of the *Acalypheæ.* [B, 121, 214.]

CAPERONNIER (Fr.), n. Ka^{3}p-e^{2}r-on-i^2-a. The *Fragaria moschata.* [A, 385.]

CAPETUS (Lat.), n. f. Ka^{2}p(ka^{3}p)'e^{2}t-u^{3}s(u^{4}s). Gr., κάπετος. A pit, a small fossa. [A, 325.]

CAPE-WEED, n. Kap'-wed. The *Roccella tinctoria.* [B, 19.]—**Australian c.-w.** The *Hypochœris radicata* and the *Cryptostemma calendulacea.* [B, 275.]—**New Zealand c.-w.** The *Hypochœris radicata.* [B, 275.]

CAPEY (Malay), n. The *Ophioglossum flexuosum.* [B, 121.]

CAPHOPICRIN, CAPHOPICRITE, n's. Ka^{2}f-o-pi^{2}k'ri^{2}n, -rit. Fr., *caphopicrine, caphopicrite.* A substance found in rhubarb; a brown, opaque, bitter acid, having the odor of rhubarb; slightly soluble in cold water, very soluble in alcohol, in acetic acid, and in alkalies; according to Caventou, a mixture of rhabarbarin and a peculiar yellow matter. [B, 121, 173; L, 105.]

CAPHORA (Lat.), n. f. Ka^{2}f(ka^{3}f)-o'ra^3. See CAMPHOR.

CAPHUR (Ar.), n. See CAMPHOR.

CAPHURA (Lat.), n. f. Ka^{2}f(ka^{3}f)-u'ra^3. Gr., καφουρά. See CAMPHOR.

CAPHYRIDÆ (Lat.), n. f. pl. Ka^{2}f(ka^{3}f)-i^{2}r(u^{6}r)'-i^{2}d-e(a^3-e^2). A family of the *Brachyura.* [L, 240.]

CAPIA, n. A name given to several Brazilian plants, particularly to one which seems to be the *Philesia buxifolia.* [B, 88, 121.]

CAPIAT, n. Kap(ka^{3}p)'-i^2-a^{2}t(a^{3}t). Lit., let it take, or it may take (3d pers. pres. subj. of *capere*, to take). An instrument for removing placental remnants, etc., from the uterus. It consists of a number of concentric elliptical springs included in a cannula, which, after the instrument is introduced, are protruded

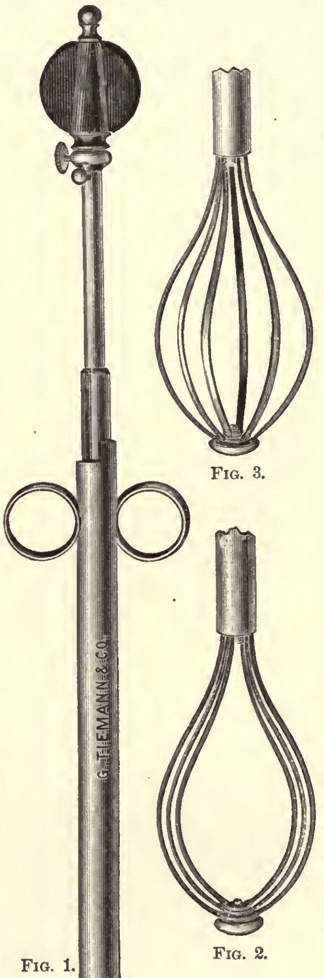


FIG. 1. FIG. 2. FIG. 3.

THE CAPIAT. (AFTER POYNOR.)

Fig. 1, the instrument closed for introduction. Fig. 2, the springs protruded. Fig. 3, the springs distributed by rotation of the handle, forming a basket.

and made to grasp the foreign body in a sort of basket formed by them on rotation of the handle. [J. S. Poynor, "N. Y. Med. Jour.," Nov. 24, 1888, p. 586.]

CAPIBARA, n. In Brazil, the *Cavia capybara.* [L, 105.]

CAPI-CATINGA, n. In Brazil, a plant, perhaps the *Acorus calamus.* [B, 121.]

CAPIC-COTTAY (Tamil), n. The *Coffea arabica.* [B, 88.]

CAPILACTEUM (Lat.), n. n. Ka^{2}p(ka^{3}p)-i^2-la^{2}k(la^{3}k)'te^2-u^{3}m-(u^{4}m). See APHROGALA.

CAPILI-PODI, n. In India, a powder made from the fruit of *Rottlera tinctoria* (*Echinus philippinensis*). [B, 121.]

CAPILLACEOUS, adj. Ka^{2}p-i^{2}l-a'shu^{3}s. Lat., *capillaceus* (from *capillus*, a hair). Fr., *capillacé.* Having long filaments ; as a species-name, hair-like, capillary. [B, 121.]

CAPILLAIRE (Fr.), adj. Ka^{3}p-i^2-la^{2}r. Capillary ; as a n., a capillary, also a name for several plants, especially the ferns with divided frond. [B, 121.]—**C. blanc.** 1. See CAPILLICULE (1st def.). 2. The *Aspidium rhæticum* and the *Asplenium ruta muraria.* [B, 88, 121.] Cf. POLYPODIUM *alpestre.*—**C. commun.** The *Adiantum capillus Veneris.* [B, 121.]—**C. de Canada.** See *C. du Canada.*—**C's de la première variété.** The finer capillaries, from 0·007 to 0·030 mm. in diameter. [A, 385.]—**C's de la seconde variété.** Capillaries from 0·030 to 0·070 mm. in diameter. [A, 385.]—**C's de la troisième variété.** The larger capillaries, from 0·060 to 0·140 mm. in diameter. [A, 385.]—**C. de Montpellier** [Fr. Cod.]. Maiden-hair, the *Adiantum capillus Veneris.* [B, 113, 173.]—**C. d'Éthiopie.** The *Adiantum æthiopicum.* [B, 121.]—**C. de transition.** Blood-vessels intermediate in size between the capillaries and the arteries and veins. [L, 41.]—**C. doré.** The *Polytrichum commune.* [B, 121, 173.]—**C. du Canada** [Fr. Cod.]. The *Adiantum pedatum.* [B, 19, 113, 121.]—**C. du Mexique.** The *Adiantum tenerum.* [B, 121.]—**C. noir.** The *Asplenium adiantum nigrum.* [B, 121, 173.]—**C. rouge.** The *Asplenium trichomanes.* [B, 88, 173.]—**C's sanguins.** Capillary blood-vessels. [L, 49.]—**C. sauve-vie.** See *C. blanc.*—**C. vrai.** The *Adiantum capillus Veneris.* [B, 121, 173.]—**C's vrais.** The true capillaries, the walls of which consist of but a single layer of endothelial cells. [L, 49.]—**Hydrolé de c., Infusion de c.** See *Infusum* CAPILLI *Veneris.* [B, 119.]—**Sirop de c.** [Fr. Cod.]. See *Syrupus* CAPILLORUM *Veneris.*—**Sirop de c. du Canada** [Fr. Cod.]. See *Syrupus* ADIANTI *canadensis.*—**Tisane de c. du Canada** [Fr. Cod.]. An infusion of 1 part of the herb of *Adiantum pedatum* in 100 parts of boiling distilled water. [B, 113.]—**Vrai c.** See *C. vrai.*

CAPILLAMENTUM (Lat.), n. n. Ka^{2}p(ka^{3}p)-i^{2}l-la^3-me^{2}nt'-u^{3}m(u^{4}m). From *capillari*, to put forth hair. Fr., *capillament.* A slender and elongated hair-like fibril (*e. g.*, the filament of a stamen). [B, 38, 121.]

CAPILLAR (Ger.), adj. Ka^{3}p-i^{2}l-la^{3}r'. See CAPILLARY.—**C'adventitie.** See PERITHELIUM.—**C'gefäss.** See CAPILLARY.—**C'gefässkerne.** The nuclei of the endothelium of the capillaries. [J, 67.]—**C'kreislauf.** See *Capillary* CIRCULATION.—**C'netz.** A capillary network. [L, 31, 115.]—**C'puls.** See *Capillary* PULSE.—**C'scheide.** See PERITHELIUM.

CAPILLARIMETER, n. Ka^{2}p-i^{2}l-a^{2}r-i^{2}m'e^{2}t-u^{5}r. From *capillus*, a hair, and μέτρον, a measure. Fr., *capillarimètre.* An instrument for measuring the diameter of capillary tubes. [A, 301, 385.]

CAPILLARIS (Lat.), adj. Ka^{2}p(ka^{3}p)-i^{2}l-la(la^3)'ri^{2}s. See CAPILLARY.

CAPILLARITY, n. Ka^{2}p-i^{2}l-a^{2}r'i^{2}t-i^2. Lat., *capillaritas.* Fr., *capillarité.* Ger., *Capillarität, Haarröhrchenanziehung.* 1. The condition of being capillary. 2. Capillary attraction. [B ; L, 180.]—**Coefficient of c., Constant of c.** A number indicating the amount of capillary force exerted upon the unit of area of a solid or liquid ; in the case of liquids it is the weight of the column of a liquid raised by capillary attraction in a tube of given calibre ; in the case of solids their surface tenacity, *i. e.*, the weight which, applied to a unit of area of surface, will change its shape. [B, 2.]—**Modulus of c.** A number representing the change in the height of a capillary column consisting of a solution of a metallic salt, when either the basic or the acid radicle of the salt is replaced by another radicle. This modulus is constant for any given radicle. Thus, for a tube 5 mm. in diameter and at 15° C., the modulus of c. of sodium as compared with ammonium is 1·2 mm., *i. e.*, a column consisting of a solution of ammonium chloride, carbonate, or nitrate, on being converted into a solution of sodium chloride, carbonate, or nitrate, will show an alteration in height of 1·2 mm. [B, 2.]

CAPILLÄRKRAUT (Ger.), n. Ka^{3}p-i^{2}l-lar'kra^3-ut. The *Adiantum capillus Veneris.* [B, 270.]

CAPILLÄRSAFT (Ger.), n. Ka^{3}p-i^{2}l-lar'za^{3}ft. See *Syrupus* AURANTII *florum.*

CAPILLARY, adj. and n. Ka^{2}p'i^{2}l-a-ri^2. Gr., τριχώδης (adj.). Lat., *capillaris* (from *capillus*, a hair). Fr., *capillaire.* Ger., *capillar* (adj.), *haarfein* (adj.), *haardünn* (adj.), *Haargefäss* (n.). Sp., *capilar.* 1 (adj.). Pertaining to the hair or to very thin hair-like filaments. [B.] 2 (adj.). Of hair-like fineness. [B.] 3 (n.). A minute vessel, especially a minute blood-vessel of the system connecting the terminations of the arteries with the radicles of the veins, ranging in diameter from 0·007 to 0·140 mm. [A, 385 ; C.]—**Arterial capillaries.** Ger., *arterielle Capillaren, kleinste Arterienreiser.* The capillaries immediately terminating the smallest arteries ; from 30 to 60 μ in diameter. [J, 67.]—**Biliary capillaries.** Fr., *capillaires biliaires.* See *Intralobular* CANALS.—**Chorio-capillaries.** The capillaries of the chorion. [L, 318.]—**Gall-capillaries.** See *Intralobular* CANALS.—**Lymphatic capillaries.** Fr., *capillaires lymphatiques, capillicules.* The radicles of the lymphatic ducts, 0·002 mm. in diameter. [A, 385 ; C.]—**Pulmonary capillaries.** Fr., *capillaires pulmonaires.* The capillaries in the membranous lining of the air-cells of the lungs, between the pulmonary arteries and veins. [C.]—**Radial capillaries of the liver.** Branches of the central vein of an acinus of the liver, radiating toward the periphery of the acinus. [L, 318.]—**Venous capillaries.** Ger., *venöse Capillaren, kleinste Venenwurzeln.* The capillaries immediately preceding and forming the smallest veins ; the venous radicles. [J, 67.]

CAPILLATE, adj. Ka^{2}p'i^{2}l-at. See CAPILLATUS.

CAPILLATIO (Lat.), n. f. Ka^{2}p(ka^{3}p)-i^{2}l-la(la^3)'shi^2(ti^2)-o. Gen., *capillatio'nis.* Fr., *capillation.* 1. Trichismus (*q. v.*). [A, 325.] 2. A covering with hair. [A, 318.] 3. An ancient term for a diseased condition in which hair-like masses were passed with the urine. [Cælius Aurelianus (A, 318).]

CAPILLATURE (Fr.), n. Ka^{3}p-i^{2}l-a^3-tu^{6}r. See CAPILLAMENTUM.

CAPILLATUS (Lat.), adj. Ka^{2}p(ka^{3}p)-i^{2}l-la(la^3)'tu^{3}s(tu^{4}s). Gr., τριχωτός. Covered with hair-like filaments. [B, 121.]

CAPILLICULE (Fr.), n. Ka^{3}p-i^{2}l-i^2-ku^{6}l. 1. Of Sappey, a lymphatic capillary. Such vessels are supposed by Sappey to form minute channels, 1 to 4 μ in diameter, directly connecting the capillary blood-vessels with the lymphatic capillaries. ["Union méd.," 1874, p. 975 (J) ; L, 49.] Cf. CAPILLICULUS. 2. Of Bourgery, a capillary blood-vessel which he believed conveyed serum only, since found to be a partially filled capillary. [L, 49.]

CAPILLICULTURE, n. Ka^{2}p-i^{2}l'i^2-ku^{3}lt-u^{2}r. From *capillus*, a hair, and *cultura*, care. Fr., c. Manipulative or medicinal treatment for the purpose of improving the condition of the hair or promoting its growth. [L, 41.]

CAPILLICULUS (Lat.), n. m. Ka^{2}p(ka^{3}p)-i^{2}l-li^{2}k'u^2(u^4)-lu^{3}s-(lu^{4}s). Dim. of *capillus*, a hair. Fr., *capillicule.* An old term for certain vessels more minute than the capillary blood-vessels, supposed to form the ultimate elements of the organs. [L, 49, 107.] Cf. CAPILLICULE.

CAPILLIFOLIOUS, adj. Ka^{2}p-i^{2}l-i^2-fol'i^2-u^{3}s. Lat., *capillifolius* (from *capillus*, a hair, and *folium*, a leaf). Fr., *capillifolié.* Having hair-like leaves. [L, 41, 107.]

CAPILLIFORM, adj. Ka^{2}p-i^{2}l'i^2-fo^{2}rm. Lat., *capilliformis* (from *capillus*, a hair, and *forma*, form). Fr., *capilliforme.* Ger., *haarförmig.* Shaped like a hair. [B, 121 ; L, 41, 180.]

CAPILLIMENTUM (Lat.), n. n. Ka^{2}p(ka^{3}p)-i^{2}l-li^2-me^{2}nt'u^{3}m-(u^{4}m). From *capillus*, a hair. 1. The hair (collectively). 2. Any villous or hairy covering. [G, 16.]

CAPILLITIUM (Lat.), n. n. Ka^{2}p(ka^{3}p)-i^{2}l-li^2'shi^2(ti^2)-u^{3}m(u^{4}m). From *capillus*, a hair. Fr., *capillitie, chevelure.* 1. The hair of the head (collectively). [G.] 2. That part of the scalp usually covered by hair. [G.] 3 (Ger., *Haargeflecht*). A filamentous tissue consisting of a network of thin capillary tubes, like that in the sporangeia of many *Myxomycetes.* [B, 35, 75.] 4. In certain *Protozoa*, a sustentacular network in the meshes of which the spores are situated. [L, 121.]—**C. distichia.** Distichiasis (*q. v.*). [L, 119.]—**C. intricatum.** See PLICA *polonica.*

CAPILLOSE, adj. Ka^{2}p'i^{2}l-os. Lat., *capillosus.* Hairy. [A, 318 ; L, 56.]

CAPILLUS (Lat.), n. m. Ka^{2}p(ka^{3}p)-i^{2}l'lu^{3}s(lu^{4}s). Said to be contracted from *capitis pilus*, the hair of the head. Gr., θρίξ. Fr., *cheveu.* Ger., *Kopfhaar, Haupthaar.* It., *capello.* Sp., Port., *cabello.* 1. A hair or the hair, especially that of the head. [G, 49.] 2. A root-hair, a fine hair-like fibril on the root of a plant. [B, 123.] 3. A hair's breadth ($\frac{1}{10}$ to $\frac{1}{12}$ of a line). [B, 123.]—**Capilli Veneris herba** [Gr. Ph.]. See *C. Veneris.*—**Capillorum defluvium.** See ALOPECIA.—**C. Veneris** [Austr. Ph., Hung. Ph.]. Fr., *capillaire de Montpellier* [Fr. Cod.]. Ger., *Capillärkraut.* Sp., *culantrillo, culantrillo de pozo* [Sp. Ph.]. The herb or leaves of *Adiantum c. Veneris.* [B, 95, 180.]—**C. Veneris canadensis.** The *Adiantum pedatum* or *Adiantum canadense* and its herb. [B, 180.]—**Folia capilli Veneris** [Swiss Ph.], **Folia capilli Veneris, Herba capilli Veneris.** See *C. Veneris.*—**Infusum capilli Veneris.** Sp., *infusión de culantrillo* [Sp. Ph.]. A strained infusion of 1 part of the herb of *Adiantum c. Veneris* in 69 parts of boiling water. [B, 95.]—**Syrupus capillorum Veneris** [Austr. Ph.]. Fr., *sirop de capillaire.* Syn. : *syrupus adianti.* A syrup, official in a number of formularies, made of the herb of *Adiantum c. Veneris*, sugar, and boiling water, with or without the addition of orange-flower water. [B, 119.] Cf. *Syrupus* ADIANTI *canadensis.*

CAPIPLENIUM [Schneider] (Lat.), n. n. Ka^{2}p(ka^{3}p)-i^2-plen-(plan)'i^2-u^{3}m(u^{4}m). More properly written *capitiplenium.* From *caput*, the head, and *plenus*, full. See GRAVEDO.

CAPIPROE-CORONDE, n. A sort of cinnamon-tree of Ceylon, the bark of which emits a camphoraceous odor. [B, 121.]

CAPIPUBA, n. In Brazil, a gramineous plant, probably the *Cynodon dactylon*, the bruised root of which is used as an alexipharmac. [B, 88.]

CAPIRI, n. Ger., *Capiribalsam.* Balsam of copaiba. [B, 121, 180.]

CAPISTRATE, adj. Ka^{2}p'i^{2}s-trat. Lat., *capistratus* (from *capistrum* [*q. v.*]). Fr., *c.* Having a colored band about the mouth, like a muzzle (said of animals). [L, 41, 180.]

CAPISTRATIO (Lat.), n. f. Ka^{2}p(ka^{3}p)-i^{2}s-tra(tra^3)'shi^2(ti^2)-o. Gen., *capistratio'nis.* From *capistrare*, to muzzle. Fr., *capistration.* Ger., *Halfterung, Zäumung.* 1. Phimosis. 2. Trismus. [A, 322 ; L, 41.]

CAPISTRÉ (Fr.), adj. Ka^{3}p-i^{2}s-tra. Affected with trismus. [L, 41.]

CAPISTRUM (Lat.), n. n. Ka^{2}p(ka^{3}p)-i^{2}st'ru^{3}m(ru^{4}m). From *caput*, the head. Fr., *capistre, chevêtre* (2d def.). Ger., *Halfter* (1st def.), *Halfterbinde* (2d def.). It., *museruola* (1st def.). Sp., *ca-*

bezal (1st def.). 1. The muzzle; that part of the head of a bird that surrounds the beak. [L, 180; a, 14.] 2. A name for several head bandages, particularly for the lower jaw. [A, 322.] 3. Trismus. [L, 30.]—**C. auri.** Borax. [Ruland (A, 325).]—**C. duplex.** Fr., *chevêtre double.* Ger., *doppelter Halfter.* A double-headed roller bandage for the jaw. [A, 301.]—**C. simplex.** Fr., *chevêtre simple.* Ger. *einfacher Halfter.* A single-headed roller bandage for the jaw. [A, 301.]

CAPITA (Lat.), n. n., pl. of *caput* (*q. v.*). Ka^{2}p(ka^{3}p)′i^{2}t-a^3.

CAPITAL, adj. Ka^{2}p′i^{2}t-a^{2}l. Lat., *capitalis.* Fr., *c.* Ger., *Haupt-.* Sp., *c.* Pertaining to the head; of surgical operations, important, serious (as opposed to minor operations).

CAPITALIA (Lat.), n., n. pl. of *capitalis* (*q. v.*). Ka^{2}p(ka^{3}p)-i^{2}t-a(a^3)′li^2-a^3.

CAPITALIS (Lat.), adj. Ka^{2}p(ka^{3}p)-i^{2}t-a(a^3)′li^{2}s. From *caput*, the head. Capital; as a n. (*fascia* understood), see *Capeline* BANDAGE; as a n. in the n. pl., *capitalia* (*medicamenta* understood), remedies for affections of the head. [L, 97.]—**C. reflexa.** A recurrent bandage for a stump. [L, 97.]

CAPITAN (Sp.), n. Ka^{3}p-i^2-ta^{3}n′. In Carthagena, the *Aristolochia maxima.* [B, 121.]

CAPITANEJA [Mex. Ph.] (Sp.), n. Ka^{3}p-i^2-ta^{3}n-a′ha^3. In Mexico, the *Verbesina erocata.* [A, 447; B, 121.]

CAPITÃO DO MATO (Port.), n. Ka^{3}p-i^{2}t-o^{2}n^2′ do ma^{3}t′o. In Brazil, the *Lantana pseudo-thea.* [B, 19.]

CAPITATÆ (Lat.), n. f. pl. Ka^{2}p(ka^{3}p)-i^{2}t-a(a^3)′te(ta^3-e^2). Fr., *capitées.* 1. Of Hallier, Gmelin, and Linnæus, a tribe or division of the *Compositæ*, comprising *Onopordon*, *Lappa*, *Carduus*, *Atractylis*, etc., corresponding nearly to the *Cynarocephalæ* of Jussieu. 2. Of Link, a suborder of the *Umbellatæ*, consisting of *Eryngium.* [B, 121, 170.]

CAPITATE, adj. Ka^{2}p′i^{2}t-at. Gr., κεφαλωτός. Lat., *capitatus* (from *caput*, a head). Fr., *capité.* Ger., *kopfig*, *kopfförmig*, *kopftragend.* 1. Provided with a head; shaped like a head; shaped like a pin or nail (*e. g.*, a stigma). 2. Growing in heads (said of flowers). 3. In zoology, having a large head or one different in color from the rest of the body; of the *Crustacea*, having a distinct head. [B, 19, 123; L, 41, 180.]

CAPITATI (Lat.), n. m. pl. Ka^{2}p(ka^{3}p)-i^{2}t-a(a^3)′ti(te). 1. Of Linnæus, a division of the *Compositæ*, corresponding nearly to the *Capitatæ* of Hallier. 2. Of Schörer, a class of lichens, comprising the orders *Calicioidei*, *Sphærophorei*, and *Cladoniacei.* [B, 121, 170.] 3. In zoology, the *Arthrocephala.* [B.]

CAPITATUM (Lat.), n., n. of *capitatus* (*os* understood). Ka^{2}p(ka^{3}p)-i^{2}t-a(a^3)′tu^{3}m(tu^{4}m). In comparative anatomy, the os magnum. [L, 153.]

CAPITATUS (Lat.), adj. Ka^{2}p(ka^{3}p)-i^{2}t-a(a^3)′tu^{3}s(tu^{4}s). See CAPITATE.

CAPITELIUM, n. An old name for soap-water or a lixivium of soap. [Johnson, Paré, Falloppio (A, 325).]

CAPITELLATE, adj. Ka^{2}p-i^{2}t-e^{2}l′at. Lat., *capitellatus* (from *capitellum* [*q. v.*]). Fr., *capitellé.* Ger., *kleinköpfig.* 1. In zoology, having a small head. 2. Topped by a small head or head-like process. [B, 121, 123; L, 56, 81, 180.]

CAPITELLIDÆ (Lat.), n. f. pl. Ka^{2}p(ka^{3}p)-i^{2}t-e^{2}l′li^{2}d-e(a^3-e^2). A family of the *Annelida.* [L, 121.]

CAPITELLUM (Lat.), n. n. Ka^{2}p(ka^{3}p)-i^{2}t-e^{2}l′lu^{3}m(lu^{4}m). Dim. of *caput*, a head. 1. The seed-vessel of mosses. 2. A still. 3. An alembic. 4. Soapy water. 5. A lixivium. 6. A rounded eminence on the lower end of the humerus articulating with the radius. [B, 109; C, 3; L, 51, 119.]

CAPITÉS (Fr.), n. pl. Ka^{3}p-i^{2}t-a. See AMPHIPODA.

CAPITEUX (Fr.), adj. Ka^{3}p-i^2-tu^5. Heady, rich in alcohol (said of wines). [A, 301.]

CAPITIBRANCHE (Fr.), adj. Ka^{3}p-i^{2}t-i^2-bra^{3}n^{2}sh. See CAPITOBRANCHIATE.

CAPITIDUCTOR (Lat.), n. m. Ka^{2}p(ka^{3}p)-i^{2}t-i^2-du^{3}k(du^{4}k)′to^{2}r. Gen., *capitiducto′ris.* From *caput*, the head, and *ducere*, to lead. An obstetrical forceps. [A, 322.]

CAPITILUVIUM (Lat.), n. n. Ka^{2}p(ka^{3}p)-i^{2}t-i^2-lu^2(lu)′vi^2-(wi^2)-u^{3}m(u^{4}m). From *caput*, the head, and *luere*, to wash. Fr., *capitiluve.* Ger., *Kopfbad.* A bath or lotion for the head. [A, 301, 385.]

CAPITIPLENIUM (Lat.), n. n. Ka^{2}p(ka^{3}p)-i^{2}t-i^2-plen(plan)′-i^2-u^{3}m(u^{4}m). A more correct form of *capiplenium* (*q. v.*).

CAPITIPURGIUM (Lat.), n. n. Ka^{2}p(ka^{3}p)-i^{2}t-i^2-pu^{5}r(pur)′-ji^2(gi^2)-u^{3}m(u^{4}m). From *caput*, the head, and *purgare*, to cleanse. A remedy for cleansing the nose (like snuff, etc.). [A, 322.]

CAPITISPLENIUS [E. Coues], n. m. Ka^{2}p(ka^{3}p)-i^{2}t-i^2-splen-(splan)′i^2-u^{3}s(u^{4}s). See SPLENIUS *capitis.*

CAPITITRAHA (Lat.), n. f. Ka^{2}p(ka^{3}p)-i^{2}t-i^{2}t′ra^3-ha^3. See CAPITRAHA.

CAPITIUM (Lat.), n. n. Ka^{2}p(ka^{3}p)-i^2′shi^2(ti^2)-u^{3}m(u^{4}m). Fr., *couvre-chef.* Ger., *Kopfmütze.* A handkerchief bandage for the head. [A, 301, 326.]—**C. magnum.** Fr., *grand couvre-chef*, *serviette en carré.* Ger., *grosse* (oder *viereckige*) *Kopfmütze.* A four-cornered head bandage. [A, 326; L, 135.]—**C. minus.** Fr., *petit couvre-chef*, *mouchoir en triangle.* Ger., *kleine* (oder *dreieckige*) *Kopfmütze.* A three-cornered head bandage. [A, 326; L, 135.]—**C. quadrangulare, C. quadratum.** See *C. magnum.*—**C. triangulare.** See *C. minus.*

CAPITO (Lat.), n. m. Ka^{2}p(ka^{3}p)′i^{2}t-o. Gen., *capito′nis.* See MACROCEPHALUS.

CAPITO-BRANCHIATE, adj. Ka^{2}p-i^{2}t-o-bra^{2}n^2′ki^2-at. From *caput*, the head, and *branchia*, a gill. Fr., *capitibranche.* Having gills on the head. [A, 385; L, 121.]

CAPITONIDÆ (Lat.), n. f. pl. Ka^{2}p(ka^{3}p)-i^2-to^{2}n′i^{2}d-e(a^3-e^2). 1. A family of the *Cuculiformes.* [L, 221.] 2. A group of the *Desmognathæ.* [L, 121.]

CAPITOPEDAL, adj. Ka^{2}p″i^{2}t-o-pe′da^{2}l. From *caput*, the head, and *pes*, the foot. Situated near the junction of the head and foot (said of certain orifices in some of the *Mollusca*). [L, 121.]

CAPITRAHA (Lat.), n. f. Ka^{2}p(ka^{3}p)-i^{2}t′ra^3-ha^3. From *caput*, the head, and *trahere*, to draw. Ger., *Kopfschlinge.* An old form of fillet for extracting the fœtal head, especially after its separation from the trunk. [A, 112.]

CAPITULAR, adj. Ka^{2}p-i^{2}t′u^{2}l-a^{3}r. See CAPITULATE.

CAPITULARIACEÆ (Lat.), n. f. pl. Ka^{2}p(ka^{3}p)-i^{2}t-u^{2}l(u^{4}l)-a(a^3)-ri^2-a(a^3)′se^2(ke^2)-e(a^3-e^2). Of Reichenbach, a division of lichens (*Cladoniaceæ*), comprising *Bæomyces*, *Cladonia*, and *Stereocaulon.* [B, 170.]

CAPITULATE, adj. Ka^{2}p-i^{2}t′u^{2}l-at. Lat., *capitulatus* (from *capitulum*, a little head). Fr., *capitulé.* Having a little knob or head on top; of flowers, disposed in capitula. [B; L, 107.]

CAPITULE (Fr.), n. Ka^{3}p-i^{2}t-u^{6}l. See CAPITULUM.

CAPITULÉ (Fr.), adj. Ka^{3}p-i^{2}t-u^{6}l-a. See CAPITULATE.

CAPITULIFORMIS (Lat.), adj. Ka^{2}p(ka^{3}p)-i^{2}t-u^{2}l(u^{4}l)-i^2-fo^{2}rm′i^{2}s. From *capitulum* (*q. v.*), and *forma*, form. Fr., *capituliforme.* Ger., *kopfförmig.* Shaped like a capitulum. [B, 198.]

CAPITULUM (Lat.), n. n. Ka^{2}p(ka^{3}p)-i^{2}t′u^{2}l(u^{4}l)-u^{3}m(u^{4}m). Dim. of *caput*, a head. Gr., κεφαλίς, κόνδυλος (4th def.). Fr., *capitule*, *calathide* (1st def.). Ger., *Köpfchen*, *Blüthenkopf* (1st def.). 1. In phanerogamous plants, a flower-head; a variety of racemose inflorescence consisting of numerous crowded sessile flowers completely covering the abbreviated axis, which is flat, globular, concave or conical, and surrounded by a general involucre of bracts. The c. resembles in appearance a single flower, and hence was formerly called a compound flower, the involucre being designated as the *calyx communis*, and the separate flowers being called *flosculi*, or florets. The c. is the distinguishing form of inflorescence in the *Compositæ.* 2. In cryptogamous plants, any globular or head-shaped organ containing the spores or generative organs (*e. g.*, the pileus of the *Hymenomycetes*); in the *Characeæ*, the head-cell. [B, 19, 123, 279.] 3. In zoology, the body of a barnacle, because placed upon a stalk or peduncle. [L, 31.] 4. In osteology, a little head; a small process or protuberance fitting into a depression in another bone; also the head of a rib, a metacarpal bone, etc. [A, 325; L, 31, 294.] Cf. CONDYLE. 5. An alembic. [L, 104.]—**Capitula arytænoidea, Capitula cartilaginis arytænoideæ.** See CORNICULA *laryngis.*—**C. Martis.** The *Eryngium campestre.* [B, 180; L, 49.]—**C. costæ.** The head of a rib. [L, 115.]—**Capitula medullæ oblongatæ.** The optic thalami. [L, 7.]—**C. pili** [Malpighi]. The bulb of a hair. [L, 31.]—**Capitula Santorini.** See CORNICULA *laryngis.*

CAPITULIFORME (Fr.), adj. Ka^{3}p-i^{2}t-u^{6}l-i^2-fo^{2}rm. From *capitulum* (*q. v.*), and *forma*, form. Resembling a capitulum. [A, 385.]

CAPIVI, n. See COPAIBA.

CAPNANTHEMÆ (Lat.), n. f. pl. Ka^{2}k(ka^{3}p)-na^{2}n(na^{3}n)′-the^{2}m-e(a^3-e^2). Of Batsch, an order of the *Cruciatæ*, comprising the families *Capparideæ*, *Rhœadeæ*, and *Guttæferæ.* [B, 170.]

CAPNELÆUM (Lat.), n. n. Ka^{2}p(ka^{3}p)-ne^{2}l-e′(a^3′e^2)-u^{3}m-(u^{4}m). Gr., καπνέλαιον (from καπνός, smoke, and ἔλαιον, fat). Fr., *capnéléon.* An ancient name for a very liquid resin of spontaneous flow, thought to have been turpentine; so called from the great amount of smoke produced by burning it. [A, 325; L, 41.]

CAPNIAS (Lat.), n. m. Ka^{2}p(ka^{3}p)′ni^2-a^{2}s(a^{3}s). Gr., καπνίας (from καπνός, smoke). An old name for certain smoky-looking minerals, also for a kind of vine bearing grapes of a smoky appearance. [Pliny (A, 318).]

CAPNION (Lat.), n. n. Ka^{2}p(ka^{3}p)′ni^2-o^{2}n. From καπνίον, a slight smoke. Of Dioscorides, the genus *Corydalis.* [B, 121.]

CAPNISIS (Lat.), **CAPNISMA** (Lat.), n′s f. and n. Ka^{2}p-(ka^{3}p)′ni^2-si^{2}s, -ni^{2}z(ni^{2}s)′ma^3. Gen., *capnis′eos* (*cap′nisis*), *-nis′matos* (*-is*). Fumigation. [A, 387.]

CAPNISTON (Lat.), n. n. Ka^{2}p(ka^{3}p)-ni^{2}st′o^{2}n. Gr., καπνιστόν (ἔλαιον understood). Perfumed oil. [A, 387.]

CAPNITES (Lat.), **CAPNITIS** (Lat.), n′s m. and f. Ka^{2}p-(ka^{3}p)-ni(ne)′tez(tas), -ti^{2}s. Gen., *capnit′æ*, *-nit′idis.* Gr., καπνίτης, καπνῖτις (from καπνός, smoke). See CAPNIAS.

CAPNODIUM (Lat.), n. n. Ka^{2}p(ka^{3}p)-nod′i^2-u^{3}m(u^{4}m). A genus of *Fungi.* [B, 61.]—**C. citri.** A species attacking orange- and lemon-trees. [B, 61.]—**C. elongatum.** A species attacking the branches of pear-trees. [B, 61.]

CAPNOGORGION (Lat.), n. n. Ka^{2}p(ka^{3}p)-no(no^2)-go^{2}r′ji^2-(gi^2)-o^{2}n. Of Dioscorides, the *Fumaria officinalis.* [B, 121.]

CAPNOIDES (Lat.), n. f. Ka^{2}p(ka^{3}p)-no(no^2)-i(e)′dez(das). From καπνός, smoke, and εἶδος, resemblance. Of Tournefort, the genus *Corydalis*; of Gärtner, a section of that genus. [B, 121.]

CAPNOMANCY, n. Ka^{2}p′no-ma^{2}n-si^2. Lat., *capnomantia* (from καπνός, smoke, and μαντεία, divination). Fr., *capnomancie.* Ger., *Rauchprophezeiung.* Divination by the direction of the ascent of smoke. [A, 322.]

CAPNOMOR [Reichenbach], n. Ka^{2}p′no-mor. Lat., *capnomorum*, *capnomora* (from καπνός, smoke, and μοῖρα, a portion). Fr., *c.* Ger., *C.* A peculiar light, oily constituent of smoke; obtained by the distillation of tar. [A, 301, 322, 385.]

CAPNON (Lat.), n. n. Ka^{2}p(ka^{3}p)′no^{2}n. See CAPNOS.

CAPNORCHIS (Lat.), n. f. Ka^{2}p(ka^{3}p)-no^{2}r'ki^{2}s(ch^{2}i^{2}s). Gen., *capnorch'idos* (*-is*). The *Fumaria bulbosa.* [B, 121.]

CAPNOS (Lat.), **CAPNUS** (Lat.), n's f. Ka^{2}p(ka^{3}p)'no^{2}s, -nu^{3}s-(nu^{4}s). Gr., *καπνός.* The *Fumaria officinalis.* [B, 121.]—**C. bulbosa, C. chelidonia, C. latifolia, C. phragmites.** Gr., *καπνός χελιδονίας.* The *Corydalis cava.* [B, 200.]

CAPO (Lat.), n. m. Ka(ka^3)'po. Gen., *capo'nis.* Gr., *κάπων.* A capon. [A, 318.]—**Aqua caponis.** Fr., *bouillon de poulet* [Fr. Cod., 1837]. Chicken bouillon; made from 4 oz. of lean chicken and 2 lbs. of water. [B, 119.]

CAPOCK, n. In the Moluccas, the *Eriodendron anfractuosum.* [B, 121.]

CAPOLIN (Sp.), **CAPOLLIN** (Sp.), n's. Ka^{3}p-ol'en, -ol'yen. Of Hernandez, an undetermined tree, cultivated for its edible fruit, which resembles the cherry. A decoction of its root is used for dysentery. [B, 88, 121.] Of the Mex. Ph., the *Cerasus capollin.* [A, 447.]

CAPO-MOLAGO, n. See CAPA-MOLAGA.

CAPON, n. Ka'po^{2}n. Gr., *κάπων.* Lat., *capo.* Fr., *chapon, capon.* Ger., *Kapaun.* A cock-chicken that has been gelded for the purpose of improving its flesh for the table. [L.]

CAPON SPRINGS, n. Ka'po^{2}n. A place in Hampshire County, West Virginia, where there are two springs ("Main" and "Beauty"). The water contains sodium and magnesium carbonates, iodine, bromine, silicic acid, and much free carbonic acid. Used for dyspepsia, uric-acid lithiasis, and intestinal worms. There is also a chalybeate spring, together with plunge, shower, douche, and warm baths. [A, 363.]

CAPOOR KICHLIE (Tamil), n. The *Curcuma Zerumbet.* [B, 172.]

CAPOUR-BARROOS (Malay), n. An undetermined tree said to produce camphor; according to some, the ordinary camphor-tree. [B, 121.]

CAPPAR (Ar.), n. The *Capparis spinosa.* [B, 121.]

CAPPAREÆ (Lat.), n. f. pl. Ka^{2}p(ka^{3}p)-pa(pa^3)'re^2-e(a^3-e^2). 1. Of Necker, an order of plants comprising the genera *Reseda* and *Viola.* 2. Of De Candolle *et al.*, a tribe or suborder of the *Capparidaceæ*, comprising *Capparis, Cratæva,* etc. [B, 19, 121, 170.]

CAPPARI (Lat.), n. n. Ka^{2}p(ka^{3}p)'pa^{2}r(pa^{3}r)-i(e). See CAPPARIS.

CAPPARIDACEÆ (Lat.), n. f. pl. Ka^{2}p(ka^{3}p)-pa^{2}r(pa^{3}r)-i^{2}d-a(a^3)'se^2(ke^2)-e(a^3-e^2). Fr., *capparidacées.* See CAPPARIDEÆ (1st def.).

CAPPARIDACEOUS, adj. Ka^{2}p-a^{2}r-i^{2}d-a'shu^{3}s. Lat., *capparidaceus.* Fr., *capparidacé.* See CAPPARIDEOUS.

CAPPARIDÆ (Lat.), n. f. pl. Ka^{2}p(ka^{3}p)-pa^{2}r(pa^{3}r)'i^{2}d-e-(a^3-e^2). Of Reichenbach, a family of the *Cruciflorœ*, comprising the divisions *Cleomeœ, Cappareœ,* and *Flacourtieœ.* [B, 170.]

CAPPARIDEÆ (Lat.), n. f. pl. Ka^{2}p(ka^{3}p)-pa^{2}r(pa^{3}r)-i^{2}d'e^2-e(a^3-e^2). Fr., *capparidées.* Ger., *Capparideen.* 1. Of Ventenat, Batsch, Jussieu, and succeeding authors, an order of dicotyledenous plants, including the *Cappareœ* (with baccate fruit) and the *Cleomeœ* (with dry, siliquiform fruit), also, according to Baillon, the *Moringeœ, Rhopalocarpeœ,* and *Mœrueœ*; closely allied to the *Cruciferœ*, from which they are distinguished mainly by the stamens, which are either indefinitely numerous or, if definite, are not tetradynamous, and by their frequently stipulate and sometimes compound leaves. 2. Of Baillon, a series corresponding to the *Cappareœ* of De Candolle. [B, 19, 121, 170.]

CAPPARIDEOUS, adj. Ka^{2}p-a^{2}r-i^{2}d'e^2-u^{3}s. Lat., *capparideus.* Fr., *capparidé.* Resembling the capparids; of or belonging to the *Capparideœ.* [B.]

CAPPARIDES (Lat.), n. f. pl. Ka^{2}p(ka^{3}p)-pa^{2}r(pa^{3}r)'i^{2}d-ez(e^{2}s). Of Jussieu, an order of plants corresponding in part to the *Capparideœ* (1st def.), but including also *Viola, Tropœolum, Reseda, Drosera, Marcgravia,* etc., now referred to distinct orders. [B, 170.]

CAPPARIDS, n. pl. Ka^{2}p'a^{2}r-i^{2}dz. See CAPPARIDEÆ (1st def.).

CAPPARIS (Lat.), n. f. Ka^{2}p(ka^{3}p)'pa^{2}r(pa^{3}r)-i^{2}s. Gen., *cappar'idis, cap'paris.* Gr., *κάππαρις.* Fr., *câprier.* Ger., *Kappernstrauch.* Of Tournefort and Linnæus, a genus of capparideous plants, comprising shrubs with 4 sepals, 4 petals, numerous stamens, and stalked bacciform fruit, which is incompletely or not at all dehiscent. [B, 121, 180.] In the pl., *cappares*, capers.—**C. aculeata** [Linnæus]. The *C. spinosa.* [B, 173.]—**C. ægyptiaca** [Lamarck]. A species growing in upper Egypt, where the root is used as a diuretic and anthelminthic. The flower-buds are used like those of *C. spinosa.* [B, 173, 180.]—**C. amygdalina** [Lamarck]. A shrub of the West Indies and South America, where the root and fruit have been employed as an anodyne and laxative, the flowers as a remedy for jaundice and amenorrhœa, and the leaves in the form of a bath for hysteria and hypochondriasis. The species is perhaps to be identified with *C. breynia* or with *C. ferruginea.* [B, 173, 180.]—**C. aphylla** [Roxburgh]. A shrub of India. The buds and fruit are eaten, especially in the form of a pickle, and the plant is used for boils, eruptions, and diseases of the joints, and as an antidote to poisons. [B, 172.]—**C. brevispina** [De Candolle]. An East Indian species; the leaves and flowers are purgative, and the leaves are also used as a local application in arthritic pains. [B, 180.]—**C. breynia** [Willdenow]. Fr., *fève du diable.* A West Indian species; the root-bark is said to be diuretic, cathartic, and emmenagogue, and to be employed as a remedy in dropsy and hysteria and as a vesicant. The fruit is considered poisonous. [B, 121, 173, 180.]—**C. carandas** [Gmelin]. The *Carissa caraudas.* [B, 173.]—**C. coriacea.** A Peruvian species; the fruit (*simulo*) has been recommended in the treatment of epilepsy. [Larrea, "Bolet. Méd."; "Brit. Med. Jour."; "N. Y. Med. Jour.," June 27, 1885, p. 736.]—**C. cynophallophora** [Linnæus]. A West Indian species; the acrid root-bark is used as a diuretic and cathartic in dropsy and abdominal engorgement, and the fruit as an antispasmodic and a remedy for hysteria. By some it is identified with *C. breynia.* [B, 121, 173, 180; L, 87.]—**C. Dahi** [Forskål]. An Egyptian species; the leaves are used as a local application to snake-bites. [B, 173.]—**C. ferruginea** [Linnæus]. Fr., *bois-caca, bois de merde.* A West Indian species having properties and uses similar to those of *C. breynia.* [B, 121, 173, 180.]—**C. Fontanesii** [Lamarck]. A Barbary species. The flower-buds are used like those of *C. spinosa.* [B, 93.]—**C. frondosa** [Jacquin]. A South American species; the fruit and seeds are regarded as poisonous. [B, 180; L, 49.]—**C. heyneana** [Wallich]. An East Indian shrub, having properties and uses like those of *C. brevispina.* [B, 180.]—**C. jamaicensis** [Jacquin]. A West Indian species, employed like *C. breynia.* [B, 121, 180.]—**C. mithridatica** [Forskål]. An imperfectly known Arabian species, said to be used as an alexipharmac, the leaves being especially employed as a local remedy for snake-bites. The young branches are eaten as a vegetable. [B, 173, 180.]—**C. morisonia** [Swartz]. Fr., *arbre du diable.* Syn.: *Morisonia americana* [Linnæus]. A South American species; the wood is reputed antispasmodic. [B, 121, 173.]—**C. octandra** [Jacquin]. The *C. ferruginea.* [B, 173, 180.]—**C. ovata** [Desfontaines]. A species growing in southern Europe and northern Africa. It closely resembles *C. spinosa* and has similar properties. [B, 173, 180.]—**C. pulcherrima** [Jacquin]. A West Indian species; the fruit and seeds are regarded as poisonous. [B, 121, 180.]—**C. rupestris** [Sibthorp and Smith]. A thornless variety of *C. spinosa.* [B, 180, 214.]—**C. sativa** [Persoon]. The *C. spinosa.* [B, 173.]—**C. siliquosa** [Linnæus]. A West Indian species, by some identified with *C. amygdalina*, by others regarded as a variety of *C. breynia.* It has properties similar to those of the latter. [B, 173.]—**C. sinaica** [Duhamel du Monceau]. A species growing about Mt. Sinai, where the flower-buds, which are very large, are made into preserves. [B, 173.]—**C. sodada** [R. Brown]. Syn.: *Sodada decidua* [Forskål]. A small shrub of Arabia and Egypt; the pungent berries are employed as a remedy for sterility, and, when unripe, are cooked and eaten as a condiment. [B, 121, 173, 180.]—**C. spinosa** [Linnæus]. Fr., *câprier, taperier des Provençaux.* Ger., *gemeiner Kappernstrauch.* The caper-bush; a thorny

THE CAPPARIS SPINOSA. [A, 327.]

shrub growing wild on the shores of the Mediterranean Sea, also frequently cultivated there. The flower-buds preserved in vinegar constitute capers (*gemmœ conditœ capparidis*), which are now used only as a condiment, but were formerly regarded as a stimulant and antiscorbutic. The root-bark (*cortex radicis capparidis, cortex capparidis, radix capparidis*; Sp., *alcáparos* [Sp. Ph.], *corteza de la raiz* [Sp. Ph.]) has a bitter, biting taste, and was formerly used as a diuretic and cathartic in intestinal torpor and constipation, and as a depurative application to ulcers. An infusion or tincture of the young branches may be used as a test for alkalies and acids, being reddened by the latter and rendered green by the former. The flowers are official in the Sp. Ph. as *alcaparro.* [B, 121, 173, 180.]—**C. yeo** [Eichler]. A Brazilian species; all parts are said to be poisonous. [B, 121, 180.]—**Cortex capparidis, Cortex c., Cortex radicis capparidis.** The root-bark of *C. spinosa.* [B, 95, 180.]—**Flores capparidis.** The flowers of *C. spinosa.*—**Flores conditæ capparidis, Gemmæ conditæ capparidis.** Capers; the preserved flower-buds of *C. spinosa.* [B, 119, 180.]—**Oleum capparum, Oleum de capparibus.** Fr., *huile de câprier.* A preparation official in several of the older pharmacopœias, made by boiling the root-bark of *C. spinosa* in olive-oil, with or without the addition of capers and either vinegar or wine; and in some cases of rue, ceterach, *Cyperus longus,* etc. [B, 119.]—**Radix capparidis.** The root-bark of *C. spinosa.* [B, 119.]

CAPPAROSA DO CAMPO (Port.), n. Ka^{3}p-pa^{3}r-o'sa^3 do ka^{3}mp'o. In Brazil, the *Pisonia capparosa.* [B, 121.]

CAPPA-THYA, n. In Ceylon, the *Croton lacciferum.* [B, 121.]

CAPPERS SPRINGS, n. Ka^{2}p'pu^{5}rz. Mineral springs in Frederick County, Virginia. [A, 363.]

CAPPONE (It.), n. Ka^{3}p-pon'a. A warm saline spring in the island of Ischia, near Naples. [L, 105.]

CAPRA (Lat.), n. f. Gr., *αἴξ*. Fr., *chèvre*. Ger., *Ziege*. The goat, also the odor of the axilla. [A, 318; L, 105.] Cf. HIRCUS.—**C. ægagrus.** A variety which furnishes the oriental bezoar. [L, 105.]—**C. alpina.** The chamois. [L, 119.]—**C. bezoardica.** See *C. ægagrus*.—**C. domestica, C. hircus.** The domestic goat. [L, 105.]—**C. ibex.** A variety, the blood of which, dried and powdered, was formerly recommended for pleurisy, dysentery, etc. [L, 105.]—**C. silvestris.** See *C. ægagrus*.

CAPRAGINA (Lat.), **CAPRAGO** [Cæsalpinus] (Lat.), n's f. Ka^{2}p(ka^{3}p)-ra^3-ji(ge)'na^3, -ra(ra^3)'go. Gen., *capragi'næ*, *capra'ginis*. The *Galega officinalis*. [B, 88, 121, 180.]

CAPRAIRE (Fr.), n. Ka^{3}p-ra^{2}r. See CAPRARIA.

CAPRAL, n. Ka^{2}p'ra^{2}l. 1. Capric aldehyde. 2. Caproic aldehyde. [B, 2.]

CAPRALDEHYDE, n. Ka^{2}p-ra^{2}l'de-hid. See CAPRIC *aldehyde*.

CAPRAMIDE, n. Ka^{2}p'ra^{2}m-i^{2}d(id). Fr., *c.* Ger., *Capramid*. An amide of capric acid, formed when capric ether is agitated with concentrated aqueous ammonia, a substance, $C_{10}H_{19}O.NH_2 = C_9H_{19} - CO,NH_2$, occurring in colorless crystalline scales readily soluble in alcohol. [B, 2; L, 87.]

CAPRARIA (Lat.), n. f. Ka^{2}p(ka^{3}p)-ra(ra^3)'ri^2-a^3. From *caprarius*, pertaining to a goat, perhaps because goats are fond of it. [B, 173.] Fr., *capraire*. Of Linnæus, a genus of scrophulariaceous herbs or undershrubs indigenous to America; of Matthioli, the *Galega officinalis*. [B, 121; Bentham (B, 214).]—**C. biflora** [Linnæus]. Fr., *thé des Antilles*. Syn.: *Xuaresia biflora* [Ruíz and Pavón]. A species growing in tropical America, where the leaves are employed, under various names, as a substitute for tea. [B, 121, 173.]

CAPRARIACEÆ (Lat.), n. f. pl. Ka^{2}p(ka^{3}p)-ra(ra^3)-ri^2-a(a^3)'-se^2(ke^2)-e(a^3-e^2). Of Reichenbach, a subdivision of the *Scrophulariaceæ*, comprising *Capraria*, etc. [B, 121.]

CAPRARIEÆ (Lat.), n. f. pl. Ka^{2}p(ka^{3}p)-ra(ra^3)-ri(ri^2)'e^2-e-(a^3-e^2). Of Reichenbach, a subdivision of the *Scrofularinæ* (*Scrophulariaceæ*), comprising the sections *Verbascariæ* (*Verbasceæ*), *Gratioleæ*, and *Brunsfelsieæ*, also, in a later classification, the *Buchnereæ*. [B, 170.]

CAPRATE, n. Ka^{2}p'rat. Fr., *c.* A salt of capric acid. [B.]

CÂPRE (Fr.), n. Ka^{3}pr. See CAPER.

CAPREÆ (Lat.), n. f. pl. Ka^{2}p(ka^{3}p)'re^2-e(a^3-e^2). A subtribe of the ruminants, having recurved compressed horns and a concave forehead. The male is bearded. [L, 302.]

CAPRELLADÆ (Lat.), n. f. pl. Ka^{2}p(ka^{3}p)-re^{2}l'la^{2}d(la^{3}d)-e-(a^3-e^2). See CAPRELLINI.

CAPRELLIDÆ (Lat.), n. f. pl. Ka^{2}p(ka^{3}p)-re^{2}l'li^{2}d-e(a^3-e^2). Fr., *caprelliens*. A family of the *Caprellini*. [L, 303.]

CAPRELLINA [Lamarck] (Lat.), **CAPRELLINI** (Lat.), n's n. and m. pl. Ka^{2}p(ka^{3}p)-re^{2}l-li(le)'na^3, -ni(ne). Fr., *caprellins*. An order of the *Edriophthalmia*. [L, 303.]

CAPREOLARIS (Lat.), adj. Ka^{2}p(ka^{3}p)-re^2-o(o^2)-la(la^3)'ri^{2}s. From *capreolus*, a tendril. Fr., *capréolaire*. Spiral (said of the spermatic vessels, a varix, etc.). [A, 325; L, 41, 43.]

CAPREOLATE, adj. Ka^{2}p're-o-lat. From *capreolus*, a tendril. Fr., *capréolé*. Provided with or resembling tendrils. [B; L, 41.]

CAPREOLUS (Lat.), n. m. Ka^{2}p(ka^{3}p)-re(re^2)'o(o^2)-lu^{3}s(lu^{4}s). 1. The roebuck (*Cervus c.*). [L, 105.] 2. A tendril. [B, 19, 121.] 3. In the *Gasteropoda*, the spermatophore. [A, 385.] 4. The helix of the ear. [Bartholin (A, 325).]—**C. auris.** See *C.* (4th def.).

CAPRIA (Lat.), n. f. Ka^{2}p(ka^{3}p)'ri^2-a^3. Of Dioscorides, the *Capparis spinosa*. [L, 105.]

CAPRIALES (Lat.), n. f. pl. Ka^{2}p(ka^{3}p)-ri^2-a(a^3)'lez(le^{2}s). Of Lindley, an alliance of *Epigynæ*, consisting of the single order *Caprifoliaceæ*. [B, 170.]

CAPRIC, adj. Ka^{2}p'ri^{2}k. From *capra*, a goat. Fr., *caprique*. Pertaining to, derived from, or resembling, a goat. [B.]—**C. acid.** Fr., *acide caprique*. Ger., *Caprinsäure*. So called from its odor, or from its occurring in goats' milk or in the *Capparis* (*câprier*). Syn.: *decylic* (*rutic*) *acid*. A monobasic fatty acid, $C_{10}H_{20}O_2 = CH_3.CH_2.CH_2.CH_2.CH_2.CH_2.CH_2.CH_2.CH_2. - CO.OH$, occurring as a glyceride, in conjunction with caprylic and caproic acids, in cows' butter, cocoa-nut oil, and other fats, and in the fusel oil of Hungarian wines, and obtained abundantly by the oxidation of oil of rue. It forms acicular crystals having a faint odor like that of goats or of sweat. It melts at 30° C., and is almost insoluble in water. [B, 2, 4, 270.]—**C. aldehyde.** Fr., *aldéhyde caprique*. The aldehyde of c. acid, $C_{10}H_{20}O$; formerly supposed to exist in oil of rue. The isomeric isocapric aldehyde is known.—**C. ether.** A caprate of an alcohol radicle, especially ethyl caprate. [B, 2.]

CAPRICERVA (Lat.), n. f. Ka^{2}p(ka^{3}p)-ri^2-su^{5}r(ke^{2}r)'va^3(wa^3). Fr., *capricerf*, *cervichèvre*. See CAPRA *ægagrus*.

CAPRICORNUS (Lat.), n. m. Ka^{2}p(ka^{3}p)-ri^2-ko^{2}rn'u^{3}s(u^{4}s). Fr., *capricorne*. A section of the genus *Antilope*, also a genus of the *Coleoptera*. [L, 41, 105.] See CERAMBYX. [L, 41, 105.]—**C. castigatus.** In alchemy, lead. [B, 50.]

CAPRIDÆ (Lat.), n. f. pl. Ka^{2}p(ka^{3}p)'ri^{2}d-e(a^3-e^2). Fr., *capridées*. A family of horned ruminants having the goat as the type. [L, 41, 107.]

CÂPRIER (Fr.), n. Ka^{3}p-ri^2-a. The genus *Capparis*. [B, 120, 173.]—**C. commun.** The *Capparis spinosa*. [B, 173.]—**Huile de c.** See *Oleum* CAPPARUM, under CAPPARIS.

CAPRIFICATION, n. Ka^{2}p-ri^2-fi^2-ka'shu^{3}n. Gr., *ἐρινέασμα*. Lat., *caprificatio* (from *caprificus* [*q. v.*]). Fr., *c.* The operation of hastening the ripening of cultivated figs by transferring to the latter the insects which infest the wild figs. In order to accomplish this, wild figs were planted to the windward of the cultivated ones, and the insects (a species of *Cynips*) were carried by the wind from the former to the latter. These insects appear to produce ripening of the figs by the punctures which they make in the latter, causing an exudation of oil which seems to hinder the processes of exhalation and to produce an accumulation of the juices within the fruit. The same result is sometimes effected by punctures made with a needle. The term c. is also applied to the fertilization of flowers by insects. [B, 19, 121, 270.]

CAPRIFICUS (Lat.), n. f. Ka^{2}p(ka^{3}p)-ri^2-fi(fe)'ku^{3}s(ku^{4}s). Fr., *caprifiguier*. The wild fig-tree (the wild variety of *Ficus carica*) and its fruit; also a genus proposed for that tree. [B, 19, 121.]

CAPRIFOLE, n. Ka^{2}p'ri^2-fol. Lat., *caprifolium*. The *Lonicera caprifolium*. [B, 275.]

CAPRIFOLIA (Lat.), n. n. pl. Ka^{2}p(ka^{3}p)-ri^2-fol(fo^{2}l)'i^2-a^3. Of Adanson, a family of plants comprising the *Caprifoliaceæ* and genera referred to other orders (*e. g.*, *Loasa*, *Cornus*, *Santalum*, etc.). [B, 170.]

CAPRIFOLIACEÆ (Lat.), n. f. pl. Ka^{2}p(ka^{3}p)-ri^2-fol(fo^{2}l)-i^2-a(a^3)'se^2(ke^2)-e(a^3-e^2). Fr., *caprifoliacées*. Syn.: *Lonicereæ* [De Candolle], *Caprifolia* [Adanson]. The honeysuckle family. Of Ventenat, Jussieu, and De Candolle, an order of dicotyledonous plants. As defined by Jussieu and Adanson, it included genera now separated into the distinct orders *Cornaceæ*, *Araliaceæ*, and *Loranthaceæ*. Endlicher united the *C.* with the *Rubiaceæ*, with which they are closely related. As defined by Sachs, they are an order of the *Aggregatæ*, comprising the families *Rubiaceæ*, *Valerianeæ*, *Dipsaceæ*, *Compositæ*, and *Calycereæ*. The *C.* are divided by De Candolle and Bentham and Hooker into the *Sambuceæ* with short style deeply cleft into from two to five divisions, and the *Lonicereæ* with elongated capitate style. As limited by these and most authors, they comprise herbs and shrubs differing from the *Rubiaceæ* in the absence of stipules, the frequently irregular flowers, and the fact that the stalk never becomes black in drying, and from the *Araliaceæ* in the gamopetalous corolla. [B, 42, 121, 170, 180, 279.]

CAPRIFOLIÆ (Lat.), n. f. pl. Ka^{2}p(ka^{3}p)-ri^2-fol(fo^{2}l)'i^2-e-(a^3-e^2). Fr., *caprifoliées*. Of Persoon, a family of plants comprising *Lonicera*, *Diervilla*, *Triosteum*, etc.; of Torrey and Gray, a subtribe of the *Lonicereæ*, comprising *Linnæa*, *Symphoricarpus*, *Lonicera*, and *Diervilla*. [B, 170.]

CAPRIFOLIEÆ (Lat.), n. f. pl. Ka^{2}p(ka^{3}p)-ri^2-fol(fo^{2}l)-i(i^2)'-e^2-e(a^3-e^2). Fr., *caprifoliées*. Of Mirbel, De Candolle, and Richard, the *Caprifoliaceæ* of Jussieu. [B, 170, 173.]

CAPRIFOLIUM (Lat.), n. n. Ka^{2}p(ka^{3}p)-ri^2-fol(fo^{2}l)'i^2-u^{3}m-(u^{4}m). Fr., *chèvrefeuille*. Of Tournefort, a genus of plants, now regarded as a section of *Lonicera*, especially the *Lonicera c.* [B, 19, 88, 121.]—**Baccæ caprifolii, Baccæ caprifolii germanici.** The berries of *Lonicera periclymenum*. [B, 180.]—**Baccæ caprifolii italici.** The berries of *Lonicera c.* [B, 180.]—**C. alpigenum** [Gärtner], **C. alpinum** [Lamarck]. The *Lonicera alpigena*. [B, 173.]—**C. cæruleum** [Lamarck]. The *Lonicera cœrulea*. [B, 173.]—**C. distinctum** [Mönch]. The *Lonicera periclymenum*. [B, 170.]—**C. dumetorum** [Mönch]. The *Lonicera xylosteum*. [B, 173.]—**C. germanicum.** The *Lonicera periclymenum*. [B, 180.]—**C. hortense** [Lamarck], **C. italicum** [Römer and Schultes], **C. perfoliatum** [Röhling]. The *Lonicera c.* [B, 173.]—**C. periclymenum** [Römer and Schultes]. The *Lonicera periclymenum*. [B, 173.]—**C. rotundifolium** [Mönch]. The *Lonicera c.* [B, 173.]—**C. silvaticum** [Lamarck]. The *Lonicera periclymenum*. [B, 173.]—**C. xylosteum** [Gärtner]. The *Lonicera c.* [B, 173.]—**Flores, Folia et Stipites caprifolii (seu caprifolii germanici).** The flowers, leaves, and stalks of *Lonicera periclymenum*. [B, 180.]—**Flores, Folia et Stipites caprifolii italici.** The flowers, leaves, and stalks of *Lonicera c.* [B, 180.]

CAPRILIDENE, n. Ka^{2}p-ri^{2}l'i^{2}d-en. A substance, $C_{16}H_{14}$, obtained by E. Rubien by continued boiling of bromated caprylene ($C_{16}H_{16}Br_2$) with alcoholic potash; a colorless oil, of the odor of leek, soluble in alcohol, in ether, and in benzene, lighter than water, boiling between 133° and 134° C. With bromine it forms the compound $C_{16}H_{14}Br_4$, of a pleasant fruity odor. ["Proc. of the Am. Pharm. Assoc.," xvi, p. 275 (B).]

CAPRILOQUIUM (Lat.), n. n. Ka^{2}p(ka^{3}p)-ri^2-lok(lo^{2}k)'wi^2-u^{3}m(u^{4}m). From *caper*, a goat, and *loqui*, to speak. See ÆGOPHONY.

CAPRIMULGIDÆ (Lat.), n. f. pl. Ka^{2}p(ka^{3}p)-ri^2-mu^{3}l(mu^{4}l)'-ji^{2}d(gi^{2}d)-e(a^3-e^2). From *caprimulga* (from *caper*, a goat, and *mulgere*, to milk), a viper that was fabled to milk goats. Fr., *caprimulgides*. A family of the *Cypseliformes*. [L, 221.]

CAPRIMULGINÆ (Lat.), n. f. pl. Ka^{2}p(ka^{3}p)-ri^2-mu^{3}l(mu^{4}l)-ji(ge)'ne(na^3-e^2). Fr., *caprimulgines*. A subfamily of the *Caprimulgidæ*. [L, 221.]

CAPRIN, n. Ka^{2}p'ri^{2}n. Lat., *caprinum* (from *caper*, a goat). Fr., *caprine*. Ger., *C.* A saponifiable neutral substance found in goats' butter, transformed by saponification into capric acid and glycerin. [A, 301; L, 41.]

CAPRINA (Lat.), n. n. pl. Ka^{2}p(ka^{3}p)-ri(re)'na^3. From *caper*, a goat. Ger., *Ziegen*. See CAPRIDÆ.

CAPRINAMIDE, n. Ka^{2}p(ka^{3}p)-ri^{2}n'a^{2}m-i^{2}d(id). See CAPRAMIDE.

CAPRINATE, n. Ka^{2}p'ri^{2}n-at. See CAPRATE.

CAPRINE, adj. Ka^{2}p'ri^{2}n. Gr., *αἴγειος*. Lat., *caprinus* (from *caper*, a goat). Fr., *caprin*. Ger., *ziegenartig*. Goat-like. [L, 41.]

CAPRINELLA (It.), n. Ka^{3}p-ri^{2}n-e^{2}l'la^3. The *Triticum repens*. [L, 105.]

CAPRINIC, adj. Ka^{2}p-ri^{2}n'i^{2}k. Fr., *caprinique*. See CAPRIC.—**C. acid.** Fr., *acide caprinique*. Ger., *Caprinsäure*. See CAPRIC *acid*.

CAPRINILIQUE (Fr.), adj. Ka³p-ri²n-i²l-ek. See CAPRIC.

CAPRINSAUER (Ger.), adj. Ka³p-ren'za³-u-e²r. Of or pertaining to capric acid; with the name of a base, the caprate of that base. [B.]

CAPRINSÄURE (Ger.), n. Ka³p-ren'zoir-e². Capric acid. [B, 4.]

CAPRINYLINE (Fr.), n. Ka³p-ri²n-i²l-en. See CAPRIN.

CAPRIOLA [Adanson] (Lat.), n. f. Ka²p(ka³p)-ri(ri²)'o(o²)-la³. Fr., *capriole*. The genus *Cynodon*. [B, 121.]

CAPRIPED, adj. Ka²p'ri²-pe²d. Lat., *capripes* (from *caper*, a goat, and *pes*, the foot). Fr., *capripède*. Having feet like those of a goat. [L, 41, 56.]

CAPRISANT (Fr.), adj. Ka³p-rez-a³n². See CAPRIZANT.

CAPRIUOLA (It.), n. Ka³p-re-u-o'la³. The *Tropæolum majus*. [L, 105.]

CAPRIZANT, adj. Ka²p'ri²z-a²nt. Gr., δορκαδίζων. Lat., *caprizans* (from *caper*, a goat). Fr., *caprisant*. Ger., *springend*. Postponed and then accomplished precipitately (said of a pulse-beat); bounding. [A, 301, 322, 325.]

CAPROATE, n. Ka²p'ro-at. Fr., *c*. A salt of normal caproic acid. [B, 4.]

CAPROENE, n. Ka²p'ro-en. Fr., *caproène*. See HEXYLENE.

CAPROIC, adj. Ka²p-ro'i²k. From *caper*, a goat. Fr., *caproïque*. See CAPRIC.—**Anhydrous c. acid.** See *C. anhydride*.—**C. acid.** Fr., *acide caproïque*. Ger., *Caproïnsäure*, *Capronsäure*. A monobasic acid, $C_6H_{12}O_2$. Several isomeric bodies are known having this constitution: 1. *Normal c. acid* (amylcarbonic acid), $CH_3-(CH_2)_4-CO,OH$, an oily liquid of an unpleasant sweat-like odor and sharp acid taste, boiling at 205° C. and occurring in the free state in sweat, among the products of oxidation of albuminoids, and, under the form of caproates, in butter and cocoa-nut oil. 2. *Isocaproic acid* (isoamylcarbonic acid), $(CH_3)_2=CH.CH_2.CH_2.-CO.OH$, an oily liquid boiling at 200° C. 3. *Methylisopropylacetic acid*, an oily liquid of repulsive odor. 4. *Diethacetic acid*, $(C_2H_5)_2=CH.CO.OH$, an oily liquid. 5. *Dimethethacetic acid*, $(CH_3)_2=C(C_2H_5)-CO.OH$, a colorless liquid boiling at 187° C. [B, 4.]—**C. alcohol.** See HEXYL *alcohol*.—**C. aldehyde.** Fr., *aldéhyde caproïque*. Syn.: *Oxide of hexene*, *caproyl hydride*. A body, $C_6H_{12}O$, bearing the same relation to caproic acid that acetic aldehyde has to acetic acid. Two isomeric forms are known, both liquids. [B, 8.]—**C. anhydride.** Fr., *anhydride caproïque*. The anhydride, $C_{12}H_{22}O_3=(C_6H_{11}O)_2=O$, of normal c. acid; a neutral oily liquid of an odor like that of normal c. acid. [B, 2.]—**C. ether.** A caproate of an alcohol radicle, especially ethyl caproate. [B, 2.]

CAPROILENE, n. Ka²p-ro'i²l-en. A light, colorless liquid of unpleasant odor; a product of the destructive distillation of fatty bodies. [L, 108.]

CAPROIN, n. Ka²p'ro-i²n. Fr., *caproïne*. Ger., *Caproïn*. A fatty substance found in goats' butter, resembling caprin. [L, 87.]

CAPROÏNSÄURE (Ger.), n. Ka³p-ro-en'zoir-e². Caproic acid. [B.]

CAPRONÆ (Lat.), n. f. pl. Ka²p(ka³p)-ron'e(a³-e²). The hair above the forehead. [A, 322.]

CAPRONATE, n. Ka²p'ron-at. Fr., *c*. Ger., *Capronat*. See CAPROATE.

CAPRONE, n. Ka²p'ron. Lat., *capronium*, *capronum*. Fr., *c*. Ger., *Capron*. A liquid boiling at 220° C., having the formula $C_{11}H_{22}O_0$, and so isomeric with methylnonyl ketone; the chief constituent of oil of rue. It is probably diamyl ketone, $C_5H_{11}-CO-C_5H_{11}$. [B, 4.]

CAPRONEÆ (Lat.), n. f. pl. Ka²p(ka³p)-ron'e²-e(a³-e²). See CAPRONÆ.

CAPRONIC, adj. Ka²p-ro²n'i²k. Fr., *capronique*. See CAPROIC.

CAPRONINE (Fr.), n. Ka³p-ron-en. See CAPROIN.

CAPRONITRILE, n. Ka²p-ro-ni'tri²l. A substance, $C_6H_{11}N$, the nitrile of caproic acid, $C_5H_{11}C{\equiv}N$, or amyl isocyanide. Its isomeride, amyl cyanide, is known. [B, 2.] See AMYL.

CAPRONIUM (Lat.), n. n. Ka²p(ka³p)-ron'i²-u³m(u⁴m). See CAPRONE.

CAPRONOÏLE (Fr.), n. Ka³p-ron-o-el. See CAPRONOYL.

CAPRONONE, n. Ka²p'ron-on. See DIAMYL *ketone*.

CAPRONOYL, n. Ka²p ro²n'o-i²l. Fr., *capronoïle*. Of Weltzien, the radicle C_6H_{11}, supposed to exist in the caproic compounds and in caprone. [B, 2.]

CAPRONSÄURE (Ger.), n. Ka³p-ron'zoir-e². Caproic acid. [B, 270.]

CAPRONUM (Lat.), n. n. Ka²p(ka³p)-ron'u³m(u⁴m). See CAPRONE.

CAPRONYL, n. Ka²p'ron-i²l. Fr., *capronyle*. The hypothetical radicle, $C_{12}H_{11}$, of caproic acid. [A, 301.]

CAPRONYLINE (Fr.), n. Ka³p-ron-i²l-en. See CAPROIN.

CAPRONYLIQUE (Fr.), adj. Ka³p-ron-i²l-ek. See CAPROIC.

CAPROS (Lat.), n. m. Ka²p(ka³p)'ro²s. Gr., κάπρος. The penis. [A, 387.]

CAPROTINIDÆ (Lat.), n. f. pl. Ka²p(ka³p)-ro(ro²)-ti²n'i²d-e-(a³-e²). A family of the *Rudistes*. [L, 234.]

CAPROXYLON [De Tussac] (Lat.), n. n. Ka²p(ka³p)-ro²x'i²l-(u⁶l)-o²n. The genus *Hedwigia*. [B, 121.]—**C. Hedwigii** [De Tussac]. The *Hedwigia balsamifera*. [B, 180.]

CAPROYL, n. Ka²p'ro-i²l. Lat., *caproylium*. Fr., *caproyle*. 1. The radicle, $C_6H_{11}O$, supposed to exist in caproic acid. 2. The radicle C_6H_{13}, or hexyl. [B, 2.]—**C. alcohol.** See HEXYL *alcohol*.—**C'amine.** Hexylamine. [B, 2.]—**C. hydrate.** 1. Caproic acid. 2. Hexyl alcohol. [B, 2.]—**C. hydride.** Caproic aldehyde. [B, 2.]—**Hydrated c. oxide.** Hexyl alcohol. [B, 2.]

CAPROYLATE, n. Ka²p'ro-i²l-at. A substitution compound of hexyl alcohol with a base; hexyl alcohol in which a base replaces hydrogen. [B.] See HYDROGEN *c*.

CAPROYLENE, n. Ka²p'ro-i²l-en. Fr., *caproylène*. Ger., *Caproylen*. Hexylene. [B, 2.]

CAPROYLIC, adj. Ka²p-ro-i²l'i²k. Of or pertaining to caproyl. [B.]—**C. alcohol.** See HEXYL *alcohol*.

CAPRYL, n. Ka²p'ri²l. Fr., *capryle*. Ger., *C*. 1. Rutyl, the radicle $C_{10}H_{19}O$, found in capric acid. 2. Caprylyl, the radicle $C_8H_{15}O$, found in caprylic acid. 3. Octyl, the radicle C_8H_{17}, found in c. alcohol. [B, 2.]—**C. alcohol.** Fr., *alcool caprylique*. Ger., *Caprylalkohol*. Secondary octyl alcohol. [B, 4.] See OCTYL *alcohol*.—**C'amide.** Fr., *c'amide*. Ger., *C'amid*. The amide of caprylic acid; a solid body, $C_8H_{17}NO=C_7H_{15}-CO.NH_2$, melting at 110° C. [B, 4.]—**C'amine.** Fr., *c'amine*. Ger., *C'amin*. See OCTYL*amine*.—**C. hydrate.** Fr., *hydrate de capryle*. Ger., *C'hydrat*. C. alcohol. [B, 2.]—**C. hydride.** See CAPRIC *aldehyde* and CAPRYLIC *aldehyde*.—**C. octylate.** Fr., *octylate de capryle*. Ger., *C'octylat*. A liquid, $C_8H_{17}.O,C_8H_{15}O=C_{16}H_{32}O_2$, isomeric with palmitic acid. [B, 4.]—**C'sauer** (Ger.). Of or pertaining to caprylic acid; with the name of a base, the caprylate of that base. [B, 270.]—**C'säure** (Ger.). See CAPRYLIC *acid*.—**C'säure-Aethylester** (Ger.). Ethyl caprylate. [B.]—**C'säureanhydrid** (Ger.). Caprylic anhydride. [B, 4.]—**C'sulphuric acid.** Ger., *C'schwefelsäure*. Acid capryl (isoctyl) sulphate, $C_8H_{17}.HSO_4$. [B.] See OCTYL *sulphate*.—**Hydrated c. oxide.** C. alcohol. [B, 2.]

CAPRYLATE, n. Ka²p'ri²l-at. Fr., *c*. Ger., *Caprylat*. 1. A compound formed by replacing the alcoholic hydrogen of capryl alcohol by a base; an octylate. The c's in this sense have the general formula $(C_8H_{17}O)_nR$, in which R is a radicle of the quantivalence *n*. See HYDROGEN *c*. 2. A salt of caprylic acid. The c's in this sense have the general formula $(C_8H_{15}O_2)_nR$, where R is a radicle of the quantivalence *n*. [B, 2, 4.]

CAPRYLENE, n. Ka²p'ri²l-en. Lat., *caprylenum*. Fr., *caprylène*. Ger., *Caprylen*. Syn.: *octylene*. A bivalent hydrocarbon, C_8H_{16}, derived from capryl (secondary octyl) alcohol. [B.]

CAPRYLIC, adj. Ka²p-ri²l'i²k. Fr., *caprylique*. Derived from or containing capryl or octyl. [B, 2.]—**Anhydrous c. acid.** See *C. anhydride*. [B, 2.]—**C. acid.** Fr., *acide caprylique*. Ger., *Caprylsäure*. Syn.: *heptylcarbonic acid*, *octylic acid*. A monobasic fatty acid, $C_8H_{16}O=CH_3-(CH_2)_6-CO,OH$, occurring under the form of acicular or laminar crystals of a faint disagreeable odor, melting at about 17°, and found in the fusel oil of wine, as a caprylate in butter and cocoa-nut oil, and in Limburger cheese. [B, 2, 4.]—**C. alcohol.** See CAPRYL *alcohol*.—**C. aldehyde.** Fr., *aldéhyde caprylique*. Ger., *Caprylaldehyd*. Caprylyl hydride, the aldehyde of caprylic acid; a colorless, highly refractive, inflammable liquid, $C_8H_{16}O$, boiling at 178° C. or 171° C. [Bouis], having a caustic taste and an aromatic odor. [B, 2.]—**C. anhydride.** Fr., *anhydride caprylique*. Ger., *Caprylsäureanhydrid*. A body, $(C_8H_{15}O)_2,O$, liquid at ordinary temperatures. [B, 4.]—**C. ether.** A compound of c. acid with an alcohol radicle, especially with ethyl. [B, 2.]

CAPRYLIN, n. Ka²p'ri²l-i²n. Fr., *capryline*. Ger., *C*. A fatty substance found in goats' butter, resembling caprin. [L, 87.]

CAPRYLONE, n. Ka²p'ri²l-on. Fr., *c*. Ger., *Caprylon*. A substance supposed to have the composition $C_{15}H_{30}O$, obtained as a white crystalline waxy substance, soluble in alcohol and in ether, by the destructive distillation of a salt of caprylic acid with an excess of lime. [B, 2.]

CAPRYLONITRILE, n. Ka²p-ri²l-o-ni'tri²l. Fr., *c*. Ger., *Caprylonitril*. A liquid, $C_8H_{15}N$ or $C_7H_{15}.CN$, boiling at 195° C. [B, 4.]

CAPRYLYL, n. Ka²p'ri²l-i²l. See CAPRYL (2d def.). [B, 2.]—**C. hydrate.** See CAPRYLIC *acid*.

CAPSA (Lat.), n. f. Ka²p(ka³p)'sa³. Gr., κάψα. Fr., *boîte*. Ger., *Kapsel*. A box, case, capsule. [A, 318.]

CAP-SAFRAN (Ger.), n. Ka³p'za³f-ra³n. The flowers of *Lyperia crocea*. [B, 270.]

CAPSAICIN, n. Ka²p-sa'i²-si²n. Fr., *capsaïcine*. Ger., *C*. The fiery principle of capsicum; a colorless crystallizable substance, $C_9H_{14}O_2$, melting at 59° C., soluble in alcohol, in ether, and in the fixed oils. It volatilizes at 115° C. with the evolution of very acrid vapors. [B, 81, 270.]

CAPSALIDÆ (Lat.), n. f. pl. Ka²p(ka³p)-sa²l(sa³l)'i²d-e(a³-e²). A family of the *Bdellomorpha*. [L, 261.]

CAPSARIA (Lat.), n. n., pl. of *capsarium* (*q. v.*). Ka²p(ka³p)-sa(sa³)'ri²-a³. A division of the *Capsina*. ["Proc. of the Zool. Soc." 1878, p. 461 (L).]

CAPSARIUM (Lat.), n. n. Ka²p(ka³p)-sa(sa³)'ri²-u³m(u⁴m). Dim. of *capsa*. See CAPSULE.

CAPSEL (Ger.), n. Ka³p'ze²l. See KAPSEL.

CAPSELLA (Lat.), n. f. Ka²p(ka³p)-se²l'la³. Dim. of *capsa* (*q. v.*). Fr., *capselle*. Ger., *Hirtentäschel* (2d def.), *Täschelkraut* (2d def.). 1. A small capsule. 2. A genus of cruciferous plants separated by Mönch from the genus *Thlaspi* of Linnæus. [B, 121, 180; L, 41.]—**C. bursa pastoris** [Mönch]. Fr., *capselle*, *bourse à pasteur* (ou *à berger*), *boursette*, *malette*, *malette à berger*, *moutarde sauvage* (ou *de Mithridate*), *tabouret*. Ger., *gemeines Hirtentäschelkraut*, *Gänsekresse*. Syn.: *Thlaspi* [Linnæus], *Iberis* [Crantz], *Nasturtium* [Rodschied], *Rodschieda* ["Fl. Wett."], *bursa pastoris*. The *shepherd's purse*, *pickpocket*; an annual herb growing wild in waste places throughout Europe, and naturalized in America. The

herb—*herba bursæ pastoris* (seu *peræ pastoris*, seu *canori*, seu *thlaspi*, seu *thlaspeos*, seu *sanguinariæ*)—is said to be astringent and antiscorbutic, and was formerly employed for dysentery, hæmorrhage, wounds, and cancerous ulcers, and is still occasionally used for these purposes and in urinary troubles. It contains less of the acrid principle than most cruciferous plants and is sometimes used as a pot-herb. The seeds are much sought after by birds. [B, 19, 121, 173, 180; v. Ehrenwall, "Dtsch. Med.-Ztg.," Mar. 29, 1888, p. 307.]—**Herba capsellæ.** The herb of *C. bursa pastoris.* [B, 180.]

CAPSICIN, n. Ka^{2}p'si^{2}-si^{2}n. Lat., *capsicinum.* Fr., *capsicine.* Ger., *C.* 1. A name applied to various resinous liquid or soft solid extracts consisting of a mixture of principles obtained from capsicum. 2. Of Strohmer (1884), a camphor-like body of a penetrating odor and a biting taste, found in capsicum and especially in the pods, dissolved in a fatty oil. [B, 81, 270.]

CAPSICINE, n. Ka^{2}p'si^{2}-sen. Lat., *capsicina, capsicia.* Fr., *c.* Ger., *Capsicin.* A volatile alkaloid obtained from capsicum, having the odor of coniine, from which it differs in the crystalline form of its hydrochloride. [B, 81.]

CAPSICOL, n. Ka^{2}p'si^{2}k-o^{2}l. From *capsicum* (*q. v.*), and *oleum*, oil. Of Buchheim, a red oily liquid obtained from the oleo-resin of capsicum by treating it with a solution of potash and decomposing the product with carbon dioxide. [B, 81.]

CAPSICUM (Lat.), n. n. Ka^{2}p(ka^{3}p)'si^{2}k-u^{3}m(u^{4}m). Fr., *piment, capsique.* Ger., *Beissbeere, spanischer Pfeffer.* 1. Of Linnæus, a genus of solanaceous herbs and shrubs found in the East Indies, China, Egypt, South America, and the West Indies. The capsular fruit constitutes the several varieties of red or Cayenne pepper, chillies, etc. 2. Of the U. S. Ph., the fruit of *C. fastigiatum.* [B.]—**Annual c.** See *C. annuum.*—**Baccæ capsici annui.** The fruit of *C. annuum.* [B, 180.]—**Berry-bearing c.** The *C. baccatum.* [B, 19.]—**C. angulatum** [Miller]. A species identified by Winkler with *C. annuum.* [B. 180.]—**C. annuum** [Linnæus]. Fr., *piment, piment des jardins* (ou *annuel*), *poivre de Guinée* (ou *d'Espagne*, ou *d'Inde*, ou *du Brésil*, ou *de Portugal*), *corail des jardins.* Ger., *einjährige Beissbeere, spanischer* (oder *türkischer*) *Pfeffer.* Guinea, or red, pepper; an annual herb, indigenous to South America, but now cultivated throughout the temperate zone, having ovate, acuminate leaves, white nodding flowers, and conical or globular red or yellow fruit from 2 to 4 inches in length and from 1 to 1¼ in. thick. The latter is the *fructus capsici* (seu *capsici annui*, seu *capsici indici*, seu *capsici hispanici*) of the Ger., Belg., Dan., Russ., and Swed. Ph's; the *piper hispanicum* (seu *brasitiense*, seu *indicum*, seu *turcicum*) of the Finn. and Gr. (3d ed.) Ph's; the *piment des jardins, poivre de Guinée*, of the Fr. Cod. It has a peculiar pungent odor and a sharp burning taste, and incloses numerous disc-shaped yellowish seeds. The smaller varieties are called chillies and Cayenne pepper, like the fruit of *C. fastigiatum.* It is employed as a condiment, and medicinally as a rubefacient and vesicant, as a gargle in putrid sore throat and other inflammatory conditions of the throat and mouth, and internally in torpid conditions of the stomach and intestines, and as a stimulant in fevers. The *C. annuum* has several varieties, which have been regarded as distinct species. One of these, the *C. longum*, is official in the Dan. and Russ. Ph's. [B, 81, 95, 173, 180.]—**Capsici fructus** [Br. Ph.]. See *C. fastigiatum.*—**C. baccatum** [Linnæus]. Fr., *piment baccifère.* Bird-pepper, berry-bearing c.; a species, by some identified with *C. fastigiatum*, found in the East and West Indies, with oval rounded pods, which are very pungent and are employed like those of other species of *C.*—**C. bicolor** [Jacquin]. A species identical, according to Winkler, with *C. frutescens.* [B, 180.]—**C. cerasiforme** [Willdenow]. Cherry-form pepper; a species with fruit of the size and form of a cherry, employed like *C. frutescens* and *C. annuum*, of which by some it is considered a variety. [B, 81, 180.]—**C. ceratocarpum** [Fingerhut]. The *C. sinense.* [Winkler (B, 180).]—**C. chlorocladum** [De Candolle]. A species with small oblong fruit, which is employed like that of *C. fastigiatum.* [B, 81.]—**C. ciliare** [Willdenow]. A species doubtfully identified with *C. microcarpum* (*C. sinense*). [B, 173.]—**C. conicum** [Lamarck], **C. conoides** [Miller]. A species identified by Winkler with *C. frutescens.* [B, 180.]—**C. cordiforme** [Miller]. A species now regarded as a variety of *C. annuum.* [B. 81, 180.]—**C. cumanense** [Kunth]. A species identified by Winkler with *C. frutescens* or *C. fastigiatum.* [B, 180.]—**C. fastigiatum** [Blume]. A small shrub indigenous to the East Indies and cultivated in America and Africa, bearing conical-oblong scarlet fruits about ⅓ to ⅔ in. long and ⅕ in. thick, which contain numerous flat, reniform seeds, and have a pungent, peculiar odor and a very hot, biting taste. These fruits constitute the African, or bird, or Guinea, pepper, called also chillies. It is official in the U. S. Ph. as *c.*, and in the Br. Ph. as *capsici fructus;* and is employed medicinally, and as a condiment, like *C. annuum.* It is sometimes confounded with *C. frutescens*, the fruit of which is very similar. Like the latter it furnishes Cayenne pepper. [B, 81, 95, 180, 270.]—**C. fruit.** The fruit of several species of *C.* [B.] See *C. annuum, C. fastigiatum*, and *C. frutescens.*—**C. frutescens** [Linnæus]. Ger., *Cayennepfeffer.* Syn.: *shrubby c., spur-pepper.* A shrub growing in the East Indies and in tropical America. The fruit (*fructus capsici guayanensis;* the *piment de Cayenne* of the Fr. Cod.) is an ovate-oblong capsule ⅓ to ½ in. long and ⅛ to ⅙ in. thick, which closely resembles (or is identical with) the c. of the U. S. Ph. (the fruit of *C. fastigiatum*). Dried and powdered, it forms Cayenne pepper. [B, 19, 81, 95, 98, 180.]—**C. grossum** [Willdenow]. Bell-pepper; a species growing in the East Indies, now regarded as a variety of *C. frutescens* or *C. fastigiatum.* [B, 81, 172, 173, 180.]—**C. guayanense.** See *C. frutescens.*—**C. longum** [De Candolle]. A species resembling *C. annuum*, and probably to be regarded as a variety only. [B, 81, 180.]—**C. luteum** [Lamarck]. The *C. sinense.* [B, 180.]—**C. microcarpum** [De Candolle]. A species now referred to *C. sinense.* [B, 180.]—**C. minimum** [Roxburgh]. The *C. fastigiatum.* [B, 270.]—**C. nepalense.** A Nepal species, very pungent. [B, 172.]—**C. pendulum** [Willdenow]. A species identified by Winkler with *C. frutescens* or *C. fastigiatum.* [B, 180.]—**C'pflaster** (Ger.), **C. plaster.** See *Emplastrum capsici.*—**C. pyramidale** [Miller]. A species identified by Winkler with *C. frutescens* or *C. fastigiatum.* [B, 180.]—**C.-red.** Ger., *C'roth.* A resinous body constituting the coloring matter of c.; said to be readily soluble in ether, in chloroform, in carbon disulphide, and in the oils. [B, 81, 270.]—**C. sinense** [Jacquin]. A shrub growing in Africa, Asia, and tropical America; employed like *C. annuum.* [B, 180.]—**C. sphæricum** [Willdenow]. A species now identified with *C. annuum.* [B, 180.]—**C. tetragonum** [Miller]. Bonnet-pepper; a species, now regarded as a variety of *C. annuum.* Its fruit, which is very fleshy and shaped like a Scotch bonnet, is much esteemed in Jamaica as a condiment. [B. 19, 180.]—**C. violaceum** [Kunth]. The *C. sinense.* [B, 180.]—**Emplastrum capsici** [U. S. Ph.]. Fr., *sparadrap de capsique.* Ger., *C'pflaster.* C. plaster; made by painting oleo-resin of c. over the surface of muslin previously covered with lead plaster, about 4 grains of the oleo-resin being applied to 16 square inches of surface. [B, 95.]—**Extractum capsici æthereum.** See *Oleoresina capsici.* [B, 95.]—**Extractum capsici fluidum** [U. S. Ph.]. Fluid extract of c.; made by extracting 100 parts of c. in No. 60 powder with alcohol by maceration and percolation, evaporating, and adding to the extract so obtained sufficient alcohol to make 100 parts by volume. [B, 5, 95.]—**Fructus capsici** [Ger. Ph., Belg. Ph., Dan. Ph., Swed. Ph., Russ. Ph.], **Fructus capsici annui.** The fruit of *C. annuum.* [B, 95, 180.]—**Fructus capsici guayanensis.** Fr., *piment de Cayenne* [Fr. Cod.]. The fruit of *C. frutescens.* [B, 95.]—**Infusion of c., Infusum capsici** [U. S. Ph., 1870]. Fr., *tisane de capsique.* Ger., *Spanischpfefferaufguss.* A preparation made by macerating for two hours 240 grains of c. in a pint of boiling water. [B, 81.]—**Lignum capsici.** Ger., *Pfefferholz.* The wood of *Dicypellium caryophyllatum.* [B, 180.]—**Oleoresina capsici** [U. S. Ph.]. Oleo-resin of c.; made by extracting 100 parts of c. in No. 60 powder with ether until 150 parts of extract are obtained, removing the ether by evaporation, separating the liquid portion of the residue by decantation and filtration from the fatty portion, which is to be rejected, and mixing the decanted portion with the residual mass and the filtrate. [B, 95.]—**Shrubby c.** The *C. frutescens.* [B, 19.]—**Tinctura capsici** [U. S. Ph., Br. Ph., Ger. Ph.]. A preparation made up of 5 parts of c. (the fruit of *C. fastigiatum*) and a mixture of alcohol and water (in the proportion of 19 to 1) sufficient to make 100 parts [U. S. Ph.]; or of ¾ oz. (av.) of c. and proof spirit up to 1 pint (imperial) [Br. Ph.]; or of 1 part of c. (the fruit of *C. annuum*) and 10 parts of alcohol [Ger. Ph.]. [B, 5.]—**Tincture of c. and cantharides** [U. S. Ph. (1820)]. Fr., *teinture de poivre de Cayenne et de cantharides.* A preparation consisting of 1 drachm of c. and 10 drachms of cantharides, dissolved in 1 pint of brandy. [B, 119.]

THE CAPSICUM ANNUUM. [A, 327.]

THE CAPSICUM FRUTESCENS. [A, 327.]

CAPSICUS (Lat.), adj. Ka^{2}p(ka^{3}p)'si^{2}k-u^{3}s(u^{4}s). From *capsa* (*q. v.*). See Capsular.

CAPSIDÆ (Lat.), n. f. pl. Ka^{2}p(ka^{3}p)'si^{2}d-e(a^{3}-e^{2}). A family of the *Gymnocerata.* [L, 121.]

CAPSINA (Lat.), n. n. pl. Ka^{2}p(ka^{3}p)-sin(sen)'a^{3}. A subfamily of the *Cimicidæ.* ["Proc. of the Zool. Soc.," 1878, p. 461 (L).]

CAPSINE, n. Ka^{2}p'sen. An alkaloid formerly supposed to be present in capsicum. [B, 119.] Cf. Capsicin.

CAPSIQUE (Fr.), n. Ka^{3}p-sek. See CAPSICUM.—**Sparadrap de c.** See *Emplastrum* CAPSICI.—**Tisane de c.** See *Infusion of* CAPSICUM.

CAPSIS (Lat.), n. f. Ka^{2}p(ka^{3}p)′si^{2}s. Gen., *cap′seos* (*-sis*). Gr., *κάψις*. Rapid breathing or swallowing. [A, 322, 387.]

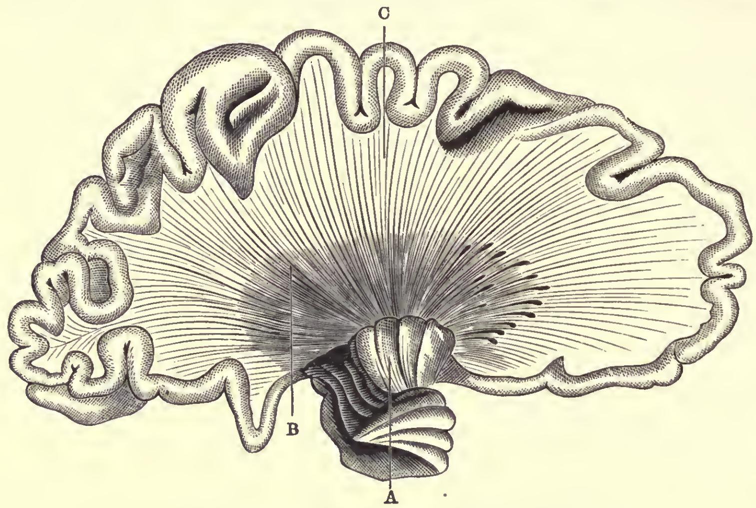
CAPSITIS (Lat.), n. f. Ka^{2}p(ka^{3}p)-si(se)′ti^{2}s. Gen., *capsit′idis.* From *κάψα* (see CAPSA). See also *-itis.** Fr., *capsite.* Ger., *Kapselentzündung.* Inflammation of the capsule of the crystalline lens. [F.]

CAPSOCATARACTA (Lat.), n. f. Ka^{2}p(ka^{3}p)″so(so^2)-ka^{2}t-(ka^{3}t)-a^2(a^3)-ra^{2}k(ra^{3}k)′ta^3. For deriv., see CAPSA and CATARACTA. See *Capsular* CATARACT.

CAPSULA (Lat.), n. f. Ka^{2}p(ka^{3}p)′su^{2}l(su^{4}l)-a^3. Dim. of *capsa* (*q. v.*). 1. See CAPSULE. 2. A pulmonary alveolus [Lereboullet (L, 31).]—**C. adiposa.** Fr., *capsule rénale.* Ger., *Nierenkapsel.* The layer of adipose and connective tissue surrounding the kidney. [L, 44.]—**C. amylacea.** Fr., *cachet* [Fr. Cod.]. A capsule (3d def.) made of unleavened bread. [B, 95.]—**C. aquea cartilaginosa.** The membrane of Descemet. [L, 7.]—**C. articularis.** See *Capsular* LIGAMENT.—**Capsulæ atrabiliares** [Bartholin]. The suprarenal capsules. [A, 325.]—**C. bulbi oculi.** See *Bonnet's* CAPSULE.—**C. cerebelli.** The cortex of the cerebellum. [I, 6.]—**C. circumscissa** [Linnæus]. Fr., *boîte à savonnettes.* Ger., *Büchsekapsel.* A pyxidium (*q. v.*). [B, 121.]—**C. clausa.** Ger., *Schliesskapsel.* See CARCERULUS.—**C. communis Glissonii.** See *Glisson's* CAPSULE.—**C. cordis.** Fr., *capsule du cœur.* The pericardium. [Paracelsus (A, 325 ; L, 44, 119).]—**C. crystallina.** The capsule of the crystalline lens. [L, 43.]—**C. dentis.** See *Dental* CAPSULE.—**C. exterior, C. externa.** See *External* CAPSULE.—**Capsulæ fariniferæ** [Wahlenberg]. The microsporangeia in the *Isoeteæ.* [B, 121.]—**C. fibrosa.** The sclerotic coat of the eye, also the fibrous capsule of the kidney. [L, 31.]—**C. gelatinosa.** See *Gelatin* CAPSULE.—**C. Glissonii.** See *Glisson's* CAPSULE.—**Capsulæ graniferæ** [Wahlenberg]. The macrosporangeia in the *Isoeteæ.* [B, 121.]—**C. hepatica.** See *Glisson's* CAPSULE.—**C. humoris aquei.** See MEMBRANE *of Descemet.*—**C. incudis tympanica** [Huschke]. Fr., *capsule incudo-tympanique.* A capsule covering the union of the malleus with the membrana tympani. [L, 7, 31.]—**C. interior, C. interna.** See *Internal* CAPSULE.—**C. intima.** The innermost layer of the fibrous capsule of the kidney. [L, 31.]—**C. lateralis.** Of the older botanists, the naked fruit of certain *Algæ.* [B, 121.]—**C. lentis.** See CAPSULE *of the lens.*—**C. lumbaris.** The receptaculum chyli. [L, 325.]—**C. mallei et incudis.** Fr., *capsule malléo-incudienne.* The capsule of the articulation between the malleus and the incus. [L, 7.]—**C. Müllerii.** See *Bowman's* CAPSULE.—**C. nervorum.** See PERINEURIUM.—**C. operculata.** A form of gelatin capsule, used for administering powdered or solid preparations, in which two cups, slightly differing in diameter. are joined into a spheroid by sliding one into the other. [B, 270.]—**C. ovarii.** In comparative anatomy, the pouch of peritonæum covering the ovary. [L, 14.]—**C. pericarpio membranaceo** [C. Agardh]. The cystocarpi in some varieties of *Algæ.* [B, 121.]—**C. præaquosa.** See MEMBRANE *of Descemet.*—**Capsulæ renales, Capsulæ renibus incumbentes** [Eustachius]. See *Suprarenal* CAPSULES.—**C. renis adiposa.** See *C. adiposa.*—**Capsulæ Schebti.** The fruit of *Phytolacca abyssinica.* [Bernatzik (A, 319).]—**Capsulæ seminales.** See *Seminal* VESICLES.—**C. seminalis.** See CAPSULE (4th def.).—**C. sequestralis, C. sequestri.** Fr., *capsule du séquestre.* Ger., *Sequestralkapsel.* The portion of living bone surrounding a sequestrum. [L, 44.]—**C. siliquiformis** [C. Agardh]. The lateral sporangeia in certain *Algæ.* [B, 121.]—**C. stapedio-lenticularis.** Fr., *capsule stapédio-lenticulaire.* The capsule surrounding the articulation between the body of the incus and the lenticular process or bone. [L, 7.]—**Capsulæ suprarenales.** See *Suprarenal* CAPSULES.—**C. synovialis.** See *Synovial* MEMBRANE and *Synovial* BURSA.—**C. tripartita** [C. Agardh]. The tetraspores in certain *Algæ.* [B, 121.]—**C. unguinosa.** See *Synovial* MEMBRANE.—**C. venæ portæ.** See *Glisson's* CAPSULE.

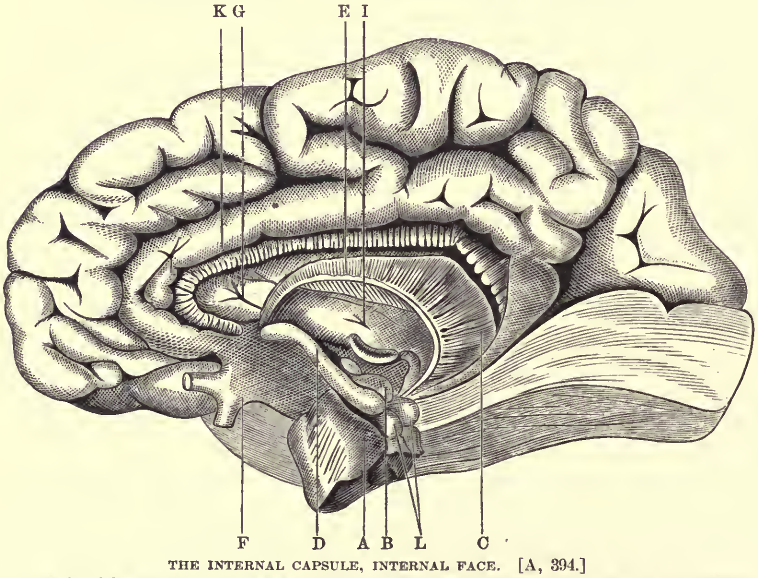
CAPSULÆSCIC ACID, n. Ka^{2}p-su^{2}l-e^{2}s′i^{2}k. From *capsula* (*q. v.*), and *æsculus* (*q. v.*). Fr., *acide capsulæscique.* Syn. : *capsuleic acid.* A crystallizable acid found in the capsules of horse-chestnuts. [B, 92.]

CAPSULAIRE (Fr.), adj. and n. Ka^{3}p-su^{6}l-a^{2}r. Capsular ; as a n., any capsular structure. [L.]—**C's inférieures.** The inferior capsular arteries. [L, 49.]—**C's moyennes.** The middle capsular arteries. [L, 49.] –**C's supérieures.** The superior capsular arteries. [L, 49.]



CAPSULAR, adj. Ka^{2}p′su^{2}l-a^{3}r. Lat., *capsularis* (from *capsula* [*q. v.*]). Fr., *capsulaire.* Ger., *kapselig, kapselförmig, kapselartig.* Pertaining to or resembling a capsule. [B.]

CAPSULARES (Lat.), n., m. pl. of *capsularis.* Ka^{2}p(ka^{3}p)-su^{2}l(su^{4}l)-a(a^3)′rez(re^{2}s). Of Reichenbach, a division of the *Idiocarpicæ*, comprising the *Caryophylleæ*, *Tiliaceæ*, and *Theaceæ* ; in a later classification, a division of the *Asperifoliaceæ*, comprising the *Ellisieæ*, *Hydrophylleæ*, and *Nemophileæ.* [B, 121.] Cf. HYDROPHYLLACEÆ.—**C. seminales.** Of Bartholin, dilatations of the vasa deferentia near the seminal vesicles ; of others, the seminal vesicles. [L, 325.]



CAPSULARIS (Lat.), **CAPSULARY,** adj's. Ka^{2}p(ka^{3}p)-su^{2}l-(su^{4}l)-a(a^3)′ri^{2}s, ka^{2}p′su^{2}l-a-ri^2. See CAPSULAR.

CAPSULE, n. Ka^{2}p′su^{2}l. Gr., *καψάκιον.* Lat., *capsula.* Fr., *c.* Ger., *Kapsel.* It., *capsula.* Sp., *cápsula.* In general, any enveloping structure containing a body distinct from itself. Hence : 1. In anatomy, a membranous sac enveloping other structures. 2. In chemistry, a shallow dish for holding substances to be evaporated or melted. 3. In pharmacy, a hollow pill made of some medicinally inactive substance, such as gelatin, designed to inclose a nauseous drug. 4. In botany, any hollow organ containing bodies, such as seeds, which subsequently escape ; especially (*a*), in *Algæ*, the naked fruit of some genera, the cystocarpi of others, and various other organs ; (*b*) in *Fungi*, certain varieties of receptacle ; (*c*) in ferns, the sporangeia ; (*d*) in mosses, the upper part of the sporocarp, containing the sporangeium ; (*e*) in the genus *Carex*, the utricle ; (*f*) in most phanerogams, any dry fruit made up of several carpels and opening by dehiscence. [B, 19, 121, 270, 279.]—**Accessory suprarenal c.** Ger., *Nebennebenniere.* An additional suprarenal c., without a medullary portion, but frequently as large as a pea, sometimes seen attached to the main c. by connective tissue. [Duckworth (C).]—**Acoustic c.** See *Otic* VESICLE.—**Aqueous c.** Lat., *capsula aquea cartilaginosa.* The membrane of Descemet. [L, 7.]—**Articular c.** Lat., *capsula articularis.* Fr., *c. articulaire.* See *Capsular* LIGAMENT.—**Atrabiliary c's.** See *Suprarenal c's.*—**Auditory c.** See *Otic* VESICLE.—**Bonnet's c.** Lat., *capsula bulbi oculi.* The posterior portion of the sheath of the eyeball up to the passage of the tendons of its muscles. [F.]—**Bowman's c.** Lat., *capsula Müllerii.* Fr., *c. de Müller* (ou *du glomérule*). Ger., *Bowman'sche kapsel, Kapsel des Nierenkorns* (oder *des Glomerulus*, oder *der malpighi'schen Körperchen, malpighi'sche* (oder *Müller'sche*) *Kapsel.* Syn.: *c. of a glomerulus, Malpighian c., Müller's capsule.* The hyaline membrana propria forming the wall of the spherical cæcal enlargement at the origin of the uriniferous tubules. It is connected with the surrounding tissue by a limited amount of connective tissue and is lined by epithelium which is reflected over the contained glomerulus. The c. and its epithelium are continuous with the membrana propria and the epithelium of the renal tubules. [J, 32.]—**Brain c.** The structures inclosing the brain. [L, 20.]—**Brood-c's.** Ger., *Brutkapseln.* In the *Cestoda*, small sacs on the inner surface of the general sac, from which the echinococcus heads spring. [L, 182.]—**C. cartilagineuse** (Fr.). See *C. of a cartilage-cell.*—**C. cristalline** (Fr.). See *C. of the lens.*—**C. de l'ovaire** (Fr.). See *Graafian* VESICLE.—**C. de l'urne** (Fr.). The marginal portion of the urn of an embryo of the *Dicyemida.* [L, 11, 321.]—**C. de Müller** (Fr.). See *Bowman's c.*—**C. du cœur** (Fr.). See PERICARDIUM.—**C's du gout** (Fr.). A number of capsular organs in the mucous membrane of the palate of fishes, believed to be concerned in the function of taste. [L, 321.]—**C. fibreuse** (Fr.). See *Capsular* LIGAMENT.—**C. médicinale** (Fr.). See *C.* (3d def.).—**C. of a cell.** See *Cell*-MEMBRANE.—**C. of a cartilage-cell.** Fr., *c. péricellulaire* (ou *de cartilage*). Ger., *Kapselmembran, Knorpelkapsel.* Syn. : *cartilage-c., capsular membrane, mother-cells.* The multiple or single concentric areas of chondrogenous substance surrounding a cartilage-cell or groups of such cells and forming part or all of the ground substance or matrix of the tissue. [J, 35.] They are classed as *primary* (those immediately surrounding the cells) and *secondary* (those outside the primary).—**C. of a Malpighian body.** See *Bowman's c.*—**C. of a nerve-cell.** Ger., *Hülle* (oder *Kapsel*) *der Ganglionzelle.* The transparent sheath inclosing the nerve-cells of the peripheral nervous system (the spinal ganglia and sympathetic system). They are continuous with the primitive sheath, or neurilemma, and, like it, have nuclei on their inner surface. [J, 30, 31, 35.]—**C. of a glomerulus, C. of a uriniferous tubule.** See *Bowman's c.*—**C. of Glisson.** See *Glisson's c.*—**C. of Tenon.** See *Tenon's c.*—**C. of the aqueous humor.** Lat., *capsula humoris aquei.* See MEMBRANE *of Descemet.*—**C. of the heart.** See PERICARDIUM.—**C. of the kidney.** The connective tissue containing fat surrounding the kidney. [L, 31.]—**C. of the lens.** Lat., *capsula lentis.* Ger., *Linsenkapsel.* The transparent elastic envelope of the crystalline lens. [F.]—**C. ovarienne** (Fr.). See *Graafian* VESICLE.—**C. péricellulaire** (Fr.). See *C. of a cartilage-cell.*—**C's polaires** (Fr.). Certain spores contained within a sporocyst when situated at or near the poles of the cyst. [L, 321.]—**C. rénale** (Fr.). See CAPSULA *adiposa.*—**C. unguineuse** (Fr.). See *Synovial* MEMBRANE.—**Cartilage c.** See *C. of a cartilage-cell.*—**Cellular c. of the eye.** See *Tenon's c.* (2d def.).—**Devorative c.** See *Folding c.*—**Dental c.** A connective-tissue capsule surrounding a rudimentary tooth of the fœtus. [L, 201.]—**Egg-c.** In the cuttle-fish, a sac containing one or more ova. [L, 121.]—**Evaporating c.** Ger., *Abdampfungsschale.* See *C.* (2d def.).—**External c.** Lat., *capsula externa.* Fr., *c. externe.* Ger., *äussere Kapsel.* 1. See CAPSULA *adiposa.* 2. In cerebral anatomy, a layer of white matter situated externally to the lenticular nucleus and separating that ganglion from the island of Reil ; composed of association fibres which connect the posterior part of the frontal convolutions with the temporal, but next to the lenticular nucleus some of the fibres turn almost at a right angle and disappear in the outer segment (putamen) of the nucleus. [*a*, 18.]—**Eye c.** See *Optic c.*—**Fibrous c.** See *Capsular* LIGAMENT.—**Folding c.** A very thin sheet of gelatin in which are infolded dry medicines which it is desired to make easy of administration. [B, 81.]—**Fruit-c.** See *C.* (4th def.).—**Gelatin c.** Lat., *capsula gelatinosa.* Fr., *c.* [Fr. Cod.], *c. gélatineuse.* Ger., *Gelatinekapsel, Gallertkapsel.* A c. (3d def.) made of melted gelatin which is either cast upon a mold in the form of a sphere or spheroid in two parts which fit together after being filled, or is rolled into sheets from which pieces are cut to make the folding c. (*q. v.*). [B, 81, 270.] See also CAPSULA *operculata* and *Medicinal* PEARLS.—**Glisson's c.** Lat., *capsula* (seu *vagina*) *Glissonii.* A strong sheath of connective tissue which loosely envelops the hepatic vessels, and accompanies their distribution in the substance of the liver, becoming an exceedingly delicate investment to their smaller branches. [C ; L, 44.]—**Gum-c.** See CAPSULA *dentis.*—**Hæmorrhoidal c.** Of Jobert, a c.-shaped instrument consisting of two crescentic pieces of metal for inclosing a hæmorrhoid. After being applied, it is filled with Vienna paste. [*a*, 18.]—**Hyaloid c.** Lat., *capsula hyaloidea.* See MEMBRANA *limitans retinæ.*—**Inner c. of the eye.** In certain *Cephalopoda*, a layer of cartilage between the tapetum and the retina. [L, 11.]—**Internal c.** Lat., *capsula interna.* Fr., *c. interne.* Ger., *innere Kapsel.* In cerebral anatomy, a broad, angular tract of white fibres passing through the ganglia at the base of the cerebrum. It is limited above by the upper border of the caudate nucleus; below, it ceases to be known by this name at the level of the optic tract ;

its anterior limit is marked by the anterior extremity of the caudate nucleus; and it extends backward to the posterior extremity of the optic thalamus. The general direction of the fibres is from below upward and from behind forward and outward; they are continued upward as the *corona radiata* (Reil), and downward as the *crus cerebri*. [*a*, 18.]—**Lens-c.** See *C. of the lens.*—**Malpighian c., Müller's c.** See *Bowman's c.*—**Nasal c.** See *Olfactory c.*—

THE INTERNAL CAPSULE, EXTERNAL FACE. [A, 394.]
A, radiating fibres; B, foot of the internal capsule; C, internal capsule (external face.)

THE INTERNAL CAPSULE, INTERNAL FACE. [A, 394.]
A, section of the protuberance; B, cerebral peduncle, fibres of the peduncle (passing directly into the optic thalamus); C, fibres from the optic thalamus going to the extra-ventricular nucleus (lenticular ganglion) of the corpus striatum and to the internal capsule; D, postero-external fasciculus, which, starting from the peduncle, passes around the posterior part of the optic thalamus and joins it superiorly; E, fibres going from the optic thalamus to the extra-ventricular nucleus of the corpus striatum, F, chiasma of the optic nerves; G, intra-ventricular nucleus of the corpus striatum; I, optic thalamus; K, convolutions of the corpus callosum; L, tubercula quadrigemina.

Notochordal c. The sheath of the notochord. [L, 14.]—**Ocular c.** See *Tenon's c.* (2d def.).—**Olfactory c.** In comparative anatomy, an osseous or cartilaginous structure containing the olfactory organs. [L, 14.]—**Optic c.** In comparative anatomy, a cartilaginous or osseous structure which represents the sclerotic coat of the human eye. [L, 14.]—**Ovic'.** See the major list.—**Periotic c.** The structure inclosing the internal ear. [L, 210.]—**Persistent c.** See CUTICULA *dentis.*—**Renal c's.** See *Suprarenal c's.*—**Seminal c's.** See CAPSULARES *seminales.*—**Sense c's.** In comparative anatomy, the bony or cartilaginous cavities which lodge the higher organs of sense; the nose, eye, and ear. [C.]—**Spurious c.** A dry fruit resembling a true c. (4th def.), but indehiscent. [B, 19.]—**Suprarenal c's.** Lat., *capsulæ suprarenales.* Fr., *c's surrénales.* Ger., *Nebennieren.* Two flattened bodies which rest upon the kidneys, the right and smaller one being in relation posteriorly with the diaphragm and above with the liver; the left one with the spleen above and the pancreas below. They are ductless glands, having a fibrous investment, and cortical and medullary portions. The right is triangular, the left crescentic. They measure from 1¼ to 1¾ in. from above downward. [C.]—**Synovial c.** Lat., *capsula synovialis.* Fr., *c. synoviale.* Ger., *Synovialkapsel.* See *Synovial* MEMBRANE.—**Tenon's c.** 1. The anterior portion of the sheath of the eyeball, in front of the situation where it is pierced by the muscles of the eyeball. [L, 326.] 2. Of some anatomists, the entire sheath of the eyeball. [L.]—**Terminal gland-c.** [Krause]. A simple kind of Pacinian corpuscle. [L, 318.]—**Urticating c.** See NEMATOCYST.

CAPSULEIC ACID, n. Ka^{2}p-su^{2}l-e'i^{2}k. See CAPSULÆSCIC ACID.

CAPSULIFER (Lat.), adj. Ka^{2}p(ka^{3}p)-su^{2}l(su^{4}l)'i^{2}f-u^{6}r(e^{2}r). From *capsula* (*q. v.*), and *ferre*, to bear. Fr., *capsulifère.* Bearing capsules; in inflorescence, producing flowers and then capsules. [B, 121.]

CAPSULIFERÆ ["Fl. Wett."] (Lat.), n. f. pl. Ka^{2}p(ka^{3}p)su^{2}l(su^{4}l)-i^{2}f'e^{2}r-e(a^3-e^2). Fr., *capsulifères.* An order of the *Didynamia*, corresponding to the *Angeiospermia.* [B, 121, 170.]

CAPSULIFEROUS, adj. Ka^{2}p-su^{2}l-i^{2}f'e^{2}r-u^{3}s. See CAPSULIFER.

CAPSULITIS (Lat.), n. f. Ka^{2}p(ka^{3}p)-su^{2}l(su^{4}l)-i(e)'ti^{2}s. Gen., *capsulit'idis.* For deriv., see CAPSULA and *-itis.** See CAPSITIS.—**C. ocularis.** Fr., *capsulite oculaire.* Ger., *Entzündung der Augenkapsels.* Inflammation of the fibrous capsule of the eyeball. [F.]

CAPSULOGENOUS, adj. Ka^{2}p-su^{2}l-o^{2}j'e^{2}n-u^{3}s. From *capsula* (*q. v.*), and *gignere*, to produce. Fr., *capsulogène.* Capsule-producing (said of glands, in the *Oligochæta*, which are believed to secrete the egg-capsules). [L, 300, 321.]

CAPSULO-CILIARIS (Lat.), adj. Ka^{2}p(ka^{3}p)''su^{2}l(su^{4}l)-o(o^2)-si^{2}l(ki^{2}l)-i^2-a(a^3)'-ri^{2}s. Relating to the crystalline lens and to the ciliary body. [L, 31.]

CAPSULO-LENTICULAR, adj. Ka^{2}p''su^{2}l-o-le^{2}n-ti^{2}k'u^{2}l-a^{3}r. Lat., *capsulo-lenticularis.* Relating to the crystalline lens and its capsule. [L.]

CAPSULO-PUPILLARY, adj. Ka^{2}p''-su^{2}l-o-pu^2'pi^{2}l-a-ri^2. For deriv., see CAPSULE and PUPIL. Fr., *capsulo-pupillaire.* Pertaining to the capsule of the crystalline lens and to the iris. [A, 385; L, 44.]

CAPSULOTOMY, n. Ka^{2}p-su^{2}l-o^{2}t'o-mi^2. From *capsula* (*q. v.*), and **τέμνειν**, to cut. Incision of the capsule of the crystalline lens. [F.]—**Gruening's peripheral c.** An operation similar to Knapp's but previously employed by Gruening for Morgagnian cataracts. ["Arch. of Ophthal.," vii, 1, p. 53 (F).]—**Knapp's peripheral c.** An operation in which the capsule is opened along the upper portion of the equator of the lens, parallel with and close to the section of the eyeball. ["Arch. of Ophthal.," vi, 4, p. 545 (F).]

CAPTAGE (Fr.), n. Ka^{3}p-ta^{3}zh. See CAPTION.

CAPTATION (Fr.), n. Ka^{3}p-ta^3-si^2-o^{2}n^2. 1. See CAPTION. 2. Of Descourtis, the first stage (*fascination*) of hypnotism. ["Encéphale," 1885, 1, p. 59 (*a*, 18).]

CAPTORIAL, adj. Ka^{2}p-to'ri^2-a^{2}l. From *capere*, to seize. Fitted for catching prey (said of the appendage of the *Cirripedes*). [L, 121.]

CAPUCAYA, n. The Brazil nut (the fruit of *Bertholletia excelsa*). [B, 92.]

CAPUCE DE MOINE (Fr.), n. Ka^{3}p-u^{6}s d' mwa^{3}n. Monk's-hood (the *Aconitum napellus*). [B, 173.]

CAPUCHIN (Fr.), **CAPUCHINE** (Fr.), n's. Ka^{3}p-u^6-sha^{2}n, -shen. The *Tropæolum aduncum.* [B, 34.]

CAPUCHON (Fr.), n. Ka^{3}p-u^6-sho^{2}n^2. 1. A hood. See CUCULLUS and GYNOSTEGIUM. 2. The trapezius (cucullaris) muscle. 3. The *Arisarum vulgare.* 4. The *Aconitum napellus.* [B, 19, 121, 173; L, 41.]—**C. caudal de l'amnios.** The caudal fold of the amnion.—**C. céphalique de l'amnios.** The cephalic fold of the amnion.—**C. de moine.** The *Aconitum napellus.* [B, 38.]—**C's latéraux de l'amnios.** The lateral folds of the amnion.

CAPUCHONNÉ (Fr.), adj. Ka^{3}p-u^6-sho^{2}n-a. See CUCULLATUS.

CAPUCINE (Fr.), n. Ka^{3}p-u^6-sen. The genus *Tropæolum.* [B, 121, 173.]—**C. à feuilles larges.** The *Tropæolum majus.* [A, 301; B, 173.]—**C. à petites feuilles.** The *Tropæolum minus.* [A, 301.]—**C. cultivée.** The *Tropæolum majus.* [B, 173.]—**C. tubéreuse.** The *Tropæolum tuberosum.* [A, 301.]—**Grande c.** The *Tropæolum majus.* [B, 93.]

CAPUCINERBLUME (Ger.), **CAPUCINERKRESSE** (Ger.), n's. Kap-u-tsen'e^{2}r-blum-e^2. See TROPÆOLUM.

CAPULAGA (Malay), n. The *Amomum cardamomum*. [B, 88, 121.]

CAPULEA [Menke] (Lat.), n. n. pl. Ka^{2}p(ka^{3}p)-u^{2}l(u^{4}l)'e^2-a^3. Fr., *capulés*. A family of the *Gasteropoda*. [L, 180.]

CAPULI, n. In Peru, the *Physalis pubescens*. [B, 121; L, 49, 56.]

CAPULIDÆ (Lat.), n. f. pl. Ka^{2}p(ka^{3}p)-u^{2}l(u^{4}l)'i^{2}d-e(a^3-e^2). A family of the *Tæniolossa*. [L, 121.]

CAPULIN, n. See CAPULI.

CAPULIO DE JEDA (Sp.), n. Ka^{3}p-ul'i^2-o da ha'da^3. The *Bombyx Mori*. [L, 105.]

CAPULOIDEUS (Lat.), adj. Ka^{2}p(ka^{3}p)-u^{2}l(u^{4}l)-o(o^2)-i^{2}d(ed)'-e^2-u^{3}s(u^{4}s). From *capulus*, a hilt, and εἶδος, resemblance. Fr., *capuloïde*. Resembling the penis; as a n. in the n. pl., *Capuloidea* (Fr., *capuloïdes* [Cuvier]), a family of the *Gasteropoda*. [L, 41, 180.]

CAPULUM (Lat.), n. n. Ka^{2}p(ka^{3}p)'u^{2}l(u^{4}l)-u^{3}m(u^{4}m). 1. A small vessel, like a spoon. 2. A spoon-shaped curvature (*e. g.*, of the eyelid). [A, 322; L, 81.]

CAPULUS (Lat.), n. m. Ka^{2}p(ka^{3}p)'u^{2}l(u^{4}l)-u^{3}s(u^{4}s). 1. A handle, haft, hilt. 2. The penis. [A, 318.]

CAPUR, n. An old name for camphor. [L, 84, 97.]

CAPURA [Blanco] (Lat.), n. f. Ka^{2}p(ka^{3}p)-u^2(u)'ra^3. A genus of East Indian sapindaceous trees and shrubs. [B, 121.]

CAPURA-CATARI, n. In India, the *Kœmpferia galanga*. [B, 121.]

CAPUR-KICHLIE (Tamil), n. The *Amomum zerumbet*. [B, 88.]

CAPUSA-CATARI, n. See CAPURA-CATARI.

CAPUSILAN-KITSPIL, n. In Java, an asclepiadaceous plant with edible leaves. [B, 121.]

CAPUSSI, n. The *Gossypium arboreum*. [B, 121.]

CAPUT (Lat.), n. n. Ka(ka^3)'pu^{3}t(pu^{4}t). Gen., *cap'itis*. Gr., κεφαλή. Fr., *tête*. Ger., *Kopf*. It., *capo*. Sp., *cabeza*. 1. The head. 2. The peridium of certain *Fungi*. [B, 19, 180.] Also any rounded, head-like extremity of an organ or structure; in the pl., *capita*, the tops of plants (*e. g.*, *capita papaveris*), also, of Albinus the vertebral origins of the diaphragm. [L. 31.]—**Bicipitis c. breve.** The short (middle) head of the biceps flexor cubiti. [L, 31.]—**Bicipitis c. longum.** The long head of the biceps flexor cubiti. [L, 31.]—**C. angulare.** See AUGEN*brauenzache*.—**C. argutum.** A head shaped like a sugar-loaf. [L, 119.]—**C. auriculare musculi styloglossi** [Gruber]. An accessory head of the styloglossus muscle arising from the auditory canal. [L, 31.]—**C. breve.** See TRANSVERSUS *pedis*.—**C. cæcum coli.** See CÆCUM.—**C. caudati** [Wilder]. See *C. corporis striati*.—**C. claviculare.** The clavicular origin of the sterno-cleido-mastoid muscle. [L, 31.]—**C. coli.** See CÆCUM.—**C. concutiens.** See under CONCUTIENS.—**C. cordis.** The base of the heart. [Galen (A, 325).]—**C. cornu posterioris.** The broad anterior extremity of the gray columns of the spinal cord. [I, 6; K.]—**C. corporis striati.** The anterior portion or base of the corpus striatum. [I, 17; K.]—**Capita corporum cavernosorum penis.** The crura of the corpora cavernosa. [L, 31.]—**C. dorsicornu.** See *C. cornu posterioris*.—**C. epididymidis.** See GLOBUS *major*.—**C. externum.** The outer head of the triceps extensor cubiti. [L, 31.]—**C. facere.** To gather, come to a head (said of inflammatory swellings). [L, 119.]—**C. femoris.** The head of the femur. [L, 115.]—**C. florum.** See CAPITULUM.—**C. galeatum.** Ger., *Glückshaube*. The condition in which, during parturition, the child's head emerges still covered with the membranes (a caul). [A, 326.]—**C. galli, C. gallinaceum, C. gallinaginis.** Fr., *crête uréthrale*. Ger., *Hahnenkopf*, *Schnepfenkopf*, *Samenhügel*. Syn.: *verumontanum*. An oblong eminence on the floor of the urethra of the male, in front of the prostate, flattened from side to side and tapering anteriorly; formed chiefly by a mass of muscular fibres from the posterior wall of the bladder and having at its summit the orifices of the ejaculatory ducts. [A, 301, 322; L, 115.]—**C. gelatinosum** [Spitzka]. The collection of gray matter seen on the posterior and inner edge of the posterior gray column of the spinal cord. ["Jour. of Nerv. and Ment. Dis.," Apr., 1880, p. 208 (K).] Cf. SUBSTANTIA *gelatinosa*.—**C. inclavatum, C. incuneatum.** The condition in which the fœtal head is impacted in the pelvis. [A, 85.]—**C. infra-orbitale.** See LEVATOR *labii superioris proprius*.—**C. internum.** The inner head of the triceps extensor cubiti. [L, 31.]—**C. lienis.** The upper end of the spleen. [L, 31.]—**C. longum.** The long head of the triceps extensor cubiti. [L, 31.] See also ADDUCTOR *hallucis*.—**C. magnum.** See *C. externum* and ADDUCTOR *hallucis*.—**C. magnum tricipitis brachii.** In the solipeds, the scapulo-olecranius and scapulo-olecranius magnus muscles. [L.]—**C. majus.** See GLOBUS *major*.—**C. medullæ** [Bartholini]. Syn.: *medulla globosa*. The cerebrum as distinguished from the medulla oblongata. [I, 3.]—**Capita medullæ oblongatæ.** The optic thalami. [L, 7.]—**C. medullæ oblongatæ.** See *C. medullæ*.—**C. Medusæ.** Ger., *Medusenhaupt*. A dilated state of the small cutaneous veins around the umbilicus in a new-born infant, due to stasis of blood in the portal vein; so called from the resemblance of the veins to the fabled head of Medusa. [A, 326; L, 57.]—**C. minus.** See GLOBUS *minor*.—**C. monachi.** The *Taraxacum dens leonis*. [L, 97, 119.]—**C. mortuum.** Fr., *tête morte*. Ger., *Todtenkopf*, *Rückstand*. Of the old chemists, a mass of impure iron oxide left after the expulsion of sulphuric acid from iron sulphate by heat. [A, 322; L, 81.] Cf. *C. mortuum* VITRIOLI.—**C. moventium secundus.** See BIVENTER *cervicis*.—**C. obliquum.** See ADDUCTOR *hallucis*.—**C. obstipum.** See TORTICOLLIS.—**C. of the posterior horn.** The pointed extremity of the posterior cornu of the lateral ventricle. [I, 1; K.]—**C. ossis.** The head of a bone. [Gorræus (A, 325).]—**C. pancreatis.** The head of the pancreas. [L, 31.]—**C. parvum.** See *C. internum* and TRANSVERSUS *pedis*.—**C. penis.** See GLANS *penis*.—**C. primum.** See *C. longum*.—**C. progenæum.** A head with the lower incisor teeth in advance of the upper ones. [Benedikt (A, 319).]—**C'purgium.** See CAPITIPURGIUM.—**C. radicale, C. radicis.** The crown of a root; the summit of a subterranean stem (rhizome) from which the aerial stem springs. [B, 19, 123.]—**C. rosæ** [Avicenna]. The infundibulum or pituitary body of the brain. [I, 3; K; L, 7.]—**C. scapulæ.** The head of the scapula; that portion which bears the articular surface. [L, 142.]—**C. secundum.** See *C. externum*.—**C. sternale.** The sternal origin of the sterno-cleido-mastoid muscle. [L, 31.]—**C. succedaneum.** Fr., *bosse sanguine* (ou *séro-sanguine*). Ger., *Geburtsgeschwulst*, *Kopfgeschwulst*, *Vorkopf*, *Nebenkopf*. Syn.: *scalp-tumor*. A puffy, swollen condition of the presenting part of the fœtus, usually the head, due to that part being free from pressure during labor, while the surrounding parts are subjected to pressure. To be distinguished from cephalæmatoma (*q. v.*).—**C. superius.** That portion of the peroneus longus muscle arising from the upper end of the tibia and the head of the fibula. [L, 31.]—**C. tali.** The head of the astragalus. [L, 31.]—**C. tertium.** See *C. internum*.—**C. testis.** The epididymis. [L, 325.]—**C. transversum.** See TRANSVERSUS *pedis*.—**C. vituli.** The *Antirrhinum majus*. [B, 180.]—**C. zygomaticum.** See LEVATOR *anguli oris*.—**Prævio capite.** Head first; the head presenting (in parturition). [A, 19.]—**Tertium c.** [Riolan]. The adductor femoris magnus. [L, 44.]—**Tertius movens c.** [Falloppius]. See COMPLEXUS *minor*.

CAPU-UPEBA, n. In Brazil, the *Andropogon bicornis*. [B, 121, 200.]

CAPVERN (Fr.), n. Ka^{3}p-ve^{2}rn^2. A place in the department of the Hautes-Pyrénées, France, where there is an alkaline spring. [B, 93.]

CAQUENLIT (Fr.), n. Ka^{3}k-a^{3}n^2-le. The *Mercurialis annua*. [B, 88, 121.]

CAQUÉPIRE (Fr.), n. Ka^{3}k-a-per. The genus *Gardenia*, especially the *Gardenia florida*. [B, 38, 88.]—**C. sauvage.** The *Gardenia thunbergia*. [B, 121.]

CAQUESANGUE (Fr.), n. Ka^{3}k-e^2-sa^{3}n^{2}g. It., *caca-sangue* (from *cacare*, to go to stool, and *sanguis*, blood). Dysentery. [A, 301, 385.]

CAQUILLIÉ (Fr.), **CAQUILLIER** (Fr.), n's. Ka^{3}k-el-i^2-a. The *Cakile maritima*. [B, 121.]

CAQUIPIRIA [Gmelin] (Lat.), n. f. Ka^{2}k(ka^{3}k)-wi^2-pi^{2}r'i^2-a^3. The genus *Gardenia*. [B, 121.]

CARA (Lat.), n. n. and f., indecl. Ka(ka^3)'ra^3. Gr., κάρα. The head or any rounded, head-like body. [A, 322.]

CARA (Sp.), n. Ka^3'ra^3. 1. The *Dioscorea alata*. 2. An apocynaceous plant of the East Indies. [Rumphius (B, 121).] 3. A sort of *Convolvulus* with an edible root, growing in Africa. [B, 38.]

CARABA, n. From Pers., *karubah*. Fr., *carabé*. 1. Amber. [A, 322.] 2. The *Swietenia mahogani*. [B, 38.] 3. In Guiana, the oil obtained from the cashew-nut. [B, 121; L, 41.]—**Huile de c.** (Fr.). The oil of *Swietenia mahogani*. [B, 173.]

CARABACCIUM, n. An undetermined tree of India; according to some, the *Cassia caryophyllata*. The wood has an odor like that of cloves, and is used as a tonic and antiscorbutic. [B, 38, 121.]

CARABAYA, n. The bark of *Cinchona elliptica*. [A, 385.]

CARABE, n. See CARABA (1st def.).—**C. Arabum, C. funerum, C. of Sodom, C. Sodomæ.** Bitumen. [B, 180; L, 104.]

CARABE (Fr.), n. Ka^{3}r-a^{3}b. See CARABUS.—**C. ferrugineux.** See CARABUS *ferrugineus*.

CARABÉ (Fr.), n. Ka^{3}r-a^3-ba. See CARABA (1st def.).

CARABICI (Lat.), n. m. pl. Ka^{2}r(ka^{3}r)-a^{2}b(a^{3}b)'i^2-si(ke). Fr., *carabiques* [Cuvier *et al.*]. A tribe of the *Coleoptera*. [L, 180.]

CARABIDÆ (Lat.), n. f. pl. Ka^{2}r(ka^{3}r)-a^{2}b(a^{3}b)'i^{2}d-e(a^3-e^2). Fr., *carabidées*. A family of the *Coleoptera* having *Carabus* as the type. [A, 385; L, 121.]

CARABIDÉ (Fr.), adj. Ka^{3}r-a^3-bi^{2}d-a. Resembling the genus *Carabus* or belonging to the *Carabidæ*. [A, 385.]

CARABIN (Fr.), n. Ka^{3}r-a^3-ba^{2}n^2. In Normandy, etc., the *Polygonum fagopyrum*. [B, 138, 173.]

CARABIQUE (Fr.), adj. Ka^{3}r-a^3-bek. See CARABIDÉ; as a n. in the pl., c's, see CARABICI.

CARABO, n. See CARABIN.

CARABUS (Lat.), n. m. Ka^{2}r(ka^{3}r)'a^{2}b(a^{3}b)-u^{3}s(u^{4}s). Gr., κάραβος. Fr., *carabe*. Ger., *Laufkäfer*. Sp., *carabo*. The ground-beetle; a genus of coleopterous insects (family, *Carabidæ*). Several species have been considered to be vesicant. [A, 301, 322, 385.]—**C. crepitans.** See BRACHINUS *crepitans*.—**C. ferrugineus** [Linnæus]. A species said to be employed like cochineal, also, in France, as a popular topical remedy for toothache. [A, 301; B, 180.]

CARACA, n. The *Dolichos bulbosa*. [Rumphius (B, 121).]

CARACALLA (Lat.), n. f. Ka^{2}r(ka^{3}r)-a^2(a^3)-ka^{2}l(ka^{3}l)'la^3. Of G. Don, a section of the genus *Phaseolus*. [B, 121.]

CARACAN, n. An Indian name for the *Cynosurus coracanus* (*Eleusine coracana*). [B, 88.]

CARA-CANIRAM, n. In Malabar, the *Justicia* (*Andrographis*) *paniculata*. [B, 88, 121.]

CARACARACAL, n. An undescribed form of tinea said to have been observed among the (aboriginal ?) Americans. [A, 301.]

CARACHE (Sp.), n. Ka^{3}r-a^3'cha. In Peru, a pustular affection of the arms and the chest leaving white scars in negroes and dark ones in whites, who are far less commonly attacked. [A, 301.]

CARACHICHU (Port.), n. Ka^3-ra^3-she-shu′. In Brazil, the *Solanum nigrum*. [B, 19.]

CARACHUNAY (Tamil), n. The *Tacca pinnatifida*. [B, 172.]

CARACK-NASSI, n. In Java, the *Pergularia glabra*. [B, 121.]

CARACOLL (Sp.), n. Ka^3-ra^3-kol′. In New Granada, the *Anacardium rhinocarpus*. [B, 19.]

CARACOLLE (Fr.), n. Ka^{3}r-a^3-kol. The *Phaseolus caracalla*. [B, 121.]

CARACOSMOS, n. Sour mare's milk. [A, 325.]

CARACTÈRE (Fr.), n. Ka^{3}r-a^{3}k-te^{2}r. See CHARACTER.

CARAF (Ar.), n. The *Atriplex hortensis*. [B, 88.]

CARAFÉE (Fr.), n. Ka^{3}r-a^3-fa. The *Cheiranthus cheiri*. [B, 173.]

CARAGAHEEN, n. Ka^{2}r′a^3-ga^3-hen. See CARRAGEEN and CHONDRUS (2d def.).

CARAGALE (Fr.), n. Ka^{3}r-a^3-ga^{3}l. See CARAGUATA.

CARAGAN (Fr.), n. Ka^{3}r-a^3-ga^{3}n^2. The *Caragana arborescens*. [B, 121, 173.]—**C. de la Chine.** The *Caragana chamlagu*. [B, 19.]

CARAGANA (Lat.), n. f. Ka^{2}r(ka^{3}r)-a^{2}g(a^{3}g)-a(a^3)′na^3. Of Lamarck, a genus of papilionaceous trees or shrubs of the tribe *Galegeæ*, indigenous to Siberia and the Himalayas. [B, 19, 121.]—**C. altagana, C. arborescens** [Lamarck]. Fr., *caragan, arbre aux pois*. Syn.: *Robinia c.* [Linnæus]. The Siberian pea-tree. The leaves contain a blue coloring matter like indigo. The seeds are eaten by men and are also fed to poultry, and the leaves and roots are eaten by swine. [B, 19, 173.]—**C. chamlagu** [Willdenow], **C. chanlagu.** Fr., *caragan de la Chine*. A species introduced from China. [B, 71.]—**C. flava.** A shrub the roots of which, said to have tonic, emollient, and arthritic properties, are thought by the Chinese to prolong life. [L, 75.]—**C. inermis.** See *C. arborescens.*—**C. microphylla.** See *C. flava.*—**C. pygmæa** [De Candolle]. Syn.: *Robina pygmæa* [Linnæus]. A species growing in Dahuria; the leaves are said to furnish a variety of indigo. [B, 173.]

CARAGATE (Fr.), n. Ka^{3}r-a^3-ga^{3}t. The genus *Tillandsia*. [B, 121.]—**C. musciforme.** The *Tillandsia usneoides*. [B, 173.]—**C. récourbée.** The *Tillandsia recurvata*. [B, 173.]

CARAGEEN, n. Ka^{2}r′a^3-gen. See CARRAGEEN and CHONDRUS (2d def.).

CARAGENIN, n. Ka^{2}r-a^{2}j′e^{2}n-i^{2}n. See CARAGIN.

CARAGHEEN, CARAGHEEN-MOSS, n's. Ka^{2}r′a^{2}g-en. See CARRAGEEN and CHONDRUS (2d def.).

CARAGIN [Berzelius], n. Ka^{2}r′a^{2}j-i^{2}n. A mucilage which is not precipitated by tannin, contained in carrageen. [B, 270.] See also ALGIN.

CARAGNA, n. See CARAGANA, CARAÑA, CARAGNE, and ICICA *c.*

CARAGNATÁ, CARAGNATÁ-MALA, n's. In the West Indies, a species of *Fourcroya* or *Agave*. [B, 189.]

CARAGNE (Fr.), n. Ka^{3}r-a^{3}n-y′. See CARANA.

CARAGUATE (Fr.), n. Ka^{3}r-a^{3}g-wa^{3}t. See TILLANDSIA.

CARAIBA (Lat.), n. f. Ka^{3}r-a^3-e′ba^3. See CAROBA.—**Cortex caraibæ.** Ger., *C′rinde*. The bark of *Jacaranda procera* and other Brazilian bignoniaceous trees. [B, 180.]

CARAICHE (Fr.), n. Ka^{3}r-e^{2}sh. The genus *Carex*. [B, 121.]

CARAI-CODI, n. In Coromandel, an undetermined species of *Bryonia*. [B, 121.]

CARAIPA (Lat.), n. f. Ka^{3}r-a^3-e′pa^3. Fr., *caraïpe*. Of Aublet, a genus of ternstrœmiaceous trees of tropical America. [B, 121.]—**C. angustifolia** [Aublet]. A tree of Guiana, having astringent properties. [B, 121.]—**C. fasciculata.** A species from which is probably obtained the balsam of Tamacoari, a substance of the color of old port wine and of the consistence of olive-oil; said to be of use in the cure of itch. [B, 19.]

CARAJURA (Port.), **CARAJURU** (Port.), n's. Ka^3-ra^3-ju′ra^3, -ru. In Brazil, the *Bignonia chica* and the red coloring matter obtained from it. [B, 19, 121.]

CARAKAIA (Teloogoo), n. The *Terminalia chebula*. [B, 172.]

CARAKARANEI-KIJANGOU (Tamil), n. The *Amorphophallus campanulatus*. [B, 121.]

CARAK-NASSIA FÆLA-AROS (Malay), n. The *Rondeletia asiatica*. [B, 121.]

CARALINE (Fr.), n. Ka^{3}r-a^{3}l-en. The *Ranunculus glacialis*. [B, 121.]

CARALLIA (Lat.), n. f. Ka^{2}r(ka^{3}r)-a^{2}l(a^{3}l)′li^2-a^3. Fr., *carallie*. Syn.: *Barraldeia* [Dupetit-Thouars]. Of Roxburgh, a genus of rhizophoraceous plants. [B, 42, 121.]

CARRALLINE (Fr.), n. Ka^{3}r-a^{3}l-en. See CARALINE.

CARA-MANDYN, n. In Madagascar, the *Melastoma aspera*. [B, 121.]

CARA-MARDOO (Tamil), n. The *Terminalia glabra*. [B, 172.]

CARAMATA, CARAMATU, n's. See CORTEX *caramata*.

CARAMBA, n. See CARAMBOLA.

CARAMBASSE (Fr.), n. Ka^{3}r-a^{3}m-ba^{3}s. A sort of millet or of sorghum. [B, 38; Bosc (B, 121).]

CARAMBOLA, n. Lat., *caramobolos*. Fr., *carambolier*. [B, 173.] Syn.: *caramba*. In the Celebes, the *Averrhoa c.* of Linnæus; a tree of the East Indies bearing an acrid fruit, which is recommended in bilious fevers and dysentery; hence, of Rheede, the genus *Averrhoa*, and, of Endlicher, a section of that genus.. [B, 19, 121, 275.]

CARAMBOLE (Fr.), n. Ka^{3}r-a^{3}m-bol. The fruit of *Averrhoa carambola*. [B, 121.]

CARAMBOLEÆ (Lat.), n. f. pl. Ka^{2}r(ka^{3}r)-a^{2}m(a^{3}m)-bol(bo^{2}l)′-e^2-e(a^3-e^2). Of Reichenbach, a group of the *Oxaleæ genuinæ*, comprising *Averrhoa*, etc. [B, 270.]

CARAMBOLIER (Fr.), n., **CARAMBOLOS** (Lat.), n. m. Ka^{3}r-a^{3}m-bol-i^2-a, ka^{2}r(ka^{3}r)-a^{2}m(a^{3}m)′bo(bo^2)-lo^{2}s. See CARAMBOLA.

CARAMBU (Malay), n. The *Jussiæa caryophylloides* (*suffruticosa*). [Rheede (B, 88, 121, 172).]

CARAMEILE (Fr.), n. Ka^{3}r-a^3-me^{2}l. The *Lathyrus macrorrhizus*. [B, 275.]

CARAMEL, n. Ka^{2}r′a^3-me^{2}l. Lat., *saccharum percoctum*. Fr., *c*. Ger., *C., braungekochter Zucker*. Sp., *caramelo*. Burnt sugar; a bitter, brownish, hygroscopic substance obtained by heating saccharose to 400° C.; chemically, a mixture of different substances, the chief constituent being caramelan. [B, 4, 173.]

CARAMELAN, n. Ka^{2}r-a^{2}m′e^{2}l-a^{2}n. Fr., *caramélan, caramélane, caramélène, caramélite, acide caramélique*. A constituent of caramel, an amorphous deliquescent colorless substance, $C_{12}H_{18}O_9$, of a bitter taste. [B, 3.]

CARAMÉLIQUE (Fr.), adj. Ka^{3}r-a^3-mal-ek. Pertaining to caramel. [A, 385.]—**Acide c.** See CARAMELAN.

CARANA, n. 1. Of the Ostiak Tartars, the *Vaccinium oxycoccos*. [B, 121.] 2. The *Bromelia Karatas* (*Karatas Plumierii*). [B, 38.]—**C. resin.** See CARAÑA.

CARAÑA [Mex. Ph.] (Sp.), n. Ka^{3}r-a^{3}n′ya^3. Lat., *resina caragne*. Fr., *gomme caragne* (ou *caranne*, ou *careigne*, ou *carane*). Ger., *Carannaharz, Caranna-Gummi*. A medicinal resin furnished by a burseraceous plant of Mexico, either the *Icica* (*Amyris*) *carana* (*caranna*), the *Bursera acuminata*, or the *Cedrota longifolia*. It was formerly exported from the West Indies and South America wrapped in the leaves of various plants. It presents several varieties, differing in melting point, and with or without a feeble guaiac-like odor. [A, 447; B, 180.]

CARANAIBA [Pison], **CARANA-IBA** [Marcgraff], n's. Ka^3-ra^3-na^3-e′ba^3. The genus *Copernicia*. [B, 121.] Cf. CARNAUBA.

CARA-NASCI, n. A name applied to different plants in Amboya. [B, 121.]—**Great c.-n.** Fr., *c.-n. grand*. The *Ruellia antipodia*. [B, 121.]—**Narrow-leaved c.-n.** Fr., *c.-n. à feuilles étroites*. The *Oldenlandria repens*. [B, 121.]—**Small c.-n.** Fr., *c.-n. petit*. The *Capraria crustacea*. [B, 121.]

CARANDA, n. 1. In South America, wax made from the *Copernicia cerifera*. 2. The *Carissa carandas*. 3. Of Gärtner, a palm of Ceylon, little known. [B, 121; *a.* 17.]

CARANDAI, n. See CARANDA (1st def.).

CARANDAS, n. From Hind., *kurunda*. The *Carissa carandas*. [Rumphius (B, 121), B, 275.]

CARANDE (Fr.), n. Ka^{3}r-a^{3}nd. The fruit of the *Caranda* (3d def.). [B, 38.]

CARANDIEÆ (Lat.), n. f. pl. Ka^{2}r(ka^{3}r)-a^{2}nd(a^{3}nd)-i(i^2)′e^2-e-(a^3-e^2). Of G. Don, a tribe of the *Apocyneæ*, comprising *Carissa*, etc. [B, 121, 170.]

CARANDIER (Fr.), n. Ka^{3}r-a^{3}nd-i^2-a. See CARANDA (3d def.).

CARANG (Hind.), n. The *Dalbergia arborea*. [B, 172.]

CARANGA, n. See CURANGA.

CARANGIDÆ (Lat.), n. f. pl. Ka^{2}r(ka^{3}r)-a^{2}n(a^{3}n^2)′ji^{2}d(gi^{2}d)-e(a^3-e^2). A family of the *Acanthopterygii cotto-scombriformes*. [L, 207.]

CARANGINA (Lat.), n. n. pl. Ka^{2}r(ka^{3}r)-a^{2}n(a^{3}n^2)-ji(ge)′na^3. A group of the *Carangidæ*. [L, 280.]

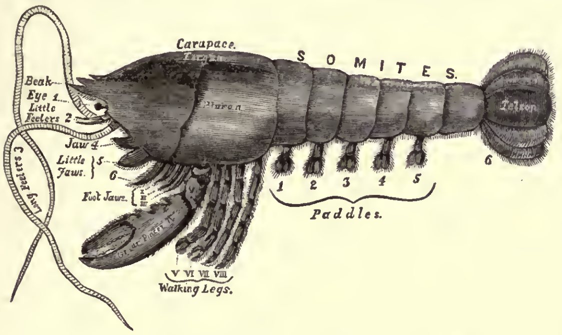
CARANGOID, adj. Ka^{2}r-a^{2}n^2′goid. Belonging to or of the nature of the *Carangidæ*. [L, 14.]

CARANGUA, n. See CARAÑA.

CARANNA, n. See CARAÑA.—**C.-gum.** Lat., *gummi carannæ*. See CARAÑA.—**C.-Balsambaum** (Ger.). The tree furnishing caraña. [B; L, 80.]—**C.-Gummi** (Ger.), **C′harz** (Ger.), **C.-resin.** See CARAÑA.—**C.-palm.** In South America, the *Mauritia carana*. [B, 19.]—**Gum c., Gummi carannæ, Resina c.** See CARAÑA.

CARANOSI, n. In Malabar, the *Vitex trifolia*. [B, 121.]

CARANOTSCHI (Malay), n. The *Justicia gendarussa* (*Gendarussa vulgaris*). [B, 121.]



CARANTIA, n. In India, the *Euphorbia captitata*. [L, 105.]

CARAP, n. Fr., *huile de carapa*. Ger., *Carapaöl*. In Guiana, a very bitter concrete oil obtained from the seeds of *Carapa guianensis;* used for illumination, in making soap, and, rubbed on the hair and body, as a protection against insects. [B, 121, 173, 180; L, 73.]

CARAPA (Lat.), n. f. Ka^{3}r-a^3′pa^3. Of Aublet, a genus of tropical maritime meliaceous trees of the tribe *Trichilieæ*. [B, 42, 121.]—**C′fett** (Ger.). See CARAP.—**C. guianensis** [Aublet]. Fr., *c. de la Guiane*. Ger., *gujanische C.* Syn.: *Persoonia guareoides* [Willdenow], *Xylocarpus c.* [Sprengel]. A tall tree of Guiana, having very bitter bark which has been used as an antispasmodic and is said to contain an alkaloid, *carapine*. The buds are anthelminthic and also protect against insects. [B, 121, 173, 180.] See CARAP.—**C. guineensis** [Sweet]. Fr., *c. du Sénégal*. Ger., *guineische C.* A large tree of Senegal. From the seeds is obtained a butyraceous concrete oil of rancid odor and very bitter taste (touloucouna oil), used as an illuminating oil, in making soap, and for other purposes. A decoction of the wood is said to be in use as a tonic, and a resin derived from the tree is used by fumigation in the treatment of chronic otorrhœa. [B, 121, 173, 180.]—**C. indica** [Jussieu], **C. moluccen-**

sis [Lamarck]. Syn.: *Xylocarpus granatum* [König]. A tree of the East Indies, having a bitter bark and root which are employed in diarrhœa and dysentery. The envelope of the fruit is employed in skin affections and gastric debility, and the bitter seeds are used in colic. [B, 180.]—**C. obovata** [Blume]. Syn.: *Xylocarpus obovatus* [Jussieu]. An East Indian species with a very bitter bark. [B, 93.]—**C'öl** (Ger.). See Carap.—**C. procera.** The *Trichilia procera.* [L, 49.]—**C. Rumphii** [Kosteletsky]. An East Indian tree, employed like *C. molluccensis.* [B, 180.]—**C. touloucouna** [Guillemin and Perottel]. The *C. guineensis.* [B, 173.]—**Cortex carapæ.** The bark of *C. guianensis.* [B, 180.]—**Huile de c.** (Fr.). See Carap.

CARAPACE, n. Ka^{2}r'a^3-pas. Lat., *carassæ.* Fr., *c.* Ger., *Rückenschild.* In general, any hard envelope protecting the body of an animal; in the chelonians, the osseous envelope derived from

THE CARAPACE OF A LOBSTER. (AFTER S. H. STEVENSON.)

the ribs, also the dorsal horny shell; in the crustaceans, the chitino-calcareous shell covering the skin, especially of the cephalo thorax. [A, 385; B, 38; L, 41.]

CARAPAT, n. Ka^{2}r'a^3-pa^{2}t. Castor-oil; also the *Ricinus communis.* [B, 121.]

CARAPATA, n. See Carapatos.

CARAPATINA (Lat.), n. f. Ka^{2}r(ka^{3}r)-a^3-pa^{2}t(pa^{3}t)-i(e)'na^3. See Bufonites.

CARAPATOS (Port.), n. Ka^{3}r-a^3-pa^3'tos. 1. A species of *Ixodes* found in Brazil, in the region of the Amazon. [G.] 2. In Brazil, the *Ricinus communis.* [B, 121.]

CARAPAX, n. Ka^{2}r'a^3-pa^{2}x. See Carapace.

CARAPIA, n. In Brazil, the *Dorstenia cayapia* and the *Dorstenia tubicina.* [B, 121.]

CARAPICHEA [Aublet] (Lat.), n. f. Ka^{2}r(ka^{3}r)-a^3-pi^{2}k(pech^2)'-e^2-a^3. Fr., *carapichée.* See Cephaelis.—**C. gujanensis** [Aublet]. The *Cephaelis involucrata.* [B, 121, 180.]

CARAPICOR, n. The *Plumbago scandens.* [B, 121.]

CARAPINE, n. Ka^{2}r'a^3-pen. Fr., *c.* Ger., *Carapin.* An alkaloid found in the bark of *Carapa guianensis.* [B, 121, 180.]

CARAPIXO DA CALÇADA (Port.), n. Ka^3-ra^3-pe'sho da^3 ka^{3}l-sa^3'da^3. In Brazil, some species of *Triumfetta.* [B, 19.]

CARAPOUCHA, n. A grass which causes drunkenness and delirium; according to some, the *Bromus catharticus;* according to others, probably the *Festuca quadridentata.* [B, 88, 121.]

CARAPOS, n. Of Rheede, an undetermined East Indian plant. [B, 121.]

CARAPSOT, n. See Caraña.

CARAPU, n. The *Smilax indica.* [B, 121.]

CARAPUE (Port.), n. Ka^3-ra^3-pu'a. In Brazil, the *Bactris socialis.* [B, 121.]

CARAPULLI, CARAPULLO, n's. See Carapoucha.

CARAQUE (Fr.), n. Ka^{3}r-a^{3}k. Lit., Caracas; a superior sort of cacao imported from Caracas. [B, 121.]

CARARA (Lat.), n. f. Ka^{2}r(ka^{3}r)-a(a^3)'ra^3. In Tuscany, the *Lepidium sativum,* the *Lepidium latifolium,* and the *Senebiera coronopus;* of De Candolle, a section of the genus *Senebiera.* [B, 88, 121.]

CARARU (Port.), n. Ka^3-ra^3-ru'. In Brazil, the *Amarantus viridis* (*c.*). [B, 88, 121.]

CARASCA (Sp.), n. Ka^{3}r-a^{3}s'ka^3. The *Quercus coccifera.* [B, 88, 121.]

CARA-SCHULLI, CARASCULI, n's. The *Barleria buxifolia.* [B, 121.]

CARASSÆ (Lat.), n. f. pl. Ka^{2}r(ka^{3}r)-a^{2}s(a^{3}s)'se(sa^3-e^2). See Carapace.

CARASSUDO, n. The *Centaurea collina.* [B, 121.]

CARATA, n. Ka^{3}r-a^3'ta. See Carate (2d def.).

CARATALA, n. A Brahmin name for the *Corypha umbraculifera.* [B, 121.]

CARATE, n. Ka^{3}r-a^3'ta. From Sp., *cara,* the face, and an Indian word, *ate,* look ("look at the face!") Lat., *pannus caratus* (2d def.). Fr., *caraté, panne caratée* (2d def.), *carathès* (2d def.), *tache endémique des Cordillères* (2d def.). 1. In South America, the *Momordica charantia;* also a sort of camphor extracted from it. [B, 88, 121; L, 109.] 2. In South America, a cutaneous disease, said to be endemic in the states of Colombia, characterized by round or oval spots, of a blue-white or rose color, on the hands, face, neck, and abdomen, occurring usually in persons of the dark-skinned races. [Van Archen. "Am. Med. Month.," Apr., 1858; J. Gomez, "Du carathès," etc., Paris, 1879.] Cf. Mal *del pinto.*

CARATÉ (Fr.), adj. Ka^{3}r-a^3-ta. Attacked with carate. [L, 109.] As a n., the *Momordica charantia.* [B, 121.]

CARATHÈS (Fr.), n. Ka^{3}r-a^3-te^{2}z. See Carate (2d def.).

CARATHILLUT (Carib), n. The *Malpighia coccifera.* [B, 121.]

CARATI, n. See Carate (1st def.).

CARATOE, n. A West Indian name for the *Agave americana.* [B, 19.]

CARAUNDA (Hind.), n. The *Carissa carandas.* [B, 172.]

CARAVALA, n. A parasitic plant of Jamaica, probably a species of *Tillandsia.* [B, 121.]

CARAVATA, n. See Cacao.

CARAVATA-MIRI, n. A Guiana species of *Serapias.* [Aublet (B, 121).]

CARAVATTI, n. The *Ficus ampelo.* [B, 121.]

CARAVAUN-BEG, n. The *Prunella vulgaris.* [B, 275.]

CARAVEA (Sp.), n. Ka^{3}r-a^3-va'a^3. The *Carum carvi.* [B, 121.]

CARA-VEELA, n. The *Cleome pentaphylla.* [B, 121.]

CARAWAY, n. Ka^{2}r'a^2-wa. O. E., *carwey, carvi, carvy* (from κάρον, through Ar. *karwiya*). Lat., *carum, carui, carvi.* Fr., *carvi.* Ger., *Kümmel.* It., *carvi.* Sp., *alcarahueya.* The *Carum carui* and its fruit. [B.]—**C.-fruit, C.-seeds.** Lat., *carum* [U. S. Ph.], *carvum* [Austr. Ph., Hung. Ph.], *carvi* [Netherl. Ph.], *carui fructus* [Br. Ph.], *carvi semen* [Gr. Ph.], *fructus carvi* [Ger. Ph., Norweg. Ph., Swed. Ph., Russ. Ph., Belg. Ph., Finn. Ph., Dan. Ph.]. Fr., *carvi* [Fr. Cod.], *fruit de carvi.* Ger., *Kümmel.* It., *carvi, cumino tedesco.* Sp., *alcarabea* [Sp. Ph.]. The fruit of *Carum carui.* It consists of two mericarps (usually separated in the c. of the shops) from $\frac{1}{6}$ to $\frac{1}{5}$ in. long, brown and smooth, each with 5 filiform ribs on the dorsum and 1 vitta in each of the 4 spaces between the ribs, with two vittæ on the flat surface. It has an aromatic odor and agreeable taste, and contains from 4 to 7 per cent. of volatile oil (see *Oil of c.*), a fixed oil, sugar, resin, mucilage, etc. It is used chiefly as a condiment, a flavoring ingredient, and a carminative. [B, 81, 95.]—**C.-water.** See *Aqua* carui.—**Edible-rooted c.** The *Carum Gavidneri* and *Carum Kelloggii.* [B, 275.]—**Mogador c.** A variety of c.-fruit with mericarps $\frac{1}{4}$ in. long. [B, 81.]—**Oil of c.** Lat., *oleum cari* [U. S. Ph.] (seu *carui* [Br. Ph.], seu *carvi* [Ger. Ph.]). Fr., *huile volatile de carvi* [Fr. Cod.]. Ger., *Kümmelöl.* A volatile oil obtained from c.-fruit by distillation; limpid, colorless or yellowish, neutral, of an agreeable odor and aromatic taste, consisting of varying proportions of *carvene,* $C_{10}H_{16}$, which has little odor or taste, boils at 173° C., and is highly dextrorotary, and of *carvol,* $C_{10}H_{14}O$, which has the odor of c., boils at 227° C. (Gladstone) or 250° C. (Varrentrap), and is lævorotary. The Ger. Ph. requires oil with but little carvene and of a sp. gr. of not less than 0·910. [B, 81.]—**Tuberous-rooted c.** The *Carum* (*Bunium*) *bulbocastanum.* [B, 275.]—**Wild c.** The *Anthriscus silvestris* and *Cacalia atriplicifolia.* [B, 275.]

CARAY-CHEDDY (Tamil), n. The *Webera tetrandra.* [B, 172.]

CARBACETOXYLIC ACID, n. Ka^{3}rb-a^{2}s-e^{2}t-o^{2}x-i^{2}l'i^{2}k. Fr., *acide carbacétoxylique.* A monobasic acid, $C_3H_4O_4 = CH_2(OH) - CO - CO.OH$, isomeric with malonic acid, formedby heating silver oxide in excess with β-chlorpropionic acid. [Wichelhaus (B, 2).]

CARBACETYLIC ACID, n. Ka^{3}rb-a^{2}s-e^{2}t-i^{2}l'i^{2}k. Fr., *acide carbacétylique.* Pyroracemic acid. [Wichelhaus (B, 2).]

CARBALLINO (Sp.), n. Ka^{3}rb-a^{3}l-ye'no. A place in Galicia, Spain, where there are springs containing sodium sulphide. [A, 319.]

CARBALLO (Sp.), n. Ka^{3}rb-a^{3}l'yo. A place in Corunna, Spain, where there are sulphurous springs. [A, 319.]

CARBALLYLIC ACID, n. Ka^{3}rb-a^{2}l-i^{2}l'i^{2}k. Fr., *acide carballylique.* Of Kekulé, tricarballylic acid. [B, 3.]

CARBAMATE, n. Ka^{3}rb'a^{2}m-at. Fr., *c.* Ger., *Carbamat.* A salt of carbamic acid, of the general formula $(NH_2 - CO - O)_nR$, R being a radicle of the quantivalence *n.* C's of the compound radicles (ethereal c's) are called also urethanes. [B.]

CARBAMIC, adj. Ka^{3}rb-a^{2}m'i^{2}k. Fr., *carbamique.* Ger., *Carbamin-.* Of or derived from carbamide. [B.]—**C. acid.** Fr., *acide carbamique.* Ger., *Carbaminsäure.* An amic acid, $CO_2NH_3 = NH_2 - CO.OH$, derived from carbamide by the substitution of hydroxyl for amidogen; known by its salts. [B, 2, 3, 4.]—**C. ether.** See Urethane.

CARBAMID (Ger.), n. Ka^{3}rb-a^{3}m-ed'. See Carbamide.—**C'kohlensäure, C'säure.** See Carbamic *acid.*

CARBAMIDATUS (Lat.), adj. Ka^{3}rb-a^{2}m(a^{3}m)-i^{2}d-a(a^3)'tu^{3}s-(tu^{4}s). Combined with or containing carbamide; converted into a carbamide. [B.]

CARBAMIDE, n. Ka^{3}rb'a^{2}m-i^{2}d(id). For deriv., see Carbon and Amide. Fr., *c.* Ger., *Carbamid.* Urea, because it may be regarded as an amide of carboxyl; also, as a generic term, a urea or a compound of urea with a radicle. [B.]—**C'carbanilide.** Phenylurea. [B, 2.]—**Seleno-c.** See the major list.

CARBAMIDODRACYLIC ACID, n. Ka^{3}rb-a^{2}m''i^{2}d-o-dra^{2}s-i^{2}l'i^{2}k. Fr., *acide carbamidodracylique.* See Carboxamidobenzoic acid.

CARBAMIN (Ger.), n. Ka^{3}rb-a^{3}m-en'. See Carbamine.—**C'säure.** Carbamic acid. [B, 270.]

CARBAMINE, n. Ka^{3}rb'a^{2}m-en. For deriv., see Carbon and Amine. Fr., *c*. Ger., *Carbamin*. See Carbammonium.

CARBAMMONIUM (Lat.), n. n. Ka^{3}rb-a^{2}m(a^{3}m)-mon'i^2-u^{3}m-(u^{4}m). For deriv., see Carbon and Ammonium. Isocyanogen, so called because it may be regarded as ammonium in which the quadrivalent carbon replaces 4 atoms of hydrogen; in composition, an isocyanide. [B, 4.]

CARBANHYDRIDE, n. Ka^{3}rb-a^{2}n-hid'ri^{2}d(rid). Carbon dioxide. [B, 2.]

CARBANIL, n. Ka^{3}rb'a^{2}n-i^{2}l. For deriv., see Carbon and Aniline. Lat., *carbanilium*. Phenyl isocyanate, so called because it may be regarded as aniline in which carboxyl replaces hydrogen. [B, 158; L, 81.]

CARBANILAMIDE, n. Ka^{3}rb-a^{2}n-i^{2}l'a^{2}m-i^{2}d(id). For deriv., see Carbon, Aniline, and Amide. Phenylurea, so called because it may be regarded as the amide of carbanilic acid. [B, 3.]

CARBANILATE, n. Ka^{3}rb-a^{2}n'i^{2}l-at. A salt of carbanilic acid, of the general formula $[N(C_6H_5)H - CO - O]_nR$, R being a radicle of the quantivalence *n*. C's of the compound radicles (ethereal c's, carbanilic ethers) are called also phenylurethanes. [B, 3.]

CARBANILETHANE, n. Ka^{3}rb''a^{2}n-i^{2}l-e^{2}th'an. For deriv., see Carbanilic *acid* and Ethane. Fr., *carbaniléthane*. Ger., *Carbanilätban*. Ethyl phenylcarbamate (carbanilate), phenylurethane. [B, 2.]

CARBANILIC, adj. Ka^{3}rb-a^{2}n-i^{2}l'i^{2}k. Fr., *carbanilique*. Ger., *Carbanil-*. Derived from carbon and aniline. [B.]—**C. acid.** Fr., *acide carbanilique*. Ger., *Carbanilsäure*. Phenylcarbamic (anthranilic) acid; a monobasic carbon acid, $H_7C_7NO_2 = N(C_6H_6)H - CO.OH$, derived from aniline by the substitution of carboxyl for hydrogen, known only by its salts. [B, 3.]—**C. ether.** Fr., *éther carbanilique*. Ger., *Carbanilsäure-Ester*, *Carbanilsäure-Aether*. A salt compounded of c. acid and a compound radicle, a phenylurethane; used without qualification, ethyl carbanilate. [B.]

CARBANILIDE, n. Ka^{3}rb-a^{2}n'i^{2}l-i^{2}d(id). Fr., *c*. Ger., *Carbanilid*. The anilide of carbonic acid; diphenylurea. [B, 3.]

CARBANILIUM (Lat.), n. n. Ka^{3}rb-a^{2}n(a^{3}n)-i^{2}l'i^2-u^{3}m(u^{4}m). See Carbanil.

CARBASA (Lat.), n., heterocl. n. pl. of *carbasus* (*q. v.*). Ka^{3}rb'-a^{2}s(a^{3}s)-a^3.

CARBASEUS (Lat.), **CARBASINEUS** (Lat.), **CARBASINUS** (Lat.), adj's. Ka^{3}rb-a(a^3)'se^2-u^{3}s(u^{4}s), -a^{2}s(a^{3}s)-i^{2}n'e^2-u^{3}s(u^{4}s), -a^{2}s-(a^{3}s)'i^{2}n-u^{3}s(u^{4}s). Made of flax or linen. [B.]

CARBASUS (Lat.), n. f. Ka^{3}rb'a^{2}s(a^{3}s)-u^{3}s(u^{4}s). Gr., κάρπασος (from Sanscr. *karpása*, cotton). Anciently, a fine kind of flax grown in Spain, also picked lint, or charpie, and cotton or the cotton-plant; as now used, a fabric, especially linen cloth, sail-cloth, and surgical gauze. [A, 311, 312, 322; Scribonius Largus (A, 325); B, 121.] See *C.* acidi carbolici.

CARBAZOL, n. Ka^{3}rb'a^{2}z-o^{2}l. For deriv., see Carbon and Azote. Diphenylimide. [B, 158.]

CARBAZOLINE, n. Ka^{3}rb-a^{2}z'o^{2}l-en. A crystalline base, $C_{12}H_{15}N$, derived from carbazol by the action of hydriodic acid in the presence of amorphous phosphorus. [B, 2.]

CARBAZOTATE, n. Ka^{3}rb-a^{2}z'ot-at. See Picrate.

CARBAZOTE, n. Ka^{3}rb'a^{2}z-ot. Ger., *Carbazot*. Of Thanlow, a gas of peculiar odor evolved from silver cyanide, thought by him to be isomeric, but not identical, with cyanogen; highly irritant to mucous surfaces. [B, 2.]

CARBAZOTIC ACID, n. Ka^{3}rb-a^{2}z-o^{2}t'i^{2}k. Lat., *acidum carbazoticum*. Fr., *acide carbazotique*. Ger., *Kohlenstickstoffsäure* [Liebig], *Carbazotsäure*. Of Liebig, picric acid. [B, 3.]

CARBÉ (Fr.), n. Ka^{3}rb-a. The *Cannabis sativa*. [B, 173.]

CARBENGA, n. The *Zingiber zerumbet*. [B, 121.]

CARBENI [Adanson], n. See Carbenia.

CARBENIA (Lat.), n. f. Ka^{3}rb-en(an)'i^2-a^3. Of Adanson, a genus of composite plants, made by A. Gray a section of *Centaurea*. [B, 42, 215.]—**C. benedicta.** The *Centaurea benedicta*. [B.]

CARBERRY, n. Ka^{3}r'be^{2}r-i^2. The *Ribes grossularia*. [B, 19, 275.]

CARBETHYLIC ACID, n. Ka^{3}rb-e^{2}th-i^{2}l'i^{2}k. Fr., *acide carbéthylique*. See Ethyl*carbonic acid*.

CARBHYDRAT (Ger.), n. Ka^{3}rb-hu^{6}d-ra^{3}t'. See Carbohydrate.

CARBI (Hind.), n. The *Sorghum vulgare*. [B, 172.]

CARBIDE, n. Ka^{3}rb'i^{2}d(id). For deriv., see Carbon and *-ide*.* Lat., *carbidum*, *carburum*, *carburetum*. Fr., *carbure*. A compound formed by the union of carbon directly with an element or radicle. The name is usually restricted to such compounds formed with the metallic elements. The acetylides (*q. v.*) are c's of a peculiar constitution. [B.]

CARBIMIDE, n. Ka^{3}rb'i^{2}m-i^{2}d(id). For deriv., see Carbon and Imide. Fr., *c*. Ger., *Carbimid*. Isocyanic acid, $CO = N - H$, regarded as an imide of carboxyl; also an isocyanate, which may be regarded as c. in which a radicle replaces hydrogen. [B.]

CARBIMIDODIAMIDE, n. Ka^{3}rb-i^{2}m''i^{2}d-o-di'a^{2}m-i^{2}d(id). Guanidine, regarded as a combined imide and diamide of carbon. [B, 158.]

CARBINOL, n. Ka^{3}rb'i^{2}n-o^{2}l. For deriv., see Carbon and *-ol*.* Of Kolbe, any monatomic alcohol formed by the substitution of one or more hydrocarbon radicles for the radical hydrogen of methyl alcohol, which is itself often called c., the other members of the series being designated by a prefix indicating the substituted radicle. Thus, methylc' is $CH_2(CH_3).OH$, methylethylc' is $C(CH_3)-C_2H_5)H.OH$, etc. C's in which there is but one replacing radicle, having therefore the general constitution $CH_2(C_nH_{2n+1}).OH$, are primary alcohols (or primary c's), since the carbon atom belonging to the c. molecule $CH^2.OH$ is attached directly to but one other atom of carbon (the last one in the chain C_nH_{2n+1}). For a similar reason, c's containing 2 substituted radicles, having the general formula $CH(C_nH_{2n+1})(C_mH_{2m+1}).OH$, are secondary alcohols (secondary c's), and c's of the formula $C(C_pH_{2p+1})(C_mH_{2m+1})(C_nH_{2n+1})-.OH$, containing 3 substituted radicles, are tertiary alcohols (tertiary c's). [B, 2, 3, 4.]

CARBINYL, n. Ka^{3}rb'i^{2}n-i^{2}l. The radicle of a carbinol; the univalent radicle formed from a carbinol by the suppression of the alcoholic hydroxyl. The term is used chiefly in composition (*e. g.*, propylmethylc' = $C(C_3H_7)(CH_3)H'$). [B, 2.]

CARBO (Lat.), n. m. Ka^{3}rb'o. Gen., *carbo'nis*. 1. A coal, charcoal (dead or burning), also carbon. 2. See Anthrax (2d def.). [B.]—**C. animalis.** 1. Of the U. S. Ph., Br. Ph., Gr. Ph., and Belg. Ph., animal charcoal prepared by burning bones. 2. Of the Finn. Ph., Russ. Ph., and Ger. Ph. (1st ed.), that made by burning flesh. [B, 95.]—**C. animalis depuratus** (seu **præparatus** [Gr. Ph.], seu **purificatus** [U. S. Ph., Br. Ph.]). See *Purified animal* charcoal.—**C. carnis** [Finn. Ph., Ger. Ph. (1st ed.), Russ. Ph.]. See *C. animalis* (2d def.).—**C. e ligno.** Wood charcoal. [B, 81.]—**C. fossilis.** Mineral coal. [L, 119.]—**C. fuci vesiculosi.** Syn.: *æthiops vegetabilis*. Charcoal made from sea-wrack (*Fucus vesiculosus*), containing a small amount of iodine and other inorganic substances; formerly used as an application to scrofulous swellings. [B, 46, 59, 78.]—**C. hirudinis.** Charcoal obtained by burning the swallow; used medicinally by the ancients. [B, 45.]—**C. lapideus.** Mineral coal. [B, 88.]—**C. ligni.** Of the U. S. Ph., Br. Ph., Belg. Ph., and Finn. Ph., see *Wood* charcoal; of the Swiss Ph., Netherl. Ph., and Fr. Cod., see *Pulverized wood* charcoal.—**C. ligni depuratus.** Of the Belg. Ph., see *Prepared wood* charcoal; of the Austr. Ph. and Hung. Ph., see *Pulverized wood* charcoal.—**C. ligni præparatus.** Of the Norweg. Ph., see *Prepared wood* charcoal; of the Dan. Ph., Swed. Ph., and Finn. Ph., see *Pulverized wood* charcoal.—**C. ligni pulveratus** [Ger. Ph., Russ. Ph.]. See *Pulverized wood* charcoal.—**C. mineralis.** See *C. lapideus*.—**C. ossium** [Fr. Cod., Netherl. Ph.]. See *C. animalis* (1st def.).—**C. ossium acido depuratus** [Fr. Cod.], **C. ossium depuratus** [Belg. Ph.]. See *Purified animal* charcoal.—**C. palpebræ.** See Anthracosis (1st def.).—**C. petræ.** See *C. lapideus*.—**C. pilæ marinæ.** Fr., *charbon de pelotes de mer*. Charcoal made by burning the *Ceramium ægagropilum*; used like c. fuci vesiculosi. [B, 119.]—**C. præparatus** [Pruss. Ph. (6th ed.)]. See *Prepared wood* charcoal.—**C. pulveratus.** See *Pulverized wood* charcoal.—**C. purificatus.** See *Purified animal* charcoal.—**C. sphæræ marinæ.** See *C. pilæ marinæ*.—**C. spongiæ.** Fr., *charbon d'éponge*. Ger., *Schwammkohle*. Syn.: *spongiæ ustæ*. Charcoal made by burning sponges; a nearly odorless, brownish-black powder of a salty taste, containing more or less iodine according to the degree of heat employed in the process. [B, 119, 270.] Cf. *C. fuci vesiculosi*.—**C. suberis.** Ger., *Korkkohle*. Charcoal made by burning cork. [B, 180.]—**C. vegetabilis** [Gr. Ph.]. See *Wood* charcoal.—**C. vegetabilis præparatus** [Gr. Ph.]. See *Pulverized wood* charcoal.—**C. vegetalis.** See *Wood* charcoal.—**Cataplasma carbonis** [Br. Ph.]. Charcoal poultice; made by soaking 2 oz. (av.) of bread-crumb in 10 fl. oz. of warm water, adding ½ oz. of wood charcoal and 1½ oz. of linseed meal, and stirring till the mass has the proper consistence; used as a deodorizing application. [B.] Cf. Cataplasma *carbonaceum*.—**Pulvis carbonis vegetalis** [Fr. Cod.]. See *Poudre de* charbon *vegetal*.—**Tabellæ cum carbone** [Fr. Cod.]. See *Tablettes de* charbon.

CARBOAZOTIC ACID, n. Ka^{3}rb-o-a^{2}z-o^{2}t'i^{2}k. See Carbazotic acid.

CARBOBENZIDE, n. Ka^{3}rb-o-be^{2}nz'i^{2}d(id). See Benzophenone.

CARBOBENZOIC ACID, n. Ka^{3}rb-o-be^{2}nz-o'i^{2}k. Fr., *acide carbo-benzoïque*. Myroxylic acid. [B, 2.]

CARBOCINCHOMERONIC ACID, n. Ka^{3}rb-o-si^{2}n-ko-me^{2}r-o^{2}n'i^{2}k. Fr., *acide carbo-cinchoméronique*. Ger., *Carbocinchomeronsäure*. See Pyridine*tricarbonic acid*.

CARBOCINCHONIC ACID, n. Ka^{3}rb-o-si^{2}n-ko^{2}n'i^{2}k. Fr., *acide carbo-cinchonique*. A crystallizable acid, $C_{20}H_{14}N_2O_4$, obtained by decomposing cinchonine with potassium permanganate. [A, 308.]

CARBODIAMIDE, n. Ka^{3}rb-o-di'a^{2}m-i^{2}d(id). Fr., *c*. Ger., *Carbodiamid*. Urea regarded as a diamide of carboxyl. [B.]

CARBODIIMIDE, n. Ka^{3}rb-o-di'i^{2}m-i^{2}d(id). Fr., *c*. Ger., *Carbodiimid*. Syn.: *cardimide*. A double imide of carbon, $NH = C = NH$. [B, 158.] Cf. Cyanamide.

CARBODIPHENYLIMIDE, n. Ka^{3}rb-o-di-fe^{2}n-i^{2}l'i^{2}m-i^{2}d-(id). Fr., *carbo-diphénylimide*. Ger., *Carbodiphenylimid*. Syn.: *diphenylcyanamide*. A phenyl substitution derivative of carbodiimide, a syrupy liquid, $C_{13}H_{10}N_2 = C_6H_5.N = C = N.C_6H_5$, boiling at 330° C. [B, 4, 158.]

CARBODIPHENYLTRIAMINE, n. Ka^{3}rb-o-di-fe^{2}n-i^{2}l-tri'-a^{2}m-en. Fr., *carbo-diphényl-triamine*. Ger., *Carbodiphenyltriamin*. Diphenylguanidine. [B, 2.]

CARBOHÆMIA (Lat.), n. f. Ka^{3}rb-o(o^2)-hem'(ha^3'e^{2}m)-i^2-a^3. From *carbo*, carbon, and αἷμα, blood. More properly written *carbonæmia*. Fr., *carbonémie*, *carbonhémie*. An excessive presence of carbon compounds in the blood. [B; C.]

CARBOHYDRATE, n. Ka^{3}rb-o-hid'rat. Fr., *c*. Ger., *Carbohydrat*, *Carbhydrat*, *Kohlenhydrat*. It., *carbo-idrato*. Sp., *carbo-hidrato*. A compound of carbon with oxygen and hydrogen, the

latter elements being in the same proportion in which they unite to form water. In all compounds of this class thus far investigated the number of carbon atoms in the molecule is 6 or a multiple of 6. The c's are divided into several groups, of which the more important are the sugar group, comprising the saccharoses and glucoses, and the starch group, or amyloses. The saccharoses have the formula $C_{12}H_{22}O_{11}$, and comprise ordinary saccharose (cane-sugar), parasaccharose, lactose (milk-sugar), melezitose, melitose, trehalose, and maltose. These are all dextrorotary, are apparently ethers of the composition $(C_6H_{12}O_6)_2O$, and are converted into glucoses by boiling with dilute sulphuric acid. The glucoses, of the general formula $C_6H_{11}O_6$, comprise ordinary glucose (dextrose, grape-sugar), lævulose (fruit-sugar), galactose, arabinose, eucalyn, sorbin, inosite, scyllite, and dambose. They present some of the reactions of aldehydes, but are more probably combined ketones and alcohols of the constitution $C(OH)H_2 - CH(OH) - CH(OH) - CH(OH).CO.CH_2(OH)$. The amyloses have the general formula $(C_6H_{10}O_5)_n$, and comprise starch, dextrin, inulin, lævulin, glycogen, the gums, cellulose, and tunicin. They are converted into glucoses by treatment with acids. [B, 3.]

CARBOHYDRIC, adj. Ka^{3}rb-o-hid'ri^{2}k. Fr., *carbohydrique.* Containing carbon, hydrogen, and oxygen (said of acids). [L, 41.]

CARBOHYDROCHINONSÄURE (Ger.), n. Ka^{3}rb-o-hu^{6}d-ro-ch^{2}i^{2}n-on'zoir-e^2. See CARBOHYDROQUINONIC ACID.

CARBOHYDROGEN, n. Ka^{3}rb-o-hid'ro-je^{2}n. A hydrocarbon. [B, 2.]

CARBOHYDROQUINONIC ACID, n. Ka^{3}rb-o-hid-ro-kwi^{2}n-o^{2}n'i^{2}k. Fr., *acide carbohydroquinonique.* Ger., *Carbohydrochinonsäure.* Hydroxysalicylic acid. [B, 2.]

CARBOKETONIC ACID, n. Ka^{3}rb-o-ke-to^{2}n'i^{2}k. Fr., *acide carbo-kétonique.* Ger., *Carboketonsäure.* An acid compounded of a ketone and the carboxyl group CO.OH (*e. g.*, acetoacetic acid, $CH_3 - CO - CH_2 - CO.OH$). Such acids may also be regarded as carbon acids in which an acid radicle replaces hydrogen. [B, 158.]

CARBOL (Ger.), n. Karb-ol'. See PHENOL.—**C'gaze.** See *Carbolized* GAUZE.—**C'harn.** The condition of the urine produced by poisoning with carbolic acid. [L. Lewin (A, 319).] See CARBOLISM.—**C'jute.** Carbolized jute. [B, 270.]—**C'lint.** Carbolized lint. [B, 270.]—**C'öl.** Carbolized oil. [B.]—**C'säure.** Carbolic acid. [B.]—**C'säureglycerit.** See *Glycerinum* ACIDI CARBOLICI.—**C'säuresalbe.** See *Unguentum* ACIDI CARBOLICI.—**C'säurestuhlzäpfchen.** See *Suppositoria* ACIDI CARBOLICI.—**C'säurewasser.** See AQUA *carbolisata.*—**C'seife.** Carbolized soap. [L, 57.]—**C'vergiftung.** See CARBOLISM.—**C'wasser, Gelöste C'säure.** See AQUA *carbolisata.*—**Geseifte C'säurestuhlzäpfchen.** See *Suppositoria* ACIDI CARBOLICI *cum sapone.*—**Rohe C'säure.** See ACIDUM CARBOLICUM *crudum.*—**Verflüssigte C'säure.** See ACIDUM CARBOLICUM *liquefactum.*

CARBOLATE, n. Ka^{3}rb'o^{2}l-at. Lat., *carbolas, phenas.* Fr., *phénate, c.* Ger., *Carbolat, Phenat.* It., Sp., *carbolato, fenato.* A salt of so-called carbolic acid; a compound of phenol in which a base replaces the hydroxylic hydrogen, of the general formula $[C_6H_5.O]_nR$, R being a radicle of the quantivalence *n*. [B.]

CARBOLIC, adj. Ka^{3}rb-o^{2}l'i^{2}k. Lat., *carbolicus* (from *carbo* [*q. v.*], and *oleum*, oil), *phenicus, phenylicus.* Fr., *carbolique, phénique.* Ger., *Carbol-.* It., *carbolico, fenico.* Sp., *carbólico, fénico.* Contained in or derived from coal-tar oil. [B.]—**C. acid.** Lat., *acidum carbolicum* [U. S. Ph., Br. Ph., Ger. Ph., Austr. Ph., Hung. Ph.], *acidum carbolicum crystallisatum* [Russ. Ph.], *acidum phenicum* [Fr. Cod.] (seu *phœnicum* [Gr. Ph.], seu *phenylicum* [Dan. Ph., Netherl. Ph., Norweg. Ph., Swiss Ph.], seu *phenylicum depuratum* [Swed. Ph.]). Fr., *acide phénique* (ou *carbolique*), *phénol* [Fr. Cod.]. Ger., *Carbolsäure, Phenol, Kohlenölsäure* [Runge]. It., *acido carbolico* (o *fenico*), *fenolo.* Sp., *ácido carbólico* (ó *fénico*). Syn.: *phenic* (or *phenylic*) *acid, hydrogen phenate, phenyl hydrate* (or *alcohol*), *phenol, hydroxybenzene.* A substance of the composition $C_6H_5.OH$, that of benzene in which hydroxyl replaces hydrogen, produced in the distillation of coal-tar. It was discovered in 1834 by Runge, who gave it its present name. When pure, it forms colorless prismatic crystals of a peculiar empyreumatic odor and burning taste, melting at 40° or 41° C. and dissolving in 20 parts of water. It is readily soluble in alcohol, in ether, in chloroform, in glycerin, in carbon disulphide, and in the fixed and volatile oils. Applied locally, either pure or in strong solution, it acts as an irritant, causing a burning or tingling pain followed by anæsthesia; on a mucous or an abraded cutaneous surface it acts as a superficial caustic. Introduced into the system, either by the mouth or through an open surface, it acts as a powerful poison (see CARBOLISM). It coagulates albumin and is very destructive to the lower forms of animal and vegetable life; hence it is much used as an antiseptic and disinfectant. It is properly an alcohol, and, like other alcohols, admits of the replacement of its hydroxylic hydrogen by basic radicles, producing carbolates. It is the starting-point of the phenols, which are formed from it by the substitution of various hydrocarbons for the hydrogen of its phenyl radicle. [B, 3, 4, 5, 95.]—**C.-acid plant.** The *Gaultheria Leschenaultii.* [B, 275.]—**C.-acid poisoning.** See CARBOLISM.—**C.-acid water.** See AQUA *carbolisata.*—**Chlorinated c. acid.** Trichlorphenol. [B.]—**Crude c. acid.** See ACIDUM CARBOLICUM *crudum.*—**Glycerine of c. acid.** See *Glycerinum* ACIDI CARBOLICI.—**Ointment of c. acid.** See *Unguentum* ACIDI CARBOLICI.—**Suppositories of c. acid.** See *Suppositoria* ACIDI CARBOLICI.—**Suppositories of c. acid with soap.** See *Suppositoria* ACIDI CARBOLICI *cum sapone.*—**Trichlorinated c. acid.** Trichlorphenol. [B.]

CARBOLINEUM (Lat.), n. n. Ka^{3}rb-o^{2}l-i^{2}n'e^2-u^{3}m(u^{4}m). Of Avenarius, a dark brown liquid, probably a mixture of the heavier oils obtained from coal-tar, used for the preservation of wood. [B, 270.]

CARBOLISATIO (Lat.), **CARBOLISATUS** (Lat.), **CARBOLISÉ** (Fr.), **CARBOLISIRT** (Ger.), n. f., adj., adj., adj. Ka^{3}rb-o^{2}l-i^{2}z(i^{2}s)-a(a^3)'shi^2(ti^2)-o, -tu^{3}s(tu^{4}s), -ez-a, -ert'. Gen., *carbolisatio'nis.* See CARBOLIZATION and CARBOLIZED.

CARBOLISM, n. Ka^{3}rb'o^{2}l-i^{2}zm. Lat., *carbolismus.* Fr., *carbolisme.* Ger., *Carbolvergiftung.* The state of being poisoned with carbolic acid. The chief symptoms are feebleness of the pulse, which may be either accelerated or retarded, faintness, stertorous breathing, muscular weakness, and finally collapse. Vomiting, diarrhœa, vertigo, coma, general anæsthesia, and convulsions are also observed in some cases. The urine becomes dark-colored and in some cases nearly black, and shows a marked diminution or almost complete absence of sulphates. C. may be very acute, coming on immediately after the ingestion or application of carbolic acid and causing death within a very few hours, or it may be insidious in its onset, with symptoms lasting for several weeks. The latter form is due especially to the prolonged and continuous external application of the acid. The treatment consists in the removal of the acid and, in case it has been taken internally, the use of albuminous drinks, oil, saccharated lime-water, and a soluble sulphate. [B, 81.]

CARBOLIZATION, n. Ka^{3}rb-o^{2}l-i^{2}z-a'shu^{3}n. Lat., *carbolisatio.* Fr., *carbolisation.* Ger., *Carbolisiren.* It., *carbolizzazione.* Sp., *carbolización.* The act or process of carbolizing. [B.]

CARBOLIZE, v. tr. Ka^{3}rb'o^{2}l-iz. Fr., *carboliser, phéniquer.* Ger., *carbolisiren.* It., *carbolizzare.* Sp., *carbolizar.* To mix or bring into contact with carbolic acid; to treat a substance with carbolic acid in order to render it antiseptic. [B.]

CARBOLIZED, adj. Ka^{3}rb'o^{2}l-izd. Lat., *carbolisatus.* Fr., *carbolisé, phéniqué.* Ger., *carbolisirt.* It., *carbolizzato, fenicato.* Sp., *carbolizado, fenicado.* 1. Containing or combined with carbolic acid. 2. Treated with carbolic acid so as to be rendered aseptic or antiseptic. [B.]

CARBOMETHYLIC, adj. Ka^{3}rb-o-me^{2}th-i^{2}l'i^{2}k. Fr., *carbométhylique.* Carbonic and containing methyl. [B.]—**C. acid.** Fr., *acide carbométhylique.* See METHYLCARBONIC *acid.*—**C. ether.** Fr., *éther carbométhylique.* See ETHYL *methylcarbonate.*

CARBOMETHYLTRIAMINE, n. Ka^{3}rb-o-me^{2}th-i^{2}l-tri'a^{2}m-en. Fr., *carbo-méthyltriamine.* Ger., *Carbomethyltriamin.* Methylguanidine. [B, 2.]

CARBON, n. Ka^{3}rb'o^{2}n. Lat., *carboneum, carbonium, carbonum, carbo.* Fr., *carbone.* Ger., *Kohlenstoff.* It., *carbonio.* Sp., *carbono.* A non-metallic element occurring in nature uncombined, in the form of the diamond and in that of graphite. Combined with oxygen, it occurs to a small extent in the atmosphere, and in the form of organic compounds it is found in all animal and vegetable tissues. It is also found as a relic of extinct animal and vegetable organisms in the form of carbonates (chalk, coral, limestone) and of coal, and its occurrence in petroleum is probably of like origin. It is also produced (in the form of lamp-black, gas-c., or charcoal) by the incomplete combustion of animal or vegetable tissue. All varieties of c. are combustible, but in very different degrees of readiness, and under the action of heat they all unite with oxygen to form c. dioxide. In its chemical relations c. exhibits great stability. It is not attacked by acids and is not soluble in any liquid; neither can it be fused nor volatilized. In combination it shows like stability, silicon being almost the only element that expels it from its compounds. It is distinguished from all other elements by its remarkable capacity for combining with itself, so that even several hundreds of atoms may be linked together in a single molecule. From the fact that such compounds are the characteristic components of organized tissues, the term organic has been applied to the whole class of c. compounds. C. combines directly with hydrogen, forming the various series of hydrocarbons, which are characterized by the facility with which the hydrogen is replaceable by other elements or by radicles, thus giving rise to the alcohols, ethers, aldehydes, ketones, organic acids, etc. In composition c. acts as a quadrivalent radicle, replacing or combining with 4 atoms of hydrogen; atomic weight, 11·97; symbol, C. The term c. is also popularly used to denote something made of c., such as the c. plate in a galvanic battery and the c. pole of an apparatus for electric lighting. [B, 3, 4.] See CHARCOAL, DIAMOND, GRAPHITE, LAMPBLACK, and *Gas c.*—**C. acid.** See *Organic* ACID.—**C. bichloride.** Lat., *carboneum bichloratum.* Fr., *bichlorure de carbone.* See *C. tetrachloride.*—**C. binoxide.** Fr., *bioxyde de carbone.* See *C. dioxide.*—**C. bisulphide, C. bisulphuret.** See *C. disulphide.*—**C'blut** (Ger.). Charcoal impregnated with blood; used in the clarification of sugar. [B, 270.]—**C. bromide.** Fr., *bromure de carbone.* Ger., *Bromkohlenstoff.* A compound of c. and bromine. [B.] See *C. tetrabromide, C. chlorobromide,* and *C. oxybromide.*—**C. chloride.** Fr., *chlorure de carbone.* Ger., *Chlorkohlenstoff.* A compound of c. and chlorine. [B.] See *C. tetrachloride, C. dichloride, C. monochloride, C. chlorobromide,* and *C. oxychloride.*—**C. chlorobromide.** Fr., *chlorobromure de carbone.* Ger., *Chlorbromkohlenstoff.* Tetrachlordibromethane. [B, 158.]—**C. dibromide.** Fr., *dibromure* (ou *bibromure*) *de carbone.* Tetrabromethylene. [B, 2, 158.]—**C. dichloride.** Fr., *dichlorure* (ou *bichlorure*) *de carbone.* 1. Tetrachlorethylene. 2. C. tetrachloride (tetrachlormethane). [B, 2, 158.]—**C. dioxide.** Lat., *carbonei dioxidum, carboneum bioxydatum, acidum aereum* (seu *mephiticum*), *gas mephiticum.* Fr., *bioxyde* (ou *dioxyde*) *de carbone.* Ger., *Kohlendioxyd.* It., *diossido* (o *biossido*) *di carbonio.* Sp., *dióxido* (ó *bióxido*) *de carbono.* Syn.: *carbonic anhydride, aerial acid, mephitic* (or *fixed*) *air.* A colorless gas, CO_2, of a rather pungent acid odor and acid taste, often erroneously called carbonic acid or carbonic-acid gas; found as a constant constituent of the atmosphere, of which it forms about 4 parts by volume (6 by weight) in 10,000. It also occurs dissolved in considerable quantities in certain mineral waters, giving them their effervescence; and in some volcanic districts it is given off from clefts in the ground, from caves, and from volcanic craters. Its presence in the atmosphere or elsewhere is due to its production by the combustion of organic matter (coal, wood, etc.), by the respiration of animals, or by the decay of dead organic matter in the soil. Its accumulation in the atmosphere is

prevented by the continual decomposition which it undergoes in the processes of vegetable assimilation. The chlorophyll of plants has the property of decomposing it. the oxygen being set free and the c. taken up by the plant-cells. C. dioxide is very stable, parting with its oxygen only at a very high temperature, so that it is unfit to support respiration or combustion, although it does not seem to be directly poisonous when inhaled. Its sp. gr. is 1·542. It can readily be liquefied, and even obtained solid, by the combined use of cold and pressure. It dissolves in its own volume of water at ordinary temperatures and under a pressure of 1 atmosphere; by increased pressure several volumes may be dissolved in 1 volume of water, constituting the so-called soda-water, or carbonic-acid water (see *Aqua* ACIDI CARBONICI). Such an aqueous solution contains true carbonic acid. C. dioxide, by inhalation, has been recommended as a remedy for the dyspnœa and palpitation of phthisical subjects. ["N. Y. Med. Jour.," May 5, 1888, p. 494; B, 3.]—**C. disulphide.** Lat., *carbonei bisulphidum* [U. S. Ph.], *carboneum sulfuratum* [Ger. Ph. (1st ed.), Swiss Ph., Russ. Ph.] (seu *sulphuratum* [Gr. Ph.]), *sulphuretum carbonis* [Belg. Ph.]. Fr., *sulfure* [Fr. Cod.] (ou *bisulfure*) *de carbone*. Ger., *Schwefelkohlenstoff*. It., *solfuro di carbonio*. Sp., *sulfuro de carbono* [Sp. Ph.]. Syn.: *alcohol sulphuris*. A colorless, mobile liquid, CS_2, having when pure a sweetish, ethereal odor, but usually containing adventitious sulphur compounds which give it a very repulsive odor. At 0° C. it has a sp. gr. of 1·293, at 15° C. a sp. gr. of about 1·27 (1·272 [U. S. Ph.]); it boils at 46° or 47° C., it is highly volatile and inflammable, and its vapor, mixed with air, is very explosive. The inhalation of its vapor is said to produce various nervous, gastric, and other toxic symptoms. At about − 12° C. it solidifies into a snow-like cauliflower mass. It dissolves sulphur, phosphorus, iodine, oils, fats, and caoutchouc; hence it is much used in the arts. Its vapor is said to have decided antiseptic properties, and the substance itself has been employed as a local anæsthetic and anodyne. [B, 2, 3, 5, 81, 95.]—**C. hydrate.** Fr., *hydrate de carbone*. Ger., *Kohlenhydrat*. See CARBOHYDRATE.—**C. hydride.** Fr., *hydrure de carbone*. Ger., *Kohlenhydrür*. See HYDROCARBON.—**C. iodide.** Fr., *iodure de carbone*. Ger., *Jodkohlenstoff*. A compound of c. and iodine. [B.] See *C. tetraiodide*.—**C. monochloride.** Fr., *monochlorure de carbone*. Syn.: *c. protochloride*, *Julin's chloride of c.* A chloride of c., supposed to have the composition C_2Cl_2 (being that of dichloracetylene), obtained by passing the vapor of chloroform or of tetrachlorethylene through a red-hot tube. The body so formed is now known to be hexchlorbenzene. [B, 3, 158.]—**C. monoxide.** Fr., *monoxyde de carbone*. Ger., *Kohlenoxyd*. It., *monossido di carbonio*. Sp., *monóxido de carbono*. Syn.: *carbonic oxide*. A substance, CO, produced by the incomplete combustion of charcoal and other carbonaceous matter; a colorless, tasteless gas of a peculiar odor, readily inflammable, burning with a bluish flame. It acts as an energetic respiratory poison when inhaled, combining with the hæmoglobin of the blood to form a compound which will no longer take up oxygen. [B, 3.]—**C. monosulphide.** Fr., *monosulfure de carbone*. A maroon-colored, odorless, tasteless powder, CS, formed by the action of sunlight or of iron on c. disulphide. The existence of a substance of this composition has been denied. [B, 2, 158.]—**C. nitride.** Fr., *azoture de carbone*. Ger., *Kohlenstoffnitrür*. A compound of c. and nitrogen. Only one such compound, cyanogen, is known. Mellone, C_9N_{12}, is not a direct compound of nitrogen with c., but of tricyanogen with c. [B.]—**C. oxide.** Fr., *oxyde de carbone*. A compound of c. and oxygen. [B.] See *C. dioxide*, *C. monoxide*, and *C. suboxide*.—**C. oxybromide.** Fr., *oxybromure de carbone*. See CARBONYL *bromide*.—**C. oxychloride.** Fr., *oxychlorure de carbone*. Ger., *Kohlenoxydchlorid*. See CARBONYL *chloride*.—**C. oxysulphide.** Fr., *oxysulfure de carbone*. See CARBONYL *sulphide*.—**C. perchloride.** Fr., *perchlorure de carbone*. Hexchlorethane. [B, 2.]—**C. protochloride.** Fr., *protochlorure de carbone*. 1. Tetrachlorethylene. 2. C. monochloride (hexachlorbenzene). [B, 2, 3.]—**C. protosulphide.** Fr., *protosulfure de carbone*. See *C. monosulphide*.—**C. protoxide.** Fr., *protoxyde de carbone*. See *C. monoxide*.—**C'sauer** (Ger.). Of or pertaining to carbonic acid; with the name of a base, the carbonate of that base. [B.]—**C'säure** (Ger.). Carbonic acid. [B.]—**C'säuren** (Ger.). A generic term for the group of organic acids formed after the model of carbonic acid by the substitution of the carboxyl group CO.OH for hydrogen in a hydrocarbon. [B, 270.]—**C. selenide.** Fr., *séléniure de carbone*. Ger., *C'seleniür*. A compound of c. and selenium; a liquid, CSe_2, emitting very pungent, irritant vapors. It has not yet been obtained pure. [B, 2.]—**C. sesquichloride.** Fr., *sesquichlorure de carbone*. Ger., *Anderthalbchlorkohlenstoff*. Hexchlorethane. [B, 2, 4.]—**C. sesquiiodide.** See IODOFORM.—**C. sesquisulphide.** Fr., *sesquisulfure de carbone*. Ger., *Anderthalbschwefelkohlenstoff*. An amorphous brownish substance, C_2S_3. [B, 2.]—**C. spar.** Any native carbonate of analogous constitution to calcium carbonate (*e. g.*, magnesium carbonate). [L, 56.]—**C. subchloride.** Fr., *souschlorure de carbone*. See *C. monochloride*.—**C. suboxide.** Fr., *sous-oxyde de carbone*. A substance, perhaps C_4O_3, obtained by reducing c. monoxide with the galvanic current. [B, 2.]—**C'sulfid** (Ger.). C. disulphide. [B, 270.]—**C. sulphide.** Lat., *carbonei sulphidum*, *carboneum sulfuratum*. Fr., *sulfure de carbone*. Ger., *Schwefelkohlenstoff*, *Kohlensulfid*. A compound of c. and sulphur. See *C. disulphide*, *C. monosulphide*, *C. sesquisulphide*, and *C. oxysulphide*. Other sulphides of c. have been described, especially one of the composition C_5S_2, a blackish or reddish-brown, amorphous substance produced by the action of sodium on c. disulphide [Raale (B, 2)], and another of the composition C_8S_2. [Loew, cited in "Proc. of the Am. Pharm. Assoc.," xv, p. 207 (B).]—**C. sulphobromide.** Fr., *sulfobromure de carbone*. See THIOCARBONYL *bromide*.—**C. sulphochloride.** Fr., *sulfochlorure de carbone*. See THIOCARBONYL *chloride*.—**C. tetrabromide.** Fr., *tétrabromure de carbone*. Ger., *C'tetrabromür*. Tetrabrommethane. [B, 4.]—**C. tetrachlordibromide.** Fr., *tétrachloro-dibromure de carbone*. Ger., *C'tetrachlorürdibromür*. Tetrachlordibromethane. [B, 2.]—**C. tetrachloride.** Lat., *carbonei tetrachloridum*. Fr., *tétrachlorure de carbone*. Ger., *C'tetrachlorür*. Tetrachlormethane. [B.]—**C. tetraiodide.** Fr., *tétraiodure de carbone*. Ger., *C'tetrajodür*. Tetraiodomethane. [B.]—**C. tribromide.** Fr., *tribromure de carbone*. Ger., *C'tribromür*. Hexabromethane. [B, 158.]—**C. trichloride.** Fr., *trichlorure de carbone*. Ger., *C'trichlorür*. Hexachlorethane. [B, 158.]—**Gas-c.** Ger., *Retortengraphit*. A form of c. deposited in the retorts of gas-works; a very hard, amorphous, iron-gray substance, of the sp. gr. of 2·356; a good conductor of heat and electricity, and therefore used for the c. plates in some forms of the galvanic battery and the c. points of the electric light. [B, 3.]—**Gaseous oxide of c.** See *C. monoxide*. —**Julin's chloride of c.** See *C. monochloride*.

CARBON, n. The *Cordia decandra*. [B, 121.]

CARBONACEOUS, adj. Ka^{3}rb-o^{2}n-a'shu^{3}s. Lat., *carbonaceus*. Fr., *carbonacé*. Ger., *kohlig*. Of, pertaining to, or containing, coal or charcoal; in botany, resembling charcoal in hue or appearance. [B, 123.]—**C. acid.** See CARBON *dioxide*.

CARBONAJO (It.), n. Ka^{3}rb-on-a^3'yo. A name for various edible black and brownish *Agarici* and *Boleti*. [Micheli (B, 88, 121).]

CARBONAL (Fr.), n. Ka^{3}rb-on-a^{3}l. The caries of wheat. [B, 121.]

CARBONAMIDE, n. Ka^{3}rb-o^{2}n'a^{2}m-i^{2}d(id). Fr., *c.* Ger., *Carbonamid*. Of Dumas, normal ammonium carbonate, $(NH_4)_2$-CO_3, on the supposition that its formula was NH_2,CO,HO (old notation). [B, 98.]

CARBONAPHTHALIC ACID, n. Ka^{3}rb-o-na^{2}f(nap)-tha^{2}l'-i^{2}k. Fr., *acide carbo-naphtalique*. Ger., *Carbonaphtalsäure*. Naphthylcarbonic (naphthoic) acid. [B, 2.]

CARBONAPHTHOLIC ACID, n. Ka^{3}rb-o-na^{2}f(na^{2}p)-tho^{2}l'-i^{2}k. Fr., *acide carbonaphtolique*. Hydroxynaphthoic acid. [B, 2, 4.]

CARBONARIA (It.), n. Ka^{3}rb-o-na^3'ri^2-a^3. An edible species of *Boletus*. [B, 121.]

CARBONAS (Lat.), n. m., f., and n. Ka^{3}rb-on'a^{2}s(a^{3}s). Gen., *carbona'tis*. A carbonate. [B.]—**Balneum cum carbonate sodico** [Fr. Cod.]. See BALNEUM *alcalinum*.—**C. ammonicus.** Ammonium sesquicarbonate. CARBONATE, n. Ka³rb'o²n-at. Lat., *carbonas.* Fr., *c.* Ger., *Carbonat, carbonsaures Salz.* It., Sp., *carbonato.* A salt of carbonic acid. The *normal c's* (formerly called basic c's or subc's) have the general formula $R_2(CO_3)_n$, where R is a radicle of the quantivalence *n*, or $R(CO_3)_n$, where R is a radicle of the quantivalence 2*n*. The *acid c's* (hydric c's, hydrogen c's, bic's) have the general formula $R(HCO_3)_n$, where R is a radicle of the quantivalence *n*. In addition, various *basic c's*, formed by the substitution of a metallic oxide or hydrate for the hydrogen in carbonic acid, are known. According to some recent authors, these basic c's are to be regarded as the salts of an orthocarbonic acid, H_4CO_4, analogous to orthosilicic acid, the normal c's being regarded as the salts of metacarbonic acid, $H_2(CO)O_2$. [B, 2.]—**Acid c.** Lat., *bicarbonas.* Fr., *c. acide.* Ger., *saures Carbonat* (oder *carbonsaures Salz*). It., *carbonato acido.* Sp., *carbonato ácido.* A bicarbonate; a substitution compound of carbonic acid in which only one of its hydrogen atoms is replaced by a base. [B.] See *C.*—**Basic c.** Fr., *c. basique.* Ger., *basisches Carbonat* (oder *carbonsaures Salz*). It., *carbonato basico.* Sp., *carbonato básico.* Formerly a normal c.; as now used, a compound of a c. with the oxide or hydroxide of the same base. [B.] See *C.*—**C. barytique** (Fr.). Barium c. [B, 119.]—**C. calcaire** (Fr.), **C. calcique** (Fr.). Calcium c. [B, 119.]—**C. cuivrique** (Fr.). Cupric c. [B, 119.] See COPPER *c.*—**C. ferreux** (Fr.). Ferrous c. [B, 113, 119.] See IRON *c.*—**C. ferrico-potassique** (Fr.). Iron and potassium c. [B. 119.]—**C. magnésique** (Fr.). Magnesium c. [B, 119.]—**C. mercurique** (Fr.). Mercuric c. [B, 119.]—**Hydric c.** See *Acid c.*—**Hydrogen c.** 1. Carbonic acid. 2. See *Acid c.* [B.]—**Neutral c., Normal c.** Fr., *c. normal* (ou *neutre*). Ger., *normales* (oder *neutrales*) *Carbonat* (oder *carbonsaures Salz*). It., *carbonato normale.* Sp., *carbonato normal.* A substitution compound of carbonic acid in which all its hydrogen is replaced by a base. [B.] See *C.*—**Pilules de c. ferreux (selon la formule de Vallet)** [Fr. Cod.] (Fr.). See *Massa* FERRI *carbonatis.*

CARBONATED, adj. Ka³rb'o²n-at-e²d. Lat., *carbonatus.* Fr., *carboné.* Combined with or containing carbonic acid; converted into a carbonate. [B.]

CARBONCLE (Fr.), n. Ka³rb-o²n²kl. See ANTHRAX and CARBUNCLE.

CARBONCULAIRE (Fr.), **CARBONCULEUX** (Fr.), adj's. Ka³rb-o²n²-ku⁶l-a²r, -u⁵. See CARBUNCULAR.

CARBONE, n. Ka³rb'on. 1. An old form of *carbon* (*q. v.*). 2. A carbuncle. [B, 59.]

CARBONE (Fr.), n. Ka³rb-on. Carbon. [B.]—**Azoture de c.** See CARBON *nitride.*—**Bioxyde de c.** See CARBON *dioxide.*—**Bisulfure de c.** See CARBON *disulphide.*—**C. animale.** See *Animal* CHARCOAL.—**C. végétale.** Vegetable (wood) charcoal. [B.]—**Hydrate de c.** See CARBOHYDRATE.—**Hydriodure de c.** Iodoform. [A, 301.]—**Oxysulfure de c.** See CARBONYL *sulphide.*—**Sulfure de c.** [Fr. Cod.]. See CARBON *disulphide.*

CARBONÉ (Fr.), adj. Ka³rb-on-a. See CARBONATED.

CARBONÉMIE (Fr.), n. Ka³rb-on-a-me. See CARBOHÆMIA.

CARBONEOUS, adj. Ka³rb on'e²-u³s. See CARBONOUS.

CARBONEUM (Lat.), n. n. Ka³rb-on'e²-u³m(u⁴m). Carbon. [B.]—**Carbonei bisulphidum** [U. S. Ph.]. See CARBON *disulphide.*—**Carbonei tetrachloridum.** Carbon tetrachloride; tetrachlormethane. [B, 81.]—**C. bichloratum, C. chloratum.** Carbon tetrachloride, tetrachlormethane. [B, 81, 270.]—**C. sulfuratum, C. sulphuratum** [Gr. Ph.]. Carbon disulphide. [B, 95, 119.]—**C. trichloratum.** Hexchlorethane. [B, 270.]

CARBONEUX (Fr.), adj. Ka³rb-on-u⁵. See CARBONOUS.

CARBONGA, n. See CARBENGA.

CARBONHÉMIE (Fr.), n. Ka³rb-on-a-me. See CARBOHÆMIA.

CARBONIC, adj. Ka³rb-o²n'i²k. Lat., *carbonicus.* Fr., *carbonique.* Containing carbon. [B.]—**Anhydrous c. acid.** Carbon dioxide. [B.]—**C. acid.** Lat., *acidum carbonicum.* Fr., *acide carbonique.* Ger., *Kohlensäure, Carbonsäure.* A dibasic acid, $H_2CO_3 = CO{<}^{OH}_{OH}$, known only in aqueous solution; formed whenever carbon dioxide is dissolved in water. The name c. acid is often improperly given to carbon dioxide. Its aqueous solution is a colorless liquid of faintly acid reaction, which readily parts with any excess of dioxide and is hence effervescent. C. a. forms the series of salts called carbonates and bicarbonates. According to Watts, ordinary c. acid should be called metacarbonic acid, the basic carbonates being derived from an acid, H_4CO_4, which he calls orthocarbonic acid. [B, 2, 3.]—**C. anhydride.** Fr., *anhydride carbonique.* Ger., *Kohlensäure-Anhydrid.* The anhydride of c. acid; carbon dioxide. [B.]—**C. chloride.** Tetrachlormethane. [B, 2.]—**C. dioxide.** See CARBON *dioxide.*—**C. ether.** Fr., *éther carbonique.* Ger., *Carbonsäure-Aether, Carbonsäure-Ester.* An ethereal salt of c. acid, especially ethyl carbonate. [B, 2.]—**C. oxide.** Fr., *oxyde carbonique.* Ger., *Kohlenoxyd.* Carbon monoxide. [B.]—**Hydrated c. acid.** A compound of 1 molecule of c. acid and 8 molecules of water, which begins to dissociate unless kept below the freezing point of water and under a pressure of 12 atmospheres. [Wroblewski, "Lancet," Apr. 15, 1882.]

CARBONICUM (Lat.), n. n. Ka³rb-o²n'i²k-u³m(u⁴m). Carbon. [B.]—**C. sulfuratum** [Ger. Ph.]. Carbon disulphide. [B, 205.]

CARBONICUS (Lat.), adj. Ka³rb-o²n'i²k-u³s(u⁴s). Carbonic, containing carbon; with the name of a base, the carbonate of that base. [B.]

CARBONIDE, n. Ka³rb'o²n-i²d(id). 1. A carbide. 2. A mineral containing carbon, such as the carbides, the carbonates, etc. [B, 38, 158.] 3. Of Dulong, an oxalate deprived of its hydrogen by heat. [A, 301.]

CARBONIFEROUS, adj. Ka³rb-o²n-i²f'e²r-u³s. From *carbo,* carbon, and *ferre,* to bear. Fr., *carbonifère.* Containing carbon; producing carbon or coal. [B.]

CARBONILIC ACID, n. Ka³rb-o²n-i²l'i²k. See CARBANILIC ACID.

CARBONISATIO (Lat.), n. f. Ka³rb-on-i²z(i²s)-a(a³)'shi²(ti²)-o. Gen., *carbonisatio'nis.* See CARBONIZATION.

CARBONITE, n. Ka³rb'o²n-it. See OXALATE.

CARBONITRILE, n. Ka²rb-o-ni'tri²l. Cyanogen, $-C\equiv$; so called because regarded as a nitrogen derivative (nitrile) of carbon. [B, 4.]

CARBONITROTOLUIC ACID, n. Ka³rb-o-ni-tro-to²l-u²'i²k. See NITRODRACYLIC ACID.

CARBONIUM (Lat.), n. n. Ka³rb-on'i²-u³m(u⁴m). Carbon. [B, 81.]—**Carbonii bisulphuretum.** Carbon disulphide. [B, 81.]—**Carbonii tetrachloridum.** Carbon tetrachloride, tetrachlormethane. [B, 81.]

CARBONIZATION, n. Ka³rb-o²n-i²z-a'shu³n. Lat., *carbonisatio.* Fr., *carbonisation.* Ger., *Carbonisirung, Verkohlung.* 1. A charring, a conversion into charcoal. 2. The process of covering with a layer of charcoal by the action of heat or of strong sulphuric acid. [B, 270.]

CARBONNEL (Fr.), n. Sha³r-bon-e²l. In the Cévennes, the *Tricholoma terreus.* [B, 121.]

CARBONOÏDE (Fr.), adj. Ka³rb-on-o-ed. Resembling carbon; as a n. in the pl., c's, a family of metalloids, comprising carbon, boron, silicon, etc. [A, 385; L, 41.]

CARBONOMETER, n. Ka³rb-o²n-o²m'e²t-u⁵r. From *carbo,* carbon, and *μέτρον,* a measure. An apparatus for determining amounts of carbonic acid by its action on lime-water. [B.]

CARBONOMETRY, n. Ka³rb-o²n-o²m'e²t-ri². Fr., *carbonométrie.* The measurement of the amount of carbonic acid exhaled by the lungs. [Hervier and St.-Lager (A, 301, 385).]

CARBONOUS, adj. Ka³rb'o²n-u³s. Lat., *carbonosus.* Fr., *carboneux.* Containing carbon. [B.]—**C. acid.** Fr., *acide carboneux.* A name proposed for oxalic acid. [B.]—**C. oxide.** Carbon monoxide. [B, 2.]

CARBONSPATH (Ger.), n. Ka³rb-on'spa³t. Calc spar. [B, 180.]

CARBONUM (Lat.), n. n. Ka³rb-on'u³m(u⁴m). Carbon.—**C. sulfuratum** [Ger. Ph. (1st ed.), Swiss Ph., Russ. Ph.]. Carbon disulphide. [B, 95.]

CARBONUSNIC ACID, n. Ka²rb-o²n-u³s'ni²k. Ger., *Carbonusninsäure.* An acid, $C_{19}H_{16}O_7$, forming sulphur-colored crystals, derived from the *Usnea barbata* and other lichens. [Hesse (B, 2, 270).]

CARBONYL, n. Ka³rb'o²n-i²l. Fr., *carbonyle.* Ger., *C.* 1. A bivalent radicle, $(C = O)''$, which appears in the free state as carbon monoxide. 2. Of Berthelot, any member of a class of compounds comprising camphor, allylene oxide, diphenylene ketone, and perhaps suberone. The c's are peculiar aldehydes distinguished by the following reactions: 1. They unite directly with hydrogen to form alcohols. 2. They are derived from unsaturated hydrocarbons by the substitution of 1 atom of oxygen for 2 atoms of hydrogen in a molecule. 3. They unite with the elements of water to form monobasic acids. 4. They unite with 3 atoms of oxygen to form dibasic acids. [B, 2.]—**C. amyl and hydrogen sulphide.** See AMYL*thiocarbonic acid.*—**C. bromide.** Fr., *bromure de carbonyle.* Ger., *C'bromür.* Oxybromide of carbon; a gas of the composition $COBr_2$. [B, 3.]—**C. chloride.** Fr., *chlorure de carbonyle.* Ger., *C'chlorür, Chlorkohlensäure.* Phosgene gas, or oxychloride of carbon, $COCl_2$; of a peculiar, disagreeable, pungent odor, which at low temperatures condenses into a colorless liquid. [B, 3.]—**C. chloroplatinite.** Fr., *chloroplatinite de carbonyle.* A compound of c. with platinum dichloride. Several such compounds are known, having the composition $PtCl_2.CO, PtCl_2(CO)_2$ and $PtCl_2$-$(CO)_3$. [B, 3.]—**C. diacetamide.** A substance, $C_5H_8N_2O_3 = (CH_3.CO)HN-CO-NH(CH_3.CO)$, forming rhombic acicular crystals. [B, 2.]—**C'diamide.** Urea. [B, 270.]—**C. dibiuret.** A crystalline substance, $C_5H_8N_6O_5 = NH_2.CO.NH.CO.NH-CO-NH.CO.NH.CO.NH_2$, formed by heating biuret with liquid phosgene. [B, 2.]—**C. dicarbamide, C'harnstoff** (Ger.). See *C'urea.*—**C. sulphide.** Fr., *sulfure de carbonyle.* Ger., *C'sulfid.* Oxysulphide of carbon; a colorless, inflammable gas, COS, probably contained in several sulphur waters. [B, 3.]—**C'urea.** A microcrystalline powder, $C_3H_6N_4O = NH_2.CO.NH-CO-NH.CO.NH_2$, formed by the action of liquid phosgene on urea. [B, 2.]

CARBOPHENYLAMIDE, n. Ka³rb-o-fe²n-i²l'a²m-i²d(id). See DIPHENYL*carbamide.*

CARBOPYRROLAMIDE, n. Ka³rb-o-pi²r-o²l'a²m-i²d(id). Ger., *Carbopyrrolamid.* Syn.: *dipyromucamide* [Watts]. A crystalline body having the constitution of an amide of carbopyrrolic acid, $C_4H_4N,CONH_2 = C_5H_6N_2O$. [B, 3.]

CARBOPYRROLIC ACID, n. Ka³rb-o-pi²r-o²l'i²k. Fr., *acide carbopyrrolique.* Ger., *Carbopyrrolsäure.* A monobasic crystalline acid having the constitution of carbonic acid in which the residue of pyrrol takes the place of hydroxyl, $(C_4H_4N)-CO.OH = C_5H_5NO_2$. [B, 3.]

CARBOSTYRIL, n. Ka³rb-o-sti²r'i²l. Lat., *carbostyrilium.* Ger., *Carbostyril.* A substance, $C_9H_7NO = N(C_8H_7)(CO)$, formed by the action of ammonium sulphide on nitrocinnamic acid. [B, 2.]

CARBOSULFURE (Fr.), n. Ka^{3}rb-o-su^{6}lf-u^{6}r. Carbon disulphide. [B.]

CARBOSULPHIDE, CARBOSULPHURET, n's. Ka^{3}rb-o-su^{3}lf'i^{2}d(id), -u^2-re^{2}t. A compound of carbon and sulphur with a radicle. [B.]

CARBOTHIALDINE, n. Ka^{3}rb-o-thi-a^{2}ld'en. From *carbo*, carbon, θεῖον, sulphur, and *aldehyde* (*q. v.*). 1. A body, $(CnH_{2n})_2\text{-}N_2H_2CS_2$, consisting of a double molecule of an aldehyde radicle combined with 2 molecules of the radicle (NH)'' and a molecule of carbon disulphide, (CS_2). 2. Used without qualification, the body derived from the radicle of ordinary (acetic) aldehyde and having thus the composition $(C_2H_4)_2N_2H_2CS_2 = C_6-H_{10}N_2S_2$. It forms colorless crystals which are soluble in hot alcohol. [B, 5.]

CARBOTRIAMINE, n. Ka^{3}rb-o-tri'a^{2}m-en. Guanidine. [B, 158.]

CARBOTRIETHYLTRIAMINE, n. Ka^{3}rb-o-tri-e^{2}th-i^{2}l-tri'-a^{2}m-en. Triethylguanidine. [B, 2.]

CARBOTRIPHENYLTRIAMINE, n. Ka^{3}rb-o-tri-fe^{2}n-i^{2}l-tri'a^{2}m-en. Triphenylguanidine. [B, 2.]

CARBOVINATE, n. Ka^{3}rb-o-vin'at. An ethylcarbonate. [B, 2.]

CARBOVINIC ACID, n. Ka^{3}rb-o-vin'i^{2}k. Fr., *acide carbovinique*. Ethylcarbonic acid. [B, 2.]

CARBOVINOMETHYLIDE, n. Ka^{3}rb-o-vin-o-me^{2}th'i^{2}l-i^{2}d-(id). Ethyl methylcarbonate. [B, 2.]

CARBOXAMIDOBENZOIC ACID, n. Ka^{3}rb-o^{2}x-a^{2}m''i^{2}d-o-be^{2}nz-o'i^{2}k. Fr., *acide carboxamidobenzoïque*. An acid, $C_{16}\text{-}H_{12}N_2O_5 = C_7H_5.NHO_2 - CO - C_7H_5.NHO_2$, produced by the decomposition of uramidobenzoic acid. An isomeric modification, *carboxamidodracylic acid*, forming minute white acicular crystals, is derived from uramidodracylic acid. [B, 2.]

CARBOXYCINCHONIC ACID, n. Ka^{3}rb-o^{2}x-i^2-si^{2}n^2-ko^{2}n'-i^{2}k. Fr., *acide carboxycinchonique* [Wilm]. A feeble acid formed by the oxidation of cinchonine. [A, 301.]

CARBOXYHÆMOGLOBIN, n. Ka^{3}rb-o^{2}x-i^2-he^{2}m-o-glob'-i^{2}n. Fr., *carboxy-hémoglobine, hémoglobine oxycarbonique*. Ger., *Kohlenoxydhämoglobin*. A compound of hæmoglobin with carbon monoxide. It gives the blood a bright cherry-red color, paralyzes the respiratory function of the red corpuscles, and causes suffocation. Under the spectroscope it shows two absorption bands almost identical with those of oxyhæmoglobin, but their centres are several wave-lengths nearer the violet end of the spectrum. [J, 18, 99, 101.]

CARBOXYL, n. Ka^{3}rb-o^{2}x'i^{2}l. Fr., *carboxyle*. Ger., *C.* 1. Carbonyl. 2. The acid characteristic, CO.OH, of the organic acids. [B, 2.]—**C'amine.** A suffix which, when preceded by the name of a radicle, is indicative of an amine, or substituted ammonia, in which the hydrogen is replaced by that radicle and by c., an isocyanate. The formula of the c'amines is $R' - N = C = O$. [B.]—**C'phenylimide.** Ger., *C'phenylimid*. An imide of c., $CO = NH -$, in which the hydrogen is replaced by phenyl ; phenyl pseudocyanate, $CO.N(C_6H_5)$. [B, 4.]—**C'säure** (Ger.). Carboxylic acid. [B, 4.]

CARBOXYLATE, n. Ka^{3}rb-o^{2}x'i^{2}l-at. Ger., *Carboxylat*. A salt of carboxylic acid. [B, 3.]

CARBOXYLIC, adj. Ka^{3}rb-o^{2}x-i^{2}l'i^{2}k. Fr., *carboxylique*. Derived from or containing carboxyl. [B.]—**C. acid.** Fr., *acide carboxylique*. Ger., *Carboxylsäure*. A tetrabasic acid, $C_{10}H_4O_{10}$, known only through its salts, the carboxylates. [B, 3.] See also DIHYDROCARBOXYLIC ACID and TRIHYDROCARBOXYLIC ACID.

CARBOXYLIMIDE, n. Ka^{3}rb-o^{2}x-i^{2}l'i^{2}m-i^{2}d(id). Pseudocyanic acid, $H - N = C = O$, which may be regarded as an imide of carboxyl ; *i. e.*, a molecule of ammonia (NH_3) in which 2 atoms of hydrogen are replaced by the bivalent radicle CO'', carboxyl (carbonyl) ; or as the acid characteristic carboxyl, CO.OH, in which NH replaces OH.

CARBOY, n. Ka^{3}r'boi. Turk., *karaboya*. A large globular bottle, inclosed in basket-work and usually protected by a wooden box ; used especially for the storage and transportation of corrosive liquids. [α, 17.]

CARBUNCLE, n. Ka^{3}rb'u^{3}n^{2}kl. Gr., ἄνθραξ (2d def.). Lat., *carbunculus*. Fr., *charboncle* (1st def.), *gros rubis* (2d def.), *escarboncle* (2d def.). Ger., *Kohlenbeule* (1st def.), *Carbunkel* (1st def.), *Granat* (2d def.), *Carfunkel* (2d def.). 1. See ANTHRAX (2d def.). 2. A precious stone, so called because deep red and looking in sunlight like a glowing coal, consisting chiefly of alumina (corundum) variously colored. Under this head were formerly included the sapphire, ruby, oriental amethyst, and topaz. [B, 180.]—**Berry c.** See TERMINTHUS.—**Contagious c.** See *Contagious* ANTHRAX.—**Facial c.** A c. generally seated on the lip and attended by severe local and constitutional symptoms. It should not be confounded with malignant pustule. [Reverdin, "Arch. gén. de méd.," 1870 (E).]—**Fungous c.** See CARBUNCULUS *fungodes*.—**Malignant c.** See *Contagious* ANTHRAX.—**Malignant facial c.** An extremely fatal disease, appearing generally on the lip, running a very rapid course, and peculiarly prone to attack young adults. It is often confounded with malignant pustule, but differs from it in its rapidly progressive gangrene and purulent infiltration, in the greater liability to extensive venous thrombosis, and in the absence of inoculation from a known specific source. [E, 25.]

CARBUNCLED, adj. Ka^{3}rb'u^{3}n^{2}kld. Affected with carbuncle.

CARBUNCULAR, CARBUNCULATE, adj's. Ka^{3}rb-u^{3}n^{2}k'-u^{2}l-a^{3}r, -at. Lat., *carbuncularis, carbunculatus, carbunculosus*. Fr., *carbonculaire, charbonculeux, charbonneux*. Ger., *karbunkulös, milzbrandig*. 1. Resembling or of the nature of carbuncle, anthracoid. 2. Affected with rosacea. [L, 325.]

CARBUNCULATION, n. Ka^{3}rb-u^{3}n^{2}k-u^{2}l-a'shu^{3}n. Gr., ἀνθράκωσις. Lat., *carbunculatio*. Ger., *Karbunkelbildung* (1st def.), *Brandigwerden* (2d def.), *Augenlidbrand* (3d def.). 1. The formation of a carbuncle. 2. Gangrenescence. [A, 322.] 3. Of the eye (*carbunculatio oculi*), see BLEPHARANTHRACOSIS. 4. A blighting of the buds of plants produced by excessive heat or cold. [L, 56.]

CARBUNCULOID, adj. Ka^{3}rb-u^{3}n^{2}k'u^{2}l-oid. From *carbunculus*, a carbuncle, and εἶδος, resemblance. See CARBUNCULAR.

CARBUNCULOSEPILZ (Ger.), n. Ka^{3}rb-un^{2}k-ul-oz'e^2-pi^{2}ltz. An undescribed fungus found in anthracosis. [A, 396.]

CARBUNCULOSIS (Lat.), n. f. Ka^{3}rb-u^{3}n^{2}k(u^{4}n^{2}k)-u^{2}l(u^{4}l)-o'-si^{2}s. Gen., *carbunculo'seos (-is)*. See ANTHRACOSIS.

CARBUNCULOUS, adj. Ka^{3}rb-u^{3}n^{2}k'u^{2}l-u^{3}s. Lat., *carbunculosus*. See CARBUNCULAR.

CARBUNCULUS (Lat.), n. m. Ka^{3}rb-u^{3}n^{2}k(u^{4}n^{2}k)'u^{2}l(u^{4}l)-u^{3}s-(u^{4}s). Dim. of *carbo*, a live coal. See CARBUNCLE and ANTHRAX.—**C. alabandicus.** An old name for a certain blackish and yellow mineral. [A, 325.]—**C. anginosus.** See ANGINA *carbuncularis*.—**C. bulbi.** Carbuncular inflammation of the eye. [L, 135.]—**C. contagiosus, C. epidemicus.** See *Contagious* ANTHRAX.—**C. epizooticus.** See *Malignant* PUSTULE.—**C. fungodes.** Fungous carbuncle ; a chronic affection characterized by small inflammatory tumors on the head or the trunk, which break at the apex, forming openings from which fungous masses protrude, covered with a purulent discharge or with dirty-brown crusts, and slow to heal. [Struve (G, 33).]—**C. gallicus.** See ANTHRAX *gallicus*.—**C. hungaricus.** See *Contagious* ANTHRAX and PEMPHIGUS *Hungariæ gangrænosus*.—**C. magnus, C. malignus.** See *Contagious* ANTHRAX.—**C. oculi.** See ANTHRACOSIS (1st def.).—**C. palpebrarum.** See BLEPHARANTHRACOSIS.—**C. pestilentialis.** See *Contagious* ANTHRAX.—**C. rubinus.** A red, shining, and transparent stone, from the Isle of Ceylon ; formerly employed in medicine as a preservative against several poisons, the plague, etc. [G, 16.]—**C. septentrionalis.** See ANTHRAX *malignus sibiricus*.—**C. septicus.** See *Contagious* ANTHRAX.—**C. simplex, C. sporadicus.** Fr., *charbon sporadique*. See ANTHRAX (2d def.).—**C. symptomaticus.** Fr., *charbon symptomatique*. 1. Anthrax observed during the plague, either as a symptom of the disease or as an epiphenomenon. [G, 7.] 2. Anthrax of the skin occurring as a symptom of febris carbunculosa (*q. v.*, under FEBRIS).—**C. ulcusculosus.** See ANGINA *carbuncularis*.—**C. vulgaris.** See ANTHRAX (2d def.).

CARBUNKEL (Ger.), n. Ka^{3}rb'un^{2}k-e^{2}l. See ANTHRAX and CARBUNCLE.—**Augenc'.** See ANTHRACOSIS (1st def.).

CARBURAS (Lat.), n. f. Ka^{3}rb'u^2(u^4)-ra^{2}s(ra^{3}s). Gen., *carburat'is*. A carbide. [B.]—**C. ferri.** Graphite. [B, 180.]

CARBURATION, n. Ka^{3}rb-u^2-ra'shu^{3}n. Fr., *c.* Ger., *Carburiren*. An operation by which carbon is added to iron to change it into cast-iron ; or to gases, to increase their illuminating power. [L, 41.]

CARBURE (Fr.), n. Ka^{3}rb-u^{6}r. A carbide. [B, 38.]

CARBURÉ (Fr.), adj. Ka^{3}rb-u^{6}r-a. See CARBURETED.

CARBUREIC ACID, n. Ka^{3}rb-u^2-re'i^{2}k. Allophanic acid. [B, 2.]

CARBURET, n. Ka^{3}rb'u^2-re^{2}t. Lat., *carburetum*. A carbide. [B.]

CARBURETED, adj. Ka^{3}rb'u^2-re^{2}t-e^{2}d. Combined with or containing carbon. [B.]

CARBURINE (Fr.), n. Ka^{3}rb-u^{6}r-en. Commercial carbon disulphide. [B, 270.]

CARBURUM (Lat.), n. n. Ka^{3}rb-u^2(u)'ru^{3}m(ru^{4}m). A carbide. [B.]

CARBYL, n. Ka^{3}rb'i^{2}l. Fr., *carbyle*. 1. Matter as a principle of being. [L, 73.] 2. A name often applied to carbon regarded as a radicle, in compound chemical names. [B.]—**C'schwefelsäure** (Ger.). Ethionic acid. [B, 48.]—**C. sulphate.** Of Magnus, the sulphacetylic acid of Regnault ; ethionic anhydride. [B, 2, 3.]

CARBYLAMINE, n. Ka^{3}rb-i^{2}l'a^{2}m-en. Fr., *c.* Ger., *Carbylamin*. Hydrocyanic acid, HCN, on the supposition that its formula is $HN = C$, carbon in this case being conceived to be a diad. [B, 6.]—**C. hydrochloride.** Ger., *Chlorwasserstoffcarbylamin*. A substance having the composition $HN{<}^{C}_{HCl}$. [B, 6.]

CARBYLIC, adj. Ka^{3}rb-i^{2}l'i^{2}k. Of or containing carbyl. [B.]

CARCA (Sp.), n. Ka^{3}r'ka^3. The *Rubus cæsius*. [B, 121.]

CARCADANA (Lat.), n. f. Ka^{3}r-ka^{2}d(ka^{3}d)-a(a^3)'na^3. Of Apuleius, the *Ranunculus sceleratus*. [B, 121.]

CARCADET (Fr.), **CARCAILLOT** (Fr.), n's. Ka^{3}r-ka^3-da, -ka^3-el-yo. The *Tetrao coturnix*. [L, 105.]

CARCANIÈRES (Fr.), n. Ka^{3}r-ka^{3}n-i^2-e^{2}r. A place in the department of Ariège, France, where there are sulphurous saline springs. [L, 49.]

CARCAPULI, CARCAPULLI, n's. In India, a tree (probably a *Garcinia*) producing gamboge. [B, 38, 121.]

CARCAROS (Lat.), **CARCARUS** (Lat.), n's m. Ka^{3}r'ka^{2}r(ka^{3}r)-o^{2}s, -u^{3}s(u^{4}s). Gr., κάρκαρος (from καρκαίρειν, to tremble). See QUERQUERA and *Intermittent* FEVER.

CARCAX, n. An old name for a sort of poppy having a very large head. [Hartmannus (A, 325).]

CARC-BŒUF (Fr.), n. Ka^{3}rk-bu^{5}f. See ARRESTA BOVIS.

CARCER (Lat.), n. m. Ka^{3}r'su^{5}r(ke^{2}r). Gen., *car'ceris*. Lit., a prison ; of Paracelsus, a remedy having a restraining effect on disordered muscular movements (as in chorea) or on deranged actions of the mind. [A, 325.]

CARCERULA (Lat.), n. f. Ka^{3}r-se^{2}r(ke^{2}r)'u^2(u^4)-la^3. See CARCERULUS.

CARCERULAR, adj. Ka^{3}r-se^{2}r′u^2-la^{3}r. Lat., *carcerularis*. Fr., *carcérulaire*. Pertaining to, resembling, or consisting of, a carcerulus. [B, 1, 121.]

CARCERULE, n. Ka^{3}r′se^{2}r-u^{2}l. See CARCERULUS.

CARCERULOSÆ (Lat.), n. f. pl. Ka^{3}r-se^{2}r(ke^{2}r)-u^2(u^4)-los′e-(a^3-e^2). Of Spach, a tribe of cruciferous plants. [B, 121.]

CARCERULUS (Lat.), n. m. Ka^{3}r-se^{2}r(ke^{2}r)′u^{2}l(u^{4}l)-u^{3}s(u^{4}s). Dim. of *carcer*, a prison. Fr., *carcérule*. Ger., *Schliesskapsel*, *Samenzelle*. Syn.: *capsula clausa* (1st def.). 1. Of Mirbel, a dry, indehiscent fruit containing two or more loculi and inclosing several seeds, especially one that ultimately breaks up into one-seeded achænium-like parts not supported on a branched carpophore. Cf. CATACLESIUM. 2. In certain *Fungi*, the spore-case. [B, 19, 75, 121, 123.]

CARCHARADONTA (Lat.), n. n. pl. Ka^{3}r-ka^{2}r(ch^{2}a^{3}r)-a^3-do^{2}nt′a^3. See CARCHARODONTA.

CARCHARIAS (Lat.), n. m. Ka^{3}r-ka(ch^{2}a^3)′ri^2-a^{2}s(a^{3}s). Gen., *carchari′ados* (-*is*). Gr., καρχαρίας. The shark (*Squalus c.*). [L, 105.]

CARCHARIIDÆ (Lat.), n. f. pl. Ka^{3}r-ka^{2}r(ch^{2}a^{3}r)-i(i^2)′i^{2}d-e-(a^3-e^2). From καρχαρίας, a shark. A family of the *Selachoidei*. [L, 207.]

CARCHARIINA (Lat.), n. n. pl. Ka^{3}r-ka^{3}r(ch^{2}a^{3}r)-i^2-in(en)′a^3. A group of the *Carchariidæ*. [L, 280.]

CARCHARODONTA (Lat.), n. n. pl. Ka^{3}r-ka^{2}r(ch^{2}a^{3}r)-o(o^2)-do^{2}nt′a^3. Gr., καρχαροδόντα (from κάρχαρος, sharp, and ὀδούς, a tooth). Fr., *carcharodontes*. Of Aristotle, a general term for animals having sharp teeth. [A, 322, 325; L, 121.]

CARCHEDONIUS (Lat.), n. m. Ka^{3}r-ke^2(ch^{2}a)-don(do^{2}n)′i^2-u^{3}s(u^{4}s). Gr., Καρχηδόνιος (because brought from Carthage). An ancient name for a certain gem, perhaps the Oriental amethyst or garnet. [A, 318, 325.]

CARCHESIUM (Lat.), n. n. Ka^{3}r-ke(ch^{2}a)′zi^2(si^2)-u^{3}m(u^{4}m). Gr., καρχήσιον. Lit., the head of a mast, also a sort of machine like a crane, also a kind of goblet with two handles; of Galen, an appliance for the reduction of dislocations. [A, 318, 322, 325.] Cf. LAQUEUS *carchesius*.

CARCHESIUS (Lat.), adj. Ka^{3}r-ke(ch^{2}a)′zi^2(si^2)-u^{3}s(u^{4}s). Gr., καρχήσιος. Fr., *carchésien*. Pertaining to a carchesium. [A, 301, 325.] See LAQUEUS *c.*

CARCHICHEC (Turk.), n. A variety of the *Primula veris*. [B, 121.]

CARCHOFA, CARCHOFELA, CARCHOFETA, CARCHOFLE, CARCHOUFLE, CARCHOUFLIER, n's. In Provence, the *Cynara scolymus*, the *Carduus crispus*, and similar plants resembling the artichoke; also the *Sempervivum tectorum*. [B, 38, 88, 121; L, 105.]

CARCINE (Fr.), n. Ka^{3}r-sen. See CANCER and CARCINUS.

CARCINELCOSIS (Lat.), n. f. Ka^{3}r-si^{2}n(ki^{2}n)-e^{2}l-ko′si^{2}s. Gen., *carcinelco′seos* (-*is*). From καρκίνος, a cancer, and ἕλκωσις, ulceration. Ger., *Krebsgeschwür*, *krebsige Verschwärung*. Cancerous ulceration. [A, 322; E; G, 5.]—**C. fungosa.** See CANCER *verrucosus*.—**C. simplex.** A simple form of ulcerating cancer. [G, 5.]

CARCINÉMIE [Piorry] (Fr.), n. Ka^{3}r-si^{2}n-am-e. The cancerous cachexia. [A, 250.]

CARCINETHRON (Lat.), n. n. Ka^{3}r-si^{2}n(ki^{2}n)-e^{2}th(ath)′ro^{2}n. Gr., καρκίνηθρον. Of Pliny, a plant thought to have been the *Polygonum aviculare*. [A, 318; B, 88, 121.] Cf. CARCINITRON.

CARCINIDÆ (Lat.), n. f. pl. Ka^{3}r-si^{2}n(ki^{2}n)′i^{2}d-e(a^3-e^2). See PORTUNIDÆ.

CARCINIE (Fr.), n. Ka^{3}r-si^{2}n-e. Of Piorry, carcinosis; of Alibert, cancer of the skin. [A, 250, 301, 385.]

CARCINITRON (Lat.), n. n. Ka^{3}r-si^2(ki^2)-ni^{2}t′ro^{2}n. Of Dioscorides, a plant supposed to have been the *Polygonum vulgare*, var. *multiflorum*. [B, 88, 121.]

CARCINOCÉLIE [Piorry] (Fr.), n. Ka^{3}r-si^{2}n-o-sa-le. A cancerous tumor. [A, 250.]

CARCINODES (Lat.), adj. Ka^{3}r-si^{2}n(ki^{2}n)-o′dez(das). See CARCINOID; as a n., the canker of plants. [B.]

CARCINOHÊMIE [Piorry] (Fr.), n. Ka^{3}r-si^{2}n-o-a-me. See CARCINÉMIE.

CARCINOID, adj. Ka^{3}r′si^{2}n-oid. Gr., καρκινώδης (from καρκίνος, a crab, and εἶδος, resemblance). Lat., *carcinodes*, *carcinoides*. Fr., *carcinode*, *carcinoïde*. Ger., *krebsähnlich*, *carcinoidisch*. Resembling a crab or a cancer. [A, 385.]

CARCINOIDES (Lat.), adj. Ka^{3}r-si^{2}n(ki^{2}n)-o(o^2)-i(e)′dez(das). See CARCINOID; as a n. pl. (Fr., *carcinoïdes*), see CATOMETOPITA.

CARCINOLOGY, n. Ka^{3}r-si^{2}n-o^{2}l′o-ji^2. From καρκίνος, a crab, and λόγος, understanding. Fr., *carcinologie*. The zoology of the *Crustacea*. [L, 41.]

CARCINOM (Ger.), n. Ka^{3}r-tzen-om′. See CARCINOMA.—**Bindegewebsc′.** See *Scirrhous* CANCER.—**Drüsenc′.** See ADENOCARCINOMA.—**Epithelialc′.** See EPITHELIOMA.—**Gallertc′.** See *Colloid* CANCER.—**Hartes C.** See *Scirrhous* CANCER.—**Hornkörperc′** [Waldeyer]. Cancer of the derma. [Birch-Hirschfeld (A, 319).]—**Kolloides C.** See *Colloid* CANCER.—**Medullarc′.** See *Medullary* SARCOMA.—**Melanoc′.** See *Melanotic* CANCER.—**Weiches C.** See *Medullary* SARCOMA.

CARCINOMA (Lat.), n. n. Ka^{3}r-si^{2}n(ki^{2}n)-o′ma^3. Gen., *carcinom′atos* (-*is*). Gr., καρκίνωμα. Fr., *carcinome*. Ger., *Carcinom*, *Baumkrebs* (2d def.). It., Sp., *c.* 1. A cancer (3d def.), especially of the forms that are composed of an alveolar network of fibroid tissue, the interspaces containing epithelioid cells, and that spread by the lymphatics instead of by the blood-vessels; of Young, a genus of the *Paraphymata*. [E; L, 290, 311, 315.] 2. In trees, a disease in which the bark separates and an acrid sap exudes and causes the surrounding parts to ulcerate. [B, 19.]—**Acinous c.** See *Medullary* SARCOMA.—**Adeno-c.** See the major list.—**C. adenodes, C. adenoides.** See ADENO-C.—**C. alveolare.** See *Alveolar* CANCER.—**C. arborum.** See *C.* (2d def.).—**C. asbolicum.** See *Chimney-sweepers′* CANCER.—**C. atrophicum.** See *Cicatrizing* CANCER.—**C. caminariorum, C. caminos purgantium.** See *Chimney-sweepers′* CANCER.—**C. cicatricans, C. cicatricialis.** See *Cicatrizing* CANCER.—**C. colloides.** See *Colloid* CANCER.—**C. cutaneum, C. cutis.** Cancer of the skin; including, according to Auspitz, soft, colloid, and melanotic cancer; according to Kaposi, c. lenticulare, c. tuberosum, and c. melanodes. [a, 18.]—**C. cysticum papillare psammosum.** A cystic c. bearing papillomatous growths in which some or all of the cellular elements have been transformed into calcareous concretions. It has been observed in the region of the ovary, often between the folds of the broad ligament and pointing toward the vagina. [Flaischler, "Ztschr. f. Geb. u. Gyn.," vii, p. 464 (a, 18).]—**C. durum.** Fr., *carcinome dur*. Ger., *hartes Carcinom*. See *Scirrhous* CANCER.—**C. epitheliodes, C. epitheliosum.** See EPITHELIOMA.—**C. fasciculatum** [Müller]. See *Spindle-celled* SARCOMA.—**C. fibrosum.** Ger., *Faserkrebs*. See *Scirrhous* CANCER.—**C. glandulare.** See ADENO-C.—**C. hæmatodes.** See FUNGUS *hæmatodes*.—**C. hyalinum.** See *Colloid* CANCER.—**C. lenticulare.** See SQUIRRHE *en cuirasse*.—**C. medullare, C. medullosum.** Fr., *carcinome médullaire*. Ger., *Medullarkrebs*. See *Medullary* SARCOMA.—**C. melanodes, C. melanoticum.** See *Melanotic* CANCER.—**C. molle.** See *Medullary* SARCOMA.—**C. muciparum, C. mucosum.** See *Colloid* CANCER.—**C. myxomatodes.** See *Myxomatous* CANCER.—**C. nigrum.** See *Melanotic* CANCER.—**C. osteodes, C. osteoides.** See *Osteoid* CANCER.—**C. psammosum.** Ger., *Psammocarcinom*, *psammöses Carcinom*. A c. in which the epithelial elements have been transformed into stratified calcareous concretions differing from those found in true psammomata. [Kolisko, "Ctrlbl. f. Gyn.," Oct. 10, 1885 (a, 18).]—**C. reticulare** [Müller], **C. reticulatum.** A c. which, after undergoing fatty metamorphosis, shows its reticulum (stroma) more distinctly. [Rokitansky (a, 18).]—**C. sarcomatodes.** See *Sarcomatous* CANCER.—**C. scroti, C. scroti asbolicum.** See *Chimney-sweepers′* CANCER.—**C. simplex.** See *Scirrhous* CANCER.—**C. spongiosum.** See *Medullary* SARCOMA.—**C. teleangiectodes.** See FUNGUS *hæmatodes*.—**C. tuberosum.** Fr., *cancer tubéreux* (ou *sous-cutané*). Ger., *Knollenkrebs*, *Krebsknollen*. Syn.: *tumor carcinomatodes telæ subcutaneæ*, *cancer tuberosus*, *mycosis fungoides*. A form of connective-tissue cancer occurring most commonly in elderly persons, in the shape of nodules on the face, hands, and other parts, which tend to early softening and deep ulceration, with similar growths in the internal organs. [G.]—**C. villosum.** See PAPILLOMA.—**Colloid c.** See *Colloid* CANCER.—**Columnar-celled c., Cylindrical-celled c., Cylindrical epithelial c.** See *Cylindrical* EPITHELIOMA.—**Cystic c., Cysto-c., Cystoid c.** A c. containing one or more cysts or cyst-like spaces. [L, 311, 314.]—**Epithelial c.** See EPITHELIOMA.—**Fasciculated c.** [Müller]. See *Spindle-celled* SARCOMA.—**Fibroso-medullary c.** [Waldeyer]. A c. consisting of cells and stroma in about equal amount. [L, 314.]—**Glandular-celled c.** See ADENO-C. and *Cylindrical* EPITHELIOMA.—**Hard c.** See *Scirrhous* CANCER.—**Lipomatous c.** See *Lipomatous* CANCER.—**Medullary c.** Soft cancer; a variety in which the cells exceed the stroma in amount and do not resemble acini or columnar or squamous epithelia; so called from its resemblance to brain tissue. [L, 315.]—**Melanoid c., Melanotic c.** See *Melanotic* CANCER.—**Multicellular c.** See *Medullary* SARCOMA.—**Obsolescent c.** See *Cicatrizing* CANCER.—**Osteo-c., Osteoid c.** See *Osteoid* CANCER.—**Pavement-cell epithelial c.** See CANCROÏDE.—**Pigmented c.** See *Melanotic* CANCER.—**Retracting c.** See *Retractile* CANCER.—**Sarcomatous c.** See *Sarcomatous* CANCER.—**Scirrhous c.** See *Scirrhous* CANCER.—**Soft c.** See *Medullary c.*—**Spheroidal-celled c.** See ADENO-C. and *Cylindrical* EPITHELIOMA.—**Squamous-celled c., Squamous epithelial c.** See CANCROÏDE.—**Teleangiectatic c.** See FUNGUS *hæmatodes*.—**Tuberous c.** See *C. tuberosum*.—**Tubular c.** See CYLINDROMA.—**Villous c.** See PAPILLOMA.—**Withering c.** See *Cicatrizing* CANCER.

CARCINOMATOUS, adj. Ka^{3}r-si^{2}n-o^{2}m′a^{2}t-u^{3}s. Lat., *carcinomatosus*. Fr., *carcinomateux*. Ger., *carcinomatös*, *krebsartig*. It., Sp., *carcinomatoso*. Pertaining to or of the nature of carcinoma. [E.]

CARCINOMELCOSIS (Lat.), n. f. Ka^{3}r-si^{2}n(ki^{2}n)-om-e^{2}l-ko′-si^{2}s. See CARCINELCOSIS.

CARCINOMINUM (Lat.), n. n. Ka^{3}r-si^{2}n(ki^{2}n)-o-mi(me)′nu^{3}m-(nu^{4}m). Cancerous pus; used as a remedy by the isopathists. [B, 270.]

CARCINOPÉRITONIE [Piorry] (Fr.), n. Ka^{3}r-si^{2}n-o-pa-ri^2-to-ne. Cancer of the peritonæum. [A, 250.]

CARCINOPHAGUS (Lat.), adj. Ka^{3}r-si^{2}n(ki^{2}n)-o^{2}f′a^{2}g(a^{3}g)-u^{3}s(u^{4}s). From καρκίνος, a crab, and φαγεῖν, to eat. See CANCRIVORUS.

CARCINOPLACIDÆ (Lat.), n. f. pl. Ka^{3}r-si^{2}n(ki^{2}n)-o(o^2)-pla^{2}s(pla^{3}k)′i^{2}d-e(a^3-e^2). A family of the Catometopa. ["Proc. of the Zool. Soc.," 1879, p. 20 (L).]

CARCINOPLEURIE [Piorry] (Fr.), n. Ka^{3}r-si^{2}n-o-plu^{5}r-e. Cancer of the pleura. [A, 250.]

CARCINOPOLYPUS (Lat.), n. m. Ka^{3}r-si^{2}n(ki^{2}n)-o(o^2)-po^{2}l′-i^{2}p(u^{6}p)-u^{3}s(u^{4}s). For deriv., see CARCINUS and POLYPUS. Ger., *krebsartiger Polyp*. A cancerous polypus. [A, 322.]

CARCINOS (Lat.), n. m. Ka^{3}r′si^{2}n(ki^{2}n)-o^{2}s. Gr., καρκίνος. See CANCER.

CARCINOSIS (Lat.), n. f. Ka^{3}r-si^{2}n(ki^{2}n)-o′si^{2}s. Gen., *carcino′seos* (-*is*). From καρκίνος, a cancer (see also -*osis**). Fr., *carcinose*. Ger., *Carcinose*. It., *carcinosi*. Sp., *c.* Properly, the formation or production of cancer; the cancerous cachexia; cancer. In the pl., *carcinoses*, of Eisenmann, a group of diseases, including tuberculosis, scirrhous cancer, and medullary carcinoma; of Fuchs, a

family of skin diseases, including the various forms of cancer. [A, 301, 322 ; D, 2 ; G, 5.]—**Acute miliary c.** Lat., *c. miliaris acuta.* Fr., *carcinose miliaire aiguë* [Demme]. The rapid development of minute primary or secondary cancerous masses within an internal organ or on its surface. [A, 301 ; L, 49.]

CARCINOTHRON (Lat.), n. n. Ka^{3}r-si^{2}n(ki^{2}n)-o^{2}th(oth)′ro^{2}n. Gr., *καρκίνωθρον.* Of Pliny, the *Polygonum.* [A, 312.]

CARCINOUS, adj. Ka^{3}r′si^{2}n-u^{3}s. Gr., *καρκινώδης.* Lat., *carcinosus.* Fr., *carcinode, carcinoïde.* Ger., *carcinös.* See CANCEROUS.

CARCINUS (Lat.), n. m. Ka^{3}r′si^{2}n(ki^{2}n)-u^{3}s(u^{4}s). Gr., *καρκίνος.* Fr., *carcine.* 1. A crab. [L.] 2. Cancer, especially of the skin. [G, 7.]—**C. eburneus.** Fr., *carcine éburnée.* Sclerema adultorum. [G, 7.]—**C. globulosus.** Fr., *carcine globuleuse.* Carcinoma tuberosum of the skin. [G, 7.]—**C. mænas** [Leach]. See CANCER *mœnas.* —**C. medullaris.** Fr. *carcine médullaire.* Medullary carcinoma of the skin. [G, 7.]—**C. melaneus.** Fr., *carcine mélanée.* Melanotic cancer of the skin. [G, 7.]—**C. spongiosus.** Medullary carcinoma. [E.]—**C. tuberculosus.** Fr., *carcine tuberculeuse.* Lenticular cancer. [G, 7.] See SQUIRRHE *en cuirasse.*—**C. verrucosus.** Fr., *carcine verruqueuse.* Cancer verrucosus (*q. v.*). [G, 7.]

CARCINUSTHÆ (Lat.), n. f. pl. Ka^{3}r-si^{2}n(ki^{2}n)-u^{3}s(us)′the-(tha^3-e^2). Gr., *καρκινοῦσθαι* (from *καρκινοῦν*, to become tangled). An old term for plants having tangled roots. [A, 325.]

CARCIOFFUS (Lat.). n. m. Ka^{3}r-si^2(ki^2)-o^{2}f′fu^{3}s(fu^{4}s). It., *carcioffo, carciofi.* The *Cynara scolymus.* [B, 121.]

CARCITHIUM (Lat.), n. n. Ka^{3}r-si^{2}th(ki^{2}th)′i^2-u^{3}m(u^{4}m). Fr., *carcythe* [Necker]. The mycelium of certain *Fungi.* [B, 19.]

CARCOM (Heb.), n. The *Crocus sativus.* [B, 121.]

CARCONILLE (Fr.), n. Ka^{3}r-kon-el-y′. The *Centaurea cyanus.* [B, 121.]

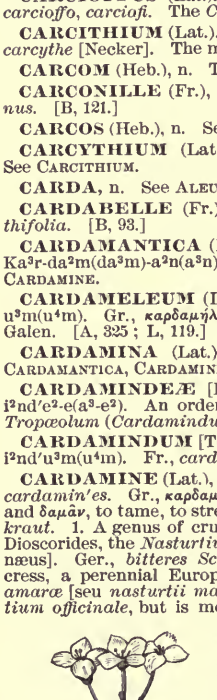
CARCOS (Heb.), n. See CARCOM.

CARCYTHIUM (Lat.), n. n. Ka^{3}r-si^{2}th(ku^{6}th)′i^2-u^{3}m(u^{4}m). See CARCITHIUM.

CARDA, n. See ALEURITES.

CARDABELLE (Fr.), n. Ka^{3}r-da^3-be^{2}l. The *Carlina acanthifolia.* [B, 93.]

CARDAMANTICA (Lat.). **CARDAMANTICE** (Lat.), n's f. Ka^{3}r-da^{2}m(da^{3}m)-a^{2}n(a^{3}n)′ti-ka^3, -se(ka). Fr., *cardamantique.* See CARDAMINE.



CARDAMELEUM (Lat.), n. n. Ka^{3}r-da^{2}m(da^{3}m)-e^{2}l(al)-e(a)′-u^{3}m(u^{4}m). Gr., *καρδαμήλειον.* A certain medicine mentioned by Galen. [A, 325 ; L, 119.]

CARDAMINA (Lat.), n. f. Ka^{3}r-da^{2}m(da^{3}m)-i(e)′na^3. See CARDAMANTICA, CARDAMINE, and CARDAMOM.

CARDAMINDEÆ [Link] (Lat.), n. f. pl. Ka^{3}r-da^{2}m(da^{3}m)-i^{2}nd′e^2-e(a^3-e^2). An order of plants comprising the single genus *Tropæolum* (*Cardamindum*). [B, 121.]

CARDAMINDUM [Tournefort] (Lat.), n. n. Ka^{3}r-da^{2}m(da^{3}m)-i^{2}nd′u^{3}m(u^{4}m). Fr., *cardaminde.* See TROPÆOLUM.

CARDAMINE (Lat.), n. f. Ka^{3}r-da^{2}m(da^{3}m)-i(e)′ne(na). Gen., *cardamin′es.* Gr., *καρδαμίνη* (said to be from *καρδία*, the stomach, and *δαμᾶν*, to tame, to strengthen). Fr., *cardamine.* Ger., *Schaumkraut.* 1. A genus of cruciferous plants. [B, 3, 19, 34, 121.] 2. Of Dioscorides, the *Nasturtium officinale.* [B, 180.]—**C. amara** [Linnæus]. Ger., *bitteres Schaumkraut, bittere Kresse.* The bitter cress, a perennial European herb. Its herb (*herba cardamines amaræ* [seu *nasturtii majoris amari*]) tastes like that of *Nasturtium officinale*, but is more bitter. It is occasionally substituted for the latter, and is regarded as an antiscorbutic. [B, 173, 180.]—**C. asarifolla** [Linnæus]. A species growing in northern Italy, said to have properties like those of *C. amara.* [B, 46, 211, 214.]—**C. bulbifera** [R. Brown]. The *Dentaria bulbifera.* [B, 46.]—**C. chelidonla** [Linnæus]. A perennial herb of southern Europe. The aqueous extract has been extolled as an antiscorbutic. [B, 173.]—**C. fontana** [Lamarck]. The water-cress (*Nasturtium officinale*). [B, 173, 180.]—**C. gilanensis** [Willdenow]. The *C. impatiens.* [B, 46.] —**C. hirsuta** [Linnæus]. The small bitter cress ; a European species resembling *C. pratensis* and of like properties : by some identified with *C. amara.* [B, 81, 180 ; L, 65.]—**C. impatiens** [Linnæus]. A species growing in England and France, said to have properties like those of *C. amara.* [H. Baillon (B. 46 ; B, 214).]—**C. montana asari folio** [Tournefort]. The *C. asarifolia.* [B, 211.]—**C. nasturtiana** [Thuiller]. The *C. amara.* [B, 173.]—**C. nasturtioides.** A species used in Chili as an antiscorbutic. [L, 87.]—**C. nasturtium** [Mönch]. The *Nasturtium officinale.* [B, 173.]—**C. Opizii** [Presl]. See *C. amara.* — **C. pentaphyllos** [Aiton]. The *Dentaria pentaphyllos.* [B, 173.]—**C. pinnata** [Aiton]. The *Dentaria pinnata.* [B, 173.] — **C. præcox** [Pallas). The *C. hirsuta.* [B. 46.] — **C. pratensis** [Linnæus]. Fr., *cresson des près* (ou *élegant*), *petit cresson aquatique, cressonette, pec à l'oiseau.* Ger., *Wiesenschaumkraut, Wiesenkresse, Gauchblume.* Syn. : *Nasturtium pratense.* The cuckoo-flower or lady's-smock ; a perennial species growing in the meadows of Europe and naturalized in the United States. The herb and flowers (*herba* et *flores cardamines* [seu *nasturtii pratensis*], *flores cuculi*) were formerly employed as antiscorbutics. [B, 19, 173, 180.]—**C. umbrosa.** See *C. amara.*—**Flores c's.** The flowers of *C. pratensis.* [B, 180.]—**Herba c's.** The herb of *C. pratensis*, also that of *Nasturtium officinale.* [B, 180.]—**Herba c's aquaticæ.** The herb of *Nasturtium officinale.* [B, 180.]

THE CARDAMINE PRATENSIS. (AFTER DE LANESSAN.)

CARDAMINEÆ (Lat.), n. f. pl. Ka^{3}r-da^{2}m(da^{3}m)-i^{2}n(en)′e^2-e-(a^3-e^2). Of Reichenbach, a subsection of the *Cruciferæ* (*Arabideæ genuinæ*), including *Cardamine*, *Dentaria*, and three other genera, and also, in a later classification, *Nasturtium.* [B, 173.]

CARDAMINOPSIS [C. A. Meyer] (Lat.), n. f. Ka^{3}r-da^{2}m-(da^{3}m)-i^{2}n(en)-o^{2}p′si^{2}s. A section of the genus *Arabis.* [B, 121.]

CARDAMINUM (Lat.), n. n. Ka^{3}r-da^{2}m(da^{3}m)-i(e)′nu^{3}m-(nu^{4}m). Of De Candolle, a section of the genus *Nasturtium*, including *Nasturtium officinale* ; of others, a genus including that species. [B, 121.]

CARDAMOM, n. Ka^{3}r′da^3-mu^{3}m. Gr., *καρδάμωμον.* Lat., *cardamomum* [U. S. Ph., Austr. Ph., Hung. Ph.], *cardamomi semina* [Br. Ph.], *fructus cardamomi* [Ger. Ph.]. Fr., *cardamome.* Ger., *C.* It., Sp., Port., *cardamomo.* Of the pharmacopœias, the lesser c.; of the Fr. Cod., also the round c. and the long c. [B.]—**Abyssinian c.** Fr., *cardamome d'Abyssinie.* A variety obtained from Abyssinia, said to be derived from *Amomum angustifolium.* [B, 121.] See also *Korarima c.*—**Aetherisches C'enöl** (Ger.). See *Oil of c.*—**Aleppo c.** A variety of lesser c. resembling Malabar c., derived from Aleppo. [B, 81.]—**Bastard c.** See *Xanthioid c.*—**Bengal c.** Ger., *bengalische C'en.* The fruit of *Amomum aromaticum*, or, according to some, of *Amomum subulatum* ; oblong or oval, about 1 inch long, ending in a short nipple-like process, and having 9 wings near the apex. [B, 5, 81, 270.]—**Black c.** Fr., *cardamome noir.* The fruit of *Zingiber nigrum.* [B, 121.]—**C.-Amome** (Ger.). The *Amomum cardamomum.* [B.]—**C.-Elettarie** (Ger.). The *Elettaria cardamomum.* [B, 180.]—**C'entinctur** (Ger.). See *Tinctura* CARDAMOMI.—**C'en von Banda** (Ger.). See *Madagascar c.*—**C.-fruit.** See *C.*—**C'öl** (Ger.). See *Oil of c.*—**C.-plant.** The *Elettaria cardamomum.* [B, 172.]—**C.-seed.** See *C.*—**Ceylon c.** See *Long c.*—**Chinese c.** Fr., *cardamome rond de la Chine.* A spherical c. from China, probably the fruit of *Amomum globosum.* [B, 10, 81.] See also *Ovoid China c.*—**Clusius's c.** The fruit of *Amomum Clusii.* [L, 130.]—**Cluster c.** Lat., *cardamomum racemosum.* Fr., *cardamome* (ou *amome* [Fr. Cod.]) *en grappe.* Ger., *Traubenc'.* The round c.; so called because it occurs in commerce in bunches of fruit on a common stalk. [B, 49, 98.] —**Common c.** See *Malabar c.*—**Compound tincture of c.** See *Tinctura* CARDAMOMI *composita.*—**Gärtner's black c.** See *Black c.*—**Greater c., Greater Java c.** Lat., *cardamomum majus, cardamoma majora javanensia.* Fr., *grand cardamome.* Ger., *grössere C'en, Java-C.* The capsule of *Amomum maximum* (or, according to some old authors, of *Amomum angustifolium*) ; about 1 inch long, triangular, rounded above, having several very short longitudinal wings on each side ; seldom seen in commerce. [B, 81, 180, 270.]—**Grössere C'en** (Ger.). See *Greater Java c.*—**Grösste C'en** (Ger.). See *Madagascar c.*—**Java c.** Lat., *cardamomum javanicum.* See *Greater Java c.* and *Round c.*—**Kleine C'en** (Ger.). See *Lesser c.*—**Korarima c.** According to Flückiger and Hanbury, the true cardamomum majus, from Abyssinia, said to be the fruit of *Amomum korarima* ; conical, with angular, rounded seeds, of a taste like that of Malabar c. [B, 18, 98.]—**Lange C'en** (Ger.). See *Long c.*—**Large c.** See *Larger c.*—**Large Java c.** See *Greater Java c.*—**Larger c.** Greater Java c. and long c. [B, 5.]—**Lesser c.** Lat., *cardamomum* [U. S. Ph., Austr. Ph., Hung. Ph.], *cardamomi semina* [Br. Ph.], *fructus cardamomi* [Ger. Ph., Belg. Ph., Netherl. Ph., Norw. Ph., Dan. Ph., Swed. Ph., Swiss Ph., Finn. Ph., Russ. Ph.], *cardamomum minus* [Gr. Ph.]. Fr., *petit cardamome du Malabar* [Fr. Cod.]. Ger., *kleine* (oder *malabarische*) *C'en.* It., *cardamomo minore* (o *corto*). Sp., *cardamomo, cardamomo menor* [Sp. Ph.]. The c. of the pharmacopœias, the capsule of *Elettaria cardamomum* ; of a pale-buff color, leathery, ovoid or oblong, triangular, rounded inferiorly, with a beak above, longitudinally striate, and divided into 3 cells, each containing 2 rows of brown, angular, rugose seeds disposed along central placentæ. It varies in length from 0·4 to 0·8 inch, being designated, according to its length, as long, short-long (medium), and short. The seeds, about 20 in number, should constitute about 75 per cent. of the c. ; they are the important constituent, and have an aromatic, agreeable odor and a pungent taste. According to the Br. Ph. and some other pharmacopœias, they are the only part to be employed. Lesser c. is brought from the Malabar coast, Madras, Aleppo, and other East Indian ports. According to some pharmacopœias, only the Malabar variety is to be employed. Lesser c. is much used as a carminative, stomachic tonic, and stimulant. [B, 81, 95.] See also *Malabar c., Aleppo c., Madras c.*, and *Medium c.*—**Long c.** Lat., *cardamomum longum* (seu *ceylanicum*), *semen cardamomi medium, cardamoma minora ceylanica.* Fr., *grande cardamome* [Fr. Cod.], *cardamome de Ceylan* [Fr. Cod.]. Ger., *lange* (oder *grosse*, oder *ceylanische*) *C'en.* It., *cardamomo lungo.* The fruit of *Elettaria major*, obtained from Ceylon, rarely found in commerce ; an oblong-lanceolate, acutely triangular capsule about 1·5 in. long, with an attenuated apex, darker than the lesser c. and of a less agreeable aroma. [B, 81, 180.]—**Madagascar c.** Lat., *cardamomum madagascarense* (seu *bandaense*, seu *maximum*). Fr., *grand cardamome de Madagascar.* Ger., *Madagascar-C., C'en von Banda, grösste C'en.* A very large variety from Madagascar, rare in commerce ; derived, according to some, from the *Amamum angustifolium*, but, according to the old authors, the completely ripe fruit of *Amomum grana Paradisi.* [B, 121, 180.]—**Madras c.** A Madras variety of lesser c., more oblong and acuminate than Malabar c. [B, 81.]—**Malabar c.** Lat., *cardamomum malabaricum, cardamoma minora malabarensia, semen cardamomi minoris malabarensis.* Fr., *cardamome du Malabar* [Fr. Cod.]. Ger.,

Malabar-C., *malabarische C'en.* The ordinary variety of lesser c. The capsules are generally ovoid and short-beaked at the apex. [B, 81, 95, 180.]—**Medium c.** Lat., *cardamomum medium.* Fr., *cardamome du Malabar moyen* [Fr. Cod.]. Ger., *mittlere C'en.* 1. A variety derived from *Elettaria cardamomum medium*, identified by Martius with long c. 2. Short-long c., a variety of lesser c. [B, 81, 113, 180.]—**Mittlere C.-Elettarie** (Ger.). The *Elettaria cardamomum medium.* [B, 180.]—**Mittlere C'en** (Ger.). See *Medium c.*—**Nepal c.** A variety of uncertain origin, said by some to be identical with Bengal c., from which it differs in being tipped with the long, beak-like calyx. [B, 81, 270.]—**Official c., Officinal c.** See *Lesser c.*—**Oil of c.** Lat., *oleum cardamomi æthereum.* Fr., *huile essentielle de cardamome.* Ger., *ätherisches C'enöl.* A volatile oil contained in c.-seeds, chiefly in the testa; colorless or yellowish, smelling and tasting like the seeds. [B, 81, 119.]—**Ovoid China c.** Fr., *cardamome ovoïde de la Chine.* A variety furnished by *Amomum medium* (*Alpinia alba*). [B, 121.]—**Puneer c.** The fruit of *Withania coagulans.* [M. Verghese, "Ind. Med. Gaz.," Dec., 1885, p. 403.]—**Round c.** Lat., *cardamomum rotundum, semen* (seu *fructus*) *cardamomi rotundi.* Fr., *amome en grappe* [Fr. Cod.]. Ger., *runde* (oder *traubige*) *C'en.* The fruit of *Amomum cardamomum*, from Siam, Java, and the neighboring islands; rounded, with three convex sides, of about the size of a cherry, containing dark-gray, angular seeds of a somewhat camphoraceous taste; not commonly met with. [B, 81, 180.]—**Round China c.** See *Chinese c.*—**Runde C'en** (Ger.), **Siam c.** See *Round c.*—**Small c.** See *Lesser c.*—**Tincture of c.** See *Tinctura* CARDAMOMI.—**Traubene'** (Ger.). S. Ph.]. Fr., *teinture* (ou *alcoolé*) *de cardamome.* Ger., *Cardamomentinctur.* A preparation made by exhausting 15 parts of lesser cardamom with sufficient dilute alcohol to make 100 parts. [B, 81, 119.]—**Tinctura cardamomi composita** [U. S. Ph., Br. Ph.]. Fr., *teinture de cardamome composée.* Ger., *zusammengesetzte Cardamomentinctur.* A preparation made by exhausting a mixture of 20 parts of lesser cardamom and 5 of cochineal with sufficient dilute alcohol to make 940, and adding 60 of glycerin [U. S. Ph.]; or by exhausting ¼ oz. (av.) each of cardamom seeds and caraway, 2 oz. of stoned raisins, ¼ oz. of cinnamon, and 60 grains of cochineal with enough proof spirit to make a pint [Br. Ph. (B, 81)].

CARDAMOMUS (Lat.), n. m. Ka^{3}rd-a^{2}m(a^{4}m)-om'u^{3}s(u^{4}s). Usually used in the pl., *cardamomi.* Cardamom. [B.]—**Cardamomi majores javanici.** See *Greater Java* CARDAMOM.—**Cardamomi minores ceylanici.** See *Long* CARDAMOM.—**Cardamomi minores malabarenses.** See *Malabar* CARDAMOM.

CARDAMON (Lat.), n. n. Ka^{3}rd'a^{2}m(a^{3}m)-o^{2}n. Gr., κάρδαμον (from καρδία, the heart). 1. Anciently, the cress (*Nasturtium*), on account of its digestive (heart-fortifying) properties. The C. of Theophrastus was probably the *Lepidium sativum*; that of some other authors, the *Lepidium latifolium.* 2. Of De Candolle, a section of the genus *Lepidium.* [B, 121.]

CARDAMUM (Lat.), n. n. Ka^{3}rd'a^{2}m(a^{3}m)-u^{3}m(u^{4}m). See CARDAMOM and CARDAMON.—**C. majus.** 1. The *Tropæolum majus.* 2. Long cardamom, or perhaps the long variety of the lesser cardamom. [B, 88, 121.]—**C. medium.** See *Medium* CARDAMOM.—**C. minus.** 1. The *Tropæolum minus.* 2. See *Lesser* CARDAMOM. [B, 88, 121, 180.]—**Common c.** Ordinary (lesser) cardamom. [B, 200.]—**Herba cardami majoris.** The herb of *Tropæolum majus.* [B, 119, 180.]

CARDÃO (Port.), **CARDASSE** (Fr.), n's. Ka^{3}rd-o^{2}n^2', -a^{3}s. The *Opuntia vulgaris.* [B, 88.]

CARDAVALLE (Fr.), n. Ka^{3}rd-a^3-va^{3}l. See CARLINA.

CARDAVELLE (Fr.), n. Ka^{3}rd-a^3-ve^{2}l. See CARDABELLE.

CARDE (Fr., Ger.), n. Ka^{3}rd, ka^{3}rd'e^2. The *Cynara cardunculus.* [B, 121.]—**C. poirée** (Fr.). The *Beta cicla.* [B, 121.]—**C'benedict** (Ger.). The *Centaurea benedicta.* [L, 43.]

CARDEL (Moor., Ar.), n. The genus *Sinapis.* [B, 121.]

CARDELO, n. In Provence, the genus *Sonchus.* [B, 121.]

CARDEOLI, n. The *Agaricus eryngii.* [B.]

CARDÈRE (Fr.), n. Ka^{3}rd-e^{2}r. The *Dipsacus fullonum.* [B, 173.]

CARDERINA (Lat.), n. f. Ka^{3}rd-e^{2}r-i(e)'na^3. The *Senecio vulgaris.* [B, 121; L, 105.]

CARDE THISTLE, n. Ka^{3}rd thi^{2}stl. The *Dipsacus silvestris.* [B, 275.]

CARDIA (Lat.), n. f. Ka^{3}rd'i^2-a^3. Gr., καρδία. Fr., *c.* Ger., *Herz* (1st def.), *obere Magenmund* (2d def.). 1. The heart. 2. As now generally used, the opening of the œsophagus into the stomach. [A, 301, 322.]

CARDIAC, adj. Ka^{3}rd'i^2-a^{2}k. Gr., καρδιακός. Lat., *cardiacus.* Fr., *cardiaque.* Pertaining to the heart or to the cardia (2d def.); as a n., a stimulant or tonic acting especially on the heart. [A, 322.]

CARDIACA (Lat.), n. f. sing. and n. pl. Ka^{3}rd-i(i^2)'a^{2}k(a^{3}k)-a^3. See under CARDIACUS.

CARDIACAL, adj. Ka^{3}rd-i'a^{2}k-a^{2}l. See CARDIAC.

CARDIACEA (Lat.), n. n. pl. Ka^{3}rd-i^2-a(a^3)'se^2(ke^2)-a^3. See CARDIADÆ (1st def.).

CARDIACO-BRANCHIAL, adj. Ka^{3}rd-i''a^{2}k-o-bra^{2}n^2'ki^2-a^{2}l. Pertaining to the cardiac and branchial regions (said of a suture in the *Crustacea*). ["Proc. of the Zool. Soc.," 1878, p. 300 (L).]

CARDIACO-VASCULAIRE (Fr.), adj. Ka^{3}rd-i^2-a^3-ko-va^{3}s-ku^{6}l-a^{2}r. Relating to the heart and the vascular system. [L, 88.]

CARDIACUS (Lat.), adj. Ka^{3}rd-i(i^2)'a^{2}k(a^{3}k)-u^{3}s(u^{4}s). Cardiac (*q. v.*); of the old authors, cardialgic; as a n., in the fem., *cardiaca*, of the older authors, the *Leonurus cardiaca*; of Mönch, a section of the genus *Leonurus*, and, in pathology (Gr., καρδιακή), cardialgia; as a n., in the n., *cardiacum* (*remedium* understood), a remedy that acts as a stimulant or tonic to the heart. [A, 301, 322; B, 121; L.]—**Cardiaca arvensis** [Lamarck]. The *Stachys arvensis.* [B, 121.]—**Cardiaca crispa, Cardiaca lycopus.** The *Leonurus cardiaca.* [B.]—**Cardiaca silvestris** [Lamarck]. The *Galeobdolon luteum.* [B, 173.]—**Cardiaca trilobata** [Lamarck], **Cardiaca vulgaris** [Mönch]. The *Leonurus cardiaca.* [B, 121.]—**Herba cardiacæ.** The herb of *Leonurus cardiaca.* [B, 180.]—**Morbus c., Passio cardiaca** [F. Plater]. Cardialgia. [A, 322, 325.]

CARDIADÆ (Lat.), n. f. pl. Ka^{3}rd-i(i^2)'a^{2}d(a^{3}d)-e(a^3-e^2). 1. A numerous family of lamellibranchiate dimyary bivalve molluscs, including those in which the mantle is open anteriorly for the foot and has two distinct orifices, one for respiration, the other for excretion, as in the cockle. [L, 108.] 2. A family of the *Asiphonida.* [L, 227.]

CARDIAGRA (Lat.), n. f. Ka^{3}rd-i(i^2)'a^{2}g(a^{3}g)-ra^3. From καρδία (see CARDIA), and ἄγρα, an attack. Fr., *cardiagre.* Ger., *Herzweh, Herzschmerz.* Pain in or gout of the heart; also cardialgia. [L, 81, 82.]

CARDIAGRAPHY, n. Ka^{3}rd-i^2-a^{2}g'ra^{2}f-i^2. See CARDIOLOGY.

CARDIAIRE (Fr.), adj. Ka^{3}rd-i^2-a^{2}r. See CARDIAC; as a n., the *Leonurus cardiaca.* [B, 173.] See also CARDIARIUS.

CARDIAL, adj. Ka^{3}rd'i^2-a^{2}l. See CARDIAC.

CARDIALGES (Lat.), adj. Ka^{3}rd-i^2-a^{2}l(a^{3}l)'jez(gas). Gr., καρδιαλγής. Affected with cardialgia. [A, 322, 387.]

CARDIALGIA (Lat.), n. f. Ka^{3}rd-i^2-a^{2}l(a^{3}l)'ji^2(gi^2)-a^3. Gr., καρδιαλγία (from καρδία [see CARDIA], and ἄλγος, pain). Fr., *cardialgie, mal de cœur.* Ger., *Magenweh, Magenschmerz, Magen-*

krampf, Kardialgie. Properly, neuralgia of the stomach, but often applied to various forms of gastric pain and to pyrosis. [Rosenbach (A, 319); L, 325.]—**C. icterica** [Schusterus]. Heartburn with jaundice. [L.]—**C. inflammatoria.** Gastritis. [L, 119.]—**C. nerviosa** (Lat. and Sp.). C. of nervous origin. [D, 70.]—**C. spasmodica, C. spastica.** Spasmodic c. [L.]—**C. sputatoria.** Pyrosis. [L, 119.]

CARDIALGIC, adj. Ka^{3}rd-i^2-a^{2}l′ji^{2}k. Gr., καρδιαλγικός. Lat., *cardialgicus.* Fr., *cardialgique.* Pertaining to, of the nature of, or affected with, cardialgia. [A, 322.]

CARDIALOGY, n. Ka^{3}rd-i^2-a^{2}l′o-ji^2. See CARDIOLOGY.

CARDIAMORPHIA (Lat.), n. f. Ka^{3}rd-i^2-a^{2}m(a^{3}m)-o^{2}rf′i^2-a^3. From καρδία, the heart, α priv., and μορφή, shape. Malformation or deformity of the heart. [A, 322.]

CARDIANÆSTHESIA (Lat.), **CARDIANÆSTHESIS** (Lat.), n's f. Ka^{3}rd-i^2-a^{2}n(a^{3}n)-e^{2}s(a^3-e^{2}s)-thez(thas)′i^2-a^3, -i^{2}s. Gen., *cardianæsthes′iæ, -eos(is).* From καρδία, the heart, α priv., and αἴσθησις, perception. Ger., *Fühllosigkeit des Herzens.* Insensibility of the heart. [A, 322.]

CARDIANASTROPHE [Hoffmann] (Lat.), n. f. Ka^{3}rd-i^2-a^{2}n(a^{3}n)-a^{2}s(a^{3}s)′tro^{2}f-e(a). Written also, incorrectly, *cardianastrophia.* From καρδία, the heart, and ἀναστροφή (see ANASTROPHE). Fr., c. Transposition of the heart to the right side. [A, 301, 322; L, 135.]

CARDIANASTROPHICUS (Lat.), adj. Ka^{3}rd-i^2-a^{2}n(a^{3}n)-a^{2}s(a^{3}s)-tro^{2}f′i^{2}k-u^{3}s(u^{4}s). Pertaining to cardianastrophe. [A, 322.]

CARDIANEURIA (Lat.), n. f. Ka^{3}rd-i^2-a^{2}n(a^{3}n)-u^2′ri^2-a^3. From καρδία, the heart, and ἄνευρος, relaxed, nerveless. A more correct form of *acardionervia* (*q. v.*).

CARDIANEURYSMA (Lat.), n. n. Ka^{3}rd-i^2-a^{2}n(a^{3}n)-u^{2}r-i^{2}z-(u^{6}s)′-ma^3. Gen., *cardianeurys′matos (-is).* For deriv., see CARDIA and ANEURYSM. Dilatation of the heart or of the cardiac orifice of the stomach. [A, 322.]

CARDIANT [H. C. Wood], adj. Ka^{3}rd′i^2-a^{2}nt. Affecting the heart (said of remedies). [α, 7.]

CARDIAORTIQUE [Piorry] (Fr.), adj. Ka^{3}rd-i^2-a^3-ort-ek. Pertaining to the heart and aorta. [A, 250.]

CARDIAPLEGIA (Lat.), n. f. Ka^{3}rd-i^2-a^3-ple(pla)′ji^2(gi^2)-a^3. See CARDIOPLEGIA.

CARDIAQUE (Fr.), adj. Ka^{3}rd-i^2-a^{3}k. Cardiac (*q. v.*); as a n., a person affected with heart disease, also, in botany, the genus *Cardiaca.* [B, 121.]—**C. officinale.** The *Leonurus cardiaca.* [B, 173.]

CARDIARCTIE [Piorry] (Fr.), n. Ka^{3}rd-i^2-a^{3}rk-te. From καρδία, the heart, and *arctare,* to contract. See CARDIOSTENOSIS.

CARDIARIUS (Lat.), adj. Ka^{3}rd-i^2-a(a^3)′ri^2-u^{3}s(u^{4}s). Fr., *cardiaire.* Cardiac (*q. v.*); as a n., in the m. pl., *Cardiarii,* certain worms said to have been found in the heart and in the pericardium. [B, 121.]

CARDIASIE [Piorry] (Fr.), n. Ka^{3}rd-i^2-a^3-ze. See CARDIECTASIS.

CARDIASTHMA (Lat.), n. n. Ka^{3}rd-i^2-a^{2}sth(a^{3}sth)′ma^3. Gen., *cardiasth′matos (-is).* See *Cardiac* ASTHMA.

CARDIATELIA (Lat.), n. f. Ka^{3}rd-i^2-a^{2}t(a^{3}t)-e^{2}l-i(e)′a^3. From καρδία, the heart, and ἀτέλεια, incompleteness. Fr., *cardiatélie.* Syn.: *atelocardia* [Crampton]. Incomplete development of the heart. [A, 301, 322; L, 44.]

CARDIATOMY, n. Ka^{3}rd-i^2-a^{2}t′o-mi^2. See CARDIOTOMY.

CARDIATROPHIA (Lat.), n. f. Ka^{3}rd-i^2-a^{2}t(a^{3}t)-rof(ro^{2}f)′-i^2-a^3. For deriv., see CARDIA and ATROPHY. Syn.: *acardiotrophia* [Piorry]. Atrophy of the heart. [A, 322.]

CARDIAUXE (Lat.), n. f. Ka^{3}rd-i^2-a^{4}x′(a^3′u^{4}x)-e(a). From καρδία, the heart, and αὔξη, increase. Enlargement of the heart. [A, 322.]

CARDIE [Piorry] (Fr.), n. Ka^{3}rd-e. Any disease of the heart. [A, 250.]

CARDIE (Ger.), n. Ka^{3}rd′i^2-e^2. See CARDIA.

CARDIECHEMA (Lat.), n. n. Ka^{3}rd-i^2-e^{2}k(ach^2)-e(a)′ma^3. Gen., *cardiechem′atos (-is).* From καρδία, the heart, and ἤχημα, a sound. Ger., *Herzlaut.* A cardiac sound. [A, 322.]

CARDIECTASIS (Lat.), n. f. Ka^{3}rd-i^2-e^{2}k′ta^{2}s(ta^{3}s)-i^{2}s. Gen., *cardiecta′seos (-ec′tasis).* From καρδία, the heart, and ἔκτασις, distension. Fr., *cardiectasie.* See CARDIANEURYSMA.

CARDIELCIE [Piorry] (Fr.), n. Ka^{3}rd-i^2-e^{2}l-se. See CARDIELCOSIS.

CARDIELCOSIS (Lat.), n. f. Ka^{3}rd-i^2-e^{2}l-ko′si^{2}s. Gen., *cardielco′seos (-is).* From καρδία, the heart, and ἕλκωσις, ulceration. Fr., *cardielcose, cardielcosie* [Piorry], *cardielcie* [Piorry]. Ulceration of the heart. [D, 44.]

CARDIELCTICUS (Lat.), adj. Ka^{3}rd-i^2-e^{2}lk′ti^{2}k-u^{3}s(u^{4}s). Pertaining to cardielcosis. [A, 322.]

CARDIEMPHRAXIE [Piorry] (Fr.), n. Ka^{3}rd-i^2-a^{3}n^2-fra^{3}x-e. From καρδία, the heart, and ἔμφραξις, obstruction. Obstruction in the heart. [L, 82.]

CARDIENCÉPHALOÏDIE [Piorry] (Fr.), n. Ka^{3}rd-i^2-a^{3}n^2-saf-a^{3}l-o-e-de. Encephaloid cancer of the heart. [L, 82.]

CARDIÈRE (Fr.), n. Ka^{3}rd-i^2-e^{2}r. See CARDÈRE.

CARDIETHMOLIPOSIS (Lat.), n. f. Ka^{3}rd-i^2-e^{2}th(ath)″mo-(mo^2)-li^{2}p-o′si^{2}s. Gen., *cardiethmolipo′seos (-is).* From καρδία, the heart, ἠθμός, a sieve, and λίπος, fat. Fr., *cardiethmoliposie* [Piorry]. A fatty deposit in the connective tissue of the heart. [A, 250.]

CARDIEURYSMA (Lat.), n. n. Ka^{3}rd-i^2-u^2-ri^{2}z(ru^{6}s)′ma^3. Gen., *cardieurys′matos (-is).* From καρδία, the heart, and εὐρύς, extended. Fr., *cardieurysme.* Morbid dilatation of the heart. [A, 322; L, 44.]

CARDIHELCOSIS (Lat.), n. f. Ka^{3}rd-i^2-he^{2}l-ko′si^{2}s. See CARDIELCOSIS.

CARDILÆA (Lat.), n. f. Ka^{3}rd-i^{2}l-e′(a^3′e^2)-a^3. See CARDIALGIA.

CARDIMELECH [Dolæus], n. Ka^{3}rd-i^{2}m′e^{2}l-e^{2}k. From καρδία, the heart, and Heb. *melek,* a governor. A supposed vital principle situated in the heart. [A, 325; R, 4.]

CARDIMIDE [Mulder], n. Ka^{3}r-di′mi^{2}d(mid). For deriv., see CARBON, *di-**, and IMIDE. Ger., *Cardimid.* See CARBODIIMIDE.

CARDINAL, adj. Ka^{3}rd′i^{2}n-a^{2}l. Lat., *cardinalis* (from *cardo,* a hinge). Fr., c. Ger., *kardinal, Haupt-* (1st def.), *vornehmste* (1st def.), *hauptsächlichste* (1st def.). 1. Chief, predominant. 2. Pertaining to or serving as a hinge or joint. 3. As a Fr. n., the *Carduus nutans.* [A, 385; B, 100; Berry (B, 121).]—**Blue c.-flower.** Fr., *cardinale bleue.* The *Lobelia syphilitica.* [B, 121, 173.]—**C'blume** (Ger.), **C'flower.** The *Lobelia cardinalis* and the *Cleome cardinalis.* [B, 19, 48, 275.]

CARDINALE (Fr.), n. Ka^{3}rd-i^{2}n-a^{3}l. The *Lobelia cardinalis.* [B, 173.]—**C. bleue.** The *Lobelia syphilitica.* [B, 121, 173.]—**C. rouge.** See *C.*

CARDINALIDÆ (Lat.), n. f. pl. Ka^{3}rd-i^{2}n-a^{2}l(a^{3}l)′i^{2}d-e(a^3-e^2). A family of the *Carinatæ.* ["Proc. of the Zool. Soc.," 1876, p. 258 (L).]

CARDINALIS (Lat.), adj. Ka^{3}rd-i^{2}n-a(a^3)′li^{2}s. Cardinal (*q. v.*); as a n., the genus *Lobelia.* [Rivinius (B, 121).]

CARDINAMENTUM (Lat.), n. n. Ka^{3}rd-i^{2}n-a^{2}m(a^{3}m)-e^{2}nt′-u^{3}m(u^{4}m). From *cardo,* a hinge. Gr., γιγγλυμοειδές [Hippocrates]. The articular surface of the lower end of the humerus; so called from its hinge-like hollows and eminences. [Galen (A, 325).]

CARDINATA [Lankester] (Lat.), n. n. pl. Ka^{3}rd-i^{2}n-a(a^3)′ta^3. An order of the *Brachiopoda.* [L, 121.]

CARDINATUS (Lat.), adj. Ka^{3}rd-i^{2}n-a(a^3)′tu^{3}s(tu^{4}s). Hinged, hinge-like. [A, 318, 325.]

CARDINIFEROUS, adj. Ka^{3}rd-i^{2}n-i^{2}f′e^{2}r-u^{3}s. From *cardo,* a hinge, and *ferre,* to bear. Fr., *cardinifère.* Articulated by a sort of hinge (said of bivalve shells). [L, 41.]

CARDIO-AORTIC, adj. Ka^{3}rd″i^2-o-a-o^{2}rt′i^{2}k. For deriv., see CARDIA and AORTA. Lat., *cardio-aorticus.* Fr., *cardio-aortique.* Ger., *cardio-aortisch.* Pertaining to the heart and to the aorta. [J.] Cf. CARDIO-ARTERIAL and PRESPHYGMIC.

CARDIO-ARTERIAL, adj. Ka^{3}rd″i^2-o-a^{3}r-te′ri^2-a^{2}l. For deriv., see CARDIA and ARTERY. Pertaining to the heart and to the arteries (said especially of the interval between the beginning of the ventricular systole and the arterial pulse). ["Jour. of Anat. and Physiol.," v, p. 268, vii, p. 103 (J); "Jour. of the Am. Med. Assoc.," i, p. 661 (J).] Cf. PRESPHYGMIC and see under INTERVAL.

CARDIOBELIUM (Lat.), n. n. Ka^{3}rd-i^2-o(o^2)-be^{2}l′i^2-u^{3}m(u^{4}m). The *Philodendron hederaceum.* [B, 121.]

CARDIOBOTANON (Lat.), n. n. Ka^{3}rd-i^2-o(o^2)-bo^{2}t′a^{2}n(a^{3}n)-o^{2}n. From καρδία, the heart, and βοτάνη, a plant. Fr., *cardiobotane.* The *Centaurea benedicta.* [B, 121; L, 105.]

CARDIOCARCINIE [Piorry] (Fr.), n. Ka^{3}rd-i^2-o-ka^{3}r-si^{2}n-e. From καρδία, the heart, and καρκίνος, an eating ulcer. Cancer of the heart. [L, 82.]

CARDIOCARPUS (Lat.), n. m. Ka^{3}rd-i^2-o(o^2)-ka^{3}rp′u^{3}s(u^{4}s). See SOULAMEA.—**C. amarus** [Reinw.]. See SOULAMEA *amara.*

CARDIOCELE (Lat.), n. f. Ka^{3}rd-i^2-o(o^2)-se(ka)′le(la); in Eng., ka^{3}rd′i^2-o-sel. From καρδία, the heart, and κήλη, a tumor. Fr., *cardiocèle.* Ger., *Herzbruch.* Hernia of the heart. [A, 326.]—**C. abdominalis.** Ger., *Bauchherzbruch.* A hernial escape of the heart into the abdomen. [A, 322.]

CARDIOCÉLIE [Piorry] (Fr.), n. Ka^{3}rd-i-o-sal-e. A tumor in the heart. [L, 82.]

CARDIOCENTESIS (Lat.), n. f. Ka^{3}rd-i^2-o(o^2)-se^{2}nt(ke^{2}nt)-es(as)′i^{2}s. Gen., *cardiocentes′eos (-is).* From καρδία, the heart, and κέντησις, puncture. Fr., *cardiocentèse.* Puncture of the heart; aspiration of a chamber of the heart. [I. Bruhl, "Progr. méd."; "Dublin Jour. of Med. Sci.," Nov., 1888, p. 454.]

CARDIOCLASIE [Piorry] (Fr.), n. Ka^{3}rd-i^2-o-kla^{3}z-e. From καρδία, the heart, and κλάσις, a breaking. Rupture of the heart. [L, 82.]

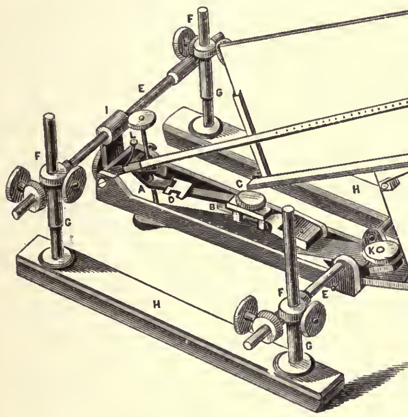
CARDIOCRYSTALLI (Lat.), n. m. pl. Ka^{3}rd-i^2-o(o^2)-kri^{2}st-(kru^{6}st)-a^{2}l(a^{3}l)′li(le). From καρδία, the heart, and κρύσταλλος, a crystal. Fr., *cardio-cristaux.* Ger., *Herzkrystallen.* Whitish microscopic crystals found by Gluge in the heart substance. ["Gaz. des hôp.," 1837, No. 57 (A, 322); L, 81.]

CARDIODEMIA [Lobstein] (Lat.), n. f. Ka^{3}rd-i^2-o(o^2)-dem-(dam)′i^2-a^3. From καρδία, the heart, and δημός, grease. Fr., *cardiodémie.* Fatty degeneration of the heart. [A, 301, 385.]

CARDIODES (Lat.), adj. Ka^{3}rd-i^2-o′dez(das). From καρδία, the heart, and εἶδος, likeness. Ger., *herzförmig.* Heart-shaped. [L, 81.]

CARDIODYNE (Lat.), **CARDIODYNIA** (Lat.), n's f. Ka^{3}rd-i^2-o^{2}d′i^{2}n(u^{6}n)-e(a), -od(o^{2}d)-i^{2}n(u^{6}n)′i^2-a^3. From καρδία (see CARDIA), and ὀδύνη, pain. Fr., *cardiodynie.* Ger., *Herzschmerz.* Pain in the heart or in its vicinity. [L, 44.]—**C. spasmodica intermittens.** Angina pectoris. [A, 322.]

CARDIODYSÆSTHESIA (Lat.), **CARDIODYSÆSTHESIS** (Lat.), **CARDIODYSNEURIA** (Lat.), n's f. Ka^{3}rd-i^2-o(o^2)-di^{2}z(du^{6}s)-e^{2}s(a^3-e^{2}s)-thez(thas)′i^2-a^3, -i^{2}s, -nu^2′ri^2-a^3. From καρδία, the heart, and αἴσθησις, perception, or νεῦρον, a nerve (see also *Dys-**). Impaired innervation of the heart. [A, 322.]



CARDIOGASTROSCIRRHUS (Lat.), n. m. Ka^{3}rd″i^2-o(o^2)-ga^{2}s(ga^{3}s)‴tro(tro^2)-si^{2}r(ski^{2}r)′ru^{3}s(ru^{4}s). From **καρδία** (see Cardia), **γαστήρ**, the belly, and **σκιρρός** (see Scirrhus). Ger., *Magenmundskirrhus*. Scirrhus of the cardiac orifice of the stomach. [A, 322.]

CARDIOGMOS (Lat.), **CARDIOGMUS** (Lat.), n's m. Ka^{3}rd-i^2-o^{2}g(og)′mo^{2}s, -mu^{3}s(mu^{4}s). Gr., **καρδιωγμός**. Fr., *cardiogme*. See Cardialgia and Angina pectoris.—**C. strumosus** [Hirsch]. Exophthalmic goître. [F.]

CARDIOGRADE (Fr.), adj. Ka^{3}rd-i^2-o-gra^{3}d. From **καρδία**, the heart, and *gradus*, a step. Accomplishing locomotion by alternate systolic and diastolic movements like those of the heart (said of *Acalephæ*); as a n., in the pl., *c's*, an order of *Arachnoderma* so characterized. [L, 41, 180.]

CARDIOGRAM, n. Ka^{3}rd′i^2-o-gra^{2}m. From **καρδία**, the heart, and **γράμμα**, a writing. A curve or graphic representation of the apex-beat of the heart, obtained by means of the cardiograph (*q. v.*). [K.]

CARDIOGRAPH, n. Ka^{3}rd′i^2-o-gra^{3}f. From **καρδία**, the heart, and **γράφειν**, to write. Fr., *cardiagraphe*. Ger., *C*. An instrument for registering the force and other features of the cardiac contractions. Marey's improved c. consists of a tambour contained in a wooden cup that can be fastened in an air-tight manner over the situation of the apex-beat, having attached to it a button that can be pressed upon the skin by a degree of force regulated with a screw. In Sanderson's c. the button is borne on a spring, and is separated from the tambour by an aluminium plate. In each instrument there is a tube communicating with a registering tambour. In Galabin's c., the bar, *B*, carrying the knife-edge, *A*, is made up

GALABIN'S CARDIOGRAPH. (AFTER BRAMWELL.)

of two parts, one of which slides within the other and can be fixed with a screw, *C*. A second knife-edge, *D*, which can be raised or lowered, is attached to the bar. The brass frame is swung free by means of two transverse steel rods, *E*, attached by joints, *F*, allowing of vertical and horizontal adjustment, to four vertical steel rods, *G*, each pair being inserted into a bar of wood covered with leather, by which the instrument rests on the chest. The button is pressed on the site of the impulse by a spring, the force being adjustable with a screw, *K*, which perforates the short arm of the spring-lever, *B*. There are also two small springs, *L*, of different strength, to depress the long lever and prevent its being jerked away from its knife-edge by a sudden movement. In experiments on the lower animals an intracardiac c. is used, consisting of a tube, properly curved for insertion into the heart through the jugular vein, and furnished with two small elastic bags—one, *V*, at the extremity, to rest within the ventricle, and the other, *O*, at such a distance from the first as to rest within the auricle. The bags communicate with a registering apparatus by separate compartments of the tube, ending in separate tubes, *TO* and *TV*. There is also a third tube, *TC*, having a similar bag, *C*, at its free end, which is secured in an incision over the situation of the apex-beat; this, too, communicates with the registering apparatus. [A, 333, 429, 440; "Med.-chir. Trans.," lviii, p. 359 (A, 411); K.] Cf. Pansphygmograph and Polygraph.

CARDIOGRAPHIC, adj. Ka^{3}rd-i^2-o-gra^{2}f′i^{2}k. Fr., *cardiographique*. Ger., *cardiographisch*. Pertaining to cardiography or to the cardiograph. [A, 301.]

CARDIOGRAPHY, n. Ka^{3}rd-i^2-o^{2}g′ra^{2}f-i^2. Fr., *cardiographie*. Ger., *Cardiographie*. 1. See Cardiology. [L, 41.] 2. The use of the cardiograph.

CARDIOHYDATIDIE [Piorry] (Fr.), n. Ka^{3}rd-i^2-o-ed-a^3-tede. From **καρδία**, the heart, and **ὑδατίς**, a vesicle. Hydatid disease of the heart. [L, 82.]

CARDIOID, adj. Ka^{3}rd′i^2-oid. From **καρδία**, the heart, and **εἶδος**, resemblance. Fr., *cardioïde*. Heart-like. [A, 301.]

CARDIO-INHIBITORY, adj. Ka^{3}rd″i^2-o-i^{2}n-hi^{2}b′i^{2}t-o-ri^2. From **καρδία**, the heart, and *inhibere*, to check. Fr., *cardio-inhibitoire*. Ger., *cardioïnhibitorisch*. Having an inhibitory action on the heart. [α, 17.]

CARDIOLITH, n. Ka^{3}rd′i^2-o-li^{2}th. From **καρδία**, the heart, and **λίθος**, a stone. Fr., *cardiolithe*, *cardiolite*, *cardiolithie* [Piorry]. An incrustation of the heart with calcareous matter. [L, 82.]

CARDIOLOGY, n. Ka^{3}rd-i^2-o^{2}l′o-ji^2. From **καρδία**, the heart, and **λόγος**, understanding. Fr., *cardiologie*. Ger., *Cardiologie*. The anatomy, etc., of the heart. [L, 41.]

CARDIOMALACIA (Lat.), n. f. Ka^{3}rd″i^2-o(o^2)-ma^{2}l(ma^{3}l)-a-(a^3)′si^2(ki^2)-a^3. From **καρδία**, the heart, and **μαλακία**, softness. Fr., *cardiomalacie*, *cardiomalaxie* [Piorry], *cardiomyomalaxie* [Piorry]. Ger., *Herzerweichung*. Softening of the heart. [A, 322; Lobstein (A, 301); L, 82.]

CARDIOMÉGALIE [Piorry] (Fr.), n. Ka^{3}rd-i^2-o-ma-ga^{3}l-e. From **καρδία**, the heart, and **μέγας**, large. Enlargement of the heart. [A, 250.]

CARDIOMÉLANOSIE [Piorry] (Fr.), n. Ka^{3}rd-i^2-o-ma-la^{3}n-oz-e. From **καρδία**, the heart, and **μέλας**, black. Melanosis of the heart. [L, 82.]

CARDIOMETER, n. Ka^{3}rd-i^2-o^{2}m′e^{2}t-u^{5}r. From **καρδία**, the heart, and **μέτρον**, a measure. Fr., *cardiomètre*. See Hæmodynamometer.

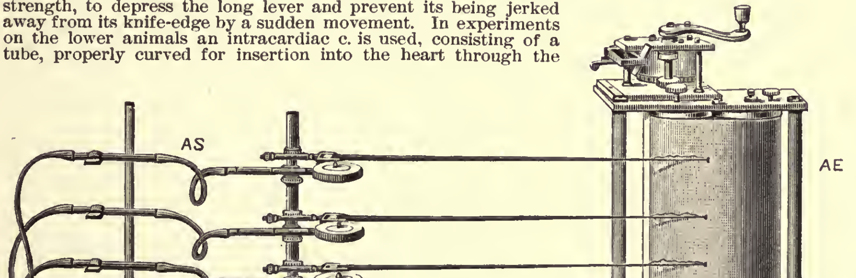
CARDIOMETRY, n. Ka^{3}rd-i^2-o^{2}m′e^{2}t-ri^2. The practice of measuring the area of the heart by percussion. [K.]

CARDIOMYOLIPOSIE [Piorry] (Fr.), n. Ka^{3}rd-i^2-o-me-o-li^{2}p-o-ze. From **καρδία**, the heart, **μῦς**, a muscle, and **λίπος**, fat. Fatty degeneration of the heart muscle. [L, 82.]

CARDIOMYOMALAXIE [Piorry] (Fr.), n. Ka^{3}rd-i^2-o-me-o-ma^{3}l-a^{3}x-e. From **καρδία**, the heart, **μῦς**, a muscle, and **μαλακία**, softness. See Cardiomalacia.

CARDIONCUS (Lat.), n. m. Ka^{3}rd-i^2-o^{2}n^{2}k′u^{3}s(u^{4}s). From **καρδία**, the heart, and **ὄγκος**, a tumor. An aneurysm of the heart or of the aorta near the heart. [L, 84.]

CARDIONÉCROSIE [Piorry] (Fr.), n. Ka^{3}rd-i^2-o-na-kro-ze. From **καρδία**, the heart, and **νέκρωσις**, death. Gangrene of the heart. [L, 82.]



CARDIONOSOS (Lat.), **CARDIONOSUS** (Lat.), n's f. Ka^{3}rd-i^2-on(o^{2}n)′o^{2}s-o^{2}s, -u^{3}s(u^{4}s). From **καρδία**, the heart, and **νόσος**, disease. Fr., *cardionose*. Ger., *Herzkrankheit*. Any disease of the heart. [A, 301, 322; L, 44.]

CARDIOPALMUS (Lat.), n. m. Ka^{3}rd-i^2-o(o^2)-pa^{2}l(pa^{3}l)′-mu^{3}s(mu^{4}s). From **καρδία**, the heart, and **παλμός**, agitation. Fr., *cardiopalmie*, *cardiopalme*. Ger., *Cardiopalmie*, *Herzklopfen*. Palpitation of the heart. [A, 326.]

CARDIOPARAPLASIS (Lat.), **CARDIOPARAPLASMUS** (Lat.), n's f. and m. Ka^{3}rd″i^2-o(o^2)-pa^{2}r(pa^{3}r)-a^{2}p-(a^{3}p)′la^{2}s(la^{3}s)-i^{2}s, a^{2}p(a^{3}p)-la^{2}z-(la^{3}s)′mu^{3}s(mu^{4}s). From **καρδία**, the heart, and **παραπλάζειν**, to lead astray. Malformation of the heart. [A, 322.]

CARDIOPATHIA (Lat.), n. f. Ka^{3}rd-i^2-o(o^2)-pa^{2}th(pa^{3}th)′-i^2-a^3. See Cardiopathy.

CARDIOPATHIE (Fr., Ger.), n. Ka^{3}rd-i^2-o-pa^{3}t-e, -e′. See Cardiopathy.—**C's artérielles** [Huchard]. Certain affections of the heart which occur in the course of general sclerotic processes, especially arterio-sclerosis. They may affect the aorta alone, the auriculo-ventricular and aortic valves, the coronary arteries and their branches, or the muscular interstices and the muscular fibre

THE INTRACARDIAC CARDIOGRAPH. (FROM FLINT, AFTER CHAUVEAU AND MAREY.)

itself. They commonly reveal themselves suddenly by an attack of acute asystole brought on by some trifling cause. [" Bull. gén. de thérap.," Oct. 15, 1886, p. 302 (*a*, 18).]—**C. de la ménopause** [E. Clément]. Ger., *C. der Menopause.* A progressive functional disturbance of the heart associated with the menopause; characterized at first by attacks of palpitation and precordial distress at night, afterward by dyspnœa in addition, with syncopal seizures. [" Lyon méd.," Aug. 3, 1884, p. 433.]—**C. scarlatineuse.** Disease of the heart due to scarlet fever. [" Union méd.," March 17, 1887, p. 426 (*a*, 18).]

CARDIOPATHY, n. Ka^{3}rd-i^2-o^{2}p′a^{2}th-i^2. Lat., *cardiopathia* (from καρδία, the heart, and πάθος, suffering). Fr., *cardiopathie.* Ger., *Cardiopathie.* Disease of or distress in the heart. [A, 301, 322.]

CARDIOPERICARDITIS (Lat.), n. f. Ka^{3}rd″i^2-o(o^2)-pe^{2}r-i^2-ka^{3}rd-i(e)′ti^{2}s. Gen., *cardiopericardit′idis.* For deriv., see CARDIA, PERICARDIUM, and *-itis**. Fr., *cardiopéricardite.* Inflammation of the heart and pericardium. [L, 41.]

CARDIOPETALEÆ (Lat.), n. f. pl. Ka^{3}rd″i^2-o(o^2)-pe^{2}t-a^{2}l-(a^{3}l)′e^2-e(a^3-e^2). Fr., *cardiopétales.* Of Reichenbach, a section of anonaceous plants comprising *Cardiopetalum* (*Aberemoa*), etc. [B, 170.]

CARDIOPETALOUS, adj. Ka^{3}rd-i^2-o-pe^{2}t′a^{2}l-u^{3}s. From καρδία, the heart, and πέταλον (see PETAL). Fr., *cardiopétale.* Having heart-shaped petals. [L, 41.]

CARDIOPHTHARSIS (Lat.), n. f. Ka^{3}rd″i^2-o^{2}f-tha^{3}r′si^{2}s. Gen., *cardiophthars′eos (-is).* From καρδία, the heart, and φθείρειν, to corrupt. A destructive affection (*e. g.*, ulceration) of the heart. [A, 322.]

CARDIOPHTHARTICUS (Lat.), adj. Ka^{3}rd″i^2-o^{2}f-tha^{3}rt′-i^{2}k-u^{3}s(u^{4}s). Pertaining to cardiophtharsis. [A, 322.]

CARDIOPHYLLOUS, adj. Ka^{3}rd-i^2-o-fi^{2}l′u^{3}s. From καρδία, the heart, and φύλλον, a leaf. Fr., *cardiophylle.* Having heart-shaped leaves. [L, 41.]

CARDIOPHYMIE [Piorry] (Fr.), n. Ka^{3}rd-i^2-o-fem-e. From καρδία, the heart, and φῦμα, a growth. Tuberculosis of the heart. [L, 82.]

CARDIOPLECTIC, adj. Ka^{3}rd-i^2-o-ple^{2}k′ti^{2}k. Lat., *cardioplecticus.* Fr., *cardioplectique.* Pertaining to cardioplegia. [A, 322.]

CARDIOPLEGIA (Lat.), n. f. Ka^{3}rd-i^2-o(o^2)-ple(pla)′ji^2(gi^2)-a^3. From καρδία, the heart, and πληγή, a stroke. Fr., *cardioplégie.* Ger., *Cardioplegie, Herzschlag, Herzlähmung.* 1. Paralysis or sudden failure of the heart. [L, 44, 81.] 2. Spasmodic contraction and relaxation of the cardiac orifice of the stomach. [A, 322.]

CARDIOPLEGICUS (Lat.), adj. Ka^{3}rd-i^2-o(o^2)-ple(pla)′ji^{2}k-(gi^{2}k)-u^{3}s(u^{4}s). See CARDIOPLECTIC.

CARDIOPLETHORA (Lat.), n. f. Ka^{3}rd-i^2-o(o^2)-ple^{2}th(plath)-o′ra^3. For deriv., see CARDIA and PLETHORA. Engorgement of the substance of the heart. [A, 322.]

CARDIOPNEUMATIC, adj. Ka^{3}rd-i^2-o-nu^2-ma^{2}t′i^{2}k. From καρδία, the heart, and πνεῦμα, a breath. Fr., *cardio-pneumatique.* Ger., *cardiopneumatisch.* Relating to the heart and the lungs, especially to the action of the heart in producing or modifying respiratory movements. [J, 54, 55, 57; K, 16.]

CARDIOPNEUMOGRAPH, n. Ka^{3}rd″i^2-o-nu^2′mo-gra^{3}f. From καρδία, the heart, πνεῦμα, a breath, and γραφειν, to write. An instrument devised by Landois for estimating the cardiopneumatic effect of the systole and diastole of the heart. It consists essentially of a tambour which is connected with a tube that is held between the lips. The slightest movements of inspiration and expiration are communicated to the sensitive drum and to a lever-index which registers the curves of variation upon a revolving cylinder. [K, 19.]

CARDIOPNEUMOGRAPHIC, adj. Ka^{3}rd″i^2-o-nu^2-mo-gra^{2}f′i^{2}k. Ger., *cardiopneumographisch.* Pertaining to the cardiopneumograph or to a curve produced with it. [J, 57.]

CARDIOPNEUMOGRAPHY, n. Ka^{3}rd-i^2-o-nu^2-mo^{2}g′ra^{2}f-i^2. The use of the cardiopneumograph. [*a*, 17.]

CARDIOPOLYÆMIA (Lat.), n. f. Ka^{3}rd″i^2-o(o^2)-po^{2}l-i^2(u^6)-em′(a^3′e^{2}m)-i^2-a^3. From καρδία, the heart, πολύς, much, and αἷμα, blood. See CARDIOPLETHORA.

CARDIOPTERIDEÆ (Lat.), n. f. pl. Ka^{3}rd-i^2-o^{2}p-te^{2}r-i^{2}d′e^2-e(a^3-e^2). From καρδία, the heart, and πτέρον, a wing or fin. Of Blume and of H. Baillon, a family of plants related to the *Boragineæ* and *Verbenaceæ*, consisting of the single genus *Cardiopteris.* [B, 170, 214.]

CARDIOPTERIS [Wallich] (Lat.), n. f. Ka^{3}rd-i^2-o^{2}p′te^{2}r-i^{2}s. A genus of plants of doubtful botanical affinities, but probably to be referred to the gamopetalous dicotyledons; so called from the heart-shaped winged fruit. [B, 121.]—**C. Rumphii** [H. Baillon]. Fr., *cambar, igname blanche* (ou *commune*), *liane à raves.* A climbing herb with a milky juice and a root which is edible, though purgative to those unaccustomed to it. [B, 121, 173, 214.]

CARDIOPTEROUS, adj. Ka^{3}rd-i^2-o^{2}p′te^{2}r-u^{3}s. Fr., *cardioptère.* Having heart-shaped wings or fins. [L, 41.]

CARDIOPHTHALMOS (Lat.), n. m. Ka^{3}rd-i^2-o^{2}f-tha^{2}l(tha^{3}l)′-mo^{2}s. From καρδία, the heart, and ὀφθαλμός, the eye. An old term for exophthalmic goître. [F.]

CARDIO-PULMONARY, CARDIO-PULMONIC, adj's. Ka^{3}rd″i^2-o-pu^{3}l′mon-a-ri^2. -pu^{3}l-mo^{2}n′i^{2}k. For deriv., see CARDIA and PULMO. Fr., *cardio-pulmonaire.* Relating to the heart and lungs.

CARDIO-PUNCTURE, n. Ka^{3}rd′i^2-o-pu^{3}n^{2}k′tu^{2}r. From καρδία, the heart, and *punctura*, a puncture. Fr., *c.-p.* An experimental puncture of the heart in an animal with the tip of a needle, the motions of the free end of which give a tracing of the cardiac movements. [L, 49.]

CARDIO-PYLORIC, adj. Ka^{3}rd″i^2-o-pil-o^{2}r′i^{2}k. For deriv., see CARDIA and PYLORUS. Pertaining to the cardial and pyloric regions. [B, 100.]

CARDIORRHECTICUS (Lat.), adj. Ka^{3}rd″i^2-o^{2}r-rek(rak)′-ti^{2}k-u^{3}s(u^{4}s). Pertaining to cardiorrhexis. [A, 322.]

CARDIORRHEUMA (Lat.), n. n. Ka^{3}rd″i^2-o^{2}r-ru^{2}m′a^3. Gen., *cardiorrheum′atos (-is).* For deriv., see CARDIA and RHEUMATISM. Rheumatism of the heart. [A, 322.]

CARDIORRHEXIS (Lat.), n. f. Ka^{3}rd″i^2-o^{2}r-re^{2}x(rax)′i^{2}s. Gen., *cardiorrhex′eos (-is).* From καρδία, the heart, and ῥῆξις, rupture. Fr., *cardiorrhexie, déchirure du cœur.* Ger., *Zerreissung des Herzens.* Rupture of the heart. [A, 301, 322.]

CARDIORRHOIS (Lat.), n. f. Ka^{3}rd-i^2-o^{2}r′ro(ro^2)-i^{2}s(es). Gen., *cardiorrhoi′dos (-is).* From καρδία, the heart, and ῥεῖν, to flow. Ger., *perverse Hämorrhoidal-Krankheit des Herzens.* A name said to have been applied to a hæmorrhoidal affection of the heart. [A, 322.]

CARDIOSCIRRHOSIE [Piorry] (Fr.), n. Ka^{3}rd-i^2-o-si^{2}r-o-ze. From καρδία, the heart, and σκιῤῥός, a hard swelling. Scirrhus of the heart. [L, 82.]

CARDIOSCLEROSIS (Lat.), n. f. Ka^{3}rd″i^2-o(o^2)-skle^{2}r(sklar)-os′i^{2}s. Gen., *cardiosclerosʹeos (-is).* From καρδία, the heart, and σκληροῦν, to harden. Fr., *cardiosclérose, cardiosclérosie* [Piorry], *endurcissement du cœur.* Ger., *Verhärtung des Herzens.* Induration of the heart. [Lobstein (L, 44); L, 82.]

CARDIOSCOPE, n. Ka^{3}rd′i^2-o-skop. From καρδία, the heart, and σκοπεῖν, to examine. Fr., *c.* Ger., *Cardioskop.* An instrument for studying the cardiac movements. [Czermak (A, 385).]

CARDIOSPERMEÆ (Lat.), n. f. pl. Ka^{3}rd-i^2-o(o^2)-spu^{5}rm-(spe^{2}rm)′e^2-e(a^3-e^2). From καρδία, the heart, and σπέρμα, a seed. Of Reichenbach, a subdivision of the *Paullinieæ*, comprising *Cardiospermum*, etc. [B, 170.]

CARDIOSPERMON (Lat.), n. n. Ka^{3}rd-i^2-o(o^2)-spu^{5}rm-(spe^{2}rm)′o^{2}n. 1. See CARDIOSPERMUM. 2. An old name for the *Calendula officinalis.* [B, 121.]

CARDIOSPERMUM (Lat.), n. n. Ka^{3}rd-i^2-o(o^2)-spu^{5}rm-(spe^{2}rm)′u^{3}m(u^{4}m). Fr., *cardiosperme.* Of Linnæus, a genus of sapindaceous tropical climbing shrubs or herbs, named from the heart-shaped scars on the seeds. [B, 19, 121.]—**C. corindum** [Linnæus]. A Brazilian species, but little known, resembling *C. halicacabum.* [B, 211, 214.]—**C. halicacabum** [Linnæus]. Bengal., *nayaphataki, lataphatakari.* Sanscr., *jyantishamati.* Fr., *pois-de-cœur, pois de merveille, cœur des Indes.* Ger., *gemeiner Herzsamen, Herzerbsen, Wundererbsen, schwarze Schlutten.* The common heart-seed, winter cherry, or heart-pea; a tropical species found in both hemispheres. The mucilaginous root is employed as a diuretic, diaphoretic, and laxative, and is used especially in diseases of the bladder. The leaves are eaten as a vegetable in the Moluccas, and are employed on the Malabar coast as a remedy in pulmonary diseases. Mixed with castor-oil, they are used internally for rheumatism and lumbago, and, boiled with oil and juggery, are applied to sore eyes. The whole plant, boiled with oil, is used externally in bilious disorders; mixed with water, it is applied to stiff and rheumatic limbs; and, infused with milk, is employed to soften hard swellings. The seeds are said to be edible. [A, 479; B, 19, 121, 172.]

CARDIOSPHYGMOGRAPH, n. Ka^{3}rd″i^2-o-sfi^{2}g′mo-gra^{3}f. From καρδία, the heart, σφυγμός, a throb, and γράφειν, to write. See CARDIOGRAPH.

CARDIOSTÉIE [Piorry] (Fr.), n. Ka^{3}rd-i^2-o-sta-e. Calcification of the heart. [L, 82.]

CARDIOSTENOMA (Lat.), **CARDIOSTENOSIS** (Lat.), n's n. and f. Ka^{3}rd-i^2-o(o^2)-ste^{2}n-o′ma^3, -si^{2}s. Gen., *cardiosteno′matos (-is), -o′seos (-is).* From καρδία, the heart, and στένωμα, a strait, or στένωσις, constriction. Fr., *cardiosténome, cardiosténose, cardiosténie* [Piorry], *cardiosténosie* [Piorry]. Ger., *Verengerung der Herzmündungen, Herzverengerung.* Constriction of the heart or of any of its cavities or orifices. (Properly, *cardiostenosis* means only the process of formation of a *cardiostenoma.*) [A, 301, 322; L, 81, 82.]

CARDIOTOMY, n. Ka^{3}rd-i^2-o^{2}t′o^{2}m-i^2. Lat., *cardiotomia* (from καρδία, the heart, and τέμνειν, to cut). Fr., *cardiotomie.* Dissection or the anatomy of the heart. [A, 385; L, 41.]

CARDIO-TOPOGRAPHY, n. Ka^{3}rd″i^2-o-to^{2}p-o^{2}g′ra^{2}f-i^2. From καρδία, the heart, τόπος, a locality, and γράφειν, to describe. The topographical anatomy of the heart, also the art of ascertaining its situation, size, and shape during life. [A. F. Rasori, "Gazz. degli Ospit.," v, 1884, p. 315.]

CARDIO-TOXIC, adj. Ka^{3}rd″i^2-o-to^{2}x′i^{2}k. From καρδία, the heart, and τοξικόν, a poison. Acting as a poison to the heart. [B.]

CARDIOTRAUMA (Lat.), **CARDIOTRAUSIS** (Lat.), n's, n. and f. Ka^{3}rd″i^2-o(o^2)-tra^4′(tra^3′u^4)-ma^3, -si^{2}s. Gen., *cardiotraum′atos (-is), -trau′seos (-is).* From καρδία, the heart, and τραῦμα, a wound, or τέρειν, to wound. Fr., *cardiotraumie* [Piorry], *cardiotraumatie* [Piorry]. Ger., *Herzwunde, Verwundung des Herzens, Herztraumatismus.* Traumatism of the heart. [A, 250, 322.]

CARDIOTROMUS (Lat.), n. m. Ka^{3}rd-i^2-o^{2}t′rom(ro^{2}m)-u^{3}s-(u^{4}s). From καρδία, the heart, and τρόμος, a quivering. Ger., *Herzzittern.* Fluttering of the heart. [L, 50.]

CARDIOTROPHE (Lat.), **CARDIOTROPHIA** (Lat.), n's f. Ka^{3}rd-i^2-o^{2}t′ro^{2}f-e(a), -o(o^2)-trof(tro^{2}f)′i^2-a^3. From καρδία, the heart, and τροφή, nutrition. The nutrition of the heart; of Piorry, its volume. [A, 322.]

CARDIOTROTUS (Lat.), n. m. Ka^{3}rd-i^2-o(o^2)-trot′u^{3}s(u^{4}s). Gr., καρδιότρωτος (from καρδία, the heart, and τρωτός, wounded). Fr., *cardiotrote.* A person wounded in the heart. [Galen (A, 325).]

CARDIO-VASCULAR, adj. Ka^{3}rd″i^2-o-va^{2}s′ku^{2}l-a^{3}r. From καρδία, the heart, and *vas*, a vessel. Fr., *cardio-vasculaire.* Pertaining to the heart and the blood-vessels; belonging to the vascular system. [“Arch. de physiol. norm. et path.,” 1877 (J).]

CARDIOZOOTIE [Piorry] (Fr.), n. Ka^{3}rd-i^2-o-zo-o-te. From καρδία, the heart, and ζῷον, a living creature. The presence of entozoa in the heart. [L, 82.]

CARDIPERICARDITIS (Lat.), n. f. Ka^{3}rd″i^2-pe^{2}r-i^2-ka^{3}rd-i(e)′ti^{2}s. Fr., *cardipéricardite.* See Cardiopericarditis.

CARDIR, n. An alchemical name for tin. [B, 50.]

CARDITACEA [Menke] (Lat.), n. n. pl. Ka^{3}rd-i^{2}t-a(a^3)′se^2-(ke^2)-a^3. Fr., *carditacés.* A family of the *Lamellibranchiata.* [L, 180.]

CARDITIC, adj. Ka^{3}rd-i^{2}t′i^{2}k. Lat., *carditicus.* Fr., *carditique.* Pertaining to the heart or to carditis.

CARDITIDÆ (Lat.), n. f. pl. Ka^{3}rd-i^{2}t′i^{2}d-e(a^3-e^2). A family of the**Lamellibranchiata.* [“Proc. of the Zool. Soc.,” 1881, p. 705 (L).]

CARDITIS (Lat.), n. f. Ka^{3}rd-i(e)′ti^{2}s. Gen., *cardit′idis.* For deriv., see Cardia and *-itis.** Fr., *carditie.* Ger., *Herzentzündung.* Inflammation of the heart, especially of its muscular tissue. [Bouillaud (A, 301).]

CARDIUM (Lat.), n. n. Ka^{3}rd′i^2-u^{3}m(u^{4}m). Fr., *bucarde.* The cockle, a genus of the *Cardiadæ.* [L, 227.]—**C. edule.** A species the powdered shell of which is used medicinally by the Chinese. [L, 75.]

CARDIVALVULITE [Bouillaud] (Fr.), n. Ka^{3}rd-i^2-va^{3}lv-u^{6}l-et. An endocarditis affecting the valves only. [L, 88.]

CARDIYPERTROPHE (Lat.), **CARDIYPERTROPHIA** (Lat.), n′s f. Ka^{3}rd″i^2-i(u^6)-pu^{5}r(pe^{2}r)′tro(tro^2)-fe(fa), -pu^{5}r(pe^{2}r)-trof(tro^{2}f)′i^2-a^3. For deriv., see Cardia and Hypertrophy. Hypertrophy of the heart. [A, 322.]

CARD-LEAF-TREE, n. Ka^{3}rd′lef-tre. In the West Indies, the genus *Clusia.* [B, 19.]

CARDO (Lat.), n. f. Ka^{3}rd′o. Gen., *card′inis.* 1. See Ginglymus. 2. See Axis (8th def.). 3. In certain insects, the basal joint of the maxilla. [L, 84, 96, 196, 210.]

CARDO (Sp.), n. Ka^{3}rd′o. 1. A thistle. 2. The *Carduus* and other spiny plants. [B, 121.]—**C. alcachofero, C. comestible.** The artichoke. [A, 447.]—**C. corredor.** The genus *Eryngium.* [B, 121.]—**C. de María, C. mariano.** The *Silybum marianum.* [B, 121.]—**C. santo.** 1. Of the Sp. Ph. and Mex. Ph., the herb and flowers of *Centaurea benedicta.* 2. Of tropical America, the *Argemone mexicana.* [A, 447; B, 95, 121.]

CARDOBENEDICTEN (Ger.), n. Ka^{3}rd-o-be^{2}n-e^2-di^{2}kt′e^{2}n. The *Centaurea benedicta.* [L, 80.]—**C′extract.** See *Extractum* carduі *benedicti.*—**C′kraut** [Ger. Ph.]. The herb of *Centaurea benedicta.* [B, 205.]—**C′syrup.** A syrup made from *Centaurea benedicta.* [B; L, 80.]—**C′tinctur.** See *Tinctura* carduі *benedicti.*

CARDOL, n. Ka^{3}rd′o^{2}l. Lat., *cardoleum, cardolum.* Fr., *c., cardole.* Ger., *C.* An acrid oil derived from the pericarp of the fruit of *Anacardium occidentale* (the cashew-nut); a yellowish liquid, $C_{24}H_{31}O_2$, very irritating, insoluble in water, soluble in alcohol and in ether. [L, 172; Städler (L, 87).]

CARDOLEUM (Lat.), n. n. Ka^{3}rd-ol(o^{2}l)′e^2-u^{3}m(u^{4}m). See Cardol.—**C. pruriens.** An ethereal extract of the fruit of *Anacardium orientale*; a rubefacient. [Vogl (A, 319).]—**C. vesicans.** An ethereal extract of the fruit of *Anacardium occidentale*; a vesicant. [Vogl (A, 319).]

CARDON (Fr.), n. Ka^{3}rd-o^{2}n^2. The *Cynara carduncuIus.* [B, 121.]—**C. d'Espagne.** 1. Of Duchesne, the spinose variety of *Cynara carduncuIus.* 2. Of Baillon, the *Scolymus hispanicus.* [B, 121, 173.]—**C. de Tours.** The unarmed (non spinose) variety of *Cynara carduncuIus.* [B, 173.]

CARDONCELLE (Fr.), n. Ka^{3}rd-o^{2}n^2-se^{2}l. The genus *Carduncellus.* [B, 121.]

CARDONE (Ger.), n. Ka^{3}rd-on′e^2. The *Cynara carduncuIus.* [B, 180.]—**C.-Artischocke.** See *C.*

CARDONET, n. Ka^{3}rd-o^{2}n-e^{2}t.′ Fr., *cardonnette.* The *Cynara carduncuIus.* [B, 88, 173.]

CARDONIUM [Paracelsus], n. An old preparation made by infusing certain herbs in new wine, and filtering. [Ruland, Johnson (A, 325).]

CARDOON, n. Ka^{3}rd-un′. The *Cynara scolymus.* [B, 215.]

CARDOPAT (Fr.), **CARDOPATE** (Fr.), n′s. Ka^{3}rd-o-pa^3, -pa^{3}t. See Cardopatium.

CARDOPATEÆ [Lessing] (Lat.), n. f. pl. Ka^{3}rd-o(o^2)-pa^{2}t-(pa^{3}t)′e^2-e(a^3-e^2). A subtribe of composite plants (*Cynareæ*) consisting of the single genus *Cardopatium.* [B, 170.]

CARDOPATHIA (Lat.), n. f. Ka^{3}rd-o(o^2)-pa^{2}th(pa^{3}th)′i^2-a^3. The *Carlina acaulis.* [B.]

CARDOPATHIUM (Lat.), n. n. Ka^{3}rd-o(o^2)-pa^{2}th(pa^{3}th)′i^2-u^{3}m(u^{4}m). See Cardopatium.

CARDOPATIA (Lat.), n. f. Ka^{3}rd-o(o^2)-pa(pa^3)′shi^2(ti^2)-a^3. See Cardopathia.

CARDOPATIEÆ [Schultz] (Lat.), n. f. pl. Ka^{3}rd-o(o^2)-pa^{2}t-(pa^{3}t)-i(i^2)′e^2-e(a^3-e^2). See Cardopateæ.

CARDOPATIUM [Jussieu] (Lat.), **CARDOPATUM** [Persoon] (Lat.), n′s n. Ka^{3}rd-o(o^2)-pa(pa^3)′shi^2(ti^2)-u^{3}m(u^{4}m), -tu^{3}m-(tu^{4}m). 1. See Cardopathia. 2. Of Jussieu, a genus of composite plants belonging to the *Cynaroideæ*, comprising northern African and Oriental species. [B, 121.]—**C. corymbosum** [Jussieu]. Ger., *doldentraubige Giftdistel.* Syn.: *Carthamus corymbosus* [Linnæus], *Onobroma corymbosum* [Sprengel]. *Brotera corymbosa* [Willdenow]. A perennial species of *C.* (2d def.), found in Europe and northern Africa. The root (the χαμαιλέων μέλας of Hippocrates and Dioscorides) was formerly used topically in the itch and other cutaneous affections, to arrest gangrene, and for toothache. [B, 19, 180.]—**Radix cardopatii.** The root of *Carlina acaulis.* [B.]

CARDOUILA, n. In Languedoc, the *Carlina acaulis.* [B, 121.]

CARDOUILLE (Fr.), n. Ka^{3}rd-u-el-y′. In central France, the *Carlina acaulis.* [B, 80.]

CARDOUILLES (Fr.), n. Ka^{3}rd-u-el-y′. According to Baillon, the different species of *Carlina*; according to Duchesne, the *Scolymus hispanicus.* [B, 121, 173.]

CARDOUSSES, n. In Languedoc, the *Scolymus hispanicus.* [B, 121, 173.]

CARDUACEÆ (Lat.), n. f. pl. Ka^{3}rd-u^2(u^4)-a(a^3)′se^2(ke^2)-e-(a^3-e^2). Fr., *carduacées.* 1. Of Necker, an order of plants comprising *Serratula, Carduus*, and *Centaurea.* 2. Of De Candolle, a division of the *Compositæ* (*Cynarocephalæ*), comprising *Cardopatium, Carduncellus, Carthamus, Onopordum, Arctium, Lappa, Silybum, Carduus, Serratula, Rhaponticum, Chuquiraga, Cirsium, Cynara, Carlina, Atractylis*, etc. [B, 170.]

CARDUACEOUS, adj. Ka^{3}rd-u^2-a′shu^{3}s. Lat., *carduaceus.* Fr., *carduacé.* Belonging to the *Carduaceæ* or resembling the genus *Carduus.* [A, 385.]

CARDUEÆ [C. Koch] (Lat.), n. f. pl. Ka^{3}rd-u^2(u^4)′e^2-e(a^3-e^2). A subdivision of the *Cynarocephalæ*, comprising *Cirsium, Carduus, Oligochæta*, and *Lappa.* [B, 170.]

CARDUÈLE (Fr.), n. Ka^{3}rd-u^6-e^{2}l. A name for several *Agarici* growing among the species of *Rubus* and the thistles. [Micheli (B, 121).]

CARDUELIS (Lat.), n. f. Ka^{3}rd-u^2(u^4)-e(a)′li^{2}s. A bird feeding among thistles; of Pliny, the linnet. Its excrement was formerly used as a remedy for convulsions in children, and its flesh, roasted, for colic. [A, 318, 325; L, 94.]

CARDUI (Lat.), n. m. pl. Ka^{3}rd′u^2(u^4)-i(e). Of Adanson, a section of the *Compositæ*, comprising *Carthamus, Carlina, Carbeni, Atractylis, Carduncellus, Calcitrapa, Silybum, Lappa, Cirsium, Carduus*, etc. [B, 170.] Cf. Carduaceæ (2d def.).

CARDUINÆ [Reichenbach] (Lat.), n. f. pl. Ka^{3}rd-u^2(u^4)-i(e)′-ne(na^3-e^2). A section of the *Carduaceæ*, comprising the *Silybeæ, Cynareæ, Lamyreæ*, and the *Carduineæ genuinæ* (the *Carduineæ veræ* of Cassini). [B, 170.] Cf. Carduineæ *archetypæ.*

CARDUINEÆ (Lat.), n. f. pl. Ka^{3}rd-u^2(u^4)-i^{2}n′e^2-e(a^3-e^2). Of Cassini and succeeding authors, a tribe of the *Compositæ*, comprising the *Serratuleæ* and *C. archetypæ*; or, in a later classification, the divisions *Carthameæ, Rhaponticeæ, Serratuleæ, Silybeæ, Cinareæ* (*Cynareæ*), and *Lamyreæ.* As defined by Bentham and Hooker, they are a subtribe of the *Cynaroideæ*, comprising *Carduus, Cnicus, Onopordon, Cynara, Silybum, Arctium*, etc. [B, 121, 170, 215.]—**C. archetypæ** [Cassini]. A subtribe of the *C.*, comprising the divisions *Silybeæ, Cynareæ, Lamyreæ*, and *C. veræ.* [B, 170.]—**C. legitimæ** [Schultz]. A section of the *Eucarduineæ*, consisting of the single genus *Carduus.* [B, 170.]—**C. veræ** [Cassini]. A division of the *C. archetypæ*, comprising *Cirsium, Carduus*, etc. [B, 170.]

CARDUINEOUS, adj. Ka^{3}rd-u^2-i^{2}n′e^2-u^{3}s. Belonging to the *Carduineæ.* [B.]

CARDUMENI, n. The cardamom. [B, 121.]

CARDUNCELLUS (Lat.), n. m. Ka^{3}rd-u^{3}n(u^{4}n^2)-se^{2}l(ke^{2}l)′lu^{3}s-(lu^{4}s). Fr., *cardoncelle.* Of Adanson, a genus of the *Compositæ*, resembling *Carthamus.* [B, 19, 42, 121.]

CARDUNCULUS (Lat.), n. m. Ka^{3}rd-u^{3}n^2(u^{4}n^2)′ku^{2}l(ku^{4}l)-u^{3}s-(u^{4}s). The *Senecio vulgaris.* [B, 180.]

CARDUO-CNICUS (Lat.), n. m. Ka^{3}rd″u^2(u^4)-o(o^2)-kni(kne)′-ku^{3}s(ku^{4}s). The *Carthamus lanatus.* [B.]—**C.-c. atractylis dicta.** See *C.*

CARDURE (Fr.), n. Ka^{3}rd-u^{6}r. The genus *Dipsacus.* [L, 41.]

CARDUUS (Lat.), n. m. Ka^{3}rd′u^2(u^4)-u^{3}s(u^{4}s). 1. A thistle. 2. The artichoke. 3. Of Linnæus, the plumeless thistle; a genus of composite plants of the tribe *Cynaroideæ*, subtribe *Carduineæ*, differing from *Cnicus* in the naked or almost naked bristles of the pappus. [A, 318; B, 42, 121, 215.]—**Aqua cardui benedicti.** Fr., *eau* (ou *hydrolat*) *de chardon bénit.* A preparation made by distilling the herb of *Centaurea benedicta* with water, or by distilling the juice of the plant; official in several old formularies. [B, 119.]—**Cardui benedicti herba** [Gr. Ph.]. The herb of *Centaurea benedicta.* [B, 95.]—**C. acanthifolia** [Lamarck]. Probably the *Cnicus oleraceus.* [B, 173.]—**C. acanthium dictus** [Volck.]. The *Onopordon acanthium.* [B, 200.]—**C. acanthus.** The genus *Acanthus.* [B.]—**C. acarna** [Linnæus]. The *Carlina* (*Picnomon*) *acarna.* [B, 180.]—**C. alatus tomentosus latifolius vulgaris** [“Hist. Oxon.”]. The *Onopordon acanthium.* [B, 200.]—**C. albis maculis notatus vulgaris** [C. Bauhin]. The *Silybum marianum.* [B, 200.]—**C. altilis.** The artichoke. [B, 200.]—**C. anglicanus.** The *Carlina acaulis.* [B, 180.]—**C. anglicus** [Lamarck]. The *Cnicus anglicus* (*pratensis*). [B, 173.]—**C. arvensis** [Eng. Bot.]. The *Cnicus arvensis.* [B, 180, 215.]—**C. benedictus.** The *Centaurea benedicta*; of the Netherl. Ph., its herb. [B, 95, 180.]—**C. brasilianus.** The pineapple. [B, 200.]—**C. Casabonæ** [Linnæus]. The *Cnicus Casabonæ.* [B, 42, 214.]—**C. ceanothos** [Parkinson]. The *Cnicus arvensis.* [B, 200.]—**C. chamæleon dictus,** etc. [“Hist. Oxon.”]. The *Cardopatium corymbosum.* [B, 200.]—**C. cnicus silvestris.** The *Centaurea benedicta.* [L, 119.]—**C. cyanoides** [Linnæus]. The *Jurinea cyanoides.* [B, 180.]—**C. dissectus** [Hudson]. The *Cnicus pratensis.* [B, 173.]—**C. domes-**

O, no; **O^2,** not; **O^3,** whole; **Th,** thin; **Th^2,** the; **U,** like oo in too; **U^2,** blue; **U^3,** lull; **U^4,** full; **U^5,** urn; **U^6,** like ü (German).

ticus. The artichoke. [B, 200.]—**C. eriocephalus** [Dod.], **C. eriophorus** [Linnæus]. The *Cnicus eriophorus.* [B, 173, 180.]—**C. flavus.** The *Argemone mexicana.* [B, 270.]—**C. fullonum.** The *Dipsacus fullonum.* [B, 89.]—**C. hæmorrhoidalis.** The *Cnicus arvensis.* [B, 173.]—**C. helenioides** [Hudson]. The *Cnicus heterophyllus.* [B, 214.]—**C. heterophyllus.** 1. Of Lightfoot, the *Cnicus pratensis.* 2. Of Linnæus, the *Cnicus heterophyllus.* [B, 173.]—**C. humilis gummifera.** The pineapple. [L, 119.]—**C. lacteus.** The *Silybum marianum.* [B, 180.]—**C. lanceolatus** [Linnæus]. The *Cnicus lanceolatus.* [B, 173, 215.]—**C. leucanthemus** [Schw.]. The *Onopordon acanthium.* [B, 200.]—**C. luteus erectus, reticulatus,** etc. [Morison]. The *Carthamus lanatus.* [B, 200.]—**C. lycopifolius** [Villars]. The *Serratula heterophylla.* [B, 214.]—**C. maculatus, C. Mariæ, C. marianus** [Linnæus]. The *Silybum marianum.* [B, 180.]—**C. marianus (semen)** [Netherl. Ph.]. The fruit (achænia) of *Silybum marianum.* [B, 95.]—**C. monspessulanus** [Linnæus]. The *Cnicus pyrenaicus.* [B, 214.]—**C. nutans** [Linnæus]. The musk-thistle, a biennial European species with nodding heads of crimson-purplish, highly odorous flowers; thought to render the milk of cows somewhat bitter. [B, 19, 121, 215.]—**C. oleraceus** [Linnæus]. The *Cnicus oleraceus.* [B, 173.]—**C. onopordon.** The *Onopordon acanthium.* [B, 180.]—**C. pineus.** See Carlina *acaulis.*—**C. polyacanthus** [Lamarck]. The *Cnicus Casabonæ.*—**C. polymorphus** [Lapeyrouse]. The *C. helenioides.* [B, 173.]—**C. pyrenaicus.** The *Cnicus pyrenaicus.* [B, 214.]—**C. sanctus.** See *C. benedictus.*—**C. sativus.** The *Cynara scolymus.* [B, 180.]—**C. sativus carthamus (seu cnicus) dictus** [Pluk.]. The *Carthamus tinctorius.* [B, 200.]—**C. serpens lævicaulis** [J. Bauhin], **C. serratuloides** [Necker]. The *Cnicus arvensis.* [B, 173, 200.]—**C. solstitialis.** The *Centaurea calcitrapa.* [B.]—**C. stellatus.** The *Centaurea calcitrapa.* [B, 119.]—**C. stellatus luteus.** The *Centaurea calcitrapa.* [B.]—**C. syriacus** [Linnæus]. The *Cnicus syriacus.*—**C. tinctorius** [Scopoli]. The *Serratula tinctoria.* [B, 180.]—**C. tomentosus, C. tomentosus, acanthi folio, vulgaris** [Tournefort], **C. tomentosus, acanthium dictus, vulgaris** [Ray], **C. tomentosus latifolius silvestris, spina alba dictus** [Herm.]. The *Onopordon acanthium.* [B, 180, 200.]—**C. Veneris.** The *Dipsacus fullonum.* [B, 88.]—**C. viarum et vinearum repens** [Parkinson], **C. vinearum repens sonchi folio** [C. Bauhin]. The *Cnicus arvensis.* [B, 200.]—**C. virginianus.** Of Jacquin, the *Cnicus virginianus;* of Walton, perhaps the *Cnicus repandus.* [B, 214, 215.]—**C. volutans, C. volutans aculeatus.** The *Eryngium campestre.* [B, 180.]—**C. vulgaris** ["Merc. Bot."]. The *Carlina vulgaris.* [B, 200.]—**C. vulgatissimus viarum** [Ger.], **C. vulgatissimus, radice repente, ceonothos Theophrasti** [Merc.]. The *Cnicus arvensis.* [B, 200.]—**C. xeranthemos, flore albo ampliore, acaulis** ["Hist. Oxon."]. The *Carlina acaulis.* [B, 200.]—**C. xeranthemos vulgaris annuus** ["Hist. Oxon."]. The *Carlina vulgaris.* [B, 200.]—**Colschierni c.** A plant resembling the *Atractylis.* [L, 97.]—**Conserva cardui benedicti.** Fr., *conserve de chardon bénit.* A mixture of 1 part of the herb of *Centaurea benedicta* and 2 parts of sugar. [Palat. Disp., 1764, Sax. Ph., 1837 (B, 119).]—**Essentia cardui benedicti.** See *Tinctura cardui benedicti.*—**Extractum cardui benedicti** [Ger. Ph., Russ. Ph., Norweg. Ph., Swed. Ph., Netherl. Ph., Swiss Ph., Gr. Ph., Belg. Ph., Finn. Ph.]. Fr., *extrait de chardon bénit* [Fr. Cod.]. An extract from the herb or leaves of *Centaurea benedicta;* made by infusion or decoction or by inspissation of the juice. [B, 95, 119.]—**Extractum cardui benedicti fluidum.** An extract made from the root of *Centaurea benedicta* by exhausting it with dilute alcohol (such a quantity of the menstruum being employed that a pint of the preparation corresponds to 16 oz. of the root) and adding 6 oz. of sugar to the pint. [G. Dohme, "Proc. of the Am. Pharm. Assoc.," x, p. 77 (B).]—**Extractum cardui tomentosi.** Fr., *extrait de chardon aux ânes.* An extract made by inspissating the juice of the herb of *Onopordon acanthium.* [Disp. fuldens, 1791, Disp. lippiac., 1794 (B, 119).]—**Flores cardui benedicti.** Sp., *cardo santo* [Sp. Ph.]. The flowers of *Centaurea benedicta.* [B, 95.]—**Folia cardui benedicti** [Dan. Ph., Finn. Ph., Norweg. Ph., Russ. Ph., Swed. Ph.]. The leaves of *Centaurea benedicta.* [B, 95.]—**Fructus cardui Mariæ.** The fruit (achænia) of *Silybum marianum.* [B, 95.]—**Herba cardui benedicti** [Ger. Ph., Belg Ph., Finn. Ph., Swiss Ph.]. The herb of *Centaurea benedicta.* [B, 95, 180.]—**Herba cardui eriocephali.** The herb of *Cnicus eriophorus.* [B, 180.]—**Herba cardui hæmorrhoidalis.** The herb of *Cnicus arvensis.* [B, 180.]—**Herba cardui lactei (seu maculati, seu Mariæ, seu mariani).** The herb of *Silybum marianum.* [B, 180.]—**Herba cardui sancti.** The herb of *Centaurea benedicta.* [B, 180.]—**Herba cardui stellati.** The herb of *Centaurea calcitrapa.* [B, 180.]—**Herba cardui vulgaris.** The herb of *Silybum marianum.* [B, 180.]—**Herba recens cardui onopordi (seu tomentosi).** The fresh herb of *Onopordon acanthium.* [B, 180.]—**Infusum cardui benedicti.** See *Tisane de* chardon *bénit.*—**Radix cardui anglicani.** The root of *Carlina acaulis.* [B, 180.]—**Radix cardui lactei (seu maculati).** The root of *Silybum marianum.* [B, 180.]—**Radix cardui onopordi.** The root of *Onopordon acanthium.* [B, 180.]—**Radix cardui stellati.** The root of *Centaurea calcitrapa.* [B, 119.]—**Radix cardui tomentosi.** See *Radix cardui onopordi.*—**Radix cardui volutantis (aculeati).** The root of *Eryngium campestre.* [B, 180.]—**Radix cardui vulgaris.** The root of *Silybum marianum.* [B, 180.]—**Semen cardui benedicti.** The fruit of *Centaurea benedicta.* [B, 180.]—**Semen cardui Mariæ (seu mariani).** The fruit of *Silybum marianum.* [B, 180.]—**Semen cardui sativi.** The fruit of *Cynara scolymus.* [B, 180.]—**Semen cardui vulgaris.** The fruit of *Silybum marianum.* [B, 180.]—**Tinctura cardui benedicti.** Fr., *alcoolé (ou teinture) de chardon bénit.* A preparation made by exhausting 1 part of *Centaurea benedicta* with 4 parts of alcohol. [Brunsw. Ph., 1777, Würtemb. Ph., 1798 (B, 119).]

CARE, n. The *Pyrus aucuparia;* in Coromandel, the *Webera tetrandra* and the *Gmelina cordata.* [B, 121, 275.]

CARE (Lat.), n. n., indecl. Ka(ka^3)′re(ra). See Cara.

CAREA (Lat.), n. n. pl. Ka(ka^3)′re^2-a^3. Of Adanson, a section of the *Umbellatæ,* comprising *Careum* (*Carum*), *Celeri, Tragoselium, Podagraria,* and *Anisum.* [B, 170.]

CAREAR (Lat.), n. n. Ka^{2}r(ka^{3}r)-e(a)′a^{3}r. Gen., *care′atos* (*-is*). Gr., κάρηαρ. See Cara.

CAREBARESIS (Lat.), **CAREBARIA** (Lat.), n's f. Ka^{2}r(ka^{3}r)-e^2(a)-ba^{2}r(ba^{3}r)-e(a)′si^{2}s, -ba^{2}r(ba^{3}r)-i(e)′a^3, -ba(ba^3)′ri^2-a^3. Gen., *carebare′seos* (*-is*), *-bari′æ, -bar′iæ.* Gr., καρηβάρησις, καρηβάρεια, καρηβαρία (from καρεβαρεῖν, to have a heaviness of the head). Fr., *carébarie.* Ger., *drückender Kopfschmerz.* Pain in the head with a sense of heaviness. [A, 301, 322; Galen (A, 325); L, 128.]

CAREBARICUS (Lat.), adj. Ka^{2}r(ka^{3}r)-e^2(a)-ba^{2}r(ba^{3}r)′i^{2}k-u^{3}s(u^{4}s). Gr., καρηβαρικός. Pertaining to carebaria. [A, 322.]

CARE-BŒUF (Fr.), n. Ka^{3}r-bu^{5}f. The *Ononis spinosa.* [B, 173.]

CAREICHE (Fr.), n. Ka^{3}r-e^{2}sh. The genus *Carex.* [B, 173.]

CAREILLADA (Languedoc), **CAREILLADE** (Fr.), **CAREILLADO** (Languedoc), n's. Ka^{3}r-e^{2}l-ya^{3}d-a^3, -ya^{3}d, -ya^{3}d-o. The *Hyoscyamus niger.* [B, 121, 173.]

CARE-KANDEL, n. Of Rheede, an undetermined East Indian shrub belonging to the *Myrtaceæ.* [B, 121.]

CARELA (Hind.), n. The *Momordica charantia.* [B, 172.]

CARELIA (Lat.), n. f. Ka^{2}r(ka^{3}r)-e(a)′li^2-a^3. Fr., *carélie.* 1. Of Adanson, see Ageratum. 2. Of Lessing, a genus of composite shrubs indigenous to Brazil. [B, 42, 121.]

CARELIADO, n. See Careillado.

CARELLI, n. See Caretti.

CARELLONA-CONDI, n. In the East Indies, the *Convolvulus* (*Ipomœa*) *pes-capræ.* [B, 121.]

CARELVE-VEGON (Malay), **CARELVE VENGOU** (Malay), n's. The *Aristolochia indica.* [B, 121, 172.]

CAREMOTTI, n. In Malabar, the *Sapium aucuparium.* [B, 121.]

CARENA, n. An old name for the twenty-fourth part of a drop. [Ruland, Johnson (A, 325).]

CARÉNAL (Fr.), adj. Ka^{3}r-an-a^{3}l. See Carinal.

CARENARIA (Lat.), n. f. Ka^{2}r(ka^{3}r)-e^{2}n(an)-a(a^3)′ri^2-a^3. A vessel in which carenum was made. [A, 318.]

CARENDANG, n. In Java, the *Carissa edulis.* [B, 121.]

CARÈNE (Fr.), n. Ka^{3}r-e^{2}n. See Carina.—**C. à deux pieds.** See Carina *biceps.*—**C. de l'hyoïde** [Cuvier]. See *Urohyal* bone.—**C. dipétale.** See Carina *dipetala.*

CARÉNÉ (Fr.), adj. Ka^{3}r-an-a. See Carinate.

CARENUM (Lat.), n. n. Ka^{2}r(ka^{3}r)-en(an)′u^{3}m(u^{4}m). Gr., κάρηνον (1st def.). κάροινον (2d def.). 1. The head. [Galen (A, 325).] 2. New wine inspissated by boiling; used anciently for vesical calculus, renal disease, and sciatica. [A, 318; B, 200.]

CARET (Fr.), n. Ka^{3}r-a. 1. The *Chelonia* (*Testudo*) *imbricata.* [A, 301; L, 105.] 2. The genus *Carex.* [B, 121.]

CARETELA, n. In the East Indies, the *Corypha umbraculifera.* [B, 121.]

CARETTA-TSJORI-VALLI, n. The *Cissus trilobata.* [Rheede (B, 121).]

CARETTI (Malay), n. The *Cæsalpinia bonduc.* [B, 172.]

CARETTINA (Lat.), n. n. pl. Ka^{2}r(ka^{3}r)-e^{2}t-ti(te)′na^3. A tribe of the *Chelioniadæ.* [L, 256.]

CARETTOCHELYDIDÆ (Lat.), n. f. pl. Ka^{2}r(ka^{3}r)-e^{2}t″to-(to^2)-ke^{2}l(ch^{2}e^{2}l)-i^{2}d(u^{6}d)′i^{2}d-e(a^3-e^2). A family of the *Pleurodira.* [L, 121.]

CARETTOIDEA [Fitzinger] (Lat.), n. n. pl. Ka^{2}r(ka^{3}r)-e^{2}t-to-(to^2)-i^{2}d(ed)′e^2-a^3. Fr., *carettoïdes* [Fitzinger]. A family of the *Chelonidæ.* [L, 180.]

CAREUM (Lat.), n. n. Ka(ka^3)′re^2-u^{3}m(u^{4}m). Of Pliny, the genus *Carum.* [Adanson (B, 121).]—**C. vinum.** See Carenum (2d def.).

CAREX (Lat.), n. f. Ka(ka^3)′re^{2}x(rax). Gen., *car′icis.* Fr., *laîche.* Ger., *Riedgras, Segge.* The sedge; a genus of perennial cyperaceous grass-like herbs of the tribe *Caricinæ* (*Cariceæ*). It comprises from 500 to 1,000 species growing in all parts of the globe and found especially in damp and marshy grounds. [B, 19, 34, 121; Pax (B, 245).]—**C. approximata** [Hoffmann]. A European species identified by Duchesne with *C. leporina* or *C. lagopina.* [B, 173.]—**C. arenaria.** Fr., *laîche des sables, salsepareille d'Allemagne.* Ger., *Sandriedgras, Sandsegge, rothe Quecke.* 1. Of Linnæus, a European species, of which the rhizome—*radix caricis* (seu *caricis arenariæ,* seu *arenariæ,* seu *arenaria,* seu *graminis rubri,* seu *graminis nigri,* seu *graminis majoris,* seu *sarsaparillæ germanicæ,* seu *sarsæ germanicæ*), or German sarsaparilla—has, when fresh, a feebly balsamic odor and a sweetish pungent aromatic taste. It was formerly employed as a diuretic and in herpes, impetigo, and syphilis. 2. Of Leers, a species identified with *C. disticha.* [B, 173, 180.]—**C. disticha** [Hudson]. Fr., *laîche à deux rangs.* Ger., *mittleres Riedgras.* A species found in Europe and North America, very similar to *C. arenaria* (and also known as German sarsaparilla), of which the rhizome is said to be diaphoretic and emollient. It is employed like that of *C. arenaria.* [B, 34, 173, 180.]—**C. hirta** [Linnæus]. Fr., *laîche velu.* Ger., *steifhaariges Riedgras, haarige Segge.* A European species resembling *C. arenaria* in physical characters. It is often substituted for the latter, but the rhizome is less aromatic, and probably has less medicinal value. [B, 173, 180.]—**C. inflata** [Roth]. A species identified by Duchesne with *C. vesicaria.* [B, 173.]—**C. intermedia** [Good.]. The *C. disticha.*

[B, 34, 173.]—**C. Lachenalii** [Schkuhr]. A species identified by Duchesne with *C. lagopina* or *C. leporina*; employed like the latter. [B, 173.]—**C. lagopina** [Wahlberg], **C. leporina** [Linnæus]. Two European species, said to be used by the Tartars in making bed-coverings. [B, 173.]—**C. lithosperma** [Linnæus]. The *Scleria flagellum*. [Kunth; B, 173.]—**C. multiformis** [Thuillier]. A species identified by Duchesne with *C. disticha*. [B, 173.]—**C. pseudo-arenaria** [Persoon]. A species identified by Duchesne with *C. disticha*. [B, 173.]—**C. spicata.** 1. Of Lamarck, the *C. disticha*. 2. Of Thuillier, the *C. vulpina*. [B, 173.]—**C. torrefacea** [Gmelin]. A species identified by Duchesne with *C. vesicaria*. [B, 173.]—**C. vesicaria** [Linnæus]. Fr., *ciseau, rouche, rouchette*. A European species, the dry leaves of which are used like straw for making chairs; and for making garments which protect from cold and absorb sweat. [B, 173.]—**C. vulpina** [Linnæus]. A European species which affords good pasturage for goats and horses, and the culm of which is made into cords. [B, 173.]—**Radix caricis** (seu **caricis arenariæ**), **Rhizoma caricis, Stolones caricis.** The rhizome of *C. arenaria*. [A, 319; B, 180, 270.]

CAREYA [Roxburgh] (Lat.), n. f. Ka′re^2-a^3. Named after *W. Carey*, an English botanist. A genus of myrtaceous plants of the tribe *Barringtonieæ*, indigenous to the East Indies and tropical Australia. [B, 121.]—**C. arborea** [Roxburgh]. A large tree of Coromandel and Malabar. [B, 172.]

CAREZZA (It.), n. Ka^{3}r-e^{2}tz′tza^3. The genus *Carex*. [B, 121.]

CARFUNKEL (Ger.), n. Ka^{3}r′fun^{2}k-e^{2}l. See ANTHRAX and CARBUNCLE.

CARGILLIA [R. Brown] (Lat.), n. f. Ka^{3}r-ji^{2}l(gi^{2}l)′li^2-a^3. See DIOSPYROS.

CARGOBRANCHIATA (Lat.), n. n. pl. Ka^{3}r-go(go^2)-bra^{2}n^2-(bra^{3}n^2)-ki^2(ch^{2}i^2)-a(a^3)′ta^3. Fr., *cargobranches*. See NUCLEOBRANCHIATA.

CARGUA-CARGUA, n. In Peru, the *Cascarilla carua* and the *Cascarilla bullata*. [B, 121.]

CARGUADERO, n. In New Granada, the *Guatteria carcadero*. [B, 121.]

CARHUMFET (Ar.), n. The *Caryophyllus aromaticus*. [B, 121; L, 105.]

CARHUN-KAMMEN, n. In Finland, the *Heracleum sphondylium*. [B, 121; L, 105.]

CARI, n. See CARY.

CARIA (Lat.), n. f. Ka(ka^3)′ri^2-a^3. Of Pliny, the *Juglans regia*. [L, 105.]

CARIACO, n. A small variety of maize much esteemed in British Guiana. [B, 19.]

CARIACON, n. Fr., *c*. A fermented drink made in Cayenne from cassava, sweet potatoes, and sugar-cane. [L, 105.]

CARIAMIDÆ (Lat.), n. f. pl. Ka^{2}r(ka^{3}r)-i^2-a^{2}m(a^{3}m)′i^{2}d-e-(a^3-e^2). 1. A family of the *Alectorides*. [L, 221.] 2. Of Sclater, a family of the *Carinatæ*. [L, 121.]

CARIAMINEÆ (Lat.), n. f. pl. Ka^{2}r(ka^{3}r)-i^2-a^{2}m(a^{3}m)-i^{2}n′-e^2-e(a^3-e^2). Fr., *cariaminées*. See CARIAMIDÆ.

CARIANGAY, n. See ABABANGAY.

CARIA-POETI (Hind.), n. The myrtle. [B, 88, 121.]

CARIARI (Hind.), n. The *Gloriosa superba*. [B, 172.]

CARIAROU, n. In the Antilles, a vine the leaves of which furnish a red pigment. The name is also applied to several species of *Convolvulus*. [B, 88, 121.]

CARIATED, adj. Ka′ri^2-at-e^{2}d. Fr., *carié*. See CARIOUS.

CARICA (Lat.), n., f. of adj. *caricus* (*ficus* understood). Ka^{2}r-(ka^{3}r)′i^{2}k-a^3. Fr., *figue* (1st def.), *papayer* (2d def.). Ger., *Feige* (1st def.). 1. A fig. Cf. FICUS *c.*; in the pl., *caricæ*, the official title for figs in the Ger. (1st ed.), Austr., Belg., Swiss, and Gr. Ph's.

THE CARICA PAPAYA. [A, 327.]

[B, 95.] 2. Of Linnæus, a genus of plants, by some referred to the *Passifloraceæ*, by Link and others made the type of a distinct order, the *Papayaceæ*; the *Papaya*, of De Candolle. [B, 75, 121.]—**C. citriformis.** A species with edible fruit. [B, 19.]—**C. digitata.** See *C. spinosa*.—**C. papaya** [Linnæus]. Fr., *papayer commun, figuier des îles* (ou *des nègres*). Ger., *Melonenbaum*. It., *papajo*. Sp., *papayo* [Mex. Ph.]. Syn.: *Papaya communis* [Lamarck] (seu *vulgaris* [De Candolle], seu *c.* [Gärtner]). The papaw-, or melon-tree, indigenous to South America, and cultivated throughout the tropics. It is a small tree, bearing large palmate leaves, and an orange-colored, succulent, oblong fruit, with thick rind, and containing numerous black seeds. When ripe, the fruit is eaten, especially in the form of preserves or pickles. The leaves are used instead of soap. The juice of the unripe fruit contains an albuminoid substance, papain or papayotin, which gives it a peptonizing property. A similar property seems to reside in other parts of the plant, as

THE CARICA SPINOSA. [A, 327.]

meat wrapped in the leaves or suspended from the branches, and also the flesh of animals feeding upon the leaves and fruit, are rendered tender. The juice is also said to exert a solvent effect on the circulating blood. Taken internally undiluted, it is acrid and may cause severe gastro-enteritis, acting as a powerful cathartic. Together with the seeds and the milky juice of the tree, it is employed as an anthelminthic. The juice of the fruit-pulp is used to remove freckles. [B, 19, 81, 172, 173, 180; J. M. Maisch, "Am. Jour. of Pharm.," Feb., 1886.]—**C. pyriformis.** A species with edible fruit. [B, 19.]—**C. spinosa.** The chambura; a species indigenous to Brazil and Guiana. The juice of the tree is very acrid, the fruit is insipid, and the flowers emit a stercoraceous odor. [L, 80, 86; B, 19.]—**Fructus caricæ.** The fig. [B, 180.]

CARICACEÆ [Dumortier] (Lat.), n. f. pl. Ka^{2}r(ka^{3}r)-i^2-ka-(ka^3)′se^2(ke^2)-e(a^3-e^2). The *Papayaceæ*. [B, 121.]

CARICÆ (Lat.), n. f., pl. of *carica* (*q. v.*). Ka^{2}r(ka^{3}r)′i^2-se-(ka^3-e^2). 1. Figs. See CARICA. 2. Of Link, the *Papayaceæ*. [B, 95, 170.]

CARI-CAPUDI (Malay), **CARI-CAPUSI** (Malay), n's. The *Hibiscus* (*Paritium*) *tiliaceus*. [B, 88, 121.]

CARICATURE-PLANT, n. Ka^{2}r′i^2-ka^{2}t-u^{2}r. The *Graptophyllum hortense*. [B, 185, 275.]

CARICEÆ (Lat.), n. f. pl. Ka^{2}r(ka^{3}r)-i^{2}s(i^{2}k)′e^2-e(a^3-e^2). From *Carex* (1st def.) or *Carica* (2d def.). 1. Of Kunth and others, a division of cyperaceous plants comprising *Carex*, etc., in which the flowers are completely diclinous and usually monœcious, and have no perianth, the latter being replaced in female flowers by a perigynium; the female spikelets are one-flowered, the male normally containing two or more flowers, and are terminal. [B, 42, 121, 170; Pax (B, 245).] 2. Of Turp., the *Papayaceæ*. [B, 170.]

CARICIN, n. Ka^{2}r′i^{2}s-i^{2}n. Fr., *caricine*. A green amorphous substance obtained by precipitating the juice of *Carica papaya* with alcohol; thought by its discoverer, Moncorvo, to be the active digestive principle of the plant. [B, 108.]

CARICINÆ (Lat.), n. f. pl. Ka^{2}r(ka^{3}r)-i^2-si(ke)′re(na^3-e^2). Of Kunth and others, a section of cyperaceous plants, including the genus *Carex*, and, according to Reichenbach, comprising the divisions *Elynaceæ* (*Elyneæ*), *Cariceæ*, *Chrysithriceæ* (*Chrysitriceæ*), and *Scleriaceæ* (*Sclerieæ*). [B, 170.]

CARICINEÆ (Lat.), n. f. pl. Ka^{2}r(ka^{3}r)-i^2-si^{2}n(ki^{2}n)′e^2-e(a^3-e^2). See CARICEÆ.

CARICOGRAPHY, n. Ka^{2}r-i^{2}k-o^{2}g′ra^{2}f-i^2. From *carex* (*q. v.*), and γράφειν, to delineate. Fr., *caricographie*. The botany of the sedges. [B, 121.]

CARICOIDEÆ (Lat.), n. f. pl. Ka^{2}r(ka^{3}r)-i^{2}k-o(o^2)-i^{2}d(ed)′e^2-e(a^3-e^2). A suborder of cyperaceous plants, comprising the tribes *Rhyncosporeæ*, *Gahnieæ*, *Hoppieæ* (with the subtribes *Chrysitrichinæ* and *Hoppiinæ*), *Sclerieæ*, and *Cariceæ*, in which the flowers are usually monœcious and disposed in unisexual or androgynous spikelets. [Pax (B, 245).]

CARICOLOGY, n. Ka^{2}r-i^{2}k-o^{2}l′o-ji^2. Lat., *caricologia* (from *carex* [*q. v.*], and λόγος, understanding). Fr., *caricologie*. See CARICOGRAPHY.

O, no; **O^2**, not; **O^3**, whole; **Th**, thin; **Th^2**, the; **U**, like oo in too; **U^2**, blue; **U^3**, lull; **U^4**, full; **U^5**, urn; **U^6**, like ü (German).

CARICOLUS (Lat.), adj. Ka^{2}r(ka^{3}r)-i^{2}k'o(o^2)-lu^{3}s(lu^{4}s). From *carex* (*q. v.*), and *colere*, to inhabit. Living upon sedges (said of insects). [L, 41, 180.]

CARICON (Lat.), n. n. Ka^{2}r(ka^{3}r)'i^{2}k-o^{2}n. Gr., *καρικόν*. Ger., *karische Salbe*. Of Hippocrates, a medicine used as an escharotic for exuberant granulations, consisting of black hellebore, sandarac, copper scale (red oxide of copper), washed lead, sulphur, orpiment, and cantharides mixed with oil of cedar. [B, 200.]

CARICOUS, adj. Ka^{2}r'i^{2}k-u^{3}s. Lat., *caricosus* (from *carica*, a fig). Fr., *cariqueux*, *caricoïde*. Ger., *feigenartig*. Resembling a fig. [*a*, 18; L, 41.]

CARICUM (Lat.), n. n. Ka^{2}r(ka^{3}r)'i^{2}k-u^{3}m(u^{4}m). See CARICON.

CARIDE [Alibert] (Fr.), n. Ka^{3}r-ed. A variety of cancerous disease of the skin. [A, 301.]

CARIDEA (Lat.), n. n. pl. Ka^{2}r(ka^{2}r)-i^{2}d'e^2-a^3. See CARIDES.

CARIDES (Lat.), n. f. pl. Ka^{2}r(ka^{3}r)'i^{2}d-ez(e^{2}s). Gr., *καρίδες*. Fr., *c*. Ger., *Cariden*, *Krebsthiere*. 1. Of Galen, shrimps. [B, 200.] 2. Of Hæckel, a class of the *Arthropoda*, including those having 2 pairs of antennæ. [L, 121, 228.]

CARIDIOIDES [M. Edwards] (Lat.), n. m. pl. Ka^{2}r(ka^{3}r)-i^{2}d-o(o^2)-id(ed)'ez(e^{2}s). Fr., *caridoïdes*. See SCHIZOPODA.

CARIDITA [Latreille] (Lat.), n. n. pl. Ka^{2}r(ka^{3}r)-i^{2}d-i(e)'ta^3. See CARIDES.

CARIDOÏDES [Milne-Edwards] (Fr.), n. pl. Ka^{3}r-i^{2}d-o-ed. A division of the *Stomatopoda*. [L, 11.]

CARIDOMORPHA [Huxley] (Lat.), n. n. pl. Ka^{2}r(Ka^{3}r)-i^{2}d-o(o^2)-mo^{2}rf'a^3. A group of the *Phyllobranchiata*. ["Proc. of the Zool. Soc.," 1878, p. 783 (L).]

CARIE (Fr.), n. Ka^{3}r-e. See CARIES.—**C. des céréales.** See CARIES *of wheat* and CARIES *of Indian corn*.—**C. des dents.** See *Dental* CARIES.—**C. des grains.** Vegetable caries affecting the seeds of plants. [L, 41.]—**C. des végétaux.** See CARIES (2d def.).—**C. du blé.** See CARIES *of wheat*.—**C. du maïs.** See CARIES *of Indian corn*.—**C. fongueuse.** See CARIES *fungosa*.—**C. humide.** An old name for caries as distinguished from necrosis. [A, 301.]—**C. nécrotique.** See CARIES *necrotica*.—**C. pénétrante.** Dental caries extending to the pulp. [A, 301.]—**C. profonde.** Dental caries affecting the dentin. [A, 301.]—**C. sèche.** An old name for necrosis. [A, 301.]—**C. superficielle.** Dental caries affecting only the enamel. [A, 301.]

CARIÉ (Fr.), adj. Ka^{3}r-i^2-a. See CARIOUS.

CARIEIRO, n. In Languedoc, the *Ruta graveolens*. [B, 121.]

CARIES (Lat.), n. f. Ka(ka^3)'ri^2-ez(e^{2}s). Gen., *carie'i*. Gr., *τερηδών*. Fr., *carie*. Ger., *Beinfrass*, *Beinfäule*, *Knochenfrass*. It., Sp., *c*. 1. Ulceration, especially of bone. [A, 325.] 2. A term for various morbid processes in vegetables, producing deformation and progressive destruction of the tissues, and usually caused by parasitic vegetable organisms. It comprises the various forms of smut, bunt, etc., in cereals. [B, 19, 121.] See *C. of wheat* and *C. of Indian corn*.—**Atonic c.** Fr., *carie atonique*. Of Billroth, a variety of c. in which there is little swelling, the skin is red, thin, and often undermined, and the pus discharged is thin and often fœtid and sanious. [A, 328 (*a*, 18).]—**C. aperta** (obsolete). C. of bone with overlying ulceration of the soft parts. [L, 44.]—**C. articulorum.** See *Fungous* ARTHRITIS.—**C. callosa.** See *Syphilitic* CHANCRE.—**C. carnosa.** C. fungosa with numerous large fleshy masses of granulations. [L, 44.]—**C. centralis.** A circumscribed chronic osteomyelitis in the medullary cavity of a hollow bone, causing disease of the cortical substance from within. [E, 15.]—**C. dentis, C. dentium.** Fr., *carie dentaire*. Ger., *Zahncaries*. C. of the teeth. [E.]—**C. fungosa.** Ger., *fungöser Knochenfrass*. See *Fungous* ARTHRITIS.—**C. gallica.** See *Syphilitic* CHANCRE.—**C. gangrænosa.** See *C.* (1st def.).—**C. granulosa.** See *Fungous* ARTHRITIS.—**C. interna.** See *C. centralis*.—**C. mollis.** See *Fungous* ARTHRITIS.—**C. necrotica.** A form in which fragments of bone are detached before being disintegrated. [A, 326.]—**C. non gallica** [Falloppius]. See *Simple* CHANCRE.—**C. occulta.** An old name for c. of bone with the overlying skin intact. [F. Busch (A, 319).]—**C. of Indian corn.** Fr., *carie du maïs*. A form of c. (2d def.) due to the development of the *Ustilago maydis* (corn-smut), the mycelium of which penetrates and destroys the tissues and reproductive organs of maize (*Zea maydis*), gradually replacing them with masses of dark-colored spores enveloped in a gelatinous membrane. [B, 11, 81, 121.]—**C. of wheat.** Fr., *carie du blé*. A form of c. (2d def.) produced by the *Tilletia c.*, the mycelium of which penetrates the seed-coat and causes the absorption of the seed, which it replaces by its own globose spores. The disease is sometimes also produced by the *Anguillula* (*Rhabditis*) *tritici*. [B, 19, 121.]—**C. profunda.** See *C. centralis*.—**C. pudendagra, C. pudendorum.** See CHANCRE.—**C. rheumatica.** An improper name for ulceration of the articular ends of bones in purulent arthritis, by an extension of the process of ulceration from the articular cartilages to the subjacent bone. [L, 44.]—**C. sicca.** C. in which there is as yet no external opening, or in which there is hardly any suppuration. [A, 326.]—**C. sicca syphilitica** [Virchow]. A form of c. sicca occurring by the formation of a gumma in the periosteum. [Grünfeld (A, 319).]—**C. superficialis.** Chronic suppurative, ulcerative osteitis. [A, 365.]—**C. virgæ** (Lat.). Chancre (*q. v.*) of the penis. [G.]—**Central c.** See *C. centralis*.—**Lacunar c.** A form of c. in which the edge of the undermined portion of bone forms a line made up of arcs of small circles. [Moos, "Arch. of Otol.," xiv, p. 44 (*a*, 18).]—**Secondary c.** C. developed in connection with injury or disease of adjacent structures. [L, 324.]—**Strumous c.** A c. of constitutional origin or from slight local irritation, usually appearing in the tarsus, carpus, or vertebræ, or in the cancellous ends of long bones. [E.]—**Symptomatic c.** See *Secondary c*.—**Vegetable c.** See *C.* (2d def.).

CARIESIN, n. Ka-ri^2-es'i^{2}n. In isopathic medication, carious bone used as a remedy. [B, 270.]

CARIEUX (Fr.), adj. Ka^3-ri^2-u^5. See CARIOUS.

CARILHA, CARILLA, n's. In Malabar, a species of *Vitex*, probably *Vitex trifoliata*. [B, 121.]

CARILLON (Fr.), n. Ka^{3}r-el-yo^{2}n^2. The *Campanula medium*. [B, 121, 173.]

CARIM-CORINI (Malay), **CARIM-CURINI** (Malay), n's. The *Justicia ecbolium*. [B, 121, 172.]

CARIMGALA (Malay), **CARIM-GOLA** (Malay), n's. The *Pontederia vaginalis*. [B, 121, 172.]

CARI-MOULLI (Tamil), n. The *Solanum indicum*. [B, 121.]

CARIM-PANA (Malay), n. The *Borassus flabelliformis*. [Rheede (B, 88, 172).]

CARIM-TUMBA (Malay), n. The *Anisomeles* (*Nepeta*) *malabarica*. [B, 172.]

CARINA (Lat.), n. f. Ka^{2}r(ka^{3}r)-i(e)'na^3. From *καρεῖν*, to cleave. Fr., *carène*. Ger., *Kiel*, *Schiffchen*. A ridge or keel-like process. Hence: 1. A process running like a keel along the dorsal surface of any elevated portion of a plant-structure, especially if the latter is hollow. 2. The ridge made by the union of the prominent lower edges of the two inferior petals of a papilionaceous flower. 3. The anterior petal in the flower of the *Polygalaceæ*. [B, 19, 121, 123.] 4. In conchology, a dorsal median piece in the shell of certain cirripeds. [L, 11, 221, 296.] 5. In anatomy, a median ridge on the lower surface of the fornix cerebri, also the spinal column. [Wilder (K); L, 325.]—**C. aquæductus Sylvii.** The keel-shaped lower edge of the aquæductus Sylvii. [*a*, 18.]—**C. biceps.** Fr., *carène à deux pieds*. A c. (2d def.) where the two petals are free at the base and adherent along their edges above. [B, 121.]—**C. dipetala.** Fr., *carène dipétale*. Ger., *zweiblättriges Schiffchen*. A c. (2d def.) in which the two petals are free through their entire length. [B, 121, 123.]—**C. monopetala.** Ger., *einblättriges Schiffchen*. See *C. biceps*. [B, 123.]—**C. sterni.** In birds, the keel-like projection of the sternum. [L, 200.]—**C. vaginæ** [Kohlrausch]. See COLUMNA *vaginæ anterior*.

CARINACEÆ (Lat.), n. f. pl. Ka^{2}r(ka^{3}r)-i^{2}n(en)-a(a^3)'se^2(ke^2)-e(a^3-e^2). Fr., *carinacées* [De Blainville]. A family of the univalve molluscs. [L, 180.]

CARINAL, adj. Ka^{2}r'i^{2}n-a^{2}l. Lat., *carinalis*. Fr., *c*. Ger., *kielförmig*. Having the form of a keel; in botany, pertaining to the carina. [B, 1, 77, 123.]

CARINARIACEA (Lat.), n. n. pl. Ka^{2}r(ka^{3}r)-i^{2}n(en)-a(a^3)-ri^2-a(a^3)'se^2(ke^2)-a^3. A suborder of the *Natantia*. [L, 121.]

CARINATÆ [Huxley] (Lat.), n. f. pl. Ka^{2}r(ka^{3}r)-i^{2}n(en)-a(a^3)'-te(ta^3-e^2). Fr., *carinées*. Ger., *Kielvögel*. An order of birds having the sternum raised into a median ridge or keel. [L, 221.]

CARINATE, CARINATED, adj's. Ka^{2}r'i^{2}n-at, -at-e^{2}d. Lat., *carinatus*. Fr., *cariné*, *caréné*. Ger., *kielförmig*, *gekielt*, *kielig*, *gefalzt*. Shaped like a keel; also provided with a keel or carina (*q. v.*) or a keel-like process. [B, 19, 121, 123; L, 121.] Cf. PECTUS *carinatum*.

CARINATION, n. Ka^{2}r-i^{2}n-a'shu^{3}n. The state of being keel-shaped or the production of a keel shaped formation. [L.]

CARINATO-PLICATE, adj. Ka^{2}r-i^{2}n-a''to-pli'kat. From *carina*, a keel, and *plica*, a fold. Plicate with each fold forming a keel like process. [B, 19.]

CARINÉ (Fr.), adj. Ka^{3}r-en-a. See CARINATE.

CARINIFEROUS, adj. Ka^{2}r-i^{2}n-i^{2}f'e^{2}r-u^{3}s. From *carina*, a keel, and *ferre*, to bear. Fr., *carinifère*. Ger., *kielragend*. Furnished with a keel-like process. [L, 41, 180.]

CARINIFORM, adj. Ka^{2}r-i^{2}n'i^2-fo^{2}rm. From *carina*, a keel, and *forma*, form. Keel-shaped.

CARINO-LATERAL, adj. Ka^{2}r''i^{2}n-o-la^{2}t'e^{2}r-a^{2}l. From *carina* (*q. v.*), and *latus*, the side. 1. Situated at the side of the carina. [B, 100.] 2. In the cirripeds, relating to the carina and to the lateral regions of the body. [L, 296.]

CARIN SIRAGUM (Tamil), n. The *Nigella sativa*. [B, 172.]

CARINTA-KALI, n. In Malabar, the *Psychotria herbacea*. [B, 121.]

CARINTI, n. In the East Indies, the *Uvaria zeylanica*, also an undetermined species of *Momordica*. [B, 121.]

CARINULATE, adj. Ka^{2}r-i^{2}n'u^{2}l-at. Lat., *carinulatus*. Fr., *carinulé*. Furnished with a small or not well-defined keel. [L, 180.]

CARIOCAR, n. See CARYOCAR.

CARIO-NÉCROSIQUE (Fr.), adj. Ka^{3}r-i^2-o-na-kroz-ek. Carious and necrotic. [L, 88.]

CARIOSITY, n. Ka-ri^2-o^{2}s'i^{2}t-i^2. See CARIES.

CARIOSSO, n. See ADY.

CARIOSUS (Lat.), adj. Ka(ka^3)-ri^2-os'u^{3}s(u^{4}s). See CARIOUS.

CARIOTÆ (Lat.), n. f. pl. Ka(ka^3)-ri^2-o'te(ta^3-e^2). Of Dioscorides, dry dates. [Bory (B, 121); L, 105.]

CARIOUS, adj. Ka'ri^2-u^{3}s. Lat., *cariosus*. Fr., *carié*, *carieux*. Ger., *cariös*, *beinfrässig*, *knochenfrässig*. Pertaining to or affected with caries; in botany, having irregular depressions and perforations as if worm-eaten, so as to resemble a carious bone. [B, 123.]

CARIPA, n. The genus *Pirigara*. [B, 121.]

CARIQUE (Fr.), n. Ka^{3}r-ek. In Provence, dry figs. [B, 121.]

CARIQUEUX (Fr.), adj. Ka^{3}r-e-ku^5. See CARICOUS.

CARIRAM (Malay), n. The *Strychnos nux vomica*. [B, 172.]

CARISSA [Linnæus] (Lat.), n. f. Ka^{2}r(ka^{3}r)-i^{2}s'sa^3. Fr., *carisse.* A genus of spiny shrubs of the tribe *Carisseæ*, indigenous to tropical Asia, Africa, and Australia. [B, 42, 121.]—**C. arduina** [Lamarck], **C. bispinosa** [Linnæus]. A species growing at the Cape of Good Hope, where the berries are eaten. [B, 173.]—**C. carandas** [Linnæus]. Fr., *calac.* Malay, *keelay.* Tamil, *kalapa.* Hind., *karoñda.* Sanscr., *karamarandaka.* A thorny shrub growing throughout India. The fruit is stomachic and used in biliousness. The unripe fruit is astringent. [A, 479; B, 19, 172.]—**C. diffusa.** A thorny shrub of India, employed medicinally by the Hindoos. It bears a small black edible fruit. [B, 172.]—**C. edulis** [Vahl]. An Egyptian species. The berries and young shoots are eaten. [B, 173.]—**C. ferox.** A species which, with *C. arduina*, includes the Linnæan species *Arduina bispinosa.* [B.]—**C. grandifolia.** An African species with a fleshy subacid fruit called *Natal plum* and *amatungula.* [B, 19.]—**C. xylopicron** [Dupetit-Thouars]. Fr., *bois amer de Bourbon, bois d'absinthe.* A species growing in the Isle of Bourbon. The bark is used in diseases of the urinary organs, and the very bitter wood is made into bitter-cups, which impart to wine or water a bitter taste and a tonic property. [B, 19, 173.]

CARISSEÆ (Lat.), n. f. pl. Ka^{2}r(ka^{3}r)-i^{2}s'se^2-e(a^3-e^2). Fr., *carissées.* 1. Of Sprengel, an order of the *Contortæ*, comprising *Carissa, Rauwolfia, Cerbera, Allamanda, Alyxia, Ophioxylon, Strychnos*, etc. 2. Of Reichenbach, a division of the *Contortæ*, comprising nearly the same genera and subsequently subdivided into the *Jasmineæ, Rauwolfieæ*, and *Cerbereæ.* 3. Of Bentham and Hooker, a tribe of the *Apocynaceæ* comprising *Carissa, Willughbeia, Ambelania*, etc. [B, 121, 170.]

CARISTÆ (Lat.), n. f. pl. Ka^{2}r(ka^{3}r)-i^{2}st'e(a^3-e^2). Dates. [B, 180.]

CARIUM TERRÆ, n. An old name for gluten. [Ruland (A, 325).]

CARIVE (Fr.), n. Ka^{3}r-ev. Formerly, the *Capsicum annuum.* [Pomet (B, 121).]

CARI-VILLANDI, n. The *Smilax indica.* [B, 121.]

CARLATE, n. Ka^{3}rl'at. Fr., *c.* A salt of carlic (atractylic) acid. [A, 385.]

CARLIC, n. Ka^{3}rl'i^{2}k. See CHARLOCK.

CARLIC ACID, n. Ka^{3}rl'i^{2}k. Fr., *acide carlique.* See ATRACTYLIC ACID.

CARLINA [Linnæus] (Lat.), n. f. Ka^{3}rl-i(e)'na^3. Named, according to Linnæus, after *Charles V.*, of Germany; according to Olivier de Sevres, after *Charlemagne*; both being said to have cured the plague in their armies with *C. acaulis.* Fr., *carline.* Ger., *Eberwurz.* It., *c.*, Sp., *carlina.* A genus of composite prickly herbs of the tribe *Cynaroideæ*, subtribe *Carlineæ.* [B, 19, 42, 121, 180.]—**Æther-oleum carlinæ.** See *Oleum carlinæ æthereum.*—**C. acanthifolia** [Allioni]. Fr., *caméleon blanc, carline blanche, chardousse, chardonnette, cardabelle.* Syn.: *Chamæleon albus* [Daleschamp]. A species growing on high mountains in southern and central Europe, closely related to *C. acaulis.* The root, somewhat less bitter than that of *C. acaulis*, is used for the same purposes and under the same names. [B, 121, 180.]—**C. acarna** [Biebstein]. The *Picnomon acarna.* [B, 180.]—**C. acaulis.** Fr., *carline noire* (ou *des Alpes*), *caméleon noir, grande carline.* Ger., *stengellose Eberwurz, Rosswurzel, Karls-Distel, Wetterdistel, wilde Artischocke.* 1. Of Linnæus, a perennial acaulescent species growing on the mountains of central Europe, and bearing lilac-red flowers on very large receptacles. The latter, which are fleshy and bitter, are used as a substitute for the artichoke. The root—*radix carlinæ* (seu *carlinæ humilis*, seu *cardopatiæ*, seu *cardopatii*, seu *cardopathiæ*, seu *chamæleontis albi*, seu *cardui anglicani*, seu *caballionæ*, seu *apri*)—has a resinous and aromatic, sometimes nauseous and irritant, odor and a sweetish, pungent, aromatic taste. It acts as a vascular and nervous stimulant, as a stomachic tonic, and as a diuretic of some power, and increases secretion from the various mucous membranes. 2. Of Lamarck, the *C. acanthifolia.* [B, 121, 173, 180.]—**C. aggregata** [Waldstein and Kitaibel]. The branching variety of *C. acaulis.* [B, 180.]—**C. alpina** [Jacquin]. The *C. acaulis.* [B, 173.]—**C. caulescens** [Lamarck]. The *C. acaulis* (1st def.). [B, 173.]—**C. caulifera** [I. Bauhin]. The *C. acaulis.* [B, 200.]—**C. chamæleon** [Villars]. The *C. acaulis* (1st def.). [B, 173.]—**C. chardoussæ** [Villars]. The *C. acanthifolia.* [B, 173.]—**C. grandiflora** [Mönch]. The *C. acaulis* (1st def.). [B, 173.]—**C. gummifera** [Lessing]. The *Atractylis gummifera.* [B, 19; L, 84.]—**C. humilis** [Parkinson]. **C. major.** The *C. acaulis* (1st def.). [B, 180, 200.]—**C. scandens** [Wedelius], **C. silvestris** [Ray], **C. silvestris major** [Parkinson], **C. silvestris vulgaris.** The *C. vulgaris.* [B, 180, 200.]—**C. simplex** [Waldstein and Kitaibel]. Fr., *carline acaule.* Ger., *wilde Artischocke.* The non-branching variety of *C. acaulis* (1st def.). [B, 180.]—**C. subacaulis** [De Candolle]. The *C. acaulis* (1st def.). [B, 173, 180.]—**C. utzka** [Hacquet]. The *C. acanthifolia.* [B, 173.]—**C. vulgaris** [Linnæus]. Fr., *carline.* Ger., *gemeine Eberwurz, Sanddistel.* The carline thistle; a species growing in sandy places throughout continental Europe and in England. The herb and the root—*herba* (et *radix*) *carlinæ silvestris* (seu *carlinæ vulgaris*, seu *heracanthæ*)—were formerly employed as a sudorific in pestilential diseases. [B, 19, 121, 180.]—**Herba carlinæ silvestris (seu vulgaris).** The herb of *C. vulgaris.* [B, 180.]—**Oleum carlinæ æthereum.** Fr., *oléule* (ou *huile essentielle*) *de carline.* A volatile oil obtained by distilling the root of *C. acaulis.* [B, 119.]—**Radix carlinæ, Radix carlinæ humilis (seu silvestris, seu vulgaris).** Ger., *Eberwurzel.* The root of *C. acaulis.* [B, 180.]

CARLINE, adj. Ka^{3}rl'en. See *C.* THISTLE.

CARLINE (Fr.), n. Ka^{3}rl-en. The genus *Carlina*, especially the *Carlina vulgaris.* [A, 301; B, 173.]—**C. blanche.** The *Carlina acanthifolia.* [B, 88, 173.]—**C. des Alpes.** The *Carlina acaulis* (1st def.). [B, 173.]—**C. des anciens.** The *Carlina vulgaris.* [L, 105.]—**C. noire, Grande c.** The *Carlina acaulis* (1st def.). [B, 88, 173.]

CARLINEÆ (Lat.), n. f. pl. Ka^{3}rl-i^{2}n'e^2-e(a^3-e^2). 1. Of Cassini, a tribe of composite plants, comprising *Carlina, Cardopatium, Atractylis, Chuquiraga*, and other genera subsequently disposed by Cassini in 4 subdivisions, the *Xeranthemeæ*, *C. archetypæ* (comprising *Atractylis, Carlina, Acarna*, and 6 other genera), *Barnadesieæ*, and *Stæhelineæ.* 2. Of Bentham and Hooker, a subtribe of the *Cynaroideæ.* [B, 121, 170.]

CARLINIC ACID, n. Ka^{3}rl-i^{2}n'i^{2}k. Fr., *acide carlinique.* Ger., *Carlininsäure.* See ATRACTYLIC ACID. [B, 207.]

CARLIN-SPURS, n. Ka^{3}rl'i^{2}n-spu^{5}rz. The *Genista anglica.* [B, 275.]

CARLISLE SPRINGS, n. Ka^{3}r-lil'. 1. A place in Cumberland County, Pennsylvania, at the base of Blue Mountain, where there are mild sulphurous springs. 2. A place in Pueblo County, Colorado, where there are springs containing sodium, magnesium, iron, and calcium carbonates, sodium chloride, potassium and sodium sulphates, silica, organic matter, and carbon dioxide. [A, 363.]

CARLOCK, n. Ka^{3}rl'o^{2}k. 1. The charlock (*Sinapis arvensis*). [B, 275.] 2. Russian isinglass made from the roe of the sturgeon. [L, 56.]

CARLO SANTO (Sp.), n. Ka^{3}rl'o sa^{3}n'to. St. Charles's root; an undetermined plant of Mechoacan. The bitter aromatic bark is said to have sudorific and stomachic properties and to strengthen the gums. [B, 121; L, 84.]

CARLSBAD (Ger.), n. Ka^{3}rls'ba^{3}d. A small village in Bohemia very celebrated for its saline and alkaline springs, the temperature of which is from 50° to 60° C. The accompanying table shows the constitution of the water of the principal springs:

1,000 PARTS CONTAIN.	Sprudel.	Markt-brunnen.	Schloss-brunnen.	Mühl-brunnen.	Neu-brunnen.	Theresien-brunnen.	Elisabeth-quelle.	Felsen-quelle.	Kaiser-brunnen.
Iron carbonate	0·003	0·0006	0·0001	0·002	0·002	0·001	0·002	0·002	0·002

According to Seegen, the C. waters diminish the excretion of urea and sulphuric acid. They have been used for venous stases, chronic affections of the stomach and liver (especially gall-stones), diabetes, gout, urinary concretions, etc. [A, 319; C. F. Taylor, "N. Y. Med. Jour.," April 2, 1887, p. 380.]

CARLSBRUNN (Ger.), n. Ka^{3}rls'brun. A place in Austrian Silesia, where there are feebly chalybeate springs. [A, 319.]

CARLSBRUNNEN (Ger.), n. Ka^{3}rls'brun-ne^{2}n. One of the springs at Mehadia (*q. v.*). [A, 319.]

CARLSQUELLE (Ger.), n. Ka^{3}rls'kwe^{2}l-le^2. One of the springs at Gleichenberg (*q. v.*). [A, 319.]

CARL-THEODORQUELLE (Ger.), n. Ka^{3}rl-ta-o-dor'kwe^{2}l-le^2. One of the springs at Reichenhall (*q. v.*). [A, 319.]

CARLUDOVICA (Lat.), n. f. Ka^{3}rl-u-do-ve'ka^3. Fr., *carludovique.* Of Ruíz and Pavón, a genus of cyclanthaceous plants indigenous to tropical America. [B, 121; Drude (B, 245).]—**C. palmata** [Ruíz and Pavón]. A species growing in Peru and New Granada. A fixed oil is expressed from the seeds. [B, 121; Drude (B, 245).]

CARLUDOVICEÆ (Lat.), n. f. pl. Ka^{3}rl-u-do-vi^{2}s(vek)'e^2-e-(a^3-e^2). Fr., *carludovicées.* A division of the *Cyclanthaceæ*, comprising *Carludovica*, etc. [Drude (B, 245).]

CARMANTINE (Fr.), n. Ka^{3}r-ma^{3}n-ten. The genus *Justicia.* [B, 173.]—**C. pectorale.** The *Justicia pectoralis.* [B, 173.]

CARMAS (Ar.), n. The *Quercus ilex.* [B, 121.]

CARMEDIE (Fr.), n. Ka^{3}r-me^{2}d-e. A composite plant of the Cape of Good Hope, related to *Carthamus tinctorius.* [A, 385.]

CARMÉINE (Fr.), n. Ka^{3}r-ma-en. See CARMIN.

CARMEL (Ar.), n. The *Zygophyllum simplex.* [B, 19.]

CARMELIA [De Candolle] (Lat.), n. f. Ka^{3}r-me(ma)'li^2-a^3. A section of the genus *Heracleum*. [B.]

CARMELITERGEIST (Ger.), **CARMELITWASSER** (Ger.), n's. Ka^{3}rm-e^{2}l-et'e^{2}r-gist, -et'va^{3}s-se^{2}r. Fr., *eau de mélisse des Carmes*. Carmelite water; the *spiritus melissæ compositus* of the Ger. Ph. [*a*, 18; B, 205.]

CARMEN (Lat.), n. n. Ka^{3}rm'e^{2}n. Gen., *carm'inis*. From *canere*, to sing. Gr., ἔπος, ἐπωδή. A charm, magical form, incantation, or enchantment used to prevent or cure disease. [A, 318, 325.]

CARMENTINE (Fr.), n. Ka^{3}rm-a^{3}n^2-ten. The genus *Justicia*; especially the *Justicia pectoralis*. [B, 52, 93.]

CARMIC ACID, n. Ka^{3}rm'i^{2}k. See CARMINIC ACID.

CARMIDINE, n. Ka^{3}rm'i^{2}d-en. A base (probably a mixture of pyrrhol and vertidine) obtained by passing lutidine over hot lime. [B, 2.]

CARMIN, n. Ka^{3}rm'i^{2}n. Lat., *carminum, carmina*. Fr., *c., carmine*. Ger., *C., Karmin*. It., *carmino*. Sp., *carmín*. 1. The red coloring matter of cochineal, especially the red pigment produced by precipitating a decoction of cochineal with alum, cream of tartar, or acid potassium oxalate; a mixture of carminic acid, c. red, and other substances; used as a staining reagent in microscopy. 2. A brilliant shade of red like that of cochineal. [B.]—**Ammonia c.** Ger., *Ammoniakc'*, *C'ammoniak*. A solution of c. in ammonia-water; used as a staining reagent in microscopy.—**Blue c.** Lat., *carmina cœrulea*. Fr., *c. bleu, carmine bleue*. Ger., *blauer C*. See INDIGO *carmin*.—**Borax c.** A staining solution containing c. and borax.—**C'ammoniak** (Ger.). See *Ammonia c*.—**C'beeren** (Ger.). Kermes. [B, 180.]—**C. bleu** (Fr.). See INDIGO-*carmin*.—**C. de safranum** (Fr.). Impure carthamine. [L, 49.]—**C. des confiseurs** (Fr.). A solution of c. in alcohol with a little ammonia; used by confectioners. [L, 49.]—**C. lake.** A compound of c. and alumina, made by treating cochineal with alum and an alkaline carbonate. [B, 2.]—**C. red.** Fr., *rouge de c*. Ger., *C'roth*. A purplish-red, lustrous substance, $C_{11}H_{12}O_7$, produced by the decomposition of carminic acid; probably a derivative of phthalic acid. [B, 2, 4, 5, 270.]—**C'sauer** (Ger.). Of or pertaining to carminic acid; with the name of a base, the carminate of that base. [B.]—**C'säure** (Ger.). Carminic acid. [B, 4.]—**Indigo-c.** See under INDIGO.—**Thiersch's c. reagent.** A staining solution containing c., oxalic acid, etc.

CARMINA (Lat.), n. n., pl. of *carmen* (*q. v.*). Ka^{3}rm'i^{2}n-a^3.

CARMINA (Lat.). n. f. Ka^{3}rm-i(e)'na^3. See CARMIN.—**C. cærulea.** See INDIGO*carmin*.

CARMINANS (Lat.), **CARMINANT,** adj's. Ka^{3}rm'i^{2}n-a^{2}nz-(a^{3}ns), -a^{2}nt. See CARMINATIVE.

CARMINATE, n. Ka^{3}rm'i^{2}n-at. A salt of carminic acid. [B.]

CARMINATION (Fr.), n. Ka^{3}rm-en-a^3-si^2-o^{2}n^2. The coloring action of carmin, also its employment as a staining agent. [A, 385.]

CARMINATIVE. adj. Ka^{3}rm-i^{2}n'a^{3}t-i^{2}v. Gr., ξαντικός, διαξαντικός. Lat., *carminans, carminativus* (from *carminare*, to card wool, to remove impurities). Fr., *carminatif*. Ger., *blähungtreibend*. It., Sp., *carminativo*. Having the power of expelling flatus and thus mitigating colicky pain. The c's are mostly aromatics. [L, 81.]—**Four greater c's.** See *Quatuor* SEMINA *calida majora*.

CARMINE, n. Ka^{3}rm'en(in). See CARMIN.

CARMINIC ACID, n. Ka^{3}rm-i^{2}n'i^{2}k. Fr., *acide carminique*. Ger., *Carminsäure*. The red coloring matter of cochineal, a purplish, hygroscopic substance, probably $C_{17}H_{18}O_{10}$, readily soluble in water and in alcohol. It has been used as a diuretic. [B, 2, 4, 270.]

CARMINUM (Lat.), n. n. Ka^{3}rm-i(e)'nu^{3}m(nu^{4}m). See CARMIN.

CARMOT, n. Of the alchemists, the substance constituting the philosopher's stone. [B, 200.]

CARMUFELLIC ACID, n. Ka^{3}rm-u^2-fe^{2}l'i^{2}k. Lat., *acidum carmufellinicum*. Fr., *acide carmufellinique*. Ger., *Carmufellinsäure*. A crystalline acid, $C_{12}H_{20}O_{16}$, obtained by Muspratt and Dawson from cloves; regarded as an artificial product. [B, 18.]

CARNA (Hind.), n. The *Citrus medica*. [B, 172.]

CARNABADIUM [Myrepsus] (Lat.), n. n. Ka^{3}rn-a^3-ba(ba^3)'-di^2-u^{3}m(u^{4}m). Gr., καρναβάδιον. The *Cuminum œthiopicum* (*Cuminum cyminum*); according to some, the *Carum œthiopicum*. [B, 88, 121, 200.]

CARNABIOOU, n. In Languedoc, the *Lathyrus aphaca*. [B, 121.]

CARNAGON, n. In the Philippines, the *Diospyros philosanthera*. [B, 121.]

CARNAHUBA, n. See CARNAUBA.

CARNAIRE (Fr.), adj. Ka^{3}rn-a^{2}r. See CARNIVOROUS.

CARNALITE, CARNALLITE, n's. Ka^{3}rn'a^{2}l-it. Ger., *Carnallit* (from its discoverer, von Carnall). A native double chloride of magnesium and potassium, associated with rock salt. [L, 61.]

CARNARIA (Lat.), n. n. pl. Ka^{3}rn-a(a^3)'ri^2-a^3. From *caro*, flesh. Fr., *carnassiers* (1st def.). 1. Of Cuvier, an order of *Mammalia* including the *Carnivora, Insectivora, Cheiroptera*, and *Marsupialia*. 2. A family of *Coleoptera* that are carnivorous. 3. Of Haeckel, an order of the *Zonoplacentalia*. [L, 14, 173, 180.]

CARNARII (Lat.), n. m. pl. Ka^{3}rn-a(a^3)'ri^2-i(e). See CARNARIA.

CARNASSIA (Lat.). n. n. pl. Ka^{3}rn-a^{3}s(a^{3}s)'si^2-a^3. Fr., *carnassiers*. Ger., *Fleischfresser*. Of Haeckel, a legion of the *Deciduata*. [L, 173, 228.]

CARNASSIAL, adj. Ka^{3}rn-a^{2}s'si^2-a^{2}l. Fr., *carnassier*. Syn.: *sectorial*. 1. Adapted to eating flesh (said of teeth which come together like the blades of scissors). 2. As a n., a large tooth (in the lower jaw a molar, in the upper a premolar) found in the *Carnivora*, sharper and more prominent than the others. [A, 385.]

CARNASSIER (Fr.), adj. Ka^{3}rn-a^{3}s-i^2-a. 1. Carnivorous. 2. See CARNASSIAL. As a n., in the pl., *c's*, see CARNASSIA. [B, 121.]

CARNASSIÈRE (Fr.), n. Ka^{3}rn-a^{3}s-i^2-e^{2}r. See CARNASSIAL (2d def.).

CARNATION, n. Ka^{3}rn-a'shu^{3}n. Lat., *carnatio*. Fr., *c*. 1. The natural color of flesh. 2. The *Dianthus carophyllus*. [B, 19, 275; L, 56.]—**C.-grass.** The *Carex glauca* and *Carex panicea*. [B, 275.]—**C.-tree.** The *Kleinia neriifolia*. [B, 19, 275.]—**Spanish c.** The *Poinciana pulcherrima*. [B, 19, 275.]

CARNAUBA, n. The *Copernicia cerifera* or its root; also the wax (c.-wax) obtained from it. [B, 19, 121.]—**C.-palm.** See *C*.—**C.-wax.** Fr., *cire de c*. Ger., *C'wachs, Cearawachs*. The yellow or greenish-yellow wax secreted upon the leaves of *Copernicia cerifera*; a mixture of fatty acids (especially cerotic acid) and alcohols (especially myricyl alcohol) with a small quantity of hydrocarbons; used for making candles and in the manufacture of petroleum soap. [B, 270.]

CARNÉ (Fr.), adj. Ka^{3}rn-a. Flesh-colored. [A, 385.]

CARNELIAN, n. Ka^{3}rn-el'ya^{2}n. Lat., *carneolus, corneleus, carniolus, carniola* (from *carneus*, fleshy). Fr., *carnalien, cornatine*. Ger., *Carneol*. It., *corniola*. Also written *cornelian*. A variety of chalcedony of a clear flesh-red color. [B, 200.]

CARNEO-APONEUROTIC, adj. Ka^{3}rn"e^2-o-a^{2}p-o-nu^2-ro^{2}t'-i^{2}k. For deriv., see CARO and APONEUROSIS. Fleshy and aponeurotic. [L, 14.]

CARNEOLUS (Lat.), **CARNEOLUS LAPIS** (Lat.), n's m. Ka^{3}rn-e(e^2)'o(o^2)-lu^{3}s(lu^{4}s). See CARNELIAN.

CARNEO-PAPILLOSUS (Lat.), adj. Ka^{3}rn"e^2-o(o^2)-pa^{2}p-(pa^{3}p)-i^{2}l-lo'su^{3}s(su^{4}s). For deriv., see CARO and PAPILLA. Consisting of fleshy papillæ (said of the columns of the vagina). [L, 31.]

CARNEO-TENDINOUS, adj. Ka^{3}rn"e^2-o-te^{2}n'di^{2}n-u^{3}s. For deriv., see CARO and TENDO. Partly muscular and partly tendinous (said of muscles). [L, 14]

CARNEOUS, adj. Ka^{3}rn'e^2-u^{3}s. Lat., *carneus, carnosus* (from *caro*, flesh). Fr., *carné, charnu, charné*. Ger., *fleischig*. It., Sp., *carnoso*. Pertaining to, consisting of, or resembling, flesh, especially muscle. [J.]

CARNÉS (Fr.), n. pl. Ka^{3}rn-a. The name of two flesh-colored *Agarici*. [Paulet (B, 121).]

CARNEUS (Lat.), adj. Ka^{3}rn'e^2-u^{3}s(u^{4}s). See CARNEOUS and COLUMNÆ *carneæ*.

CARNICULA [Falloppius] (Lat.), n. f. Ka^{3}rn-i^{2}k'u^{2}l(u^{4}l)-a^3. Dim. of *caro* (*q. v.*). The flesh of the gums. [L, 84, 94.]

CARNIFEX (Lat.), n. m. Ka^{3}rn'i^2-fe^{2}x. Gen., *carnif'icis*. From *caro*, flesh, and *facere*, to make. 1. Originally, a public torturer or executioner, and anciently, as an opprobrious epithet, a surgeon. [Laboulbène "Union méd.," Apr. 2, 1885]. 2. An alchemical term for the "spagyric Vulcan," or fire as used in the search for the philosopher's stone. [A, 325; B, 200.]

CARNIFICATION, n. Ka^{3}rn-i^2-fi^2-ka'shu^{3}n. Gr., σάρκωσις. Lat., *carnificatio* (from *carnificare*, to make flesh, carnify). Fr., *c*. Ger., *Verfleischen, Verfleischung*. It., *carnificazione*. Sp., *carnificación*. Conversion into flesh, or a flesh-like substance, by the action of some pathological process in a tissue; by Baron the term was applied to amyloid degeneration. [D.] Cf. SPLENIZATION.—**C. of bone.** Fr., *c. des os*. Ger., *Verfleischung der Knochen*. See OSTEOSARCOSIS.—**C. of the lungs, Pulmonary c.** *Carnificatio pulmonum*. Fr., *c. des poumons*. Ger., *Verfleischung der Lungen*. A conversion of the pulmonary parenchyma into a dusky-red material resembling muscle, as in atelectasis; also a consolidation of the lung by the products of an inflammation. [A, 319; D.]—**Congestive c. of the lung.** Brown induration of the lung. [L, 331.]

CARNIFIED, adj. Ka^{3}rn'i^2-fid. Lat., *carnificatus*. Fr., *carnifié*. In a state of carnification (*q. v.*). [A, 301.]

CARNIFORMIS (Lat.), adj. Ka^{3}rn-i^2-fo^{2}rm'i^{2}s. From *caro*, flesh, and *forma*, form. Gr., σάρκωδης. Fr., *carniforme*. Ger., *fleischförmig*. Having the appearance of flesh. [L, 41.]—**C. abscessus.** See ABSCESSUS *c.*, in Supplement.

CARNILLET (Fr.), n. Ka^{3}rn-e-ya. The *Silene inflata* (*Cucubulus behen*). [B, 88, 121, 173; L, 41.]

CARNINE, n. Ka^{3}rn'en. From *caro*, flesh. Fr., *c*. Ger., *Carnin*. It., Sp., *carnina*. A colorless crystalline base, $C_7H_8N_4O_3 + H_2O$ (according to Weidel), obtained by Weidel from extract of meat and recently also found in the tissues of fresh-water fish and frog's spawn. [J. Munk (A. 319); B, 4; Krukenberg and Wagener, "Verhandl. d. würzb. physiol. Gesellsch.," 1883 (B); "Ann. d. Chem. u. Pharm.," clviii (K).]

CARNIOLA (Lat.), **CARNIOLUS** (Lat.), n's f. and m. Ka^{3}rn-i(i^2)'o(o^2)-la^3, -lu^{3}s(lu^{4}s). See CARNELIAN.

CARNISATION (Fr.), n. Ka^{3}rn-i^{2}z-a^3-si^2-o^{2}n^2. See CARNIFICATION.

CARNIVORA (Lat.), n. n. pl. Ka^{3}rn-i^2'vor(wo^{2}r)-a^3. From *caro*, flesh, and *vorare*, to devour. Fr., *carnivores*. Ger., *Raubthiere, Fleischfresser*. 1. An order of *Mammalia* comprising all flesh-eating mammals, both marine and terrestrial; of Cuvier and others, a family of *Carnaria*; as now used, an order embracing only the *Canidæ, Felidæ*, and *Ursidæ*. [B, 28; L, 253.] 2. A division or group of the *Cetacea*. [L, 321.] 3. Of Lankester, an order of the *Typidentata*. [L, 121.]—**Amphibious C.** See *C. primipedia*.—**C. insectivora.** A proposed suborder of *C*. consisting of the *Insectivora*. [L, 253.]—**C. primigenia.** A suborder of fossil *C*. [L, 256.]—**C. primipedia.** A suborder of *C*., consisting of

marine carnivorous mammals. [L, 253.]—**C. vera, Fissiped c.** The true *C.*, a suborder comprising terrestrial mammals only. [L, 253.]

CARNIVORACITY, CARNIVORITÉ (Fr.), n's. Ka^{3}rn-i^2-vor-a^{2}s'i^{2}t-i^2, -vor-i^{2}t-a. The state of being carnivorous. [L, 41, 180.]

CARNIVOROUS, adj. Ka^{3}rn-i^{2}v'or-u^{3}s. Gr., σαρκοφάγος. Lat., *carnivorus* (from *caro*, flesh, and *vorare*, to eat). Fr., *carnivore*. Ger., *fleischfressend*. Subsisting on flesh (said of animals and of insect-eating plants, which have the power of absorbing and digesting animal substances); in surgery, escharotic. [B, 121, 175; L, 43, 56.]

CARNOSA (Lat.), n., f. and n. pl. of adj. *carnosus* (*tunica* or *animalia* understood). Ka^{3}rn-os'a^3. 1. A fleshy layer. [A, 325.] 2. Of Gray, an order of the *Polyzoa*. [L, 303.]—**C. cutis.** See Panniculus *carnosus*.

CARNOSE, adj. Ka^{3}rn'os. See Carneous.

CARNOSITY, n. Ka^{3}rn-o^{2}s'i^{2}t-i^2. Lat., *carnositas* (from *carnosus*, fleshy). Fr., *carnosité*. Ger., *Carnosität*, *Fleischauswuchs*. A granular fleshy vegetation or excrescence on a mucous membrane or a wound. [A, 301.]—**Urethral c.** See *Urethral* caruncle.—**Venereal c.** Fr., *carnosité vénérienne*. A condyloma. [G.]

CARNOSULUS (Lat.), adj. Ka^{3}rn-o^{2}s'u^{2}l(u^{4}l)-u^{3}s(u^{4}s). Fleshy (said of small parts or organs). [B, 123.] Cf. Carnulosus.

CARNOSUS (Lat.), adj. Ka^{3}rn-os'u^{3}s(u^{4}s). From *caro*, flesh. Fleshy; pertaining to, of the nature of, or resembling flesh; in botany, soft, succulent, and rather thick and firm. [B, 121.]

CARNOUS, adj. Ka^{3}rn'u^{3}s. See Carneous.

CARNUB, n. In the East, the *Ceratonia siliqua*. [B, 121.]

CARNULENTUS (Lat.), adj. Ka^{3}rn-u^{2}l(u^{4}l)-e^{2}nt'u^{3}s(u^{4}s). See Carnosus.

CARNULOSUS (Lat.), adj. Ka^{3}rn-u^{2}l(u^{4}l)-os'u^{3}s(u^{4}s). Dimin. of *carnosus* (*q. v.*). Moderately fleshy. [B, 121.] Cf. Carnosulus.

CARN-WOOD, n. Ka^{3}rn'wu^{4}d. See Cam-wood.

CARO (Lat.), n. f. Ka(ka^3)'ro. Gen., *carn'is*. Gr., σάρξ, κρέας. Fr., *chair*. Ger., *Fleisch*. Sp., *carne*. Flesh; the red part or belly of muscles; in botany, a fleshy part, a soft succulent substance forming part of a plant (*e. g.*, the pulp of a fruit). [A, 325; B, 19, 121.]—**C. accessoria.** See Accessorius *flexoris longi digitorum pedis*.—**C. adnata ad testem.** Sarcocele. [L, 50.]—**C. anserina.** See Cutis *anserina*.—**C. bovilla, C. bovis, C. bubula.** See Beef.—**C. carcinodes.** A cancerous growth. [L, 119.]—**C. cucumeris.** The pulp of *Cucumis sativus*. [B, 180.]—**C. eminens, C. excrescens.** A fleshy excrescence. [A, 325.]—**C. glandulosa.** See Gland.—**C. linguæ.** The fleshy portion of the tongue. [L, 175.]—**C. luxurians.** Exuberant granulations. [B, 57.]—**C. musculosa.** See Muscle.—**C. musculosa quadrata.** The palmaris brevis muscle. [L, 119.]—**C. orbicularis.** The placenta. [L, 325.]—**C. quadrata Sylvii.** See Flexor *accessorius pedis*.—**C. strigis.** Owl's flesh; the flesh of *Strix aluco*, formerly official. [B, 180.]—**C. testudinis.** The flesh of the common tortoise, formerly used in decoction as a restorative in cases of phthisis or exhaustion. [B, 119.]—**C. viperæ.** The flesh of the common viper, which, with the heart and liver, was made into a powder constituting the *bezoardicum animale* (1st def.). [B, 119.]—**C. vulpis.** The flesh of the fox (*Canis vulpes*), formerly official. [B, 180.]—**Extractum carnis, Extractum carnis bovinæ** [Gr. Ph.], **Extractum carnis Liebig** [Ger. Ph., 1st ed.]. See Beef-*extract*.—**Infusum carnis bubulæ.** See Beef-*tea*.—**Infusum carnis frigide paratum** [Russ. Ph.]. A sort of beef-extract made up of 2,280 parts of finely chopped beef, freed from fat, 7,680 of cold distilled water, 4 of hydrochloric acid, and 30 of pure salt, macerated for two hours with frequent stirring and strained. The filtrate should amount to 5,760 parts, and be a clear reddish-brown fluid. [B, 95.] Cf. Beef-*juice*.—**Jusculum cum carne bovis.** See Beef-*tea*.—**Succus carnis.** See Beef-*juice*.

CARO, n. In India, the *Strychnos nux vomica*. [B, 121.]

CAROB, n. Ka^{2}r'o^{2}b. From Ar., *kharrûb*, a pod. Lat., *caroba*. Fr., *caroubier* [Fr. Cod.]. Ger., *Karoubenbaum*, *Johannisbrodbaum*. It., *carrubo*. Sp., *algarrobera*, *algarrobo*. The *Ceratonia siliqua*, or St. John's bread-tree; also its fruit. [B, 19, 113.]—**C.-beans.** Fr., *caroube* [Fr. Cod.]. The fruit (pods) of *Ceratonia siliqua*. [B, 19, 119.]—**C.-tree.** See *C.*

CAROBA (Lat.), n. f. Ka^{2}r(ka^{3}r)-ob'a^3. Fr., *caroub*. Ger., *C.* It., Port., *c.* 1. The carob, or fruit of *Ceratonia siliqua*. 2. In Brazil, a name for several bignoniaceous trees used medicinally, especially the *Jacaranda procera*; in this sense, often written *caraiba*. [B, 180, 270; "Sentido Católico"; "Med. Record," Aug. 5, 1882, p. 163 (B).]—**C.-assu.** The *Jacaranda subrhombea*. [B, 270.]—**C.-bark.** See *Cortex carobæ*.—**C. branca.** The *Sparattosperma lithontripticum*. [B, 270.]—**C. de campo** (Port.). The *Bignonia nodosa*. [B, 270.]—**C. de flor verde** (Port.). The *Cybistax antisyphilitica*. [B, 270.]—**C. de paulistas** (Port.). The *Jacaranda oxyphylla*. [B, 270.]—**C. guyra.** The *Bignonia purgans*. [B, 270.]—**C'harz** (Ger.). See *C. resin*.—**C.-leaves.** See *Folia carobæ*.—**C. mirim, C. miuda.** The *Jacaranda procera*. [B, 270.]—**C. preta.** See *C.-assu*.—**C. resin.** Ger., *C'harz*. Fr., *résine du caroub*. A resin found by Peckholt, to the amount of 1 part in 30, in the leaves of *Jacaranda procera*. [B, 270.]—**C'rinde** (Ger.). See *Cortex carobæ*.—**C'säure** (Ger.). Carobic acid. [B, 270.]—**Cortex carobæ, Folia carobæ.** The bark and leaves of *Jacaranda procera* and of other bignoniaceous trees, especially of *Cybistax antisyphilitica*; the former is emeto-cathartic and is employed in syphilis, diarrhœa, and dysentery; the latter are used in frambœsia. [B, 180.]

CAROBE DI GIUDEA (It.), n. Ka^{3}r-ob'a de ju-da'a^3. The galls which form on the branches of *Pistacia terebinthus*; so called from their resemblance to the pods of *Ceratonia siliqua*; very resinous and used as a fumigation in asthma. [B, 180, 270.]

CAROBARIA (Lat.), n. f. Ka^{2}r(ka^{3}r)-ob-a(a^3)'ri^2-a^3. The *Cercis siliquastrum*. [B, 121.]

CAROBENBAUM (Ger.), n. Ka^{3}r-ob'e^{2}n-ba^3-um. The *Ceratonia siliqua*. [B, 180.]

CAROBIC ACID, n. Ka^{2}r-ob'i^{2}k. Fr., *acide carobique*. Ger., *Carobasäure*. A crystallizable acid, soluble in water and in alcohol, found by Peckholt in the leaves of *Jacaranda procera* in the proportion of 1 part in 2,000. ["Sentido Católico"; "Med. Record," Aug. 5, 1882, p. 163; B, 270.]

CAROBINE, n. Ka^{2}r-ob'en. A natural alkaloid found by Peckholt in the leaves of *Jacaranda procera*, in the proportion of 1 part in 600, crystallizing in silky needles, insoluble in ether, rapidly soluble in water and in boiling alcohol. ["Sentido Católico"; "Med. Record," Aug. 5, 1882, p. 163; B, 270.]

CAROBINHA (Port.), n. Ka^{3}r-ob-en'ya^3. The *Jacaranda procera*. [B, 270.]

CAROBONE, n. Ka^{2}r-ob'on. Fr., *c.* Ger., *Carobon*. A balsamic, acid resin found by Peckholt in the leaves of *Jacaranda procera* in the proportion of 1 part in 38. ["Sentido Católico"; "Med. Record," Aug. 5, 1882, p. 163; B, 270.]

CARŒNUM (Lat.), n. n. Ka^{2}r(ka^{3}r)-en'(o^2'e^{2}n)-u^{3}m(u^{4}m). See Carenum (2d def.).

CAROLI (Lat.), n. m. pl. Ka^{2}r(ka^{3}r)-ol'i(e). An old name for venereal pustules upon the penis, chancre. [A, 325; G.]

CAROLINATHEE (Ger.), n. Ka^{3}r-ol-en'a^3-ta. The leaves of *Prinos glaber* and of related species of *Prinos*. [B, 270.]

CAROLINEA [Linnæus fil.] (Lat.), n. f. Ka^{2}r(ka^{3}r)-ol-i^{2}n'e^2-a^3. From the princess *Sophia Caroline* of Baden. See Pachira. [B, 19, 121.]—**C. insignis** [Swartz]. The *Pachira insignis*. [B, 173.]—**C. princeps** [Linnæus]. The *Pachira aquatica*. [B, 173.]

CAROLINENBRUNNEN (Ger.), n. Ka^{3}r-ol-en'e^{2}n-brun-ne^{2}n. See Marienbad.

CAROLINENQUELLE (Ger.), n. Ka^{3}r-ol-en'e^{2}n-kwe^{2}l-le^2. See Mehadia.

CAROMEL, n. Ka^{2}r'o-me^{2}l. See Caramel.

CAROMP-ALLAGUM (Hind.), n. A *Fungus* (according to Berkeley, the *Mylitta lapidescens*), much used as a diuretic, especially in cases of turbid urine with copious white deposits. [B, 121.]

CARON (Lat.), n. n. Ka(ka^3)'ro^{2}n. Gr., κάρον. Of Dioscorides, caraway-fruit. [B, 180.]

CARONCLE, n. Ka^{2}r'o^{2}n^{2}kl. A soft retractile caruncle on each side, at the anterior angle of the prothorax of certain *Coleoptera*. [L, 158.]

CARON-COUACA, n. In Surinam, the *Clusia rosea*. [B, 121; L, 105.]

CARONCULAIRE (Fr.), adj. Ka^{3}r-on^{2}k-u^{6}l-a^{2}r. See Caruncular.

CARONCULE (Fr.), n. Ka^{3}r-on^{2}k-u^{6}l. See Caruncule.—**C's amniotiques.** The equivalent of Müller's term for certain elevations springing from the inner surface of the amnion, especially about the insertion of the umbilical cord. [A, 15.]—**C. de l'urèthre.** See Caput *gallinaginis*.—**C's papillaires.** See Papillæ *renales*.

CARONCULÉ (Fr.), adj. Ka^{3}r-on^{2}k-u^{6}l-a. See Carunculate.

CARONCULEUX (Fr.), adj. Ka^{3}r-on^{2}k-u^{6}l-u^5. See Caruncoulous and Carunculose.

CARO-NERVALON (Hind.), **CARONER-VOLVE** (Hind.), n's. The genus *Premna*. [B, 121.]

CARONI, n. See Carony-bark.

CARONOSI, n. In India, a species of *Gratiola*. [B, 121.]

CARONY-BARK, n. Ka^{3}r-on'i^2. Ger., *Caronyrinde*. Sp., *quina-quina de Carony*. True Angustura bark; the bark of *Galipea officinalis*. [B, 121, 180.]

CARONYRINDE (Ger.), n. Ka^{3}r-on'u^6-ri^{2}nd-e^2. See Carony-bark.—**C'nbaum.** The *Galipea officinalis*. [B, 180.]

CAROO-KOOVA (Tamil), n. The *Zizyphus trinervius*. [B, 172.]—**C.-k.-ellay.** See C.-k.

CAROO-NOOCHIE (Tamil), n. Also written *Caroo-nochie* and *Caroo-nokie*. The *Gendarussa vulgaris*. [B, 172.]

CAROPI [Camelli], n. Ka^{3}r-op'i^2. A term probably synonymous with *Amomum*. [B, 121.]

CAROS (Lat.), n. m. Ka(ka^3)'ro^{2}s. Gen., *car'eos* (*-eis*). Gr., κάρος. 1. Of Dioscorides, caraway-fruit. [B, 180.] 2. See Carus (3d def.).

CAROSIS (Lat.), n. f. Ka^{2}r(ka^{3}r)-os'i^{2}s. Gen., *caros'eos* (*-is*). Gr., κάρωσις. See Carus (3d def.).

CAROTA [U. S. Ph.] (Lat.), n. f. Ka^{2}r(ka^{3}r)-ot'a^3. Gr., καρωτόν. Fr., *carotte*. Ger., *Karotte*. 1. The carrot (*Daucus c.*). 2. Of De Candolle, a section of the genus *Daucus*. [B, 119, 121, 214.]—**Pulpa e radice carotæ** [Fr. Cod.]. See *Pulpe de* carotte.—**Radix carotæ.** The root of *Daucus c.* [B.]

CAROTE (Ger.), n. Ka^{3}r-ot'e^2. See Carota.

CAROTIC, adj. Ka^{2}r-o^{2}t'i^{2}k. Gr., καρωτικός (from καροῦν, to stupefy). Lat., *caroticus*. Fr., *carotique*. Ger., *einschläfernd* (1st def.), *schlafmachend* (1st def.). It., *carotico*. Sp., *carótico*. 1. Producing sleep, stupefying. 2. Relating to stupor (*carus*). 3. Relating to the carotids. See Carotid. 4. Of or pertaining to the genus *Carota*. [B.]—**C. acid.** Fr., *acide carotique*. Carotin. [B.]

CAROTICO-CLINOIDEUS (Lat.), adj. Ka^{2}r(ka^{3}r)-o^{2}t(ot)''-i^{2}k-o(o^2)-kli^{2}n-o(o^2)-i^{2}d(ed)'e^2-u^{3}s(u^{4}s). For deriv., see Carotic, and Clinoid. Relating to the carotid artery or region and the clinoid processes. [L, 31.]

CAROTICO-TYMPANICUS (Lat.), adj. Ka^{2}r(ka^{3}r)-o^{2}t(ot)″-i^{2}k-o(o^2)-ti^{2}m(tu^{6}m)-pa^{2}n(pa^{3}n)′i^{2}k-u^{3}s(u^{4}s). For deriv., see CAROTIC and TYMPANIC. Relating to the canal, nerve, etc., which extend between the carotid canal and the tympanum. [L, 31.]

CAROTICUS (Lat.), adj. Ka^{2}r(ka^{3}r)-o^{2}t(ot)′i^{2}k-u^{3}s(u^{4}s). See CAROTIC; as a n., in the fem., *carotica* (*arteria* understood), the carotid artery; as a n., in the neut., *caroticum* (*remedium* understood), a narcotic. [L.]—**Carotica cephalica.** Ger., *Carotidenstamm.* The common carotid artery. [L, 80.]

CAROTID, adj. Ka^{2}r-o^{2}t′i^{2}d. From καρωτίδες, the c. arteries (from κάρος, a heavy sleep), from the fact that drowsiness or dullness was produced by compression or ligation of the c. arteries. Lat., *caroticus* (1st def.), *carotideus* (2d def.). Fr., *carotide* (1st def.), *carotidien* (2d def.). Ger., *einschläfernd* (1st def.), *zu den Hauptschlagadern gehörig* (2d def.). 1. Producing sleep. 2. Pertaining to the c. artery or region (*e. g.*, the c. plexus). [a, 17, 20; A, 322.] See *Common c.* ARTERY, *Internal c.* ARTERY, and *External c.* ARTERY.

CAROTIDANEURYSMA (Lat.), n. n. Ka^{2}r(ka^{3}r)-o^{2}t(ot)″i^{2}d-a^{2}n(a^{3}n)-u^{2}r-i^{2}z(u^{6}s)′ma^3. Gen., *carotidaneurys′matos* (*-is*). An aneurysm of a carotid artery. [A, 322.]

CAROTIDE (Fr.), adj. Ka^{3}r-ot-ed. See CAROTID (2d def.).—**C. commune.** See *Common carotid* ARTERY.—**C. externe.** See *External carotid* ARTERY.—**C. interne.** See *Internal carotid* ARTERY.—**C. primitive.** See *Common carotid* ARTERY.

CAROTIDENSTAMM (Ger.), n. Ka^{3}r-ot-ed′e^{2}n-sta^{3}m. See *Internal carotid* ARTERY.

CAROTIDEUS (Lat.), adj. Ka^{2}r(ka^{3}r)-o^{2}t(ot)-i^{2}d′e^2-u^{3}s(u^{4}s). Fr., *carotidien.* See CAROTID (2d def.).

CAROTIN, n. Ka^{2}r-ot′i^{2}n. Lat., *carotinum, carotina.* Fr., *carotine, carottine.* Ger., *C.* It., *carotina.* The coloring matter of carrots; a crystalline substance, $C_{20}H_{36}$, which, dried at ordinary temperatures, is of a lustrous reddish-brown, but dried at 100° C. is bright red and has a strong odor of Florentine iris; readily soluble in carbon disulphide, in benzin, and in the volatile oils. [A, 385; B, 270.]

CAROTIQUE (Fr.), adj. Ka^{3}r-ot-ek. See CAROTIC.

CAROTIS (Lat.), n. f. Ka^{2}r(ka^{3}r)-ot′i^{2}s. Gen., *carot′idos* (*-is*). Gr., καρωτίς (1st def.). Fr., *carotide* (1st def.). Ger., *Kopfschlagader* (1st def.). 1. The carotid artery. 2. In the pl., *carotides*, Dioscorides's term for dates. [Bory (B, 121); L, 81.]—**C. cephalica, C. cerebralis.** Ger., *Carotidenstamm.* See *Internal carotid* ARTERY.—**C. communis.** See *Common carotid* ARTERY.—**C. externa, C. facialis.** See *External carotid* ARTERY.—**C. interna.** See *Internal carotid* ARTERY.—**C. primitiva.** See *Common carotid* ARTERY.—**Cerebralc′** (Ger.). See *Internal carotid* ARTERY.

CAROTISCH (Ger.), adj. Ka^{3}r-ot′i^{2}sh. See CAROTIC.

CAROTOGO-MONOCENERI, n. In Guiana, the *Besleria coccinea.* [Aublet (B, 121).]

CAROTTA (Lat.), n. f. Ka^{2}r(ka^{3}r)-o^{2}t(ot)′ta^3. 1. The *Daucus carota.* 2. About Montpellier, the *Pastinaca sativa.* [B, 121.]—**Rob carottæ.** See *Rob* DAUCI.

CAROTTE [Fr. Cod.] (Fr.), n. Ka^{3}r-ot. See CAROTA (1st def.).—**C. commune, C. cultivée.** The cultivated variety of *Daucus carota.* [B, 173.]—**C. de montagne.** The *Peucedanum cervana.* [B, 173.]—**C. gommifère.** The *Daucus gummifer.* [B, 173.]—**C. sauvage.** The *Daucus carota*, var. *silvestris.* [B, 173.]—**C. violette.** The *Daucus carota*, var. *violacea.* [B, 173.]—**Pulpe de c.** [Fr. Cod.]. Carrot-root grated and passed through a sieve. [B, 113.]—**Rob de c.** See *Rob* DAUCI.

CAROTTINE (Fr.), n. Ka^{3}r-ot-en. See CAROTIN. [B, 88, 121; L, 105.]

CAROUACHI, n. A plant of Guiana. The juice of the leaves is used by the natives to poison their arrows. [B, 121; L, 105.]

CAROUB (Fr.), n. Ka^{3}r-ub. See CAROBA.—**C. de Judée.** See CAROBE DI GIUDEA.

CAROUBE [Fr. Cod.] (Fr.), n. Ka^{3}r-ub. See CAROB-*beans.*—**C. à siliques.** The *Ceratonia siliqua.* [B, 19.]—**C. à miel.** The *Gleditschia triacanthos.* [B, 19.]

CAROUBIER [Fr. Cod.] (Fr.), n. Ka^{3}r-ub-i^2-a. The *Ceratonia siliqua.* [B, 113, 121.]—**C. de Guyane.** The genus *Hymenæa.* [Bory (B, 121).]

CAROUBOU, n. In Malabar, the *Saccharum officinarum.* [L, 105.]

CAROU-COUACA, n. The *Clusia rosea.* [B, 121.]

CAROUGE (Fr.), n. Ka^{3}r-uzh. The fruit of *Ceratonia siliqua.* [B, 119, 121.]—**C. à miel.** The *Gleditschia triacanthos.* [B, 88, 121.]—**Extrait de c.** See *Extractum* CERATONIÆ.

CAROUM, n. See CARUM.

CAROUM-NETCHOULI, CAROU-NETCHOULI, CAROU-NOTCHI. See CAROO-NOCHIE.

CAROU-OUMATÉ [Tamil], n. A variety of *Datura fastuosa*, employed in medicine and in making intoxicating drinks. [B, 121.]

CAROY-SEEDS, n. Ka^{2}r′oi. The seeds of *Carum carvi.* [B, 275.]

CARP, n. Ka^{3}rp. Lat., *carpio.* Fr., *carpe.* Ger., *Karpe.* It., *carpione.* Sp., *carpa.* The *Cyprinus carpio.* [B.]—**C.-stone.** See *Lapis* CARPIONIS.

CARPADELIUM [Desvaux] (Lat.), n. n. Ka^{3}rp-a^{2}d(a^{3}d)-el-(al)′i^2-u^{3}m(u^{4}m). From καρπός, a fruit, and ἄδηλος, secret. Fr., *carpadèle.* An indehiscent inferior fruit, consisting of two or more loculi, each containing usually a single seed. [B, 1, 19, 121.] Cf. CARCERULUS and CREMOCARP.

CARPAL, adj. Ka^{3}rp′a^{2}l. From καρπός, the wrist. Lat., *carpalis, carpeus.* Fr., *carpien.* Ger., *c.* Pertaining to the carpus or to the region of the carpus; as a n., a c. bone. [C; L, 153.]

CARPALIS (Lat.), adj. Ka^{3}rp-al(a^{3}l)′i^{2}s. See CARPAL; as a n., in the n. pl., *carpalia*, the bones of the carpus. [L, 294.]

CARPANTHEÆ [Rafinesque] (Lat.), n. f. pl. Ka^{3}rp-a^{2}n(a^{3}n)′-the^2-e(a^3-e^2). An order of plants related to the ferns (*Filices*), comprising *Carpanthus* (*Azolla*), *Salvinia*, *Marsilea*, *Pillularia*, *Isoetes*, and *Lemna.* [B, 170.]

CARPANTHUS [Rafinesque] (Lat.), n. n. Ka^{3}rp-a^{2}n(a^{3}n)′-thu^{3}s(thu^{4}s). Fr., *carpanthe.* See AZOLLA (1st def.).

CARPAS, n. The *Gossypium indicum.* [B, 121.]

CARPASION (Lat.), **CARPASIUM** (Lat.), **CARPASUM** (Lat.), **CARPASUS** (Lat.), n's n., n., n., and m. Ka^{3}rp-as(a^{3}s)′i^2-o^{2}n, -u^{3}m(u^{4}m), ka^{3}rp′a^{2}s(a^{3}s)-u^{3}m(u^{4}m), -u^{3}s(u^{4}s). Gr., κάρπασος. An undetermined plant the juice of which resembled myrrh and was used by the ancients as a narcotic poison. [Chapuis, "Lyon méd.," May 28, 1882, p. 111 (H); Dioscorides (B, 88, 121, 200); L, 84, 102, 104.]

CARPATA (Lat.), n. f. Ka^{3}rp-at(a^{3}t)′a^3. 1. Of Adanson, the genus *Ricinus.* 2. Of Lemery, the genus *Jatropha.* [B, 121.]

CARPATHICUM (Lat.), n. n. Ka^{3}rp-a^{2}th(a^{3}th)′i^{2}k-u^{3}m(u^{4}m). See *Carpathian* BALSAM and *Hungarian* TURPENTINE.

CARPATHOS (Lat.), n. m. Ka^{3}rp′a^{2}th(a^{3}th)-o^{2}s. The *Lonicera periclymenum.* [Dioscorides (B, 121).]

CARPE (Fr.), n. Ka^{3}rp. See CARPUS and CYPRINUS *carpio.*—**Pierre de c.** See *Lapis* CARPIONIS.

CARPEL, n. Ka^{3}rp′e^{2}l. From καρπός, a fruit. Lat., *carpellum.* Fr., *carpelle.* Ger., *Carpell, Fruchtblatt.* It., *carpello.* A metamorphosed leaf which, alone or with other leaves, constitutes the walls of the gynœcium of a flower. [B, 19, 121, 279.]

CARPELLARY, adj. Ka^{3}rp′e^{2}l-a-ri^2. Lat., *carpellaris.* Fr., *carpellaire.* Of, pertaining to, or containing, a carpel; resembling a carpel in nature or function. [B, 19, 279.]

CARPELLUM (Lat.), n. n. Ka^{3}rp-e^{2}l′lu^{3}m(lu^{4}m). See CARPEL.

CARPENE, n. Ka^{3}rp′en. Fr., *carpène.* Ger., *Carpen.* A liquid C_9H_{14}, obtained by distilling podocarpate of calcium. [B, 4.]

CARPENTARIA (Lat.), n. f. Ka^{3}rp-e^{2}nt-a(a^3)′ri^2-a^3. According to Gerard, the *Prunella vulgaris;* to Lemery, the *Achillea millefolium;* to French authors, the winter cress (*herbe aux charpentiers, Nasturtium hiemale*); to Blancardus, a species of *Sideritis* (probably the *Sideritis scordioides*). [B, 109, 200.]

CARPENTERS'-GRASS, n. Ka^{3}rp′e^{2}nt-u^{6}rz gra^{3}s. The *Prunella vulgaris.* [B, 275.]

CARPENTERS'-HERB, n. Ka^{3}rp′e^{2}nt-u^{6}rz u^{6}rb. The *Rivinia humilis.* [B, 275.]

CARPENTERS'-LEAF, n. Ka^{3}rp′e^{2}nt-u^{6}rz lef. The *Galax aphylla.* [B, 275.]

CARPESIEÆ (Lat.), n. f. pl. Ka^{3}rp-e^{2}s(as)-i(i^2)′e^2-e(a^3-e^2). From *Carpesium*, one of the genera. Of Lessing, a division of composite plants (*Relhanieæ*). [B, 170.]

CARPESIUM (Lat.), n. n. Ka^{3}rp-es(as)′i^2-u^{3}m(u^{4}m). Gr., καρπήσιον. Fr., *carpésie.* 1. Of Galen, an aromatic diuretic drug analogous to valerian. [A, 301.] 2. An aromatic plant, by some regarded as the cubeb plant, often employed by the ancients. [B, 109, 200.] 3. Of Linnæus, a genus of composite plants of the tribe *Inuloideæ.* [B, 42, 121.]

CARPET-PLANT, n. Ka^{3}rp′e^{2}t pla^{3}nt. The *Inopsidion acaule;* also a general term for plants of dense dwarf foliage used to form an ornamental turf or carpet. [B, 275.]

CARPET-TREE, n. Ka^{3}r′pe^{2}t-tre. The *Capparis verrucosa.* [B, 282.]

CARPET-WEED, n. Ka^{3}rp′e^{2}t wed. The genus *Mollugo.* [B, 19, 75.]

CARPHEOTUM (Lat.), n. n. Ka^{3}rf-e^2-ot′u^{3}m(u^{4}m). Of Pliny, a very pure and white sort of incense collected during summer from an unknown tree. [Bory (B, 121).]

CARPHICUS (Lat.), **CARPHODES** (Lat.), **CARPHOIDES** (Lat.), adj's. Ka^{3}rf′i^{2}k-u^{3}s(u^{4}s), ka^{3}rf-od′ez(as), -o(o^2)-id(ed)′ez(as). Gr., καρφοειδής (from κάρφος, a filament, and εἶδος, likeness). Ger., *spreuähnlich, hälmchenähnlich.* Flocculent. [A, 322.]

CARPHOLOGY, n. Ka^{3}rf-o^{2}l′o-ji^2. Gr., καρφολογία (from κάρφος, a filament or mote, and λέγειν, to pluck). Lat., *carphologia.* Fr., *carphologie.* Ger., *Flockenlesen, Mückengreifen.* Picking at the bedclothes or grasping at imaginary things in the air, observed in low forms of fever. [D.]

CARPHOS (Lat.), n. n. Ka^{3}rf′o^{2}s. Gr., κάρφος. Ger., *Spreuhälmchen* (1st def.). 1. Of Hippocrates, a straw, mote, filament, or any small body. 2. Of Pliny, the *Trigonella fœnum græcum.* [B, 88, 121; L, 84.]

CARPIA (Lat.), n. f. Ka^{3}rp′i^2-a^3. From *carpere*, to pluck. See CHARPIE.

CARPIÆUS (Lat.), adj. Ka^{3}rp-i^2-e′(a^3′e^2)-u^{3}s(u^{4}s). See CARPAL; as a n. (*musculus* understood) the palmaris brevis muscle. [L, 325.]

CARPIAL, CARPIALIS (Lat.), **CARPIAN,** adj's. Ka^{3}rp′-i^2-a^{2}l, ka^{3}rp-i^2-al(a^{3}l)′i^{2}s, ka^{3}rp′i^2-a^{2}n. See CARPAL.

CARPICUS (Lat.), adj. Ka^{3}rp′i^{2}k-u^{3}s(u^{4}s). From καρπός, a fruit. Fr., *carpique.* Of or pertaining to fruit. [B, 121, 123.] See FOLIUM *carpicum.*

CARPIDE, n. Ka^{3}rp′i^{2}d(id). Gr., καρπίδιον (dim. of καρπός, a fruit). Lat., *carpidium.* Fr., *carpidie.* Ger., *Carpid, Karpid.* See CARPEL.

CARPIDIER (Fr.), n. Ka^{3}rp-ed-i^2-a. A polygynœcial fruit; a compound fruit resulting from the union of two or more simple fruits. [B, 38; L, 41.]

CARPIDIUM (Lat.), n. n. Ka^{3}rp-i^{2}d′i^2-u^{3}m(u^{4}m). See CARPEL.

CARPIEN (Fr.), adj. Ka^{3}rp-i^2-a^{3}n^2. See CARPAL.

CARPIGNA, n. In some parts of France, the *Lathræa clandestina* or the *Arachis hypogæa.* [Déterville, Levrault (B, 88, 121).]

CARPINEÆ (Lat.), n. f. pl. Ka^{3}rp-i^{2}n(en)′e^2-e(a^3-e^2). Fr., *carpinées.* 1. Of Spach, a section of the *Betuloideæ*, comprising *Ostrya* and *Carpinus.* 2. Of Döll., an order of the *Cupuliferæ*, comprising *Carpinus, Corylus*, etc. [B, 170.]

CARPINICOLUS (Lat.), adj. Ka^{3}rp-i^{2}n(en)-i^{2}k′ol(o^{2}l)-u^{3}s(u^{4}s). From *Carpinus* (*q. v.*), and *colere*, to inhabit. Fr., *carpinicole.* Growing upon the *Carpinus.* [B.]

CARPINIFOLIUS (Lat.), adj. Ka^{3}rp-i^{2}n(en)-i^2-fol(fo^{2}l)′i^2-u^{3}s-(u^{4}s). From *Carpinus* (*q. v.*), and *folium*, a leaf. Having leaves like those of the *Carpinus.* [B.] See OSTRYA *carpinifolia.*

CARPINUS (Lat.), n. f. Ka^{3}rp-in(en)′u^{3}s(u^{4}s). From Celt., *car*, wood, and *pino*, the head, from its use in making yokes. Gr., *ζυγία.* Fr., *charme.* Of Linnæus, a genus of trees and shrubs of the tribe *Coryleæ* of the *Cupuliferæ* (*Betulaceæ* [Prantl]), indigenous to Europe, Asia, and America. [B, 34, 121; Prantl (B, 245).]—**C. americana** [Linnæus]. Fr., *bois d'or.* The blue beech, water-beech, or horn-beam; a tree growing throughout the United States. [B, 34, 121.]—**C. betulus** [Linnæus]. Fr., *charme blanc, charmille, charpenne, charpre.* Ger., *Hainbuche, Weissbuche.* The horn-beam, horn-beech, horse-beech, or white beech; a tree growing in central and southern Europe. Its charcoal is employed in making gun-powder; the bark and inner bark furnish a yellow dye. The leaves were formerly used as an astringent mouth-wash and gargle. [A, 319; B, 121, 173, 245.]—**C. caroliniana.** See *C. Americana.*—**C. incisa** [Aiton]. A variety of *C. betulus.* [B, 173.]—**C. ostrya** [Linnæus]. The *Ostrya carpinifolia.* [B, 173.]—**C. quercifolia** [Desfontaines]. A variety of *C. betulus.* [B, 173.]—**C. virginiana** [Linnæus, Lamarck]. The *Ostrya virginica.* [B, 173.]—**C. vulgaris** [Miller]. The *C. betulus.* [B, 173.]

THE CARPINUS BETULUS. [A, 327.]

CARPIO (Lat.), n. f. Ka^{3}rp′i^2-o. Gen., *carpio′nis.* The carp. [B, 180.] See CYPRINUS *c.*—**Lapides carpionum, Lapis carpionis.** Fr., *pierre de carpe.* Ger., *Karfenstein.* The *os basilare* of the head of the carp; formerly used as a diuretic and solvent of renal and cystic calculi. [B, 180, 200.]

CARPIQUE (Fr.), adj. Ka^{3}rp-ek. See CARPICUS.

CARPISMUS (Lat.), n. m. Ka^{3}rp-i^{2}z(i^{2}s)′mu^{3}s(mu^{4}s). The wrist. [L, 325.]

CARPIUM (Lat.), n. n. Ka^{3}rp′i^2-u^{3}m(u^{4}m). A carpel. [B, 123.]

CARPOBALSAMUM (Lat.), n. n. Ka^{3}rp″o(o^2)-ba^{2}l(ba^{3}l)′-sa^{2}m(sa^{3}m)-u^{3}m(u^{4}m). From *καρπός*, a fruit, and *βάλσαμον*, a balsam. Fr., *c.* Ger., *Balsamfrucht.* The fruit of the Mecca balsam-tree (*Balsamodendron gileadense*); also sometimes applied to allspice. [B, 121, 173, 180.] See PIMENTA.

CARPOBLEPHARIDEÆ (Lat.), n. f. pl. Ka^{3}rp″o(o^2)-ble^{2}f-a^{2}r(a^{3}r)-i^{2}d′e^2-e(a^3-e^2). From *Carpoblepharis*, one of the genera. Of Kützing, a family of *Algæ* (*Platynoblasteæ*, or *Rhodomeleæ* [Trevisan]). [B, 121, 170.]

CARPOBLEPTUS [Stackhouse] (Lat.), n. m. Ka^{3}rp-o(o^2)-ble^{2}p′tu^{3}s(tu^{4}s). See FUCUS.

CARPOBOLEÆ [Dumortier, Brongniart] (Lat.), **CARPOBOLEI** [Link, Endlicher, Léveillé] (Lat.), **CARPOBOLI** [Fries, Corda, Bonorden] (Lat.), **CARPOBOLINEÆ** [Matthieu] (Lat.), n's f. pl., m. pl., m. pl., and f. pl. Ka^{3}rp-o-bol(bo^{2}l)′e^2-e(a^3-e^2), -i(e), -o^{2}b′ol(o^{2}l)-i(e), -o^{2}b-ol(o^{2}l)-i^{2}n′e^2-e(a^3-e^2). A family, tribe, or section of gasteromycetous *Fungi* (*Angeiogasteres, Nidulariacei*), comprising *Carpobolus* (*Sphærobolus*), etc. [B, 170.]

CARPOCACE (Lat.), n. f. Ka^{3}rp-o^{2}k′a^{2}s(a^{3}k)-e(a). From *καρπός*, the wrist, and *κακός*, evil. Disease of the carpus. [A, 322.] Cf. ARTHROCACE and CHEIROCACE.

CARPOCARDIUM (Lat.), n. n. Ka^{3}rp-o(o^2)-ka^{3}rd′i^2-u^{3}m(u^{4}m). The *Anona triloba.* [B, 121.]

CARPO-CARPAL, adj. Ka^{3}rp″o-karp′a^{2}l. Fr., *carpo-carpien.* Pertaining to different parts of the carpus in their relations to each other (said especially of the articulation between the two rows of carpal bones). [A, 301; L, 88.] See MEDIO-CARPAL and INTERCARPAL.

CARPOCEREÆ (Lat.), n. f. pl. Ka^{3}rp-o(o^2)-se^{2}r(ke^{2}r)′e^2-e-(a^3-e^2). Of Dumortier, a family of the *Urnulineæ*, comprising the single genus *Caspoceros* (*Anthoceros*). [B, 170.] Cf. ANTHOCERIDEÆ.

CARPOCERINEÆ (Lat.), n. f. pl. Ka^{3}rp-o(o^2)-se^{2}r(ke^{2}r)-i^{2}n′-e^2-e(a^3-e^2). Syn.: *Anthocerineæ.* Of Dumortier, a division of the *Hepaticæ*, comprising *Anthoceros* and *Blandovia.* [B, 170.]

CARPOCERITE, n. Ka^{3}rp-o^{2}s′e^{2}r-it. Fr., *carpocérite.* In the *Crustacea*, the fifth segment of an antenna, representing the carpopodite of the other appendages. [L, 11.]

CARPO-CERVICAL, adj. Ka^{3}rp″o-su^{5}r′vi^2-ka^{2}l. From *carpus*, the wrist, and *cervix*, the neck. Fr., *c.-c.* Pertaining to the wrist and the neck. [a, 18.] See CRAVATE *carpo-cervicale.*

CARPOCHORIZA (Lat.), n. f. Ka^{3}rp-o(o^2)-kor(ch^{2}or)′i^{2}z-a^3. From *καρπός*, a fruit, and *χωρίζειν*, to separate. Fr., *carpochorize.* A multiple fruit, one composed of distinct carpels. [B, 121.]

CARPOCLONIUM (Lat.), n. n. Ka^{3}rp-o(o^2)-klon′i^2-u^{3}m(u^{4}m). From *καρπός*, a fruit, and *κλωνίον*, a young shoot. Fr., *carpoclone.* Of Kützing and others, the free receptacle in which the tetrachocarps of certain *Algæ* are contained. [B, 19, 121.]

CARPODINUS (Lat.), n. m. Ka^{3}rp-o(o^2)-din(den)′u^{3}s(u^{4}s). From *καρπός*, a fruit, and *δῖνος*, a large round cup. Fr., *carpodine.* Of R. Brown, a genus of apocynaceous climbing shrubs, indigenous to tropical Africa, yielding an orange-shaped, pulpy edible fruit. [B, 19, 121.]

CARPODIPTERA (Lat.), n. n. pl. Ka^{3}rp-o(o^2)-di^{2}p′te^{2}r-a^3. From *καρπός*, a fruit, and *δίπτερος*, double-winged. So called from the doubly (quadruply) winged fruit. Of Grisebach, an order of tiliaceous plants of the tribe *Brownlowieæ.* [B, 121.]

CARPODONTEÆ (Lat.), n. f. pl. Ka^{3}rp-o(o^2)-do^{2}nt′e^2-e(a^3-e^2). From *καρπός*, a fruit, and *ὀδούς*, a tooth. Of Dumortier and Bartling, a division of the *Garcineæ*; of Meissner, a tribe of the *Hypericineæ*, comprising *Carpodontos, Eucryphia*, etc. [B, 170.]

CARPOGENOUS, adj. Ka^{3}rp-o^{2}j′e^{2}n-u^{3}s. From *καρπός*, a fruit, and *γενᾶν*, to generate. Producing fruit, fertile (said of cells destined to produce fruit, seed, or spores). [B, 279.]

CARPOGLYPHEUS (Lat.), n. m. Ka^{3}rp-o(o^2)-gli^{2}f(glu^{6}f)′e^2-u^{3}s(u^{4}s). From *καρπός*, a fruit, and *γλυφεύς*, a sculptor. Fr., *carpoglyphe.* A genus of *Acarina*, including species that attack fruit. [A, 385.]

CARPOGONIUM (Lat.), n. n. Ka^{3}rp-o(o^2)-gon(go^{2}n)′i^2-u^{3}m-(u^{4}m). From *καρπός*, a fruit, and *γονή*, a genital organ. Fr., *carpogone.* Ger., *Carpogon, Karpogon.* The female sexual organ in the grand division *Carposporeæ*, consisting of one or more cells which are either all fertile or partly fertile and partly barren, the latter developing as the result of the fertilization of the former into an organ enveloping the fertilized cells and their product, the spores. In the lichens and ascomycetous *Carposporeæ* the ascogonium and the trichogyne are regarded as the c. [B, 54, 75, 279.] See CARPOSPOREÆ and SPOROCARP.

CARPOLITE, CARPOLITH, n's. Ka^{3}rp′o-lit, -li^{2}th. Lat., *carpolithus* (from *καρπός*, a fruit, and *λίθος*, a stone). Fr., *carpolithe.* Ger., *Fruchtstein.* 1. A petrified fruit. 2. A stony concretion formed in a fruit by an agglomeration of the sclerenchymatous cells. [B, 38, 121.] Cf. CARPOMANIA.

CARPOLOGY, n. Ka^{3}rp-o^{2}l′o-ji^2. Gr., *καρπολογία* (from *καρπός*, a fruit, and *λέγειν*, to gather (1st def.), or *λόγος*, understanding (2d def.). Lat., *carpologia.* Fr., *carpologie.* Ger., *Fruchtlese* (1st def.), *Fruchtlehre* (2d def.). 1. The gathering of fruit. [A, 322.] 2. The science which treats of the structure, development, and classification of fruits and seeds. [B, 19, 121; L, 56.] The term has been used also, improperly, for *carphology* (*q. v.*).

CARPOMA (Lat.), n. n. Ka^{3}rp-om′a^3. Gen., *carpom′atos* (*-is*). Of Kützing, the receptacle which in certain *Algæ* contains the reproductive organs. [B, 121.]

CARPOMANIA (Lat.), n. f. Ka^{3}rp-o(o^2)-man(ma^{3}n)′i^2-a^3. From *καρπός*, a fruit, and *μανία*, madness. Fr., *carpomanie.* 1. A condition of fruit in which, by development of the sclerenchyma, woody deposits are formed, making the fruit gritty. This condition is really a normal one, the absence of such deposits being the result of cultivation. [B, 19, 121.] 2. The excessive production of fruit by cultivated trees. [B, 38.]

CARPOMEL, n. Ka^{3}rp′o-me^{2}l. From *καρπός*, a fruit, and *μέλι*, honey. The uncrystallizable sugar of fruits. [L, 49.]

CARPOMÉRISE (Fr.), n. Ka^{3}rp-o-mar-es. From *καρπός*, a fruit, and *μερίζειν*, to divide. Of the older botanists, a fruit which divides at the time of ripening into two similar parts (*e. g.*, the cremocarp of the *Umbelliferæ*). [B, 121.]

CARPO-METACARPAL, adj. Ka^{3}rp″o-me^{2}t-a^3-ka^{3}rp′a^{2}l. Lat., *carpo-metacarpeus, carpo-metacarpianus.* Fr., *carpo-métacarpien.* Pertaining to the carpus and the metacarpus. [L, 7.]

CARPO-METACARPEUS (Lat.), adj. Ka^{3}rp″o(o^2)-me^{2}t-a^3-ka^{3}rp′e^2-u^{3}s(u^{4}s). See CARPO-METACARPAL; as a n., a muscle extending from the carpus to the metacarpus. [A, 385.]—**C.-m. minimi digiti.** Fr., *carpo-métacarpien du petit doigt.* See OPPONENS *minimi digiti.*—**C.-m. pollicis.** Fr., *carpo-métacarpien du pouce.* See OPPONENS *pollicis.*

CARPOMORPHA (Lat.), n. f. Ka^{3}rp-o(o^2)-mo^{2}rf′a^3. From *καρπός*, a fruit, and *μορφή*, form. Fr., *carpomorphe.* A part or organ in a cryptogam which is analogous to the fruit of the phanerogams (sometimes applied to the spores of lichens). [B, 19, 121.]

CARPOMORPHUS (Lat.), adj. Ka^{3}rp-o(o^2)-mo^{2}rf′u^{3}s(u^{4}s). Fr., *carpomorphe.* Resembling or having the form of fruit. [B.] See CARPOMORPHA.

CARPOMYZE (Fr.), adj. Ka^{3}rp-o-mez. From *καρπός*, a fruit, and *μύζειν*, to suck. Subsisting upon the juice of fruits (said of dipterous insects). [L, 41, 109.]

CARPO-OLECRANAL, adj. Ka^{3}rp″o-o-le^{2}k′ra^{2}n-a^{2}l. For deriv., see CARPUS and OLECRANON. Fr., *carpo-olecranien.* Per-

taining to the wrist and the lower part of the upper arm. [a, 18.] See CRAVATE *carpo-olecranienne.*

CARPOORA, n. A kind of very friable gypsum, used in powder, in India, on superficial wounds and ichorous ulcers. [L, 105.]

CARPOORUM (Tamil), n. The *Dryobalanops camphora.* [B, 88, 121.]

CARPOO-WOOLANDOO (Tamil), n. The *Cajanus indicus.* [B, 72.]

CARPO-PEDAL, adj. Ka³rp″o-ped′a²l. From καρπός, the wrist, and *pes*, the foot. Fr., *carpo-pédal.* Pertaining to the wrists and the feet, more particularly to the thumbs and the great toes. [A, 385.] See *C.-p.* SPASM.

CARPOPHAGA (Lat.), n. f. sing. and n. pl. Ka³rp-o²f′a³g-a³. From καρπός, a fruit, and φάγειν, to eat. Fr., *carpophages* (1st def.). Ger., *fruchtfressende Beutelthiere* (1st def.). 1. (Pl.) an order or section of the *Botanophaga.* 2. (Sing.) a genus of the *Columbidæ.* [L, 14, 241.]

CARPOPHAGIDÆ (Lat.), n. f. pl. Ka³rp-o(o²)-fa²j(fa³g)′i²d-e(a³-e²). Of Sclater, a family of the *Columbæ.* [L, 121.]

CARPOPHAGOUS (Lat.), adj. Ka³rp-o²f′a²g-u³s. Lat., *carpophagus.* Fr., *carpophage.* Ger., *fruchtfressend.* Living upon fruits. [L, 14.]

CARPO-PHALANGEUS (Lat.), adj. Ka³rp″o(o²)-fa²l(fa³l)-a²n(a³n²)′je²(ge²)-u³s(u⁴s). Fr., *carpo-phalangien.* Pertaining to the carpus and to a phalanx ; as a n., a muscle extending from the carpus to a phalanx. [L, 7.]—**C.-p. minimi digiti.** Fr., *carpo-phalangien du petit doigt.* See ABDUCTOR *minimi digiti manus.*—**C.-p. pollicis.** Fr., *carpo-phalangien du pouce.* See FLEXOR *brevis pollicis manus.*

CARPO-PHALANGINUS (Lat.), adj. Ka³rp″o(o²)-fa²l(fa³l)-a²n(a³n²)-jin(gen)′u³s(u⁴s). See CARPO-PHALANGEUS.

CARPOPHILOUS (Lat.), adj. Ka³rp-o²f′i²l-u³s. From καρπός, a fruit, and φιλεῖν, to love. Fr., *carpophile.* Parasitic on fruits. [L, 41.]

CARPOPHORE, n. Ka³rp′o-for. Lat., *carpophorum* (from καρπός, a fruit, and φορεῖν, to bear). Fr., *c.* Ger., *Fruchtträger.* 1. Of Link, an elongated portion of the receptacle which projects above the perianth and the androecium and supports the gynœcium and subsequently the fruit. It was called *thecaphore* [Ehrenberg] or *basigynium* [Richard] when the gynœcium was formed of united carpels, and *polyphore* [Richard] when the gynœcium was formed of distinct carpels. The name is still retained for the slender forked axis which bears the twin fruit (mericarps) of the *Umbelliferæ.* 2. In the cryptogams, a structure which bears the reproductive organs or the spores (*e. g.*, the pedicel of the urn in mosses, or the spore-bearing body in *Fungi*). [B, 75, 121, 279.]

CARPOPHOROUS, adj. Ka³rp-o²f′o²r-u³s. Gr., καρποφόρος. Lat., *carpophorus.* Fr., *carphophore.* Ger., *fruchttragend.* Bearing or supporting a fruit or fruit-like body. [B.]

CARPOPHORUM (Lat.), n. n. Ka³rp-o²f′o²r-u³m(u⁴m). See CARPOPHORE.

CARPOPHYLL, n. Ka³rp′o-fi²l. See CARPEL.

CARPOPHYLLON (Lat.), n. n. Ka³rp-o(o²)-fi²l(fu⁶l)′lo²n. From καρπός, a fruit, and φύλλον, a leaf. Of Pliny, probably the *Ruscus hypophyllum* or *Ruscus hypoglossum.* [B, 121.]

CARPOPHYLLUM (Lat.), n. n. Ka³rp-o(o²)-fi²l(fu⁶l)′lu³m-(lu⁴m). 1. See CARPOPHYLLON. 2. A carpel. [B, 19, 28, 121.]

CARPOPLÈSE (Fr.), n. Ka³rp-o-ple²s. From καρπός, a fruit, and πλησίος, contiguous. An aggregate fruit. [B, 121.]

CARPOPODE (Fr.), n. Ka³rp-o-pod. See CARPOPODIUM.

CARPOPODITE, n. Ka³rp-o²p′o²d-it. From καρπός, the wrist, and πούς, the foot. The fifth segment, when present, of the maxillipedes of certain *Crustacea.* [L, 11, 168.]

CARPOPODIUM (Lat.), n. n. Ka³rp-o(o²)-pod(po²d)′i²-u³m-(u⁴m). From καρπός, a fruit, and πούς, the foot. 1. The pedicel of a fruit. 2. Of De Candolle, a section of the genus *Heliophila.* [B, 19, 121.]

CARPOPOGON (Lat.), n. m. Ka³rp-o(o²)-pog′o²n(on). Gen., *carpopogon′os* (*-is*). From καρπός, a fruit, and πώγων, the beard. Of Roxburgh, a genus of plants now made a section of *Mucuna.* [B, 121.]—**C. giganteus** [Roxburgh]. The *Mucuna gigantea.* [B, 172.]—**C. pruriens** [Roxburgh]. The *Mucuna pruriens* (*prurita*). [B, 172.]

CARPOPTÉRYGIEN (Fr.), adj. Ka³rp-o-tar-ezh-i²-a³n². From καρπός, the wrist, and πτερύγιον, a small wing. Having arms in the form of fins, or fins in the form of arms. [L, 41.]

CARPOPTOSIS (Lat.), n. f. Ka³rp-o²p-tos′i²s. Gen., *carpoptos′eos* (*-is*). From καρπός, a fruit, and πτῶσις, a falling. The falling of a fruit that is well developed but not entirely mature ; due to defective conditions of nutrition. [B, 19, 121.]

CARPOS (Lat.), n. m. Ka³rp′o²s. Gr., καρπός. A seed or fruit. [L, 102.]

CARPOSPORE, n. Ka³rp′o-spor. From καρπός, a fruit, and σπορά, a seed. A spore developed in the interior of a sporocarp, as in the *Carposporeæ.* [B, 54, 75, 279.]

CARPOSPOREÆ (Lat.), n. f. pl. Ka³rp-o(o²)-spor(spo²r)′e²-e(a³-e²). Fr., *carposporées.* Ger., *Fruchtsporige.* In Sachs's classification of the *Thallophytes*, a grand division of plants, comprising those which are destitute of vascular tissue and present no differentiation into axis, root, and leaves, and which multiply partly by non-sexual processes (non-sexual spore development), partly by the action of male organs (antheridia) upon female organs (carpogonia) which are distinct in form and character from the antheridia, and which by their fertilization produce sporocarps. The sporocarps consist partly of a fertilized portion, which subsequently develops into spores, and partly of an envelope composed of sterile cells and tissues. The *C.* comprise orders usually classed among the *Algæ* and *Fungi*, the former being characterized by the presence and the latter by the absence of chlorophyll. Cf. ALGÆ. The chief classes of the *C.* are the *Coleochæteæ*, *Florideæ*, and *Characeæ*, which all contain chlorophyll, and the *Ascomycetes* (including the *Perisporiaceæ*, *Discomycetes*, *Pyrenomycetes*, *Ustilagineæ*, *Uredineæ*, and *Lichens*) and *Basidiomycetes* (comprising the *Gasteromycetes*, *Hymenomycetes*, and *Tremellini*), which are devoid of chlorophyll. [B, 35, 75, 279.]

CARPOSTOMIUM (Lat.), n. n. Ka³rp-o(o²)-stom(sto²m)′i²-u³m(u⁴m). From καρπός, a fruit, and στόμα, a mouth. Of Kützing, the orifice in the cystocarp of certain *Florideæ.* [B, 121.]

CARPO-SUS-PHALANGIEN (Fr.), adj. Ka³rp-o-su⁶-fa³l-a³n²-zhi²-a³n². Pertaining to the carpus and to the dorsal part of a phalanx ; as a n., a muscle extending between those parts. [L, 7, 43.]—**C.-s.-p. du pouce.** See ABDUCTOR *brevis pollicis.*

CARPOTHECA (Lat.), n. f. Ka³rp-o(o²)-thek(thak)′a³. From καρπός, a fruit, and θήκη, a receptacle. Fr., *carpothèque.* The conceptacle of certain *Algæ.* [B, 198.]

CARPOTICA (Lat.), n. n. pl. Ka³rp-o²t′i²k-a³. From καρπός, a fruit, and τόκος, a bringing forth. Ger., *genetische Krankheiten.* Diseases incidental to pregnancy and parturition. [M. Good (a, 17).]

CARPOTOCOS (Lat.), **CARPOTOCUS** (Lat.), adj's. Ka³rp-o²t′ok(o²k)-o²s, -u³s(u⁴s). From καρπός, a fruit, and τόκος, a bringing forth. Ger., *fruchtbringend*, *Früchte gebärend.* Bearing fruit. [A, 322.]

CARPOSE-INDOU, n. An undetermined species of *Acacia* of Coromandel. [B, 121.]

CARPOUS (Turk.), n. See CARPUS (Turk.).

CARPOZYMA (Lat.), n. f. Ka³rp-o(o²)-zim(zu⁶m)′a³. From καρπός, a fruit, and ζύμη, leaven. A genus of *Fungi* separated by Engel from the genus *Saccharomyces.* [B, 31.]—**C. apiculata** [Engel]. The *Saccharomyces apiculatus.* [B, 31, 73.]

CARPTUS (Lat.), adj. Ka³rp′tu³s(tu⁴s). Scraped (*e. g.*, *linteum carptum*). [B.]

CARPUNGE-PFEFFER (Ger.), n. Ka³rp-un²g′e²-pfe²f″fe²r. The *Piper carpunya.* [L, 80.]

CARPUNYA (Lat.), n. f. Ka³rp-un′ya³. Of Presl, a section of the genus *Piper* ; also the name of a species of that genus. [B, 121.]

CARPURUM (Tamil), n. Camphor. [B, 121.]—**C. sudum.** See *C.*

CARPUS (Lat.), n. m. Ka³rp′u³s(u⁴s). Gr., καρπός. Fr., *carpe*, *poignet.* Ger., *Handwurzel.* It., Sp., *carpo.* 1. The wrist ; that portion of the upper or anterior limb that lies between the forearm and the hand. In man the skeletal portion is composed of eight bones, the scaphoid, semilunar, pyramidal, pisiform, and unciform bones, the trapezium, the trapezoid, and the os magnum, arranged in two transverse rows. [C ; L, 142.] 2. In zoology, the first joint of the claw in the *Crustacea*, the thickened portion of the wing in insects. [L, 43.]

CARPUS (Turk.), n. Probably an erroneous spelling of *copus.* According to Kolbe, the *Cucumis citrullus.* [B, 121.]

CARQUEJA (Sp.), **CARQUEIXA** (Port.), n's. Ka³r-ka′ha³, -ka′esh-a³. The *Genista tridentata.* [B, 121.]

CARRA (Sp.), n. Ka³r′ra³. The *Mercurialis tomentosa.* [B, 121.]

CARRAGAHEEN [Fr. Cod.] (Fr., Ger.), n. Ka²r-a³-ga³-e²-a³n², ka³r-ra³-ga³-ha′e²n. See CARRAGEEN.—**C′moos** (Ger.). See *C.*—**Gelée de c.** [Fr. Cod.] (Fr.). See *Gelatina* CARRAGEEN.—**Saccharure de c.** [Fr. Cod.] (Fr.). See *Gelatina* CARRAGEEN *sicca.*—**Tisane de c.** [Fr. Cod.] (Fr.). See *Decoctum* CARRAGEEN.

CARRAGAHEN, n. The *Chondrus crispus.* [B, 121.]

CARRAGEEN [Fr. Cod., Ger. Ph., Swiss Ph.], n. Ka²r-a³-gen′. Fr., *mousse marine perlée.* Ger., *irländisches Moos*, *Perlmoos*, *Knorpeltang.* Irish moss ; the thallus of *Chondrus crispus* (*q. v.*). [B, 95, 113.]—**Decoctum c.** Fr., *tisane de carragaheen* [Fr. Cod.]. Syn. : *decoctum caragaheen* [Belg. Ph., Russ. Ph.], *ptisana de fuco crispo* [Fr. Cod.]. A decoction made by boiling 1 part of washed c. with water, so as to make 48 [Russ. Ph.], 50 [Belg. Ph.], or 200 [Fr. Cod.] parts. [B, 95.]—**Gelatina c.** [Ger. Ph.]. Fr., *gelée de carragaheen* [Fr. Cod.]. Ger., *C.-Gallerte.* Syn. : *gelatina caragaheen* [Austr. Ph., Belg. Ph., Russ. Ph.] (seu *caragheen* [Gr. Ph., Norw. Ph., Swed. Ph.]). A preparation made by boiling c. with from 30 to 60 parts of water, and adding ½, 2, or 2½ parts of sugar, and, according to the Fr. Cod., ⅛ part of orange-flower water. The resulting preparation represents in 100 parts, 6 [Norweg. Ph., Swed. Ph.], 8·6 [Gr. Ph.], 10 [Russ. Ph., Ger. Ph.], or 24 [Fr. Cod.] parts. The Belg. Ph. orders 32 parts of the *gelatina carragaheen sicca* and 16 of water, flavored with a little spirit of lemon. It was formerly much used as a demulcent in chronic bronchitis, diarrhœa, and irritation of the urinary passages. [A, 247 ; B, 95.]—**Gelatina c. sicca.** Fr., *saccharure de c.* [Fr. Cod.]. Syn. : *gelatina caragaheen sicca* [Belg. Ph.]. A preparation made by washing 1 part of c. with cold water till all bitterness is removed, boiling with water, decanting, adding 1 part [Fr. Cod.] or 4 parts [Belg. Ph.] of sugar, evaporating to dryness, and pulverizing. [B, 95, 113.]—**C.-Gallerte** (Ger.). See *Gelatina c.*—**Saccharolatum c.** See *Gelatina c. sicca.*—**C.-Schleim** (Ger.). The mucilage contained in *Chondrus crispus.* [B, 270.]—**C.-Watte** (Ger.). Cotton impregnated with a decoction of c., to be used as a poultice. [B, 270.]

CARRAGEENATUS (Lat.), adj. Ka²r-ra³-gen-at(a³t)′u³s(u⁴s). Containing carrageen. [B, 270.]

CARRAGEENIN, n. Ka^{2}r-a^{3}-gen'i^{2}n. Syn.: *caragin* [Berzelius]. Mucilage of carrageen (*Chondrus crispus*); a translucent, horny, gelatinous mass, with difficulty freed from nitrogen and ash, and then having the formula $C_6H_{10}O_5$. While still containing nitrogen it has been called *goemin* [Blondeau]. By nitric acid it is converted into mucic acid. It is identical with pararabin. [B, 5, 270.]

CARRATRACA (Sp.), n. Ka^{3}r-ra^{3}-tra^{3}'ka^{3}. A place in Andalusia, Spain, where there are slightly sulphurous mineral springs containing also free carbon dioxide, calcium chloride, and a little iron and arsenic; employed in skin affections (especially pellagra), rheumatism, and nervous and catarrhal troubles. [L, 49.]

CARRAWAY, n. See CARAWAY.

CARRÉ (Fr.), adj. Ka^{2}r-a. Lat., *quadratus*. Ger., *viereckig*. It., *quadrato*. Sp., *cuadrado*. Square. As a n., a square muscle, bone, bandage, etc. [A, 301.]—**C. crural, C. de la cuisse.** See QUADRATUS *femoris*.—**C. de la lèvre inférieure.** See DEPRESSOR *labii inferioris*.—**C. des lombes.** See QUADRATUS *lumborum*.—**C. du menton.** See DEPRESSOR *labii inferioris* and MENTO-LABIAL.—**C. du pied.** See EXTENSOR *brevis digitorum pedis*.—**C. lombaire.** See QUADRATUS *lumborum*.—**C. pronateur.** See PRONATOR *radii quadratus*.

CARREAU (Fr.), n. Ka^{2}r-ro. See TABES *mesenterica*.

CARREFOUR (Fr.), n. Ka^{2}r-fur. See DECUSSATION.—**C. sensitif** [Charcot]. The posterior third of the posterior segment of the internal capsule of the brain: a region through which sensory fibres from all parts of the body pass, as shown by the effects of lesions situated there. [α, 18; I, 27; K.]

CARRELET (Fr.), n. Ka^{2}r-r'-le^{2}. An awl. [A, 474.]

CARRHAGHEEN, n. See CARRAGEEN.—**Gelée de c.** (Fr.). See *Gelatina* CARRAGEEN. [L, 87.]

CARRI, n. See CURRY.

CARRIA, n. The *Gordonia speciosa*. [B, 19.]

CARRIABOLUM (Tamil), n. The *Aloe spicata*. [B, 88, 121.]

CARRICHTERA (Lat.), n. f. Ka^{3}r-ri^{2}ch^{2}t'e^{2}r-a^{3}. From *Carrichtera*, a German botanist. Fr., *carrichtère*. Of Adanson, a genus of cruciferous plants. [B, 121.]—**C. vellæ** [De Candolle]. Syn.: *Vella annua* [Linnæus]. An annual herb indigenous to southern Europe; the leaves are said to be antiscorbutic. [B, 173.]

CARRIÈRE (Fr.), n. Ka^{2}r-ri^{2}-e^{2}r. See CARPOLITE.

CARRION-FLOWER, n. Ka^{2}r'i^{2}-o^{2}n. Ger., *Aasblume*. The *Coproemanthus herbaceus*, the *Smilax herbacea*, and the genus *Stapelia*. [B, 19, 185.]

CARRIZO [Mex. Ph.] (Sp.), n. Ka^{3}r-reth^{2}'o. The *Arundo donax*. [A, 447.]

CARRON-OIL, n. Ka^{2}r'o^{2}n. See under OIL.

CARROT, n. Ka^{2}r'o^{2}t. Lat., *carota* [U. S. Ph., 1870]. Fr., *carotte* [Fr. Cod.]. Ger., *Karotte, gemeine Mohrrübe, gelbe Rübe*. It., *carota*. Sp., *zanahoria*. The *Daucus carota* and its root. [B, 19, 185.]—**Candia c., Candy c.** The *Athamanta cretensis*. [B, 19, 275.]—**C. family.** The *Umbelliferæ*. [B, 185.]—**C.-root.** See *Radix* CAROTÆ.—**C.-tree.** The *Monizia edulis*. [B, 19.]—**Common c.** The cultivated variety of *Daucus carota*. [B, 275.]—**Deadly c.** The genus *Thapsia*. [B, 19, 185.]—**Native c.** The tubers of *Geranium parviflorum*. [B, 19.]—**Peruvian c.** The *Arracacia esculenta*. [B, 185, 275.]—**Shining-leaved c.** The *Daucus gingidium*. [B, 275.]—**Spanish c.** The *Daucus visnaga*. [B, 275.]—**Stinking c.** See *Deadly c*.—**Tasmanian c.** See *Native c*.—**Wild c.** The wild variety of *Daucus carota*. [B, 275.]

CARRUBIA, n. The *Ceratonia siliqua*. [B, 121.] Cf. CAROBA.

CARRY-ELLOO (Tamil), n. The *Guizotia oleifera*. [B, 172.]

CARSAAMI, n. The *Calla orientalis*. [Rauwolf (B, 121).]

CARSKUTI, n. Pegu catechu. [B, 121.]

CARSUTA (Lat.), n. f. Ka^{3}rs-u^{2}t(ut)'a^{3}. The *Gentiana purpurea*. [B.]

CARTACÉ (Fr.), adj. Ka^{3}rt-as-a. See CHARTACEOUS.

CARTAGENARINDE (Ger.), n. Ka^{3}rt-a^{3}-gan'a^{3}-ri^{2}nd''e^{2}. See *Carthagena* BARK.

CARTAME (Fr.), n. Ka^{3}rt-a^{3}m. See CARTHAMUS.

CÁRTAMO (Sp.), n. Ka^{3}rt'a^{3}m-o. The genus *Carthamus*; of the Mex. Ph., the *Carthamus tinctorius*. [A, 447; B.]

CARTAMUS (Lat.), n. m. Ka^{3}rt'a^{2}m(a^{3}m)-u^{3}s(u^{4}s). See CARTHAMUS.

CARTAN-YEH, n. The *Centrolobium robustum*. [B, 121.]

CARTERIA (Lat.), n. f. Ka^{3}rt-e(a)'ri^{2}-a^{3}. Fr., *cartérie*. See COCCUS and COCCUS *lacca*.—**C. lacca** [Signoret]. See COCCUS *lacca*.

CARTHAGENA BARK, n. Ka^{3}rt-a^{3}-han'a^{3}. See under BARK.

CARTHAGÈNE (Fr.), n. Ka^{3}rt-a^{3}-zhe^{2}n. See *Carthagena* BARK.—**C. ligneux.** See *Caqueto* BARK.—**C. spongieux.** See *Spongy Carthagena* BARK.

CARTHAME (Fr.), n. Ka^{3}rt-a^{3}m. The genus *Carthamus*, especially the *Carthamus tinctorius*. [B, 121.]—**C. des teinturiers.** The *Carthamus tinctorius*. [B, 173.]—**C. laineux.** The *Carthamus lanatus*. [B, 173.]—**C. maculé.** The *Silybum marianum*. [B, 121.]—**Rouge de c.** Carthamin. [B, 173.]

CARTHAMEÆ (Lat.), n. f. pl. Ka^{3}rth-a^{2}m(a^{3}m)'e^{2}-e(a^{3}-e^{2}). Fr., *carthamées*. Of Cassini, De Candolle, and others, a subtribe of composite plants (*Carduineæ Cynareæ*), comprising *Carthamus* and *Carduncellus*. [B, 121, 170.]

CARTHAMEIN, n. Ka^{3}r-tha^{2}m'e^{2}-i^{2}n. Fr., *carthaméine*. An oxidation product of carthamin formed by the action of alkalies; insoluble in water, and slightly soluble in alcohol and in ether, which it colors red. [L, 49.]

CARTHAMIC ACID, n. Ka^{3}r-tha^{2}m'i^{2}k. Fr., *acide carthamique*. Ger., *Carthaminsäure*. It., *acido cartamico*. Carthamin. [B, 5, 81.]

CARTHAMIN, n. Ka^{3}r'tha^{2}m-i^{2}n. Fr., *carthamine, rouge de carthame*. Ger., *Carthamin, Safflorroth, Safflorcarmin*. It., Sp., *cartamina*. A red coloring principle, $C_{14}H_{16}O_7$, obtained from *Carthamus tinctorius*; a deep-red bitter powder of greenish metallic iridescence, soluble with difficulty in water and readily soluble in alcohol. It has great tinctorial power, and is used in preparing rouge and in dyeing, but does not afford fast colors. [B, 2, 81.]

CARTHAMINIC ACID, n. Ka^{3}r-tha^{2}m-i^{2}n'i^{2}k. Fr., *acide carthaminique*. Ger., *Carthaminsäure*. See CARTHAMIN.

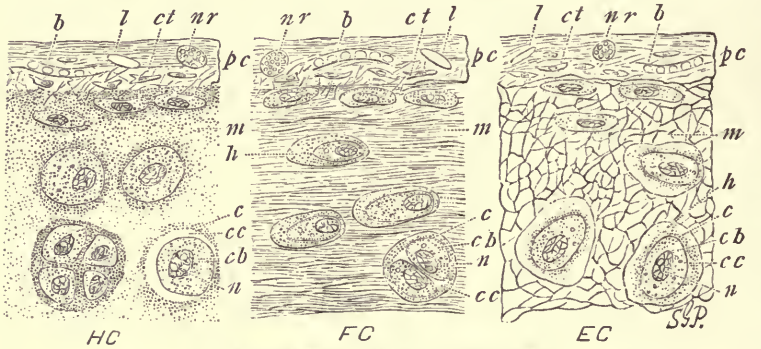
CARTHAMITE, n. Ka^{3}r'tha^{2}m-it. Lat., *carthamita*. Fr., *c*. See CARTHAMIN.

CARTHAMOIDES [Vaillant] (Lat.), n. m. Ka^{3}rth-a^{2}m(a^{3}m)-o(o^{2})-id(ed)'ez(as). Fr., *cathamoïde*. See CARDUNCELLUS.

CARTHAMUS (Lat.), n. m. Ka^{3}rth'a^{2}m(a^{3}m)-u^{3}s(u^{4}s). From Ar., *gorthom*, to paint. Fr., *carthame*. Ger., *Safflor*. It., *cartamo*. Sp., *cártamo*. Of Tournefort, a genus of composite herbs of the tribe *Carthameæ*. [B, 34, 42, 121.]—**C. aculeatus, carlinæ folio, flore multiplici veluti umbellato** [Tournefort]. The *Cardopatium corymbosum*. [B, 200.]—**C. canescens** [Lamarck]. The *Picnomon* (*Cnicus*) *acarna*. [B, 180.]—**C. corymbosus** [Linnæus]. The *Cardopatium corymbosum*. [B, 180.]—**C. glaucus.** Syn.: *Onobroma glaucum* [Sprengel]. A species growing in Tauria and the Caucasus, with reddish flowers. It is one of the plants called ἀτράκτυλις by Dioscorides, and was formerly used as a remedy for the bites of scorpions. [B, 180.]—**C. gummiferus** [Lamarck]. The *Atractylis gummifera*. [B, 173.]—**C. lanatus** [Linnæus]. Fr., *carthame laineux, chardon béni des Parisiens*. Ger., *wollige Dornhülle*. Syn.: *Centaurea lanata* [De Candolle], *Kentrophyllum lanatum* [De Candolle] (seu *luteum* [Cassini]), *Heracantha lanata* [Link], *Atractylis lanata* [Scopoli] (seu *fusus-agrestis* [Gärtner], seu *pilosa* [Mönch]), *Hohenwartha gymnogyna* [West]. A species growing wild in central and southern Europe and Asia Minor and at the Cape of Good Hope, having a more or less woolly stem and involucres and yellow flowers. The very bitter herb (*herba atractylis*) has been regarded as resolvent and tonic, and has been much employed in atony of the digestive organs. The root is said to be sudorific and febrifuge. [B, 42, 173, 180, 214.]—**C. leucocaulos** [Sibthorp]. Syn.: *Onobroma leucocaulon* [Sprengel]. A species growing in Greece, where it was employed like the *C. glaucus*, constituting with the latter one variety of the ἀτράκτυλις of Dioscorides. [B, 180.]—**C. maculatus** [Lamarck]. The *Silybum marianum*. [B, 173.]—**C. officinarum, flore croceo** [Tournefort]. The *C. tinctorius*. [B, 200.]—**C. persicus.** A species which is said to increase the secretion of milk. [L, 87.]—**C. sativus** [Parkinson]. The *C. tinctorius*. [B, 200.]—**C. silvestris.** The *Centaurea jacea*. [B, 180.]—**C. tinctorius** [Linnæus]. Fr., *carthame, carthame des teinturiers, faux safran, safran, fleur de safran, safran bâtard* (ou *d'Allemagne*), *safranon*. Ger., *Färbersafflor, gemeine Safflor, Safran*. It., *cartamo*. Hind., *Kara, Kasumbá*. Ar., *Kiratuma, Kuratuma*. Pers., *Khasaka, Kásirah, Kájirah*. Sanscr., *Kamalottara, Kusumbha*. Bastard or dyer's saffron; safflower. A species with saffron-yellow, afterward reddish, flowers, indigenous to the East Indies, cultivated in Europe and America. The achænia—*semen* (seu *fructus*) *carthami* (seu *cnici*, seu *cnici sativi*, seu *cnici turcici*, seu *croci hortensis*, seu *croci silvestris*); the κνηκός of Hippocrates and Dioscorides—were formerly employed as a purgative and contain *carthamin* (*q. v.*). They are employed to furnish a red dye and in the manufacture of rouge. The young shoots are said to be edible and to possess the power of curdling milk. [A, 319, 479; B, 81, 173, 180.]—**Semen carthami.** The fruit (achænia) of *C. tinctorius*. [B, 180.]

THE CARTHAMUS TINCTORIUS. [A, 327.]

CARTHÄUSERPULVER (Ger.), n. Ka^{3}rt-ois'e^{2}r-pulf''e^{2}r. See PULVIS *carthusianus*.

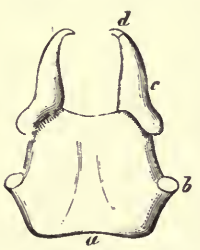


CARTHAXANTHIC ACID, n. Ka^{3}rth-a^{2}-za^{2}n'thi^{2}k. Fr., *acide cartha-xanthique*. A yellow acid substance obtained from *Carthamus tinctorius*. [B, 14.]

CARTHEGON (Lat.), n. n. Ka^{3}r-the(tha)'go^{2}n. Of Pliny, the seed of *Buxus sempervirens*. [B, 121.]

CARTHEUSERNELKE (Ger.), n. Ka^{3}rt-ois'e^{2}r-ne^{2}lk''e^{2}. The *Dianthus Carthusianorum*. [B, 180.]

CARTILAGE, n. Ka^{3}rt'i^{2}l-aj. Gr., χόνδρος. Lat., *cartilago*, *tela cartilaginea*. Fr., *c.*, *tissu cartilagineux*. Ger., *Knorpel, Knorpelgewebe*. It., *cartilagine, tessuto cartilagineo*. Sp., *cartilago*. Syn.: *gristle, cartilaginous* (or *chondrogenous*) *tissue*. A



tough elastic tissue composed of characteristic cells and an abundant intercellular substance or matrix found in various parts of the body, and forming the primordial skeleton (*temporary c.*) or persisting throughout life (*permanent c.*). It presents three varieties, according to the matrix: 1. *Hyaline*, or *true*, *c.*, with a translucent, nearly or quite homogeneous matrix. 2. *White fibro-c.*, in which the matrix is composed mostly of white fibrous tissue. 3. *Elastic c.*, in which the matrix is made up of a dense network of

THE CHIEF FORMS OF CARTILAGE TISSUE.

HC, hyaline cartilage; *FC*, fibro-cartilage; *EC*, elastic cartilage. The small letters indicate the same parts in all the figures. *b*, a blood-vessel containing blood-corpuscles; *c*, capsule of the cartilage-cell; *c b*, cell-body; *c c*, cartilage cavity; *ct*, connective-tissue corpuscle; *h*, hyaline substance; *l*, a lymphatic; *m*, the matrix or intercellular substance; *n*, the nucleus; *n r*, a nerve; *p c*, perichondrium. The cartilage-cells are somewhat flattened next the perichondrium, and have the long axis parallel with the surface.

elastic tissue. All forms possess more or less hyaline substance around the cells. In hyaline c. this is the entire matrix; in the elastic and fibro-cartilage it is reduced to a narrow zone. All yield chondrin on boiling, and all, except articular c., are covered by a membrane, perichondrium, composed of white fibrous and elastic tissue containing an abundance of blood-vessels, lymphatics, nerves, and connective-tissue corpuscles. The perichondrium merges insensibly but rapidly into the matrix, which, according to most histologists, contains neither blood-vessels nor nerves. Where the masses of c. are large, as in the cartilaginous fishes (*Torpedo*) and in the costal c's, blood-vessels in small numbers penetrate it. The nutrition of c. is by imbibition. This is greatly facilitated, according to many authors, by the presence of serous canaliculi connecting the c. cavities with one another and with the perichondrium. In the embryo, at different stages, all the c.-bones are represented by c's bearing the same names as the bones. [J, 30, 55, 83; L.]—**Accessory c.** See *Sesamoid c.*—**Accessory labial c's.** In the *Cyclostomata*, c's accessory to the labial c's in forming the groundwork of the oral aperture. [L, 200, 207.]—**Accidental c.** Fr., *c. accidentel.* A name applied to many morbid products that are not really cartilaginous, but have the appearance of c., being dense, fibrous, and prone to calcification, such as old exudates on serous surfaces, parts of fibrous tumors, etc. [A, 301.]—**Alar c's.** Lat., *cartilagines alares.* Fr., *c's alaires.* Ger., *untere Nasenflügelknorpel.* Two c's, one on each side, situated below the upper lateral c's of the nose, forming the anterior part of the framework of the nostril. [C.]—**Ali-ethmoidal c's.** In the embryo, two cartilaginous processes, one on each side of the ethmoid bone, which aid in forming the roof of the nasal cavities. [L, 202.]—**Alinasal c's.** 1. The c's which form the framework of the outer wall of the nostril. [L, 202.] 2. See *Alar c's.*—**Aliseptal c's.** Two c's, one on each side of the nasal septum, which, in the higher vertebrates, lie in front of and below the nasal bones. [L, 202.]—**Annular c.** 1. A ring-shaped c., especially one lying between the conchal c. and the external auditory meatus. [L, 13.] 2. See *Cricoid c.*—**Anonymous c.** See *Cricoid c.*—**Anterior dorsal c.** In the *Petromyzonidæ*, a c. that forms the anterior and upper portion of the head. [L, 200.]—**Anterior lateral c's.** In the *Petromyzonidæ*, two c's, one on each side of the head, just behind the annular c. [L, 200.]—**Antorbital c.** In the rays, a thick cartilaginous rod that curves outward and backward from the olfactory capsule to unite with the pectoral fin. [L, 200.]—**Aortic c.** The right second costal c., from its situation in front of the arch of the aorta. [L, 142.]—**Arthrodial c., Articular c.** Fr., *c. articulaire.* Ger., *Gelenkknorpel.* A thin layer of permanent c. covering the articular surface of a bone. The matrix is finely granular or homogeneous, and the cell groups are small and arranged in rows mostly perpendicular to the articular surface. [C.]—**Arytænoid c's.** Lat., *cartilagines arytænoideæ.* Fr., *c's aryténoïdes.* Ger., *Giessbeckenknorpel.* Two three-sided pyramidal yellow elastic c's, one on each side, resting upon the thyreoid c. [C.]—**Asternal c's.** Those of the costal c's that are not attached to the sternum. [L, 13, 142.]—**Auditory c.** See *Otic c.*—**Auricular c.** The c. of the external ear. [L, 14.]—**Basal c's.** The protopterygium, mesopterygium, and metapterygium. [L, 121.]—**Basibrachial c.** A ⊥-shaped

THE ARYTÆNOID CARTILAGES, FROM BEHIND. (AFTER VON MEYER.)

a, the cricoid cartilage; *b*, the articular facet for articulation with the inferior horn of the thyreoid cartilage; *c*, the arytænoid cartilage; *d*, the cartilage of Santorini.

c. supporting the base of the arms of the fore foot of *Sepia.* [L, 121.]—**Basipterygial c.** In *Sepia*, a c. forming the base-line of each lateral fin of the mantle. [L, 121.]—**Basitrabecular c.** See *Prenasal c.*—**Bone c.** See OSSEIN.—**Bronchial c's.** Semicircular cartilaginous plates found in the bronchial tubes; in the smallest tubes they are mere specks. [L, 318.]—**Calcified c.** Fr., *c. incrusté* (ou *osseux*) *calcifié.* Ger., *incrustirter* (oder *verkalkter*) *Knorpel.* Syn.: *calcified c.-matrix, crusted c., c.-bone, primary bone.* C. in which the matrix contains a deposit of calcareous salts. [J, 30, 32.]—**Capito-pedal c.** An H-shaped portion of c. forming the axis of the siphon in the *Nautilus* and extending up into the head. [L, 121.]—**Cariniform c.** The cervical cartilaginous prolongation of the sternum in some animals. [L, 13.]—**C. accessoire postérieur** [Sappey] (Fr.). See VOMER *cartilagineus.*—**C. anonyme** (Fr.). See *Cricoid c.*—**C.-bone.** Fr., *os cartilagineux.* Ger., *primärer Knochen.* 1. See *Calcified c.* 2. See under BONE.—**C. capsulaire du cœur** (Fr.). See *Pericardial c.*—**C.-capsule.** The capsule of c.-cells. [J.]—**C's carrés** (Fr.). See *Quadrate c's.*—**C. conjonctif** (Fr.). Fibro-c. [J.] See under *C.*—**C. de conjugaison** (Fr.). See *Intermediary c.* (2d def.).—**C. d'encroûtement** (Fr.). See *Articular c.*—**C. dentaire** (Fr.). That form of c. in ossifying c.-bones in which the c.-cells are arranged in series or short columns. [J, 31.]—**C. spongieux** (Fr.). See *Elastic c.*—**C. synchondral** (Fr.). See *Intermediary c.* (2d def.).—**C. vomérien** (Fr.). See VOMER *cartilagineus.*—**C. vrai** (Fr.). See *Hyaline c.*—**Cellular c.** See *Parenchymatous c.*—**Cephalic c.** In the *Sepia*, a c. forming a complete ring around the œsophagus. [L, 121.]—**Ciliary c.** See *Tarsal c.*—**Circumferential c.** A c. surrounding the margin of an articular cavity. [L.]—**Columnar c.** See *Stapedial c.*—**Conchal c.** The c. that forms most of the framework of the external ear in many of the lower animals; somewhat trumpet-shaped, terminating above in a point. [L, 13.]—**Connecting c's.** C's interposed between the bones in joints of but little mobility (*e. g.*, the symphysis pubis). [Gray (L).]—**Connective-tissue c.** See *White fibro-c.*—**Corniculate c's.** See CORNICULA *laryngis.*—**Cornual c's.** Two small c's attached one to the proximal end of the posterior lateral process of each subocular arch in the *Petromyzonidæ.* [L, 200.]—**Costal c's.** Lat., *cartilagines costales.* Fr., *c's costaux.* Ger., *Rippenknorpel.* The c's that connect the ribs with the sternum. Their cells are large and collected into groups; the matrix is clear except where connective tissue has developed. They are prone to ossify. [C.]—**Cricoid c.** Lat., *cartilago cricoidea.* Fr., *c. cricoïde.* Ger., *Ringknorpel.* A ring-shaped c. forming the lower portion of the cartilaginous framework of the larynx. It is narrow in front and broadened by an upward extension behind, and articulates with the thyreoid c. above and is connected with the first ring of the trachea below. [B. F. Westbrook (A, 473); C.]—**Crusted c.** See *Calcified c.*—**Cuneiform c's.** Lat., *cartilagines cuneiformes.* Syn.: *c's of Wrisberg.* Two small elastic c's, one on each side, in the folds of mucous membrane extending from the arytænoid c's to the epiglottis; said to be sometimes ¾ inch long in the negro, but often absent or hardly developed in the white race. [J. Leidy, "N. Y. Med. Jour.," July 31, 1886, p. 113; C; L, 14.]—**Dental c.** See

Gingival CREST.—**Dentinal c.** See OSSEIN.—**Diarthrodial c.** See *Articular c.*—**Ear-c.** See *C. of the ear* and *Otic c.*—**Elastic c.** Lat., *cartilago elastica.* Fr., *c. élastique* (ou *réticulé*). Ger., *elastischer Knorpel, Fasernetzknorpel, Netzknorpel.* C. in which the matrix is mostly composed of a felt-like mass of elastic fibres. The chondrin-yielding hyaline substance immediately surrounds the cells and is comparatively small in amount. [J, 24, 30, 35.]—**Embryonal c.** Fr., *c. embryonnaire.* See *Parenchymatous c.*—**Ensiform c.** Lat., *cartilago ensiformis* (seu *mucronata*). Fr., *c. ensiforme* (ou *mucroné*), *appendice xiphoïde.* Ger., *Schwertfortsatz.* An elongated cartilaginous appendage extending downward from the lower end of the sternum. [A, 301.]—**Epactal c's.** Lat., *cartilagines epactiles.* Small nodules on the upper margin of the alar c's. [L, 31.]—**Epiglottic c.** Lat., *cartilago epiglottica.* Fr., *c. de l'épiglotte.* Ger., *Kehldeckelknorpel.* The elastic cartilaginous framework of the epiglottis; rounded at its free upper border, pointed below. [L, 31, 142.]—**Epiphyseal c.** Fr., *c. épiphysaire.* Ger., *Epiphysenknorpel.* See *Intermediary c.* (2d def.).—**Epipubic c.** In certain of the *Urodela*, a distally bifurcated c. arising from the middle of the upper margin of the os pubis. [L, 294.]—**Ethmo-vomerine c.** The forward prolongation of the coalesced trabeculæ of the embryo. [L, 142.]—**Eustachian c.** See *Tubal c.*—**Extrabranchial c's.** In the *Cyclostomata*, the c's forming the branchial basket. [L, 294.]—**Extrastapedial c.** The c. constituting the anterior portion of the columella auris, connected with the tympanic membrane. [L, 121.]—**Fibro-c.** Lat., *cartilago fibrosa.* Fr., *fibro-c.* See under *C.*—**Fibro-elastic c.** See *Elastic c.*—**Fibrous c.** See *White fibro-c.*—**Floating c.** Lat., *corpus mobile.* Fr., *corps mobile articulaire, arthrophyte* [Panas]. A cartilaginous body lying free in the cavity of a joint. [A, 301.]—**Fœtal c.** See *Temporary c.*—**Heel c.** In certain *Cheiroptera*, a c. arising from the tarsus and supporting the edge of the interfemoral membrane. [L, 158.]—**Hyaline c.** Lat., *cartilago alba* (seu *vera*). Fr., *c. hyalin* (ou *vrai*). Ger., *hyalines* (oder *wahres*) *Knorpelgewebe, Hyalinknorpel.* Syn.: *true c.* C. composed of nucleated cells and a transparent or translucent, apparently homogeneous matrix that yields chondrin on boiling; found in the costal c's, the trachea, the articular c's, and all the c.-bones before ossification. [J, 30, 35.]—**Hypsiloid c.** See *Epipubic c.*—**Incrusting c.** See *Articular c.*—**Infrastapedial c.** A cartilaginous element of the columella auris that runs downward from the rest of the columella. [L, 121.]—**Innominate c.** Lat., *cartilago anonyma.* Fr., *c. anonyme.* See *Cricoid c.*—**Insulated c.** See *Floating c.*—**Interarticular c's, Interarticular fibro-c's.** Lat., *cartilagines interarticulares.* Fr., *c's interarticulaires.* Ger., *Zwischenknorpel.* Flat fibro-c's interposed between the articular surfaces in some of the joints. [L, 142.]—**Interarytænoid c.** [Luschka]. Lat., *cartilago interarytœnoidea.* Fr., *c. inter-aryténoïdien.* A c. sometimes found between the arytænoid c's. [L, 158.]—**Interhæmal c's.** Cartilaginous nodules that assist in forming the hæmal arch of a vertebra. [L, 14.]—**Intermediary c.** Fr., *c. d'ossification* (1st def.), *c. synchondral* (2d def.), *c. de conjugaison* (2d def.). 1. Ossifying c.; calcified c. in process of replacement by true bone. 2. The c. between the epiphysis and diaphysis of a bone. [J, 31, 32.]—**Internasal c.** In comparative anatomy, the cartilaginous nasal septum. [L, 202.]—**Interneural c's.** Cartilaginous nodules that assist in forming the neural arch of a vertebra. [L, 14.]—**Interspinous c's.** The fin rays of a fish when they are cartilaginous. [L, 121.]—**Intervertebral c's.** Lat., *cartilagines intervertebrales.* Fr., *disques intervertébraux.* Ger., *Zwischenwirbelknorpel, Zwischenwirbelscheiben.* The discs of fibro-c. interposed between the bodies of the vertebræ.—**Investing c.** Fr., *c. d'envêtement.* See *Articular c.*—**Jacobson's c.** In comparative anatomy, a c. external to the ventral edge of the nasal septum, partly inclosing Jacobson's organ. [L, 200.]—**Labial c's.** C's which, in certain fishes, assist in forming the margin of the mouth. [L, 200, 202.]—**Laryngo-tracheal c.** In comparative anatomy, an annular c. that supports the walls of the larynx and trachea. [L, 300.]—**Lateral longitudinal c's.** C's running longitudinally in the branchial basket of the *Petromyzonidæ*, between the dorsal and the ventral c's. [L, 200.]—**Lingual c.** A c. in the median line of the mouth in the *Petromyzonidæ*, forming the greater part of its floor. [L, 200.]—**Loose c.** See *Floating c.*—**Lower lateral c's of the nose.** See *Alar c's.*—**Malleal c.** See *Extrastapedial c.*—**Mandibular c.** See *C. of Meckel.*—**Meatal c.** [Owen]. See *Auricular c.*—**Meckel's c.** See *C. of Meckel.*—**Median ventral c.** In the *Petromyzonidæ*, a small T-shaped c. lying in the median line beneath the lingual c. and connected with it anteriorly. [L, 200.]—**Mediostapedial c.** A cartilaginous element (eventually ossifying) of the columella auris which connects the stapes with the infrastapedial c. [L, 121.]—**Mento-Meckelian c.** A cartilaginous nodule situated at the side of the symphysis menti. [L, 210.]—**Mucronate c.** Lat., *cartilago mucronata.* Fr., *c. mucroné.* See *Ensiform c.*—**Nuchal c.** In the *Decapoda*, a cartilaginous plate just behind the hood. [L, 121.]—**Obducent c.** See *Articular c.*—**Odontophoral c's.** Two cartilaginous or fibrous masses forming the skeleton of the odontophore. [B, 100.]—**Optic c.** See *Optic* CAPSULE.—**Ossifying c.** See *Intermediary c.* (1st def.).—**Osteoid c.** [Virchow]. See CAMBIUM (3d def.).—**Otic c.** The cartilaginous auditory capsule of the embryo. [L, 202.]—**Parachordal c's.** Cartilaginous masses formed from the tissue in which the cranial portion of the notochord is imbedded in early embryonic life, forming the principal matrix of the succeeding bony walls of the base of the skull as far forward as the sella turcica. [A, 5.]—**Parenchymatous c.** Fr., *c. embryonnaire.* Ger., *Parenchymknorpel.* C. in which the amount of ground substance is very small, the cells forming the greater part of the tissue. [J, 35.]—**Pericardial c.** Fr., *c. capsulaire du cœur.* In the *Petromyzonidæ*, a c. that supports the posterior and lateral walls of the pericardium. [L, 200.]—**Permanent c.** Lat., *cartilago permanens* (seu *perennis*). Fr., *c. permanent* (ou *parfait*). Ger., *bleibender Knorpel.* C. that retains its cartilaginous character in the fully developed body, as distinguished from temporary c. [J.]—**Perrhinal c's.** See *Alar c's.*—**Plexiform c.** Fr., *c. réticulé.* Ger., *Netzknorpel.* See *Elastic c.*—**Plowshare c. of the nose** [Huschke]. A narrow mass of c. lying behind the organ of Jacobson. [C.]—**Posterior dorsal c.** In the *Petromyzonidæ*, a c. lying posteriorly to the anterior dorsal c., uniting the anterior with the posterior edge of the hard palate. [L, 200.]—**Posterior lateral c's.** In the *Petromyzonidæ*, two c's lying one on each side of and partly beneath the posterior dorsal c. [L, 200.]—**Prenasal c.** In comparative embryology, a c. forming the anterior portion of the nose or beak. [L, 121, 202, 221.]—**Preorbital c's.** In the *Sepia*, two processes springing one to each side from the cephalic c. [L, 121.]—**Prepubic c.** In the *Amphibia*, a median c. in front of the pubic bone. [L, 121.]—**Primordial c.** Fr., *c. primordial.* See *Temporary c.*—**Prorrhinal c.** In certain embryonic *Batrachia*, a c. bounding the nostril in front. [L, 202.]—**Pterygo-quadrate c's.** In certain fishes, two c's that unite anteriorly to form the superior maxilla. [L, 200.]—**Pulmonary c.** The left second costal c., from its lying in front of the pulmonic orifice of the heart. [L, 142.]—**Pyramidal c's.** See *Arytænoid c's.*—**Quadrate c's.** Lat., *cartilagines quadratæ.* Fr., *c's carrés.* Several small c's which pass out from the alar c's in the external portion of the nostril. [L, 7.]—**Radial c.** A fin ray. [L, 200.]—**Reticular c., Retiform c.** See *Elastic c.*—**Rib-c's.** Fr., *c's des côtes.* Ger., *Rippenknorpel.* See *Costal c's.*—**Rostral c.** See *Annular c.* (1st def.).—**Santorinian c's.** See CORNICULA *laryngis.*—**Scutiform c.** 1. See *Thyreoid c.* 2. In the solipeds, a small triangular cartilaginous plate situated in front of the base of the concha and on the surface of the temporal muscle. It is attached to the conchal c. by muscular fibres. [L, 13.]—**Semicircular c.** In the *Petromyzonidæ*, a small c. united to the anterior end of the lingual c., supporting the median portion of the tongue. [L, 200.]—**Semilunar c's.** See *Semilunar* FIBRO-C'S.—**Septal c.** The c. of the septum of the nose. [L.]—**Sesamoid c., Sesamoid fibro-c.** A small isolated cartilaginous mass sometimes found entirely inclosed in a tendon, etc. [C.]—**Sesamoid c's of the nose.** See *Epactal c's.*—**Sigmoid c's.** See *Semilunar fibro-c's.*—**Siphon-hinge c's.** In the *Decapoda*, two cartilaginous sockets on the sides of the funnel into which the fleshy knobs of the mantle and skirt fit. [L, 121.—**Spiracular c.** In comparative anatomy, a semilunar c. situated between the auditory capsule and the hyo-mandibular c., partly surrounding the spiracle. [L, 200.]—**Spongy c.** Fr., *c. spongieux.* See *Elastic c.*—**Stapedial c.** In the *Sauropsida* and *Amphibia*, the uppermost segment of the second postoral arch. [L, 221.]—**Sternal c's.** See *Costal c's.*—**Stratiform c., Striated c.** See *White fibro-c.*—**Styliform c's.** In the *Petromyzonidæ*, two tapering cartilaginous rods attached to the annular c. and running backward and downward. [L, 200.]—**Suborbital c.** In comparative anatomy and in embryology, the cartilaginous representative of the palate bone. [L, 202.]—**Subostracal c.** In the *Sepia*, a thin plate of c. fitting against the posterior edge of the nuchal c. [L, 121.]—**Suprastapedial c.** A cartilaginous element of the columella auris passing upward from the proximal end of the extrastapedial c. and attached to the side of the auditory capsule. [L, 121.]—**Synarthrodial c's.** Lat., *cartilagines suturarum.* Fr., *c's des sutures.* The c's of immovable or slightly movable articulations. [L, 13.]—**Tarsal c's.** Lat., *cartilagines tarsales.* Fr., *fibro-c's tarses.* Ger., *Augenlidknorpel.* Thin elongated plates of dense connective tissue (formerly thought to be fibro-c.) forming the framework of the eyelids. Those of the upper lids are semilunar, and those of the lower lids elliptical. [F.]—**Temporary c.** Lat., *cartilago ossescens.* Fr., *c. temporaire* (ou *d'ossification*) *du fœtus.* Ger., *temporärer* (oder *verknöchernder*) *Knorpel.* The hyaline c. representing nearly the entire skeleton in developing animals, ultimately replaced by bone. [J, 30, 35.]—**Thyreo-cricoid c.** In comparative anatomy, a c. formed by the coalescence of the cricoid and thyreoid c's. [L, 14.]—**Thyreo-hyal c's.** In the *Amphibia*, two cartilaginous rods projecting backward from the body of the hyoid bone, embracing the larynx. [L, 121.]—**Thyreoid c.** Lat., *cartilago thyreoidea.* Fr., *c. thyréoïde.* Ger., *Schildknorpel.* A c. forming the greater portion of the framework of the larynx, situated above the cricoid c., consisting of two lateral wings joined in front at an acute angle forming the pomum Adami. [B. F. Westbrook (A, 473).]—**Trabecular c's.** The trabeculæ of the embryo. [L, 202.]—**Tracheal c's.** The cartilaginous rings of the trachea. [L, 20.]—**Transitory c.** See *Temporary c.*—**Triangular c's of the nose.** See *Upper lateral c's of the nose.*—**True c.** Lat., *cartilago vera.* Fr., *c. vrai.* Ger., *wahrer* (oder *echter*) *Knorpel.* See *Hyaline c.*—**Tubal c.** Ger., *Tubenknorpel.* A triangular plate of c., curled upon itself, extending from the osseous portion of the Eustachian tube to the pharynx. [L, 31, 142.]—**Turbinal c's.** The cartilaginous representatives of the turbinated bones in birds. [L, 200.]—**Uniting c's.** See *Connecting c's.*—**Upper lateral c's of the nose.** Lat., *cartilagines nasi laterales.* Fr., *c's latéraux.* Ger., *obere Seitenknorpel.* Two triangular c's, one on either side, forming the upper part of the framework of the nose, immediately below the nasal bones. [C.]—**Ventral c.** In the *Petromyzonidæ*, a T-shaped cartilaginous rod situated in the median line beneath the lingual c. [L, 200.]—**White fibro-c.** A tissue made up of c. and white fibrous connective tissue. [C.]—**Xiphoid c.** See *Ensiform c.*—**Yellow c., Yellow elastic c., Yellow fibro-c.** See *Elastic c.*—**Ypsiloid c.** See *Epipubic c.*

CARTILAGIN, n. Ka^{3}rt-i^{2}l'a^{2}j-i^{2}n. Fr., *cartilagéine.* A principle found in hyaline cartilage, characterized by forming chondrin when boiled. [L, 49.]

CARTILAGINEOUS, adj. Ka^{3}rt-i^{2}l-a^{2}j-i^{2}n'e^2-u^{3}s. See CARTILAGINOUS.

CARTILAGINIFICATION, n. Ka^{3}rt-i^{2}l-a^{2}j-i^{2}n-i^2-fi^2-ka'-shu^{3}n. Lat., *cartilaginificatio.* Fr. c. 1. See CHONDROGENESIS. 2. The conversion of a tissue into one resembling cartilage. [A, 385.]

CARTILAGINIFORM, adj. Ka^{3}rt-i^{2}l-a^{2}j-i^{2}n'i^2-fo^{2}rm. From *cartilago*, cartilage, and *forma*, form. Having the appearance of cartilage. [J, 46, 50.]

CARTILAGINOID, CARTILAGINOUS, adj's Ka^{3}rt-i^{2}l-a^{2}j'i^{2}n-oid, -u^{3}s. Gr., χονδρώδης. Lat., *cartilagineus, cartilaginus, cartilaginosus.* Fr., *cartilagineux.* Ger., *knarpelig.* Pertaining to, consisting of, or resembling, cartilage. [A, 301; B, 19, 77; J, 46, 50.]

CARTILAGO (Lat.), n. f. Ka^{3}rt-i^{2}l-a(a^3)'go. Gen., *cartilag'inis.* See CARTILAGE.—**Cartilagines accessoriæ.** See *Epactal* CARTILAGES.—**Cartilagines alares.** See *Alar* CARTILAGES.—**Cartilagines alarum minores.** See *Epactal* CARTILAGES.—**Cartilagines alarum nasi.** See *Alar* CARTILAGES.—**Cartilagines alarum posteriores.** See *Epactal* CARTILAGES.—**C. alba.** See *Hyaline* CARTILAGE.—**C. annularis.** See *Annular* CARTILAGE and *Cricoid* CARTILAGE.—**C. anonyma.** See *Cricoid* CARTILAGE.—**Cartilagines arytænoideæ.** See *Arytænoid* CARTILAGES.—**C. auriculæ, C. auris.** See CARTILAGE *of the ear.*—**C. basilaris.** See *Cricoid* CARTILAGE.—**C. clypealis.** See *Thyreoid* CARTILAGE.—**C. conchæ auris.** The cartilaginous framework of the external ear. [L, 31.]—**Cartilagines corniculatæ.** See CORNICULA *laryngis.*—**Cartilagines costales.** See *Costal* CARTILAGES.—**C. cricoidea, C. cricoides.** See *Cricoid* CARTILAGE.—**Cartilagines cruciformes** (seu **cuneiformes**). See *Cuneiform* CARTILAGES.—**C. elastica.** See *Elastic* CARTILAGE.—**C. ensiformis.** See *Ensiform* CARTILAGE.—**Cartilagines epactiles.** See *Epactal* CARTILAGES.—**C. epiglottica.** See *Epiglottic* CARTILAGE.—**Cartilagines falcatæ** (seu **falciformes**). See *Semilunar* FIBRO-CARTILAGES.—**C. fibrosa.** Fibro-cartilage. [L.] See under CARTILAGE.—**C. figurata** [Meckauer]. Fr., *cartilage figuré.* A variety of hyaline cartilage having a great number of shallow cavities on its surface. [L.]—**C. flava.** See *Elastic* CARTILAGE.—**C. formativa.** See *Temporary* CARTILAGE.—**C. frontalis.** That part of the cartilaginous skull of the embryo which is subsequently transformed into the frontal bone. [H.]—**C. genuina.** See *Hyaline* CARTILAGE.—**C. gingivalis.** See *Gingival* CREST.—**C. glandis.** The fibrous septum in the median line of the glans penis. [L, 332.]—**C. glottidis superior** [C. Mayer]. A small cartilage sometimes found in the superior thyreo-arytænoid fold of the larynx. [L, 31.]—**Cartilagines gutturales.** See *Arytænoid* CARTILAGES.—**C. innominata.** See *Cricoid* CARTILAGE.—**Cartilagines interarticulares costo-vertebrales.** The interarticular cartilages between the heads of the ribs and the vertebræ. [Luschka (L).]—**C. interarticularis.** See *Interarticular* CARTILAGE.—**C. interarticularis acromio-clavicularis.** See CARTILAGE *of Weitbrecht.*—**C. interarticularis maxillaris.** An interarticular cartilage of the articulation of the inferior maxilla with the glenoid cavity. [L, 175.]—**C. interarytænoidea.** See *Interarytænoid* CARTILAGE.—**Cartilagines intercrurales.** In the chondropterygians, cartilages situated between the neurapophyses of the vertebræ. [L, 207.]—**C. intermedia.** 1. See *C. intermedia triangularis.* 2. In the pl., *cartilagines intermediæ,* inconstant nodules found between the alar cartilages of the nose. [L, 115.]—**C. intermedia radii, C. intermedia triangularis.** An interarticular cartilage situated between the radius and ulna and the os triquetrum. [L, 175.]—**Cartilagines intervertebrales.** See *Intervertebral* CARTILAGES.—**Cartilagines laterales inferiores.** See *Alar* CARTILAGES.—**Cartilagines ligamentosæ** [Haase]. Fr., *cartilages ligamenteux.* Ger., *Bandknorpel, Faserknorpel.* Such fibro-cartilaginous structures as certain tendons. [L, 7.]—**C. lingualis.** An inconstant cartilage found in the median line of the posterior portion of the tongue. [L, 176.]—**Cartilagines lunatæ.** See *Semilunar* FIBRO-CARTILAGES.—**C. mastoidea.** That part of the cartilaginous skull of the embryo which subsequently becomes the mastoid process of the temporal bone. [H.]—**C. meatus auditorii externi.** That portion of the cartilage of the ear which is attached to the external auditory meatus of the temporal bone. [L, 31.]—**C. Meckelii.** See CARTILAGE *of Meckel.*—**C. meniscoidea.** See *Interarticular* CARTILAGE.—**Cartilagines minores inferiores.** See *Alar* CARTILAGES.—**C. mucronata.** See *Ensiform* CARTILAGE.—**Cartilagines nasi accessoriæ.** See *Epactal* CARTILAGES.—**Cartilagines nasi inferiores.** See *Alar* CARTILAGES.—**Cartilagines nasi laterales.** See *Upper lateral* CARTILAGES *of the nose.*—**C. nasi mediana.** See CARTILAGE *of the septum of the nose.*—**Cartilagines nasi sesamoideæ.** See *Epactal* CARTILAGES.—**Cartilagines nasi superiores** (seu **triangulares**). See *Upper lateral* CARTILAGES *of the nose.*—**C. obducens.** See *Articular* CARTILAGE.—**C. ossescens.** See *Temporary* CARTILAGE.—**C. parietalis.** That part of the cartilaginous skull of the embryo which subsequently becomes the parietal bone. [H.]—**C. peltalis, C. peltatus.** See *Thyreoid* CARTILAGE.—**C. perennis, C. permanens.** See *Permanent* CARTILAGE.—**C. petrosa.** That part of the cartilaginous skull of the embryo which subsequently becomes the petrous portion of the temporal bone. [H.]—**Cartilagines pinnales.** See *Alar* CARTILAGES.—**Cartilagines pyramidales.** See *Arytænoid* CARTILAGES.—**C. quadrangularis nasi.** See CARTILAGE *of the septum of the nose.*—**Cartilagines quadratæ.** See *Quadrate* CARTILAGES.—**C. reticularis.** See *Elastic* CARTILAGE.—**Cartilagines santorinianæ.** See CORNICULA *laryngis.*—**C. scutiformis.** See *Thyreoid* CARTILAGE.—**Cartilagines semicirculares.** The incomplete cartilaginous rings of the trachea. [A, 325.]—**Cartilagines semilunares.** See *Semilunar* FIBRO-CARTILAGES.—**C. septi narium.** See CARTILAGE *of the septum of the nose.*—**C. sesasamoidea, Cartilagines sesamoideæ.** See *Sesamoid* CARTILAGE and *Epactal* CARTILAGES.—**Cartilagines sesamoideæ anteriores laryngis.** Cartilaginous plates or bands in the anterior end of a true vocal band. [Hoffman (L).]—**Cartilagines sesamoideæ laryngis.** Cartilaginous bands found along the lateral edges of the arytænoid cartilages. [L, 332.]—**Cartilagines sesamoideæ nasi.** See *Epactal* CARTILAGES.—**Cartilagines sesamoideæ posteriores laryngis.** Cartilaginous nodules on the outer side of the connection between the arytænoid cartilages and the cornicula laryngis. [Hoffman (L).]—**Cartilagines sesamoideæ tubæ Eustachii.** Cartilaginous nodules or plates found in the Eustachian tube, especially near its pharyngeal opening. [L, 332.]—**Cartilagines sigmoideæ.** See *Semilunar* FIBRO-CARTILAGES.—**C. spongiosa.** See *Elastic* CARTILAGE.—**C. sterno-clavicularis interarticularis.** An interarticular cartilage of the sterno-clavicular joint. [L, 115.]—**Cartilagines suturarum.** See *Synarthrodial* CARTILAGES.—**C. temporaria.** See *Temporary* CARTILAGE.—**Cartilagines teretes.** See CORNICULA *laryngis.*—**C. thyreoidea.** See *Thyreoid* CARTILAGE.—**Cartilagines triangulares.** See *Upper lateral* CARTILAGES *of the nose.*—**C. triquetra carpi.** The triangular fibro-cartilage that separates the inferior radio-ulnar articulation from the carpus. [L, 332.]—**Cartilagines triquetræ.** See *Arytænoid* CARTILAGES.—**C. triticea.** Syn.: *corpusculum triticeum.* A small oblong cartilaginous nodule frequently found in the lateral thyreo-hyoid ligament. [C.]—**C. tubæ Eustachii.** See *Tubal* CARTILAGE.—**C. vocalis inferior** [Mayer]. A small cartilage found in the inferior thyreo-arytænoid fold. [L, 31.]—**C. vocalis superior.** See *C. glottidis superior.*—**Cartilagines wrisbergianæ** (seu **Wrisbergii**). See *Cuneiform* CARTILAGES.—**C. xiphoidea.** See *Ensiform* CARTILAGE.

CARTMEL, n. Ka^{3}rt'me^{2}l. A sea-bathing resort in Lancashire, England. [A, 316, 319; L, 105.] See *Holy* WELL.

CARTON, n. An ancient name for the onion and for caraway. [B, 121.]

CARTON (Fr.), n. Ka^{3}rt-o^{2}n^2. Paper or pasteboard. [a, 18; B.]—**C. anti-asthmatique.** See CHARTA *antasthmatica.*—**C.-cataplasme.** See under CATAPLASME.—**C. de montagne.** Asbestos. [B, 92.]—**C. fumigatoire** [Fr. Cod.]. See CHARTA *antasthmatica.*—**C. médicinal.** Bibulous paper impregnated with some medicinal substance; used for fumigation. [B, 93.]

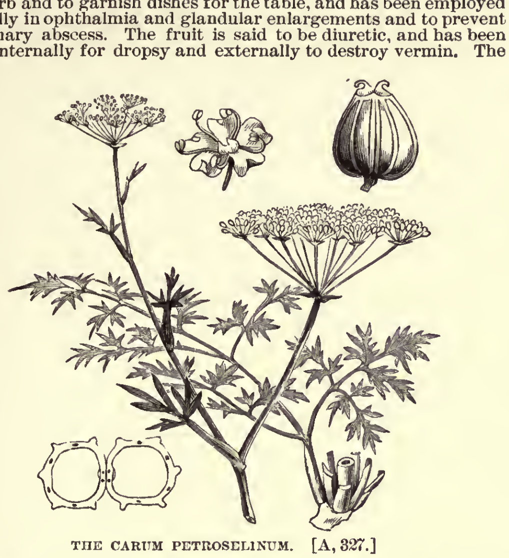
CARTOPOGON (Lat.), n. m. Ka^{3}rt-o(o^2)-pog'o^{2}n(on). Gen., *cartopogon'os (-is).* See ARISTIDA (2d def.).

CARUA (Lat.), n. f. Ka^{2}r(ka^{3}r)'u^2(u^4)-a^3. 1. Of the ancients, see CARYA (1st def.). 2. Of Weddell, a section of the genus *Cascarilla.* [B, 88, 121.]

CARUB, n. In Egypt, the *Ceratonia siliqua.* [B, 121.]

CARUBA, n. See CAROBA.

CARUI (Lat.), n. n. indecl., also the gen. of *caruon* (*q. v.*). Ka(ka^3)'ru^2(ru^4)-i(e). Of Tournefort, the *Carum c.* [B, 200.]—**Ætheroleum c.** Oil of caraway. [B.]—**Aqua c.** [Br. Ph.]. Fr., *eau distillée de carvi.* Ger., *Kümmelwasser.* Syn.: *aqua carvi* [Russ. Ph., Swed. Ph.]. Caraway-water; made by distilling 1 part of caraway-fruit with 20 parts of water until 10 parts of distillate are obtained [Br. Ph., Swed. Ph.]; or by dissolving 1 part of oil of caraway in 1,500 parts of tepid distilled water. [B, 81, 95.]—**C. fructus** [Br. Ph.]. Caraway-fruit. [B, 95.]—**C. officinarum.** Caraway. [L, 94.]—**Oleum c.** [Br. Ph.]. Oil of caraway. [B, 81.]



CÄRULIGNON (Ger.), n. Tsa-ru-li^{2}g-non'. See CÆRULIGNONE.

CARUM (Lat.), n. n. Ka(ka^3)'ru^{3}m(ru^{4}m). Gr., κάρος, κάρον [Dioscorides]. Fr., *carvi.* Ger., *wilder Kümmel, Pferdekümmel.* It., *carvi.* Sp., *alcaravea.* 1. Of Linnæus, a genus of umbelliferous plants of the tribe *Ammineæ,* subtribe *Euammineæ.* 2. Of the U. S. Ph., the fruit of *C. carui.* [B, 42, 121.]—**C. ajowan** [Bentham and Hooker]. Ger., *indisches Faltenohr.* The ajowan, ajwan, ajwain, or bishop's-weed; a small annual herb cultivated in India, said to furnish most of the thymol of commerce; used largely in India as a condiment, carminative, antispasmodic, and stimulant, and in dyspepsia and diarrhœa. The wild plant is thought to be poisonous. The Egyptian and Cretan variety (*Ptychotis coptica* [De Candolle], *Ammi copticum* [Linnæus], *Daucus copticus* [Persoon]) was the ἄμμι αἰθιοπικόν of Dioscorides, and its fruit was known as *semen ammeos* (seu *ammei*) *veri* (seu *cretici,* seu *minoris*) and *semen origani odorati.* [B, 5, 42, 81, 172, 180.]—**C. bulbocastanum** [Koch]. Syn.: *Bunium bulbocastanum* [Linnæus] (seu *minus* [Gouan]). A perennial species growing in southern Europe. The root-tubers (*radix bulbocastani, earth-chestnuts*) are roasted and eaten. [B, 180.]—**C. carui, C. carvi** [Linnæus]. Fr., *carvi cultivé, cumin des prés.* Ger., *gemeiner Kümmel, Karbe, Kare.* Syn.: *Apium* [Crantz] (seu *Bunium* [Bieberstein], seu *Ligusticum* [Roth], seu *Sium* [Bernhardi]) *carvi, Seseli c.* [Scopoli] (seu *carvi* [Roth]). Caraway; a biennial species growing throughout Europe, bearing an aromatic fruit. [B, 121, 180.] See CARAWAY.—**C. nigrum.** A species the fruit of which is used in India like that of *C. ajowan.* [A, 479.]—**C. petroselinum** [Bentham and Hooker]. Fr., *persil.* Ger., *Petersilie, gemeine Petersilge, Garten-Petersilge.* Syn.: *Apium petroselinum* [Linnæus], *Petroselinum sativum* [Hoffmann]. Parsley; a species indigenous to southern Europe, but now cultivated everywhere. The root, herb, and fruit—*radix* (et *herba* et *semen*) *petroselini* (seu *petroselini hortensis,* seu *petroselini vulgaris,* seu *apii alpini,* seu *apii hortensis*)—have been official. The root was formerly employed as a diuretic and laxative in dropsy and gonorrhœa, and was included

THE CARUM CARUI. [A, 327.]

among the "five greater aperient roots." The herb is used as a pot-herb and to garnish dishes for the table, and has been employed topically in ophthalmia and glandular enlargements and to prevent mammary abscess. The fruit is said to be diuretic, and has been used internally for dropsy and externally to destroy vermin. The

THE CARUM PETROSELINUM. [A, 327.]

fruit and the root contain parsley-camphor (see APIOL [3d def.]), and a volatile and a fixed oil, which also are called apiol, are obtained from the plant. [B, 180.] See APIOL.—**C. ridolphia** [Bentham]. The *Anethum segetum* of Linnæus. [B.]—**C. roxburghianum.** An East Indian species. The fruit resembles that of *C. ajowan* in properties and uses, but is less aromatic. [B, 172, 173.]—**C. rupestre** [Boissier]. See under PIMPINELLA.—**C. vulgare** [Parkinson]. See *C. carui*.—**Oleum cari** [U. S. Ph.] The oil of *C. carui*. [B.]—**Semen cari carvi.** The fruit of *C. carui*. [B, 180.]

CARUMA (Ar.), n. The *Crocus sativus*. [B, 121.]

CARUMBIEÆ (Lat.), n. f. pl. Ka^{2}r(ka^{3}r)-u^{3}m(u^{4}m)-bi(bi^2)'-e^2-e(a^3-e^2). Fr., *carumbiées*. A subtribe of euphorbiaceous plants (*Hippomanieæ*), comprising *Carumbium* and *Wartmannia*. [B, 121; M. Arg (B, 214).]

CARUM-CHEMBAI (Tamil), **CARUN-CHEMBAI** (Tamil), n's. The *Sesbania ægyptiaca* (*Coronilla picta*). [B, 121, 172.]

CARUNCLE, n. Ka^{2}r'u^{3}n^{2}kl. Gr., σαρκίδιον. Lat., *caruncula* (dim. of *caro*, flesh). Fr., *caroncule*. Ger., *Carunkel, Fleischwärzchen, Samenhängsel* (2d def.), *Nabelwarze* (2d def.). 1. Lit., a small piece of flesh; a flesh-like fragment occurring in dysenteric dejections. 2. In botany, a warty protuberance around or near the hilum of a seed. 3. Of Morgagni, the middle lobe of the prostate. 4. A small fleshy protuberance, normal or pathological. 5. The uvula. 6. Of the veterinarians, a ball-like fœtal cotyledon. [A, 11, 318, 322, 325, 326; B; L, 31.]—**Fœtal c's.** See *Fœtal* COTYLEDONS.—**Irritable c. of the urethra.** See under *Urethral c.*—**Lacrymal c.** Lat., *caruncula lacrimalis*. Fr., *caroncule lacrymale*. Ger., *Thränenwärzchen*. A small oval or triangular reddish body lying at the bottom of the inner canthus of the eye; composed of connective-tissue stroma, fat globules, a number of small hair follicles, and glandular tissue, covered with a vascular conjunctival investment. [F.]—**Urethral c.** Lat., *caruncula urethræ*. Fr., *caroncule uréthrale*. Ger., *Carunkel der Harnröhre*. In the male, the caput gallinaginis, also any pathological fleshy excrescence in the urethra; in the female, a vascular tumor, often very irritable, situated at the edge of the meatus urinarius externus, consisting of hypertrophied papillæ (the pseudo-angeioma of Savage). [A, 223; L, 43, 119; J. G. Perry, "N. Y. Med. Jour.," Mar. 3, 1888, p. 234.]

CARUNCULA (Lat.), n. f. Ka^{2}r(ka^{3}r)-u^{3}n^{2}k(u^{4}n^{2}k)'u^2(u^4)-la^3. See CARUNCLE.—**Carunculæ cuticulares.** The nymphæ. [A, 325.]—**Carunculæ hymenales.** See *Carunculæ myrtiformes*.—**C. innominata.** The lacrymal gland. [A, 322.]—**C. lacrimalis.** See *Lacrymal* CARUNCLE.—**C. major** [Santorini]. A papilla marking the common orifice of the ductus choledochus communis and the pancreatic duct. [L, 31.]—**C. mamillaris.** Fr., *caroncule mamillaire*. Syn.: *trigonum olfactorium* (1st def.). 1. A small elevation of gray nervous matter at the base of the brain, immediately behind the apparent origin of the olfactory nerve and seeming to give origin to its middle root. [Mendel (A, 319, *a*, 18).] 2. The dilated extremities of the galactophorous ducts in the nipple. [I, 16; K; L, 119.]—**C. minor.** A papilla in the duodenum in the centre of which an occasional supplementary pancreatic duct opens. [L, 31.]—**C. Morgagnii.** See CARUNCLE (3d def.).—**Carunculæ myrtiformes.** Fr., *caroncules myrtiformes*. Ger., *myrtenförmige* (oder *myrtenbeerförmige*) *Carunkeln, gekerbte Tuberkeln des Scheideneinganges*. Irregular tongue-like projections of the mucous membrane of the ostium vaginæ; commonly regarded as the remains of the ruptured hymen. [A, 182, 400.]—**C. nervi olfactorii.** See TUBERCULUM *olfactorium*.—**C. oculi.** See *Lacrymal* CARUNCLE.—**Carunculæ papillares.** Fr., *caroncules papillaires*. Ger., *Nierenwärzchen*. Little nipple-like projections at the hilum of the kidney marking the orifices of the uriniferous tubules. [A, 301; L, 43, 84.]—**C. salivalis.** See *C. sublingualis*.—**C. seminalis.** See CAPUT *gallinaginis*.—**C. sublingualis.** A papilla marking the opening of Wharton's duct. [L, 13.]—**C. urethræ.** See *Urethral* CARUNCLE.—**C. urethræ virilis.** See CAPUT *gallinaginis*.—**Carunculæ uterinæ.** Fongosities of the lining membrane of the uterus at the site of implantation of the ovum, constituting the maternal placenta. [A, 127.]—**Carunculæ vaginales.** See *Carunculæ myrtiformes*.

CARUNCULAR, adj. Ka^{2}r-u^{3}n^{2}k'u^{2}l-a^{3}r. Lat., *caruncularis*. Fr., *caronculaire*. Of, of the nature of, or pertaining to, a caruncle. [B.]

CARUNCULATE, CARUNCULATED, adj's. Ka^{2}r-u^{3}n^{2}k'-u^{2}l-at, -at-e^{2}d. Lat., *carunculatus*. Fr., *caronculé*. Provided with a caruncle. [B.]

CARUNCULE, n. Ka^{2}r'u^{3}n^{2}k-u^{2}l. See CARUNCLE.

CARUNCULOSE, CARUNCULOUS, adj's. Ka^{2}r-u^{3}n^{2}k'u^{2}l-os, -u^{3}s. Lat., *carunculosus*. Fr., *caronculeux*. Ger., *fleischwärzchenähnlich*. Caruncle-like. [A, 29.]

CARUNDAI-GNAZU, n. In India, the *Mauritia vinifera*. [B, 121.]

CARUON (Lat.), n. n. Ka(ka^3)'ru^2(ru^4)-o^{2}n. See CARUM.

CARUPPA (Malay), n. Opium. [L, 105.]

CARUS (Lat.), n. m. Ka(ka^3)'ru^{3}s(ru^{4}s). Gr., κάρος. Fr., *c*. Ger., *Todtenschlaf* (3d def.). 1. An old name for the *Daucus carota*. 2. The *Carum carui*. 3. Deep sleep without stertor. [B, 117, 121, 200; D, 72; L, 81, 83, 132, 290.]—**C. ab insolatione.** Insensibility from sunstroke. [L, 119.]—**C. apoplexia** [Young]. Apoplexy. [L, 83.]—**C. apyreticus.** C. without fever. [L, 132.]—**C. arthriticus.** Apoplexy from gout. [L, 119.]—**C. ecchymoma capitis** [Baudelocque]. See CEPHALÆMATOMA.—**C. febricosus, C. febrilis.** C. with fever. [L, 119.]—**C. hydrocephalicus.** See *Hydrocephalic* APOPLEXY.—**C. ischuriosus** [Bonetus]. Uræmic coma. [L, 132.]—**C. lethargus** [Young]. Syn.: *cataphora*. A continu us lethargic state. [L, 290.]—**C. nystagmus.** Sudden loss of consciousness with rapid twitching of the eyelids. [L, 132.]—**C. pyreticus.** C. with fever. [L, 132.]—**C. traumaticus** [Bonetus]. C. due to injury of the head. [L, 290.]—**C. variolosus** [Sydenham]. C. occurring in the course of small-pox. [L, 132.]—**C. venenatus.** C. from poisoning. [L, 290.]—**C. verminosus** [Sennertus]. C. due to helminthiasis. [L, 132.]

CARUTO, n. The *Genipa c.* or the *Genipa americana*, also a dye obtained from its seeds. [B, 19, 88, 121.]

CARVA, n. The *Billbergia variegata*, the *Laurus cassia*, and the *Justicia gangetica*. [B, 19, 121.]

CARVACROL, n. Ka^{3}rv'a^{2}k-ro^{2}l. From *carvus* (see CARUM), and ἄκρος, sharp. Fr., *c*. Ger., *C*. Syn.: *cymophenol*. A heavy oily liquid, $C_{10}H_{13}.OH = C_6(H,H,CH_3,OH,H,CH_2.CH_2.CH_3)$, isomeric with thymol and carvol, derived from carvol and also prepared from cymene by the successive action of sulphuric acid and an alkali, and from camphor by the action of iodine. It boils at 232° C. It is soluble with difficulty in water, readily soluble in alcohol and in ether. [B, 4, 270.]

CARVACROTIC ACID, n. Ka^{3}rv-a^{2}k-ro^{2}t'i^{2}k. Fr., *acide carvacrotique*. Ger., *Carvacrotinsäure*. A crystalline acid, $C_{11}H_{14}O_3 = C_6H_2O(OH)(CH_3)(C_3H_7)(CO.OH)$, isomeric with thymotic acid, formed by the action of sodium and carbon dioxide on carvacrol. [B, 4.]

CARVÉ (Fr.), n. Ka^{3}rv-a. A provincial name for hemp. [B, 121; L, 41.]

CARVENE, n. Ka^{3}rv'en. Fr., *carvène*. Ger., *Carven*. A terpene, $C_{10}H_{16}$, obtained by heating oil of caraway to 175° C.; a colorless, thin liquid of aromatic odor, soluble with difficulty in water, readily soluble in alcohol and in ether. [B, 5, 18, 270.]

CARVI (Lat.), n. n., indecl. Ka^{3}r'vi(we). 1. Of the Fr. Cod. and Netherl. Ph., the *Carum c.* or *Carum carui*. 2. Of Bentham and Hooker, a section of the genus *Carum*, consisting of the species *Carum c.* [B, 113, 121, 173, 180.]—**Ætheroleum c.** [Dan. Ph., Norw. Ph., Swed. Ph.]. Oil of caraway. [B, 119.]—**Alcoolat de c.** (Fr.). See *Spiritus c.*—**Aqua c.** [Russ. Ph., Swed. Ph.]. See *Aqua* CARUI.—**C. semen** [Gr. Ph.]. Caraway fruit. [B, 93.]—**C. semini majore** [Boerhaave]. The *Carum c.* [B, 211.]—**Eau de c.** (Fr.), **Eau distillée de c.** (Fr.). See *Aqua* CARUI. [B.]—**Elæosaccharum c.** [Russ. Ph.]. Fr., *oléo-saccharure de c.* [Fr. Cod.]. A preparation made by impregnating 2 grammes of sugar with 1 drop [Russ. Ph.], or with 10 centigrammes [Fr. Cod.], of oil of caraway. The same or other proportions are official in other pharmacopœias which do not expressly prescribe the preparation from caraway, but give general directions for the preparation of the elæosacchara. [B, 95, 113.] See ELÆOSACCHARUM.—**Essence de c.** (Fr.). Oil of caraway. [B.]—**Fructus c.** [Ger. Ph., Russ. Ph., Belg. Ph., Dan. Ph., Norw. Ph., Swed. Ph.]. Ger., *Kümmel*. The fruit of *Carum c.* [A, 319; B, 95.]—**Huile de c.** (Fr.). Oil of caraway. [B.]—**Huile de c. par expression** (Fr.). The oil obtained by expression from caraway which has been previously exposed to a current of steam; formerly official. [B, 119.]—**Huile essentielle de c.** (Fr.), **Huile volatile de c.** [Fr. Cod.] (Fr.). Oil of caraway. [B.]—**Hydrolat de c.** (Fr.). See *Aqua* CARUI.—**Oléo-saccharure de c.** [Fr. Cod.] (Fr.), **Oléo-sucre de c.** (Fr.). See *Elæosaccharum c.*—**Oleum c.** [Ger. Ph., Austr. Ph., Hung. Ph., Netherl. Ph., Russ. Ph.], **Oleum c. æthereum** [Swiss Ph.], **Oleum c. destillatum.** Fr., *oléule de c*. Ger., *Kümmelöl*. An essential oil obtained from the seeds of *Carum c.* [A, 319; B, 119, 205.]—**Oleum c. pingue** [Swiss Ph.]. A mixture of 1 part of oil of caraway and 19 parts of olive-oil. [B, 95.]—**Poudre de c.** [Fr. Cod.] (Fr.). A powder made by drying caraway fruit in an oven at a temperature of 25° C., pulverizing in an iron mortar, and sifting through a No. 1 hair sieve. [B, 113.]—**Semen c.** (Lat.). Caraway fruit. [B, 180.]—**Semen c. caballini.** The fruit of *Seseli tortuosum*. [B, 180.]—**Semen c. italici** (seu **romani**). The fruit of *Cuminum cyminum*. [B, 180.]—**Spiritus c.** [Austr. Ph.]. A preparation made of 1 part of caraway-seed, 4 parts of alcohol, and 6 parts of water. [B, 10.]

CARVIFOLIA (Lat.), n. f. Ka^{3}r-vi^2(wi^2)-fol(fo^{2}l)′i^2 a^3. Of Vaillant, see SELINUM.

CARVIFOLIUM (Lat.), n. n. Ka^{3}r-vi^2(wi^2)-fol(fo^{2}l)′i^2-u^{3}m(u^{4}m). Fr., *carvifeuille*. The *Selinum c.* [B, 121.]

CARVIFOLIUS (Lat.), adj. Ka^{3}r-vi^2(wi^2)-fol(fo^{2}l)′i^2-u^{3}s(u^{4}s). From *carvi* (*q. v.*), and *folium*, a leaf. Fr., *carvifolié*. Having leaves like those of the caraway ; a botanical species name. [B.]

CARVITES (Lat.), n. m. Ka^{3}r-vit(wet)′ez(as). See CARYITES.

CARVOEIRA (Port.), n. Ka^{3}r-vo-a′e-ra^3. In Brazil, the genus *Callisthene*. [B, 121.]

CARVOL, n. Ka^{3}rv′o^{2}l. From *carvus*, the species name of *Carum carvi*. An aromatic alcohol, $C_{10}H_{14}O$, derived from oil of caraway ; a thin, colorless liquid with the odor of caraway oil, boiling at 225°-230° C., and convertible into the isomeric carvacrol. It is also isomeric with cumin alcohol and thymol. [B, 4, 270.]

CARVUM [Austr. Ph., Hung. Ph.] (Lat.), n. n. Ka^{3}r′vu^{3}m(wu^{4}m). See CARUM.

CARY (Fr.), n. Ka^{3}r-i^2. See CURRY.

CARYA (Lat.), n. f. Ka^{2}r(ka^{3}r)′i^2(u^6)-a^3. Gr., καρύα. Fr., *carye*. Ger., *Nussbaum*. 1. Of the ancients, a name applied to several trees with hard fruit, especially the walnut-tree. 2. Of Nuttall, the hickory ; a genus of juglandaceous trees closely related to the genus *Juglans*. The inner bark has been chewed with advantage in dyspepsia, and a tincture has been successfully used in intermittent fever. [A, 308 (α, 17) ; B, 42, 121 ; Engler (B, 245).]—**C. alba** [Nuttall]. The shag-bark or shell-bark ; a tall, slender tree of the Atlantic United States, having a shaggy bark of loose dependent laminæ. The compressed, rounded, thin-shelled nut contains a sweet kernel from which a drying oil like that of the walnut is obtained. The bark is said to contain *quercitrin* and to be available for the manufacture of a greenish dye. [B, 34, 173, 270.]—**C. amara** [Nuttall]. The bitter-nut ; a tree growing throughout the United States, having a subglobose white, brittle nut with very bitter, hardly edible kernel which furnishes an oil like that of *C. alba*. [B, 34, 173.]—**C. aquatica** [Nuttall]. The water bitter-nut ; a tree 30 or 40 feet high, growing in swampy grounds of the southern United States. The small, angular nuts have a brittle, reddish shell and a very bitter kernel. [B, 34, 180.]—**C. aromatica.** An ancient name for the *Myristica*. [B, 121.]—**C. basilice.** Gr., καρύα βασιλική. The walnut-tree. [Dioscorides (B, 285).]—**C. glabra** [Torrey]. See *C. porcina*.—**C. microcarpa** [Nuttall]. A tree 60 to 80 ft. high, growing in moist woods of the central United States, bearing edible nuts of the size of a nutmeg. [B, 34.]—**C. olivæformis** [Nuttall]. Fr., *pacanier, noyer-pacanier*. The pecan, a large tree growing throughout the Mississippi valley, bearing a

THE CARYA OLIVÆFORMIS. [A, 327.]
The fruit and leaf are reduced.

thin-shelled, olive-shaped nut which is much sought after as a delicacy, and which contains a fixed oil like that of the walnut. [B, 34, 81, 173.]—**C. ovata.** Sp., *quauchichic* [Mex. Ph.]. A Mexican species. The bark is used in diarrhœa. [B.]—**C. persica.** The *Juglans*. [B, 121.]—**C. porcina** [Nuttall]. The pig-nut ; a large tree growing throughout the United States and Canada, having a rounded, obovate, or pyriform nut, which contains an edible, though bitterish and astringent, kernel, which is eaten by pigs and other animals. [B, 34.]—**C. sulcata** [Nuttall]. The thick shell-bark, a tree growing in the United States, with shaggy bark in loose narrow plates, and bearing a very thick-shelled nut which is pointed at either end. The kernel is larger than that of *C. alba* and nearly as good for eating. [B, 34, 180.]—**C. tomentosa** [Nuttall]. The mocker-nut ; a large tree growing throughout the United States, especially in the South and West, having a thick and rough but not scaly bark, and bearing a large, rounded, somewhat hexagonal nut with a very thick husk and a rather small, edible kernel. A crystalline principle, *caryin*, believed to be identical with *quercitrin*, has been found in its bark. [A, 308 (α, 17) ; B, 34.]

CARYCA (Lat.), **CARYCEIA** (Lat.), n's f. Ka^{2}r(ka^{3}r)′i^{2}k(u^{6}k)-a^3, ka^{2}r(ka^{3}r)-i^2(u^6)-si′(ke^2′i^2)-a^3. See CARICA.

CARYCOIDES (Lat.), adj. Ka^{2}r(ka^{3}r)-i^2(u^6)-ko(ko^2)-id(ed)′ez-(as). Gr., καρυκοειδής (from καρύκη, a blood-sauce or condiment, and εἶδος, resemblance). Resembling blood (said of excrement). [Hippocrates (A, 325).]

CARYDION (Lat.), n. n. Ka^{2}r(ka^{3}r)-i^{2}d(u^{6}d)′i^2-o^{2}n. Gr., καρύδιον. The filbert-tree or hazel-tree or their fruit. [A, 387.]

CARYDON (Lat.), **CARYEDON** (Lat.), n's n. Ka^{2}r(ka^{3}r)′i^{2}d-(u^{6}d)-o^{2}n, -i^2(u^6)-e(a)′do^{2}n. Gr., καρυδόν, καρυηδόν. See ALPHITEDON.

CARYENCHYME (Fr.), n. Ka^{3}r-e-a^{3}n^2-shem. See NUCLEOCHYME.

CARYIN, n. Ka^{2}r′i^2-i^{2}n. See under CARYA *tomentosa*.

CARYINUM (Lat.), n. n. Ka^{2}r(ka^{3}r)-i^2(u^6)-in(en)′u^{3}m(u^{4}m). Gr., καρύινον. Nut-oil. [A, 322.]

CARYINUS (Lat.), adj. Ka^{2}r(ka^{3}r)-i^2(u^6)-in(en)′u^{3}s(u^{4}s). Gr., καρύινος. Pertaining to or resembling a walnut or an almond. [B, 285.]

CARYITES (Lat.), n. m. Ka^{2}r(ka^{3}r)-i^2(u^6)-it(et)′ez(as). Gr., καρυίτης. A name applied by the Greeks to several species of *Euphorbia*, especially to *Euphorbia helioscopia*. [B, 88, 121.]

CARYOBRANCHIA (Lat.), n. n. pl. Ka^{2}r(ka^{3}r)-i^2(u^6)-o(o^2)-bra^{2}n^2(bra^{3}n^2)′ki^2(ch^{2}i^2)-a^3. From κάρυον, a fruit-stone, and βράγχια, gills. Fr., *caryobranches*. A family of the *Gasteropoda* having branchiæ in the form of fruit-stones. [L, 41, 180.]

CARYOCAR [Allam.] (Lat.), n. n. Ka^{2}r(ka^{3}r)-i(u^6)′o(o^2)-ka^{3}r. A genus of trees of the *Caryocareæ* (*Rhizoboleæ*), indigenous to South America. [B, 19, 121.]—**C. amygdaliferum.** A species the nut of which yields a bitter resinous substance. [B, 121.]—**C. butyrosum** [Willdenow]. A Guiana species, called *pekea* by the natives. Its nuts contain a concrete fatty substance resembling butter and used for the same purposes. [B, 19, 38, 121.]—**C. glabrum** [Persoon]. A species the kernel of the fruit of which is edible and yields a fatty substance, known as the *beurre de noix de Saouari* (ou *de Suwarron*). [B, 121, 173.]—**C. nuciferum.** Fr., *porte-noix*. A lofty tree of British Guiana resembling *C. butyrosum*, and having large nuts (butter nuts, souari-nuts) which are pleasant to the taste and contain a bland fixed oil. [B, 19, 121.]—**C. tomentosum** [Willdenow]. A species having properties like those of *C. glabrum*. [B. 19, 88, 173.]

CARYOCAREÆ (Lat.), n. f. pl. Ka^{2}r(ka^{3}r)-i^2(u^6)-o(o^2)-ka^{2}r-(ka^{3}r)′e^2-e(a^3-e^2). Fr., *caryocarées*. Of Baillon, a series of the *Ternstrœmiaceæ*, comprising *Caryocar* and *Anthodiscus*. [B, 121.]

CARYOCARPE (Fr.), adj. Ka^{3}r-i^2-o-ka^{3}rp. From κάρυον, a walnut, and καρπός, a fruit. Having fruit like the walnut. [L, 41.]

CARYOCATACTES (Lat.), adj. Ka^{2}r(ka^{3}r)-i^2(u^6)-o(o^2)-ka^{2}t-(ka^{3}t)-a^{2}k(a^{3}k)′tez(tas). From καρυοκατάκτης, a nut-cracker. Fr., *caryocatacte*. Nut-breaking (said of birds which subsist on nuts, pine-cones, etc.). [L, 109.]

CARYOCINESIS (Lat.), n. f. Ka^{2}r(ka^{3}r)-i^2(u^6)-o(o^2)-si^{2}n(ki^{2}n)-es(as)′i^{2}s. Gen., *caryocines′eos* (*-is*). From κάρυον, a nucleus, and κίνησις, movement. Fr., *caryocinèse*. Ger., *Karyokinesis*. The entire series of changes taking place in a nucleus during indirect cell-division or nuclear-division. The structural changes occurring in the nucleus during indirect division are complicated and seem to differ somewhat in different cells ; so also the number of distinct phases assumed by the nucleus in passing from mother to daughter nuclei, and the nomenclature of the phases, are still subjects of discussion. So far as can be seen, (*a*) the nuclear membrane and the nucleoli disappear, with thickening and dense convolution of the nuclear fibrils and an enlargement of the entire nucleus ; (*b*) the nuclear fibrils become looped and arranged like a rosette or wreath ; (*c*) the peripheral part of the loops disappear, there results a star-shaped figure (*aster*) of V-shaped segments of the nuclear fibrils, and the fibrils forming these segments then divide longitudinally, forming double V's ; (*d*) the fibrils become depressed so as to give a disc-like or plate-like figure (nuclear plate), and this plate divides longitudinally, the two halves recede from each other, and each assumes a stellate phase (diaster stage or phase) ; (*e*) the fibrils of the diaster become arranged in a wreath and then into a convolution, and finally become surrounded by a membrane (nuclear membrane), and nucleoli appear. They are then called daughter nuclei, and are similar to the original mother nucleus but smaller. The body of the cell may divide by simple segmentation or fission at any time after the diaster phase, or the cell-body may remain undivided, in which case there results a bi-nucleated or multi-nucleated cell. [J. 30, 32 ; "Arch. f. mikr. Anat.," 1875-'84 ; "Quart. Jour. of Micr. Sci.," 1876, 1884 ; "Jour. of the Roy. Micr. Soc.," 1879-'84.] See also *Achromatic* FIBRILS.

CARYOCINETIC, adj. Ka^{2}r-i^2-o-si^{2}n-e^{2}t′i^{2}k. Fr., *caryocinétique*. Ger., *Karyokinetisch*. 1. Pertaining to caryocinesis. 2. Amœboid. [J.]

CARYOCOSTINUS (Lat.), adj. Ka^{2}r(ka^{3}r)-i^2(u^6)-o(o^2)-ko^{2}st-in(en)′u^{3}s(u^{4}s). From καρυόφυλλον, the clove-tree, and κόστος (see COSTUS). Fr., *caryocostin*. Containing cloves and costus. [A, 385 ; L, 41.] See ELECTUARIUM *caryocostinum*.

CARYODAPHNE (Lat.), n. f. Ka^{2}r(ka^{3}r)-i^2(u^6)-o(o^2)-da^{2}f(da^{3}f)′-ne(na). Gen., *caryodaph′nes*. From κάρυον, a nut or kernel, and δάφνη, the laurel. Of Blume, a genus of Javanese lauraceous trees ; by Baillon made a section of *Cryptocarya*. [B, 19, 121.]—**C. densiflora.** A species with bitter bark and aromatic leaves. The latter are employed for colic and similar conditions. [B, 19.]

CARYODIÉRÈSE [Carnoy] (Fr.), n. Ka^{3}r-e-o-de-a-re^{2}z. From κάρυον, a nucleus, and διαίρεσις, division. Nuclear division. ["La Cellule," 1885 (J)].

CARYOLYMA (Lat.), n. n. Ka^{2}r(ka^{3}r)-i^2(u^6)-o(o^2)-li(lu^6)′ma^3. Gen., *caryolym′atos* (*-is*). See AMPHIASTER.

CARYOLYSIS (Lat.), n. f. Ka^{2}r(ka^{3}r)-i^2(u^6)-o^{2}l′i^{2}s(u^{6}s)-i^{2}s. Gen., *caryolys′eos* (*-ol′ysis*). From κάρυον, a nucleus, and λύειν, to loose. Fr., *caryolysie, caryolyse*. Ger., *Karyolyse*. See CARYOCINESIS.

CARYOLYTIC, adj. Ka^{2}r-i^2-o-li^{2}t′i^{2}k. From κάρυον, a nucleus, and λύσις, dissolution. Fr., *caryolytique*. Ger., *Karyolytisch*. Con-

cerned in or resulting from the breaking up of nuclei.—**C. figure of Auerbach.** See *Auerbach's* VACUOLE.

CARYOMITOME [Flemming], n. Ka2r-i2-o2m'i2t-om. From κάρυον, a nucleus, and μίτος, a thread. See *Nuclear* FIBRIL.

CARYOMITOSIS (Lat.), n. f. Ka2r(ka3r)-i2(u6)-o(o2)-mi2t-os'i2s. Gen., *caryomitos'eos (-is).* From κάρυον, a nucleus, and μίτος, a thread. Fr., *caryomitose.* Ger., *Karyomitose.* See CARYOCINESIS.

CARYON (Lat.), n. n. Ka2r(ka3r)'i2(u6)-o2n. Gr., κάρυον. Fr., *caryone.* A nut of any kind, or a substance resembling a nut (*e. g.*, the stone of a fruit, the kernel of a pine-cone); especially the nut of the walnut (*Juglans*), or a fruit resembling it, also an almond. [B, 121; α, 17.] Cf. CARYA (1st def.).—**C. basilicon.** Lit., royal nut: the walnut (*Juglans regia*). [Dioscorides (B, 115).]—**C. heracleonticon, C. lepton, C. ponticon.** Gr., κάρυον ηρακλεοντικὸν (ἢ λεπτὸν, ἢ ποντικὸν). A hazel-nut. [Dioscorides, Galen (B, 285); B, 200.]—**C. tripton.** Gr., κάρυον τριπτὸν. A nutmeg. [B, 285.]

CARYOO-GADDÉES, n. A tree of Sumatra having the odor and properties of sassafras. [B, 121; L, 105.]

CARYOPHYLLA (Lat.), n. f. Ka2r(ka3r)-i2(u6)-o(o2)-fi2l(fu6l)'-la3. See CARYOPHYLLATA.

CARYOPHYLLACEÆ (Lat.), n. f. pl. Ka2r(ka3r)-i2(u6)-o(o2)-fi2l(fu6l)-la(la3)'se2(ke2)-e(a3-e2). For deriv., see CARYOPHYLLON. Fr., *caryophyllacées.* 1. Of Reichenbach, a family of the *Tilifloræ*, comprising the divisions *Alsineæ*, *Caryophylleæ*, and *Malpighieæ*, or, according to a later classification, the *Caryophylleæ*, *Erythroxyleæ*, and *Malpighieæ.* 2. Of most authors, the *Caryophylleæ* (*q. v.*). 3. Of Dana, a tribe of the *Actinaria.* [B, 121, 170; L, 244.]

CARYOPHYLLACEOUS, adj. Ka2r-i2-o-fi2l-a'shu3s. Lat., *caryophyllaceus.* Fr., *caryophyllacé.* Ger., *nelkenartig.* Of or resembling the *Caryophyllus* (*Dianthus caryophyllus*) (said especially of flowers with a long corolla, composed of 5 distinct petals mounted on long claws); of or pertaining to the *Caryophylleæ.* [B.]

CARYOPHYLLÆI (Lat.), n. m. pl. Ka2r(ka3r)-i2(u6)-o(o2)-fi2l-(fu6l)-le'(la3'e2)-i(e). Fr., *caryophyllées.* Of Linnæus, a class of plants comprising *Dianthus*, *Lychnis*, etc. [B, 170.]

CARYOPHYLLÆIDÆ (Lat.), n. f. pl. Ka2r(ka3r)-i2(u6)-o(o2)-fi2l(fu6l)-le'(la3'e2)-i2d-e(a3-e2). A family of the *Cestoidea.* [L, 121.]

CARYOPHYLLÆUS (Lat.), adj. Ka2r(ka3r)-i2(u6)-o(o2)-fi2l-fu6l)-le'(la3'e2)-u3s(u4s). See CARYOPHYLLACEOUS.

CARYOPHYLLALES (Lat.), n. f. pl. Ka2r(ka3r)-i2(u6)-o(o2)-fi2l(fu6l)-la(la3)'lez(le2s). A cohort of polypetalous dicotyledons, comprising the orders *Frankeniaceæ*, *Caryophyllaceæ*, *Portulacaceæ*, and *Tamariscineæ.* [B, 42, 75.]

CARYOPHYLLARIA [Lankester] (Lat.), n. n. pl. Ka2r(ka3r)-i2(u6)-o(o2)-fi2l(fu6l)-la(la3)'ri2-a3. Fr., *caryophyllaires.* An order of the *Cestoidea.* [L, 121.]

CARYOPHYLLASTER [Rumphius] (Lat.), n. m. Ka2r(ka3r)-i2(u6)-o(o2)-fi2l(fu6l)-la2st(la3st)'u6r(ar). Gen., *caryophyllast'eris.* Fr., *caryophyllâtre.* See ANTHERURA.

CARYOPHYLLASTRUM [Ser.] (Lat.), n. n. Ka2r(ka3r)-i2-(u6)-o(o2)-fi2l(fu6l)-la2st(la3st)'ru3m(ru4m). A section of the genus *Geum.* [B, 121, 214.]

CARYOPHYLLATA (Lat.), n. f. Ka2r(ka3r)-i2(u6)-o(o2)-fi2l-(fu6l)-la(la3)'ta3. Fr., *benoîte.* Ger., *Nelkenwurzel.* 1. Of the pharmacists, the *Geum urbanum;* so called from the clove-like odor of the fresh root; also the *Cassia c.* (the bark of *Dicypellium caryophyllatum*). 2. Of Tournefort, the genus *Geum;* of De Candolle, a section of that genus. [B, 121, 270.]—**Ætheroleum caryophyllatæ.** See *Oleum caryophyllatæ æthereum.*—**C. alpina.** The *Geum montanum* (*Sieversia montana*). [B, 121.]—**C. alpina lutea** [Bauhin]. The *Geum rivale.* [B, 211.]—**C. alpina minor** [Bauhin]. See *C. alpina.*—**C. aquatica** [Lamarck], **C. aquatica altera** [Bauhin], **C. aquatica, nutante flore** [Bauhin]. The *Geum rivale.* [B, 173, 180, 211.]—**C. montana.** The *Geum rivale* and *Geum montanum* (*Sieversia montana*). [B, 180, 211.]—**C. montana secunda** [Clus.], **C. nutans** Mönch]. The *Geum rivale.* [B, 173, 211.]—**C. officinalis** [Mönch]. The *Geum urbanum.* [B, 173.]—**C. rivalis** [Scopoli], **C. septentrionalium,** etc. [Lob.]. The *Geum rivale.* [B, 180, 211.]—**C. vulgaris** [Parkinson, Lamarck], **C. vulgaris, flore parvo luteo** [J. Bauhin], **C. vulgaris, herba benedicta** [' Merc. Bot."]. The *Geum urbanum.* [B, 200.]—**Decoctum caryophyllatæ.** Fr., *décoction de benoîte.* A preparation made by boiling down a mixture of 2 parts of the rhizome of *Geum urbanum* with 6 of water to two thirds, straining, and adding 1 part of syrup of orange-peel. [Bruns. Ph., Niemann's ed., 1811 (B. 119).]—**Extractum caryophyllatæ.** Fr., *extrait de benoîte.* An aqueous extract made by evaporating a watery decoction of the rhizome of *Geum urbanum.* [Sax. Ph., 1837 (B, 119).]—**Oleum caryophyllatæ æthereum.** A volatile oil obtained by distilling the rhizome of *Geum urbanum* with water. [B, 119.]—**Radix** (seu **Rhizoma**) **caryophyllatæ.** The rhizome of *Geum urbanum.* [B, 180.]

CARYOPHYLLÂTRE (Fr.), n. Ka3r-e-o-fi2l-a3tr. See CARYOPHYLLASTER.

CARYOPHYLLATUS (Lat.), adj. Ka2r(ka3r)-i2(u6)-o(o2)-fi2l-(fu6l)-la(la3)'tu3s(tu4s). 1. Resembling cloves, especially in odor; containing or bearing cloves (a botanical species name). See EUGENIA *caryophyllata* and CARYOPHYLLATA. 2. Of the corolla of a flower, see CARYOPHYLLACEOUS. [B, 1, 19.]

CARYOPHYLLE (Fr.), n. f. Ka3r-e-o-fi2l. See CARYOPHYLLUS.

CARYOPHYLLÉ (Fr.), adj. Ka3r-e-o-fi2l-a. See CARYOPHYLLACEOUS and CARYOPHYLLEOUS. As a n., in the f. pl., *c'es*, see CARYOPHYLLEÆ; as a n., in the m. pl., *c's*, see CARYOPHYLLÆI. [B; L, 41.]

CARYOPHYLLEÆ (Lat.), n. f. pl. Ka2r(ka3r)-i2(u6)-o(o2)-fi2l-fu6l)'le2-e(a3-e2). Fr., *caryophyllées.* Ger., *Caryophylleen*, *Nelkenblätter.* Of Jussieu and succeeding authors, the clove-worts or chickweed (or pink) family; an order of polypetalous dicotyledons of the cohort *Caryophyllales.* It is variously limited by different authors; according to the older classifications, it comprised the suborders *Caryophyllineæ* (including the tribes *Sileneæ* and *Alsineæ*), the *Illecebrineæ* (including the tribes *Sperguleæ* and *Paronychieæ*), the *Scleranthineæ*, and the *Mollugineæ;* or, according to Lindley, the three suborders *Sileneæ*, *Alsineæ*, and *Mollugineæ.* The *Mollugineæ* are now, however, usually referred elsewhere, and the *Paronychieæ* and *Scleranthineæ* are by several authors, including Bentham and Hooker, also excluded. By Bentham and Hooker the *C.* are divided into the *Sileneæ*, *Alsineæ*, and *Polycarpeæ*, and include herbs with swollen joints; opposite leaves, exstipulate or with scarious stipules; and perfect flowers having 4 or 5 sepals which are alternate with the unguiculate petals, 8 to 10 stamens disposed in two rows, alternate respectively with the petals and the sepals, and a free ovary containing campylotropous ovules upon free placentæ disposed at the inner angles of the loculi. Sachs, who makes the *C.* a division of the *Caryophyllineæ* (*q. v.*), divides them into the *Paronychieæ*, *Scleranthеæ*, *Alsineæ*, and *Sileneæ.* [B, 42, 75, 121, 170, 279.]

CARYOPHYLLEI (Lat.), n. m. pl. Ka2r(ka3r)-i2(u6)-o(o2)-fi2l-(fu6l)'le2-i(e). Of Linnæus, an order of plants corresponding to the *Caryophylleæ* in the widest sense. [B, 170.]

CARYOPHYLLEOUS, adj. Ka2r-i2-o-fi2l'e2-u3s. Lat., *caryophylleus.* Fr., *caryophyllé.* See CARYOPHYLLACEOUS.

CARYOPHYLLI (Lat.), n. m., pl. of *caryophyllus* (*q. v.* for subheadings). Ka2r(ka3r)-i2(u6)-o(o2)-fi2l(fu6l)'li(le). In the German and other pharmacopœias, cloves. [B, 180.]

CARYOPHYLLIACEÆ (Lat.), n. f. pl. Ka2r(ka3r)-i2(u6)-o-(o2)-fi2l(fu6l)-li2-a(a3)'se2(ke2)-e(a3-e2). A subfamily of the *Turbinoliidæ.* ["Proc. of the Zool. Soc.," 1876, p. 430 (L).]

CARYOPHYLLIC ACID, n. Ka2r-i2-o-fi2l'i2k. See CARYOPHYLLINIC ACID.

CARYOPHYLLIDÆ (Lat.), n. f. pl. Ka2r(ka3r)-i2(u6)-o(o2)-fi2l fu6l)'li2d-e(a3-e2). A family of the *Caryophyllaceæ* (3d def.). [L, 244.]

CARYOPHYLLIDEA (Lat.), n. n. pl. Ka2r(ka3r)-i2(u6)-o(o2)-fi2l(fu6l)-li2d'e2-a3. Fr., *caryophyllidés.* An order of the *Cestoidea.* [Lankester, "Quart. Jour. of Micr. Sci.," 1877, p. 444 (L); L, 49.]

CARYOPHYLLIFERUS (Lat.), adj. Ka2r(ka3r)-i2(u6)-o(o2)-fi2l(fu6l)-li2f'e2r-u3s(u4s). From καρυόφυλλον (see CARYOPHYLLON), and *ferre*, to bear. Producing cloves. [B, 109.]

CARYOPHYLLIN, n. Ka2r-i2-o-fi2l'i2n. Fr., *caryophylline.* Ger., *C.* A substance, $C_{10}H_{16}O$, or $C_{20}H_{32}O_{2}$, forming white, silky, acicular crystals, devoid of taste and odor, which are precipitated from concentrated tinctures of cloves; readily soluble in warm alcohol and in ether. [B, 81, 270.]—**C'säure** (Ger.). See CARYOPHYLLINIC ACID.

CARYOPHYLLINÆ (Lat.), n. f. pl. Ka2r(ka3r)-i2(u6)-o(o2)-fi2l(fu6l)-lin(len)'e(a3-e2). Fr., *caryophyllinées.* 1. Of Bartling, a class of plants comprising the families *Chenopodieæ*, *Phytolaceæ*, *Amarantaceæ*, *Scleranthеæ*, *Paronychieæ*, *Alsineæ*, and *Sileneæ.* In a later classification the *Amarantaceæ* were omitted, and the *Portulaceæ* added. 2. Of Endlicher, a class of the *Polypetaleæ*, comprising the *Mesembryanthemeæ*, *Portulaceæ*, *Caryophylleæ*, and *Phytolaceæ.* [B, 121, 170.] 3. Of Bentham and Hooker, a cohort equivalent to the *Caryophyllales.* [B, 42.] Cf. CARYOPHYLLINEÆ.

CARYOPHYLLINEÆ (Lat.), n. f. pl. Ka2r(ka3r)-i2(u6)-o(o2)-fi2l(fu6l)-li2n'e2-e(a3-e2). Fr., *caryophyllinées.* 1. Of Spach, a class of dicotyledons corresponding to the *Caryophyllinæ* of Bartling. As extended by Brongniart, it comprised the families *Nyctagineæ*, *Phytolacceæ*, *Chenopodeæ*, *Baselleæ*, *Amarantaceæ*, *Sileneæ*, *Alsineæ*, *Paronychieæ*, and *Portulaceæ.* Sachs included in it the same families, omitting the *Baselleæ* and adding the *Polygonaceæ.* 2. Of some authors, a suborder of the *Caryophylleæ*, comprising the tribes *Sileneæ* and *Alsineæ.* [B, 34, 170, 279.]

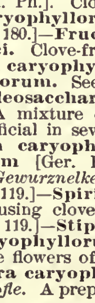
CARYOPHYLLINIC ACID, n. Ka2r-i2-o-fi2l-i2n'i2k. Fr., *acide caryophyllinique.* Ger., *Caryophyllinsäure.* A crystalline acid, $C_{20}H_{32}O_{8}$, produced by the action of fuming nitric acid on caryophyllin. [B, 81.]

CARYOPHYLLODENDRON (Lat.), n. n. Ka2r(ka3r)-i2(u6)-o(o2)-fi2l(fu6l)-lo(lo2)-de2nd'ro2n. From καρυόφυλλον, a clove, and δένδρον, a tree. See CARYOPHYLLUS (2d def.).

CARYOPHYLLOID, adj. Ka2r-i2-o-fi2l'oid. Lat., *caryophylloides* (from καρυόφυλλον, the clove-tree, and εἶδος, resemblance). Fr., *caryophylloïde.* Ger., *nelkenartig.* Resembling or pertaining to the carnation (*Dianthus caryophyllus*) or to cloves. [B.]

CARYOPHYLLON (Lat.), n. n. Ka2r(ka3r)-i2(u6)-o(o2)-fi2l(fu6l)'-lo2n. Gr., καρυόφυλλον (from κάρυον, a nut, and φύλλον, a leaf). Of Pliny, a plant which has been supposed to be the clove, but said really to be the walnut (*Juglans*); according to C. Bauhin, it was the *Pimenta* (*Myrcia*) *acris.* [B, 121, 200.]—**C. Plinii.** See *C.*

CARYOPHYLLOUS, adj. Ka2r-i2-o-fi2l'u3s. See CARYOPHYLLACEOUS.



CARYOPHYLLUM (Lat.), n. n. Ka2r(ka3r)-i2(u6)-o(o2)-fi2l-(fu6l)'lu3m(lu4m). 1. In the Br. Ph., cloves. 2. A section of the genus *Dianthus.* [B, 95, 121.] See also CARYOPHYLLON and CARYOPHYLLUS.—**C. aromaticum.** See *C.*—**C. arvense.** See CARYOPHYLLUS *arvensis.*—**C. regium.** See CARYOPHYLLUS *regius.*—**C. rubrum.** See CARYOPHYLLUS *ruber.*—**Infusum caryophylli** [Br. Ph.]. Fr., *infusion* (ou *hydrolé*) *de girofle.* Syn.: *infusum caryophyllorum* [Lond. Ph.]. An infusion of 1 part of cloves in 40 parts of boiling distilled water. In the Lond. Ph., 1837, 60 parts of water were ordered. [B, 95, 119.]—**Oleum caryophylli** [Br. Ph.]. Oil of cloves. [B, 81.]

CARYOPHYLLUS (Lat.), n. m. Ka2r(ka3r)-i2(u6)-o(o2)-fi2l-(fu6l)'lu3s(lu4s). For deriv., see CARYOPHYLLON. Fr., *girofle* (1st def.), *œillet* (3d def.). Ger., *Gewurznelke.* 1. Of the U. S. and

Austr. Ph's, cloves or the unexpanded flower-heads of *Eugenia caryophyllata* (*C. aromaticus*), the *caryophyllum* of the Br. Ph., the *flores caryophylli* of the Dan., Norw., and Swed. Ph's. In the latter sense it is often written in the plural, *caryophylli*, as in the Ger. Ph. and other Continental pharmacopœias. 2. Of Linnæus, a genus of myrtaceous plants; now made a section of *Eugenia*. 3. Of the older botanists, the *Dianthus c.*, or clove-pink. [B.]—**Ætheroleum caryophyllorum.** Oil of cloves. [B, 119.]—**Aqua caryophyllorum.** Fr., *eau* (ou *hydrolat*) *de girofle*. Ger., *Nelkenwasser*. A preparation made by distilling 4 parts from an infusion of 1 part of cloves in 8 parts of water. [Würt. Ph., 1798, Fr. Cod., 1837 (B, 119).]—**Caryophylli oleum.** Oil of cloves. [B.]—**C. altilis major** [C. Bauhin]. The *Dianthus c.* [B, 200.]—**C. americanus.** See *C. aromaticus americanus, lauri acuminatis foliis, fructu orbiculari*.—**C. aromaticus.** 1. Of Linnæus, the *Eugenia caryophyllata* (*q. v.*). See also Clove and *Mother*-clove. 2. In the pl., *caryophylli aromatici*, the official title for cloves in the Belg. Ph. and among the older pharmacists. [B.]—**C. aromaticus americanus, lauri acuminatis foliis, fructu orbiculari** [Pluk.]. The *Pimenta aromatica*. [B, 200.]—**C. aromaticus cum fructu rotundo.** A species of *Cassia*. [B.]—**Syrupus caryophyllorum.** A preparation of the old Lond. Disp., made of the flowers of *Dianthus c.*, sugar, and water. [B, 200.]—**Tinctura caryophyllorum.** Fr., *teinture* [Fr. Cod.] (ou *alcoolé*) *de girofle*. A preparation made with 1 part of cloves and 5 [Fr. Cod.] (or 4 to 6 parts, according to various of the older formularies) of alcohol. [B, 113, 119.]

CARYOPLASM [Flemming], n. Ka^{2}r'i^2-o-pla^{2}zm. Lat., *caryoplasma* (from κάρυον, a nucleus, and πλάσμα, formed matter), *nucleoplasma*. Fr., *caryoplasme*, *plasme* (ou *protoplasme*) *nucléaire* (ou *cellulaire*), *suc nucléaire*. Ger., *Karyoplasma, Kernplasma, Nucleoplasma, Kernsaft*. The substance or protoplasm of a nucleus, in contradistinction to that of the cell-body; restricted by some to the substance forming the nuclear network, by others to the achromatin; according to Carnoy and Pfitzner, the substance of the nucleus exclusive of the coarse nuclear fibrils. ["Am. Naturalist," 1887 (J); "Quart. Jour. of Microsc. Sci.," 1886 (J); J, 1564, 82.]

CARYOPLASMIC, adj. Ka^{2}r-i^2-o-pla^{2}z'-mi^{2}k. Pertaining to caryoplasm (*q. v.*). [J.]

A caryopsis. (After Youmans.)

CARYOPSIDIUM (Lat.), **CARYOPSIS** (Lat.), n's n. and f. Ka^{2}r(ka^{3}r)-i^2(u^6)-o^{2}ps-i^{2}d'i^2-u^{3}m(u^{4}m), -o^{2}ps'i^{2}s. Gen., *caryopsid'ii, -ops'eos* (*-is*). From κάρυον, a nut, and ὄψις, appearance. Fr., *caryopse*. Ger., *Karyopse, Balgfrucht, Schalfrucht, Kornfrucht, Schalkern*. A dry indehiscent fruit with a thin pericarp adherent throughout to the single seed inclosed. It is sometimes made to include the achænium, in which, however, as that term is generally used, the pericarp is free from the seed. It is the characteristic fruit (grain) of the *Gramineæ*. [B, 19, 75, 121, 123.]

CARYOPTERIDEÆ (Lat.), n. f. pl. Ka^{2}r(ka^{3}r)-i^2(u^6)-o^{2}p-te^{2}r-i^{2}d'e^2-e(a^3-e^2). Of Shauer, a subtribe of the *Verbenaceæ* (tribe *Viticeæ*), comprising *Caryopteris*, etc. [B, 121; Schauer (B, 214).]

CARYOTA (Lat.), n. f. Ka^{2}r(ka^{3}r)-i^2(u^6)-ot'a^3. Gr., καρυωτός, καρυῶτις. Fr., *caryote*. 1. Of Linnæus, a genus of palms of the tribe *Arecineæ*, indigenous to the East Indies and to Cochin-China, having a sweet sap. 2. In the pl., caryotæ (Gr., καρυωτοί, καρυωτίδες). Dates. [B, 180.]—**C. onusta** [Blanco]. See Arenga *saccharifera*.—**C. rumphiana** [Martius]. The largest and most imposing species. Several varieties exist, found in Borneo, New Guinea, and northern Australia. [B, 245.]—**C. urens** [Linnæus]. Ger., *gemeine Brennpalme*. The toddy-palm, sago-palm of Assam, or bastard-sago; a tree 50 or 60 ft. high, growing on the Malabar coast and in Coromandel, Travancore, and Assam. The spadices furnish

The Caryota urens. [A, 327.]

a saccharine sap which is boiled down to make sugar, and, on fermentation, furnishes a palm-wine or toddy-wine; the pith yields a sago of inferior quality; and the fruit, which is of the size of a nutmeg, has a yellow, very acrid rind, producing a burning taste in the mouth. [B, 19, 172, 180.]

CARYOTEÆ (Lat.), n. f. pl. Ka^{2}r(ka^{3}r)-i^2(u^6)-ot'e^2-e(a^3-e^2). Of Drude, a subtribe of the *Arecineæ*, comprising *Caryota, Arenga, Didymosperma, Wallichia*, and *Urania*. [B, 245.]

CARYOTI (Lat.), n. m. pl. Ka^{2}r(ka^{3}r)-i^2(u^6)-ot'i(e). See Caryota (2d def.).

CARYOTIDEÆ (Lat.), n. f. pl. Ka^{2}r(ka^{3}r)-i^2(u^6)-ot-i^{2}d'e^2-e(a^3-e^2). Of Bentham and Hooker, a subtribe of the *Areceæ*, corresponding to the *Caryoteæ* of Drude. [B, 42.]

CARYOTIS (Lat.), n. f. Ka^{2}r(ka^{3}r)-i^2(u^6)-ot'i^{2}s. Gen., *caryot'idos* (*-is*). Gr., καρυῶτις. See Caryota.

CARYPHOLLINUS (Lat.), n. m. Ka^{2}r(ka^{3}r)-i^2(u^6)-fo^{2}l-lin(len)'-u^{3}s(u^{4}s). A genus of the *Tæniadæ* in the larval state. [Schranck (L, 16).]

CAS (Fr.), n. Ka^3. See Case.

CAS (Hind.), n. The *Saccharum spontaneum*. [B, 172.]

CASA, n. In Congo, the *Erythrophlœum guineense*. [B, 88, 121.]

CASA-CASA (Tamil), n. The *Papaver somniferum*. [B, 92, 121, 172.] Cf. Cassa-cassa.

CASAGNE (Fr.), n. Ka^{3}z-a^{3}n-y'. The *Agaricus amethystinus*. [B, 88, 121.]

CASAILO, n. See Benteka.

CASAL-DE-BARRAS (Port.), n. Ka^{3}s-a^{3}l'da-ba^{3}r'ra^{3}s. A place in Portugal, where there is an effervescent chalybeate spring. [L, 49.]

CÄSALPINIE (Ger.), n. Tsaz-a^{3}l-pen'-e. See Cæsalpinia.—**Schiefblättrige C.** See Cæsalpinia *sappan*.

CASAMICCIOLA (It.), n. Ka^{3}z''a^3-met-chi^2-ol'a^3. See ISCHIA.

CASAMUM (Lat.), n. n. Ka^{2}s(ka^{3}s)'a^{2}m(a^{3}m)-u^{3}m(u^{4}m). Gr., *κάσαμον*. In Myrepsus, the *Cyclamen*. [B, 200.]

CASANDI (Hind.), n. The *Cassia sophora*. [B, 172.]

CASARES (Sp.), n. Ka^{3}s-a^{3}r'as. A place in Spain, where there is a cold sulphurous spring. [L, 105.]

CASCA (Sp., Port.), n. Ka^{3}s'ka^3. 1. (Sp.) bark, also the *Rhamnus alaternus*. [L, 87, 105.] 2. (Port.) bark. [B, 121.]—**C.-bark.** Fr., *écorce de mancône*. Ger., *Manconarinde*. Mancona-bark, sassy-bark, saucy-bark; the bark of *Erythrophlœum guineense* [Don] (seu *judiciale* [Procter], seu *suaveolens* [Guillemin and Perrottet]). The *haya* or *hayab* prepared from it by the natives of the west coast of Africa is used by them as an ordeal poison and as a remedy for dysentery, diarrhœa, and colic. The poisonous principle of *hayab* is said to be identical with the alkaloid erythrophlœine, which acts as a local anæsthetic, in small doses as an antagonist of strychnine, and in large doses as a convulsivant, death being preceded by vomiting and slowing of the heart's action, ending in cardiac paralysis. [S. W. Mitchell, W. A. Hammond, *et al.* (A, 247); L. Lewin, "Allg. med. Ctrl-Ztg.," 1888, No. 3; "N. Y. Med. Jour.," Feb. 18, 1888, p. 188.]—**C. da anta** (Port.), **C. d'anta** (Fr.), **C. de anta** (Port.). 1. In Brazil, the *Drimys Winteri* (*Drimys granatensis*). 2. In France, the bark of a Brazilian species of *Rauwolfia*. 3. In France, the bark of *Mespilodaphne pretiosa*. [A, 301, 385; B, 19, 121, 180.]—**C. de assacu** (Port.). The *Hura crepitans*. [L, 77.]—**C. de barbatimão** (Port.). The bark of *Stryphnodendron polyphyllum* ["Nouv. rem.," Aug. 24, 1888; B, 180.] Cf. BARBATIMÃO.—**C. de larangeira da terra** (Port.). The *Esenbeckia febrifuga*. [B, 19.]—**C. d'encacia** (Fr.). Encacia-bark (*cortex encaciæ*). [B, 180.]—**C. para tudo** (Port.). In Brazil, the *Drimys granatensis*. [B, 121; L.]—**C. pretiosa.** In Brazil, the bark of *Cryptocarya* (*Mespilodaphne*) *pretiosa*. [B, 121, 180.]

CASCADE, v. intr. and n. Ka^{2}s-kad'. As a v., a vulgar term for vomit; as a n., see *C.* BATTERY.

CASCADOR (Sp.), n. Ka^{3}s-ka^{3}d-or'. For deriv., see CASCA (2d def.). One engaged in the collection of cinchona bark. [B, 23.]

CASCALITRA, n. Of Belon, a salad-plant used about Constantinople, apparently the *Caucalis maritima*. [B, 121; L, 105.]

CASCALOTE (Fr., Sp.), n. Ka^{3}s-ka^{3}l-ot, -ot'a. The *Croton cascarilla*; of the Mex. Ph., the *Cæsalpinia coriaria*. [A, 447; B, 121.]

CASCANOQUI, n. Probably the *Xanthoxylum caribœum* of Linnæus. [L, 105.]

CASCARA (Sp.), n. Ka^{3}s'ka^{3}r-a^3. Lit., bark; the *Cinchona grandifolia*. [L, 105.]—**C. amarga.** Fr., *écorce amère* (ou *de Honduras*). Honduras bark; a very bitter, odorless bark, occurring in commerce in the form of fragments, which are covered with a thick, ochre-yellow, corky layer, and have a brownish section with yellowish markings. It comes from Central America and, according to some, is derived from a species of *Picramnia*. It contains an amorphous alkaloid, *picramnine*, and has been employed in chronic cutaneous affections and in syphilis. [B, 270.]—**C. cordial.** A preparation used in the United States as a laxative, consisting of the extract of *C. sagrada* with the addition of aromatic and cathartic ingredients. [B, 270.]—**C. de pingue.** An astringent Mexican drug supposed to be obtained from a species of *Curcuma*. [B, 19.]—**C. sagrada.** Fr., *écorce sacrée*. Lit., sacred bark; the bark of *Rhamnus purshiana*. It is used as a mild laxative in habitual constipation, and for the relief of subacute and chronic rheumatism. ["N. Y. Med. Jour.," Mar. 3, 1888, p. 250; H. T. Goodwin, *id.*, June 9, 1888, p. 629.]—**Extractum cascaræ sagradæ** [Br. Ph.]. An extract made by exhausting 1 lb. (av.) of the bark of *Rhamnus purshiana* with 2 pints (Imp.) of alcohol by percolation, sufficient water being added in the process to bring the percolate up to 3 pints; the latter is then evaporated on a water-bath to a suitable consistence. [B, 95.]—**Extractum cascaræ sagradæ liquidum** [Br. Ph.]. Liquid extract of *C. sagrada*; a preparation made by boiling 1 lb. (av.) of the bark of *Rhamnus purshiana* with 3 or 4 successive charges of water, evaporating the decoctions to 12 fl. oz., mixing with 4 fl. oz. of alcohol, filtering, and adding enough water to bring the whole up to 16 fl. oz. [B, 95.]

CASCARIGLIA (It.), **CASCARILHA** (Port.), n's. Ka^{3}s-ka^{3}r-el'ya^3. The true cascarilla (*Croton eluteria*). [B, 88, 92.]

CASCARILLA (Lat.), n. f. Ka^{2}s(ka^{3}s)-ka^{2}r(ka^{3}r)-i^{2}l'la^3. From Sp. *c.* (dimin. of *casca*, bark), a name applied to various barks, especially that of the *Cinchona* and its allies. Fr., *cascarille*, *cascarille officinale* [Fr. Cod.] (3d def.). Ger., *Kaskarilla*, *Kaskarille*. It., *c.* Sp., *c. chacarilla* [Sp. Ph.] (3d def.), *quina aromática* [Sp. Ph.] (3d def.). 1. Of Adanson, the genus *Croton* of Linnæus; of Grisebach, a section of that genus. 2. A genus of rubiaceous trees of the suborder *Cinchoneæ*, subdivision *Eucinchoneæ*, separated by Weddell from *Cinchona*. 3. See *C.-bark*. [B, 5, 19, 23.]—**Ætheroleum cascarillæ.** See *Oil of c.*—**Alcoholic extract of c.** See *Extractum cascarillæ* (1st def.).—**Alkaline infusion of c.** Fr., *infusion de cascarille alcaline*. See under *Infusum cascarillæ*.—**Aqua cascarillæ, Aqua stillatitia de corticibus cascarillæ.** Fr., *eau* (ou *hydrolat*) *de cascarille*. Ger., *Cascarillenwasser*. It., *acqua di c.* Sp., *agua de chacarilla*. A preparation made by distilling 4 parts of an infusion of 1 part of c.-bark in 8 parts of water. [Bav. Ph., 1822, Sax. Ph., 1837, Fr. Cod., 1837 (B, 119).]—**Aqueous extract of c.** See *Extractam cascarillæ* (2d def.).—**Bahama c.** The *Croton eleuteria*. [B, 19.]—**Caribbean c.** The *Croton Sloanei*. [B, 19.]—**C. acutifolia** [Weddell]. Syn.: *Cinchona acutifolia* [Ruíz and Pavón], *Ladenbergia acutifolia* [Klotzsch]. A small tree growing in the woods of the Peruvian Andes. Its bark, *cascarillo de hoja aguda*, is but slightly bitter and does not occur in commerce. [B, 180; Weddell, "Ann. des sci. nat.," sér. iii, t. x, p. 10 (B).]—**C. ahumada** (Sp.). See *C. crespilla ahumada*.—**C. amarilla** (Sp.). 1. According to Humboldt, Ruíz's designation for the *C. magnifolia*. 2. See *C. amarilla del rey*. [B, 214.]—**C. amarilla del rey** (Sp.). The subvariety *lutea* of *Cinchona officinalis*, var. γ *bonplandiana*. [Weddell, "Ann. des sci. nat." (bot.), sér v, t. xii, p. 24 (B).]—**C. barbacoensis.** Syn.: *Cinchona barbacoensis*. A Colombian species of *C.* (2d def.), doubtfully referred by Weddell to *Cinchona*. [B, 23.]—**C.-bark.** Lat., *c.* [U. S. Ph., Austr. Ph., Hung. Ph., Netherl. Ph.], *cascarillæ cortex* [Br. Ph., Ger. Ph.], *c.* (*cortex*) [Belg. Ph., 1854], *cortex cascarillæ* [Ger. Ph., Swiss Ph., Norw. Ph., Dan. Ph., Swed. Ph., Finn. Ph., 1863, Russ. Ph.]. Fr., *cascarille officinale* [Fr. Cod.]. Ger., *Cascarillrinde*. It., *corteccia di c.* Sp., *chacarila* [Sp. Ph.], *quina aromática* [Sp. Ph.]. The bark of *Croton eleuteria* [Swartz], also, according to the Dan., Hung., Norw., and Russ. Ph's, of other species of Croton. [B, 95.]—**C.-bark tree.** The *Croton eleuteria* (seu *c.*). [B, 275.]—**C. blanca pata de gallinazo** (Sp.). The *Cinchona suberosa*. [Weddell, "Ann. des sci. nat." (bot.), sér. v, t. xii, p. 24 (B).]—**C. boba** (Sp.). The *C. caduciflora* and its bark. [B, 121, 180.]—**C. bruta** (Sp.). The *Macrocnemum cinchonoides*. [B, 283; Weddell, "Ann. des sci. nat." (bot.), sér iv, t. i, p. 65 (B).]—**C.-bush.** See *C.-bark tree*.—**C. calyptrata** [Weddell]. Syn.: *Cinchona crassifolia* [Pavón]. A tree growing in the neighborhood of Quito and Loxa. The bark is not exported. [B, 180; Weddell, "Ann. des sci. nat." (bot.), sér. iii, t. x, p. 10 (B).]—**C. citrifolia** [Weddell]. Syn.: *Cinchona moritziana* [Karsten]. A Venezuela species. [B, 23, 282.]—**C. colorada** (Sp.). In South America, the bark of various species of *Cinchona*, especially of *Cinchona humboldtiana*, var. *conglomerata*. [Weddell, "Ann. des sci. nat." (bot.), sér. v, t. xii, p. 24 (B).]—**C. colorada del rey.** The subvariety *colorata* of *Cinchona officinalis*, var. γ *bonplandiana*. [Weddell, *ibid.* (B).]—**C. con hoja de olivo.** A medicinal species of *Cinchona* referred, probably incorrectly, to *Cinchona obovata*. [Weddell, *ibid.* (B).]—**C. (cortex)** [Belg. Ph.]. See *C.-bark*.—**C. crespilla** (Sp.). A name applied to several species of *Cinchona*, as to the *Cinchona umbellulifera*. [Weddell, *ibid.* (B).]—**C. crespilla ahumada** (Sp.). The *Cinchona decurrentifolia*. [Weddell, *ibid.* (B).]—**C. crespilla grande** (Sp.). The *Cinchona ovata*, var. *pallescens*. [Weddell, *ibid.* (B).]—**C. crespilla negramala** (Sp.). The *Cinchona obtusifolia*. [Weddell, *ibid.* (B).]—**C. de Cuba** (Sp.). The bark of *Croton pseudo-china*. [B, 270.]—**C. de hoja aguda** (Sp.). The bark of *C. acutifolia*. [B, 180.]—**C. delgada.** The *Cinchona hirsuta*. [Weddell, *ibid.* (B).]—**C. de Santa Ana** (Sp.). In South America, a variety of red cinchona-bark, known also as red Cuscobark. [B.] See CINCHONA *scrobiculata*.—**C. de Trinidad** (Sp.). The bark of *Croton pseudo-china*. [B, 180.]—**Cascarillæ cortex** (Br. Ph.). See *C.-bark*.—**C'extract** (Ger.). See *Extractum* CASCARILLÆ.—**C. falsa** [Batkás]. The bark of *Buena* (*C.*) *hexandra*. [B, 180.]—**C. fina, C. fina de Uritusinga** (Sp.). Crown Loxa-bark; especially that derived from *Cinchona officinalis*, var. α *uritusinga*. [Weddell, *ibid.* (B); B, 180.]—**C. flor de azahar** (Sp.). See *C. magnifolia*.—**C. henleana.** Syn.: *Cinchona henleana*. A Colombian species of *C.* (2d def.). [B, 23.]—**C. heterocarpa** [Karsten]. Syn.: *Cinchona heterocarpa* [Karsten]. A Colombian species, probably identical with *C. magnifolia*. [B, 23.]—**C. hexandra** [Weddell]. A lofty tree growing in the mountains of Brazil. The bark is one of the false cinchona-barks (Rio Janeiro cinchona). [B, 180; Weddell, "Ann. des sci. nat." (bot.), sér. iii, t. x, p. 10 (B).]—**C. hoja de Oliva** (Sp.). The *Cinchona pubescens*, var. *heterophylla*. [B, 48.]—**C. hoja de zambo** (Sp.). The *Cinchona palalba*. [Weddell, "Ann. des sci. nat." (bot.), sér. v, t. xii, p. 24 (B).]—**C. lambertiana** [Weddell]. A Brazilian species, perhaps the *Cinchona lambertiana* of Martius. [B, 282.]—**C. lampina** [Ruíz]. See CASCARILLO *lampino*.—**C. macrocarpa** [Weddell]. Syn.: *Cinchona macrocarpa* [Vahl] (seu *ovalifolia* [Mutis], seu *magniflora* [Pavón]), *Ladenbergia macrocarpa* [Klotzsch]. A species with several varieties, growing on the Peruvian Andes, between 4,000 and 8,000 feet above the sea-level, also at Santa Fé de Bogotá. Its bark is the *cortex chinœ albus*, or white cinchona-bark, formerly official in the French Codex, but very seldom brought into commerce. [B, 23, 180, 214, 283.]—**C. magnifolia** [Endlicher]. Sp., *c. flor de azahar*; *quina roxa*. Syn.: *Cinchona oblongifolia* [Mutis] (seu *nova*, seu *magnifolia* [Pavón]), *Buena magnifolia* [Weddell], *Ladenbergia magnifolia* [Klotzsch]. A large tree growing in Colombia and Ecuador, with small flowers of an orange-like odor. Its bark was once largely imported for medicinal purposes, under the name of *cinchona* (or *china*) *nova surinamensis*, but contains no cinchona alkaloids and is not now found in commerce. [B.] The variety known as *Cinchona caduciflora* [Humboldt, Bonpland, and Kunth] is a lofty tree of the Peruvian Andes. The bark, called *c. boba*, does not occur in commerce. [B, 23, 180; Weddell, "Ann. des sci. nat." (bot.), sér. iii, t. x, p. 10 (B).]—**C. morada** (Sp.). The *Cinchona calisaya*, var. *boliviana*, and the *Cinchona ovata*, var *vulgaris*. [Weddell, "Ann. des sci. nat." (bot.), sér. v, t. xii, p. 24 (B).]—**C. morada ordinaria** (Sp.). The *Cinchona ovata*, var. *vulgaris*. [Weddell, *ibid.* (B).]—**C. muzonensis** [Weddell]. Syn.: *Cinchona muzonensis* [Goudot]. A species growing in Colombia near Muzo; perhaps to be referred to *Rustia*. [B, 180, 283.]—**C. negrilla** [Humboldt]. The *Cinchona glandulifera*, or, according to Winkler, its bark. [B, 173, 180.]—**C. nitida** [Weddell]. Syn.: *Cinchona nitida* [Bentham]. A Venezuela species. [B, 283.]—**C. nova.** The bark of *Croton nivens*. [B, 48.]—**C. oblongifolia.** See *C. magnifolia*.—**C. oficinal** (Sp.). Of Ruíz, the *Cinchona nitida* [Ruíz and Pavón]. [B, 283.]—**C. palida** (Sp.). See CASCARILLO *palido*.—**C. pata de gallareta** (Sp.). The bark of *Cinchona ovata*, var. *genuina*. [Weddell, *ibid.* (B).]—**C. pata de gallinazo.** A name applied to *Cinchona suberosa* (see *C. blanca pata de gallinazo*), *Cinchona coccinea*, *Cinchona subcordata*, a form of *Cinchona ovata*, and *Cinchona peruviana*. [Weddell, *ibid.* (B).]—**C. Pavonii** [Weddell]. Syn.: *Cinchona Pavonii* [Lamarck]. A species growing in Loxa, to which medicinal properties have been attributed. [B, 173, 283; Weddell, "Ann. des sci. nat." (bot.), sér. iii, t. x, p. 10 (B).]—**C. peluda** (Sp.). The *Cinchona humboldtiana* of Lambert and, ac-

cording to Winkler (who is probably in error), of Römer and Schultes. [B, 180; Weddell, *ibid.* (B).]—**C. provinciana blanquilla** (Sp.), **C. provinciana blanquilla de Huánuco** (Sp.). The *Cinchona micrantha*, var. *huanucensis.* [A, 447; Weddell, *ibid.* (B).]—**C. provinciana fina** (Sp.). The *Cinchona umbellulifera.* [Weddell, *ibid.* (B).]—**C. provinciana negrilla** (Sp.). The bark of *Cinchona micrantha*, var. *β reicheliana.* [Weddell, *ibid.* (B).]—**C. riedeliana** [Weddell]. Syn.: *Cinchona riedeliana* [Casaretto]. A Brazilian species. [B, 283.]—**C. riveroana** [Weddell]. Syn.: *Cinchona oblongifolia* [Lambert]. A Peruvian species having two varieties, one with long stamens, called *azahar macho*, the other with an exserted stigma surpassing the anthers, called *azahar hembra.* [B, 283.]—**C. roja** (Sp.). A name erroneously given by Mutis to the bark of *C. magnifolia*; of the Mex Ph., the bark of *Cinchona succirubra.* [A, 447; B, 23.]—**C. Roraimæ** [Weddell]. Syn.: *Cinchona Roraimæ* [B. Hook.]. A Guiana species. [B, 283.]—**C. rostrata** [Weddell]. A variety of *C. magnifolia.* [B, 283.]—**C. serrana acanelada** (Sp.). The *Cinchona coccinea.* [Weddell, *ibid.* (B).]—**C. stenocarpa** [Weddell]. Syn.: *Cinchona stenocarpa* [Lambert]. A species growing in northern Peru, thought to have febrifuge properties. [B, 5, 173, 283.]—**C. undata** [Weddell]. Syn.: *Cinchona undata* [Karsten]. A Venezuela species. [B, 23, 283.]—**C. verde morada** (Sp.). The *Cinchona elliptica.* [Weddell, *ibid.* (B).]—**C. yanayana.** Of the South American Indians, the *Cinchona micrantha.* [B, 180.]—**C. zambamorada** (Sp.). See *C. morada.*—**Cortex cascarillæ** [Ger. Ph.]. See *C.-bark.*—**Cortex cascarillæ parvus.** The small fragments of bark mixed with impurities, separated from c.-bark by sifting. It should be rejected in pharmacy. [B, 270.]—**Essentia cascarillæ.** See *Tinctura cascarillæ.*—**Essential oil of c.** See *Oil of c.* —**Extractum cascarillæ.** Fr., *extrait de cascarille.* Ger., *Cascarillenextract, Cascarillextract.* It., *estratto di c.* Sp., *extracto de chacarila.* 1. Of the Ger. Ph., Belg. Ph., Gr. Ph., Netherl. Ph., and Swed. Ph., an aqueous extract made by infusing c.-bark with boiling or hot water, or by boiling it with water [Gr. Ph.], and evaporating the product. 2. Of the Russ. Ph., Swiss Ph., Hung. Ph., and Finn. Ph., an alcoholic extract of c.-bark made with dilute alcohol [Vogl (A, 319); B, 95].—**Extractum cascarillæ alcoholicum.** Fr., *extrait alcoolique de cascarille.* Ger., *geistiges* (or *spirituöses*) *Cascarillenextract.* See *Extractum cascarillæ* (1st def.).—**Extractum cascarillæ aquosum.** Fr., *extrait aqueux de cascarille.* Ger., *wässeriges Cascarillenextract.* See *Extractum cascarillæ* (2d def.).—**Extractum cascarillæ spirituosum.** See *Extractum cascarillæ* (1st def.).—**False Bahama c.** (or **c.-bark tree**). The *Croton lucidum.* [B, 19, 275.]—**False c.-bark.** Fr., *fausse cascarille.* Ger., *falsche Cascarillrinde.* A bark closely resembling and sometimes found mixed with true c.-bark, probably derived from the *Croton lucidum.* It is not aromatic, and only slightly bitter, but is astringent. [B, 270.]—**Infusion of c., Infusum cascarillæ** [Br. Ph.]. Fr., *infusion* (ou *hydrolé*) *de cascarille.* Ger., *Cascarillenaufguss.* A preparation made by infusing 1 part of c.-bark in 10 parts of boiling water and straining. Similar preparations made with 16 parts of water were formerly official. The *alkaline infusion of c.* of the Palat. Disp., 1764, was made with 12 parts of c.-bark, 1 part of potassium carbonate, and 64 parts of boiling water. [B, 81, 119.]—**Jamaica c.-bark tree.** The *Croton lucidum* or, according to some, the *Croton Sloanei.* [B, 19, 275.]—**Mixtura cascarillæ composita.** A preparation of the old London Pharmacopœia, made up of 17 parts of infusion of c., 1 part of vinegar of squill, and 2 parts of paregoric. [B, 119.]—**Oil of c.** Lat., *oleum cascarillæ æthereum, ætheroleum cascarillæ.* Fr., *huile essentielle de cascarille.* Ger., *Cascarillenöl.* It., *olio volatile di c.* Sp., *aceite de chacarila.* A volatile oil of a camphoraceous odor contained in c.-bark to the extent of about 1·6 per cent. and obtainable by distillation with water. It consists of a terpene, $C_{10}H_{16}$, and an oxygenated compound. It is dextrorotary and has a sp. gr. of 0·862. It was official in the Polish Ph. of 1817. [B, 81, 119, 270.]—**Oleum cascarillæ æthereum.** See *Oil of c.*—**Syrupus cascarillæ.** Fr., *sirop de cascarille.* A preparation made by infusing 3 parts of c.-bark in 22 of white wine, and, after straining, adding 32 of sugar [Würtemb. Ph., 1798]. Several preparations made with water and sugar were ordered in various unofficial formularies. [B, 119.]—**Tinctura cascarillæ** [Br. Ph., Austr. Ph.]. Fr., *teinture de cascarille* [Fr. Cod.]. Ger., *Cascarillentinctur, Cascarilltinctur.* It., *tintura de c.* Sp., *tinctura de chacarila.* Tincture of c., made by macerating c.-bark in dilute alcohol. The Br. Ph. orders 2¼ oz. (av.) of c. (= 1 part) and 1 imp. pint (= 7½ parts) of proof spirit; the Fr. Codex orders 1 part of c. and 5 parts of alcohol of the sp. gr. of 0·863. Similar preparations in which from 4 to 8 parts of alcohol were employed were formerly official. [B, 81, 119.]—**Tincture of c.** See *Tinctura cascarillæ.*

CASCARILL-CHINARINDE (Ger.), n. Ka^{3}s-ka^{3}r-el-che^{2}n'-a^3-ri^{2}nd-e^2. The bark of *Croton pseudo-china.* [B, 48.]

CASCARILLE (Fr., Ger.), n. Ka^{2}s-ka^{3}r-el-y' -el'le^2. Cascarilla. [B.]—**Alcoolé de c.** (Fr.). See *Tinctura* CASCARILLÆ.—**C. copalchi** (Fr.). Copalche bark. [L, 88.]—**C. de la Trinité de Caba.** See CASCARILLA *de Trinidad.*—**C'naufguss** (Ger.). See *Infusum* CASCARILLÆ.—**C'nextract** (Ger.). See *Extractum* CASCARILLÆ.—**C'nöl** (Ger.). See *Oil of* CASCARILLA.—**C'ntinctur** (Ger.). See *Tinctura* CASCARILLÆ.—**C'nwasser** (Ger.). See *Aqua* CASCARILLÆ.—**C. officinale** [Fr. Cod.] (Fr.). The *Croton eleuteria.* [B, 113.]—**Eau de c.** (Fr.). See *Aqua* CASCARILLÆ.—**Écorce de c. officinale** (Fr.). Cascarilla bark. [B.]—**Extrait alcoolique de c.** (Fr.). See *Extractum* CASCARILLÆ (1st def.).—**Extrait aqueux de c.** (Fr.). See *Extractum* CASCARILLÆ (2d def.).—**Extrait de c.** (Fr.). See *Extractum* CASCARILLÆ.—**Geistiges C'nextract** (Ger.). See *Extractum* CASCARILLÆ (1st def.).—**Huile essentielle de c.** (Fr.). See *Oil of* CASCARILLA.—**Hydrolat de c.** (Fr.). See *Aqua* CASCARILLÆ.—**Hydrolé de c.** (Fr.), **Infusion de c.** (Fr.). See *Infusum* CASCARILLÆ.—**Infusion de c. alcaline** (Fr.). Alkaline infusion of cascarilla. [B, 119.] See under *Infusum* CASCARILLÆ. —**Oléule de c.** (Fr.). See *Oil of* CASCARILLA.—**Poudre de c.** [Fr. Cod.] (Fr.). Cascarilla-bark dried in an oven at a temperature of 40° C., pulverized, and passed through a silk sieve of 140 meshes to the inch (French). [B, 113.]—**Sirop de c.** (Fr.). See *Syrupus* CASCARILLÆ.—**Spirituöses C'nextract** (Ger.). See *Extractum* CASCARILLÆ (1st def.).—**Teinture de c.** [Fr. Cod.] (Fr.). See *Tinctura* CASCARILLÆ.—**Wässeriges C'nextract** (Ger.). See *Extractum* CASCARILLÆ (2d def.).

CASCARILLERO (Sp.), n. Ka^{3}s-ka^{3}r-el-yar'o. One engaged in the collection or sale of cinchona-bark. [B, 23.]

CASCARILLIN, n. Ka^{2}s-ka^{2}r-i^{2}l'i^{2}n. Fr., *cascarilline.* Ger., *C.* A white crystalline bitter principle, $C_6H_9O_2$, obtained from the bark of *Croton eleuteria*; soluble in hot alcohol and in ether, soluble with difficulty in water. [B, 5, 270.]

CASCARILLO (Sp.), n. Ka^{3}s-ka^{3}r-el'yo. A name applied to various species of *Cinchona* and to cinchona and other barks. [B.] Cf. CASCARILLA.—**C. amarillo** [Ruíz]. The *Cinchona* (*Cascarilla*) *oblongifolia.* [B, 280.]—**C's bobos.** The false cinchonas, including trees belonging to the genera *Cascarilla, Remijia, Pimentelia, Ladenbergia*, and *Macrocnemum.* [B, 23.]—**C. bobo de hoja morada.** In South America, the *Cinchona purpurea.* [B, 180.] —**C. de hoja aguda.** See CASCARILLA *de hoja aguda.*—**C. delgado.** See CASCARILLA *delgada.*—**C. fino.** The *Cinchona micrantha.* [B, 121.] Cf. CASCARILLA *fina.*—**C's finos.** The true cinchona-trees (members of the genus *Cinchona* in its restricted sense). [B, 23.]—**C. lampino** [Ruíz]. The *Cinchona lanceolata* of Ruíz and Pavón. [B, 180, 214.]—**C. palido** [Ruíz]. The *Cinchona ovata.* [Weddell, "Ann. des sci. nat." (bot.), sér. v, t. xii, p. 24 (B); B, 180.]—**C. pardo** [Ruíz]. The *Cinchona rosea* (*Macrocnemum roseum*). [B, 280.]

CASCARILLRINDE (Ger.), n. Ka^{3}s-ka^{3}r-el'ri^{2}nd-e^2. Cascarilla-bark, also the bark of a species of *Alsodeia.* [B, 48, 180.]—**Falsche C.** See *False* CASCARILLA-*bark.*

CASCARILLTINCTUR (Ger.), n. Ka^{3}s-ka^{3}r-el'ti^{2}n^{2}kt-ur. See *Tinctura* CASCARILLÆ.

CARCASCH, n. In the Levant, the *Papaver somniferum.* [B, 121; L, 105.]

CASCATI, n. Pegu catechu. [B. 121.]

CASCAVELLE (Fr.), n. Ka^{3}s-ka^3-ve^{2}l. In the Mauritius, the *Abrus precatorius.* [B, 121.]

CASCHOU, n. In Surinam, the *Anacardium occidentale.* [B, 88, 121.] See CASHEW.

CASCHU (Ger.), n. Ka^{3}sh-u'. See CASHEW and CATECHU.—**C'nuss.** See CASHEW *nut.*

CASCHUTTIE [Fr. Cod.] (Fr.), n. Ka^{3}sh-u^{6}t-e. Catechu. [B, 113.]

CASCIANO (It.), n. Ka^{3}s-chi^2-a^{3}n'o. A small village of Tuscany, near Florence, where there are several springs having different properties. [L, 105.]

CASE, n. Kas. Lat., *casus* (from *cadere*, to happen [1st def.]), *capsa* (2d def.). Fr., *cas* (1st def.), *observation* (1st def.), *caisse* (2d def.), *c.* (2d def.). Ger., *Fall* (1st def.), *Kapsel* (2d def.), *Kästchen* (2d def.). 1. An individual example (as of disease). 2. A box, chest, covering, receptacle.—**Brain-c.** The parts which include the brain. [L, 20.]—**C. musculaire** (Fr.). See *Muscle-c.*—**Dissecting c.** A c. of dissecting instruments.—**Dressing c.** A c. of instruments and appliances used in dressing wounds, etc.—**Heart-c.** See PERICARDIUM.—**Muscle-c.** Fr., *c. musculaire.* Ger., *Muskelkästchen* [Krause]. Syn.: *muscle-casket, muscular casket.* The elements forming a striated muscular fibre. It consists of a muscle-prism (sarcous element) surrounded by a more fluid substance and bounded by a Krause's membrane at the ends and a longitudinally extending membrane at the sides. A longitudinal row of the c's forms a fibril, and a transverse row a Bowman's disc or muscle-compartment. (J, 30, 55; Krause, "Ztschr. f. rat. Med.," 1868 (J, 68).]—**Operating c.** A c. of surgical instruments in general.—**Pupa-c.** The c. which contains a pupa or larva. [L, 121.]—**Trial c.** A c. of lenses, prisms, etc., for testing the refraction, accommodation, etc., of the eye.—**Wing-c.** See ELYTRON.

CASEARIA (Lat.), n. f. Ka^{2}s(ka^{3}s)-e^2-a(a^3)'ri^2-a^3. Fr., *caséarie.* Of Gärtner, a genus of samydaceous plants; the *Anavinga* of Rheede. [B, 121.]—**C. anavinga** [Persoon]. See *C. canziala* and ANAVINGA *ovata.*—**C. astringens.** A South American species. The bark is used in Brazil as a stimulating and healing poultice for sluggish ulcers. [B, 19.]—**C. canziala** [Wallich]. Syn.: *Anavinga ovata* (*q. v.*). A large tree, the *anavinga* of the Malays, growing in the East Indies, very bitter in all its parts. The ovate oblong leaves are used to make medicated baths for affections of the joints; the pulp of the fruit is said to be highly diuretic. [B, 19, 172, 173.]—**C. esculenta** [Roxburgh]. A species growing in the Circar mountains of India, where the leaves are eaten and the root is used as a purgative. [B, 19, 172.]—**C. lingua.** A Brazilian species. The leaves furnish a decoction employed in fever and internal inflammations. [B, 19.]—**C. ovata** [Willdenow, Roxburgh]. See *C. canziala.* —**C. parviflora.** A species called by the French *bois de rivière.*— **C. resinifera.** A species exuding upon the flowers a greenish resin which is used to kill dogs and cats. [B, 19.]—**C. ulmifolia.** A Brazilian species. The leaves are used externally and internally against the bites of serpents. [B, 19.]

CASEARIEÆ (Lat.), n. f. pl. Ka^{2}s(ka^{3}s)-e^2-a^{2}r(a^{3}r)-i(i^2)'e^2-e(a^3-e^2). Of Reichenbach, a subdivision of the *Samydeæ*, comprising *Casearia* and *Samyda*, or, in a later classification, consisting of *Casearia* alone. [B, 42, 170.]

CASEATE, n. Kaz'e-at. Fr., *caséate.* A lactate. [B, 38.]

CASEATE, v. intr. Kaz'e-at. To undergo cheesy degeneration. [D.]

CASEATIO (Lat.), n. f. Kaz(ka^{3}s)-e^2-a(a^3)'shi^2(ti^2)-o. Gen., *caseatio'nis.* Fr., *caséation.* 1. See CASEATION. 2. Of the older

writers, a form of the "milk fever" of lying-in women, in which the milk was supposed to be converted into cheese within the milk ducts. [A, 68.]

CASEATION, n. Kaz-e-a'shu^{3}n. Lat., *caseatio* (from *caseus*, cheese). Fr., *caséation*. Ger., *Verkäsung*. A process by which the exudation in chronic inflammation, especially of the lungs, bones, and lymphatic glands, undergoes fatty degeneration and disintegration, the result being a putty-like substance composed chiefly of granular débris, with crystals of stearic acid and plates of cholesterin. [E, 25.]

CASEDEL, n. In Java, the *Cordia myxa*. [B, 121; L, 105.]

CASÉEUX (Fr.), adj. Ka^{3}z-a-u^5. See CASEOUS.

CASEIC ACID, n. Kaz-e'i^{2}k. Fr., *acide caséique*. An obsolete term for lactic acid. [B, 38, 93.]

CASEIFICATION, n. Kaz-e-i^2-fi^2-ka'shu^{3}n. From *caseus*, cheese, and *facere*, to make. Fr., *caséification*. See CASEATION.

CASEIFORM, adj. Kaz'e-i^2-fo^{2}rm. Lat., *caseiformis* (from *caseus*, cheese, and *forma*, form). Fr., *caséiforme*. Ger., *käseförmig*. Having the form or appearance of cheese or casein. [L, 41, 180.]

CASEIN, n. Kaz'e-i^{2}n. Gr., τυρός. Lat., *caseinum*, *caseum* (from *caseus*, cheese). Fr., *caséine*, *caséum*. Ger., *Caseïn*, *Käsestoff*. It., Sp., *caseina*. A proteid substance occurring in the milk of the *Mammalia* in the proportion of 2 to 6 per cent., and in traces in the sebaceous secretion of the skin. It is obtainable as a fine white powder, soluble with difficulty in water, more soluble in hot alcohol, and having the percentage composition C 52·96, H 7·05, N 15·65, P 0·85, O 22·71. It is precipitated by acetic acid and lactic acid (hence precipitated from milk when it turns sour) and by rennet. The latter property is made use of in making cheese, which consists of a mixture of coagulated c. with the fat and salts of milk. C. belongs to the class of alkali-albuminates, but, although agreeing in most of its reactions with the other members of this class, it differs in some characteristics, particularly in that it can not be procured free from the phosphureted body, nuclein, derived from the nuclei of the cells of the mammary gland. It has therefore been regarded as a compound of nuclein and protalbumin (alkali-albumin) [Danilewski, in Russ. Chem. Soc., reported in "Bull. de la soc. chim.," xli, p. 253], and has been called *nucleo-albumin*. This view is opposed by Hammersten, who regards c. as an uncompounded substance. ["Ztschr. f. phys. Chem.," vii, p. 227.] C. with nuclein forms about 2 to 4 per cent. of woman's milk, 4·20 per cent. of cow's milk, rather more than 1·5 per cent. of mare's milk, 5 per cent. of goat's milk, and over 6 per cent. of sow's milk. It differs in character in different *Mammalia*, the c. of human milk being less soluble in water and in alcohol than that of cow's milk. When coagulated it is thrown down in fine flocculi instead of large coagula, as in that of cow's milk, and is, moreover, completely dissolved in natural or artificial digestion, while of the c. of cow's milk not more than 75 per cent. is dissolved. The c. of asses' and mares' milk is like that of human milk. C. is the chief nutritive principle of milk, and in the form of cheese (*q. v.*) is used directly as food. [B, 81, 270.]—**Animal c.** Fr., *caséine animale*. See *C.*—**C. of the blood.** An old name for albuminose. [A, 314.]—**C. of the saliva.** Ptyalin. [A, 301, 385.]—**Frauenc'** (Ger.). The c. of woman's milk. [J. Munk, "Ctrlbl. f. d. med. Wissensch.," Jan. 23, 1886, p. 52 (B).]—**Gluten c.** See *Vegetable c.*—**Kuhc'** (Ger.). The c. of cow's milk. [B, 270.]—**Milk c.** Ger., *Milch-Casein*. See *C.*—**Vegetable c.** Fr., *caséine végétale*. A nitrogenous substance resembling milk c., forming from 7·5 to 19·5 per cent. of the gluten of flour; insoluble in alcohol and in ether, slightly soluble in acetic acid, freely soluble in an aqueous solution of potash. [B, 81.]

CASÉINE (Fr.), n. Ka^{3}z-a-en. See CASEIN.—**C. de l'intestin grêle.** See PEPTONE.

CASEÏNHÜLLE (Ger.), n. Ka^{3}z-a-en'hu^{6}l-le^2. Fr., *enveloppe* (ou *membrane*) *de caséine*, *membrane haptogène*. The casein envelope of the milk globules. [K, 16.]

CASEOUS, adj. Kaz'e-u^{3}s. Lat., *caseosus*. Fr., *caséeux*. Ger., *käsig*. It., Sp., *caseoso*. Cheesy; of the consistence or appearance of cheese. [B.]

CASEUM, (Lat.), n. n. Kaz(ka^{3}s)'e^2-u^{3}m(u^{4}m). See CASEIN.

CASEUS (Lat.), n. m. Kaz(ka^{3}s)'e^2-u^{3}s(u^{4}s). Cheese. [A, 325.]

CASHA-MARUM (Tamil), n. The *Memecylon tinctorium*. [B, 172.]

CASHAW, CASHAW-TREE, n's. Ka^{2}sh-a^4'. The *Prosopis juliflora* and *Prosopis dielcis*. [B, 19, 275.]

CASHCUTTIE (Tamil), n. See CATECHU.

CASHEW, n. Ka^{2}sh-u^2'. Fr., *acajou*. Ger., *Caschu*. The *Anacardium occidentale*. [B.]—**C. family.** The *Anacardiaceæ*. [B, 75.]—**C.-gum.** A slightly soluble exudation from the trunk of *Anacardium occidentale* (*q. v.*) [L, 65.]—**C.-nut.** Fr., *noix d'acajou*. Ger., *Acajounuss*, *Caschunuss*. Hind., *Kaju*. The fruit of *Anacardium occidentale*. The kernel contains a bland oil and is edible. The juice of the rind is corrosive and epispastic; it is used to destroy warts, corns, and vegetations, also as a vermifuge and in making ink. It yields a kind of wine from which a spirit is distilled. [A, 479; B; L, 65.]—**C.-nut tree.** The *Anacardium occidentale*. [B, 275.]—**Wild c.-nut tree.** The *Anacardium rhinocarpus*. [B, 19.]

CASHIOBERRY-BUSH, n. Ka^{2}sh'i^2-o-be^{2}r-i^2. See CASSIOBERRY-BUSH.

CASHOO. See CATECHU.

CASIA (Lat.), n. f. Ka^{2}s(ka^{3}s)'i^2-a^3. Gr., κασία (from Sanscr., *rhaça*, a perfume, or Heb., *qetzî'ah*, perfumed). Ar., *qaçî'eh*. Of the ancients, the same as *cassia*; a name doubtless applied to many sweet-smelling plants. The C. of Vergil is probably lavender; that of Tournefort is the genus *Osyris*. [B, 121.]—**C. fistula.** Gr., κασίας σῦριγξ. See CASSIA *fistula* (1st def.).—**C. fistularis.** Gr., κασία συριγγώδης. See CASSIA *fistula* (1st def.). [B, 18.]—**C. poetica.** Probably the *Osyris alba*. [B, 121.]

CASIAR, n. Caviar. [L, 105.]

CASIE (Fr.), n. Ka^{3}z-e. See CASIA.

CASIMIROA (Lat.), n. f. Ka^{2}s(ka^{3}s)-i^2-mi^{2}r-o'a^3. Of La Llave and Lejarza, a genus of rutaceous trees indigenous to Mexico. [B, 121.]—**C. edulis** [La Llave and Lejarza]. Sp., *zapote blanco* [Mex. Ph.]. A species found in central Mexico. The fruit is anthelminthic and comestible. The pulp of the fruit is said to be a hypnotic, though unwholesome, and the seeds are regarded as poisonous. The bark is bitter, and, with the leaves and seeds, is used, incinerated, as a medicine. [J. M. Maisch, "Am. Jour. of Pharm.," Apr., 1886, p. 168; Seemann (B, 19); B, 121.]

CASIMIROEÆ (Lat.), n. f. pl. Ka^{2}s(ka^{3}s)-i^2-mi^{2}r-o'e^2-e(a^3-e^2). Of Oerstad, a group of rutaceous plants consisting of the single genus *Casimiroa*. [B, 121, 170.]

CÄSIUM (Ger.), n. Tsas'i^2-um. See CÆSIUM.

CASKET, n. Ka^{3}sk'e^{2}t. See CASE (2d def.).—**Muscle-c., Muscular c.** See *Muscle*-CASE.

CASLANA, n. In Guiana, the *Icica altissima*. [B, 121.]

CASMAGA, n. A vine of the Philippines, from which a tonic decoction is made. [B, 88, 121; L, 105.]

CASMAH (Heb.), n. The *Triticum spelta*. [B, 121.]

CASMET, n. See COSMET.

CASMINAR, CASMINARIS, CASMONAR, CASMUNAR, n's. See CASSUMUNAR.

CASOURI, n. In India, the *Elate silvestris*. [B, 121; L, 105.]

CASPARIA (Lat.), n. f. Ka^{2}s(ka^{3}s)-pa(pa^3)'ri^2-a^3. Fr., *casparée*, *casparie*. A genus of leguminous plants, by Bentham and Hooker made a section of *Bauhinia*. [B, 42, 121.]

CASPARYA (Lat.), n. f. Ka^{2}s(ka^{3}s)-pa(pa^3)'ri^2(ru^6)-a^3. Of Klotzsch, a genus of begoniaceous plants, now referred to *Begonia*. [B, 19, 121.]

CASQUE, n. Ka^{2}sk. Fr., c. 1. A horny tubercle on some birds' heads. 2. Of Lyonnet, the tissues forming the exterior of certain insects' heads. 3. In botany, see GALEA. [B, 121; L, 180.]—**C.-flower.** The genus *Galeandra*. [B, 19.]—**C. militaire** (Fr.). The *Orchis militaris*. [B, 121.]—**C.-wort.** See *C.-flower*.—**C.-de-Jupiter** (Fr.). See ACONITUM *napellus*.

CASQUÉ (Fr.), adj. Ka^{2}sk-a. See GALEATUS.

CASSA (Lat.), n. f. Ka^{2}s(ka^{3}s)'sa^3. From Ar., *cas*. The thorax. [Falloppius (A, 325).]

CASSAB (Ar.), n. The genus *Arundo*. [B, 121.]—**C. darrira, C. eldarib, C. eldarrib.** The *Acorus calamus*, or, according to some, a species of *Salicaria*. [B, 121.]—**C. essoukkar.** The *Saccharum officinale*. [B, 121.]

CASSABOU SEBIRE (Turk.), n. In Constantinople, the *Acorus calamus*. [L, 105.]

CASSA-CASSA (Tamil), n. The *Papaver somniferum*. [B, 172.]

CASSADA, n. See CASSAVA.—**C'baum** (Ger.). The *Jatropha manihot*. [L, 80.]

CASSALIS (Lat.), adj. Ka^{2}s(ka^{3}s)-sal(sa^{3}l)'i^{2}s. Pertaining to the thorax. [A, 325.]

CASSAMBA, n. In India, the *Cocos nucifera*. [B, 88, 121.]

CASSAN, n. On the Coromandel coast, the *Memecylon ramiflorum*. [B, 121.]

CASSANO, n. In Languedoc, the nut-gall. [B, 121.]

CASSAREEP, n. An extract made by inspissating the juice of the cassava (the root of *Jatropha manihot*), evaporation causing its poisonous properties to disappear. It is a condiment of the West Indies, said to be strongly antiseptic, preserving for a long time food with which it is mixed. Added to molasses, it makes an intoxicating beverage. [B, 14, 121, 172.]

CASSATUM (Lat.), n. n. Ka^{2}s(ka^{3}s)-sat(sa^{3}t)'u^{3}m(u^{4}m). Of Paracelsus, grumous, devitalized venous blood. [A, 325.]

CASSAVA, n. Ka^{3}s-a^{3}v'a^3. Fr., *cassave*. Ger., *C.*, *Cassawa*. Sp., *casaba*, *cazabe*, *yucca de cassabe*. The manihot or mandioc plant (*Jatropha manihot* and other species of *Jatropha*); also the starchy substance obtained from the roots of these plants. [B, 19.] See *C. meal*.—**Bitter c.** *Manihot utilissima* (*Jatropha manihot*). [B, 172.]—**C. bread.** C. meal baked in thin cakes. [B, 81.]—**C. flour, C. meal.** Flour obtained by grating *Jatropha* root, removing its poisonous juice by expression and drying, and grinding the residue to powder; or by mixing c. starch with water and drying in the sun the powder deposited. [B, 172.]—**C.-plant.** The genus *Jatropha*.—**C. starch.** A starch contained in c.; a white powder composed of granules usually less than half as large as those of potato-starch, and shaped like a muller with a rounded end. The nucleus is small and circular, or elongated. C. starch moistened with water and dried on hot plates, or dried in the sun after boiling in steam, forms tapioca (*q. v.*). [B, 81, 172.]—**C'strauch** (Ger.). The *Jatropha manihot*. [B, 180.]—**C.-wood.** The *Turpinia occidentalis*. [B, 275, 282.]—**C'wurzel** (Ger.). The root of *Jatropha manihot*. [B, 180.]—**Sweet c.** The *Manihot aipi* (seu *palmata*); the *Jatropha dulcis* of Gmelin. [B, 81.]—**Wild c.** The *Jatropha gossypifolia*. [B, 282.]

CASSAVE (Fr., Ger.), **CASSAWA** (Ger.), n's. Ka^{2}s-a^{3}v, ka^{3}s-sa^{3}f'e^2, -sa^{3}v'a^3. See CASSAVA.

CASSE (Fr.), n. Ka^{2}s. See CASSIA and CANELLA *malabarica*.—**C. à deux fleurs.** The *Cassia biflora*. [B, 173.]—**C. à feuilles aigues.** The *Cassia acutifolia*. [B, 173.]—**C. à feuilles de**

troène. The *Cassia ligustrinoides.* [B, 173.]—**C. à feuilles lancéolées.** The *Cassia lanceolata* [Forskål]. [B, 119.]—**C. à feuilles obtuses.** 1. The *Cassia obovata.* 2. The *Cassia obtusifolia.* [B, 119, 173.]—**C. ailée.** The *Cassia alata.* [B, 173.]—**C. allongée.** The *Cassia elongata.* [B, 173.]—**C. aromatique.** See Cassia *lignea.*—**C. auriculée.** The *Cassia auriculata.* [B, 173.]—**C. cachée.** The *Cassia decipiens.* [B, 173.]—**C. cathartique.** The *Cassia cathartica.* [B, 173.]—**C. chamæcrista.** The *Cassia chamæcrista.* [B, 173.]—**C. cuite.** See *Conserva* cassiæ.—**C. de Java.** The *Cassia javanica.* [B, 88, 173.]—**C. de Maryland.** The *Cassia marylandica.* [B, 173.]—**C. des boutiques.** The *Cassia fistula.* [B, 173.]—**C. de Sieber.** The *Cassia sieberiana.* [B, 173.]—**C. des poules.** The *Cassia gallinaria.* [B, 173.]—**C. du Brésil** [Fr. Cod.]. The *Cassia grandis* (seu *brasiliana*); of the Fr. Cod., its fruit. [B, 113, 173.]—**C. du Levant.** The *Acacia farnesiana.* [B, 19.]—**C. du Maryland.** The *Cassia marylandica.* [B, 38.]—**C. du Mexique.** The pod of *Cassia fistuloides.* [B, 173.]—**C. échancrée.** The *Cassia emarginata.* [B, 173.]—**C. en bâtons.** The *Cassia fistula* or its fruit. [B, 173.]—**C. en bois.** See *Cassia lignea.*—**C. en gousses.** See Cassia *fistula* (3d def.).—**C. en noyaux.** The pulp of *Cassia fistula* freed from the stalk. [B, 38.]—**C. en siliques.** See *C. en bâtons.*—**C. falquée.** The *Cassia falcata.* [L, 41.]—**C. fistuleuse.** The *Cassia fistula.* [B, 38.]—**C. fistuloïde.** The *Cassia fistuloides.* [B, 173.]—**C. giroflée.** The *Myrtus caryophyllata* (*Syzygium caryophyllaceum*). [B, 121, 173.]—**C. glauque.** The *Cassia glauca.* [B, 173.]—**C. lanceolée.** The *Cassia lanceolata.* [B, 173.]—**C. mondée.** Cassia pulp. [L, 41.]—**C. odorante.** See Cassia *lignea.*—**C. officinale.** The *Cassia fistula.* [B, 38, 81.]—**C. puante.** The *Cassia occidentalis.* [B, 173.]—**C. résolutive.** See *C. en noyaux.*—**C. sabak.** The *Cassia sabak.* [B, 173.]—**C. sophora.** The *Cassia sophora.* [B, 173.]—**C. soyeuse.** The *Cassia sericea.* [B, 173.]—**C. tagera.** The *Cassia tagera.* [B, 173.]—**C. trompeuse.** The *Cassia decipiens.* [B, 88, 121.]—**C. velue.** The *Cassia hirsuta.* [B, 173.]—**C. vénéneuse.** The *Cassia venenifera.* [B, 173.]—**Conserve de c.** See *Conserva* cassiæ.—**Eau de c. avec les grains (ou émétisée).** A preparation made from 60 parts of cassia fistula (3d def.), 30 of magnesium sulphate, 0·15 part of tartar emetic, and 1,000 parts of warm water; a purgative used in the treatment of lead colic. [A, 301.]—**Écorce de c.** See Cassia *lignea.*—**Extrait de c.** [Fr. Cod.]. See *Extractum* cassiæ.—**Grosse c.** The *Cassia grandis* or its fruit. [B, 173.]—**Huile de c.** See *Oil of* cassia.—**Petite c.** [Fr. Cod.]. The *Cassia moschata.* [B, 113.]—**Pulpe de c.** [Fr. Cod.]. See Cassiæ *pulpa.*—**Pulpe de c. pour lavement.** Cassia pulp for enemata. [B, 119.]—**Tisane de c.** [Fr. Cod.]. See *Decoctum* cassiæ.

CASSEAU (Fr.), **CASSEAUX** (Fr.), n's s. and pl. Ka^{2}s-o. Wooden tongs or pinchers used in castrating animals, also for holding caustic substances and for making compression in the treatment of umbilical hernia. [A, 301, 385; L, 41.]

CASSE-BOSSE (Fr.), **CASSE-BOSSES** (Fr.), n's. Ka^{2}s-bo^{2}s. The *Lysimachia vulgaris.* [B, 88, 173.]

CASSE-COL (Fr.), n. Ka^{2}s-kol. The *Cheiranthus cheiri.* [B, 173.]

CASSE-DIABLE (Fr.), n. Ka^{2}s-de-a^{3}bl. The genus *Hypericum.* [L, 65.]

CASSELIEÆ (Lat.), n. f. pl. Ka^{3}s-e^{2}l-i(i^2)'e^2-e(a^3-e^2). Fr., *casséliées.* Of Schauer, a subtribe of verbenaceous plants of the tribe *Verbeneæ*, comprising *Casselia* and *Tamonea.* [B, 170; Schauer (B, 214).]

CASSE-LUNETTES (Fr.), n. Ka^{2}s-lu^{6}n-e^{2}t. 1. The *Euphrasia officinalis.* 2. The *Centaurea cyanus.* [B, 88, 121.]

CASSE-MUSEAU (Fr.), n. Ka^{2}s-mu^{6}z-o. The *Viburnum roseum.* [B, 173.]

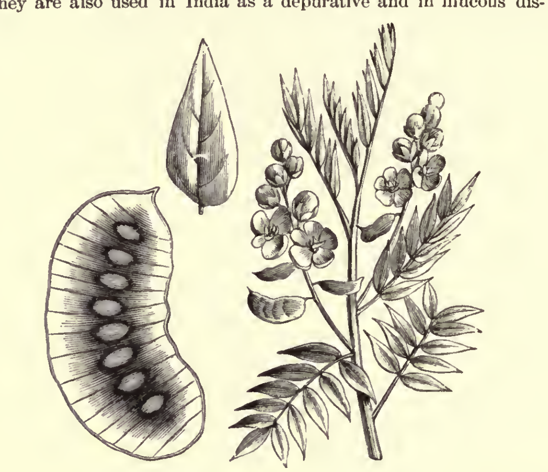
CASSENA, n. A name applied to several species of *Ilex*, especially *Ilex cassine*, used in preparing a bitter infusion or tea. [B, 270, 275.]

CASSENAT (Fr.), n. Ka^{2}s-na^3. In southern France, the oak. [B, 121.]

CASSENOLE (Fr.), **CASSENOLLE** (Fr.), n's. Ka^{2}s-nol. 1. A common name for nut-galls in southern France. [B, 121, 180.] 2. An inferior kind of Brazil nut. [B, 38.]

CASSE-PIERRE (Fr.), n. Ka^{2}s-pe-e^{2}r. A name applied to several plants, particularly the *Herniaria glabra*, *Saxifraga granulata*, and *Parietaria officinalis*, perhaps because growing in rocky places or because once used as lithontriptics. [B, 173.]

CASSE-POITRINE (Fr.), n. Ka^{2}s-pwa^{3}t-ren. 1. A strong liquor, peppered brandy. 2. A name given to masturbators, owing to their general constitutional impairment. [L, 41.]



CASSE-POT (Fr.), n. Ka^{2}s-po. The *Cestrum venenatum.* [B, 121.]

CASSERIAN, adj. Ka^{2}s-e'ri^2-a^{2}n. Fr., *cassérien.* Ger., *Casserisch.* Named after Casserio, an Italian anatomist of the 16th century. [A, 301, 385.] See *C.* ganglion.

CASSEROLE (Fr.), **CASSERON** (Fr.), n's. Ka^{2}s-e^{2}r-ol, -o^{2}n^2. A porcelain evaporating dish with a handle. [L, 41.]

CASSI (Fr.), n. Ka^{2}s-e. See Cassie.

CASSIA (Lat.), n. f. Ka^{2}s(ka^{3}s)'si^2-a^3. For deriv., see Casia. Fr., *casse.* Ger., *Cassie, Kassie.* It., *c.* Sp., *casia.* 1. An old name for several sweet-smelling trees, particularly *Cinnamomum c.*; hence now applied to the coarser varieties of cinnamon-bark, especially those derived from China and eastern Asia. See *C. lignea.* 2. Of Tournefort, a genus of leguminous plants of the tribe *Cassieæ*, comprising about 340 genera distributed into the subgenera *Fistula* (the genera *Bactyrilobium* [Willdenow] and *Cathartocarpus* [Persoon]), *Senna* (including the *Senna* of Roxburgh and the *Macleaya* of other authors), and *Lasiorrhegma* (including the *Chamæcrista* [Meyer] and *Grimaldia* [Schrank]). 3. Of the Netherl. Ph., the fruit of *C. fistula.* [B, 42, 95, 121; G. Bentham, "Trans. of the Linnæan Soc.," xxvii, p. 503 (B).]—**Brown c.** The *C. glandulosa.* [B, 282.]—**Calyces cassiæ** (seu **cassiæ cinnamomeæ**, seu **cassiæ zeylanicæ**). See *Flores cassiæ.*—**C. absus** [Linnæus]. Ger., *ägyptische Cassie.* A low annual plant of upper Egypt and of India. The brownish-black shining seeds (*semen cismæ*, *semen cassiæ absus*) have been employed in Egypt as a specific for Egyptian ophthalmia, and have been used to a certain extent in Europe. They are also used in India as a depurative and in mucous disorders.

THE CASSIA ACUTIFOLIA. [A, 327.]

[B, 106, 172, 173, 180, 212; "Ann. di chim. e di farmacol.," Apr., 1886, p. 269 (B).]—**C. acapulcensis** [Humboldt, Bonpland, Kunth]. The *C. biflora.* [B, 60.]—**C. acuminata.** 1. Of Willdenow, the *C. apoucouita.* 2. Of Mönch, the *C. marylandica.* [B, 214; G. Bentham, *l. c.* (B).]—**C. acutifolia** [Delile]. Ger., *spitzblättrige Cassie.* Syn.: *C. senna* [Linnæus], *Senna acutifolia* [Batka]. 1. The senna-plant; an African shrub. The narrowly lanceolate, mucronate, almost glabrous leaflets constitute Alexandrian senna. 2. Of Nees, the *C. angustifolia.* [B, 18, 81, 106, 180.]—**C. æschynomene** [De Candolle]. The *C. nictitans* or the *C. mimosoides.* [B, 60, 282; G. Bentham, *l. c.* (B).]—**C. æthiopica** [Guibourt]. An African species sometimes identified with *C. acutifolia*, said to furnish Tripoli senna. The **κασία αἰθιοπικά** of the Greeks was the *C. fistula* (1st def.). [B, 5, 18.]—**C. alata** [Linnæus]. Ger., *geflügelte Cassie.* Syn.: *Senna alata* [Roxburgh]. The ringworm-shrub, winged senna-plant, indigenous to South America and the West Indies. The leaves are cathartic and are used externally, moistened with water, in eczema and ringworm. Where the fresh leaves are not attainable, an extract prepared with acetic acid is advised. [Conillebault, "Thèse de Paris," 1886; "N. Y. Med. Jour.," Apr. 16, 1887, p. 447; "Am. Jour. of Pharm.," May, 1887, p. 263; B, 172, 180, 212.]—**C. alba.** The *Canella alba.* [B, 18.]—**C. angustifolia** [Vahl]. Syn.: *Senna officinalis* [Roxburgh]. Indian senna, the Tinnevelly senna-plant; an annual species growing in southern Arabia, Scinde, and the Punjab, and cultivated in some parts of India, closely resembling *C. acutifolia*, but with larger, narrower, and more tapering leaves. The leaves of the wild Arabian plant constitute Bombay (Moka, Arabian, or East Indian) senna; those of the cultivated Indian plant, Tinnevelly senna (*senna indica* [Br. Ph.]). [B, 18, 81, 106, 172.]—**C. apiculata** [Martius and Galeotti]. The *C. crotalarioides.* [B, 60.]—**C. apoucouita** [Aublet]. A Guiana species. The fruit is said to resemble that of *C. fistula.* [B, 88, 214.]—**C. arborea.** The *C. florida* (*siamea*). [B, 282.]—**C. arborescens** [Vahl]. The *C. glauca.* [B, 212.]—**C. arereh** [Delile]. A species resembling *C. fistula*, found near Merve. [B, 88.]—**Cassiæ atramentum.** The pulp of *C. fistula.* [B, 200.]—**C. auriculata** [Linnæus]. Ger., *geöhrte Cassie.* Syn.: *Senna auriculata* [Roxburgh]. A shrub growing in India. The root is employed in tanning, and as a remedy in cutaneous and urinary affections; the bark is used in tanning, in the preparation of a medicated oil, and in syphilis and skin diseases both internally and externally; the leaves are employed as a substitute for tea, and locally for skin-diseases; a decoction of the flowers is said to be useful in diabetes and nocturnal emissions; the seeds are employed in diabetes and rheumatism, and a powder made from them is insufflated into the eye in ophthalmia; the gum is used in the preparation of astringent confections. The whole plant is astringent, refrigerant, and alterative, and a powder made from a mixture of the root, bark, leaves, flowers, and pods, with honey is considered a specific in diabetes. The plant is said to be used also in gout and diabetes. ["Indian Med. Gaz.," Jan., 1887, p. 3 (B); B, 93, 172, 180, 270.]—**C. bacillaris** [Linnæus]. An arborescent species growing in Mexico, South America, and the West Indies. The pods are said to resemble those of *C. fistula* and to be substituted for them. [B, 88, 180, 270, 282; G. Bentham, *l. c.* (B).]—**C. bacillus** [Gärtner]. See *C. javanica* (1st def.). [B 212.]—**C.-bark.** See *C. lignea* and *Chinese* cinnamon.—**C.-bark tree.** A name given to several species of *Cinnamomum* furnishing c. lignea. [B, 275.]—**C. biflora.** 1. Of Linnæus, a shrubby species growing in South America and the West Indies, where the root is used in syphilis. 2. Of Miller, a plant referred to the genus *Æschynomene.* [B, 88, 173, 180, 282; G. Bentham, *l. c.* (B).]—**C'blumen** (Ger.). See *Flores cassiæ.*—**C. bonplandiana** [De Candolle]. The *C. fistula.* [B, 88; G. Bentham,

l. c. (B).]—**C. bracteata** [Linnæus fil.]. The *C. alata.* [B, 212.]—**C. brasiliana** [Lamarck]. The *c. grandis.* [B, 106, 214; G. Bentham, *l. c.* (B).]—**C. brevipes** [De Candolle]. A Central American species. The leaflets, which are occasionally exported, resemble those of *C. angustifolia*, but have an obtuse apex and three parallel longitudinal veins. They are not purgative. [B, 81.]—**C. Brewsteri** [F. Müller]. Cigar c., Queensland laburnum; an Australian species. [B, 219, 275.]—**C. Buchanani** [Kostel]. A species closely related to (perhaps identical with) *C. obovata.* [B, 180.]—**C.-buds.** See *Flores cassiæ.*—**C. Burmanni** [Wight]. The *C. obovata.* [B, 212.]—**C. cana.** Of Nees, a tropical American species; of Mender, a species now referred elsewhere. [Bentham, *l. c.* (B).]—**C. canescens** [Humboldt, Bonpland, Kunth]. The *C. emarginata.* [B, 60.]—**C. caracasana** [Jacquin]. The *C. hirsuta.* [B, 180; G. Bentham, *l. c.* (B).]—**C. caryophyllata.** The bark of *Dicypellium caryophyllatum* and of *Syzygium caryophyllæum.* The name is also applied, erroneously, to the bark of *Pimenta acris.* [B, 180.]—**C. cathartica** [Martius]. A Brazilian species, The leaves are used like those of senna. [B, 173, 180; G. Bentham, *l. c.* (B).]—**C. chamæcrista.** 1. Of Linnæus, the partridge-pea; a species growing in the West Indies and in the Atlantic United States. The leaves are purgative, and the plant is used as an antidote to the poison of the *Apocynaceæ.* 2. Of Swartz, the *C. nictitans.* [B, 34, 88, 173, 180, 282.]—**C. chamæcrista caribæa** [Linnæus]. The *C. glandulosa.* [B, 282.]—**C. chinensis.** 1. Of Jacquin, the *C. sophora.* 2. Of the pharmacists, see *C. lignea* and *Chinese* CINNAMON. [B, 180, 212.]—**C. chrysophylla** [Richard]. The *C. emarginata.* [B, 282.]—**C. cinnamomea** [Gr. Ph.]. See *C. lignea* and *Chinese* CINNAMON.—**C. coccinea** [Wallich]. The *C. absus.* [B, 212.]—**C. confectiva.** See *Conserva cassiæ.*—**C. conspicua** [Vogel]. The *C. siberiana.* [G. Bentham, *l. c.* (B).]—**C. contorta** [Vogel]. The *C. tora.* [B, 250.]—**C. coromandeliana** [Jacquin]. The *C. sophora.* [B, 212.]—**C. cribrata.** The pulp of *C. fistula.* [B, 200.]—**C. crotalarioides** [Kunth]. A species growing in Mexico and South America. The leaves are said to have properties like those of senna-leaves. [B, 60, 180; G. Bentham, *l. c.* (B).]—**C. cuneifolia** [Vogel]. See *C. viscosa.*—**C. decipiens** [Desvaux]. The *C. angustifolia.* [B, 88, 173; G. Bentham, *l. c.* (B).]—**Cassiæ flores.** See *Flores cassiæ.*—**C. Ehrenbergii** [Bischoff]. The *C. angustifolia.* [G. Bentham, *l. c.* (B).]—**C. elliptica** [Humboldt, Bonpland, Kunth]. The *C. emarginata.* [B, 60.]—**C. elongata** [Lemaire]. The *C. angustifolia*, especially the variety furnishing Indian senna. [B, 5, 106.]—**C. emarginata** [Linnæus]. A West Indian arborescent species. The leaves are employed like senna-leaves, and the pods are said to be used like those of *C. fistula.* [B, 173, 180, 282.]—**Cassiæ pulpa** [Br. Ph.]. Fr., *pulpe de casse* [Fr. Cod.]. Ger., *Cassienmus, Cassienmark.* Syn.: *pulpa cassiæ* [Austr. Ph.] (seu *e fructu cassiæ* [Fr. Cod.]), *c. extracta.* C.-pulp; the sweetish mucilagiuous pulp surrounding the seeds in the pods of *C. fistula*, forming the active cathartic principle of the latter. The *pulp of c. for enemata* of the Palat. Disp., 1764, was made of a handful each of the leaves of the beet, mallow, mercurialis, parietaria, and violet, and violet-flowers and 30 oz. of water, boiled down to 20 oz., enough c.-pulp being then added to make the whole of the consistence of honey; to every 12 parts of this compound 18 of cassonade were added, and the whole was then boiled down to the consistence of an electuary. [B, 5, 113, 119.]—**C. esculenta** [Roxburgh]. The *C. sophera.* [B, 212.]—**C. excelsa.** 1. Of Humboldt, Bonpland, and Kunth, the *C. fistula.* 2. Of Schrader, a tropical American species. [G. Bentham, *l. c.* (B).]—**C. exigua** [Roxburgh]. The *C. absus.* [B, 212.]—**C. extracta.** See *Cassiæ pulpa.*—**C. extracta cum foliis sennæ.** An old preparation resembling confection of senna. [B, 200.]—**C. falcata** [Linnæus]. A Brazilian species having properties like those of *C. occidentalis;* identified with the latter by Bentham. [B, 180; G. Bentham, *l. c.* (B).]—**C. fastigiata** [Vahl]. The *C. glauca.* [B, 212.]—**C. ferruginea** [Schrader]. A tropical American species. [B, 88, 214; G. Bentham, *l. c.* (B).]—**C. fistula.** Gr., **κασίας σῦριγξ** (1st def.), **κασία αἰθιοπικὰ** (1st def.). Fr., *casse officinale* [Fr. Cod.] (2d and 3d defs.). Ger., *Röhrencassie, Purgircassie.* It., *c. in canna, c. fistola.* Sp., *caña fístula.* 1. Anciently, a quilled bark resembling cinnamon-bark. 2. Of Linnæus, the pudding-pipe tree, purging c.; indigenous to the East Indies and naturalized in various parts of Asla, in Egypt, and in tropical America. Its fruit forms long, brown, cylindrical woody pods divided into numerous compartments, each containing a single seed imbedded in a blackish or brownish pulp (the only part official in the Br. Ph.). The pods are sometimes used as a laxative, the seeds are ground and used for poultices, and the bark, which is very astringent, is employed in tanning and in the preparation of a sort of catechu. 3. Of the U. S. and Austr. Ph's, the fruit of *C. fistula.* [B, 18, 95, 172, 180.]—**C. fistula alexandrina** [Ray], **C. fistula chaiarxambar vocata** [Alp.], **C. fistula purgatrix,** etc. The *C. fistula.* [B, 200.]—**C. fistuloides.** 1. Of Colladon, the *C. fistula* (2d. def.). 2. Of the pharmacists, the *C. fistula* (3d def.). [G. Bentham, *l. c.* (B); B, 60, 119, 180, 214.]—**C. fistulosa prima.** The *C. fistula.* [B, 200.]—**C. florida.** The *C. siamea.* [B, 212.]—**C. fœtida.** 1. Of Salisbury, the *C. tora.* 2. Of Persoon, the *C. occidentalis.* [B, 212.]—**C. frutescens** [Miller]. The *C. sophora.* [B, 212.]—**C. fruticosa** [Miller]. The *C. bacillaris.* [G. Bentham, *l. c.* (B).]—**C. fulgens** [Macfad]. The *C. biflora* (1st def.). [B, 282.]—**C. gallinaria** [Colladon]. The *C. tora.* [G. Bentham, *l. c.* (B); B, 88, 173, 212.]—**C. geminiflora** [Moç. and Sessé]. The *C. biflora* (1st def.). [B, 60.]—**C. gigantea** [Berter.]. The *C. siamea.* [B, 282.]—**C. glandulosa** [Linnæus]. Dutchman's butter; a very variable Jamaica species. [B, 275, 282.]—**C. glauca** [Lamarck]. A tall tree of the East Indies and Australasia; said to be diuretic and to be used in gonorrhœa, the root and leaves being also employed in gout and the bark in diabetes. [B, 173, 180, 212, 282.]—**C. glutinosa.** See *C. lignea.*—**C. Græcorum.** See CANELLA *zeylanica.*—**C. grandis** [Linnæus fil.]. Fr., *casse du Brésil* [Fr. Cod.]. A tree of the West Indies and South America. The fruit is used like that of *C. fistula*, but the pulp is more nauseous and bitter. [B, 5, 60, 95, 180.]—**C. herpetica** [Jacquin]. The *C. alata.* [B, 180, 212.]—**C. hirsuta.** 1. Of Linnæus, a species indigenous to Brazil, the Caribbee islands, and Mexico; used medicinally like *C. occidentalis.* 2. Of Velloz, the *C. cathartica.* [B, 60, 88, 180, 282.]—**C. Horsfieldii** [Miquel]. The *C. glauca.* [B, 212.]—**C. humboldtiana** [De Candolle]. The *C. spectabilis.* [B, 60.]—**C. humilis** [Colladon]. The *C. tora.* [B, 212.]—**C. javanica.** 1. Of Linnæus, a species indigenous to the Malay islands, resembling *C. fistula* medicinally. 2. Of Velloz, the *C. ferruginea.* 3. Of Sieber the *C. sieberiana.* [G. Bentham, *l. c.* (B); B, 173, 212.]—**C. kunthiana** [Chamisso and Schlechtendahl]. The *C. tagera.* [B, 60.]—**C. læta** [Humboldt]. A tropical American species belonging to the section *Cathartocarpus.* [G. Bentham, *l. c.* (B); B, 88.]—**C. lanceolata.** Ger., *lanzettblättrige Cassie.* 1. Of Royle, the *C. angustifolia.* 2. Of Forskål, in part, the *C. sophera.* 3. Of Colladon and Nectoux, the *C. acutifolia.* [G. Bentham, *l. c.* (B); B, 106.]—**C. leiandra** [Bentham]. The mari-mari of the lower Amazon, related to *C. moschata.* [G. Bentham, *l. c.* (B).]—**C. lenitiva** [Bischoff]. The *C. acutifolia.* [Bentham, *l. c.* (B); B, 106.]—**C. lignea.** Fr., *casse en bois.* Ger., *Holzcassie, Cassienholz.* Syn.: *xylocassia, cortex cassiæ ligneæ.* A name formerly applied probably to the twigs and branches of some species of *Cinnamomum;* afterward to the bark of various species of *Cinnamomum*, especially the bark now known as Chinese cinnamon, and to the less esteemed varieties of cinnamon-bark exported from Calcutta, Java, etc. It was formerly thought to be derived from a particular species, the *Laurus c.* of Linnæus, but this is now known not to be the case. C. lignea presents many different varieties, which, especially the inferior grades, are distinguished from Ceylon cinnamon by their greater thickness, their less agreeable aroma, etc. [B, 18, 81, 180.] Cf. *Chinese* CINNAMON.—**C. lignea jamaicensis.** The bark of *Canella alba.* [B, 18.]—**C. ligustrina.** 1. Of Linnæus, a shrubby West Indian and Guiana species. The leaves are used like senna-leaves. 2. Of Miller, the *C. obovata.* 3. Of Forskål, the *C. sophora.* [B, 180, 282.]—**C. ligustrinoides** [De Candolle]. Of Schrank, the *C. angustifolia.* [G. Bentham, *l. c.* (B).]—**C. longisiliqua** [Linnæus fil.]. A West Indian species, perhaps *C. biflora.* [B, 282.]—**C. malabarica.** See *C. lignea.*—**C. marginata** [Roxburgh]. Horse-c.; a medicinal species growing in Ceylon and India. [B, 106, 172, 212.]—**C. mari-mari** [Aublet]. The *C. biflora* (1st def.). [G. Bentham, *l. c.* (B).]—**C. marylandica** [Linnæus]. American (or wild) senna; a species common in all parts of the United States, except the extreme north; a perennial herb from 3 to 6 feet high. The leaflets have a faint odor and nauseous taste, contain a principle resembling cathartin, and are used like senna-leaves, but are somewhat less active. [B, 5, 180.]—**C. medica** [Forskål], **C. medicinalis** [Bischoff]. The *C. angustifolia.* [B, 81.]—**C. mellis.** An old preparation of c. containing honey as a preservative; used for enemata. [A, 325.]—**C. mollis** [Vahl]. The *C. grandis.* [G. Bentham, *l. c.* (B); B, 180.]—**C. moschata.** Fr., *petite casse* [Fr. Cod.] (1st def.). Sp., *caña fístula de purgar* (1st def.). 1. Of Humboldt, Bonpland, and Kunth, a tree of Central and South America, from 30 to 40 feet high. The pods (*fructus cassiæ moschatæ*) closely resemble those of *C. fistula;* crushed and heated, they smell like sandal-wood. 2. Of Bentham, the *C. leiandra.* [G. Bentham, *l. c.* (B); B, 18, 88, 106.]—**C. nictitans** [Linnæus]. The wild sensitive plant, sensitive pea; a species growing in the Eastern United States and in the West Indies. It contains

THE CASSIA MARYLANDICA. [A, 327.]

tannic acid, resin, dextrin, sugar, gum, and a cathartic principle. [B, 34, 282; "Am. Jour. of Pharm.," June, 1888, p. 280 (B).]—**C. nigra.** 1. Of Celsus, the *Rosmarinus officinalis.* 2. The *C. fistula.* [B, 45, 200.]—**C. nitida** [Richard]. The *C. apoucouita.* [B, 214.]—**C. nodosa** [Roxburgh]. A species by some identified with *C. javanica*, but separated by Hooker. [B, 42, 212.]—**C. obcordata** [Swartz]. A variety of *C. biflora* with emarginate leaflets. [B, 282.]—**C. obovata** [Colladon], **C. obtusa** [Roxburgh], **C. obtusata** [Hayne]. Ger., *Samencassie.* Syn.; *Senna obtusa* [Roxburgh]. The Aleppo (or Italian) senna-plant, indigenous to Egypt, Abyssinia, Tripoli, Senegal, and other parts of Africa, also to Arabia and Syria, and cultivated in Italy, Spain, and the West Indies; a low plant with obovate, very obtuse or mucronulate leaflets in pairs of five, six, or seven. Several varieties are distinguished, according to the shape of the leaflets and differences in the inflorescence and fruit. It furnishes a variety of Alexandrian senna,

being the *senna baladi* (wild senna) of the Arabs, and is recognized in the Br. Ph., but is now very rarely found in commerce and is regarded as inferior to the senna furnished by *C. acutifolia.* [B, 5, 81, 106, 180, 212.]—**C. obtusifolia** [Linnæus]. The *C. tora.* [B, 88, 173, 212, 250.]—**C. occidentalis** [Linnæus]. Syn.: *Senna occidentalis* [Roxburgh]. Stinking-weed, stinking-wood; a species indigenous to tropical America and the East Indies. The root (*fedegoso-root*) is used in Brazil as an alexipharmac and in abdominal fluxions and dropsy; the bark (*fedegoso, fedegoso-bark*) is employed as a febrifuge; the ovate-lanceolate leaflets are purgative and are used in hysteria and herpetic affections and in making emollient poultices; and the flattish ovate seeds, said to be emetic, are used in skin diseases, also, roasted, as an adulterant of coffee or as a substitute for it, under the name of *negro* (or *mogdad*) *coffee.* [B, 81, 106, 180, 212.]—**C. oil.** See *Oil of c.*—**C. orientalis** [Persoon]. A species in part identified with *C. acutifolia.* [G. Bentham, *l. c.* (B).]—**C. ovata** [Mérat]. The *C. æthiopica.* [B, 5.]—**C. palmata** [Wallich]. The *C. timoriensis.* [B, 212.]—**C. planisiliqua.** 1. Of Lamarck, the *C. glauca.* 2. Of Linnæus, the *C. occidentalis.* [B, 173, 250, 282.]—**C.-plant.** The *Cinnamomum c.* [B, 281.]—**C. Plumieri** [De Candolle]. The *C. glauca.* [B, 282.]—**C.-pods.** The legumes of *C. fistula.* [B, 5.]—**C. poetica.** The *Osyris alba.* [B, 88.]—**C. preciosa.** The bark of *Mespilodaphne preciosa.* [B, 106.]—**C. propinqua** [Humboldt, Bonpland, Kunth]. The *C. glandulosa.* [B, 60.]—**C. pubemla** [Humboldt, Bonpland, Kunth]. The *C. bacillaris.* [B, 60.]—**C. pubescens** [R. Brown]. Syn.: *Senna pubescens* [Batka]. A species with oval, obtuse, mucronate leaflets, pubescent on both surfaces, sometimes substituted for Mecca senna. [B, 81.]—**C. pulchella** [Salisbury]. The *C. chamæcrista.* [B, 60.]—**C.-pulp.** See *Cassiæ pulpa.*—**C. purgatrix** [J. Bauhin]. The *C. fistula.* [B, 200.]—**C. purpurea** ["Bot. Reg."]. Syn.: *Senna purpurea* [Roxburgh]. The *C. sophera*, var. *purpurea*, with purplish branches. [B, 212.]—**C. racemosa** [Miller]. A tropical American species by some identified with *C. emarginata.* [G. Bentham, *l. c.* (B); B, 173.]—**C. ramiflora** [Vogel]. The *C. apoucouita.* [B, 42.]—**C. ramosissima** [Humboldt, Bonpland, Kunth]. The *C. glandulosa.* [B, 60.]—**C. reflexa** [Salisbury]. The *C. marylandica.* [G. Bentham, *l. c.* (B).]—**C. rhombifolia** [Roxburgh]. The *C. fistula.* [B, 212.]—**C'rinde** (Ger.). See *C. lignea* and *Chinese* CINNAMON.—**C. Roxburghii** [De Candolle]. The *C. marginata.* [B, 212.]—**C. sabak.** Fr., *casse sabak.* An Egyptian species. [B, 173, 250.]—**C. Schimperi** [Steudel]. The *C. pubescens.* [B, 81.]—**C. senna** [Linnæus]. A species corresponding in part to *C. obovata;* by some made to include also *C. acutifolia.* [G. Bentham, *l. c.* (B); B, 106, 212.]—**C. sensitiva** [Jacquin], **C. sericea** [Swartz]. An annual undershrub of Central and South America and the West Indies. The juice of the leaves is said to be used for inflammations about the anus and in the legs. [B, 60, 88, 173, 282.]—**C. siamea** [Lamarck]. Syn.: *Senna sumatrana* [Roxburgh]. Iron-wood; an arborescent species indigenous to the East Indies and naturalized in Jamaica. [G. Bentham, *l. c.* (B); B, 212, 282.]—**C. sieberiana** [De Candolle]. Fr., *casse de Sieber.* A Senegambia and Sierra Leone species, closely allied to *C. fistula.* The root is said to be purgative. [B, 88, 173, 250.]—**C. siliquosa.** See *C. fistula* (3d def.).—**C. smaragdina** [Macf.]. The *C. nictitans.* [B, 282.]—**C. solutiva** [Mont.]. The *C. fistula.* [B, 180, 200.]—**C. sophora** [Linnæus]. Syn.: *Senna sophora* (et *esculenta*) [Roxburgh]. An erect annual tropical herb, closely related to *C. occidentalis.* The pods and seeds (which are rich in tannin) are used in dyeing black; the young leaves are eaten; the bruised leaves and the root (especially the root-bark) are used externally in Egypt and the East Indies in skin and liver diseases; the bark and the seeds are employed in diabetes. [B, 106, 172, 173, 180, 212.]—**C. speciosa.** 1. Of Roxburgh, a variety of *C. glauca.* 2. Of Humboldt, Bonpland, and Kunth, the *C. spectabilis.* 3. Of Schrader, a tropical American species. [G. Bentham, *l. c.* (B); B, 60, 212.]—**C. spectabilis** [De Candolle]. A tree of Jamaica, Trinidad, and tropical South America. [B, 60, 88, 180, 282.]—**C.-stick tree.** The *C. fistula.* [B, 282.]—**C. suffruticosa** [Wallich]. A suffruticose variety of *C. glauca.* [B, 212.]—**C. sulfurea** (seu **sulphurea**) [De Candolle]. The *C. glauca.* [B, 282.]—**C. sumatrana** [Roxburgh]. Syn.: *Senna sumatrana* [Roxburgh]. The *C. siamea.* [B, 212.]—**C. sunsub** [Forskål]. The *C. tora.* [G. Bentham, *l. c.* (B).]—**C. surattensis** [Burmann]. The *C. glauca.* [B, 212.]—**C. Swartzii** [Wickstr.]. A variety of *C. glandulosa.* [B, 282.]—**C. syringodes, C. syrinx.** See *C. fistula* (3d def.).—**C. tagera.** Of Linnæus, an East Indian species said to be used like *C. tora* for skin diseases, insect-stings, etc. The plant employed medicinally is, however, possibly not the Linnæan species, but the *C. taura* of Lamarck and of Colladon, now identified with *C. tora.* [B, 173, 180.]—**C. tala** [Desvaux]. The *C. tora.* [G. Bentham, *l. c.* (B).]—**C. Thonningii** [De Candolle]. The *C. absus.* [G. Bentham, *l. c.* (B).]—**C. timoriensis** [De Candolle]. A species growing in India, Ceylon, and the East Indies, said to be medicinal. [B, 106, 212.]—**C. tomentosa.** Of Linnæus, a tropical African species; of Wallich, the *C. hirsuta.* [Bentham, *l. c.* (B).]—**C. tora** [Linnæus], **C. toroides** [Roxburgh]. Syn.: *Senna tora* (et *toroides*) [Roxburgh]. The *tagara* of the Malays; an annual Indian herb. The leaves are used as an aperient for children and are applied to ulcers, to itching eruptions, and, in poultices, to pustules. They are also applied to parts stung by insects, especially bees, and are occasionally used as an adulterant of senna-leaves. The root is used topically in ringworm, and the seeds are employed in making a blue dye. The plant is also used in gout and other painful joint affections and in sciatica. [B, 172, 180, 212.]—**C. triflora** [Jacquin]. The *C. chamæcrista.* [B, 60.]—**C. Trinitatis.** 1. Of Reichenbach, the *C. spectabilis.* 2. Of Bentham, the *C. racemosa.* [G. Bentham, *l. c.* (B); B, 282.]—**C.-twigs.** The branches of various species of *Cinnamomum* (probably of those furnishing c. lignea). [B, 18.]—**C. venenifera** [Rodschied]. The *C. hirsuta.* [B, 282.]—**C. vera.** The cheaper kinds of cinnamon, containing more mucilage than Chinese cinnamon. [B, 5, 18.]—**C. viscosa** [Schumann and Thonning, Macf.]. The *C. absus.* [B, 250, 282.]—**C.-wood.** See *C.-twigs.*—**C. xiphoidea** [Bertol.]. The *C. biflora.* [B, 60.]—**C.-Zimmt** (Ger.). The *Cinnamomum c.* [B, 270.]—**China c., Chinese c.** See *Chinese* CINNAMON.—**Cigar-c.** See *C. Brewsteri.*—**Cinnamon-c.** See *Chinese* CINNAMON.—**Clavelli cassiæ.** See *Flores cassiæ.*—**Clove-c.** The *Dicypellium caryophyllatum.* [B, 19, 275.]—**Confectio cassiæ** [Lond. Ph., 1824] (seu **cassiæ fistulæ**). Fr., *confection de casse.* Ger., *Cassienlatwerge.* Syn.: *electuarium cassiæ* [U. S. Ph., 1820, Dubl. Ph., 1836] (seu *cassiæ fistulæ* [Ed. Ph., 1826]). A mixture of pulp of c., pulp of tamarinds, and manna with syrup of roses [Lond. Ph., Ed. Ph.] or with syrup of orange [U. S. Ph., Dubl. Ph.]. Similar preparations were formerly official in other pharmacopœias. [B, 97.]—**Conserva cassiæ.** Fr., *conserve de casse* [Fr. Cod.]. A mixture of 2 parts each of c.-pulp and water and 5 of sugar, evaporated over a water-bath to 8 [Fr. Cod.]. Similar preparations, made with sugar alone or with syrup, sometimes flavored with violets or orange-flowers, were formerly official. [B, 95, 119.] See also *Confectio cassiæ.*—**Cortex cassiæ** (seu **cassiæ cinnamomeæ** [Finn. Ph.]). Chinese cinnamon-bark. [B, 180.]—**Decoctum cassiæ** (**pulpæ**) [Belg. Ph.] (seu **cassiæ fistulæ**). Fr., *tisane de casse* [Fr. Cod.]. A decoction made by boiling c.-pulp with 50 parts of water [Fr. Cod.] or with enough water to make 20 parts of liquid after straining. [B, 95, 97.]—**Egyptian c.** Ger., *ägyptische Cassie.* The *C. absus.* [B, 180.]—**Electuarium cassiæ** (seu **cassiæ fistulæ**, seu **cassiæ tamarindatum**). See *Confectio cassiæ.*—**Extractum cassiæ** [Fr. Cod., Belg. Ph.] (seu **cassiæ fistulæ**). Fr., *extrait de casse* [Fr. Cod.]. An extract made by macerating the pulp and seeds of *C. fistula* in cold water, straining, treating the residue with a second portion of water, mixing the two liquids, and evaporating to the consistence of a soft extract. [B, 95, 97.]—**Flores cassiæ** (seu **cassiæ immaturæ**). Ger., *Cassienblüthen, Zimmtblüthen, Zimmtkelche.* C.-buds; the unripe fruit of *Cinnamomum aromaticum* and other species of *Cinnamomum;* small, clove-like bodies consisting of a thick calyx inclosing a depressed ovary, of a cinnamon-like odor and taste. They contain tannin and a volatile oil (*oleum cassiæ*). [B, 18, 81, 95, 180.]—**Flos cassiæ.** See *Pulpa cassiæ.*—**Flowers of c.** See *Flores cassiæ.*—**Fructus cassiæ** [Belg. Ph.]. The fruit of *C. fistula.* [B, 95.]—**Horse-c.** The *C. marginata.* [B, 275.]—**Lignum cassiæ.** See *C. lignea.*—**Malabar c., Manilla c.** Varieties of c. lignea imported respectively from Malabar and Manilla. [B, 281.]—**Maryland c.** The *C. marylandica.* [B, 275.]—**Mauritius c.** See *Chinese* CINNAMON.—**Medulla cassiæ.** See *Pulpa cassiæ.*—**Oil of c.** Lat., *oleum cassiæ* (seu *cinnamomi* [U. S. Ph., in part], seu *cinnamomi cassiæ*). Fr., *essence* (ou *huile volatile*) *de cannelle de Chine.* Ger., *Zimmtcassienöl.* Chinese oil of cinnamon, a volatile oil distilled from the bark of Chinese cinnamon; darker and somewhat heavier than oil of Ceylon cinnamon and of a less agreeable taste and odor. [B, 5, 81.]—**Oleum cassiæ.** 1. See oil of c. 2. The volatile oil of flores cassiæ. [B, 81, 180.]—**Oleum cassiæ cinnamomeæ destillatum** (seu **cassiæ veræ**). See *Oil of c.*—**Oleum florum cassiæ.** See *Oleum cassiæ* (2d def.).—**Poets' c.** See *C. poetica.*—**Pulpa cassiæ.** See *Cassiæ pulpa.*—**Pulpa cassiæ depurata.** C.-pulp purified for medicinal use. [B, 270.]—**Pulpa cassiæ fistulæ** (seu **e fructu cassiæ** [Fr. Cod.]), **Pulp of c., Pulp of c. for enemata.** See *Cassiæ pulpa.*—**Purging c., Purgirc'** (Ger.), **Rohrc'** (Ger.), **Röhrenc'** (Ger.). The *C. fistula.* [B, 270.]—**Semen cassiæ** (seu **cassiæ immaturæ**). See *Flores cassiæ.*

CASSIACEÆ (Lat.), n. f. pl. Ka^{2}s(ka^{3}s)-si^2-a(a^3)'se^2(ke^2)-e(a^3-e^2). Of Link, an order of the *Leguminosæ*, comprising *Gleditschia, Cæsalpinia, Guilandina, Hæmatoxylon, Tamarindus, Cassia, Hymenæa, Myroxylon*, etc.; divided by Reichenbach into the *Geoffroyeæ* (in a later classification, the *Sophoreæ*), *Ceratonieæ*, and *Cæsalpinieæ.* [B, 170.]

CASSIÆ (Lat.), n. f. pl. Ka^{2}s(ka^{3}s)'si^2-e(a^3-e^2). Fr., *cassiées.* Of Adanson, a section of the *Leguminosæ*, comprising *Bauhinia, Cassia, Hæmatoxylon, Bonduc, Moringa, Sophora, Entada, Mimosa, Acacia, Gleditschia, Tamarindus*, etc. [B, 170.]

CASSIALA, n. An old name for the *Hyssopus officinalis.* [Adanson (B, 88, 121).]

CASSIBOR, n. An old name for coriander. [L, 94.]

CASSIDA (Lat.), n. f. Ka^{2}s(ka^{3}s)'si^{2}d-a^3. Fr., *casside.* Lit., a helmet; an old name for *Scutellaria galericulata;* of Tournefort, the genus *Scutellaria.* [B, 121, 200.]—**C. palustris vulgatior, flore cæruleo**, etc. [Tournefort, Boerhaave, *et al.*]. The *Scutellaria galericulata.* [B, 200.]

CASSIDÆ (Lat.), n. f. pl. Ka^{2}s(ka^{3}s)'si^{2}d-e(a^3-e^2). Fr., *cassidaires.* A family of the *Phytophaga.* [L, 121.]

CASSIDBOTT, n. An old name for coriander. [B, 200.]

CASSIDEOUS, adj. Ka^{2}s-i^{2}d'e^2-u^{3}s. Lat., *cassideus.* Helmet-shaped. [B, 19, 121.]

CASSIDIDÆ (Lat.), n. f. pl. Ka^{2}s(ka^{3}s)-si^{2}d'i^{2}d-e(a^3-e^2). See CASSIDÆ.

CASSIDINÆ (Lat.), n. f. pl. Ka^{2}s(ka^{3}s)-si^{2}d-i(e)'ne(na^3-e^2). A subfamily of the *Coleoptera.* ["Proc. of the Zool. Soc.," 1885, p. 280 (L).]

CASSIDONY, n. Ka^{2}s'i^2-don-i^2. Lat., *cassidonium.* Fr., *cassidoine.* The *Lavandula stœchas* and the *Gnaphalium uliginosum.* [B, 275.]—**Golden c.** The *Helichrysum stœchas.* [B, 275.]

CASSIDULIDA (Lat.), **CASSIDULIDÆ** (Lat.), n's n. pl. and f. pl. Ka^{2}s(ka^{3}s)-si^{2}d-u^{2}l(u^{4}l)'i^{2}d-a^3, -e(a^3-e^2). A family of the *Proboscidiferæ.* ["Proc. of the Zool. Soc.," 1853, p. 35 (L); L, 121, 173.]

CASSIDULINA (Lat.), n. n. pl. Ka^{2}s(ka^{3}s)-si^{2}d-u^{2}l(u^{4}l)-in(en)'-a^3. Fr., *cassidulines.* A family of the *Textularidea.* [L, 121.]

CASSIE (Fr.), n. Ka^{2}s-se. The *Acacia farnesiana.* [B, 38, 121.]

CASSIE (Ger.), n. Ka^{3}s's'si^2-e^2. See CASSIA.—**Aegyptische C.** The *Cassia absus.* [B, 180.]—**C'nfistel.** The *Cassia fistula.* [L, 80.]—**C'nmark, C'nmus.** See CASSIÆ *pulpa.*—**C'npfeifen.** See

CASSIA *fistula* (3d def.).—**C'nrinde.** See CASSIA *lignea*.—**C'n-röhrlein.** See CASSIA *fistula* (3d def.).—**C'nzimmt.** See *Chinese* CINNAMON.—**C'nzimmt-Lorbeer.** The *Persea cassia*. [L, 80.]—**Fisetc'.** The fruit of *Cassia fistula*. [B, 180.]—**Geflügelte C.** The *Cassia alata*. [B, 180.]—**Holzige C'nrinde.** See CASSIA *lignea*.—**Kleine amerikanische Röhrenc'.** The fruit of *Cassia bacillaris*. [B, 180.]—**Lanzettblätterige C.** The *Cassia lanceolata*. [B, 180.]—**Nelkenc'.** See CASSIA *caryophyllata*.—**Purgirc', Röhrc'n.** The fruit of *Cassia fistula*. [B, 180.]—**Röhrenc'.** The *Cassia fistula*. [B, 180.] See also the major list.—**Samenc'.** The *Cassia obovata*. [B, 180.]—**Spitzblättrige C.** The *Cassia acutifolia*. [B, 180.]

CASSIEÆ (Lat.), n. f. pl. Ka^{2}s(ka^{3}s)-si(si^{2})'e^{2}-e(a^{3}-e^{2}). Fr., *cassiees*. 1. Of Brown, a tribe of the *Leguminosæ* (*Rectembryeæ*), comprising the *C. subregulares* (including *Gleditschia*, *Prosopis*, *Hæmatoxylon*, *Ceratonia*, etc.) and the *C. irregulares* (including *Gymnocladus*, *Guilandina*, *Cæsalpinia*, *Tamarindus*, *Cassia*, *Hymenæa*, *Bauhinia*, etc.). 2. Of Bentham and Hooker and of Baillon, a tribe of the *Leguminosæ* (*Cæsalpinieæ*), comprising *Cassia*, *Ceratonia*, etc. [B, 42, 121, 170.]

CASSIER (Fr.), n. Ka^{2}s-i^{2}-a. 1. The *Acacia farnesiana*. 2. The *Cassia fistula*. [B, 38, 121.]—**C. des Poitevins.** The *Ribes nigrum*. [B, 38, 121.]—**C. franc.** The *Cassia fistula*. [B, 38.]—**Graines de c.** In the Mauritius, the seeds of *Cassia sophora*. [B, 106.]

CASSIN, n. Ka^{2}s'i^{2}n. Fr., *c.*, *cassine*. A principle extracted from *Cassia fistula*. [B.]

CASSINA (Lat.), n. f. Ka^{2}s(ka^{3}s)-si(se)'na^{3}. Of C. Bauhin, a plant, probably the *Ilex vomitoria*. [B, 88, 121.]

CASSINE (Lat.), n. f. Ka^{2}s(ka^{3}s)-si(se)'ne(na). Fr., *cassiné*. Of Linnæus, a genus of South African shrubs of the order *Celastrineæ*, tribe *Celastreæ*, subtribe *Euonymeæ*. [B, 42.]—**C. capensis** [Linnæus]. A Cape of Good Hope species. The variety β *colpoon* [De Candolle] is the *lapelhout*, or *ladlewood*, of the Cape. [B, 19. 263.]—**C. caroliniana** [Lamarck]. The *Ilex vomitoria*. [B, 173.]—**C. colpoon** [Thunberg]. The *C. capensis*, var. *colpoon*. [B, 263.]—**C. gongonha** [Martius]. The *Myginda* (or perhaps *Ilex*) *gongonha*. [B, 180.]—**C. maurocenia** [Linnæus]. The *Maurocenia capensis*. [B, 263.]—**C. peragua** [Linnæus, Miller], **C. vera** [Catesby]. The *Ilex vomitoria*. [B, 173, 180.]

CASSINE (Fr.), n. Ka^{2}s-en. 1. The *Cantharellus cibarius*. [B, 173.] 2. Cassin. [B.]

CASSINIACEÆ [Schultz] (Lat.), n. f. pl. Ka^{3}s-sen'i^{2}-a(a^{3})'se^{2}-(ke^{2})-e(a^{3}-e^{2}). From the name of *A. cassini*, a French botanist. The *Compositæ*. [B, 121, 170.]

CASSINIEÆ (Lat.), n. f. pl. Ka^{3}s-sen-i(i^{2})'e^{2}-e(a^{3}-e^{2}). 1. Of Cassini *et al.*, a subdivision of the *Compositæ* (*Gnaphalieæ*), comprising *Cassinia*, etc. 2. Of G. Don, a tribe of the *Celastraceæ*, consisting of the genus *Cassine*. [B, 121, 170.]

CASSINOIDES (Lat.), adj. Ka^{3}s-sen-o(o^{2})-id(ed)'ez(as). From *Cassine* (*q. v.*), and εἶδος, resemblance. Resembling the *Cassine* (a botanical species name). [B.]

CASSIOBERRY, CASSIOBERRY-BUSH, n's. Ka^{2}s'i^{2}-o-be^{2}r-i^{2}. The *Viburnum lævigatum* (seu *obovatum*). [B, 19, 116, 275.]

CASSION (Fr.), n. Ka^{3}s-i^{2}-o^{2}n^{2}. See CATION.

CASSIPOUREÆ (Lat.), n. f. pl. Ka^{2}s(ka^{3}s)-si^{2}-pur'e^{2}-e(a^{3}-e^{2}). Fr., *cassipourées*. Syn.: *Macarisieæ* [H. Baillon]. A tribe, section, or division of the *Rhizophoraceæ* [Meissner], *Montinieæ* [Reichenbach], or *Loganiaceæ* [Lindley]. [B.]

CASSIRY, n. A fermented drink made from maize in South America. [B, 38.]

CASSIS (Lat.), n. f. Ka^{2}s(ka^{3}s)'si^{2}s. Gen., *cas'sidis*. In botany, see GALEA.

CASSIS (Fr., Ger.), n. Ka^{2}s-e, ka^{3}s'ses. The *Ribes nigrum* and its fruit; also its expressed juice fermented and aromatized. [B, 121; "Am. Jour. of Pharm.," July, 1888, p. 336 (B).]—**C'thee** (Ger.). The leaves of *Ribes nigrum*. [B, 270.]—**Rob de c.** (Fr.). See *Rob* RIBESIORUM *nigrorum*, under RIBES.—**Sirop de c.** (Fr.). See *Syrupus* RIBESIORUM *nigrorum*, under RIBES.

CASSITE (Fr.), n. Ka^{2}s-et. See CASSYTHA.

CASSITÉRIDES (Fr.), n. pl. Ka^{2}s-e-tar-ed. From κασσίτερος, tin or pewter. Of Ampère, a class of metals, including tin, antimony, zinc, and cadmium. [A, 301; B, 38.]

CASSITERITE, n. Ka^{2}s-i^{2}t'e^{2}r-it. Fr., *cassitérite*. A native oxide of tin. [B, 38.]

CASSITEROS (Lat.), n. m. Ka^{2}s(ka^{3}s)-si^{2}t'e^{2}r-o^{2}s. Gr., κασσίτερος. Tin or pewter. [A, 318; L, 94.] See STANNUM.

CASSOB (Ar.), n. An alkaline salt. [L, 84.]

CASSOLETA, n. A kind of moist fumigation. [P. Morellus (A, 325).]

CASSOLETTE (Fr.), n. Ka^{2}s-ol-e^{2}t. The *Hesperis matronalis*. [B, 121.]

CASSOMBA, CASSOMBO, n's. 1. In the East Indies, names for various tinctorial plants, especially *Carthamus tinctorius*. 2. In the Banda Islands, the envelope of the fruit of *Sterculia balanghas*. [B, 88, 121.]—**Cassomba-caiappa.** A reddish variety of the cacao-nut. [B, 88, 121.]—**Cassomba-kling, Cassomba-kting.** In Java, the *Bixa orellana*. [B, 88, 121.]

CASSON (Fr.), n. Ka^{2}s-o^{2}n^{2}. 1. Powdered or broken glass. 2. A sort of bread made with fine sugar. 3. A fragment of cacao. [B, 38.]

CASSONADE (Fr.), n. Ka^{2}s-on-a^{3}d. Cane-sugar. [A, 301.]—**C. blanche.** Sugar partially bleached, but not wholly refined. [A, 385.]—**C. brute.** Crude sugar. [A, 385.]

CASSONIC ACID, n. Ka^{2}s-o^{2}n'i^{2}k. Fr., *acide cassonique*. A dibasic acid, $C_6H_8O_7$, formed by the action of nitric acid on gluconic acid. [B, 3.]

CASSOOMBO, n. See CASSOMBA.

CASSOONDA, n. In Languedoc, the *Equisetum fluviatile*. [B, 121.]

CASSOUMBA, n. See CASSOMBA (2d def.).

CASSOUS, adj. Ka^{2}s'u^{3}s. See CASSUS.

CASSU, n. The better sort of catechu furnished by the *Areca catechu*. [B, 180.]

CASSUÉJOULS (Fr.), n. Ka^{2}s-su^{6}-a-zhul. A place in the department of Aveyron, France, where there is an alkaline chalybeate spring. [A, 385; L, 49.]

CASSUMUNAR, CASSUMUNIAR, n's. Ger., *C.-Ingwer*. The *Zingiber c.* [B, 116, 121.]

CASSURE (Fr.), n. Ka^{2}s-u^{6}r. The appearance presented by a body on fracture; also a fracture. [A, 301; B, 52.]

CASSUS (Lat.), adj. Ka^{2}s(ka^{3}s)'su^{3}s(su^{4}s). Gr., κενός, φροῦδος, μάταιος, λαπαρός. Empty (said of abortive organs, such as sterile stamens, fruits that do not produce seeds, etc.). [B, 121.]

CASSUTA (Lat.), n. f. Ka^{2}s(ka^{3}s)-su^{2}t(sut)'a^{3}. Fr., *cassute*. See CUSCUTA and CASSYTHA.

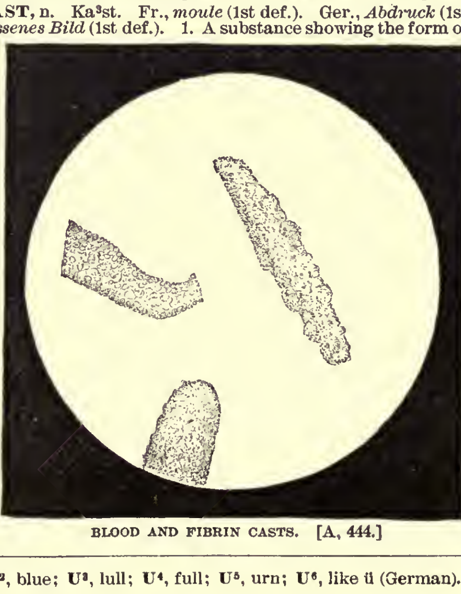
CASSUTHA [Fuchs] (Lat.), n. f. Ka^{2}s(ka^{3}s)-su^{2}th(suth)'a^{3}. See CUSCUTA.—**Herba cassuthæ.** The herb of *Cuscuta europæa*. [B, 180.]—**Herba cassuthæ minoris.** The herb of *Cuscuta epithymum*. [B, 180.]

CASSUVIÆ (Lat.), n. f. pl. Ka^{2}s(ka^{3}s)-su^{2}(su)'vi^{2}(wi^{2})-e(a^{3}-e^{2}). Of Jussieu and R. Brown, see ANACARDIEÆ.

CASSUVIEÆ (Lat.), n. f. pl. Ka^{2}s(ka^{3}s)-su^{2}(su^{4})-vi(wi^{2})'e^{2}-e-(a^{3}-e^{2}). Fr., *cassuviées*. Of Reichenbach, a division of the *Terebinthaceæ*, corresponding to the tribe *Anacardieæ* or the order *Anacardiaceæ*; divided by Reichenbach into the *Spondiaceæ*, *Lentisceæ*, and *Anacardieæ*, and by Bartling into the *Anacardieæ* and *Sumachineæ*. [B, 170.]

CASSUVIUM [Lamarck] (Lat.), n. n. Ka^{2}s(ka^{3}s)-su^{2}(su)'vi^{2}(wi^{2})-u^{3}m(u^{4}m). Fr., *cassuvion*. See ANACARDIUM.—**C. pomiferum** [Lamarck]. See ANACARDIUM *occidentale*.

CASSYTA (Lat.), **CASSYTEÆ** [Nees *et al.*] (Lat.), n's f. and f. pl. Ka^{2}s(ka^{3}s)-sit(su^{6}t)'a^{3}, -e^{2}-e(a^{3}-e^{2}). See CASSYTHA and CASSYTHEÆ.



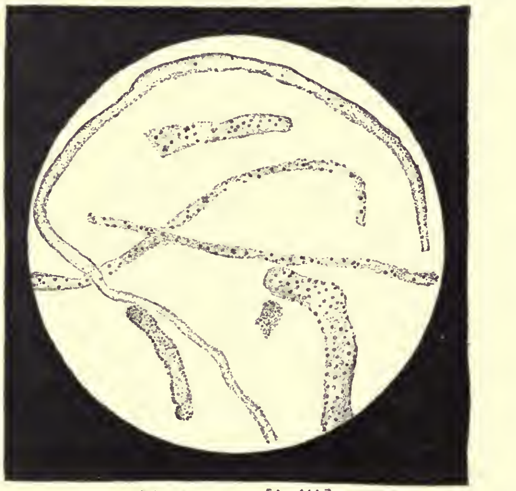
CASSYTHA (Lat.), n. f. Ka^{2}s(ka^{3}s)-si^{2}th(su^{6}th)'a^{3}. Fr., *cassythe*. 1. Of Gesner, see CUSCUTA. 2. Of Linnæus, a genus of tropical climbing laurinaceous parasitic herbs. [B, 19, 42, 121.]—**C. americana** [Nees]. A South American species, identified by Bentham with *C. filiformis*. [B, 214, 219.]—**C. aphyila** [Räuschel]. The *C. filiformis*. [B, 173.]—**C. cuscutiformis** [F. Müller]. An Australian species; according to Meissner, identical with *C. filiformis*. The drupes are edible. [B, 19, 214.]—**C. filiformis** [Linnæus]. A species growing on the branches of trees in India; used to flavor buttermilk, to make a cooling drink for feverish patients, as a remedy for gonorrhœa, especially for ardor urinæ, as a hair-wash, and as an application to inflamed eyes and old ulcers. [B, 19, 172, 173, 180.]—**C. guineensis** [Schumacher, Thonning]. An African species, identified by Bentham with *C. filiformis*. [B, 214, 219.]

CASSYTHACEÆ (Lat.), n. f. pl. Ka^{2}s(ka^{3}s)-si^{2}th(su^{6}th)-a(a^{3})'-se^{2}(ke^{2})-e(a^{3}-e^{2}). Of Gardner and of Lindley, an order of the daphnal alliance, corresponding to the *Cassytheæ*. [B, 170.]

CASSYTHEÆ (Lat.), n. f. pl. Ka^{2}s(ka^{3}s)-si^{2}th(su^{6}th)'e^{2}-e(a^{3}-e^{2}). A division or tribe of the *Lauraceæ*, consisting of the genus *Cassytha*. [B, 42, 170.]

CAST, v. tr. Ka^{3}st. To shed, get rid of, expel (*e. g.*, the hair, the teeth, the contents of the stomach or of the uterus); to throw (an animal) into a suitable posture for examination or operation.

CAST, n. Ka^{3}st. Fr., *moule* (1st def.). Ger., *Abdruck* (1st def.), *gegossenes Bild* (1st def.). 1. A substance showing the form of some



BLOOD AND FIBRIN CASTS. [A, 444.]

body to which it has been applied, or some cavity in which it has been contained, while in a plastic state. 2. A litter or brood of young animals. 3. Of the eye, see Strabismus.—**Albumino-fatty c.** Fr., *cylindre albumino-graisseux.* A urinary c. consisting of fatty and albuminous matter; found after phosphorus poisoning. [α, 18.]—**Blood-c.** Fr., *moule sanguin.* Ger., *Blutcylinder.* A renal c. made up of coagulated blood-plasma, sometimes containing enough blood-corpuscles to appear dark and opaque. [A, 444; L, 319.]—**Bronchial c.** A c. of a bronchus or a bronchial tube. [L, 20.]—**Corkscrew c.** See *Spiral c.*—**Epithelial c.** A renal c. containing or made up of epithelium. [L, 319.]—**False c.** Syn.: *cylindroid.* A c.-like substance, such as a shred of mucus, found in urine; frequently mistaken for a true renal c. [A, 444.]—**Fatty c.** A renal c. containing oil drops, free or contained in epithelial cells. [L, 319.]—**Fibrinous c.** Fr., *moule* (ou *cylindre*) *fibrineux.* Ger., *fibrinöser Cylinder.* A c. consisting of fibrinous matter. [L, 20.]—**Granular c.** Fr., *cylindre granuleux.* Ger., *granulöser Cylinder.* A renal c. having a granular appearance, generally from granular degeneration of epithelium, blood, etc. [L, 319.]—**Hyaline c.** Fr., *cylindre hyalin.* Ger., *hyaliner Cylinder.* A renal or testicular c. of a structureless, translucent appearance, probably due to the coagulation of an albuminous body. [A, 444; L, 20.]—**Icteric hyaline c.** Fr., *cylindre hyalin ictérique.* A hyaline c. found in the urine of jaundiced patients when it contains little or no albumin. [α, 18.]—**Mucoid c., Mucous c.** Fr., *cylindre muqueux.* A false c. consisting of mucus or mucin. [α, 18; A, 444; L, 319.]—**Oil-c.** See *Fatty c.*—**Pus-c.** A renal c. containing pus cells. [L, 313.]—**Renal c.** Fr., *cylindre rénal.* Ger., *Nierencylinder.* A c. of a uriniferous tubule. [L, 20.]—**Spiral c.** Fr., *cylindre en tire-bouchon.* A urinary c., generally hyaline, twisted or convoluted upon itself, presumably by its passage from Henle's loops into the larger collecting tubes. [α, 18.]—**Transparent c.** See *Hyaline c.* and *Waxy c.*—**Urinary c.** Fr., *moule* (ou *cylindre*) *urinaire.* Ger., *Harncylinder.* A c. of some portion of the urinary passages, especially of a uriniferous tubule. [L, 20, 319.]—**Testicular c.** A hyaline c. found in the urine occasionally in spermatorrhœa, sometimes a little broader than renal hyaline c's, but otherwise not distinguishable from them. [A, 444.]—**Tube-c.** See *Renal c.*—**Uric-acid c.** A renal c. consisting of uric acid; found in the urine of new-born infants. [A, 444.]—**Waxy c.** Fr., *cylindre cireux.* Ger., *Wachscylinder.* A form of renal c. resembling melted wax; distinguished from the hyaline c. by its high refractive power. [A, 444; L, 319.]—**Worm c's.** See *Worm* castings.

Epithelial and mixed casts. [A, 444.]

False casts. [A, 444.]

Finely granular casts. [A, 444.]

Waxy casts. [A, 444.]

CASTAGNA (Fr.), **CASTAGNE** (Fr.), **CASTAGNIÉ** (Fr.), n's. Ka^{2}st-a^{3}n-ya^3, -y', -yi^2-a. Provincial names for the *Castanea vesca.* [B, 88, 121.]—**Castagne cavalline.** The *Æsculus hippocastanum.* [B, 121.]

CASTAL (Ar.), n. The *Castanea vulgaris.* [B, 88, 121.]

CASTALIA (Lat.), n. f. Ka^{2}st(ka^{3}st)-al(a^{3}l)'i^2-a^3. Gr., **κασταλία.** Fr., *castalie.* Of Salisbury, the genus *Nymphœa;* of De Candolle, a section of that genus. [B, 121.]—**C. cærulea** [Trattinick]. The *Nymphœa cœrulea.* [B, 173.]—**C. magnifica** [Salisbury]. The *Nymphœa rubra.* [B, 180.]—**C. mystica** [Salisbury]. The *Nymphœa lotus.* [B, 173.]—**C. pudica** [Salisbury]. The *Nymphœa odorata.* [B, 173.]—**C. scutifolia** [Salisbury]. The *Nymphœa cœrulea.* [B, 173.]—**C. speciosa** [Salisbury]. The *Nymphœa alba.* [B, 173.]

CASTALTICUS (Lat.), adj. Ka^{2}s(ka^{3}s)-ta^{2}lt(ta^{3}lt)'i^{2}k-u^{3}s(u^{4}s). See Catastalticus.

CASTANAR DE IBOR (Sp.), n. Ka^{3}s-ta^{3}n-a^{3}r' da e-bor'. A place in Spain, where there is a chalybeate spring containing magnesium sulphate. [L, 49.]

CASTANEA (Lat.), n. f. Ka^{2}s(ka^{3}s)-tan(ta^{3}n)'e^2-a^3. Gr., **κάστανον, κάρυον καστανaικόν.** Fr., *châtaignier* (1st def.). Ger., *Kastanie* (1st def.). It., *castagno.* Sp., *castaña, castaño.* 1. The chestnut-tree (*C. vulgaris*); hence, of Gärtner, a genus of the *Cupuliferœ* (tribe *Quercineœ*). 2. Of the U. S. Ph., the leaves of *C. vulgaris.* [B, 5, 42.]—**C. alnifolia** [Nuttall]. The *C. pumila,* var. *β nana.* [B, 214.]—**C. americana.** The American variety of *C. vulgaris.* [B, 173, 180.]—**C. aquatica.** Ger., *Wasserkastanie.* Sp., *castaña de agua.* Of the pharmacists, the *Trapa natans;* in the pl., *castaneœ aquaticœ,* its fruit. [B, 180.]—**C. argentea** [Blume]. The *Castanopsis argentea.* [B, 180, 214.]—**C. bungeana** [Blume]. The *C. vulgaris.* [B, 214.]—**C. chinensis.** 1. Of Spren-

gel, the *Fagus c.* 2. Of Hasskarl, the Japanese variety of *C. vulgaris.* [B, 180, 214.]—**C. chrysophylla** [Hooker]. The *Castanopsis chrysophylla.* [B.]—**C. cornuta.** See *C. aquatica.*—**C. edulis.** See *C. vulgaris.*—**C. equina.** The *Æsculus hippocastanum* and its fruit. [B, 97.]—**C. fagus** [Scopoli]. The *Fagus silvatica.* [B, 24.]—**C. indica** [Roxburgh]. The *Castanopsis indica.* [B, 214.]—**C. japonica** [Blume]. The *C. vulgaris.* [B, 214.]—**C. javanica** [Blume]. The *Castanopsis javanica.* [B, 214.]—**C. malabarica angelina dicta ansjeli.** See Artocarpus *hirsutus.*—**C. martabanica** [Wallich]. A variety of *Castanopsis argentea.* [B, 214.]—**C. montana** [Blume]. A variety of the *Castanopsis javanica.* [B, 214.]—**C. nana** [Muhlenberg]. The *C. pumila*, var. *β nana.* B, 214.]—**C. palustris.** See *C. aquatica.* —**C. pumila** [Miller]. The chinquapin; a shrub of the Middle and Southern United States. The bark is astringent. The variety *β nana* is an undershrub. [B, 34, 214.]—**C. sativa** [Miller]. The *C. vulgaris.* [B, 214.]—**C. sloanea** [Miller]. The *Sloanea dentata.* [B, 173, 180.]—**C. tungurrut** [Blume]. The *Castanopsis tungurrut.* [B. 180, 214.]—**C. vesca** [Gärtner]. The *C. vulgaris.* [B, 214, 245.]—**C. vesca americana** [Persoon]. The American variety of *C. vulgaris.* [B, 173.]—**C. vulgaris** [Lamarck]. Fr., *châtaignier.* Ger., *Kastanienbaum.* It., *castagno.* Sp., *castaña, castaño.* The chestnut-tree, probably originally indigenous to Asia. A. De Candolle describes six varieties. The var. *β sativa* grows in the south of France; the var. *γ americana* is the American chestnut-tree; the others grow in Japan. The American variety bears smaller but sweeter nuts than those of the European species. The latter (Spanish chestnut) is a somewhat important article of food in Italy. The bark and inner bark of the tree are astringent, and the latter has been used in dysentery. The leaves (*folia castaneæ*, the c. of the U. S. Ph.), collected when they are green in early autumn, contain tannin, and are used as an astringent and as a remedy for whooping-cough. The burs give with sulphate of iron a dark-brown dye, and, burned, furnish a lampblack employed in painting. [B, 19, 34, 81, 173, 214.]—**Extractum castaneæ fluidum** [U. S. Ph.]. A preparation made by exhausting 100 parts by weight of the leaves of *C. vulgaris* with water by decoction and percolating, evaporating the mixed decoction and percolate, adding 30 per cent. of alcohol, filtering, evaporating to 80 parts by volume, and adding enough alcohol to make 100 parts by volume. [B, 95.]—**Folia castaneæ.** The leaves of *C. vulgaris.* [B, 95.]—**Fructus castaneæ.** The fruit of *C. vulgaris.* [B, 180.]

THE CASTANEA PUMILA. [A, 327.]

THE CASTANEA VULGARIS. [A, 327.]

CASTANEACEÆ (Lat.), n. f. pl. Ka^{2}s(ka^{3}s)-ta^{2}n(ta^{3}n)-e^2-a-(a^3)'se^2(ke^2)-e(a^3-e^2). Fr., *castaneacées.* 1. Of Link, a group of plants corresponding to the *Hippocastaneæ* of De Candolle. 2. Of H. Baillon, see Castaneæ (1st def.). [B, 121, 170.]

CASTANEÆ (Lat.), n. f. pl. Ka^{2}s(ka^{3}s)-tan(ta^{3}n)'e^2-e(a^3-e^2). Fr., *castanées.* 1. Of Adanson, a family of plants, including *Betula, Carpinus, Corylus, Quercus, Castanea, Liquidambar, Populus, Salix, Cannabis, Urtica, Morus, Ficus, Dorstenia, Platañus, Celtis, Ulmus*, etc., now referred to the *Cupuliferæ, Salicineæ, Platanaceæ*, and *Urticaceæ* (in its widest sense); thus corresponding in great part to the *Amentaceæ* of Jussieu. The *C.* of Necker comprised *Mercurialis* (of the *Euphorbiaceæ*), *Urtica, Humulus, Salix, Quercus, Corylus, Carpinus, Betulus, Fagus*, and *Populus.* H. Baillon, adopting the name *Castaneaceæ*, includes under it the series *Betuleæ, Coryleæ*, and *Quercineæ* (all comprised in the *Cupuliferæ*), and the *Balanopseæ, Leitnerieæ*, and *Myricaceæ.* 2. Of Prantl, a tribe of the *Fagaceæ*, comprising *Castanea, Pasania*, and *Quercus.* [B, 121, 170; Prantl (B, 245).]

CASTANEOUS, adj. Ka^{2}s-tan'e^2-u^{3}s. Lat., *castaneus.* Fr., *castané, marron.* Ger., *kastanienbraun.* See Badious.

CASTANICARPUS (Lat.), adj. Ka^{2}s(ka^{3}s)-ta^{2}n(ta^{3}n)-i^2-ka^{3}rp'-u^{3}s(u^{4}s). From *κάστανον*, the chestnut, and *καρπός*, a fruit. Having fruit like the chestnut. [B, 214.]

CASTANIE (Ger.), n. Ka^{3}st-a^{3}n-e'. See Castanea.—**C'nbaum.** See Castanea *vulgaris.*—**C'nbraun.** See Badious.—**C.-Roosen.** The fruit of *Mesua speciosa.* [B, 48.]—**Rossc'.** The *Æsculus hippocastanum.* [B.]

CASTANITES (Fr.), n. pl. Ka^{3}st-a^{3}n-et. Woody tuberosities on the roots of the chestnut-tree, the oak, or the elm. [B, 121.]

CASTANOCARPOUS, adj. Ka^{2}st-a^{2}n-o-ka^{3}rp'u^{3}s. From *κάστανον*, a chestnut, and *καρπός*, a fruit. Fr., *castanocarpe.* Having fruit like chestnuts. [B, 38.]

CASTANOPSIS (Lat.), n. f. Ka^{2}st(ka^{3}st)-a^{2}n(a^{3}n)-o^{2}ps'i^{2}s. Gen., *castanops'eos (-sis).* From *κάστανον*. a chestnut, and *ὄψις*, appearance. Of Spach, a genus of the *Cupuliferæ*, intermediate between *Quercus* and *Castanea*, often regarded as a section of *Castanea.* [B, 42, 121, 214, 245.]—**C. argentea** [A. De Candolle]. A Java species resembling *Castanea vulgaris* in properties and uses. [B, 121, 180, 214.]—**C. chrysophylla** [A. De Candolle]. A California species bearing an edible fruit. [B, 121, 214.]—**C. indica** [A. De Candolle]. A species growing in India. Its fruit is used like the common chestnut. [B, 121, 214.]—**C. javanica** [A. De Candolle]. A tree of Java. The fruit is employed like the ordinary chestnut. [B, 121, 214.]—**C. tungurrut** [A. De Candolle]. A Java species resembling *Castanea vulgaris* in properties and uses. [B, 180, 214.]

CASTANOPTEROUS, adj. Ka^{2}st-a^{2}n-o^{2}p'te^{2}r-u^{3}s. Lat., *castanopterus* (from *κάστανον*, a chestnut, and *πτέρυξ*, a wing). Fr., *castanoptère.* Having chestnut-colored wings or elytra. [L.]

CASTANOSPERMUM (Lat.), n. n. Ka^{2}st(ka^{3}st)-a^{2}n(a^{3}n)-o(o^2)-spu^{5}rm(spe^{2}rm)'u^{3}m(u^{4}m). From *κάστανον*, a chestnut, and *σπέρμα* a seed. Fr., *castanosperme.* Of Cunningham, a genus of leguminous plants of the tribe *Sophoreæ.* [B, 42.]—**C. australe** [Cunningham]. The Moreton Bay chestnut, indigenous to Australia and cultivated in India; seeds edible, but somewhat astringent. [B, 172.]

CASTEL-DORIA (It.), n. Ka^{3}s'te^{2}l-do-re'a^3. A place in Sardinia, where there are springs containing calcium sulphate. [L, 49.]

CASTELEÆ (Lat.), n. f. pl. Ka^{2}s(ka^{3}s)-te^{2}l'e^2-e(a^3-e^2). Fr., *castélées.* Of Bartling *et al.*, a division, tribe, or section of the *Ochnaceæ*, consisting of the genus *Castela.* [B, 170.]

CASTELJALOUX (Fr.), n. Ka^{2}st-e^{2}l-zha^{3}l-u. A place in the department of Lot-et-Garonne, France, where there are cold chalybeate springs. [A, 319; L, 49.]

CASTELLAMARE (It.), n. Ka^{3}st-e^{2}l-la^3-ma^3're^2. A place in Italy, near Naples, where there are numerous effervescent chalybeate and saline springs. [L, 49.]

CASTELLETTO ADORNO (It.), n. Ka^{3}st-e^{2}l-le^{2}t'to a^{3}d-orn'o. A place in Italy, near Acqui, where there is a saline and sulphurous spring. [L, 105.]

CASTELLETTO MASCAGNI (It.), n. Ka^{3}st-e^{2}l-le^{2}t'to ma^{3}s-ka^{3}n'ye. A place in Tuscany, where there are effervescent sulphurous and chalybeate springs. [L, 105.]

CASTELNUOVO (It.), n. Ka^{3}st-e^{2}l-nwo'vo. A place in Piedmont, where there is a sulphurous spring containing bromine and iodine. [L, 49.]

CASTÉRA-VERDUZAN (Fr.), n. Ka^{2}st-ar-a^3-ve^{2}rd-u^{6}z-a^{3}n^2. A place in the department of Gers, France, where there are sulphurous and chalybeate springs. [L, 49.]

CASTIGATUS (Lat.), adj. Ka^{2}st(ka^{3}st)-i^{2}g-at(a^{3}t)'u^{3}s(u^{4}s). From *castigare*, to gird. Repressed, confined, as by lacing (said of the breasts, the chest, etc.). [A, 318, 325.]

CASTIGLIONE (It.), n. Ka^{3}st-el-yi^2-on'a. See Ischia.

CASTIGLIONIA (Lat.), n. f. Ka^{3}st-el-yi^2-on'i^2-a^3. From *L. Castiglioni*, an Italian botanist. Fr., *castiglionie.* Of Ruíz and Pavón, a genus corresponding to the section *Curcas* of the genus *Jatropha.* [B, 42, 121.]—**C. lobata** [Ruíz and Pavón]. The *Jatropha curcas.* [B, 173.]

CASTILLANTONAXIHUITL (Mex.), n. The *Matricaria chamomilla.* [A, 447.]

CASTILLE (Fr.), n. Ka^{2}st-el-y'. See Castillier.

CASTILLEJEÆ [Bentham] (Lat.), **CASTILLEJIEÆ** [G. Don] (Lat.), n's f. pl. Ka^{3}st-el-ya'he^2-e(a^3-e^2), -ya-hi(hi^2)'e^2-e(a^3-e^2). From *Castillejo*, a Spanish botanist. A section or subtribe of the *Euphrasieæ*, comprising *Castilleja, Orthocarpus*, etc. [B, 170.]

CASTILLIER (Fr.), n. Ka^{2}st-el-ya. The *Ribes rubrum.* [B, 19, 38.]

CASTILLOA (Lat.), n. f. Ka^{3}st-el-lo'a^3. Of Cervantes, a genus of artocarpaceous plants of the subtribe *Olmedieæ*, indigenous to Central America and Cuba. [B, 42, 106, 121.]—**C. elastica** [Cervantes]. The rubber-tree of Central America. [B, 106, 121.]—**C. markhamiana** [Collins]. A Central American species furnishing rubber. [B, 5, 42, 81.]

CASTINE, n. Ka^{2}st'en. Fr., *c.* Ger., *Castin.* A bitter crystallizable base derived from the *Vitex agnus-castus.* [B, 93.]

CASTINGS, n. pl. Ka^{2}st'i^{2}n^{2}gz. The balls of hair, bones, feathers, etc., habitually vomited by birds of prey. [L, 221.]—**Worm-c's.** Cylindrical masses of earth ejected from the anus of earthworms. [L, 322.]

CASTLING, n. Ka^{3}st'li^{2}n^{2}g. See ABORTION (2d def.).

CAST-ME-DOWN, n. Ka^{3}st'me-du^{5}-u^{4}n. See CASSIDONY.

CASTNIADÆ (Lat.), **CASTNII** (Lat.), **CASTNIIDÆ** (Lat.), n's f., m., and f. pl. Ka^{2}st(ka^{3}st)-ni(ni^{2})'a^{2}d(a^{3}d)-e(a^{3}-e^{2}), ka^{2}st-(ka^{3}st)'ne^{2}-i(e), ka^{2}st(ka^{3}st)-ni(ni^{2})'-i^{2}d-e(a^{3}-e^{2}). A family of the *Lepidoptera heterocera.* [L, 121, 248.]

CASTOERI, n. In Java, the *Hibiscus suratensis* and the *Hibiscus abelmoschus.* [B, 121.]—**C.-mogari.** In the East Indies, the *Mogonum undulatum.* [B, 121.]

CASTOORIE-MUNJIL (Tamil), n. The *Curcuma zedoaria.* [B, 172.]

CASTOR (Lat.), n. m. Ka^{2}st(ka^{3}st)'o^{2}r(or). Gen., *cast'oris.* Gr., *κάστωρ* (1st, 2d, and 3d defs.). Fr., *c.* (1st def.), *castoréum* (2d def.). Ger., *Biber* (1st def.), *Bibergeil* (2d def.). It., *castoro* (1st def.), *castoreo* (2d def.). 1. Of Linnæus, the beaver, a genus of amphibious rodents. 2. Hence the substance, also called castoreum, consisting of the dried preputial follicles and their contents derived from several species of *C.* Two principal varieties, *American c.* and *Siberian c.*, are distinguished. The former is the kind official in most of the pharmacopœias, while some also order the latter, and the Fr. Cod. and Finn. Ph. leave it uncertain which kind is designated. C. is a stimulant and antispasmodic employed in hysteria, spasmodic affections, depression of the vital powers and similar conditions. 3. According to Adanson, Dioscorides's name for saffron (*Crocus*). 4. A corruption of *castus.* In composition, the *Ricinus communis* or *Vitex castus.* 5. In San Domingo, the name of an undetermined vine. [B, 115, 121.]—**American c.** Lat., *castoreum* [Br. Ph., Ger. Ph., Austr. Ph., Swiss Ph., Finn. Ph.], *castoreum americanum* (seu *canadense* [Belg. Ph., Dan. Ph., Norweg. Ph., Swed. Ph., Russ. Ph., Netherl. Ph.]). Fr., *castoréum d'Amérique, castoréum* [Fr. Cod.]. Ger., *amerikanische* (oder *canadische*) *Bibergeil.* It., *castoreo americano.* Sp., *castoreo* [Sp. Ph.]. Roum., *castoreu* [Roum. Ph.]. C. (2d def.) obtained from the American beaver (*C. americanus*). It is the variety of c. ordinarily met with in commerce and forms pairs of club-shaped, wrinkled, brownish sacs, seldom exceeding 4 oz. in weight, containing a somewhat glossy, brownish, friable substance of an aromatic odor and pungent bitter taste. It contains from 45 to 50 per cent. of substances soluble in alcohol (see *Tinctura* CASTOREI), including a resin, the crystalline castorin, and salicin. It also affords a volatile oil. See *Oil of* c. When fresh, c. is lighter in color and the contents of the sacs are unctuous. [B, 81, 95.]—**Axungia castoris.** Ger., *Biberfett.* According to some, the same as axungia castorei (*q. v.*, under CASTOREUM), but, more properly, beaver-fat, which may be employed medicinally like other animal fats. [B, 180.]—**Canadian c.** Lat., *castoreum canadense.* Fr., *castoréum du Canada.* Ger., *kanadisches Bibergeil* (oder *Castoreum*). See *American c.*—**C. americanus** [Cuvier]. The American beaver, usually regarded as only a variety of *C. fiber.* [B, 81, 95.]—**C.-beans.** See *C.-seeds.*—**C. canadensis** [Kuhl]. The *C. americanus.* [B, 81.]—**C. fiber** [Linnæus]. The beaver, a species of *C.* (1st def.) about 2 ft. long, inhabiting the north temperate zone of either hemisphere and living in burrows or houses built in streams. The European and Asiatic beaver is somewhat larger and of paler fur than the American variety, and furnishes Siberian c. [B, 81.]—**C. Galliæ** [Geoff.]. The European variety of the *C. fiber.* [B, 93.]—**C.-oil.** Lat., *oleum ricini* [U. S. Ph., Br. Ph., Ger. Ph.] (seu *e semine ricini* [Fr. Cod.]), *oleum palmæ Christi.* Fr., *huile de ricin* [Fr. Cod.]. Ger., *Ricinusöl. Castoröl.* It., *olio di ricino.* Sp., *aceite de ricino.* 1. A fixed oil obtained by expression from the seeds of *Ricinus communis.* It forms a viscid, transparent, pale-yellowish liquid of faint odor and oily taste, and of the sp. gr. of from 0·950 to 0·960. It is a mild and efficient purgative with a tendency to produce subsequent constipation, and is also said to be a galactagogue and emmenagogue. It is used locally to prevent alopecia. [B, 81.] 2. See OIL *of c.*—**C.-oil beans.** See *C.-seeds.*—**C.-oil plant.** The *Ricinus communis.* [B, 75, 172.]—**C. pills.** Pills each containing 2¾ grains of Russian c., 1¼ grain of succinic acid, and sufficient balsam of Peru to insure the proper consistence. [B, 200.]—**C.-sac.** Ger., *Kastorbeutel, Bibergeilsack.* The follicle which with its unctuous contents constitutes c. (2d def.). [B, 81, 180.]—**C.-seeds.** The seeds of *Ricinus communis.* [B.]—**C.-wood.** The *Magnolia glauca.* [B, 275.]—**Chalky Russian c.** A variety of Russian c. containing an excess of calcium carbonate. [B, 5.]—**Compound oil of c.** Fr., *huile de castoréum composée.* A preparation official in the Palat. Disp., 1764, made by taking 15 parts of castoreum, 7 each of cassia lignea, Arabian costus, saffron, cubebs, euphorbium, galbanum, opopanax, nardus indica, and storax, and 10 each of cyperus rotundus orientalis, sabine, long pepper, black pepper, pyrethrum, and schœnanthe, sprinkling the whole with a sufficient quantity of good wine, adding 1,080 parts of olive-oil, and, after leaving on the sand-bath for several days till the moisture is dissipated, expressing the residue. According to the Würtemb. Ph., it is made by taking 7 parts of castoreum, 9 each of pyrethrum, sabine, schœnanthe, long pepper, and black pepper, 7 each of nardus indica, cassia lignea, Arabian costus, cubebs, and saffron, and 180 each of white wine and olive-oil, and proceeding in the same way. [B, 119, 200 (*a*, 21).]—**English c.** See *American c.*—**European c., German c.** See SIBERIAN *c.*—**Huile de c.** (Fr.). See *C.-oil* (1st def.).—**Lozenges of c.** Fr., *tablettes de castoréum.* Troches each containing 1 part of c., 16 parts of white sugar, and a sufficiency of mucilage of tragacanth. [Austr. Ph., 1820 (B, 119).]—**Oil of c.** Fr., *huile volatile de castoréum* (1st def.). Ger., *ätherisches Oel des Castoreums* (1st def.), *ätherisches Bibergeilöl.* 1. A pale-yellow volatile oil obtained by distillation from c., and having its odor and taste. According to Pereira, it is derived from the salicin of the c. and is gradually itself converted into salicylic aldehyde. [B, 5, 81.] 2. See *Oleum* CASTOREI.—**Oleum castoris.** See *C.-oil.*—**Polish c., Prussian c., Russian c., Siberian c.** Lat., *castoreum* [Gr. Ph., Finn. Ph.], *castoreum sibiricum* [Ger. Ph., 1st ed., Hung. Ph., Netherl. Ph.] (seu *siberinum* [Belg. Ph.], seu *russicum* [Russ. Ph.], seu *muscoviticum* [Dan. Ph.]). Fr., *castoréum* [Fr. Cod.], *castoréum de Sibérie.* Ger., *siberisches* (oder *moskowitisches*, oder *russisches*) *Castoreum* (oder *Bibergeil*). C. obtained from the European or Asiatic beaver (*C. fiber*). It resembles the American c., but the sacs are less flattened and wrinkled and more globular than in the latter, are heavier (often weighing upward of 8 oz.), have more separable coats, and possess a stronger odor. It also contains from 60 to 70 per cent. of matter soluble in alcohol (see *Tinctura* CASTOREI). It is more valuable and of greater medicinal efficacy than American c., but rarely comes into commerce. Several varieties, distinguished from their origin as Russian, Polish, Prussian, and German c., differ in size and other particulars. [A, 81, 95, 180.]—**Spirit of c.** Fr., *esprit* (ou *alcoolat*) *de castoréum.* 1. See *Spiritus* CASTOREI *compositus.* 2. See *Aqua* CASTOREI *vinosa.*—**Tincture of c.** See *Tinctura* CASTOREI.

CASTOREATUS (Lat.), adj. Ka^{2}st(ka^{3}st)-or-e^{2}-at(a^{3}t)'u^{3}s(u^{4}s). Containing castor. [B, 97.]

CASTORATE, n. Ka^{2}st'o^{2}r-at. Lat., *castoras.* Fr., *c.* A salt of castoric acid. [B, 38.]

CASTOREINA (Lat.), n. f. Ka^{2}st(ka^{3}st)-or-e^{2}-in(en)'a^{3}. See CASTORIN.

CASTOREUM (Lat.), n. n. Ka^{2}st(ka^{3}st)-or(o^{2}r)'e^{2}-u^{3}m(u^{4}m). Gr., *καστόριον.* Fr., *c.* [Fr. Cod.], *castoréum.* Ger., *C.* See CASTOR (2d def.), *American* CASTOR and *Siberian* CASTOR.—**Aqua castorei** [Belg. Ph., 1854, Swiss Ph., 1876]. A preparation made by distilling 1 part of Canadian castor with sufficient water to make 250 parts of distillate [Belg. Ph.], or by distilling 8 parts of a mixture of 1 part of castor, 1 of alcohol, and a sufficiency of water [Swiss Ph.]. [B, 95 (*a*, 21).]—**Aqua castorei vinosa** [Gr. Ph., 1837, 1868, Bav. Ph., 1822]. Fr., *esprit* (ou *alcoolat*) *de castoréum.* A preparation made by macerating 1 part of Siberian castor and 6 parts of rue-leaves in 72 parts of sour wine, adding 72 parts of water, and distilling 72 parts of the mixture. [B, 95, 119 (*a*, 21).]—**Axungia castorei.** Fr., *axonge de castoréum.* Ger., *Bibergeilfett.* A fatty substance, sometimes, but less properly, called *axungia castoris*, derived from two oil-sacs present in the male beaver and opening into the cloaca near the castor-sacs. It was formerly official. [B, 10, 81, 180.]—**C. americanum, C. anglicum.** See *American* CASTOR.—**C. camphor.** Castorin. [L, 130.]—**C. canadense.** See *American* CASTOR.—**C. europæum, C. germanicum, C. moscoviticum, C. polonicum.** See *Siberian* CASTOR.—**C'resinoid** (Ger.). The resinous principle contained in castor. [B, 48, 180.]—**C. russicum, C. sibericum, C. siberinum, C. sibiricum, Deutsches C.** (Ger.). See *Siberian* CASTOR.—**Englisches C.** (Ger.). See *American* CASTOR.—**Essentia castorei.** See *Tinctura castorei.*—**Essentia castorei thebaica.** See *Tinctura castorei thebaica.*—**Europäisches C.** (Ger.). See *Siberian* CASTOR.—**Extractum castorei.** Fr., *extrait de castoréum.* Ger., *Bibergeilextrakt.* An extract made from castor by exhausting it with alcohol and evaporating the tincture so formed to the consistence of an extract [Bruns. Ph., 1777], or by boiling with water the residue left after exhaustion with alcohol, adding the decoction to the alcoholic extract, and evaporating. [Palat. Disp., 1764, Würtemb. Ph., 1798 (B, 119).]—**Kanadisches C.** (Ger.). See *American* CASTOR.—**Oleum castorei.** Fr., *huile* (ou *éléolé*) *de castoréum.* Ger., *Bibergeilöl.* A preparation made by digesting 2 parts of castor in 24 of olive-oil, with the addition of 4 of white wine [Sp. Ph., 1798] or of 1 part of solution of potassium carbonate [Sard. Ph., 1773 (B, 119).]—**Pinguedo castorei.** See *Axungia castorei.* [B, 180.]—**Polnisches C.** (Ger.), **Preussisches C.** (Ger.). See *Siberian* CASTOR.—**Pulvis castorei** (Fr. Cod.). See *Poudre de* CASTORÉUM.—**Russisches C.** (Ger.), **Sibirisches C.** (Ger.). See *Siberian* CASTOR.—**Spiritus castorei compositus.** Fr., *esprit de castoréum composé.* Spirit of castor; an old preparation consisting of 4 oz. of Russian castor, 1 oz. of flowers of lavender, ½ oz. each of sage and rosemary, 6 drachms of cinnamon, and 2 drachms each of mace and cloves, infused in 3 quarts of alcohol and then heated on a sand-bath until the alcohol is distilled off. [O, 1, 3.]—**Tinctura ætherea castorei** [Fr. Cod.]. See *Tinctura castorei ætherea.*—**Tinctura castorei** [Br. Ph., 1867, Ger. Ph.]. Fr., *teinture alcoolique* (ou *alcoolé*) *de castoréum, teinture de castoréum* [Fr. Cod.]. Ger., *Bibergeiltinctur.* A solution of 1 oz. (av.) of castor in 1 pint (imp.) of alcohol [Br. Ph.], or of 1 part of castor in 10 parts of alcohol [Fr. Cod., Ger. Ph., Dan. Ph., Belg. Ph., 1854], or in 5 parts of alcohol [Austr. Ph.], or of 1 oz. (Troy) of castor in 1 pint (apoth.) of alcohol [U. S. Ph., 1870]. Similar preparations containing 1 part of castor and from 4 to 16 parts of alcohol were official in a great number of old pharmacopœias. The Br. Ph. and Ger. Ph. direct the American castor to be used; the Belg. Ph. and Dan. Ph. have two tinctures, made, respectively, from the American and Siberian castor. The former preparation is much darker and of higher sp. gr. than the latter. [B, 10, 81, 95, 119 (*a*, 21).]—**Tinctura castorei ætherea.** Fr., *Teinture éthérée de castoréum* [Fr. Cod.], *éthérolé de castoréum.* Ger., *ätherische Bibergeiltinctur.* A solution of 1 part of castor in 10 parts of ether [Fr. Cod., Belg. Ph., 1854]. The Fr. Cod. directs American castor to be used; the Belg. Ph. orders two tinctures, made from American and Siberian castor respectively. Similar preparations, made with from 6 to 10 parts of ether, were formerly official. [B, 10, 113, 119 (*a*, 21).]—**Tinctura castorei alcalina.** Fr., *teinture alcaline de castoréum.* A preparation official in the Palat. Disp., 1764, the Russ. Ph., 1803, and the Turin Ph., 1773, made with 4 parts of c. and 1 part of aqueous solution of potassium carbonate. It is ground up, dried, reduced to powder, covered with alcohol to the depth of about twelve inches, and, several days later, filtered. [B, 119.]—**Tinctura castorei canadensis.** An alcoholic tincture of Canadian castor. See *Tinctura castorei.* [O, 4.]—**Tinctura castorei composita.**

Fr., *teinture de castoréum composée.* A preparation of the Amst. Ph., 1792, made up of 3 parts each of castor, myrrh, and olibanum, 16 of orange-peel, 8 each of peppermint, pennyroyal, and rue, 4 of savine, and 1 part of saffron digested in 288 parts of brandy. The Belg. Ph., 1823, ordered 1 part of castor to be digested with 8 parts of brandy and filtered, and the resulting tincture to be mixed with the product obtained by distilling 144 parts of a mixture of 1 part of the residue left after the first operation, 1 part each of savine, pyrethrum, catnip, pennyroyal, and sweet basil, 2 parts each of orange-peel and myrrh, 24 parts of grated bryony-root, 48 parts of brandy, and sufficient water. The Antwerp Ph., 1812, had the same formula, substituting, however, matricaria for the pyrethrum and adding 12 parts of rue. [B, 119 (α, 21).]—**Tinctura castorei sibirici.** An alcoholic tincture of Siberian castor. [B, 95 (α, 21).] See *Tinctura castorei.*—**Tinctura castorei thebaica.** Fr., *essence antihystérique, gouttes utérines, élixir utérin.* A preparation made by digesting 4 parts of asafœtida, 2 of ammonium carbonicum pyro-oleosum, 1 part of opium, and 8 parts of castor in 64 of brandy and filtering [Disp. fuldens, 1791, Lipp. Disp., 1794, Sax. Ph., 1837, Swed. Ph., 1817]. The Ferrara Ph., 1832, substituted oil of amber for the ammonium carbonicum pyro-oleosum. [B, 119 (α, 21).]—**Tinctura de castoreo ætherea** (Fr.). See *Tinctura castorei œtherea.*—**Tinctura de castoreo alcoolica** (Fr.). See *Tinctura castorei.*

CASTORÉUM (Fr.), n. Ka^{2}s-to-ra-u^{3}m. Castor (2d def.). [B, 113, 119.]—**Alcoolat de c.** See *Aqua* CASTOREI *vinosa.*—**Alcoolé de c.** See *Tinctura* CASTOREI.—**Alcoolé de c. safrané.** See ELIXIR *uterinum Crollii.*—**C. d'Amérique.** See *American* CASTOR.—**C. de Siberie.** See *Siberian* CASTOR.—**Eau d'hirondelles avec le c.** See *Aqua* HIRUNDINUM *cum castoreo.*—**Eau distillée de c.** See *Aqua* CASTOREI.—**Éléolé de c.** See *Oleum* CASTOREI.—**Esprit de c.** See *Aqua* CASTOREI *vinosa.*—**Esprit de c. composé.** See *Spiritus* CASTOREI *compositus.*—**Éthérolé de c.** See *Tinctura* CASTOREI *œtherea.*—**Extrait de c.** See *Extractum* CASTOREI.—**Huile de c.** See *Oleum* CASTOREI.—**Huile de c. composée.** See *Compound oil of* CASTOR.—**Poudre de c.** [Fr. Cod.]. Lat., *pulvis castorei* [Fr. Cod.]. American castor freed from the membranes of the pouch in which it is contained, dried in an oven at a temperature of 25° C., powdered in an iron mortar, and sifted through a silk sieve of 100 meshes to the inch (Fr.). [B, 113 (α, 21).]—**Tablettes de c.** See *Lozenges of* CASTOR.—**Teinture alcaline de c.** See *Tinctura* CASTOREI *alcalina.*—**Teinture alcoolique de c., Teinture de c.** [Fr. Cod.]. See *Tinctura* CASTOREI.—**Teinture de c. composée.** See *Tinctura* CASTOREI *composita.*—**Teinture éthérée de c.** [Fr. Cod.]. See *Tinctura* CASTOREI *œtherea.*

CASTORIC, adj. Ka^{2}st-o^{2}r'i^{2}k. Lat., *castoricus, castoreus, castorius.* Fr., *castorique.* Of or pertaining to castor (2d def.). [B.]—**C. acid.** Lat., *acidum castoricum.* Fr., *acide castorique.* Ger., *Castorinsäure.* An acid said to be contained in castor (2d def.). [B, 38.]

CASTORIDÆ (Lat.), n. f. pl. Ka^{2}st(ka^{3}st)-o^{2}r'i^{2}d-e(a^3-e^2). Fr., *castoridées.* A family of the *Sciuromorpha* having *Castor* as the type. [A, 385 ; L, 147, 253.]

CASTORIN, n. Ka^{2}st'o^{2}r-i^{2}n. Lat., *castoreina, castorina, castorinum.* Fr., *castorine.* Ger., *C., Bibergeilfett.* Syn.: *castoreum camphor.* A white, granular or crystalline, friable, waxy or fat-like substance, soluble with the aid of heat in water, in alcohol, and in the volatile and fatty oils ; derived from castor (2d def.) and said to be used for the same purposes. [B, 48, 119, 180.]—**C'säure** (Ger.). See CASTORIC *acid.*

CASTORINA (Lat.), n. f. sing. and n. pl. Ka^{2}st(ka^{3}st)-o^{2}r-in-(en)'a^3. 1. (Pl.) a family of the *Mammalia* including the genus *Castor.* [B, 180.] 2. (Fem. sing.) castorin. [B.]

CASTORIUM (Lat.), n. n. Ka^{2}st(ka^{3}st)-or(o^{2}r)'i^2-u^{3}m(u^{4}m). See CASTOREUM.

CASTORIUS (Lat.), adj. Ka^{2}st(ka^{3}st)-or(o^{2}r)'i^2-u^{3}s(u^{4}s). See CASTORIC.

CASTRALTIEÆ (Lat.), n. f. pl. Ka^{2}st(ka^{3}st)-ra^{2}l(ra^{3}l)-ti(ti^2)'-e^2-e(a^3-e). From *Castraltia*, one of the genera. Of Trevisan, a tribe of *Algæ* (*Actinothalamæ*). [B, 170.]

CASTRANGULA (Lat.), n. f. Ka^{2}st(ka^{3}st)-ra^{2}n^2(ra^{3}n^2)'gu^2-(gu^4)-la^3. The *Scrophularia nodosa.* [B, 121.]—**C. aquatica.** The *Scrophularia aquatica.* [B, 180.]

CASTRAT (Fr.), n. Ka^{2}s-tra^3. Ger., *C.* A castrated person. [A, 301 (α, 17).]

CASTRATE, v. tr. Ka^{2}s'trat. Lat., *castrare.* Fr., *châtrer.* Ger., *castriren.* To deprive of the testicles or ovaries, to emasculate, to geld. [α, 17.] Cf. CASTRATION.

CASTRATE, CASTRATED, adj's. Ka^{2}s'trat, -trat-e^{2}d. Gr., ὀρχοτομηθείς. Lat., *castratus.* Fr., *châtré.* Ger., *castrirt, verschnitten.* Deprived of the sexual germ-producing glands or organs ; also, of a flower, rendered incapable of self-fertilization by removal of the stamens. [B, 121.]

CASTRATION, n. Ka^{2}s-tra'shu^{3}n. Gr., σπαδωνισμός, ὀρχοτομία, εὐνουχισμός. Lat., *castratio.* Fr., *c., châtrure.* Ger., *Castriren, Castrirung.* The operation of removing the testicles (in females the ovaries). In botany, the removal of the stamens of a flower in order to prevent self-fertilization and to favor the production of hybrids by cross-fertilization. [Hegar, "Ctrlbl. f. Gynäk.," Oct. 29, 1887 ; "N. Y. Med. Jour.," Jan. 7, 1888, p. 21 ; B, 1.]—**C. complète** (Fr.). Removal of both testicles (or ovaries). [L, 41.]—**C. der Frauen** [Hegar] (Ger.), **C. des femelles** (Fr.), **C. féminine** (Fr.). Removal of the ovaries or of the ovaries and the uterus. [A. Martin (A, 319).] Cf. *Battey's* OPERATION, *Hegar's* OPERATION, and *Tait's* OPERATION.—**C. incomplète** (Fr.). Removal of one testicle (or ovary). [L, 41.]—**C. par arrachement** (Fr.). An operation for c. in which the spermatic cord is twisted by turning the testicle, at the same time drawing on it until it becomes separated from the cord. [A, 301 ; E, 24.]—**C. par bistournage** (Fr.). See BISTOURNAGE.—**C. par casseaux** (Fr.). An operation of c. in which, the testicles being exposed, the cords are elongated by traction and inclosed between two pieces of wood fastened together at the ends, so as to make pressure and shut off the circulation. [E, 24.]—**C. par le feu** (Fr.). An operation of c. in which the cords, being exposed, are cut between two forceps and the extremities then cauterized. [A, 301 ; E, 24.]—**C. par ligature** (Fr.). An operation of c. in which either the cords are isolated and tied, or else the whole scrotum is surrounded by a ligature and it and the included structures are allowed to slough away. [A, 301 ; E, 24.]—**C. par martelage** (Fr.). An operation of c. in which the integrity of the cord is destroyed, and subsequent atrophy in the testicle is caused, by striking the former while it is held against a resisting support. [E, 24.]—**C. par raclement** (**ou ratissement**) (Fr.). An operation of c. in which the cord is exposed and scraped until its integrity is destroyed. [A, 301 ; E, 24.]—**Female c.** See OOPHORECTOMY.

CASTRATURA (Lat.), n. f. Ka^{2}s(ka^{3}s)-tra^{2}t(tra^{3}t)-u^2(u)'ra^3. Castration. [Pliny (A, 318).]

CASTRATUS (Lat.), adj. Ka^{2}s(ka^{3}s)-trat(tra^{3}t)'u^{3}s(u^{4}s). Castrated ; as a n., a castrated male person. [A, 322, 325.]

CASTRENSIS (Lat.), adj. Ka^{2}s(ka^{3}s)-tre^{2}ns'i^{2}s. From *castra*, a camp. Pertaining to camps ; as a n., a camp-fever or dysentery, produced by the exhalations from waste matters imperfectly disposed of. [A, 325 ; L, 119.]

CASTROCARO (It.), n. Ka^{3}s-tro-ka^{3}r'o. A place in Tuscany, where there is a spring containing sodium chloride and a certain amount of iodine and bromine. [A, 385 ; L, 49.]

CASTRUM BORBONIENSE (Lat.), n. n. Ka^{2}st(ka^{3}st)'ru^{3}m-ru^{4}m) bo^{2}r-bon-i^2-e^{2}ns'e(a). See BOURBON L'ARCHAMBAULT. [L, 105.]

CASTU (Fr.), n. Ka^{3}st-u^6. An old term for a hospital. [L, 41.]

CASTURI-CAMALLA, n. In Iudia, the *Nenuphor.* [B, 121.]

CASTURIE-MUNJEL [Tamil], n. See CASTOORIE-MUNJIL.

CASUAL, adj. Ka^{2}z'u^2-a^{2}l. Lat., *casualis* (from *casus*, a chance occurrence). Fr., *casuel.* Ger., *zufällig.* Accidental (said of a case of infectious disease occurring accidentally as distinguished from one resulting from intentional inoculation).

CASUARACEÆ (Lat.), n. f. pl. Ka^{2}s(ka^{3}s)-u^2(u^4)-a^{2}r(a^{3}r)-a-(a^3)'se^2(ke^2)-e(a^3-e^2). Of Lindley, see CASUARINEÆ.

CASUARALES (Lat.), n. f. pl. Ka^{2}s(ka^{3}s)-u^2(u^4)-a^{2}r(a^{3}r)-al-(a^{3}l)'ez(e^{2}s). Of Lindley, an alliance of the *Rectembryæ*, comprising the order *Casuarineæ.* [B, 121.]

CASUARBAUM (Ger.), n. Ka^{3}z-u-a^{3}r'ba^3-um. The *Casuarina.* [B, 121.]

CASUARIDÆ (Lat.), n. f. pl. Ka^{2}s(ka^{3}s)-u^2(u^4)-a^{2}r(a^{3}r)'i^{2}d-e-(a^3-e^2). A family of the *Ratitæ.* [L, 228.]

CASUARIIDÆ (Lat.), n. f. pl. Ka^{2}s(ka^{3}s)-u^2(u^4)-a^{2}r(a^{3}r)-i(i^2)'-i^{2}d-e(a^3-e^2). A family of the *Megistanes.* [L, 121.]

CASUARIN, n. Ka^{2}s-u^2'a^{2}r-i^{2}n. A brown coloring principle contained in the bark of different species of *Casuarina.* [B, 245.]

CASUARINA (Lat.), n. f. Ka^{2}s(ka^{3}s)-u^2(u^4)-a^{2}r(a^{3}r)-in(en)'a^3. Said to be so called because its foliage resembles the plumage of the cassowary. Fr., *c., casuarine.* Of Forster, beef-wood ; a genus of plants constituting the order *Casuarineæ*, indigenous to Australia, New Caledonia, the East Indies, and the Fiji Islands. [B, 42, 121, 245.]—**C. distyla** [Ventenat]. An Australian species. The leaves, when chewed, are acidulous and refreshing. [B, 173.]—**C. equisetifolia** [Linnæus fil.], **C. indica** [Persoon]. The *filao* of the East Indies. The bark and branches are astringent. [B, 93, 121, 173.]—**C. litoralis** [Salisbury], **C. litorea** [Rumphius], **C. muricata** [Roxburgh]. The Tinian pine ; a tree growing in India. Its bark furnishes a brown dye, and is said to be given in infusion as a tonic. [B, 93, 172.]—**C. stricta** [Hortus kewensis]. The *C. distyla.* [B, 173.]—**C. torulosa** [Hortus kewensis]. An Australian species having the same properties as *C. distyla.* [B, 173.]

CASUARINACEÆ (Lat.), n. f. pl. Ka^{2}s(ka^{3}s)-u^2(u^4)-a^{2}r(a^{4}r)-i^{2}n-a(a^3)'se^2(ke^2)-e(a^3-e^2). Fr., *casuarinacées.* Of Lindley, an order of the amental alliance, corresponding to the *Casuarineæ* (*q. v.*). [B, 170, 245.]

CASUARINEÆ (Lat.), n. f. pl. Ka^{2}s(ka^{3}s)-u^2(u^4)-a^{2}r(a^{3}r)-i^{2}n'-e^2-e(a^3-e^2). Fr., *casuarinées.* Ger., *Casuarineen.* Of Mirbel *et al.*, an order of plants made for the single genus *Casuarina.* By the older and by some of the more recent authors they are placed in the *Amentaces* (*Amentales* [Lindley]). By Bentham and Hooker they are assigned to the series *Unisexuales* of the *Monochlamydeæ.* They are commonly known as the beef-wood family. [B, 42, 170, 245.]

CASUISTICS, n. sing. Ka^{2}z-u^2-i^{2}st'i^{2}ks. From *casus*, a case. Fr., *casuistique.* Ger., *Kasuistik.* The study or narration of histories of individual cases of disease with a view to throwing light on the general history of the disease.

CASUMUNIAR, n. See CASSUMUNIAR.

CASUS (Lat.), n. m. Ka(ka^3)'su^{3}s(su^{4}s). From *cadere*, to fall (1st def.), or happen (2d and 3d def's). Gr., πτῶσις (1st def.), συμβεβηκώς (3d def.). Fr., *chute* (1st def.), *cas* (3d def.). Ger., *Fall.* 1. A falling. [E.] See PROLAPSUS. 2. A disease or illness, or a symptom of one. [A, 318, 325 (α, 17).] 3. See CASE (1st def.).—**C. palpebræ superioris.** See BLEPHAROPTOSIS.—**C. uvulæ.** See STAPHYLŒDEMA.

CASUS (Ar.), n. The *Cistus ladaniferus.* [B, 88, 121.]

CASYANIE, n. In Languedoc, the *Castanea vulgaris.* [B, 121.]

CAT, n. Ka^{2}t. Gr., αἴλουρος. Lat., *catus, felis.* Fr., *chat.* Ger., *Katze.* It., *gatto.* Sp., *gato.* A name for various animals of the *Felidæ*, especially the *Felis domestica.* [A, 301.]—**Cat-ber-**

ries. The *Ribes grossularia.* [B, 275.]—**C.-brier.** The genus *Smilax.* [B, 19, 275.]—**Cat-chop.** The *Mesembryanthemum.* [B, 19.]—**C. claw.** The *Bignonia unguis.* [B, 282.]—**C.-cluke.** See *C.-lug.*—**C.-eyed.** Affected with c's-eye amaurosis (*q. v.*, under AMAUROSIS).—**C'gut.** See the major list.—**C.-in-clover.** The *Lotus corniculatus.* [B, 275.]—**C.-lug, C.-luke.** The *Primula auricula.* [B.]—**C.-mint, C'mint.** See the major list, also NEPETA *cataria.*—**C.-nap.** A very short sleep. [L, 56.]—**C'nep, C'nip.** See C'MINT and NEPETA *cataria.*—**C.-nut.** The *Bunium flexuosum.* [B, 275.]—**C.-o'nine-tails.** The *Typha latifolia.* [B, 275.]—**C's-claw, C's-claws.** 1. The *Anthyllis vulneraria.* 2. The *Lotus corniculatas.* 3. The *Dolichos filiformis.* 4. The *Bignonia unguis cati.* 5. The *Inga unguis cati.* [B, 19, 275.]—**C's-ear.** The *Hypochœris radicata* and the genus *Antennaria* (especially the *Antennaria dioica*). [B, 19, 275.]—**C's-eye.** See *C's-eye* AMAUROSIS.—**C's-foot.** 1. Ground ivy. 2. The *Nepeta glechoma.* 3. The *Antennaria dioica.* [B, 275.]—**C's-lug.** See *C.-lug.*—**C's-milk.** The *Euphorbia helioscopia.* [B, 275.]—**C's-paw creeper.** The *Bignonia unguis cati.* [B, 275.]—**C's purr.** See *Purring* TREMOR.—**C's-tail.** 1. The genus *Equisetum.* 2. The *Typha latifolia.* 3. The *Typha minor.* 4. The *Aconitum napellus.* 5. The *Phleum pratense.* 6. The *Echium vulgare.* 7. The *Amaranthus caudatus.* 8. The genus *Hippuris.* 9. The catkins of the *Corylus*, the *Salix*, or the *Juglans regia.* 10. A long, round substance that is found growing in winter upon nut-trees, pines, etc. [B, 19, 275.]—**C's-tail grass.** The *Phleum pratense.* [B, 19, 275.]—**C's-tongue.** The *Apargia serotina.* [B, 275.]—**C.-tail.** See *C's-tail.*—**C.-thyme.** The *Teucrium marum.* [B, 19.]—**C.-tree.** The *Euonymus europœus.* [B, 275.]—**C.-whin.** The *Genista anglica*, the *Rosa canina*, the *Rosa spinosissima*, and the *Ulex nanus.* [B, 275.]—**C.-wood.** See *C.-tree.*

CATABALAM, n. In India, the *Spondias amara.* [B, 81, 121.]

CATABANS (Lat.), adj. Ka^{2}t(ka^{3}t)'a^{2}b(a^{3}b)-a^{2}nz(a^{3}ns). See ECTOBATICUS.

CATABASIS (Lat.), n. f. Ka^{2}t(ka^{3}t)-a^{2}b(a^{3}b)'a^{2}s(a^{3}s)-i^{2}s. Gen., *catabas'eos (-ab'asis).* Gr., κατάβασις (from καταβαίνειν, to descend). Ger., *Hinabsteigen.* A going down, descent; of diseases, a decline. [A, 322.]

CATABATES, n. Truffles. [B, 121.]

CATABATICUS (Lat.), **CATABATUS** (Lat.), adj's. Ka^{2}t(ka^{3}t)-a^{2}b(a^{3}b)-a^{2}t(a^{3}t)'i^{2}k-u^{3}s(u^{4}s), -a^{2}b(a^{3}b)'a^{2}t(a^{3}t)-u^{3}s(u^{4}s). Gr., καταβατός. Ger., *abnehmend.* Following a declining course (said of fevers). [A, 322.]

CATABAUCALESIS (Lat.), n. f. Ka^{2}t(ka^{3}t)-a^3-ba^{4}k(ba^3-u^{4}k)-a^{2}l(a^{3}l)-es(as)'i^{2}s. Gen., *catabaucales'eos(-is).* Gr., καταβαυκάλησις (from καταβαυλαλᾶν, to lull to sleep). A singing to children to put them to sleep. [A, 322.]

CATABLEMA (Lat.), n. n. Ka^{2}t(ka^{3}t)-a^3-blem(blam)'a^3. Gen., *catablem'atos (-is).* Gr., κατάβλημα. Ger., *Ueberwurf.* Of Hippocrates, an outermost wrapping which secures the underlying folds of a bandage. [A, 322 (a, 17).]

CATABOLIC, adj. Ka^{2}t-a^{2}b-o^{2}l'i^{2}k. Pertaining to catabolism. [a, 17.]

CATABOLISM, n. Ka^{2}t-a^{2}b'ol-i^{2}zm. Physiological disintegration of tissue. [W. M. Welch, "N. Y. Med. Jour.," Apr. 7, 1888, p. 365.]

CATABOPHYTUM (Lat.), n. n. Ka^{2}t(ka^{3}t)-a^3-bo^{2}f'i^{2}t(u^{6}t)-u^{3}m-(u^{4}m). From καταβάπτειν, to immerse, and φυτόν, a plant. Of Necker, a genus (order) of plants comprising the species (genera) *Potamogeton, Najas, Callitriche, Senna, Ceratophyllum, Chara, Equisetum, Marsilea,* and other aquatic plants. [B, 170.]

CATABYTHISMOMANIA (Lat.), n. f. Ka^{2}t(ka^{3}t)-a^3-bi^{2}th-(bu^{6}th)-i^{2}z(i^{2}s)''mo(mo^2)-man(ma^{3}n)-i^2-a^3. From καταβυθισμός, submersion, and μανία madness. Ger., *Ersäufungswuth.* Insanity with a strong impulse to voluntary drowning. [A, 322 (a, 17).]

CATABYTHISMUS (Lat.), n. m. Ka^{2}t(ka^{3}t) a^3-bi^{2}th(bu^{6}th)-i^{2}z(i^{2}s)'mu^{3}s(mu^{4}s). Gr., καταβυθισμός. Ger., *freiwilliges Ersäufen.* Voluntary drowning. [A, 322 (a, 17).]

CATACASMUS (Lat.), n. m. Ka^{2}t(ka^{3}t)-a^3-ka^{2}z(ka^{3}s)'mu^{3}s-(mu^{4}s). From κατά intens., and ἀκάζειν, to prick. Deep scarification. [A, 322.]

CATACAUMA (Lat.), n. n. Ka^{2}t(ka^{3}t)-a^3-ka^{4}m'(ka^3'u^{4}m)-a^3. Gen., *catacaum'atos (-is).* Gr., κατάκαυμα. A deep burn or scald, also a large bleb resulting from a burn. [A, 322.]

CATACAUSIS (Lat.), n. f. Ka^{2}t(ka^{3}t)-a^3-ka^{4}s'(ka^3'u^{4}s)-i^{2}s. Gen., *catacau'seos (-is).* Gr., κατακαυσις. Fr., *c.* Ger., *tiefes Brennen.* A deep burning, also so-called spontaneous human combustion, supposed to be of alcoholic origin (*C. ebriosa*). [A, 322; Young (A, 301).]

CATACECLIMENUS (Lat.), adj. Ka^{2}t(ka^{3}t)-a^3-se^{2}k(ke^{2}k)-li^{2}m'-e^{2}n-u^{3}s(u^{4}s). Gr., κατακεκλίμενος (from κατακλίνεσθαι, to lie in bed). Confined to bed. [A, 325.]

CATACECRAMENUS (Lat.), adj. Ka^{2}t(ka^{3}t)-a^3-se^{2}k(ke^{2}k)-ra^{2}m(ra^{3}m)'e^{2}n-u^{3}s(u^{4}s). Gr., κατακεκράμενος (from κατακρεμᾶν, to be suspended). Suspended (said of a broken limb). [Hippocrates (A, 325).]

CATACEMODERMITIS (Lat.), n. f. Ka^{2}t(ka^{3}t)-a-sem(kam)''-o(o^2)-du^{6}rm(de^{2}rm)-it(et)'i^{2}s. Gen., *catacemodermit'idis.* From κατακεῖσθαι, to lie outstretched, and δέρμα the skin. (See also *-itis.**) An inflammation of the skin due to prolonged decubitus. [A, 322 (a, 17).]

CATACERASTICUS (Lat.), adj. Ka^{2}t(ka^{3}t)-a^3-se^{2}r(ke^{2}r)-a^{2}st-(a^{3}st)'i^{2}k-u^{3}s(u^{4}s). Gr., κατακεραστικός. Fr., *catacérastique.* Ger., *mildernd.* Mitigating, especially by dilution (said of medicines supposed to neutralize or dilute acrid humors). [A, 322, 385.]

CATACERMATIZOMENOS (Lat.), adj. Ka^{2}t(ka^{3}t)-a^3-su^{5}rm-(ke^{2}rm)-a^{2}t(a^{3}t)-i^{2}z-o^{2}m'e^{2}n-o^{2}s. Gr., κατακερματιζόμενος (from κατακερματίζειν, to divide into small pieces). Disseminated through the whole body (said of febrile heat). [Hippocrates (A, 325).]

CATACHASMA (Lat.), **CATACHASMUS** (Lat.), n's n. and m. Ka^{2}t(ka^{3}t)-a^3-ka^{2}z(ch^{2}a^{3}s)'ma^3, -mu^{3}s(mu^{4}s). Gen., *catachas'matos (-is), -mi.* See CATACASMUS.

CATACHLOOS (Lat.), adj. Ka^{2}t(ka^{3}t)-a^{2}k(a^{3}ch^2)'lo(lo^2)-o^{2}s. Gr., κατάχλοος (from κατά intens., and χλόος, a greenish-yellow color). Very green (said of excrement tinged with bile). [A, 325.]

CATACHRISIS (Lat.), n. f. Ka^{2}t(ka^{3}t)-a^{2}k(a^{3}ch^2)'ri^{2}s-i^{2}s. Gen., *catachris'eos (-ach'risis).* Gr., κατάχρισις. Inunction. [A, 387.]

CATACHRISMA (Lat.), **CATACHRISTON** (Lat.), n's n. Ka^{2}t(ka^{3}t)-a^3-kri^{2}z(ch^{2}ri^{2}s)'ma^3, -to^{2}n. Gen., *catachris'matos (-is), -ti.* Gr., κατάχρισμα, κατάχριστον. Old names for a kind of ointment or liniment. [Hippocrates (A, 325); A, 387; B, 200 (a, 21).]

CATACHYMA (Lat.), n. n. Ka^{2}t(ka^{3}t)-a^{2}k(a^{3}ch^2)'i^{2}m(u^{6}m)-a^3. Gr., κατάχυμα (from καταχεῖν, to pour upon). Gen., *catachym'atos (-is).* The water used in affusion or douching. [A, 322, 387.]

CATACHYSIS (Lat.), n. f. Ka^{2}t(ka^{3}t)-a^{2}k(a^{3}ch^2)'i^{2}s(u^{6}s)-i^{2}s. Gen., *catachys'eos (-ach'ysis).* Gr., κατάχυσις. Fr., *catachyse.* Ger., *Douchiren.* An affusion, a douche. [A, 322, 325, 387.]

CATACHYSMA (Lat.), n. n. Ka^{2}t(ka^{3}t)-a^3-ki^{2}z(ch^{2}u^{6}s)'ma^3. Gen., *catachys'matos (-is).* Gr., κατάχυσμα. See CATACHYMA.

CATACLASIS (Lat.), n. f. Ka^{2}t(ka^{3}t)-a^{2}k(a^{3}k)'la^{2}s(la^{3}s)-i^{2}s. Gen., *cataclas'eos (-ac'lasis).* Gr., κατάκλασις. Fr., *cataclase.* 1. A fracture. [L, 30.] 2. See CATACLEISIS.

CATACLEIS (Lat.), n. f. Ka^{2}t'(ka^{3}t)-a^{2}k(a^{3}k)'lis(le^2-i^{2}s). Gen., *catacle'idos (-is).* Gr., κατακλείς. An old name for the uppermost part of the thorax, for the first rib, and for the cartilage joining the clavicle to the sternum. [A, 325, 387.]

CATACLEISIS (Lat.), n. f. Ka^{2}t(ka^{3}t)-a^3-klis'(kle^2'i^{2}s)-i^{2}s. Gen., *catacle'iseos (-is).* Gr., κατάκλεισις. Lit., a locking up; occlusion or spastic closure of the eyelids. [A, 322, 387.]

CATACLESIUM (Lat.), n. n. Ka^{2}t(ka^{3}t)-a^3-klez(klas)'i^2-u^{3}m-(u^{4}m). From κατά intens., and κλέπτειν, to conceal. Fr., *cataclésie* [Desvaux]. A one-celled indehiscent membranous fruit containing a single seed and inclosed within the hardened fruit-calyx. [A, 322; B, 1, 19.] Cf. CARCERULUS.

CATACLINES (Lat.), adj. Ka^{2}t(ka^{3}t)-a^{2}k(a^{3}k)'li^{2}n-ez(as). Gr., κατακλινής. Confined to bed, bed-ridden. [A, 325; L, 94, 119.]

CATACLISIA (Lat.), n. f. Ka^{2}t(ka^{3}t)-a^3-kli^{2}s(kles)'i^2-a^3. Perhaps from κατακλεῖν, to lock up. See ATREMIA.

CATACLISIS (Lat.), n. f. Ka^{2}t(ka^{3}t)-a^{2}k(a^{3}k)'li^{2}s-i^{2}s. Gen., *cataclis'eos (-ac'lisis).* Gr., κατάκλισις. See DECUBITUS.

CATACLYSIS (Lat.), n. f. Ka^{2}t(ka^{3}t)-a^{2}k(a^{3}k)'li^{2}s(lu^{6}s)-i^{2}s. Gen., *cataclys'eos (-ac'lysis).* Gr., κατάκλυσις. A drenching, as by purging or bathing. [A. 387.]

CATACLYSM, n. Ka^{2}t'a^{2}k-li^{2}zm. Gr., κατάκλυσμα, κατάκλυσμος (from κατακλύζειν, to inundate). Fr., *cataclysme.* Of Hippocrates, a clyster; of some authors, an affusion, a douche, also, in general, ablution, irrigation. [A, 301, 322, 325; L, 49.]

CATACORES (Lat.), adj. Ka^{2}t(ka^{3}t)-a^{2}k(a^{3}k)'o^{2}r-ez(as). Gr., κατακορής. Lit., excessive; causing abundant bilious evacuations. [Hippocrates (A, 325).]

CATACOROLLA (Lat.), n. f. Ka^{2}t(ka^{3}t)-a^3-ko^{2}r-o^{2}l'la^3. From κατά, against, under, and *corolla* (*q. v.*). In botany, a second corolla formed inside or outside the first. [L, 56.]

CATACOUSTICS, n. sing. Ka^{2}t-a^{2}k-ust'i^{2}ks. Lat., *catacoustica* (from κατά, over against, and ακούειν, to hear). Fr., *catacoustique.* Ger., *Katakustik.* The science of reflected sounds or echoes. [F.]

CATACROTIC, adj. Ka^{2}t-a^{2}k-ro^{2}t'i^{2}k. Fr., *catacrotique.* Ger., *katakrotisch.* Relating to or affected with catacrotism (said of the pulse). [L, 88 (a, 17).]

CATACROTISM, n. Ka^{2}t-a^{2}k'ro^{2}t-i^{2}zm. From κατά, down, and κρότος, a stroke. An undulation of the descending curve of a sphygmographic pulse-tracing. [L, 88; a, 17.]

CATACROTOUS, adj. Ka^{2}t-a^{2}k'ro^{2}t-u^{3}s. See CATACROTIC.

CATACRUSIS (Lat.), n. f. Ka^{2}t(ka^{3}t)-a^3-krus'i^{2}s. Gen., *catacrus'eos (-is).* Gr., κατάκρουσις (from κατακρούειν, to beat down; to strike down upon, or cut deeply). 1. A repression. 2. A revulsion. 3. A striking, as in certain surgical operations, or as employed in making fatty inunctions through the skin. [a, 17.]

CATADIOPTRIC, adj. Ka^{2}t-a^3-di-o^{2}p'tri^{2}k. From κατά, opposite to, and διοπτρικός (see DIOPTRIC). Fr., *catadioptrique.* Reflecting and refracting light at the same time (said of certain optical instruments). [A, 301 (a, 17).]

CATADROME (Lat.), n. f. Ka^{2}t(ka^{3}t)-a^{2}d(a^{3}d)'rom(ro^{2}m)-e(a). Gr., καταδρομή (from κατά, against [1st def.] or downward [2d def.], and δρέμειν, to run). 1. The onset of a disease. [A, 387.] 2. The decline of a disease. [A, 322.]

CATADYSOIDÆ (Lat.), n. f. pl. Ka^{2}t(ka^{3}t)-a^3-di^{2}s(du^{6}s)-o(o^2)-id(ed)'e(a^3-e^2). A family of the *Territelariœ.* [L, 196.]

CATADYTÆ (Lat.), n. f. pl. Ka^{2}t(ka^{3}t)-a^3-dit(du^{6}t)'e(a^3-e^2). Of Link, a subclass of the exogens, consisting of the single order *Ceratophylleœ.* [B, 170.]

CATÆONESIS (Lat.), n. f. Ka^{2}t(ka^{3}t)-e(a^3-e^2)-o^{2}n-es(as)'i^{2}s. Gen., *catœones'eos (-is).* Gr., καταιόνησις (from καταιονᾶν, to pour upon). Fomentation or affusion. [L, 94; a, 17.]

CATAF (Ar.), n. The *Atriplex hortensis.* [B, 88, 121.]

CATAFAMBRA, n. A vegetable substance of Japanese origin, analogous to Gambir catechu. [Guibourt (B, 121).]

CATAGAUNA, n. See CATAGYNA.

CATAGLISCHRÆSIS (Lat.), n. f. Ka^{2}t(ka^{3}t)-a^3-gli^{2}s-kres′-(ch^{2}ra^3′e^{2}s)-i^{2}s. Gen., *cataglischræs′eos* (*-is*). From καταγλισχραίνειν, to make glutinous. A making viscous. [A, 325; L, 119.]

CATAGLOSSUM (Lat.), n. n. Ka^{2}t(ka^{3}t)-a^3-glo^{2}s(glos)′su^{3}m-(su^{4}m). From κατά, down, and γλῶσσα, the tongue. Fr., *cataglosse, baisse-langue.* Ger., *Mundöffner, Zungendrücker.* A tongue-depressor. [A, 301, 322; E; L, 41.]

CATAGMA (Lat.), n. n. Ka^{2}t(ka^{3}t)-a^{2}g(a^{3}g)′ma^3. Gen., *catag′-matos* (*-is*). Gr., κάταγμα. Fr., *catagme.* See FRACTURE.

CATAGMATIC, adj. Ka^{2}t-a^{2}g-ma^{2}t′i^{2}k. Gr., καταγματικός. Lat., *catagmaticus.* Fr., *catagmatique.* Pertaining to fractures, especially promoting the union of fractured bones. [A, 301, 322, 325; L, 30.]

CATAGOGLOSSUM (Lat.), n. n. Ka^{2}t(ka^{3}t)-a^{2}g(a^{3}g)-o(o^2)-glo^{2}s(glos)′su^{3}m(su^{4}m). From κατάγειν, to draw down, and γλῶσσα, the tongue. A more correct form of *cataglossum* (*q. v.*). [A, 322.]

CATAGRAPHOLOGY, n. Ka^{2}t-a^3-gra^{3}f-o^{2}l′o-ji^2. Lat., *catagraphologia* (from καταγραφή, a writing down, and λόγος, understanding). In general, the art of taking notes, making records, etc.; according to some, the art of writing prescriptions. [A, 322.]

CATAGYIOSIS (Lat.), n. f. Ka^{2}t(ka^{3}t)-a^3-ji(gu^6)-i^2-os′i^{2}s. Gen., *catagyios′eos* (*-is*). From καταγυιοῦν, to enfeeble. Imbecility, enervation. [A, 325; L, 119.]

CATAGYNA, n. An old name for Gamboge. [B, 121.]

CATAIRE (Fr.), n. Ka^{3}t-a^{2}r. The *Nepeta cataria.* [B, 93, 121.]

CATAIRE (Fr.), adj. Ka^{3}t-ar. Pertaining to a cat; like a cat's purring. [A, 385.]—**Frémissement c.** See *Purring* TREMOR.

CATAIRON (Lat.), n. n. Ka^{2}t(ka^{3}t)-a(a^3)′i^{2}r-o^{2}n. Gr., καταίρον. Of Dioscorides, a species of *Iris.* [Bory (B, 121).]

CATALENTIA [Paracelsus] (Lat.), n. f. Ka^{2}t(ka^{3}t)-a^3-le^{2}n′shi^2-(ti^2)-a^3. A kind of epilepsy. [A, 325.]

CATALEPSIA (Lat.), **CATALEPSIS** (Lat.), n's. f. Ka^{2}t(ka^{3}t)-a^3-le^{2}ps(laps)′i^2-a^3, -i^{2}s. Gen., *cataleps′iæ, -eos* (*-is*). See CATALEPSY. —**C. cerea.** See FLEXIBILITAS *cerea.*—**C. pulmonum.** Of Hufeland, spasm of the glottis. [D, 39.]—**C. verminosa.** Catalepsy from worms. [L, 119.]

CATALEPSY, n. Ka^{2}t′a^3-le^{2}ps-i^2. Gr., κατάληψις (from καταλαμβάνειν to seize). Lat., *catalepsis.* Fr., *catalepsie.* Ger., *Katalepsie, Starrsucht.* It., *catalessia.* Sp., *catalepsia.* A neurosis marked by peculiar paroxysms which recur at regular or irregular periods, and are accompanied by more or less complete suspension of consciousness and sensibility, and by muscular rigidity. By reason of the latter, the limbs and even the trunk retain for a long time any posture in which they are placed. [A, 301; D, 34.]—**Accessory c.** Fr., *catalepsie accessoire.* Symptomatic c. in which there is only a very remote relation with the coexisting disease. [α, 18.]—**Artificial c.** Fr., *catalepsie artificielle* (ou *hypnotique*, ou *provoquée*). C. produced by hypnotization; of Charcot, the second stage of hypnotism. [α, 18.]—**Complete c.** Fr., *catalepsie complète* (ou *franche*), *grand mal cataleptique.* Typical c., as shown by a fully characteristic attack. [α, 18.]—**Complicated c.** Fr., *catalepsie compliquée.* Symptomatic c. in which the cataleptic phenomena predominate over those of the coexisting disease. [α, 18.]—**Epidemic c.** Fr., *catalepsie épidémique* (ou *par imitation*). A form allied to hysteria and ecstasy, attacking one person after another, especially under the influence of religious excitement. [A, 385.]—**Hystero-c.** C. associated with hysterical manifestations. [R. Abbe, "N. Y. Med. Jour.," Mar. 6, 1886, p. 281.]—**Incomplete c.** Fr., *catalepsie incomplète, petit mal cataleptique.* A form of c., generally symptomatic, in which the attacks are limited to one side of the body or to one limb and the sensibility is preserved. [α, 18.]—**Mixed c.** Fr., *catalepsie mixte.* Symptomatic c. of equal prominence with the coexisting disease. [α, 18.]—**Plastic c.** Fr., *catalepsie plastique.* The muscular plasticity of catalepsy [Charcot and Richer, "Arch deneurol.," May, 1882, p. 310.] Cf. FLEXIBILITAS *cerea.*—**Secondary c.** Fr., *catalepsie secondaire.* Symptomatic c. in which the cataleptic symptoms are less important than those of the coexisting disease. [α, 18.]—**Simulated c., Spurious c.** Fr., *catalepsie simulée.* Cataleptic symptoms assumed by impostors or due to insanity. In either case the muscles soon relax, and there is no analgesia or anæsthesia present. [α, 18.]—**Symptomatic c.** Fr., *catalepsie symptomatique.* C. associated with some other diseased state, such as hysteria, ecstasy, somnambulism, tetanus, mania, hypochondriasis, lypemania, pneumonia, rheumatism, meningitis, typhoid fever, intermittent fever, etc. [α, 18.]

CATALEPTIC, adj. Ka^{2}t-a^3-le^{2}p′ti^{2}k. Gr., καταληπτικός, καταληπτός. Fr., *cataleptique.* Ger., *starrsüchtig.* 1. Pertaining to, of the nature of, or affected with, catalepsy. [D.] 2. Consisting of the employment of inunctions (said of a method of treatment used when medication by the mouth is impracticable). [A, 322.] 3. In botany, retaining a position artificially given (said of a plant or one of its organs, such as the flowers of *Physostegia virginiana.*) [B, 215.]

CATALEPTIFORM, adj. Ka^{2}t-a^{2}l-e^{2}p′ti^2-fo^{2}rm. From κατάληψις (see CATALEPSY), and *forma*, form. Fr., *cataleptiforme.* See CATALEPTOID.

CATALEPTIQUE (Fr.), adj. and n. Ka^{3}t-a^3-le^{2}p-tek. 1. (Adj.) see CATALEPTIC. 2. (N.) a person affected with catalepsy. 3. (N.) a cataleptic remedy. 4. (N.) the *Dracocephalum virginianum* (*Physostegia virginiana*); so called because its flowers will retain for hours any position in which they may be placed. [A, 385; B, 88; L, 41.]—**C. de Virginie.** See *C.* (3d def.).

CATALEPTIZE, v. tr. Ka^{2}t-a^{2}l-e^{2}p′tiz. To throw into a cataleptic state.

CATALEPTOID, adj. Ka^{2}t-a^{2}l-e^{2}p′toid. From κατάληψις, catalepsy, and εἶδος, resemblance. Fr., *cataleptoïde.* Resembling catalepsy.—**C. state.** Fr., *état cataleptiforme.* A sort of catalepsy due to neuro-muscular over-excitability; distinguished from true catalepsy chiefly by its being necessary to hold the limbs in certain attitudes for a few seconds before they will maintain themselves, and by friction and massage always causing the limbs to drop down limp. [Charcot and Richer, "Arch. de neurol," May, 1882.]

CATALEPTO-LETHARGIC, adj. Ka^{2}t-a^{2}l-e^{2}p″to-le^{2}th-a^{3}rj′-i^{2}k. For deriv., see CATALEPSY and LETHARGY. Fr., *catalepto-léthargique.* Ger., *catalepto-lethargisch.* Partaking of the nature of catalepsy and of lethargy (said of a condition of catalepsy produced in some persons by looking fixedly at a very bright light, followed by lethargy when the light is suddenly made to disappear). [Charcot, "Progr. méd.," 1878, No. 51 (A, 319); M. Rosenthal (A, 319).]

CATALINA [Mex. Ph.] (Sp.), n. Ka^{3}t-a^3-len′a^3. In Mexico, the *Poinsettia pulcherrima.* [B, 121.]

CATALIUM (Lat.), n. n. Ka^{2}t(ka^{3}t)-al(a^{3}l)′i^2-u^{3}m(u^{4}m). Fr., *catalion.* See CARALLIA.

CATALLACTA (Lat.), n. n. pl. Ka^{2}t(ka^{3}t)-a^{2}l(a^{3}l)-la^{2}k(la^{3}k)′ta^3. From καταλλάκτης, a mediator. Fr., *catallactes.* Ger., *Mittlinge.* 1. Of Haeckel, a class of the *Protista.* [L, 173.] 2. An order of the *Gymnomyxa.* [Lankester, "Quart. Jour. of Micr. Sci.," 1877, p. 442.]

CATALOTIC, adj. Ka^{2}t-a^{2}l-o^{2}t′i^{2}k. Gr., καταλοτικός (from καταλοᾶν, to grind down). Lat., *cataloticus.* Fr., *catalotique.* Ger., *niederdrückend, zermalmend.* Having the power of smoothing down thick, unsightly scars (said anciently of certain remedies). [A, 322; Galen (A, 325).]

CATALPA (Lat.), n. f. Ka^{2}t(ka^{3}t)-a^{2}lp(a^{3}lp)′a^3. From the aboriginal name in North America. Ger., *Trompetenbaum.* Of Jussieu and of Scopoli, a genus of North American, West Indian, and Asiatic bignoniaceous trees of the tribe *Tecomeæ.* [B, 42, 215.] —**C. bignonioides** [Walter]. Syn.: *Bignonia c.* [Linnæus]. The c.-tree or Catawba-tree, indigenous to the southern United States, cultivated in the Northern States and in Europe. The bark is very bitter, containing tannin and an amorphous and a crystalline bitter

THE CATALPA BIGNONIOIDES. (A, 327.)

principle. A bitter principle is said to be extracted from the seeds. The tree is popularly supposed to be poisonous, even its exhalations being regarded as noxious. The bark is anthelminthic, the wood emetic, and the juice of the root a topical remedy in chronic ophthalmia and pannus. The leaves are used in the preparation of emollient and anodyne applications, and the seeds and pods in bronchitis and asthma. [B, 5, 81, 180, 215.]—**C. Bungei** [Meyer]. A Chinese species of unknown medicinal application. [B, 180.]—**C. cordifolia** [Du Hamel]. The *C. bignonioides.* [B, 173, 180.]—**C. longissima** [Sims]. Syn.: *Bignonia longissima* [Swartz] (seu *quercus* [Lamarck]). A West Indian species. The bark, leaves, and flowers are employed in weak states of the digestion and in intermittent fever. [B, 180.]—**C. speciosa** [Warder]. A variety growing in the western United States; by some regarded as distinct from *C. bignonioides.* [B, 81.]—**C. syringæfolia** [Sims]. 1. The *C. bignonioides.* 2. Of Bunge, the *C. Bungei.* [B, 180, 185.]—**C.-tree.** The *C. bignonioides.* [B, 5.]

CATALPEÆ (Lat.), n. f. pl. Ka^{2}t(ka^{3}t)-a^{2}lp(a^{3}lp)′e^2-e(a^3-e^2). Fr., *catalpées.* Of De Candolle, a subtribe of the *Bignonieæ*, comprising *Catalpa, Pajanelia, Tecoma, Jacaranda, Eccremocarpus,* etc. [B, 170, 214.]

CATALPIFOLIUS (Lat.), adj. Ka^{2}t(ka^{3}t)-a^{2}lp(a^{3}lp)-i^2-fol(fo^{2}l)′-i^2-u^{3}s(u^{4}s). From *catalpa* (*q. v.*), and *folium*, a leaf. Having leaves like the *Catalpa.* [B.] See *Buettneria catalpifolia.*

CATALPIUM [Rafinesque] (Lat.), n. n. Ka^{2}t(ka^{3}t)-a^{2}lp(a^{3}lp)′-i^2-u^{3}m(u^{4}m). See CATALPA.

CATALYSEUR (Fr.), n. Ka^{3}t-a^3-lez-u^{5}r. See CATALYST.

CATALYSIS (Lat.), n. f. Ka^{2}t(ka^{3}t)-a^{2}l(a^{3}l)'i^{2}s(u^{6}s)-i^{2}s. Gen., *catalys'eos (-al'ysis)*. Gr., κατάλυσις (from καταλύειν, to dissolve). Fr., *catalyse*. Ger., *Catalyse, Katalyse*. It., *catalisi*. Sp., *catálisis*. 1. Anciently, perfect solution, also dissolution and the relaxation of the muscles preceding death. [A, 322; Hippocrates, Celsus (A, 325).] 2. As now used, catalytic action, contact action; a species of chemical action in which one body produces changes in one or more other bodies without itself undergoing any change. The action of most of the animal ferments has been considered to be one of c. Those examples of so-called c., however, which have been most thoroughly investigated have proved to be examples of double decomposition. The body to which a catalytic action has been ascribed really undergoes decomposition, but is immediately reformed in order to be again decomposed. By a constant repetition of this process a minute portion of the body so acting may cause chemical changes in a large bulk of other substances. [B.]—**Isomeric c.** Fr., *catalyse isomérique* [Robin and Verdeil]. A form of c. in which only an isomeric change is produced. [A. Gubler (B, 46).]

CATALYST, n. Ka^{2}t'a^{2}l-i^{2}st. Fr., *catalyseur*. Syn.: *contact substance*. A substance capable of producing catalysis. [H. E. Armstrong, cited in "Nature," Sept. 17, 1885, p. 467 (B).]

CATALYTIC, adj. Ka^{2}t-a^{2}l-i^{2}t'i^{2}k. Lat., *catalyticus*. Fr., *catalytique*. Ger., *katalytisch*. It., *catalitico*. Sp., *catalitico*. Pertaining to catalysis. [B.]

CATALYTIE (Fr.), n. Ka^{3}t-a^3-let-e. See CATALYSIS.

CATAMARAN-WOOD-TREE, n. Ka^{3}t-a^3-ma^{3}r-a^{3}n'wu^{4}d-tre. The *Gyrocarpus asiaticus*. [B, 121, 172.]

CATAMASSESIS (Lat.), n. f. Ka^{2}t(ka^{3}t)-a^3-ma^{2}s(ma^{3}s)-ses-(sas)'i^{2}s. Gen., *catamasses'eos (-is)*. From καταμᾶσθαι, to gnaw. The biting of the tongue observed in epileptics. [Hippocrates (A, 325); L, 119.]

CATAMBOCHIO, n. In Corcyra, the *Holcus sorghum* (*Sorghum vulgare*). [B, 88, 121.]

CATAMENIA (Lat.), n. n. pl. Ka^{2}t(ka^{3}t)-a^3-men(man)'i^2-a^3. Gr., καταμήνια (from κατά, relating to, and μήν, a month). Fr., *flux cataménial, règles*. Ger., *Catamenien, Monatsblutfluss*. The menses. [A, 322, 325.]—**C. alba.** Syn.: *menses albi, menstrua alba, lymph-like menses*. A leucorrhœa appearing monthly, or aggravated monthly; the leucorrhœal discharge which precedes the establishment of menstruation at puberty, also one that takes the place of menstruation, or that is intensified at each menstrual period without a discharge of blood. [A, 212.]

CATAMENIAL, adj. Ka^{2}t-a^3-men'i^2-a^{2}l. Gr., καταμήνιος. Lat., *catamenius*. Fr., *cataménial*. Ger., *c*. It., *catameniale*. Sp., *c*. Occurring monthly, menstrual. [A, 322.]

CATAMENIODES (Lat.), adj. Ka^{2}t(ka^{3}t)-a^3-men(man)-i^2-od'-ez(as). Gr., καταμηνιώδης. Resembling the menses, especially in periodicity. [A, 322, 387.]

CATAMOLYNTHIS (Lat.), adj. Ka^{2}t(ka^{3}t)-a^3-mol-i^{2}nth(u^{6}nth)'-i^{2}s(es). Gr., καταμωλυνθείς (from κατά intens., and μωλύειν, to enfeeble). Debilitated. [Galen, Hippocrates (A, 325).]

CATAMYSIS (Lat.), n. f. Ka^{2}t(ka^{3}t)-a^{2}m(a^{3}m)'i^{2}s(u^{6}s)-i^{2}s. Gen., *catamys'eos (-am'ysis)*. Gr., κατάμυσις. Closure of the eyelids. [Hippocrates (A, 325).]

CATANADROMOUS, adj. Ka^{2}t-a^{2}n-a^{2}d'rom-u^{3}s. From κατά, down, ἀνά, up, and δρέμειν, to run. Passing annually from salt water to fresh water (said of fishes). [L, 56.]

CATANANCASIS (Lat.), n. f. Ka^{2}t(ka^{3}t)-a^{2}n(a^{3}n)-a^{2}n^{2}k(a^{3}n^{2}k)'-a^{2}s(a^{3}s)-i^{2}s. Gen., *catanancas'eos (-anc'asis)*. From καταναγκάζειν, to compel. The forcible replacement of a part. [Hippocrates (A, 325).]

CATANANCE (Lat.), n. f. Ka^{2}t(ka^{3}t)-a^{2}n(a^{3}n)-a^{2}n(a^{3}n^2)'se(ka). Gen., *catanan'ces*. Gr., καταναγκη. Fr., *c*. Of Dioscorides, a name for certain plants of the genus *Ervum* or the genus *Astragalus*; of Tournefort, see CATANANCHE. [A, 301; B, 121.]—**C. flore luteo.** The *Catananche lutea*. [B, 200.]—**C. Dalechampii, flore cyani, folio coronopi** [J. Bauhin]. The *Catananche cœrulea*. [B, 200.]

CATANANCEÆ (Lat.), n. f. pl. Ka^{2}t(ka^{3}t)-a^{2}n(a^{3}n)-a^{2}n(a^{3}n^2)'-se^2(ke^2)-e(a^3-e^2). Fr., *catanancées*. Of Cassini, a subdivision of the *Scorzonereæ*, comprising *Hymenonema*, *Catananche*, and *Cichorium*. [B, 170.]

CATANANCHE (Lat.), n. f. Ka^{2}t(ka^{3}t)-a^{2}n(a^{3}n)-a^{2}n^2(a^{3}n^2)'ke-(ch^{2}a). Gen., *catananch'es*. For deriv., see CATANANCE. Fr., *c*. Of Linnæus, a genus of composite herbs of the tribe *Cichoraceæ*, distinguished by its scarious involucre and its pappus of awned paleæ. [B, 19, 42, 121.]—**C. cærulea** [Linnæus]. Fr., *chicorée bâtarde*. A perennial species of southern Europe, bearing large sky-blue flowers; said to be aperient and vulnerary. [B, 19, 173.]—**C. græca** [Linnæus]. The *Hymenomena græcum*. [B, 180.]—**C. lutea** [Linnæus]. An annual species indigenous to Crete, bearing yellow flowers. [B, 19.]

CATANANCHEÆ (Lat.), n. f. pl. Ka^{2}t(ka^{3}t)-a^{2}n(a^{3}n)-a^{2}n^{2}k-(a^{3}n^{2}ch^2)'e^2-e(a^3-e^2). Of D. Don, a tribe of the *Cichoraceæ*, consisting of the genus *Catananche*. [B, 170.]

CATANCUSA (Lat.), n. f. Ka^{2}t(ka^{3}t)-a^{2}n^2(a^{3}n^2)-ku^{2}s(kus)'a^3. Of Dioscorides, an undetermined plant of the *Borragineæ*. [B, 121.]

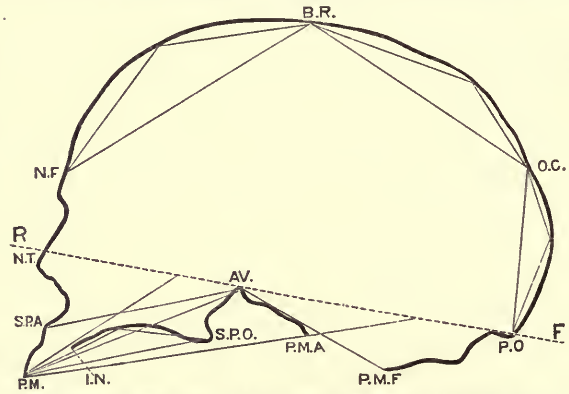
CATANGELOS (Lat.), n. m. Ka^{2}t(ka^{3}t)-a^{2}n(a^{3}n^2)'je^{2}l(ge^{2}l)-o^{2}s. Of Dioscorides, the *Ruscus hypoglossum*. [B, 88, 121.]

CATANIA (It.), n. Ka^{3}t-a^{3}n'i^2-a^3. A place on the southeastern coast of Sicily, a resort for pulmonary invalids. [A, 319.]

CATANIPHTHIS (Lat.), adj. Ka^{2}t(ka^{3}t)-a^3-ni^{2}f'thi^{2}s(thes). Gr., κατανιφθείς (from κατανίζειν, to wash). Washed. [A, 325.]

CATANTIA (Lat.), n. f. Ka^{2}t(ka^{3}t)-a^{2}n(a^{3}n)'shi^2(ti^2)-a^3. Gr., καταντία. A reclining posture. [Hippocrates (A, 387).]

CATANTLEMA (Lat.), n. n. Ka^{2}t(ka^{3}t)-a^{2}nt(a^{3}nt)-lem(lam)'a^3. Gen., *catantlem'atos (-is)*. Gr., κατάντλημα (from καταντλεῖν, to pour water on). A liquid to be used in affusion or fomentation. [A, 325, 387.]



CATANTLESIS (Lat.), n. f. Ka^{2}t(ka^{3}t)-a^{2}nt(a^{3}nt)-les(las)'i^{2}s. Gen., *catantles'eos (-is)*. Gr., κατάντλησις. Affusion, fomentation. [A, 387.]

CATANTOCHASMUS [Lissauer] (Lat.), adj. Ka^{2}t(ka^{3}t)-a^{2}nt-(a^{3}nt)''o(o^2)-ka^{2}z(ch^{2}a^{3}s)'mu^{3}s(mu^{4}s). From κάταντα, downward, and χάσμα, an expanse. Having the angle between the radius fixus and a line uniting the apex of the posterior nasal spine and the punctum foraminis magni anterius between 0° and + 13°. [L.] Cf. ANANTOCHASMUS (in Supplement) and OPISTHOCHASMUS, and see figure under CATANTOSTOMUS.

CATANTOPYLUS [Lissauer] (Lat.), adj. Kat(ka^{3}t)-a^{2}n(a^{3}n)-to^{2}p'i^{2}l(u^{6}l)-u^{3}s(u^{4}s). From κάταντα, downward, and πύλη, an orifice. Having the angle formed by the intersection of the radius fixus and a line drawn from the punctum foraminis magni posterius to the punctum foraminis magni anterius between + 8° and + 1°. [L.] Cf. ANANTOPYLUS (in Supplement), ANOPYLUS (in Supplement), and ORTHOPYLUS, and see figure under CATANTOSTOMUS.

CATANTORRHINUS [Lissauer] (Lat.), adj. Ka^{2}t(ka^{3}t)-a^{2}n-(a^{3}n)-to^{2}r)-ri(re)'nu^{3}s(nu^{4}s). From κάταντα, downward, and ῥίς, the nose. Having the angle formed by the intersection of the radius fixus and a line connecting the punctum alæ vomeris and the anterior nasal spine between 1° and 16·5°. [L.] Cf. ANORRHINUS (in Supplement) and CATORRHINUS, and see figure under CATANTOSTOMUS.

CATANTOSTOMUS [Lissauer] (Lat.), adj. Ka^{2}t(ka^{3}t)-a^{2}n-(a^{3}n)-to^{2}s'to(to^2)-mu^{3}s(mu^{3}s). From κάταντα, downward, and στόμα, the mouth. Having the angle formed by the intersection of a line drawn between the punctum præmaxillare and the punctum alæ

N.F., the punctum naso frontale; B.R., the punctum bregmatis; P.M.F, the punctum foraminis magni posterius; P.M.A., the punctum foraminis magni anterius; P.O., the punctum protuberantiæ occipitalis; AV., the punctum alæ vomeris; S.P.C., the punctum spinæ nasalis posterioris; I.N., the punctum foraminis incisivi; P.M., the punctum præmaxillare; S.P.A., the punctum spinæ nasalis anterioris; R AV. F, the radius fixus.

vomeris with the radius fixus between + 9° and + 25·5°. [L.] Cf. ANOSTOMUS (in Supplement) and CATOSTOMUS.

CATANTURANISCUS [Lissauer] (Lat.), adj. Ka^{2}t(ka^{3}t)-a^{2}n-(a^{3}n)-tu^{2}r(tur)-a^{2}n(a^{3}n)-i^{2}sk'u^{3}s(u^{4}s). From κάταντα, downward, and οὐρανίσκος, the roof of the mouth. Having the angle between the radius fixus and a line tangent to the posterior edge of the incisor foramen and the punctum præmaxillare between + 1° and + 20°. [L.] Cf. ANANTURANISCUS (in Supplement), CATURANISCUS, and ORTHIURANISCUS, and see figure under CATANTOSTOMUS.

CATANTURANUS [Lissauer] (Lat.), adj. Ka^{2}t(ka^{3}t)-a^{2}n(a^{3}n)-tu^{2}r(tur)'a^{2}n(a^{3}n)-u^{3}s(u^{4}s). From κάταντα, downward, and οὐρανός, the palate. Having the angle formed by the intersection of a line extending between the punctum præmaxillare and the posterior nasal spine with the radius fixus between + 1° and +17°. [L.] Cf. ANANTURANUS (in Supplement) and CATOURANUS, and see figure under CATANTOSTOMUS.

CATAPASM, n. Ka^{2}t'a^3-pa^{2}zm. Gr., κατάπασμα (from καταπάσσειν, to sprinkle upon). Lat., *catapasma*. Fr., *catapasme*. Ger., *Streupulver*. An ancient name for a compound powder to be sprinkled upon a part. [A, 325.]

CATAPASMUS (Lat.), n. m. Ka^{2}t(ka^{3}t)-a^3-pa^{2}z(pa^{3}s)'mu^{3}s-(mu^{4}s). Gr., καταπασμός. Gentle stroking or friction, especially of the upper part of the back. [Aurelianus (A, 325).]

CATAPASTUM (Lat.), n. n. Ka^{2}t(ka^{3}t)-a^3-pa^{2}st(pa^{3}st)'u^{3}m-(u^{4}m). Gr., καταπαστόν. See CATAPASM.

CATAPAUSIS (Lat.), n. f. Ka^{2}t(ka^{3}t)-a^3-pa^{4}s'(pa^3'u^{4}s)-i^{2}s. Gen., *catapa'useos (-is)*. Gr., κατάπαυσις (from καταπαύειν, to appease). Alleviation. [A, 387.]

CATAPEPSIS (Lat.), n. f. Ka^{2}t(ka^{3}t)-a^3-pe^{2}p'si^{2}s. Gen., *catapep'seos (-is)*. From κατά intens., and πέπτειν, to digest. Thorough digestion. [A, 322.]

CATAPETALOUS, adj. Ka^{2}t-a^3-pe^{2}t'a^{2}l-u^{3}s. Lat., *catapetalus* (from κατά, down, and πέταλον, a leaf). Fr., *catapétale*. Polypetal-

ous by adhesion at the base; having the petals joined to each other at their base only, as in the mallow. [B, 19.]

CATAPHONICS, n. sing. Ka^{2}t-a^3-fo^{2}n'i^{2}ks. Lat., *cataphonice* (from κατά, over against, and φώνη, sound). Fr., *cataphonique.* A branch of physics treating of the reflection of sound. [F; L, 41, 180.]

CATAPHORA (Lat.), n. f. Ka^{2}t(ka^{3}t)-a^{2}f(a^{3}f)'o^{2}r-a^3. Gen., *cataph'oras.* Gr., καταφορά (from καταφέρεσθαι, to sink into deep sleep). Ger., *tiefer Schlaf.* Lethargy; of Cullen, apoplexy. [B, 117; a, 7.]

CATAPHORESIS (Lat.), n. f. Ka^{2}t(ka^{3}t)-a^3-fo^{2}r-e(a)'si^{2}s. Gen., *cataphores'eos* (*-is*). From κατά, down, and φόρησις (from φορεῖν, to bear), a conveying. Fr., *cataphorèse.* Ger., *Kataphorese.* Syn.: *anodal diffusion.* The action by which a substance in solution is made to penetrate the tissues and organs with the aid of galvanism, the positive electrode being applied bathed in the solution. [a, 18; F. Peterson, "N. Y. Med. Jour.," Apr. 27, 1889, p. 449.] Cf. *Voltaic* NARCOTISM.

CATAPHORIC, adj. Ka^{2}t-a^3-fo^{2}r'i^{2}k. Gr., καταφορικός. Lat., *cataphoricus.* Fr., *cataphorique.* Ger., *cataphorisch.* It., *cataforico.* 1. Pertaining to cataphora. [A, 322.] 2. Conducting from the anode to the cathode (said of a galvanic current when, if applied to a porous body, it causes a movement of the liquids in the body from the point of application of the anode to that of the cathode.) [G. Gärtner, "Wien. med. Jahrb.," 1882 (B).]

CATAPHRACTA (Lat.), n. f. sing. and n. pl. Ka^{2}t(ka^{3}t)-a^3-fra^{2}k(fra^{3}k)'ta^3. Gr., καταφρακτή (from καταφράσσειν, to furnish with armor). Fr., *cataphracte* (sing.). Ger., *Schnürbrust* (1st def.), *Panzer* (1st def.). 1. (Sing.) an old form of bandage for the thorax. [A, 322, 325.] 2. (Sing.) the assemblage of scales covering the body of certain fishes like a cuirass. [L, 41.] 3. (Pl.) of Latreille, a section or group of the *Reptilia*, made by De Blainville to include the *Chelonia* and *Crocodilia.* [L, 121.]

CATAPHRACTED, adj. Ka^{2}t'a^3-fra^{2}k-te^{2}d. Lat., *cataphractus.* Fr., *cataphracté.* Ger., *bepanzert.* Furnished with a cataphracta (2d def.). [A, 322; L, 56.]

CATAPHRACTI (Lat.), n. m. pl. Ka^{2}t(ka^{3}t)-a^3-fra^{2}k(fra^{3}k)'-ti(te). Fr., *cataphractes.* A family of *Acanthopterygii cottoscembrifirmes.* The term is sometimes loosely applied to all fish having cataphracts. [L. 207.]

CATAPHRACTIC, adj. Ka^{2}t-a^3-fra^{2}k'ti^{2}k. Lat., *cataphracticus.* Pertaining to a cataphracta. [A, 322; L, 56.]

CATAPHRIXIS (Lat.), n. f. Ka^{2}t(ka^{3}t)-a^3-fri^{2}x'i^{2}s. Gen., *cataphrix'eos* (*-is*). From κατά, intens., and φρίσσειν, to shiver. Ger., *Starrfrost.* Stiffness and pain due to the action of cold. [A, 322.]

CATAPHYLL, n. Ka^{2}t'a^3-fi^{2}l. From κατά, below, and φύλλον, a leaf. A scale-leaf; a leaf, often membranous or fleshy in texture and seldom green, growing on a short stem below the ordinary leaves. [B, 279.]

CATAPHYLLARY, adj. Ka^{2}t-a^3-fi^{2}l'a-ri^2. Placed below the true leaves. [B, 77, 279.]

CATAPIESIS (Lat.), n. f. Ka^{2}t(ka^{3}t)-a^3-pi(pi^2)'e^{2}s-i^{2}s. Gen., *catapies'eos* (*-pi'esis*). Gr., καταπίεσις (from καταπιέζειν, to press down). Ger., *Niederdrücken, Zusammendrücken.* Pressure, depression, compression. [A, 322.]

CATAPIESTICUS (Lat.), adj. Ka^{2}t(ka^{3}t)-a^3-pi^2-e^{2}st'i^{2}k-u^{3}s-(u^{4}s). Pertaining to catapiesis. [A, 322.]

CATAPIN, n. In Java, the *Cassia alata.* [B, 88, 121.]

CATAPLASIS (Lat.), n. f. Ka^{2}t(ka^{3}t)-a^{2}p(a^{3}p)'la^{2}s(la^{3}s)-i^{2}s. Gen., *cataplas'eos* (*-ap'lasis*). Gr., κατάπλασις (from καταπλάσσειν, to smear). The application of a coating, as of plaster. [A, 387.]

CATAPLASM, n. Ka^{2}t'a^3-pla^{2}zm. See CATAPLASMA.—**Cantharidal c.** Fr., *cataplasme* (ou *sinapisme*) *cantharidé, vésicatoire magistral.* A soft paste made of cantharides, flour, and vinegar; official in several old formularies. [B, 119.]—**Emollient c.** See CATAPLASMA *emolliens.*—**Hamilton's c.** Muslin or linen imbued with linseed mucilage; to be dipped into hot water at the time of using, when it swells and becomes soft. [Bernatzik (A, 319); B, 270 (a, 21).]—**Saturnine c.** Fr., *cataplasme saturné.* Of the Turin Ph., 1833, a poultice of 4 parts each of bean-flour, flaxseed-meal, and fenugreek, 1 part of lead-water, and a sufficient quantity of infusion of elder-flowers. [B, 119 (a, 21).]

CATAPLASMA (Lat.), n. n. Ka^{2}t(ka^{3}t)-a^3-pla^{2}z(pla^{3}s)'ma^3. Gen., *cataplas'matos* (*-is*). Gr., κατάπλασμα (from Gr., καταπλάσσειν, to smear). Fr., *cataplasme.* Ger., *Breiumschlag.* It., Sp., *c.* Originally, any preparation applied by rubbing or smearing; hence an ointment or plaster; now used to designate a poultice or soft mass which, applied externally, acts by the effect of combined heat and moisture to diminish pain, reduce tension, soften the integument, and promote resolution or hasten suppuration in inflammatory conditions. [B, 270 (a, 21).]—**Arzneiliches C.** (Ger.). See *C. medicinale.*—**C. acetatum, C. acetosum.** Fr., *cataplasme rubéfiant, pâte acétolique.* A poultice prepared with vinegar; especially one made with 100 grammes of rye-flour and a sufficiency of vinegar. The Port. Ph., 1836, directs 8 parts each of potatoes and vinegar and 1 part of ox-gall to be cooked together. The Sp. Ph., 1798, directs 32 parts of bread-crumb to be soaked in good vinegar and pounded in a mortar, and 2 parts each of powdered mastic, powdered mint, powdered cypress-fruit, 24 of oil of roses, and a sufficient quantity of barley-meal to be added to make a poultice. It is astringent, antiseptic, and excitant. [B. 108, 270 (a, 21).]—**C. ad cancrum.** Fr., *cataplasme anticancéreux.* A preparation official in the Bat. Ph. 1805 (Niemann's ed.), and the Frankf. Disp., 1791; consisting of 16 parts of powdered hemlock, 96 of rob of carrot, and 3 of tinctura opii crocata. Used to correct the odor and alleviate the pain of ulcerated cancer. [B, 94, 119 (a, 21).]—**C. ad decubitum.** Syn.: *unguentum ad decubitum Autenriethii, plumbum tannicum pultiforme.* 1. A preparation made by adding 20 parts of liquor plumbi acetatis to 200 of a decoction of oak-bark (representing 40 of the bark), collecting 60 of the precipitate, and adding 5 of alcohol; applied to bed-sores. 2. See *Unguentum* PLUMBI *tannici.* [B, 108, 270 (a, 21).] Cf. *C. aluminatum* and *Coagulum* ALUMINIS.—**C. ad singultum.** Fr., *cataplasme calmant.* Syn.: *c. fermenti panis theriacale.* A preparation official in the Sp. Ph., 1798, made of 4 parts of theriaca, 2 each of powdered juniper-berries, powdered red roses, and powdered mint-leaves, 1 part each of powdered cloves, powdered mace, and grated nutmeg, 24 parts of yeast, and a sufficient quantity of rose-vinegar. It was applied over the stomach for hiccough. [B, 119 (a, 21).]—**C. adstringens.** See *C. astringens.*—**C. aeratum.** See *C.* FERMENTI.—**C. alkalinum.** Sp., *c. alcalina* [Sp. Ph.]. A poultice made by dissolving 15 parts of potassium carbonate in 500 of water and adding a sufficient quantity of bread-crumb. [B, 200 (a, 21).]—**C. aluminatum.** Syn.: *c. aluminis ad decubitum.* A preparation used for bed-sores; made of 4 grammes of alum, 2 grammes of spirit of camphor, and the white of 2 eggs. [B, 108 (a, 21).] Cf. *Coagulum* ALUMINIS.—**C. anodynum.** Fr., *cataplasme anodin.* Ger., *schmerzlindernder Breiumschlag.* An anodyne poultice; *i. e.*, one containing belladonna, opium, or some other substance for the relief of pain; of the Belg. Ph., 1854, and the Fr. Cod., 1837, a poultice made by boiling 32 parts of unripe poppy-capsules and 64 of the leaves of black hyoscyamus with sufficient water to furnish 750 parts, straining, and adding 128 of the farinæ emollientes. Similar preparations, in some of which conium was substituted for the poppy-capsules, were official in several of the older pharmacopœias. The same name was applied to a poultice made with species narcoticæ and milk or water. [B, 108, 119, 200, 270 (a, 21).] See also *C. micæ* PANIS *compositum.*—**C. antarthriticum.** A preparation consisting of bread-dough spread upon linen and covered with a mixture of 7 parts of camphor, 5 each of extract of opium and belladonna, and enough alcohol to insure the desired consistence. A bandage secures this to the affected joint which is thus immobilized. [Trousseau (B, 108 [a, 21]).]—**C. anthelminthicum.** Fr., *cataplasme anthelmintique.* A paste made of 30 parts each of aloes, asafœtida, olibanum, and gamboge, 240 each of powdered wormwood and powdered tansy, and a sufficient quantity of linseed oil. [B, 97 (a, 21).]—**C. anticancerosum.** See *C. ad cancrum.*—**C. antisepticum.** Fr., *cataplasme antiseptique* (ou *astringent*, ou *tanniné*). 1. An antiseptic poultice; one containing carbolic acid, creasote, charcoal, or some similar substance. 2. Of the Lipp. Disp., 1794, a mixture of 1 part each of oak-bark and willow-bark, and 6 parts of vinegar. 3. Of the Ph. of the Fr. Mil. Hosp., 1839, a preparation made by boiling together equal parts of oak-bark, barley-meal, and rye-flour, and a sufficient quantity of water. Cf. *C. astringens.* 4. Of the Frankf. Disp., 1791, a mixture of 2 parts each of willow-bark and rue, 3 of camphorated brandy, and a sufficient quantity of vinegar. 5. Of the Port. Cod., 1836, a mixture of barley-flour, water, and charcoal. [B, 108, 119 (a, 21).]—**C. antispasmodicum.** Fr., *cataplasme antispasmodique.* A mixture of 1,920 parts of cataplasm of linseed-meal prepared with a decoction of poppy-heads, 20 of powdered opium, and 30 of powdered camphor. [Cadet de Gassicourt, Pierquin (B, 97 [a, 21]).]—**C. antophthalmicum.** Fr., *cataplasme anti-ophthalmique.* A poultice made of 100 parts of bread-crumb, the yolks of 3 eggs, and 2 parts of saffron. [L, 77 (a, 21).]—**C. artificiale.** Of A. and L. Volkhausen, a bibulous paper-like substance, used as a substitute for poultices. [B, 270 (a, 21).]—**C. astringens.** An astringent poultice; made with cinchona-bark, nut-galls, alum, or some other astringent substance. [B, 108 (a, 21).]—**C. carbonaceum.** An antiseptic poultice made of 100 parts of bone-charcoal, 5 of gum arabic, 20 of glycerin, and a sufficient quantity of water. [Bernatzik (A, 319).] Cf. *C.* CARBONIS.—**C. chlorinatum.** A poultice used for the application of chlorine, especially one made of liquor sodæ chloratæ and enough white clay to make a soft paste. [B, 270.] Cf. *C.* SODÆ *chloratæ.*—**C. commune.** See *C.* LINI.—**C. compositum.** Fr., *cataplasme composé.* Ger., *zusammengesetzter Breiumschlag.* See *C. medicinale.*—**C. contra anthracem.** Fr., *cataplasme contre l'anthrax* (ou *le charbon*). Port., *c. das necessidades* [Lisb. Ph.]. A preparation made of 4 parts each of treacle and alumen calcinatum, 45 parts of honey, the yolk of an egg, and 3 parts of rye-meal. [L. 77 (a, 21).]—**C. contra epididymitidem.** Fr., *cataplasme contre les épididymites.* A paste made of 120 parts each of flaxseed-meal and powdered tormentil, 30 of mercurial ointment, 4 of extract of belladonna, and a sufficiency of linseed-oil; to be spread on linen and applied to the testicles. [L, 77 (a, 21).]—**C. corroborans.** Sp., *C. corroborante* [Sp. Ph.]. A poultice made by infusing 60 parts of species aromaticæ and 15 of Loxa cinchona-bark in 500 of boiling red wine, and adding a sufficiency of bread-crumb. [B, 200 (a, 21).] Cf. *C. roborans.*—**C. diureticum.** Fr., *cataplasme diurétique.* A mixture of 100 parts of the pulp of squill and 10 of potassium nitrate; to be applied to the abdomen. [L, 77 (a, 21).]—**C. emolliens.** Fr., *cataplasme émollient.* Ger., *erweichender Breiumschlag.* 1. See *C.* LINI. 2. See *C. pomaceum.* 3. Of the Turin Ph., 1833, a poultice of flaxseed-meal and decoction of marshmallow. 4. Of the Sp. Ph., 1798, a poultice made by macerating 10 parts of marsh-mallow-root in enough water to soften it, adding 4 parts of marsh-mallow-leaves, boiling the mixture until the moisture is nearly exhausted, pounding the pulp in a mortar, straining, and adding 2 parts of lard and the yolks of 2 eggs. 5. Of the Port. Ph., 1836, a poultice made by cooking together 6 parts of bread-crumb, a sufficient quantity of decoction of marshmallow, 2 parts of flaxseed-meal, and the yolks of 3 eggs. 6. Of the Parm. Cod., 1823, a poultice made by cooking together 36 parts of bean-meal and a sufficient quantity of decoction of marsh-mallow, and adding 3 parts of powdered marsh-mallow-root. [B, 113, 119, 270 (a, 21).]—**C. epispasticum.** See SINAPISM.—**C. excitans.** A poultice made of species aromaticæ with the addition of camphor, volatile oils, or like substances. [B, 108.]—**C. fæculosum** [Fr. Cod.]. See *Cataplasme de* FÉCULE.—**C. maturans.** Fr., *cataplasme maturatif* (ou *suppuratif*, ou *résolutif*, ou *savonneux* [5th def.]). 1. An

emollient poultice containing honey, onions, or some other like ingredient; especially one made by boiling 100 parts of species emollientes with water and mixing with 20 of the unguentum basilicum of the Fr. Cod. 2. Of the Turin Ph., 1833, a mixture of 2 parts of onion pulp and 14 of bread-crumb poultice. 3. Of the Ph. of the Fr. Mil. Hosp., 1839, a mixture of 4 parts of farinæ resolventes, a sufficient quantity of decoctum emolliens, 2 parts each of onion pulp and sorrel, and 1 part of basilicon ointment. 4. Of the Port. Ph., 1836, a poultice made by boiling together 8 parts of flaxseed, 2 of galbanum, 1 part of onion pulp, and a sufficient quantity of oil. 5. Of the Batav. Ph., 1805 (Niemann's notes), and the Frankf. Disp., 1791, a poultice made of 8 parts of bread-crumb, 1 part of Venetian soap, and 12 parts of cow's milk. 6. Of the Lond. Ph., 1837, a mixture of 236 parts of barm and 393 of flour, subjected to a gentle heat until it begins to ferment. [B, 108, 119 (a, 21).]—**C. medicinale.** Ger., *arzneiliches C.* A poultice containing an active medicinal ingredient. [B, 270.]—**C. narcoticum.** Fr., *cataplasme narcotique* (ou *anodin*, ou *vireux*). Of various old formularies, a mixture of 12 parts of emollient cataplasm and 1 part each of powdered hyoscyamus and powdered conium; or of equal parts of barley-meal, rye-flour, powdered hyoscyamus-leaves, and powdered conium-leaves; or of 2 parts of fresh hyoscyamus-leaves, 1 part of poppy-heads, 36 parts of water, and 4 parts of the farinæ emollientes. [B, 97, 119 (a, 21).]—**C. opiatum.** Fr., *cataplasme opiacé.* A poultice made of 1 part of tinctura opii crocata and 100 parts of unguentum glycerini. [B, 108.]—**C. pestilentiale** [Bates]. An application made to the glandular swellings occurring in the plague. It consisted of 8 parts of pigeon's dung, 1 part of saffron, 2 parts each of mithridaticum, theriaca londinensis, and mustard-seed, and a sufficient quantity of Venice turpentine. [B, 117.]—**C. pomaceum** [Sp. Ph., 1798]. Fr., *cataplasme anti-ophthalmique.* A poultice of 16 parts each of flaxseed-meal and lard and 1 part of saffron. [B, 119 (a, 21).]—**C. resolutivum.** Fr., *cataplasme résolutif.* A mixture of 125 parts of flaxseed poultice, 2 of ammonium chloride, and 30 of solution of subacetate of lead; or of 90 of rasped bryony, 60 of oil of hemlock, 7 of ammonium chloride, 15 of ammoniacum, 30 of elder, and a sufficiency of vinegar; to be applied to scrofulous swellings. [L, 77 (a, 21).]—**C. roborans** [Turin Ph., 1833]. A poultice made by boiling for several hours a mixture of 1 part each of cinchona, sage-leaves, and rosemary-flowers and 18 parts of red wine, digesting for a quarter of an hour, and adding a sufficient quantity of bean-flour. [B, 119 (a, 21).] Cf. *C. corroborans.*—**C. rubefaciens.** Fr., *cataplasme rubéfiant.* A rubefacient poultice; one containing mustard or some other acrid substance; of the Fr. Cod., a sinapism. [B, 108, 113 (a, 21).]—**C. sedans.** A sedative poultice; one containing belladonna, hyoscyamus, opium, or some other anodyne. [B, 108.] Cf. *C. anodynum.*—**C. simplex.** Fr., *cataplasme simple.* Ger., *einfacher Breiumschlag.* A simple poultice; one that contains no active medicinal ingredient, but simply some bland substance, such as flour, starch, bread-crumb, or linseed-meal, which, mixed with water or milk, forms a cohesive mass of proper consistence, its action being simply that of warmth and moisture. [B, 113 (a, 21).]—**C. sinapisatum.** A sinapism. [B, 270 (a, 21).]—**C'stoff** (Ger.). A material which, by simply dipping it into warm water or some medicinal liquid, may be used as a poultice (*e. g.*, spongio-piline). [B, 108, 270.]—**C. suppurans.** See *C. maturans.*—**C. vermifugum.** Fr., *cataplasme vermifuge.* A mixture of 500 parts of flaxseed poultice and 2 each of bruised garlic and asafœtida triturated with camphor cerate; to be applied to the abdomen. [L, 77 (a, 21).]—**Galvanisches C.** (Ger.). See CATAPLASME *galvanique.*—**Mineralmoor-C.** (Ger.). A poultice consisting of the mud of a mineral spring mixed with boiling water. [B, 270.]

CATAPLASME (Fr.), n. Ka^{3}t-a^3-pla^{2}zm. See CATAPLASMA.—**Carton-c.** Of Bernard, a preparation consisting of marsh-mallow or mallow-leaves spread on canvas; dipped into water, it swells up and may be used as a poultice. [B, 270.]—**C. anodin.** See CATAPLASMA *anodynum.*—**C. anticancéreux.** See CATAPLASMA *ad cancrum.*—**C. anticancéreux de Swediaur.** A mixture of 10 parts of arsenious acid, 32 of camphor, 500 of vinegar, 64 of carrot-juice, and a sufficient quantity of powdered conium. [A, 301.]—**C. antiophthalmique.** See CATAPLASMA *antophthalmicum* and CATAPLASMA *pomaceum.*—**C. antiseptique.** See CATAPLASMA *antisepticum.*—**C. antiseptique camphré** [Fr. Cod., 1837]. A preparation made by boiling 16 parts of barley-meal, 8 of powdered cinchona, and 80 of water to the consistence of a poultice, and, after the mass has cooled a little, adding 1 part of powdered camphor. The Turin Ph., 1833, ordered a mixture of 96 parts of cataplasma roborans and 3 of camphor. [B, 119 (a. 21).]—**C. aromatique** [Ph. of the Paris Mil. Hosp., 1839]. A poultice made by digesting together 3 parts of species aromaticæ, 1 part of barley-meal, and 12 parts of red wine. [B, 119 (a, 21).]—**C. astringent.** See CATAPLASMA *antisepticum* (2d def.) and CATAPLASMA *astringens.*—**C. calmant.** See CATAPLASMA *ad singultum.*—**C.-compresse Joanique inaltérable.** Cotton cloth covered with linseed-meal; used as a substitute for a poultice. [B, 270.]—**C. contre l'anthrax** (ou **le charbon**). See CATAPLASMA *contra anthracem.*—**C. diurétique.** See CATAPLASMA *diureticum.*—**C. fortifiant.** See CATAPLASMA *roborans.*—**C. galvanique.** Of Récamier, an apparatus consisting of a series of zinc and copper plates separated by layers of some moist substance, with a water-tight envelope and having a layer of cotton to be interposed between it and the skin. A galvanic current is produced which excites local sweating and acts somewhat like a poultice. [B, 270.]—**C. instantané.** Of Lelièvre, a compress soaked in carragheen mucilage, squeezed, and dried; dipped into hot water, it swells and softens and may be used as a poultice. [B, 270.]—**C. maturatif.** See CATAPLASMA *maturans.*—**C. narcotique.** See CATAPLASMA *anodynum.*—**C. résolutif.** See CATAPLASMA *resolutivum.*—**C. rubéfiant.** See SINAPISM and CATAPLASMA *acetatum.*—**C. saturné.** See *Saturnine* CATAPLASM.—**C. savonneux.** See CATAPLASMA *maturans.*—**C. suppuratif.** 1. See CATAPLASMA *maturans.* 2. An ordinary emollient poultice. [B, 119 (a, 21); L, 105.]—**C. tanniné.** See CATAPLASMA *antisepticum* (2d def.) and CATAPLASMA *astringens.*—**C. vermifuge.** See CATAPLASMA *vermifugum.*—**C. vinaigré.** See CATAPLASMA *acetatum.*—**C. vireux.** See CATAPLASMA *anodynum.*

CATAPLASTOS (Lat.), **CATAPLASTUS** (Lat.), adj's. Ka^{2}t-(ka^{3}t)-a^3-pla^{2}st(pla^{3}st)'o^{2}s, -u^{3}s(u^{4}s). Gr., καταπλαστός (from καταπλάσσειν, to smear). Smeared or plastered with ointment or the like. [A, 322.]

CATAPLECTIC, adj. Ka^{2}t-a^3-ple^{2}k'ti^{2}k. Gr., καταπληκτικός. Lat., *cataplecticus.* Fr., *cataplectique.* Coming on suddenly, fulminant (said of diseases). [A, 301, 322.]

CATAPLEXIS (Lat.), n. f. Ka^{2}t(ka^{3}t)-a^3-ple^{2}x(plax)'i^{2}s. Gen., *cataplex'eos (-is).* Gr., κατάπληξις (from κατά, down, and πλήσσειν, to strike). Fr., *cataplexie.* Ger., *Erschrecken.* Sudden prostration by the onset of disease. [A, 301, 322.]

CATAPODA [Latreille] (Lat.), n. n. pl. Ka^{2}t(ka^{3}t)-a^{2}p(a^{3}p)'-o^{2}d-a^3. From κατά, down, and πούς, a foot. See MALACOPTERYGIA.

CATAPONESIS (Lat.), n. f. Ka^{2}t(ka^{3}t)-a^3-po^{2}n-e(a)'si^{2}s. Gen., *catapones'eos (-is).* Gr., καταπόνησις (from καταπονεῖν, to overcome with excessive toil). Ger., *Ermüdung, Abmattung, Abarbeiten.* Exhaustion from excessive work. [A, 322.]

CATAPOSIS (Lat.), n. f. Ka^{2}t(ka^{3}t)-a^{2}p(a^{3}p)'o^{2}s-i^{2}s. Gen., *catapos'eos (-ap'osis).* Gr., κατάποσις (from καταπίνειν, to swallow). See DEGLUTITION.

CATAPOTIUM (Lat.), n. n. Ka^{2}t(ka^{3}t)-a^3-po(po^2)'shi^2(ti^2)-u^{3}m-(u^{4}m). Gr., καταπότιον. A preparation (such as a pill or bolus) to be swallowed whole; of Scribonius Largus, a draught to be taken undiluted. [A, 322, 325; B, 45.]—**C. Athenionis.** An ancient preparation of equal parts of powdered myrrh, pepper, castoreum, and opium, made into pills of the size of a Roman bean; used for cough. [Celsus (B, 45).]

CATAPOTIUS (Lat.), adj. Ka^{2}t(ka^{3}t)-a^3-po(po^2)'shi^2(ti^2)-u^{3}s-(u^{4}s). Capable of being swallowed whole. [A, 322.]

CATAPOTON (Lat.), n. n. Ka^{2}t(ka^{3}t)-a^{2}p(a^{3}p)'o^{2}t-o^{2}n. See CATAPOTIUM.

CATAPOTRA (Lat.), n. f. Ka^{2}t(ka^{3}t)-a^{2}p(a^{3}p)'o^{2}t-ra^3. The cardiac orifice of the stomach. [A, 322.]

CATAPOTUM (Lat.), n. n. Ka^{2}t(ka^{3}t)-a^{2}p(a^{3}p)'o^{2}t-u^{3}m(u^{4}m). See CATAPOTIUM.

CATAPSYCTICUS (Lat.), adj. Ka^{2}t(ka^{3}t)-a^3-psi^{2}k(psu^{6}k)'ti^{2}k-u^{3}s(u^{4}s). Gr., κακαψυκτικός. Refrigerant, also pertaining to refrigeration. [A, 322, 387.]

CATAPSYCTUS (Lat.), adj. Ka^{2}t(ka^{3}t)-a^3-psi^{2}k(psu^{6}k)'tu^{3}s-(tu^{4}s). Gr., κατάψυκτος. Chilled, affected by cold, pertaining to refrigeration. [A, 322, 387.]

CATAPSYXIS (Lat.), n. f. Ka^{2}t(ka^{3}t)-a^3-psi^{2}x(psu^{6}x)'i^{2}s. Gen., *catapsyx'eos (-is).* Gr., κατάψυξις (from καταψύχειν, to cool). Fr., *catapsyxie.* Ger., *Erkältung.* Chilling, refrigeration, or a sense of coldness. [A, 322, 325, 387; L, 41, 84.]

CATAPTOSIS (Lat.), n. f. Ka^{2}t(ka^{3}t)-a^{2}p(a^{3}p)-tos'i^{2}s. Gen., *captaptos'eos (-is).* Gr., κατάπτωσις (from καταπίπτειν, to fall down). Fr., *cataptose.* Ger., *Niederfallen.* A sudden falling of a person, as in epilepsy, apoplexy, etc.; according to some, epilepsy. [A, 301, 322, 325, 387; L, 41, 84, 94.]

CATAPUTIA (Lat.), n. f. Ka^{2}t(ka^{3}t)-a^3-pu^2(pu^4)'shi^2(ti^2)-a^3. Fr., *catapuce.* Ger., *Springkörner.* It., *catapuzia.* Sp., *catapucia.* The *Euphorbia lathyris.* [B, 19, 116, 173.]—**C. major.** The *Ricinus communis.* [B, 180.]—**C. minor.** See *C.*

CATARACT, n. Ka^{2}t'a^{2}r-a^{2}kt. Gr., καταράκτης, καταῤῥάκτης (from καταράσσειν, to fall down). Lat., *cataracta, catarrhacta, cataractes, catarrhactes.* Fr., *cataracte.* Ger., *Staar.* It., *cateratta.* Sp., *catarata.* An opacity of the crystalline lens or its capsule, or both. [F.]—**Adherent c.** Lat., *cataracta accreta.* Fr., *cataracte adhérente.* Ger., *angewachsener Staar.* A c. that has formed adhesions to surrounding parts. [B, 108.]—**Anterior central** (or **polar**) **c.** Lat., *cataracta polaris anterior.* Fr., *cataracte centrale* (ou *polaire*) *antérieure.* Ger., *vorderer centraler Kapselstaar, vorderer Polarstaar.* It., *cateratta centrale* (o *polare*) *anteriore.* Sp., *catarata central* (ó *polar*) *anterior.* An opacity of the central point or region of the anterior capsule and of the anterior layers of the lens immediately beneath it. It may be congenital, but is frequently formed in early childhood as the result of a perforating ulcer of the cornea. A deposit of plastic lymph upon the centre of the capsule from the ulcer impairs the nutrition of the lens by disturbance of the osmosis, and as a result the endothelial cells of the capsule proliferate and the superficial layers of the lens become opaque. [F.]—**Arido-siliquose c.** An over-mature c., perfectly dry and with a dense, wrinkled, calcareous capsule. [F.]—**Axial c.** See *Nuclear c.*—**Barred c.** Fr., *cataracte barrée.* Ger., *Balkenstaar.* Syn.: *trabecular fibrinous c.* A spurious c. in which the pupil is angular and narrowed and has behind it a capsulo-lenticular c. in front of which there is a stripe or bar of lymph, of varying consistence, which runs across the pupil. [Mackenzie (F).]—**Black c.** Lat., *cataracta nigra.* Fr., *cataracte noire.* Ger., *schwarzer Staar.* It., *cateratta nera.* Sp., *catarata negra.* 1. A nuclear c. very dark in color from the imbibition of hæmatin, and not infrequently complicated with inflammatory lesions of the deeper tunics of the eye and a fluid condition of the vitreous. 2. Formerly, amaurosis. [F.]—**Bursal capsulo-lenticular c.** Lat., *cataracta bursata.* An obsolete term for a capsulo-lenticular c. associated with the presence, within the capsule, of a small cyst filled with purulent matter, generally situated behind the lens. [F.]—**Calcareous c.** Lat., *cataracta calcarea.* Fr., *cataracte pierreuse.* A c. characterized by the deposit of carbonate and a little phosphate of calcium. [A, 301.]—**Capsular c.** Lat., *cataracta capsularis.* Fr., *cataracte capsulaire.* Ger., *Kapselstaar.* It., *cateratta capsulare.* Sp., *catarata capsular.* An opacity of the lenticular capsule, partial or complete, without opacity of the lens

itself. [F; L, 50.]—**Capsulo-lenticular c.** Lat., *cataracta capsulo-lenticularis.* Fr., *cataracte capsulo-lenticulaire.* Ger., *Kapsellinsenstaar.* It., *cateratta capsulo-lenticolare.* Sp., *catarata capsulo-lenticular.* A c. in which the opacity involves both the capsule and the substance of the lens. [F.]—**Caseous c.** Fr., *cataracte caséeuse.* See *Cheesy c.*—**Central c.** See *Nuclear c.*—**Chalky c.** Fr., *cataracte calcaire* (ou *crétacée*, ou *crayeuse*). Ger., *kalkiger Staar.* It., *cateratta calcarea.* Sp., *catarata calcarea.* See *Arido-siliquose c.*—**Cheesy c.** Lat., *cataracta caseosa.* Fr., *cataracte caséeuse.* Ger., *käsiger Staar.* It., *cateratta caseosa.* Sp., *catarata caseosa.* An over-mature c. that has undergone retrograde metamorphosis, with degeneration of the lens matter into a cheesy mass. [F.]—**Cholesterin c.** A dense white c., usually capsulo-lenticular, containing sparkling particles, supposed to be crystals of cholesterin, imbedded in the lens. [F.]—**Clotted fibrinous c.** An obsolete term for a false c. formed by a clot or plug of fibrinous exudation occupying the field of the pupil and adherent to both iris and capsule. [F.]—**Complicated c.** Lat., *cataracta complicata.* Fr., *cataracte compliquee.* Ger., *complicirter Staar.* It., *cateratta complicata.* Sp., *catarata complicida.* A c. secondary to or complicated with some other intra-ocular lesion, usually inflammatory. [F.]—**Concussion c.** A soft c. produced by concussion, as from an explosion. [F.]—**Cortical c.** Lat., *cataracta corticalis.* Fr., *cataracte corticale.* Ger., *Rindenstaar.* It., *cateratta corticale.* Sp., *catarata cortical.* An opacity of the lens mainly or entirely centred in the cortex, the nucleus, the capsule, and sometimes the subcapsular layer of the lens remaining transparent until the end. The change begins in the superficial parts at the equator of the lens, in the form of sharply defined lines or streaks, or triangular patches. [F.]—**Crystalline c.** Lat., *cataracta crystallina.* Fr., *cataracte cristalline.* See *Lenticular c.*—**Cystic c.** Fr., *cataracte cystique.* Ger., *cystischer Staar.* It., *cateratta cistica.* Sp., *catarata cística.* See *Morgagnian c.*—**Dehiscent c.** Lat., *cataracta dehiscens.* Fr., *cataracte déhiscente.* Ger., *klaffender Staar.* It., *cateratta aperta.* Sp., *catarata dehiscente.* An obsolete term used to describe a soft lenticular c. in which there are gaps or spaces between the opacities. [F.]—**Diabetic c.** Lat., *cataracta diabetica.* Fr., *cataracte diabétique.* Ger., *diabetischer Staar.* It., *cateratta diabetica.* Sp., *catarata diabética.* An opacity of the lens occurring in the course of diabetes and due to defective nutrition. It is milky white in appearance, of soft consistence, and usually involves the entire lens except the capsule. [F.]—**Discoid c.** Fr., *cataracte discoïde.* Ger., *scheibenförmiger Staar.* It., *cateratta discoidea.* Sp., *catarata discoidea.* An obsolete term for the ordinary simple senile c. [F.]—**Dotted c.** See *Punctated c.*—**Etiolated c.** Fr., *cataracte étiolée.* An obsolete term for a very white opacity in the lens.—**False c.** Lat., *cataracta spuria.* Fr., *cataracte fausse.* Ger., *falscher Staar.* It., *cateratta falsa.* Sp., *catarata falsa.* An obsolete term for an opacity in the axis of the visual rays, but not in the lens (*e. g.*, in the cornea or the aqueous humor). [F.]—**Fibrinous c.** Fr., *cataracte fibrineuse.* Ger., *fibrinöser Staar.* It., *cateratta fibrinosa.* Sp., *catarata fibrinosa.* A spurious form of c. consisting in an effusion of plastic lymph into the field of the pupil and on the capsule. [F.]—**Fibroid c.** Lat., *cataracta fibrosa.* Fr., *cataracte fibroïde.* Ger., *fibröser Staar.* It., *cateratta fibrosa.* Sp., *catarata fibrosa.* An opacity somewhere in the axis of the visual rays, but not in the lens; a false c. [F.]—**Filamentous c.** An old term for a c. in which the lens appears to be full of fine filaments. [L, 94.]—**Fixed c.** Fr., *cataracte fixe.* Ger., *fester Staar.* It., *cateratta fissa.* Sp., *catarata fija.* An obsolete term used to distinguish an immovable opaque lens from one that trembled or oscillated. [F.]—**Flocculent fibrinous c.** A false c. An exudative, fibrinous opacity like a fine network in the field of the pupil. (Obsolete.) [F.]—**Fluid c.** Lat., *cataracta fluida* (seu *liquida*). Fr., *cataracte liquide.* Ger., *flüssiger Staar.* It., *cateratta fluida.* Sp., *catarata fluida.* See *Morgagnian c.*—**Fusiform c.** Lat., *cataracta fusiformis.* Fr., *cataracte fusiforme.* Ger., *spindelförmiger Staar.* It., *cateratta fusiforme.* Sp., *catarata fusiforme.* The typical form of nuclear c. running through the entire antero-posterior diameter of the lens; spindle-shaped c.—**Glaucomatous c.** Lat., *cataracta glaucomatosa.* Fr., *cataracte glaucomateuse.* Ger., *glaucomatöser Staar.* It., *cateratta glaucomatosa.* Sp., *catarata glaucomatosa.* A secondary complicated c. occurring in the course of and in consequence of a glaucomatous condition of the eye. [F.]—**Glycosuric c.** See *Diabetic c.*—**Green c.** Lat., *cataracta viridis.* Fr., *cataracte verte.* Ger., *grüner Staar.* It., *cateratta verde.* Sp., *catarata verde.* See *Glaucomatous c.*—**Grumous c.** Lat., *cataracta cruenta.* Fr., *cataracte grumeuse* (ou *sanguinolente*). Ger., *klumpichter Staar.* It., *cateratta grumosa.* Sp., *catarata grumosa.* A false c. due to hæmorrhage into the cornea or anterior chamber, or into the vitreous. [F.]—**Gypseous c.** Lat., *cataracta gypsea.* An over-mature, degenerated capsular or capsulo-lenticular c.; so called from its white appearance. [F.]—**Hæmorrhagic c.** Lat., *cataracta hæmorrhagica.* Fr., *cataracte hémorrhagique.* A form of c. in which hæmorrhage is apt to occur at the time of the operation for its extraction, with precipitate escape of the lens, with or without the vitreous. [Dufour, "Progr. méd.," May 15, 1886, p. 422.]—**Hard c.** Lat., *cataracta dura.* Fr., *cataracte dure.* Ger., *harter Staar.* It., *cateratta dura.* Sp., *catarata dura.* Syn.: *nuclear* or *senile* c. An opacity of the lens, involving the entire lens, varying in color from gray to yellowish gray, and of hard resistent consistence. It occurs usually in persons beyond middle life, and by some authors is considered as synonymous with senile c. [F.]—**Hyaloid c.** Lat., *cataracta hyaloidea.* Fr., *cataracte hyaloïde.* Ger., *Glaskörperstaar.* It., *cateratta vitrea.* Sp., *catarata vitrea.* A false c. supposed to be due to opacity of the anterior portion of the vitreous humor. [F.]—**Hypermature c.** See *Over-ripe c.*—**Immature c.** Lat., *cataracta immatura.* Fr., *cataracte incomplète.* Ger., *unreifer Staar.* It., *cateratta immatura.* Sp., *catarata inmatura.* An unripe c. A term usually applied to the early stages of senile hard c. [F.]—**Incipient c.** Lat., *cataracta incipiens.* Fr., *cataracte naissante.* Ger., *beginnender Staar.* It., *cateratta nascenta.* Sp., *catarata incipiente.* Syn.: *gerontoxon lentis*, *arcus senilis lentis.* The first stages of any c., whether hard or soft, cortical or central; the first faint striæ seen at the periphery of a lens or the faint dots seen in the nucleus. [F.]—**Inflammatory c.** Fr., *cataracte inflammatoire.* Ger., *entzündlicher Staar.* It., *cateratta inflammatoria.* Sp., *catarata inflamatoria.* A secondary c. resulting from an intra-ocular inflammation of some kind. [F.]—**Interstitial c.** Lat., *cataracta interstitialis.* Fr., *cataracte interstitielle.* See *Lenticular c.*—**Juvenile c.** Lat., *cataracta juvenum.* The c. of young persons. [F.]—**Lamellar c., Laminar c., Laminated c.** Fr., *cataracte lamellée* (ou *lamelleuse*, ou *lamineuse*). Ger., *Schichtstaar.* It., *cateratta lamellata* (o *laminosa*). Sp., *catarata lamelliforme* (ó *laminosa*). Syn.: *Zonular c.* An opacity of the lens, partial in character, involving one or more zones or laminæ of the lens between the nucleus and the capsule, the remainder of the lens being transparent. It is generally congenital or formed a few months after birth. It is often stationary for years. [F.]—**Lenticular c.** Lat., *cataracta lenticularis.* Fr., *cataracte lenticulaire.* Ger., *Linsenstaar.* It., *cateratta lenticolare.* Sp., *catarata lenticular.* A c. in which the opacity is confined to the lens, the capsule remaining transparent. [F.]—**Lymph c., Lymphatic c.** Lat., *cataracta lymphatica.* Fr., *cataracte lymphatique.* Ger., *Lymphstaar.* It., *cateratta linfatica.* Sp., *catarata linfática.* See *Morgagnian c.*—**Mature c.** Lat., *cataracta matura.* Fr., *cataracte mûre.* Ger., *reifer Staar.* It., *cateratta matura.* Sp., *catarata madura.* A c. involving the entire lens, so far advanced and so homogeneous as to be ready for extraction. [F.]—**Membranous c.** Lat., *cataracta membranacea.* Fr., *cataracte membraneuse.* Ger., *häutiger Staar.* It., *cateratta membranoso.* Sp., *catarata membranosa.* A c. that consists at first of a fibrinous deposit from the iris into the pupillary space and upon the capsule; but subsequently the latter becomes opaque, and a capsular c. is thus formed. [F.]—**Milky c.** Lat., *cataracta lactea.* Fr., *cataracte laiteuse.* Ger., *Milchstaar.* It., *cateratta lattea* (o *latticinosa*). Sp., *catarata láctea* (ó *lechera*). A soft c. in which the opacity is very white, like milk in color.—**Mixed c.** Lat., *cataracta mixta.* Fr., *cataracte mixte.* Ger., *gemischter Staar.* It., *cateratta mista.* Sp., *catarata mesclada.* An opacity of the lens which begins as a cortical c. in sharply defined lines or streaks or triangular patches, which affect both the anterior and posterior layers of the lens, but in which the nucleus, sooner or later, also becomes hazy, and the whole lens eventually becomes opaque. [F.]—**Morgagnian c.** Lat., *cataracta morgagniana.* Fr., *cataracte de Morgagni.* Ger., *Morgagni'scher Staar.* It., *cateratta di Morgagni.* Sp., *catarata de Morgagni.* An over-mature c. in which there are degenerative changes, a softening or liquefying of the cortex, while the nucleus remains hard. Sometimes the nucleus sinks through the liquefied cortex to the bottom of the intracapsular space. [F.]—**Myeline c.** Fr., *cataracte myéloïde.* Ger., *markähnlicher Staar.* A shrunken disc-shaped c. the chief constituent of which is a half-transparent, yellowish or brownish, dry and friable substance. When operated upon, these cataracts split in all directions and are removed with great difficulty. [Stellwag (F).]—**Naphthalinic c.** A c. due to the action of naphthaline. [Hess, "Rev. gén. d'ophthal.," Sept. 30, 1887; "N. Y. Med. Jour.," Apr. 28, 1888, p. 472.]—**Nuclear c.** Lat., *cataracta nuclearis.* Fr., *cataracte nucléaire.* Ger., *Kernstaar.* An opacity of the lens which begins in the nucleus. It is of moderate extent and is surrounded by more or less transparent lens substance. The nucleus is usually fine and yellow, not really opaque, but densely hazy. [F.]—**Osseous c.** Lat., *cataracta ossea.* Fr., *cataracte osseuse.* Ger., *knöcherner Staar.* It., *cateratta ossea.* Sp., *catarata huesosa.* An incorrect term to denote a very hard calcareous c. No true bone-formation has ever been found in a c., though bony deposits have been developed within the capsule. [F.]—**Over-ripe c.** Fr., *cataracte hypermature.* Ger., *überreifer Staar.* It., *cateratta ipermatura.* Sp., *catarata hipermatura.* A c. in which degenerative changes have occurred. The lens may become harder and smaller or calcareous with fatty granulations, or it may undergo partial absorption and shrink to a thin, hard, brittle disc. [F.]—**Partial c.** Lat., *cataracta partialis.* Fr., *cataracte partielle.* Ger., *partieller Staar.* It., *cateratta parziale.* Sp., *catarata parcial.* An incomplete, immature c.; an opacity which does not involve the entire lens. [F.]—**Perinuclear c.** See *Zonular c.*—**Pigmented c., Pigmentous c.** Lat., *cataracta pigmentosa.* Fr., *cataracte pigmentée* (ou *dendritique*). Ger., *pigmentirter* (oder *geschminkter*) *Staar.* A false c. usually produced by a violent concussion or blow on the eye, which has detached the pigment from the posterior surface of the iris, whence results a sort of arborescent appearance. [F.]—**Polar c.** Fr., *cataracte polaire.* Ger., *Polar-Staar.* See *Anterior polar c.* and *Posterior polar c.*—**Posterior polar c.** Lat., *cataracta capsularis posterior.* Fr., *cataracte polaire postérieure.* Ger., *hinterer Polar-Staar.* It., *cateratta polare posteriore.* Sp., *catarata polar posterior.* An opacity of the lens in the form either of centripetal stripes or of circumscribed spots or patches which begin at the posterior pole, just beneath the posterior capsule. It is often a sign of disease of the vitreous, the chorioid, or the retina. [F.]—**Primary c., Primitive c.** Fr., *cataracte primaire.* Ger., *Primär-Staar.* It., *cateratta primaria.* Sp., *catarata primaria.* A c. which is developed without any known connection with other disease of the eye. [F.]—**Progressive c.** Lat., *cataracta progressiva.* Fr., *cataracte progressive.* Ger., *fortschreitender Staar.* It., *cateratta progressiva.* Sp., *catarata progresiva.* Any opacity of the lens which shows a tendency to increase. [F.]—**Pseudomembranous c.** Fr., *cataracte pseudomembraneuse.* A condition in which there are white spots on the lens due to iritis. [L, 49.]—**Punctated c.** Lat., *cataracta punctata.* Fr., *cataracte ponctuée.* Ger., *punktförmiger Staar.* It., *cateratta puntata.* Sp., *catarata puntuada.* A cortical c. in which there is a large number of very small dots or very small streaks. [F.]—**Purulent c., Putrid c.**

Lat., *cataracta puriformis*. Fr., *cataracte purulente*. Ger., *Eiter-Staar*. A term formerly employed for hypopyon. [F.]—**Pyramidal c.** Lat., *cataracta pyramidalis*. Fr., *cataracte pyramidale*. Ger., *Pyramidalstaar*. It., *cateratta piramidale*. Sp., *catarata piramidal*. A form of c. resulting from central perforating ulceration of the cornea in early life, and generally associated with central opacity of the cornea. It appears as a small, sharply defined spot of chalk-white opacity at the anterior pole of the lens, which, when viewed laterally, stands forward as a little nipple or pyramid. It consists of the degenerated products of a localized inflammation just beneath the lens-capsule with the addition of organized lymph deposited on the capsule from the iris. [F.]—**Regressive c.** A c. that undergoes regressive change and tends to disappear; usually occurring in young persons as a symptom of interference with the nutrition of the lens, but occasionally observed in cases of ordinary senile c. [F.]—**Ripe c.** See *Mature c.* [F.]—**Sanguineous c.** Lat., *cataracta sanguinolenta*. An old term for a false c. consisting of a fibrinous exudation in the field of the pupil, in the interstices of which minute clots of blood are lodged. [F.]—**Secondary c.** Lat., *cataracta secundaria*. Fr., *cataracte secondaire*. Ger., *Secundärstaar, complicirter Staar*. It., *cateratta secondaria*. Sp., *catarata secundaria*. A c. which is the consequence of some local disease of the eye, such as irido-cyclitis or irido-chorioiditis, glaucoma, detachment of the retina, or intra-ocular tumor. [F.]—**Sedimentary c.** Fr., *cataracte sédimentaire*. A term improperly applied to the formation of a dense fibrous false membrane giving rise to a secondary c. [A, 301.]—**Senile c.** Lat., *cataracta senilis*. Fr., *cataracte sénile*. Ger., *Greisenstaar, Alterstaar*. It., *cateratta senile*. Sp., *catarata senil*. The hard, mature, ripe c. of advancing years. It usually begins at the periphery and marches steadily toward the centre. [F.]—**Shaking c.** See *Tremulous c.*—**Siliculose c., Siliquose c.** Lat., *cataracta siliquata*. Fr., *cataracte siliculeuse*. Ger., *siliculöser Staar*. It., *cateratta siliculosa*. Sp., *catarata silicosa*. See *Arido-siliquose c.*—**Soft c.** Lat., *cataracta mollis*. Fr., *cataracte molle*. Ger., *weicher Staar, Jungstaar*. It., *cateratta molle*. Sp., *catarata blanda*. A c. in which the cortical portion, also sometimes the nucleus, is of soft consistence, as distinguished from the hard senile c. [F.]—**Solid c.** See *Hard c.*—**Spindle-shaped c.** See *Fusiform c.*—**Spontaneous c.** Fr., *cataracte spontanée*. It., *cateratta spontanea*. Sp., *catarata espontánea*. A c. occurring idiopathically; a simple c.—**Spurious c.** See *False c.*—**Stationary c.** Lat., *cataracta stationaria*. Fr., *cataracte stationnaire*. Ger., *stationärer Staar*. It., *cateratta stazionaria*. Sp., *catarata estacionaria*. An opacity of the lens of any character, partial and unchanged. One that does not increase. [F.]—**Stellate c.** Lat., *cataracta stellata*. Fr., *cataracte étoilée*. Ger., *Sternstaar*. It., *cateratta stellata*. Sp., *catarata estrellada*. An immature c., so called because of the star-like or radiate character of the opacity. [F.]—**Stony c.** Lat., *cataracta lapidea*. Fr., *cataracte pierreuse*. Ger., *steinharter Staar*. It., *cateratta pietrosa*. Sp., *catarata pétrea*. A degenerated c., which has become of an intense hardness. [F.]—**Striated c.** Fr., *cataracte striée*. Ger., *gestreifter Staar*. It., *cateratta striata*. Sp., *catarata estriada*. A cortical c. in which there are many fine streaks or stripes. [F.]—**Trabecular fibrinous c.** See *Barred c.*—**Traumatic c.** Lat., *cataracta traumatica*. Fr., *cataracte traumatique*. Ger., *Wundstaar, traumatischer Staar*. It., *cateratta traumatica*. Sp., *catarata traumática*. An opacity of the lens resulting from injury to the eye. In almost all cases there is a wound of the lens capsule; the aqueous humor, passing through the wound, is imbibed by the lens fibres, which swell up, become opaque, and are finally disintegrated and absorbed. [F.]—**Tremulous c.** Lat., *cataracta tremulans*. Fr., *cataracte branlante*. Ger., *zitternder Staar, Zitterstaar, Schwimmstaar*. It., *cateratta tremolosa*. Sp., *catarata trémola*. A c. complicated with or due to laceration of the zonule of Zinn, so that movements of the eyeball cause trembling of the iris and of the c.; probably due to fluid vitreous or rupture of the suspensory ligament. [A, 326; F.]—**True c.** Lat., *cataracta vera*. See *Lenticular c.*—**Unripe c.** Fr., *cataracte incomplète*. Ger., *unreifer Staar*. It., *cateratta immatura*. Sp., *catarata inmatura*. An immature c.; one not yet fit for operation. [F.]—**Vacillating c.** See *Tremulous c.*—**Vitreous c.** A faulty term formerly used to describe the result of a chronic inflammatory condition of the vitreous with dense opacities involving the posterior capsule and sometimes the posterior layers of the lens. [F.]—**Zonular c.** Lat., *cataracta zonularis*. Fr., *cataracte zonulaire*. Ger., *Schichtstaar*. It., *cateratta zonulare (o lamellosa)*. Sp., *catarata zonular (ó laminada)*. Syn.: *lamellar c.* A pecular form of c. in which the superficial laminæ and the nucleus of the lens are transparent, a layer or shell of opacity being present between them. [F.]

CATARACTA (Lat.), n. f. Ka²t(ka³t)-a²r(a³r)-a²k(a³k)'ta³. See CATARACT.—**C. accreta.** See *Adherent* CATARACT.—**C. acquisita.** Fr., *cataracte acquise*. Ger., *erworbener Staar*. It., *cateratta acquisitata*. Sp., *catarata adquirida*. A c. which comes on during extra-uterine life, as distinguished from a congenital c. [F.]—**C. accreta, C. adhærens.** See *Adherent* CATARACT.—**C. adnata.** A congenital cataract. [F.]—**C. adventitia.** An acquired cataract. [L, 135.]—**C. albuminosa.** Fr., *cataracte albumineuse*. It., *cateratta albuminosa*. An accidental membrane behind the iris. [L, 44.]—**C. arborescens.** See *Pigmentous* CATARACT.—**C. argentea.** Fr., *cataracte argentée*. Ger., *Silbernstaar*. It., *cateratta argentina*. Sp., *catarata plateada*. See *C. cholesterinica*.—**C. arida siliquata, C. arido-siliquata.** See *Arido-siliquose* CATARACT.—**C. axialis.** See *Nuclear* CATARACT.—**C. brunescens.** See *Black* CATARACT.—**C. bursata.** See *Bursal capsulo-lenticular* CATARACT.—**C. cærulea.** Fr., *cataracte azure* (ou *bleue*). Ger., *blauer Staar*. It., *cateratta azzura*. Sp., *catarata azulada*. See *Punctated* CATARACT.—**C. calcarea.** See *Calcareous* CATARACT.—**C. capsularis.** See *Capsular* CATARACT.—**C. capsularis anterior.** See *Anterior polar* CATARACT.—**C. capsularis lenticularis arida siliquata.** See *Arido-siliquose* CATARACT.—**C. capsularis lenticularis bursata** (seu cum bursa ichorem continente). It., *cateratta dendritica*. See *Pigmentous* CATARACT.—**C. diabetica.** See *Diabetic* CATARACT.—**C. dimidiata.** Fr., *cataracte dimidiée*. A variety of cataract in which one half of the capsule is opaque; an over-ripe cataract in which the opacity appears to be divided or halved. [F.]—**C. dura.** See *Hard* CATARACT.—**C. elastica.** See *Tremulous* CATARACT.—**C. ergotica.** A soft cataract, of slow growth, supposed to be due to ergotism. [F.]—**C. fenestrata.** Fr., *cataracte fenêtrée*. Ger., *gefensterter Staar*. It., *cateratta finestrata*. Sp., *catarata agujereada*. A soft cataract in which the opacity is not continuous or homogenous, but in which there are patches or islets of clear lens substance. [F.]—**C. fibrosa.** See *Fibroid* CATARACT.—**C. fibroso-calcarea.** An over-ripe cataract in which there is a thick layer of connective tissue formed on the inner surface of the capsule, within which there is a fatty, chalky pulp with large stony concretions or a sclerosed nucleus. [Stellwag (F).]—**C. fluida.** See *Morgagnian* CATARACT.—**C. fluida cum nucleo, C. fluidodura.** The advanced stage of Morgagnian cataract. [F.]—**C. fusiformis.** See *Fusiform* CATARACT.—**C. gelatinosa.** See *Soft* CATARACT.—**C. glauca.** See GLAUCOMA.—**C. glaucomatosa.** See *Glaucomatous* CATARACT.—**C. gruminosa, C. grumosa.** See *Grumous* CATARACT.—**C. gypsea.** See *Gypseous* CATARACT.—**C. hæmorrhagica.** See *Grumous* CATARACT.—**C. hyaloidea.** See *Hyaloid* CATARACT.—**C. hypermatura.** See *Over-ripe* CATARACT.—**C. ichorem tenens.** An obsolete term for a variety of degenerated fluid cataract supposed to contain pus. [F.]—**C. immatura.** See *Immature* CATARACT.—**C. incipiens.** See *Incipient* CATARACT.—**C. interstitialis.** See *Lenticular* CATARACT and *Morgagnian* CATARACT.—**C. inveterata.** See *Mature* CATARACT.—**C. juvenum.** See *Juvenile* CATARACT.—**C. lactea, C. lacticolor.** See *Milky* CATARACT and *Morgagnian* CATARACT.—**C. lapidea.** See *Stony* CATARACT.—**C. lenticularis.** See *Lenticular* CATARACT.—**C. lenticularis corticalis.** See *Cortical* CATARACT.—**C. lenticularis nuclearis.** See *Nuclear* CATARACT.—**C. lenticularis totalis.** See *C. totalis*.—**C. lentis.** See *Lenticular* CATARACT.—**C. lentis centralis.** See *Nuclear* CATARACT.—**C. liquida.** See *Fluid* CATARACT.—**C. liquoris Morgagni.** See *Morgagnian* CATARACT.—**C. lymphatica.** See *Lymphatic* CATARACT.—**C. marmoracea.** Fr., *cataracte marmoracée*. Ger., *Marmornerstaar*. It., *cateratta marmorea*. Sp., *catarata marmórea*. An old term for a hard, somewhat flattened calcareous capsulo-lenticular cataract. [F.]—**C. matura.** See *Mature* CATARACT.—**C. maturescens.** A cataract which is becoming ripe. [F.]—**C. membranacea.** See *Membranous* CATARACT.—**C. membranacea pupillaris.** Membranous obstruction of the pupil. [L, 135.]—**C. migrans.** An opaque dislocated lens that moves with every motion of the eye. [F.]—**C. mixta.** See *Mixed* CATARACT.—**C. mollis.** See *Soft* CATARACT.—**C. morgagniana.** See *Morgagnian* CATARACT.—**C. natans, C. natatilis.** See *Tremulous* CATARACT.—**C. nigra.** See *Black* CATARACT.—**C. nondum matura.** See *Immature* CATARACT.—**C. nubeculosa.** Fr., *cataracte nubéculeuse*. An irregularly cloudy lenticular cataract. [F.]—**C. nuclearis.** See *Nuclear* CATARACT.—**C. ossea.** See *Osseous* CATARACT.—**C. partialis.** See *Partial* CATARACT.—**C. perinuclearis.** See *Zonular* CATARACT.—**C. peripherica.** A cataract beginning at the periphery of the lens; the usual form of senile cataract. [F.]—**C. pigmentosa.** See *Pigmentous* CATARACT.—**C. polaris anterior.** See *Anterior polar* CATARACT.—**C. polaris posterior.** See *Posterior polar* CATARACT.—**C. progressiva.** See *Progressive* CATARACT.—**C. pseudomembranosa.** An old term for obstruction of the pupil by inflammatory products attached to the anterior capsule of the lens. [F.]—**C. punctata.** See *Punctated* CATARACT.—**C. puriformis, C. purulenta, C. putrida.** See *Purulent* CATARACT.—**C. pyramidalis, C. pyramidata.** See *Pyramidal* CATARACT.—**C. recens.** See *Immature* CATARACT.—**C. rubra.** See *Black* CATARACT.—**C. sanguinolenta.** See *Sanguineous* CATARACT.—**C. scabrosa.** See *Soft* CATARACT.—**C. secundaria.** See *Secondary* CATARACT.—**C. senilis.** See under *Senile* CATARACT.—**C. siliquata, C. siliquosa.** See *Arido-siliquose* CATARACT.—**C. spuria.** See *False* CATARACT.—**C. stationaria.** See *Stationary* CATARACT.—**C. stellata.** See *Stellate* CATARACT.—**C. striata.** A cataract in which the opacities are in the form of striæ; the usual form of incipient senile cataract. [F.]—**C. tenax.** See *Hard* CATARACT.—**C. totalis.** A cataract which involves the entire lens. [F.]—

C. trabecularis. A name given by J. A. Schmidt to a fancied form of opacity resembling transverse divisions or beams. [F.] See *Barred* CATARACT.—**C. traumatica.** See *Traumatic* CATARACT.—**C. tremula, C. tremulans.** See *Tremulous* CATARACT.—**C. tumescens.** A cataract, usually soft, which is growing very rapidly and in which the lens substance has swollen considerably, presumably from imbibition. [F.]—**C. variegata.** Fr., *cataracte variée* (ou *nuancée*). Ger., *bunter Staar.* It., *cateratta variata* (o *variegiata*). Sp., *catarata vareteada.* See *C. marmoracea.*—**C. vera.** See *Lenticular* CATARACT.—**C. vesicularis.** Fr., *cataracte vésiculaire.* Ger., *vesiculärer Staar.* It., *cateratta vesiculare.* Sp., *catarata vesicular.* See *Morgagnian* CATARACT.—**C. vieta.** An obsolete term for concussion of the lens with rupture of the zonule. [F.]—**C. virgata.** A cataract with linear opacities. [D, 132.]—**C. viridis.** An obsolete term for glaucoma. [F.] See also *Green* CATARACT.—**C. zonularis.** See *Zonular* CATARACT.

CATARACTE (Fr.), n. Ka³t-a³r-a²kt. See CATARACT.—**C. à trois branches.** A cataract with three radiating spokes of opacity. [L, 41.]—**C. azure.** See *Punctated* CATARACT.—**C. barrée.** See *Barred* CATARACT.—**C. blanche.** A cataract in which the opacity is white. [L, 43.]—**C. bleue.** See *Punctated* CATARACT.—**C. branlante.** See *Tremulous* CATARACT.—**C. brune.** A cataract in which the opacity is brownish. [L, 43.]—**C. caséeuse.** See *Cheesy* CATARACT.—**C. centrale en pointe.** See *Anterior polar* CATARACT.—**C. commençante.** See *Incipient* CATARACT.—**C. crayeuse.** See *Arido-siliquose* CATARACT.—**C. cristalline.** See *Lenticular* CATARACT.—**C. cystique.** See *Morgagnian* CATARACT.—**C. dimidiée.** See CATARACTA *dimidiata.*—**C. demi-molle.** See *Mixed* CATARACT.—**C. de Morgagni.** See *Morgagnian* CATARACT.—**C. dendritique.** See *Pigmentous* CATARACT.—**C. dure.** See *Hard* CATARACT.—**C. étoilée.** See *Stellate* CATARACT.—**C. fausse.** See *False* CATARACT.—**C. fenêtrée.** See CATARACTA *fenestrata.*—**C. fixe.** See *Fixed* CATARACT.—**C. fétide.** See *Purulent* CATARACT.—**C. franche.** See *Lenticular* CATARACT.—**C. grise.** A gray cataract.—**C. incomplète.** See *Immature* CATARACT.—**C. interstitielle.** See *Lenticular* CATARACT. [L, 41.]—**C. jaune.** A cataract in which the opacity is yellow. [L, 43.]—**C. laiteuse.** See *Milky* CATARACT.—**C. lamellée, C. lamelleuse, C. lamineuse.** See *Lamellar* CATARACT.—**C. liquide.** See *Morgagnian* CATARACT.—**C. molle.** See *Soft* CATARACT.—**C. mûre.** See *Mature* CATARACT.—**C. myeloïde.** See *Myeline* CATARACT.—**C. naissante.** See *Incipient* CATARACT.—**C. néomembraneuse.** See *Pseudomembranous* CATARACT.—**C. noire.** See *Black* CATARACT.—**C. nuancée.** See CATARACTA *marmoracea.*—**C. pierreuse, C. plâtreuse.** See *Stony* CATARACT.—**C. pointillée, C. ponctuée.** *Punctated* CATARACT.—**C. polaire antérieure.** See *Anterior polar* CATARACT.—**C. polaire postérieure.** See *Posterior polar* CATARACT.—**C. rouge.** See *Black* CATARACT.—**C. sanguinolente.** See *Grumous* CATARACT.—**C. siliculeuse, C. siliqueuse.** See *Arido-siliquose* CATARACT.—**C. stratifiée.** See *Zonular* CATARACT.—**C. trop mûre.** See *Over-ripe* CATARACT.—**C. végétante.** See *Anterior polar* CATARACT.—**C. verte.** See GLAUCOMA. [L, 43.]

CATARACTÉ (Fr.), adj. Ka³t-a³r-a²k-ta. See CATARACTOUS.

CATARACTICUS (Lat.), adj. Ka²t(ka³t)-a²r(a³r)-a²k(a³k)′-ti²k-u³s(u⁴s). See CATARACTOUS.

CATARACTOCATAPIESIS (Lat.), n. f. Ka²t(ka³t)-a²r(a³r)-a²k(a³k)″to(to²)-ka²t(ka³t)-a³-pi(pi²)′e²s-i²s. Gen., *cataractocatapies′eos* (*-pi′esis*). From καταράκτης, a cataract, and καταπίεσις, depression. The operation of depressing a cataract. [A, 322.]

CATARACTOCATATHESIS (Lat.), n. f. Ka²t(ka³t)-a²r(a³r)-a²k(a³k)″to(to²)-ka²t(ka³t)-a²th(a³th)′e²s-i²s. Gen., *cataractocatathes′eos* (*-ath′esis*). From καταράκτης, a cataract, and κατάθεσις, depression. See CATARACTOCATAPIESIS.

CATARACTOUS, adj. Ka²t-a²r-a²k′tu³s. Lat., *cataracticus.* Fr., *cataracté.* Affected with or of the nature of cataract. [A, 301.]

CATARIA (Lat.), n. f. Ka²t(ka³t)-a(a³)′ri² a³. Fr., *cataire, herbe aux chats.* Ger., *Katzenmünze.* Catnep or catmint (*Nepeta c.*); of Mönch, the genus *Nepeta.* [B, 42, 121.]—**C. major vulgaris** [Tournefort], **C. vulgaris** [Mönch]. The *Nepeta c.* [B, 121.]—**Herba catariæ.** The herb of *Nepeta c.* [B, 180.]

CATARIEÆ (Lat.), n. f. pl. Ka²t(ka³t)-a²r(a³r)-i(i²)′e²-e(a³-e²). Of Dumortier, a subtribe of the *Nepeteæ,* comprising *Satureja, Nepeta, Glechoma, Hyssopus, Cunila, Hedeoma,* etc. [B, 170.]

CATARRH, n. Ka²t-a³r′. Gr., κατάρροος, καταρροῦς (from κατά, down, and ῥεῖν, to flow). Lat., *catarrhus.* Fr., *catarrhe.* Ger., *C., Katarrh, Schnupfen.* It., Sp., *catarro.* A simple inflammation of any mucous membrane, in which the blood-vessels become engorged, and swelling takes place from exudation of serum. The secretion of the mucous glands is at first checked and the membrane is dry; afterward there is an excessive production of mucus, which oozes out together with serum and leucocytes in greater or less numbers. There is a copious generation or proliferation of young epithelial cells, which push their way to the surface, while the surface-epithelium is shed as rapidly as it is produced, or even more rapidly. The secretion may be abnormally thin, thick, or acrid. [A, 2; α, 17.] In common parlance, the term, used without qualification, is usually understood to mean a c. of the nose or of the nose and pharynx, especially one that is chronic. It is sometimes applied to superficial inflammations of the skin.—**Alcoholic c.** Fr., *catarrhe gastrique des alcooliques.* A chronic c. of the stomach due to the abuse of alcohol. [Éloy, "Union méd.," May 24, 1884, p. 913 (D).]—**Alveolar c.** A condition of the pulmonary alveoli in which they are more or less completely filled with modified epithelial cells, together with some red and white blood-corpuscles, floating in a granular liquid exudate. It occurs in broncho-pneumonia. [Cornil and Ranvier (α, 18).]—**Apex c.** C. of the bronchial tubes at the apex of the lungs. [α, 7.]—**Atrophic nasal c.** A chronic nasal c. in which, from loss of the glands or interference with their function by pressure of the enlarged stroma, dryness and atrophy of the membrane are caused. [Lefferts, A, 63 (α, 17).]—**Autumnal c.** Of Wyman, the hay fever occurring in early autumn. [D, 64.]—**Blitzc′** (Ger.). See INFLUENZA.—**Bostock's c.** See CATARRHUS *æstivus.*—**Bronchial c.** Lat., *catarrhus bronchiorum.* Fr., *catarrhe bronchique.* Ger., *Bronchialc′.* A "cold in the chest"; an œdematous and infiltrated condition of the mucous membrane of more or fewer of the bronchial tubes, with increased mucous secretion which subsequently becomes more or less purulent. It is usually associated with or follows c. of the nasal cavities and frontal sinus and occasionally laryngeal catarrh. [D, 1; α, 17.]—**Choleriform gastro-intestinal c.** [Rilliet and Barthez]. See CHOLERA *infantum.*—**Diffuse c's of the skin.** Ger., *Flächencatarrhe der Haut.* In Auspitz's classification of skin diseases, the first family of the *dermatitides catarrhales* (see under DERMATITIS), embracing such c's of the skin as tend to diffuse themselves over the surface. They include erythema simplex and eczema. [G, 4.]—**Dry c.** Lat., *catarrhus siccus.* Fr., *catarrhe sec.* Of Laennec, a bronchitis in which there are severe paroxysms of painful coughing, with but little expectoration, which consists of a tenacious grayish secretion. Its seat is chiefly in the smaller bronchi, the mucous membrane of which is engorged with blood and much swollen. [L, 20.] See also *Congestive* ASTHMA.—**Eitriger C.** (Ger.). See *Purulent c.*—**Engorgement c's of the skin.** Ger., *Stauungskatarrhe der Haut.* C's of the skin attended with vascular engorgement; in Auspitz's classification of skin diseases, a family of the *dermatitides catarrhales,* including *ecthyma* and *ulcera cutanea.* [G, 4.]—**Epidemic c.** See INFLUENZA.—**Epithelial c.** A c. with an abundant discharge of epithelial cells. [D, 48.]—**Erosive c's of the skin.** Ger., *erosive Hautkatarrhe.* See STIGMATOSES.—**Follicular c.** A c. attended with enlargement of the follicles, which, becoming prominent, give a granular aspect to the part. [L, 20.]—**Follicular c's of the skin.** Ger., *folliculäre Hautkatarrhe, Perifolliculosen. Finnenausschläge.* A family of Auspitz's *dermatitides catarrhales,* including circumfollicular inflammations of the skin (miliaria rubra, miliaria alba, acne, and sycosis). [G, 4.]—**Hæmorrhagic c.** Lat., *catarrhus hæmorrhagicus.* C. with exudation of blood along with the other secretions: seen frequently in small-pox, erysipelas, and pyæmia. [L, 20.]—**Hornc′** (Ger.). See CATARRHE *des cornes.*—**Hyperplastic naso-pharyngeal c., Hypertrophic nasal c.** A chronic catarrh accompanied by hypertrophy of the mucous membrane involved and of the glands at the vault of the pharynx. [Lefferts (A, 63); L, 20.]—**Infusorial c.** An epidemic contagious disease of the mucous membrane of the upper air-passages which may exist alone, or as a complication of some other disease, *e. g.,* pneumonia; caused by the presence of the flagellate infusorium *Asthmatos ciliaris,* described by Salisbury, Cutter, and others. [E. Cutter, "Therap. Gaz.," June, 1883, p. 237.]—**Membranous nasal c.** A form of nasal c. in which a thick, grayish-white false membrane forms, consisting of exudation cells imbedded in an unorganized matrix. The false membrane forms again rapidly if removed mechanically. [G. W. Major, "N. Y. Med. Jour.," Mar. 20, 1886, p. 324.]—**Mycotic c.** C. due to invasion by a fungus. [α, 18.]—**Papillary c.** Of Rasmussen, c. of the renal papillæ. [D, 1.]—**Pituitous c.** Fr., *catarrhe pituiteux.* Of Laennec, a chronic serous bronchorrhœa, characterized by a copious serous secretion, poor in cells, which is expectorated by severe paroxysms of coughing. It is sometimes called humid asthma, on account of the marked dyspnœa. [L, 20.]—**Purulent c.** Fr., *catarrhe puriforme.* Ger., *eitriger C.* A c. in which the secretion is purulent or semi-purulent. [α, 17.]—**Rarefying dry c. of the naso-pharynx.** A condition of diminished nutrition, occurring mostly in advanced age, in which the mucous membrane becomes thin, pale, and dry. Varicose veins sometimes course through the otherwise anæmic membrane, especially in the posterior pharyngeal wall and about the orifices of the Eustachian tubes and choanæ. [L, 20.]—**Rose c.** See *Hay* FEVER.—**Russian c.** See INFLUENZA.—**Senile c.** Lat., *catarrhus senilis.* The chronic bronchial c. of old age.—**Serous c.** A c. in which the secretion consists mainly of an exudation from the blood-vessels of a colorless or, in some cases, a blood-stained serous fluid. [D, 48.]—**Suffocative c.** Lat., *catarrhus suffocativus.* Fr., *catarrhe suffocant.* Ger., *Stickfluss.* A severe laryngitis or bronchitis producing symptoms of suffocation. [A, 326; B, 117.] Cf. *Capillary* BRONCHITIS.—**Summer c.** See *Hay* FEVER.

CATARRHACTA (Lat.), n. f. Ka²t(ka³t)-a³r-ra²k(ra³k)′ta³. See CATARACT.

CATARRHÆNICUS (Lat.), adj. Ka²t(ka³t)-a³r-re²n′(ra³-e²n′)-i²k-u³s(u⁴s). From καταῤῥαίνειν, to moisten. Pertaining to or resulting from infiltration. [A, 322.]

CATARRHAL, adj. Ka²t-a³r′a²l. Lat., *catarrhalis.* Fr., *catarrhal.* Ger., *catarrhalisch, katarrhalisch.* It., *catarrale.* Sp., *catarral.* Of the nature of or pertaining to catarrh. [D.]

CATARRHANSIS (Lat.), n. f. Ka²t(ka³t)-a³r-ra²n(ra³n)′si²s. From καταῤῥαίνειν, to moisten. Infiltration. [A, 322.]

CATARRHE (Fr.), n. Ka³t-a³r. See CATARRH.—**C. a frigore.** Catarrh due to cold. [Boucheron, "Rev. mens. des mal. de l'enfance," July, 1884, p. 339 (D).]—**C. chaud.** Acute catarrh. [L, 41.]—**C. convulsif.** Whooping-cough. [D.]—**C. d'automne.** See *Hay* FEVER.—**C. des cornes, C. des sinus.** A muco-purulent inflammation of the mucous membrane of the frontal sinuses and of the apophyses of the horns in the ox, usually due to the pressure of the yoke. There is œdematous infiltration of the lower part of the head and of the throat, with injection of the eyes and heat and tenderness of the base of the horn. [A, 301.]—**C. d'été.** See *Hay* FEVER.—**C. épidémique.** See INFLUENZA.—**C. froid.** Chronic catarrh. [L, 41.]—**C. gastrique des alcooliques.** See *Alcoholic* CATARRH.—**C. grave.** See *C. des cornes.*—**C. guttural.** Catarrh of the throat. [L.]—**C. intestinal à mucosités membraniformes.** Intestinal catarrh with membrane-like collections of mucus. [Thevenot, "Union méd.," Aug. 5, 1883, p. 218 (D).]—**C. morbilleux.** See CATARRHUS *rubeolosus.*—**C. pituiteux.** See

Pituitous CATARRH.—**C. pulmonaire épidémique.** See INFLUENZA.—**C. puriforme, C. pyoïdique** [Piorry]. See *Purulent* CATARRH.—**C. rubéolique.** See *C. morbilleux.*—**C. scarlatineux.** The catarrh of scarlet fever. [Boucheron, *l. c.* (D).]—**C. sec.** See *Dry* CATARRH.—**C. spécifique.** Gonorrhœa. [L, 88.]—**C. suffocant.** See *Suffocative* CATARRH.—**C. typhoïdique.** A c. associated with typhoid fever. [Boucheron, *l. c.* (D).]

CATARRHECTIC, adj. Ka^{2}t-a^{3}r-e^{2}k'ti^{2}k. Gr., καταῤῥηκτικός (from καταῤῥήγνυσθαι, to purge). Lat., *catarrhecticus.* Fr., *catarrhectique.* Purgative. [A, 322, 325.]

CATARRHEUMA (Lat.), n. n. Ka^{2}t(ka^{3}t)-a^{3}r-ru^{2}m'a^3. Gen., *catarrheum'atos* (*-is*). Gr., κατάῤῥευμα. Catarrh. [A, 322.]

CATARRHEUX (Fr.), adj. Ka^{3}t-a^{3}r-u^6. See CATARRHOUS.

CATARRHEXIS (Lat.), n. f. Ka^{2}t(ka^{3}t)-a^{3}r-re^{2}x(rax)'i^{2}s. Gen., *catarrhex'eos* (*-is*). Gr., κατάῤῥηξις. Fr., *catarrhexie.* A breaking or bursting out, especially a violent diarrhœa; occasionally a copious discharge from the stomach, from tumors, from the mammæ, etc. [Hippocrates (A, 322, 325).]

CATARRHINÆ (Lat.), n. f. pl. Ka^{2}t(ka^{3}t)-a^{3}r-rin(ren)'e(a^3-e^2). See CATARRHINI.

CATARRHINI (Lat.), n. m. pl. Ka^{2}t(ka^{3}t)-a^{3}r-rin(ren)'i(e). From κατά, near, and ῥίς, the nose. Fr., *catarrhiniens, catarrhins.* Ger., *Schmalnasen.* The catarrhines, or catarrhinians. Of Hæckel, a group of the *Simiæ* having oblique, flat nostrils; of Huxley, a family of the *Primates;* of Cuvier, St.-Hilaire, and Latreille, a family of the *Quadrumana.* [L, 14, 41, 56, 173, 180.]—**C. lipocerci.** A section of the *C.* embracing those without tails, *i. e.*, the anthropoid apes and man. [L, 173.]—**C. menocerci.** A section of the *C.* provided with tails. [L, 173.]

CATARRHISCHESIS (Lat.), n. f. Ka^{2}t(ka^{3}t)-a^{3}r-ri^{2}sk-(ri^{2}sch^2)'e^{2}s-i^{2}s. See CATARRHOSCHESIS.

CATARRHOE (Lat.), n. f. Ka^{2}t(ka^{3}t)-a^{3}r'ro(ro^2)-e(a). See CATARRH.

CATARRHŒCUS (Lat.), adj. Ka^{2}t(ka^{3}t) a^{3}r-rek'(ro^2'e^{2}k)-u^{3}s(u^{4}s). Gr., καταῤῥοικός. Producing or produced by catarrh. [A, 325.]

CATARRHOETICUS (Lat.), **CATARRHOICUS** (Lat.), **CATARRHOITICUS** (Lat.), adj's. Ka^{2}t(ka^{3}t)-a^{3}r-ro(ro^2)-e^{2}t'i^{2}k-u^{3}s(u^{3}s), -ro(ro^2)'i^{2}k-u^{3}s(u^{4}s), -ro(ro^2)-i^{2}t'i^{2}k-u^{3}s(u^{4}s). Ger., καταῤῥοικός, καταῤῥοιτικός. See CATARRHAL.

CATARRHOPA (Lat.), n., n. pl. of *catarrhopus* (*phymata* understood). Ka^{2}t(ka^{3}t)-a^{3}r'rop(ro^{2}p)-a^3. Pendent growths or those having a downward tendency. [L, 84, 119.]

CATARRHOPHE (Lat.), **CATARRHOPHESIS** (Lat.), n's f. Ka^{2}t(ka^{3}t)-a^{3}r'rof(ro^{2}f)-e(a), -a^{3}r-ro^{2}f-es(as)'i^{2}s. From καταῤῥοφεῖν, to swallow down. Absorption. [A, 322.]

CATARRHOPHICUS (Lat.), adj. Ka^{2}t(ka^{3}t)-a^{3}r-ro^{2}f'i^{2}k-u^{3}s-(u^{4}s). Pertaining to absorption. [A, 322.]

CATARRHOPIA (Lat.), n. f. Ka^{2}t(ka^{3}t)-a^{3}r-rop(ro^{2}p)'i^2-a^3. Gr., καταῤῥοπία. Fr., *catarrhopie.* A sloping or hanging downward; a tendency or motion of the fluids downward as in catarrh, and especially toward the abdominal viscera, as in diarrhœa. Opposed to *anarrhopia.* [A, 322, 325 (*a*, 17).]

CATARRHO-PNEUMONIA (Lat.), n. f. Ka^{2}t(ka^{3}t)-a^{3}r''ro-(ro^2)-nu^2(pnu^2)-mon(mo^{2}n)'i^2-a^3. See *Catarrhal* PNEUMONIA.

CATARRHOPOS (Lat.), **CATARRHOPUS** (Lat.), adj's. Ka^{2}t(ka^{3}t)-a^{3}r'rop(ro^{2}p)-o^{2}s, -u^{3}s(u^{4}s). Gr., κατάῤῥοπος. From κατά, down, and ῥέπειν, to incline. Fr., *catarrhopique.* 1. Having a downward inclination, motion, or tendency. 2. Decreasing, slackening. 3. Catarrhal. [A, 322; L, 135 (*a*, 17).]

CATARRHOSCHESIS (Lat.), n. f. Ka^{2}t(ka^{3}t)-a^{3}r-ro^{2}s'ke^{2}s-(ch^{2}e^{2}s)-i^{2}s. Gen., *catarrhosches'eos* (*-osch'esis*). From καταῤῥοῦς, catarrh, and σχέσις, a checking. Fr., *catarrhoschèse.* Ger., *Unterdrückung eines Catarrhs.* Suppression of a catarrh. [A, 322.]

CATARRHOSCHETICUS (Lat.), adj. Ka^{2}t(ka^{3}t)-a^{3}r-ro^{2}s-ke^{2}t(ch^{2}e^{2}t)'i^{2}k-u^{3}s(u^{4}s). Causing, resulting from, or pertaining to, the suppression of a catarrh. [A, 322 (*a*, 17).]

CATARRHOUS, adj. Ka^{2}t-a^{3}r'u^{3}s. Lat., *catarrhosus.* Fr., *catarrheux.* Sp., *catarroso.* 1. Subject to or affected with catarrh. [A, 301, 385.] 2. See CATARRHAL.

CATARRHUS (Lat.), n. m. Ka^{2}t(ka^{3}t)-a^{3}r'ru^{3}s(ru^{4}s). See CATARRH.—**C. a contagio, C. a contagione.** See INFLUENZA.—**C. æstivus.** See *Hay* FEVER.—**C. a frigore.** Catarrh due to cold. [L, 84, 119.]—**C. atonicus.** Chronic catarrh with atony of the affected membrane. [L, 135.]—**C. atrophicus ozænicans.** Chronic atrophic nasal catarrh having the character of ozæna.—**C. bellinsulanus.** Mumps. [L, 132.]—**C. benignus, C. communis.** An ordinary catarrh from cold. [A, 316; L, 119.]—**C. epidemicus.** See INFLUENZA.—**C. febrilis.** Fr., *catarrhe fébrile.* Ger., *fieberhafter Katarrh.* Catarrhal fever; an ordinary cold. [L, 88, 135.]—**C. ferinus.** Whooping-cough. [L, 132.]—**C. inflammatorius acutus.** An acute epidemic bronchitis of considerable severity. [L, 135.]—**C. inflammatorius lentus** (seu **subacutus**). A more or less chronic bronchitis with fever. [L, 135.]—**C. rubeolosus.** Fr., *catarrhe morbilleux.* The catarrh of measles. [L, 132.]—**C. russicus.** See INFLUENZA.—**C. senilis.** See *Senile* CATARRH.—**C. siccus.** See *Dry* CATARRH.—**C. sthenicus.** See *C. inflammatorius acutus.*—**C. suffocativus.** See *Suffocative* CATARRH.

CATARRHYSIS (Lat.), n. f. Ka^{2}t(ka^{3}t)-a^{3}r'ri^{2}s(ru^{6}s)-i^{2}s. Gen., *catarrhys'eos* (*-ar'rhysis*). Gr., κατάῤῥυσις. Fr., *catarrhyse.* Ger., *Hinabrieseln.* A defluxion, as of humors, or an inclining downward. [A, 325; L, 119.]

CATARTISIS (Lat.), **CATARTISMUS** (Lat.), n's f. and m. Ka^{2}t(ka^{3}t)-a^{3}rt'i^{2}s-i^{2}s, -a^{3}rt-i^{2}z(i^{2}s)'mu^{3}s(mu^{4}s). Gr., κατάρτισις, καταρτισμός (from καταρτίζειν, to restore). Fr., *catartisme.* Ger., *Einrichtung.* The reduction of a fracture, a dislocation, or a hernia. [Galen (A, 322).]

CATARTISTA (Lat.), **CATARTISTER** (Lat.), n's m. Ka^{2}t-(ka^{3}t)-a^{3}rt-i^{2}st'a^3, -u^{5}r(ar). Gr., καταρτιστά, καταρτιστήρ. An ancient apparatus for reducing dislocations. [A, 322.]

CATASARCA (Lat.), n. f. Ka^{2}t(ka^{3}t)-a^3-sa^{3}rk'a^3. From κατάσαρκος, very fleshy. See ANASARCA.

CATASCEUE (Lat.), n. f. Ka^{2}t(ka^{3}t)-a^{2}s(a^{3}s)-su^2(ku^2)'e(a). Gen., *catasceu'es.* Gr., κατασκευή. 1. The exercise of all the muscles, as by athletes, in training. 2. The perfect constitution of body. 3. Of Hippocrates, a contrivance or apparatus. [Galen (A, 325); *a*, 17.]

CATASCHASMA (Lat.), n. n. Ka^{2}t(ka^{3}t)-a^{2}s(a^{3}s)-ka^{2}z(ch^{2}a^{3}s)'-ma^3. Gen., *cataschas'matos* (*-is*). Gr., κατάσχασμα. A wound, cut, or scar. [A, 322, 387.]

CATASCHASMUS (Lat.), n. m. Ka^{2}t(ka^{3}t)-a^{2}s(a^{3}s)-ka^{2}z-(ch^{2}a^{3}s)'mu^{3}s(mu^{4}s). Gr., κατασχασμός (from κατασχάζειν, to cut deep). Deep incision, scarification, bloodletting. [A, 322, 387.]

CATASEISIS (Lat.), n. f. Ka^{2}t(ka^{3}t)-a^3-sis'(se^2'i^{2}s)-i^{2}s. Gen., *cataseis'eos* (*-is*). Gr., κατάσεισις (from κατασεῖν, to shake violently). A violent shaking; concussion. [Hippocrates (A, 325).]

CATASETEÆ (Lat.), n. f. pl. Ka^{2}t(ka^{3}t)-a^3-set(sat)'e^2-e(a^3-e^2). Fr., *catasétées.* Of Reichenbach, a family of the *Eborilingues*, embracing *Catasetum*, etc. [B, 170.]

CATASETIDÆ (Lat.), n. f. pl. Ka^{2}t(ka^{3}t)-a^3-se^{2}t(sat)'i^{2}d-e-(a^3-e^2). Fr., *catasétidées.* Of Lindley, a subtribe of the *Vandeæ*, comprising *Catasetum*, etc. [B, 170.]

CATASHA, n. In Malabar, aloes. [B, 121.]

CATASTAGMOS (Lat.), **CATASTALAGMOS** (Lat.), n's m. Ka^{2}t(ka^{2}t)-a^3-sta^{2}g(sta^{3}g)'mo^{2}s, -sta^{2}l(sta^{3}l)-a^{2}g(a^{3}g)'mo^{2}s. Gr., κατασταγμός (from καταστάζειν, to trickle down). A running or dropping of a catarrhal secretion, especially from the nose. [A, 322, 325.]

CATASTALTIC, adj. Ka^{2}t-a^3-sta^{2}lt'i^{2}k. Gr., κατασταλτικός. Lat., *catastalticus.* Fr., *catastaltique.* Ger., *zurücktreibend* (1st def.), *zusammenziehend* (1st def.), *blutstillend* (1st def.), *beruhigend* (1st def.). 1. Checking evacuations, secretions, or hæmorrhage; also calming, soothing. [A, 322.] 2. Of Marshall Hall, passing from above downward (said of a nervous impulse). [*a*, 18.]

CATASTASIS (Lat.), n. f. Ka^{2}t(ka^{3}t)-a^{2}st(a^{3}st)'a^{2}s(a^{3}s)-i^{2}s. Gen., *catastas'eos* (*-ast'asis*). Gr., κατάστασις (from καθιστάναι, to settle, establish). Fr., *catastase.* 1. A state, condition, constitution, or habit of body. 2. A restitution, as of bones or other parts to their proper positions. 3. A quieting or a becoming quiet (said of a disease, as opposed to its paroxysm). [Hippocrates (A, 322, 325); *a*, 17.]

CATASTATICUS (Lat.), adj. Ka^{2}t(ka^{3}t)-a^{2}s(a^{3}s)-ta^{2}t(ta^{3}t)'i^{2}k-u^{3}s(u^{4}s). Gr., καταστατικός Fr., *catastatique.* 1. Stationary, having a settled character. 2. Sedative. 3. Caused by or pertaining to the constitution, or the state of anything, as the season of the year or the state of the weather. 4. Belonging to or derived from a bodily (constitutional) habit. [A, 322.]

CATASTEMA (Lat.), n. n. Ka^{2}t(ka^{3}t)-a^3-stem(stam)'a^3. Gen., *catastem'atos* (*-is*). Gr., κατάστημα. A settled condition (of health, the weather, etc.). [A, 325, 387.]

CATASTEMONES (Lat.), n. f. pl. Ka^{2}t(ka^{3}t)-a^3-ste^{2}m(stam)'-o^{2}n-ez(e^{2}s). Of Link, a subclass of the exogens, comprising the *Ampelideæ, Menispermeæ*, and *Berberideæ.* [B, 170.]

CATATASIS (Lat.), n. f. Ka^{2}t(ka^{3}t)-a^{2}t(a^{3}t)'a^{2}s(a^{3}s)-i^{2}s. Gen., *catatas'eos* (*-at'asis*). Gr., κατάτασις. 1. A stretching or extension, especially downward. 2. Of Hippocrates, the reduction of broken or dislocated bones by extension and counter-extension. [A, 322, 325.]

CATATHESIS (Lat.), n. f. Ka^{2}t(ka^{3}t)-a^{2}th(a^{3}th)'e^{2}s-i^{2}s. Gen., *catathes'eos* (*-ath'esis*). Gr., κατάθεσις (from καταθεῖναι, to lay down). Depression. [A, 322, 325.]

CATATONIA (Lat.), n. f., **CATATONY,** n. Ka^{2}t(ka^{3}t)-a^{2}t-(a^{3}t)-on(o^{2}n)'i^2-a^3, ka^{2}t-a^{2}t'on-i^2. From κατά intens., and τόνος, tension. Fr., *catatonie.* Ger., *Catatonie, Spannungs-Irresein.* A cerebral disease, first described by Kahlbaum in 1874, allied in its symptomatology to melancholia attonita and to the general paresis of the insane. It follows a cyclical course, the symptoms assuming successively the form of melancholia, mania, stupor, loquacious dementia, and complete dementia. A marked feature is the occurrence of cramps. Other phenomena peculiar to c. are the pathetic and theatrical character of the slightest words spoken and the form of speech termed verbigeration (*q. v.*). ["Arch. de neurol.," xv, 1888, p. 254 (*a*, 18).]

CATATONIAC, CATATONIC, adj's. Ka^{2}t-a^{2}t-on'i^2-a^{2}k, -o^{2}n'-i^{2}k. Pertaining to or affected with catatonia. [D.]

CATATRIPSIS (Lat.), n. f. Ka^{2}t(ka^{3}t)-a^3-tri^{2}p'si^{2}s. Gen., *catatrip'seos* (*-is*). Gr., κατάτριψις (from κατατρίβειν, to wear out). The state of being worn out. [Hippocrates (A, 325).]

CATATROPHA (Lat.), n. f. Ka^{2}t(ka^{3}t)-a^{2}t(a^{3}t)'rof(ro^{2}f)-a^3. An incorrect form of *catarrhopia* (*q. v.*). [A, 322.]

CATAVERTEBRAL [Grant], adj. Ka^{2}t-a^3-vu^{5}rt'e^2-bra^{2}l. From κατά, down, and *vertebra* (*q. v.*). Fr., *cataal.* Situated on the hæmal side of the centrum of a vertebra. [L, 27.]

CATAWBA, n. Ka^{2}t-a^{4}b'a^3. See *C.* WINE.—**C.-tree.** The *Catalpa bignonioides.* [B, 5.]

CATAXIS (Lat.), n. f. Ka^{2}t(ka^{3}t)-a^{2}x(a^{3}x)'i^{2}s. Gen., *catax'eos* (*-is*). Gr., κάταξις. 1. The production of a fracture. [A, 322.] 2. Raw silk. [Gorræus (A, 325).]

CATAYA, n. In Brazil, a pungent species of *Polygonum.* [B, 19.]

CAT-CALEJA (Hind.), n. The *Guilandina* (*Cæsalpinia*) *bonduc.* [B, 172].

CATCAN, n. In Cochin-China, the *Dolichos trilobus.* [B, 121.]

CATCARANJA, n. See CAT-CALEJA.

CAT-CHÉ, n. In the East Indies, catechu. [B, 121.]

CATCH-FLY, n. Ka^{2}ch'fli. A name applied to different species of *Silene* and to the *Lychnis viscaria.* [B, 19, 75, 275.]—**Clammy c.-f.** The *Lychnis viscosa.* [B, 275.]—**German c.-f.** The *Lychnis viscaria.* [B, 275.]—**Italian c.-f.** The *Silene pendula.* [B, 275.]—**Lobel's c.-f.** The *Silene armeria.* [B, 275.]—**Pennsylvania c.-f.** The *Silene pennsylvanica.* [B, 275.]—**Round-leaved c.-f.** The *Silene rotundifolia.* [B, 275.]—**Seaside c.-f.** The *Silene maritima.* [B, 275.]

CATCH-WEED, n. Ka^{2}ch'wed. The *Galium aparine.* [B, 19, 275.]

CATÉ (Fr.), n. Ka^{3}t-a. See KATE.

CATECHIN, n. Ka^{2}t'e^{2}k-i^{2}n. Fr., *catéchine.* Ger., *C.*, *Katechin.* Syn.: *catechuic acid.* A substance, $C_{21}H_{20}O_9 + 5H_2O$, derived from the different kinds of catechu, kino, mahogany-wood, etc.; forming white, silky acicular crystals almost insoluble in cold water, readily soluble in hot water and in alcohol. Its aqueous solution is bitter, sweetish, and astringent. [B, 81, 270.]—**C'gerbsäure** (Ger.). Catechutannic acid. [B, 270.]—**C. red.** A red substance deposited, along with c., from a solution of catechu in boiling water, and separated from c. by dissolving the latter in ether. [B, 5.]

CATÉCHIQUE (Fr.), adj. Ka^{3}t-a-shek. See CATECHUIC.

CATECHOL, n. Ka^{2}t'e^{2}k-o^{2}l. Pyrocatechin. [B, 81.]—**C. dimethylate, C. dimethyl ether.** Veratrol. [B, 3.]—**C. monomethylate, C. monomethyl ether.** Guaiacol. [B, 3.]

CATECHOMENOS (Lat.), adj. Ka^{2}t(ka^{3}t)-e^{2}k(e^{2}ch^2)-o^{2}m'e^{2}n-o^{2}s. Gr., κατεχομένος (from κατέχειν, to endure). Refractory to the action of remedies. [A, 387; L, 119.]

CATECHU (Lat.), n. n., indecl. Ka^{2}t(ka^{3}t)'e^2-ku^2(ch^{2}u). From Hind., *kate*, the tree which furnishes c., and *chu*, juice. Fr., *cachou.* Ger., *C.*, *Katechu.* It., *catecù.* Sp., *catecú.* 1. Of the U. S. Ph., Ger. Ph., Belg. Ph., Gr. Ph., Swiss Ph., Netherl. Ph., Russ. Ph., and the Fr. Cod., Pegu c., the *cachou de Pégu* (ou *cachuttie*) [Fr. Cod.], otherwise called black c. (*c. nigrum*) or cutch; an extract obtained by evaporating a decoction of the dark heart-wood of *Acacia c.* and *Acacia suma*, trees of southern Asia and tropical Africa. It occurs as dark-brown, opaque masses, which when dry are hard and brittle and show a somewhat crystalline structure. It has a slight odor and an astringent sweetish taste, is partially soluble in water, and almost completely soluble in alcohol. It consists largely of catechin and catechutannic acid, with some quercetin. 2. Of the Ger. Ph., also the pale c. or gambir, the *c. pallidum* of the Br. Ph., the *catecú* of the Sp. Ph., the *terra japonica* of the older authors; an extract made by evaporating a decoction of the leaves and young shoots of *Uncaria gambier* (*Nauclea gambir*), a climbing plant of the East Indies. It forms brownish masses of a lighter color than Pegu c., having a grayish fracture, and possessing a bitter and astringent, afterward sweetish, taste, but no odor. It consists of catechin (which is said by some to be different from the catechin of Pegu c.), a tannin (catechutannic acid), which, however, is in less quantity than in Pegu c., and quercitin. Both varieties of c. are used as astringents in diarrhœa, bronchorrhœa, leucorrhœa, relaxation of the mucous membranes of the throat and larynx, and hæmorrhages, and as an application to ulcers. [B, 81, 180, 270.]—**Areca c.** An inferior variety of c. obtained from the betel-nut (seed of the *Areca c.*). It is not brought into commerce. [B, 81.]—**Bastard c.** See *C.* (2d def.).—**Bengal c.** Ger., *Bengalenc'*, *c. von Bengalen*, *bengalischer C.* A variety of c. exported from Bengal. It is originally made in quadrangular cakes, but usually occurs in fragments of various shapes, of a rusty-brown externally and dark-brown within. [B, 5, 180, 270.]—**Black mucilaginous c.** A variety of c. described by Guibourt, occurring in the form of small parallelopipedons, black and shining interiorly, and having a mucilaginous and slightly astringent taste. [B, 5, 37.]—**Bombay c.** Ger., *C. von Bombay.* A variety of c. (1st def.) formerly described, probably identical with the c. in balls. As described by Winkler, however, it forms irregular masses of the size of a man's fist, or quadrangular pieces of a uniform dark-brown color, and has a highly astringent taste, and this variety seems to resemble more closely the cake c. than the c. in balls. [B, 5, 180.]—**Cake c.** A form of c. (1st def.) occurring in cakes, flat beneath, rounded above, dark-brown exteriorly and from light-yellowish to almost black within, and exhibiting a more or less porous fracture. Its geographical origin is uncertain. [B, 5.]—**C.-Akazie** (Ger.). The *Acacia c.* [B, 180.]—**C'gerbsäure** (Ger.). See *C'tannic acid.* [B, 270.]—**C. in balls.** C. (1st def.) occurring in more or less globular balls. Some varieties contain much sand and are possibly a factitious product; others closely resemble Bengal c. and are perhaps the Bombay c. of the older authors. [B, 5.]—**C. in quadrangular cakes.** See *Bengal c.* [B, 5.]—**C. lozenges.** See *Trochisci c.*—**C. nigrum.** See *C.* (1st def.).—**C. pallidum.** See *C.* (2d def.).—**C.-palm-tree.** Ger., *C'palm.* The *Areca c.* [B, 275.]—**C. red.** Ger., *C'roth.* See *C'tannic acid.*—**C'saft** (Ger.). See *C.*—**C'säure** (Ger.). Catechuic acid; catechin. [B, 270.]—**C'tannic acid.** Fr., *acide cachou-tannique.* Ger., *C'gerbsäure.* It., *tannino di catecù.* A reddish, gummy substance contained in c., and readily forming an acid, astringent solution in water. It is said to be the anhydride of catechuic acid and to have the formula $C_{38}H_{34}O_{15}$. [B, 81, 270.]—**C'tinctur** (Ger.). See *Tinctura c.*—**C.-tree.** The *Acacia* (*Mimosa*) *c.* and the *Acacia suma.* [B, 275.]—**C. von Bengalen** (Ger.). See *Bengal c.*—**C. von Bombay** (Ger.). See *Bombay c.*—**Compound infusion of c.** Fr., *infusion de cachou composée.* See *Infusum c.*—**Compound powder of c.** See *Pulvis c. compositus.*—**Compound tincture of c.** See *Tinctura c. composita.*—**Decoction of c.** Fr., *infusion* (ou *tisane*) *de cachou.* An infusion of c. in boiling water. The Geneva Ph. of 1780 orders 1 part of c. to 32 parts of water. [B, 119 (a, 21).]—**Dull-reddish c.** A variety of c. described by Guibourt, occurring in flattened balls which exhibit a dull-reddish, wavy surface on fracture. [B, 5.]—**Electuarium c.** [Netherl. Ph.], **Electuarium c. compositum** [Belg. Ph.]. A preparation made of 105 parts of powdered catechu [Netherl. Ph.] or 112 of powdered extract of c. [Belg. Ph.], 27 [Belg. Ph.] or 25 [Netherl. Ph.] of powdered Ceylon cinnamon, 83 [Belg. Ph.] or 80 [Netherl. Ph.] of powdered kino, 5 of powdered opium, 24 [Belg. Ph.] or 25 [Netherl. Ph.] of powdered nutmeg, carefully mixed with 746 of syrup of red roses [Belg. Ph.] or 720 of simple syrup of the consistence of honey [Netherl. Ph.]. [B, 95 (a, 21).]—**Essentia c.** See *Tinctura c.*—**Extractum c.** [Netherl. Ph.]. Sp., *extracto de catecú* [Sp. Ph.]. 1. A preparation made by briskly stirring 1 part of coarsely powdered c. with 6 parts of hot water, straining, and evaporating. The Sp. Ph. directs 1 part of coarsely powdered gambir c. to be infused in 6 parts of boiling water, and the infusion allowed to stand 24 hours, strained with expression, filtered, and evaporated over a water-bath to the consistence of an extract. [B, 95 (a, 21).] 2. Of the older pharmacists, c. itself. [B, 180.]—**Gambir c.** See *C.* (2d def.).—**Gummi c.** See *C.*—**Infusum c.** [Br. Ph.]. Fr., *infusion de cachou composée.* Infusion of c.; made by infusing 5·3 parts of pale c. and 1 part of bruised cinnamon-bark in 149 parts of boiling water. Similar preparations were formerly official, in some of which cinnamon-water replaced the cinnamon and in some of which sage-leaves or sugar were added. [B, 81, 119 (a, 21).]—**Kumaon c.** A variety of c. (1st def.) derived from Kumaon in northern India; of a lighter color than ordinary c.; not met with in commerce. [B, 81, 270.]—**Pale c.** See *C.* (2d def.), *Bengal c.*, and *Whitish c.*—**Palmenc'** (Ger.). C. obtained from the *Areca c.* [B, 108.]—**Pegu c.** Fr., *cachou de Pégu* [Fr. Cod.]. See *C.* (1st def.).—**Plano-convex c.** See *Cake c.*—**Pulvis c. compositus** [Br. Ph.]. Compound powder of c.; consisting of 4 parts of pale c., 2 each of kino and rhatany-root, and 1 part each of cinnamon-bark and nutmeg, mixed, sifted, and triturated. [B, 81 (a, 21).]—**Siam c.** A variety of c. resembling Pegu c., but forming conical masses having a shining liver-colored fracture. [B, 5.]—**Succus c.** See *C.*—**Tabellæ cum c.** [Fr. Cod.]. See *Trochisci c.*—**Terra c.** See *C.*—**Tinctura c.** Fr., *teinture* [Fr., Cod.] (ou *alcoolé*) *de cachou.* Ger., *C'tinctur* [Ger. Ph.]. 1. Of the Ger. Ph. and Fr. Cod., a solution of 1 part of c. in 5 of dilute alcohol. Other pharmacopœias have ordered from 4 to 6 parts of alcohol. 2. Of the Br. Ph. and U. S. Ph., 1870, see *Tinctura c. composita.* [B, 81, 119, 205 (a, 21).]—**Tinctura c. composita** [U. S. Ph.]. Fr., *teinture de cachou aromatisée* (ou *composée*), *teinture gingivale* (2d def.). 1. Of the U. S. Ph., a tincture made with 12 parts of c., 8 of cinnamon, and sufficient alcohol to make 100 parts. The Br. Ph. orders 2½ oz. av. of pale c., 1 oz. of cinnamon, and proof spirit sufficient to make 1 pint Imperial. It is used as an astringent remedy; internally for diarrhœa, externally for indolent ulcers, and also as an injection for the cure of vaginal and rectal fluxes. 2. Of various old pharmacopœias, a preparation composed of c., myrrh, balsam of Peru, and spirit of cochlearia, with or without the addition of brandy. In some pharmacopœias equal parts of c. and kino (or of c. and dragon's blood) were directed to be dissolved in spirit of cochlearia. [B, 81, 119 (a, 21).]—**Tinctura de c.** See *Tinctura c.*—**Trochisci c.** [U. S. Ph., Br. Ph.]. Fr., *tablettes de cachou* [Fr. Cod.] (ou *de cachou odorantes*). Troches each containing 1 grain of c., 10 grains of sugar, and ¼ grain of tragacanth, made up with orange-flower water [U. S. Ph.]; or containing 1 grain of pale c., 15 grains of sugar, 0·6 grain of acacia, and about 1 grain of mucilage of acacia, made up with distilled water [Br. Ph.]; or containing 10 centigrammes of c., 80 centigrammes of sugar, and 10 centigrammes of mucilage of tragacanth [Fr. Cod.]. Preparations very similar to the last were official in two or three of the older formularies. The Würt. Ph., 1798, ordered troches made of 2 parts of c., 6 of extract of licorice, and 1 part of species diatraganthæ compositus. [B, 81, 113, 119 (a, 21).]—**Whitish c.** A sort of c. forming small rounded lumps, dark-brown externally, very pale internally, and having a smoky, astringent and bitter, sweetish taste. It does not occur in commerce. [B, 5.]

CATECHUIC, adj. Ka^{2}t-e^{2}k-u^2'i^{2}k. Fr., *catéchique*, *catéchuique.* Of, pertaining to, or derived from, catechu. [B.]—**C. acid.** Fr., *acide catéchique* (ou *catéchuique*). Ger., *Catechusäure*, *Katechusäure.* Catechin. [B, 81.]—**C. anhydride.** Catechutannic acid. [B, 81.]

CATECHUIN, n. Ka^{2}t-e^{2}k-u^2'i^{2}n. See CATECHIN.

CATECHUINIC ACID, n. Ka^{2}t-e^{2}k-u^2-i^{2}n'i^{2}k. Fr., *acide catechuinique.* One of the products of the decomposition of catechin by the action of caustic potash. [B.]

CATECHURETIN, CATECHURRHETIN, n's. Ka^{2}t-e^{2}k-u^2-ret'i^{2}n. Fr., *catéchurrhétine.* A substance, $C_{38}H_{28}O_{12}$, formed by the continued action of sulphuric acid on catechu. [B, 81, 270.]

CATECHUTANNIC ACID, n. Ka^{2}t-e^{2}k-u^2-ta^{2}n'i^{2}k. See under CATECHU.

CATÉCHUTIQUE (Fr.), **CATÉCHUVIQUE** (Fr.), **CATÉCIQUE** (Fr.), adj's. Ka^{3}t-a-ku^6-tek, -vek-, -a-sek. See CATECHU-*tannic acid.*

CATECOME, CATECOMER, n's. In the Canary Islands, aloes. [B, 88, 121.]

CATEI, n. In Hayti, a species of *Acrocomia.* [B, 121.]

CATEIADION (Lat.), n. n. Ka^{2}t(ka^{3}t)-i(e^2-i^2)-a^{2}d(a^{3}d)'i^2-o^{2}n. An ancient instrument for scarifying the interior of the nose for the relief of headache. [E; L, 43.]

CATELECTRODE, n. Ka^{2}t-e^{2}l-e^{2}k'trod. See CATHODE.

CATELECTROTONIC, CATELECTROTONOUS, adj's. Ka^{2}t-e^{2}l-e^{2}k-tro-to^{2}n'i^{2}k, -tro^{2}t'on-u^{3}s. Fr., *catélectrotonique.* Ger., *katelectrotonisch.* Pertaining to catelectrotonus.

CATELECTROTONUS (Lat.), n. m. Ka^{2}t(ka^{3}t)-e^{2}l(al)-e^{2}k-tro^{2}t′o^{2}n-u^{3}s(u^{4}s). From κατά, down, ἤλεκτρον, amber, and τόνος, tension. The state of increased electrotonus (*q. v.*) produced at the cathode when a constant galvanic current is passed through a nerve. [a, 7.]

CATELLI-VEGON, n. In Malabar, the *Aristolochia indica.* [B, 88, 121.]

CATELLUS (Lat.), n. m. Ka^{2}t(ka^{3}t)-e^{2}l′lu^{3}s(lu^{4}s). Dim. of *catulus.* Gr., κυνίδιον. A puppy; used by the ancients as a medicine supposed to strengthen the nerves, and recommended by authors as an application for pain or inflammation in various parts of the body. [B, 180; L, 119.]—**C. cinereus.** A cupel. [L, 84.]

CATEMERINA (Lat.), n. f. Ka^{2}t(ka^{3}t)-e^{2}m(am)-e^{2}r′i^{2}n-a^3. Gr., καθημερινή (f. of adj. καθημερινός). Fr., *cathémérine.* See AMPHEMERINA.

CATENA (Lat.), n. f. Ka^{2}t(ka^{3}t)-en(an)′a^3. Gr., σειρά, ἅλυσις. A bond, chain, or series; of the ancients, the bond of union between the spirit and the body or between united chemical elements. [A, 325.]

CATENATE, adj. Ka^{2}t′e^{2}n-at. Lat., *catenatus.* See CATENULATE.

CATENATING, adj. Ka^{2}t′e^{2}n-at-in^{2}g. See *C.* AGUE.

CATENICELLIDÆ (Lat.), n. f. pl. Ka^{2}t(ka^{3}t)-e^{2}n(an)-i^2-se^{2}l-(ke^{2}l)′li^{2}d-e(a^3-e^2). A family of the *Polyzoa.* [L, 121.]

CATENIFERUS (Lat.), adj. Ka^{2}t(ka^{3}t)-e^{2}n(an)-i^{2}f′e^{2}r-u^{3}s(u^{4}s). From *catena*, a chain, and *ferre*, to bear. Fr., *caténifère.* Chain-bearing (said of bodies having the surface marked with colored lines so disposed as to resemble a chain). [L, 41.]

CATENIFORMIS (Lat.), adj. Ka^{2}t(ka^{3}t)-e^{2}n(an)-i^2-fo^{2}rm′i^{2}s. From *catena*, a chain, and *forma*, form. Fr., *caténiforme.* Having the form of a chain. [B, 198; L, 41.]

CATENULA (Lat.), n. f. Ka^{2}t(ka^{3}t)-e^{2}n(an)′u^2(u^4)-la^3. Dim. of *catena*, a chain. Ger., *nackter Schleuder.* Syn.: *elater nudus* (seu *cateniformis* [Willdenow]). In the *Hepaticæ*, a so-called naked elater, *i. e.*, one apparently without a utriculus. [B, 198.]

CATÉNULAIRE (Fr.), **CATÉNULÉ** (Fr.), adj's. Ka^{3}t-an-u^{6}l-a^{2}r, -a. See CATENULATE.

CATENULARIA [Zippel] (Lat.), n. f. Ka^{2}t(ka^{3}t)-e^{2}n(an)-u^{2}l-(u^{6}l)-a(a^3)′ri^2-a^3. See CTENOPTERIS.

CATENULATE, adj. Ka^{2}t-e^{2}n′u^{2}l-at. Lat., *catenulatus* (from *catenula*, a small chain). Fr., *chainé, en chaine.* Ger., *kettenartig.* Disposed in a chain; composed of parts joined together like the links of a chain. [B, 1, 19, 198.]

CATERPILLAR, n. Ka^{2}t′u^{5}r-pi^{2}l-a^{3}r. Fr., *chenille.* 1. The larva of an insect, especially of the *Lepidoptera.* 2. A common name for various plants of the genus *Scorpiurus.* [B, 121; L, 56.]—**C. fungus.** Various species of *Cordiceps* which attack c's. [B, 19, 275.]—**C.-plant.** The genus *Scorpiurus.* [B, 275.]

CATERPILLES, n. In Jamaica, the *Amarantus viridis.* [B, 121.]

CATESBÆA (Lat.), n. f. Kat-e^{2}z-be′(ba^3′e^2)-a^3. Named after *M. Catesby*, an English naturalist. Fr., *catesbée.* A genus of rubiaceous plants belonging to the *Catesbæeæ.* [B, 19, 121.]—**C. elliptica** [Sprengel]. The *C. Vavassorii.* [B, 214.]—**C. longiflora** [Swartz]. The *C. spinosa.* [B, 173, 282.]—**C. macrantha** [Richard], **C. spinosa** [Linnæus]. A shrub of the West Indies. The acidulous fruits are eaten, and the bark (*cortex chinæ spinosæ*) is said to be tonic and febrifuge. It is possible, however, that the bark so called is derived from *C. Vavassorii.* [B, 180.]—**C. Vavassorii** [Sprengel]. A plant growing in Hayti, wrongly referred to the genus *C.* and of uncertain botanical station. [B, 180, 214.] Cf. *C. spinosa.*

CATESBÆEÆ (Lat.), n. f. pl. Kat-e^{2}z-be′(ba^3′e^2)-e^2-e(a^3-e^2). Fr., *catesbées.* Of Bentham and Hooker, a tribe of the *Rubiaceæ*, comprising *Catesbæa*, etc. [B, 42.]

CATEVALA (Lat.), n. f. Ka^{3}t-e^2-va^{3}l′a^3. From the Malabar name. Fr., *caté-vala.* In Malabar, aloes; of Medicus, a synonym of the *Apicra* of Haworth. [B, 121.]—**C. arachnoidea.** The *Aloe arachnoides.* [B.]—**C. arborescens.** See ALOE *arborescens.*—**C. retusa.** The *Aloe retusa.* [B, 188.]

CATGUT, n. Ka^{2}t′gu^{3}t. Fr., *c.* Ger., *C.* 1. Cord made from the intestines of various animals; used for ligatures and sutures. [a, 17.] 2. The *Tephrosia virginiana.* [B, 275.]—**Carbolized c.** C. imbued with carbolic acid. It may be prepared by washing c. with alcohol and then immersing it for 2 days (or longer for c. of large size) in a quart of 5-per-cent. solution of carbolic acid containing 30 grains of potassium bichromate. [A, 509 (a, 21).]—**Juniper c.** C. imbued with oil of juniper. After a 6 hours' immersion in a 1-to-1,000 solution of corrosive sublimate, the c. is dried with a towel and kept for 6 days in a mixture of 2 parts of alcohol and 1 part of oil of juniper. ["Am. Jour. of Obstet.," Oct., 1887, p. 1009 (a, 21).]

CATHA (Lat.), n. f. Ka(ka^3)′tha^3. Of Forskål, a genus of celastrineous plants of the tribe *Celastreæ.* [B, 42.]—**C. edulis** [Forskål]. A shrub of Arabia and northeastern Africa; the *kât* or *cafta* of the Arabs, who employ the leaves and leafy twigs in making a beverage having the stimulant and invigorating properties of coffee. They also chew the leaves, and the plant is regarded as a preventive of the plague. It resembles coffee in its physiological action, but contains no caffeine. It contains mannite and a small quantity of an alkaloid called katine. [B, 19, 42, 180; "Ctrlbl. f. d. ges. Therap.," Nov., 1888, p. 700 (B).]—**C. spinosa** [Forskål]. The *Celastrus parviflorus.* [B, 214.]

CATHÆMUS (Lat.), adj. Ka^{2}th(ka^{3}th)-em′(a^3′e^{2}m)-u^{3}s(u^{4}s). Gr., κάθαιμος. Bloody. [A, 325, 387; L, 119.]

CATHÆRESIS (Lat.), n. f. Ka^{2}th(ka^{3}th)-e^{2}r′(a^3′e^{2}r)-e^{2}s-i^{2}s. Gen., *cathæres′eos* (*-æ′resis*). Gr., καθαίρεσις (from καθαιρεῖν, to reduce). Fr., *cathérèse.* 1. Anciently, the production of great prostration by means of evacuants used to cause the reduction of overgrowths, effusions, exudations, etc.; also the action of a violent caustic. 2. As now used, the action of a feeble caustic. [A, 301, 322, 325, 385.]

CATHÆRETICUS (Lat.), adj. Ka^{2}th(ka^{3}th)-e^{2}r(a^3-e^{2}r)-e^{2}t′i^{2}k-u^{3}s(u^{4}s). See CATHERETIC.

CATHÆTORA, n. The *Cajanus indica.* [B, 88, 121.]

CATHAL (Hind.), n. The *Artocarpus integrifolia.* [B, 172.]

CATHAM (Heb.), n. A certain purgative preparation of gold. [L, 105.]

CATHARANTHUS (Lat.), n. m. Ka^{2}th(ka^{3}th)-a^{2}r(a^{3}r)-a^{2}nth-(a^{3}nth)′u^{3}s(u^{4}s). Fr., *catharanthe.* Of the gardeners, some shrubby species of *Vinca.* [B, 19.]

CATHARCTIC, adj. Ka^{2}th-a^{3}rk′ti^{2}k. See CATHARTIC.

CATHARINEÆ (Lat.), n. f. pl. Ka^{2}th(ka^{3}th)-a^{2}r(a^{3}r)-i^{2}n′e^2-e-(a^3-e^2). Fr., *catharinées.* Of Hampe, a family of mosses, consisting of the genus *Catharinea.* [B, 170.]

CATHARIOTES (Lat.), n. f. Ka^{2}th(ka^{3}th)-a^{2}r(a^{3}r)-i(i^2)′ot(o^{2}t)-ez(as). Gen., *catharioteʹtos* (*-is*). Gr., καθαριότης. Cleanliness. [Hippocrates (A, 325).]

CATHARISM, CATHARIZATION, n's. Ka^{2}th′a^{2}r-i^{2}zm, ka^{2}th-a^{2}r-i^{2}z-a′shu^{3}n. Gr., καθαρισμός (from καθαρίζειν, to cleanse). Lat., *catharismus.* A cleansing, purification. [A, 316, 387; L, 56.]

CATHARMA (Lat.), n. n. Ka^{2}th(ka^{3}th)-a^{3}r′ma^3. Gen., *catharm′atos* (*-is*). Gr., κάθαρμα. Excrement voided as the result of purgation. [Hippocrates (A, 325).]

CATHARMOS (Lat.), **CATHARMUS** (Lat.), n's m. Ka^{2}th-(ka^{3}th)-a^{3}rm′o^{2}s, -u^{3}s(u^{4}s). Gr., καθαρμός. 1. Purgation. 2. The cure of disease by sacrifices. [Hippocrates (A, 325).]

CATHAROS (Lat.), adj. Ka^{2}th(ka^{3}th)′a^{2}r(a^{3}r)-o^{2}s. Gr., καθαρός. Pure, purified, purged. [A, 325.]

CATHARSIOS (Lat.), adj. Ka^{2}th(ka^{3}th)-a^{3}rs′i^2-o^{2}s. Gr., καθάρσιος. See CATHARTIC.

CATHARSIS (Lat.), n. f. Ka^{2}th(ka^{3}th)-a^{3}rs′i^{2}s. Gen., *cathars′eos* (*-is*). Gr., κάθαρσις (from καθαίρειν, to purge, cleanse). Fr., *catharsie* (1st def.), *catharse* (2d def.). Ger., *Reinigung* (1st def.), *Abführwirkung* (1st def.). It., *catarsi* (1st def.). 1. Originally, any natural or artificial purifying discharge; as now used, purging by the bowels. [A, 301, 322.] 2. The genus *Gypsophila.* [B, 38, 121.]—**C. dia pharyngos.** Gr., κάθαρσις διὰ φάρυγγος. Vomiting, also ptyalism. [A, 322; L, 132.]

CATHARSIUS (Lat.), adj. Ka^{2}th(ka^{3}th)-a^{3}rs′i^2-u^{3}s(u^{4}s). Gr., καθάρσιος. See CATHARTIC.

CATHARTATE, n. Ka^{2}th-a^{3}rt′at. Fr., *c.* A salt of cathartic acid. [B, 5.]

CATHARTIC, adj. Ka^{2}th-a^{3}rt′i^{2}k. Gr., καθαρτικός. Lat., *catharticus.* Fr., *cathartique.* Ger., *Cathartisch, purgirend.* It., *catartico.* Producing catharsis (*q. v.*).—**C. acid.** Lat., *acidum catharticum.* Fr., *acide cathartique.* Ger., *Cathartinsäure.* A glucoside, $C_{180}H_{96}N_2SO_{82}$, constituting the active principle of senna, in which it occurs in magnesium and calcium salts; a dark-colored amorphous substance insoluble in water, but dissolving in alkaline solutions. [B, 5, 81.]

CATHARTICUM (Lat.), n. n. Ka^{2}th(ka^{3}th)-a^{3}rt′i^{2}k-u^{3}m(u^{4}m). A cathartic medicine. [A, 322.]—**C. lunæ, C. lunare.** Fr., *pierre infernale.* Nitrate of silver prepared by precipitation; Sala's *magisterium argenti.* [B, 59, 70.]

CATHARTIDÆ (Lat.), n. f. pl. Ka^{2}th(ka^{3}th)-a^{3}rt′i^{2}d-e(a^3-e^2). A group of the *Carinatæ.* [L, 121.]

CATHARTIN, n. Ka^{2}th-a^{3}rt′i^{2}n. Lat., *cathartinum, cathartina.* Fr., *cathartine.* Ger., *C., Sennabitter.* It., *catartina.* Sp., *catartino.* 1. A bitter, nauseous substance obtained from senna by Lassaigne and Feneulle, supposed by them to be the purgative principle of senna, but now known to be a mixture devoid of purgative properties. 2. Of Winckler, a principle contained in the ripe fruit of *Rhamnus cathartica*, believed to be produced by the metamorphosis of the rhamnin of the unripe fruit. [B, 5, 92.]—**C'säure** (Ger.). See CATHARTIC *acid.*

CATHARTOCARPUS (Lat.), n. m. Ka^{2}th(ka^{3}th)-a^{3}rt-o(o^2)-ka^{3}rp′u^{3}s(u^{4}s). From καθαρτικός, cathartic, and καρπός, a fruit. Fr., *cathartocarpe.* Of Persoon, a genus of leguminous plants, separated from *Cassia*, to which most botanists now reunite it. [G. Bentham, "Trans. of the Linnæan Soc.," xxii, p. 503 (B); B, 42.]—**C. apoucouita.** The *Cassia apoucouita.* [B, 88.]—**C. arereh, C. atteleh.** The *Cassia arereh.* [G. Bentham, *l. c.* (B); B, 88, 250.]—**C. bacillus** [Persoon]. The *Cassia bacillaris.* [G. Bentham, *l. c.* (B).]—**C. brasilianus** [Jacquin]. The *Cassia grandis.* [B, 180.]—**C. Brewsteri** [F. Müller]. The *Cassia Brewsteri.* [B, 219.]—**C. conspicuus** [Don]. The *Cassia sieberiana.* [B, 250.]—**C. emarginatus** [Persoon]. The *Cassia emarginata.* [B, 282.]—**C. excelsus** [G. Don]. The *Cassia fistula.* [G. Bentham, *l. c.* (B).]—**C. ferrugineus** [G. Don]. The *Cassia ferruginea.* [G. Bentham, *l. c.* (B).]—**C. fistula** [Persoon], **C. fistuloides** [Nectoux]. The *Cassia fistula.* [B, 5, 173, 180.]—**C. grandis** [Persoon]. The *Cassia grandis.* [B, 173.]—**C. javanicus** [Persoon]. The *Cassia javanica.* [B, 173.]—**C. lætus** [G. Don]. The *Cassia læta.* [G. Bentham, *l. c.* (B).]—**C. moschatus** [G. Don]. The *Cassia moschata.* [B.]—**C. Roxburghii.** The *Cassia Roxburghii* (*marginata*). [B, 172.]—**C. sieberianus** [G. Don]. The *Cassia sieberiana.* [B, 250.]

CATHARTOGENIC ACID, CATHARTOGENIN, n's. Ka^{2}th-a^{3}rt-o-je^{2}n′i^{2}k, -o^{2}j′e^{2}n-i^{2}n. Fr., *acide cathartogénique, cathartogénine.* Ger., *Cathartogeninsäure.* A yellowish-brown substance, insoluble in water, produced, along with glucose, by decomposing cathartic acid with hydrochloric acid. [B, 5, 81.]

CATHARTOLINUM (Lat.), n. n. Ka^{2}th(ka^{3}th)-a^{3}rt-o(o^2)-lin(len)′u^{3}m(u^{4}m). Of Reichenbach, a section of the genus *Linum*, including *Linum catharticum*. [B, 121.]

CATHARTOMANNITE, n. Ka^{2}th-a^{3}rt-o-ma^{2}n′it. Fr., *mannite du séné*. Ger., *Cathartomannit*. A non-fermentable sugar, $C_{21}H_{44}O_{19}$, found in senna, forming warty crystals soluble in water and in dilute alcohol. [B, 5, 93.]

CATHARUS (Lat.), adj. Ka^{2}th(ka^{3}th)′a^{2}r(a^{3}r)-u^{3}s(u^{4}s). See Catharos.

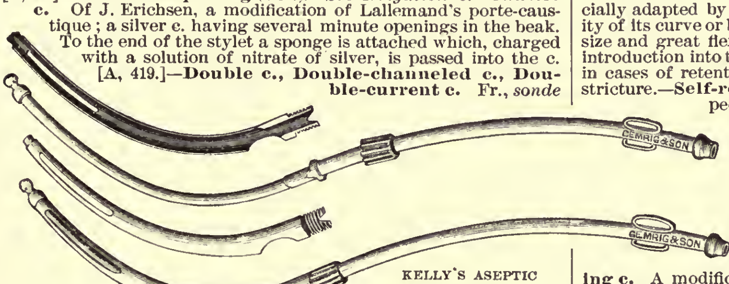
CATHECOMENION (Lat.), n. n. Ka^{2}th(ka^{3}th)-e^{2}k(ak)-o(o^2)-men(man)′i^2-o^{2}n. An ancient name for the *Æthusa cynapium*. [B, 88, 121.]

CATHECTICE (Lat.), n. f. Ka^{2}th(ka^{3}th)-e^{2}k′ti^2-se(ka). Gr., καθεκτική (f. of adj. καθεκτικός [δύναμις understood]). Retentive power. [A, 325.]

CATHEDRA (Lat.), n. f. Ka^{2}th(ka^{3}th)′e^{2}d-ra^3. Gr., καθέδρα. 1. An old term for a night-chair, also for the anus. [A, 318, 387; L, 84.] 2. A genus of olacaceous Brazilian trees. [B, 19.]

CATHELECTROTONUS (Lat.), n. m. Ka^{2}th(ka^{3}th)-e^{2}l(al)-e^{2}k-tro^{2}t′on(o^{2}n)-u^{3}s(u^{4}s). See Catelectrotonus.

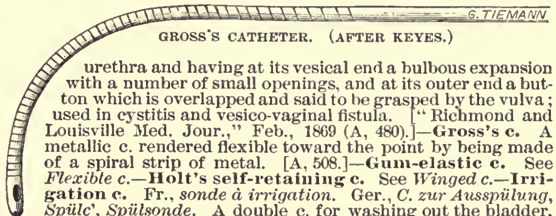
CATHEMERINOS (Lat.), **CATHEMERINUS** (Lat.), adj's. Ka^{2}th(ka^{3}th)-e^{2}m(am)-e^{2}r′i^{2}n-o^{2}s, -u^{3}s(u^{4}s). Gr., καθημερινός. Fr., *cathémérin*. See Quotidian.



CATHÉRÈSE (Fr.), n. Ka^{3}t-ar-e^{2}z. See Cathæresis.

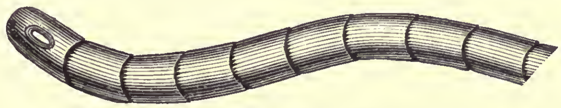
CATHERETIC, adj. Ka^{2}th-e^{2}r-e^{2}t′i^{2}k. From καθαιρεῖν, to reduce (see Cathæresis). Lat., *cathœreticus*. Fr., *cathérétique*. Ger., *ätzend*. It., *cateretico*. Sp., *caterético*. Feebly caustic. [B.]

CATHÉRINE (Fr.), n. Ka^{3}t-ar-en. An old name for the *Rubus cæsius*. [B, 88, 121.]—**Sainte-C.** See the major list.



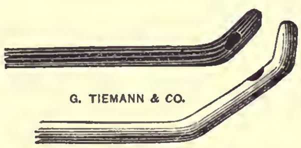
CATHÉRINETTE (Fr.), n. Ka^{3}t-ar-en-e^{2}t. 1. Cochineal. 2. See Cathérine. 3. The *Euphorbia lathyris*. [B, 38, 88.]

CATHETER (Lat.), n. m. Ka^{2}th(ka^{3}th)′e^{2}t-u^{5}r(ar). Gen., *catheter′os (-is)*. Gr., καθετήρ. Fr., *cathéter, sonde, algalie*. Ger., *C., Katheter, Harnzapfer*. It., *catetere*. Sp., *cateter, algalia*. Anciently, any instrument for exploring a canal; as now used, a tube designed for insertion into a canal, especially through the urethra into the urinary bladder; of the French, a lithotomy staff. [A, 301, 322, 385; L, 41.]—**Amussat's c.** Fr., *sonde rectiligne d'Amussat*. A straight c. brought into use by Amussat. [a, 18.]—**Béniqué's c.** A c. having a straight shaft joined at a slight angle to the curved portion near the beak, the curve being directed backward at its beginning. [a, 18.]—**Bent c.** See *Elbowed c.*—**Biegsamer C.** (Ger.). See *Flexible c.*—**Brodie's c.** A short c., less curved than an ordinary c., fixed to a wooden handle. [a, 18.]—**Bumstead's retention c.** A modification of Thompson's retention c. with a screw at the end for attaching a filiform bougie. [E.]—**Bulb-ended c.** Fr., *cathéter* (ou *sonde*) *à boule*. A very flexible urethral c. having a long tapering extremity ending in a bulbous point. [A, 476.]—**C. argenteus.** Fr., *sonde en argent*. Ger., *silberner C.* A silver c. [L, 80.]—**C. chalybeatus.** Fr., *sonde en fer*. Ger., *stählener C.* An iron c. [L, 80.]—**C'draht** (Ger.). A lithotomy staff. [L, 80.]—**C. elasticus.** See *Flexible c.* —**C. fever.** See under Fever.—**C. flexibilis.** See *Flexible c.*— —**C. gauge.** Fr., *filiaire*. A plate or card having circular perforations progressively increasing in size and numbered to correspond with the sizes of c's. One numbered according to the French scale shows the circumference of a c. in millimetres.—**C.-holder.** An arrangement of tapes, or the like, fastened to the free end of a c. and attached to the patient's body after passing through a ring around the root of the penis; used for retaining a c. in the bladder. [E.]—**C. immobilis.** Fr., *sonde à demeure*. Ger., *unbeweglicher C.* A c. left in the bladder for a length of time. [L, 80.]—**C. zur Ausspülung** (Ger.). See *Irrigation c.*—**Caustic c.** Of J. Erichsen, a modification of Lallemand's porte-caustique; a silver c. having several minute openings in the beak. To the end of the stylet a sponge is attached which, charged with a solution of nitrate of silver, is passed into the c. [A, 419.]—**Double c., Double-channeled c., Double-current c.** Fr., *sonde*



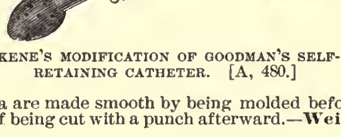
KELLY'S ASEPTIC DOUBLE-CURRENT CATHETER.

à double courant. A catheter divided into two channels by a longitudinal partition, one for injecting liquid and the other for its escape. For obstetrical and gynæcological purposes, such c's have been made in several pieces, so that they may be taken apart and thoroughly cleansed. [H. A. Kelly, "N. Y. Med. Jour.," Mar. 17, 1888, p. 295; E.]—**Elastic c.** See *Flexible c.*—**Elastic tympanic c.** Fr., *sonde tympanique élastique*. Ger., *elastischer tympanischer C.* A small flexible tube, funnel-shaped at its outer end, for introduction into the tympanic cavity through a Eustachian c. [F, 32.] —**Elbowed c.** Fr., *cathéter coudé, sonde coudée*. A urethral c. having a soft flexible stem, but stiffer toward the point, where it makes a sharp turn, forming a short beak; used for passing obstructions on the floor of the urethra. [A, 476.]—**Eustachian c.** Fr., *sonde de la trompe d'Eustache* (ou *de l'oreille*). Ger., *Ohrc'*. It., *catetere tubario*. Sp., *cateter de la trompa de Eustaquio*. A tube of metal or hard rubber, 6 to 7 in. long and from 1 to 3·5 mm. in diameter, slightly curved at one end; the curved part (beak) is from 2 to 2·5 ctm. long. The other end is funnel-shaped to receive the nozzle of an inflating bag. It is passed into the Eustachian tube through the nose, or occasionally through the mouth. [F, 32.] —**Evacuating c.** See Evacuator.—**Exploratory c.** A metallic c. with a short beak making an angle of about 103° with the shaft, so that it can be turned about after its introduction into the bladder and used as a searcher. [L, 213.]—**Faucial c.** Fr., *sonde du gosier*. A hard-rubber tube 7½ in. long, with a curve $1\frac{3}{16}$ in. long, devised by O. D. Pomeroy for making applications through the mouth to the Eustachian tube and for inflating the cavity of the tympanum. [F.]—**Female c.** Fr., *sonde de femme*. Ger., *weiblicher C.* A short c. with the beak only slightly curved, for passage into the bladder of the female. [A, 385.]—**Flexible c.** Fr., *sonde flexible*. Ger., *biegsamer C.* A c. made of some flexible material, such as soft rubber, or silk or other woven fabric varnished with a mixture of linseed oil and litharge. [A, 385.]—**Flexible Eustachian c.** Fr., *sonde eustachienne flexible*. Ger., *biegsamer Ohrc'*. A soft-rubber c., 5 or 7 mm. in diameter, devised by S. Sexton, the beak having the curve of other Eustachian c's. [F.] —**Gély's c.** A male urethral c. the beak of which forms a third of a circle 0·12 metre in diameter. [A, 278.]—**Goodman's self-retaining c.** A female c. about 2 in. long, bent to the curve of the



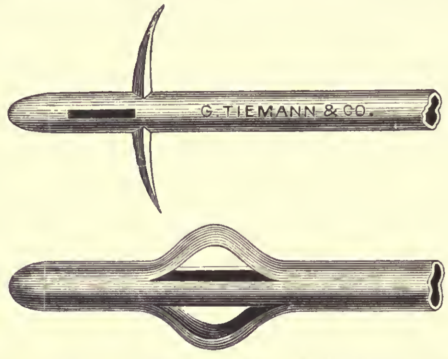
GROSS'S CATHETER. (AFTER KEYES.)

urethra and having at its vesical end a bulbous expansion with a number of small openings, and at its outer end a button which is overlapped and said to be grasped by the vulva; used in cystitis and vesico-vaginal fistula. [" Richmond and Louisville Med. Jour.," Feb., 1869 (A, 480).]—**Gross's c.** A metallic c. rendered flexible toward the point by being made of a spiral strip of metal. [A, 508.]—**Gum-elastic c.** See *Flexible c.*—**Holt's self-retaining c.** See *Winged c.*—**Irrigation c.** Fr., *sonde à irrigation*. Ger., *C. zur Ausspülung, Spülc', Spülsonde*. A double c. for washing out the bladder, etc.—**Jointed c.** A c. consisting of numerous segments held together by a chain passing through the instrument. [A, 508.]—**Leroy d'Étiolles's c.** A c. the curved portion of which is a quarter of a circle of a diameter of 12 ctm. [a, 18.]—**Male c.**



SQUIRE'S JOINTED CATHETER. (AFTER KEYES.)

A c. for introduction into the urinary bladder of the male.—**Mercier's c., Mercier's elbowed c.** A prostatic c. with a fixed angle or two fixed angles. [L.]—**Nasal c., Ohrc'** (Ger.). See *Eustachian c.*—**Nélaton's c.** An old French form of red soft-rubber c. [A, 508.]—**Olivary gum c.** See *Bulb-ended c.*—**Petit's c.** A sigmoid c. for the male urethra. [A, 278.]—**Phillips's c.** A soft-rubber c., open at each end, to be introduced over a guide. [A, 508.]—**Prostate c., Prostatic c.** A long c. with the beak forming a large curve, for passing over an enlarged prostate. [E.]—**Reflux c.** See *Double-current c.*—**Retention c.** A c. specially adapted by a peculiarity of its curve or by its small size and great flexibility for introduction into the bladder in cases of retention of urine due to prostatic disease or urethral stricture.—**Self-retaining c.** A urethral c. which, from some peculiarity of its curve or by reason of being furnished with elastic wing-like processes, will remain in the bladder without the use of any supplementary appliance. [E.]—**Sigmoid c.** A c. with the two ends curved in opposite directions, like the letter S.—**Sims's self-retaining c.** A sigmoid female c. made of block-tin, used after the operation for vesico-vaginal fistula. The beak is pierced with several small openings, and the outer curved portion has its upper wall cut away. [A, 21.]—**Skene's self-retaining c.** A modification of Goodman's, the vesical bulb being made larger and more rounded. [A, 480.]—**Spülc'** (Ger.). See *Irrigation c.*—**Squire's c.** See *Jointed c.*—**Syringe-c.** See *Caustic c.*—**Thompson's c.-sound.** See under Sound.—**Thompson's retention** (or **stricture**) **c.** A very fine probe-pointed c. for use in cases of tight urethral stricture. [E.] —**Two-way c.** A double-current c. [H. A. Kelly, *l. c.*]—**Urethral c.** Fr., *sonde uréthrale*. Ger., *Blasensonde*. A c. designed for introduction into the bladder by way of the urethra. —**Velvet-eye c.** A soft-rubber c. in which the edges of the fenestra are made smooth by being molded before vulcanization, instead of being cut with a punch afterward.—**Weib-**



MERCIER'S CATHETER. (AFTER KEYES.)

SKENE'S MODIFICATION OF GOODMAN'S SELF-RETAINING CATHETER. [A, 480.]

licher C. (Ger.). See *Female c.*—**Winged c.** Fr., *sonde ailée.* A soft-rubber urethral c. rendered self-retaining by two wing-like processes springing from opposite sides near the vesical end.—

HOLT'S WINGED CATHETER AND A MODIFIED FORM OF THE SAME. [A, 480.]

Wire c. An instrument devised by W. H. Van Buren for drawing off the urine when an ordinary c. can not be obtained ; consisting simply of a piece of wire doubled sharply on itself. The bend forms the vesical end, and after the introduction the urine trickles along the spaces above and below the line of contact of the two arms of the wire.

CATHETERISATIO (Lat.), n. f. Ka^{2}th(ka^{3}th)-e^{2}t-e^{2}r(ar)-i^{2}z-(i^{2}s)-a(a^3)′shi^2(ti^2)-o. Gen., *catheterisation′is.* See CATHETERISM.

CATHETERISM, n. Ka^{2}th′e^{2}t-u^{5}r-i^{2}zm. Gr., καθετηρισμός. Lat., *catheterismus.* Fr., *cathétérisme.* Ger., *Catheterismus, Catheterisiren.* It., Sp., *cateterismo.* The introduction of a catheter. [E.]—**Buccal c.** Fr., *cathétérisme buccal.* Ger., *Catheterismus durch den Mund.* C. of the Eustachian tube through the mouth. [F.]—**C. of the uterus.** Lat., *catheterismus uteri.* Fr., *cathétérisme utérin.* 1. The passage of a uterine sound. 2. The insertion of a flexible catheter or bougie between the uterine wall and the fœtal envelopes for the purpose of exciting labor pains.—**Exploratory c.** Fr., *cathétérisme explorateur.* The passage of a urethral instrument for diagnostic purposes. [L, 41.]—**Forced c., Forcible c.** Fr., *cathétérisme forcé.* The forcible passage of a catheter or sound through a urethral stricture. [L, 87.]—**Laryngeal c.** Lat., *catheterismus laryngis.* Fr., *tubage du larynx.* Ger., *Catheterismus der Luftwege.* The passage of a tube through the larynx, either for insufflation in the asphyxia of new-born infants or to facilitate respiration in cases of œdema, croup, etc. [Thuillier (L, 20).] Cf. INTUBATION.—**Permanent c.** Fr., *cathétérisme permanent* (ou *à demeure*). The passage of a catheter and its retention in the bladder for a length of time. [E.]—**Posterior c., Retrograde c.** Fr., *cathétérisme retrograde.* The passage of a catheter or sound from the bladder forward through the urethra in the operation of perineal urethrotomy or in a case of vesical fistula. [Duplay, "Arch. gén. de méd.," July, 1883 (E) ; Verguin (L, 213).]—**Telescopic c.** The procedure of passing a flexible catheter with its beak cut off just above the eye down upon a stricture, then cutting off the shaft at about an inch from the meatus and successively passing smaller and smaller catheters through the preceding ones until one is found small enough to go through the stricture. [α, 18.] —**Tympanic c.** Fr., *cathétérisme tympanique.* Ger., *tympanischer Catheterismus.* The passage of a flexible tympanic catheter (*q. v.*) into the tympanum through a Eustachian catheter. [F.]

CATHÉTÉRISME (Fr.), n. Ka^{3}t-at-ar-i^{2}zm. Catheterism (*q. v.*), also the introduction of a sound, probe, or the like. [A, 301, 385.]—**C. à demeure.** See *Permanent* CATHETERISM.—**C. appuyé.** Dilatation of a urethral stricture by allowing a catheter or sound to rest against it and applying gentle pressure. [L, 88.]—**C. conducteur.** The introduction of a lithotomy staff. [L, 41.]—**C. curviligne.** The passage of a curved catheter or sound. [L, 87.] —**C. dérivatif.** Catheterism for the purpose of diverting the stream of urine from contact with the urethra, as in cases of false passage or fistula. [L, 41.]—**C. désobstruant.** Dilatation of a urethral stricture. [L, 41.]—**C. des fosses nasales.** The passage of an instrument through the nose for plugging the posterior nares. [L, 41.]—**C. dilatant.** See *C. désobstruant.*—**C. du canal nasal.** Catheterism of the lacrymal duct. [L, 41.]—**C. évacuatif.** Catheterism for the purpose of emptying the bladder. [L, 41.]—**C. explorateur, C. exploratif.** See *Exploratory* CATHETERISM.—**C. forcé.** See *Forcible* CATHETERISM.—**C. gradué.** Gradual dilatation of a urethral stricture. [L, 41.]—**C. modificateur.** The passage of a sound for its therapeutic effect on the urethra. [L. 49.]—**C. par-dessus l'aine.** That method of catheterism in which the shaft of the catheter is at first held crosswise of the body and gradually brought into a line with the long axis of the trunk as the point makes its way toward the bladder. [L, 87.]—**C. par-dessus le ventre.** That method of catheterism in which the shaft of the catheter is held parallel with the long axis of the body throughout. [L, 87.]—**C. rectiligne.** The passage of a straight urethral catheter or sound. [L, 41.]—**C. utérin.** See CATHETERISM *of the uterus.*

CATHETERIUS (Lat.), adj. Ka^{2}th(ka^{3}th)-e^{2}t-e(a)′ri^2-u^{3}s(u^{4}s). Pertaining to a catheter or to catheterism. [A, 322.]

CATHETERIZATION, n. Ka^{2}th-e^{2}t-u^{5}r-i^{2}z-a′shu^{3}n. See CATHETERISM.

CATHETOGYRATES (Lat.), n. f. pl. Ka^{2}th(ka^{3}th)-e^{2}t-o(o^2)-ji^{2}r(gu^{6}r)-at(a^{3}t)′ez(e^{2}s). Fr., *cathétogyrées.* Of Bernhardi, a division of ferns (*Gyratæ veræ*), including *Polypodium, Aspidium, Asplenium, Cystopteris,* etc. ; divided by Presl into the cohorts *Hymenophoreæ* and *Gymnosoreæ.* [B.]

CATHIDRYSIS (Lat.), n. f. Ka^{2}th(ka^{3}th)-i^{2}d-ris(ru^{6}s)′i^{2}s. Gen., *cathidrys′eos* (*-is*). Gr., καθίδρυσις (from καθιδροῦν, to fix, secure). The reduction of a part to its normal position. [A, 325.]

CATHIMIA, n. In alchemy : 1. A vein of gold or silver. 2. A concretion in a furnace in which gold or silver has been smelted. 3. Soot. 4. Spuma argenti (*q. v.*). [B, 200.]

CATHION, n. Ka^{2}th′i^2-o^{2}n. See CATION.

CATHMIA, n. In alchemy, spuma auri, spuma argenti, and spuma æris. [B, 200.] Cf. CATHIMIA.

CATHOCHITES (Lat.), n. m. Ka^{2}th(ka^{3}th)-o(o^2)-kit(ch^{2}et)′-ez(as). See CATOCHITES.

CATHODAL, adj. Ka^{2}th′od-a^{2}l. Of, pertaining to, or situated at, the cathode. [B.]

CATHODE, n. Ka^{2}th′od. For deriv., see CATHODOS. Fr., *c.* Ger., *C., Kathode.* Of Crusell, the negative pole or electrode of a galvanic battery. [A, 322 ; B.]

CATHODIC, adj. Ka^{2}th-o^{2}d′i^{2}k. For deriv., see CATHODOS. 1. In botany, turned away from the direction in which the genetic spiral winds (said of a part of a leaf). [B, 279.] 2. In physiology, proceeding downward (said of a nervous current). [M. Hall (L, 154).]

CATHODOS (Lat.), **CATHODUS** (Lat.), n's f. Ka^{2}th(ka^{3}th)′-o^{2}d-o^{2}s, -u^{3}s(u^{4}s). Gr., κάθοδος (from κατά, downward, and ὁδός, a course). Ger., *Hinabsteigen.* A downward movement, especially of blood to the uterus before menstruation or to the rectum before an attack of hæmorrhoids. [A, 322.]

CATHOLARTHRITIS (Lat.), n. f. Ka^{2}th(ka^{3}th)-o^{2}l-a^{3}rth-ri-(re)′ti^{2}s. Gen., *catholarthrit′idis.* From κάθολος, in general, and ἀρθρῖτις (see ARTHRITIS). See POLYARTHRITIS.

CATHOLCEUS (Lat.), n. m. Ka^{2}th(ka^{3}th)-o^{2}l′su^{2}s(ku^{2}s). Gr., καθολκεύς (from καθέλκειν, to draw down). Of Galen, a bandage covering the entire head and serving to fix underlying bandages and dressings. [A, 322, 325.]

CATHOLICON (Lat.), **CATHOLICUM** (Lat.), n's n. Ka^{2}th-(ka^{3}th)-o^{2}l′i^{2}k-o^{2}n, -u^{3}m(u^{4}m). Gr., καθολικόν (n. of adj. καθολικός, universal [φάρμακον understood]). Fr., *catholicon, catholicum.* Ger., *allgemeine Arznei.* It., *catolico.* Sp., *católicon.* 1. A universal remedy. 2. An old generic name for a number of electuaries. [A, 301, 322, 325 ; B, 38 (α, 21)].—**C. double** (Fr.), **C. duplex.** See *Electuaire de* RHUBARBE *composé.*—**C'extract** (Ger.). The extractum colocynthidis compositum of the Brunsw. Ph., 1777. [L, 80.]—**C. Nicolai.** See *Electuaire de* RHUBARBE *composé.*

CATHOLICUS (Lat.), adj. Ka^{2}th(ka^{3}th)-o^{2}l′i^{2}k-u^{3}s(u^{4}s). Gr., καθολικός. Fr., *catholique, universel.* Ger., *allgemein, für Alles geltend.* It., *catolico.* Sp., *católico.* 1. Pervading the entire system (said of certain humors). 2. Suitable for all sorts of operations (said of furnaces), good for all diseases (said of medicines). [A, 301, 322, 325 ; B, 200 (α, 21).]

CATHOLOMELASMA (Lat.), n. n. Ka^{2}th(ka^{3}th)-o^{2}l-o(o^2)-me^{2}l-a^{2}z(a^{3}s)′ma^3. Gen., *catholomelas′matos* (*-is*). From κάθολος, in general, and μέλασμα, a black color. Fr., *catholomélasme.* Ger., *allgemeines Melasma.* General melasma. [A, 322.]

CATHORASIS (Lat.), n. f. Ka^{2}th(ka^{3}th)-o^{2}r-as(a^{3}s)′i^{2}s. Gen., *cathoras′eos* (*-is*). From καθορᾶν, to look intently. Fr., *cathorasie.* Ger., *scharfes Gesicht.* Sharpness of vision. [A, 322 ; L, 116.]

CATHOSIS [Helling] (Lat.), n. f. Ka^{2}th(ka^{3}th)-os′i^{2}s. Gen., *cathos′eos* (*-is*). Shortsightedness. [A, 322.]

CATHSUM (Ar.), n. The *Artemisia abrotanum.* [B, 88.]

CATHYGROS (Lat.), **CATHYGRUS** (Lat.), adj's. Ka^{2}th-(ka^{3}th)′i^{2}g(u^{6}g)-ro^{2}s, -ru^{3}s(ru^{4}s). Gr., κάθυγρος (from κατά intens., and ὑγρός, moist). Excessively watery (said by Hippocrates of a certain state of the uterus). [A, 325.]

CATHYPNIA (Lat.), n. f. Ka^{2}th(ka^{3}th)-i^{2}p(u^{6}p)′ni^2-a^3. From καθυπνοῦν, to sleep soundly. Very sound sleep. [A, 322 ; L, 135.]

CATHYPNOSIS (Lat.), n. f. Ka^{2}th(ka^{3}th)-i^{2}p(u^{6}p)-nos′i^{2}s. Gen., *cathypnos′eos* (*-is*). Gr., καθύπνωσις. 1. A falling into deep sleep. 2. See CATHYPNIA. [A, 322.]

CATI (Sp.), n. Ka^{3}t′e. A place in Spain, where there is a spring containing calcium carbonate. [A, 385 ; L, 49.]

CATIADION (Lat.), n. n. Ka^{2}t(ka^{3}t)-i^2-a^{2}d(a^{3}d)′i^2-o^{2}n. See CATEIADION.

CATIANG, n. See CATJANG.

CATIAS (Lat.), n. f. Ka^{2}t(ka^{3}t)′i^2-a^{2}s(a^{3}s). Gen., *cati′ados* (*-is*). Gr., κατιάς (Ion. for καθιάς). 1. See CATEIADION. 2. A catheter. 3. A tenotomy knife. 4. An ancient instrument for removing the dead fœtus by incision, also for opening abscesses of the uterus. [A, 322, 325 ; L, 84.]

CATILANG, n. In Java, a shrub, probably the *Gonus amarissimus.* [B, 121.]

CATILLARIUS (Lat.), adj. Ka^{2}t(ka^{3}t)-i^{2}l-la(la^3)′ri^2-u^{3}s(u^{4}s). From *catillus,* a small dish. Fr., *catillaire.* Shaped like a porringer or a small plate. [B, 38.]

CATILLIA (Lat.), n. f. Ka^{2}t(ka^{3}t)-i^{2}l′li^2-a^3. An old term for a weight of nine ounces. [L, 116 (α, 21).]

CATILLUM (Lat.), **CATILLUS** (Lat.), n's n. and m. Ka^{2}t-(ka^{3}t)-i^{2}l′lu^{3}m(lu^{4}m), -lu^{3}s(lu^{4}s). Dim. of *catinum* and *catinus.* Gr.,

λεκανίδιον. A small plate, bowl, or porringer. [B, 114.]—**Catillus cinereus** (seu **obrusæ**). An alembic or a cupel. [A, 322; B, 200.]

CATIMARON (Fr.), n. Ka^{3}t-i^{2}m-a^{3}r-o^{2}n^2. See CATIMURON.

CATI-MARUS, n. The *Kleinhovia hospita.* [B, 121.]

CATIMBIUM (Lat.), n. n. Ka^{2}t(ka^{3}t)-i^{2}m'bi^2-u^{3}m(u^{4}m). 1. Of Jussieu, the *Globba natans.* 2. The genus *Alpinia.* [B, 121.]

CATIMIA, n. See CATHIMIA.

CATIMURON (Fr.), n. Ka^{3}t-i^{2}m-u^{6}r-o^{2}n^2. The *Rubus fruticosus.* [B, 38, 121.]

CATINMURON (Fr.), n. Ka^{3}t-a^{2}n^2-mu^{6}r-o^{2}n^2. The fruit of *Rubus fruticosus.* [B, 38.]

CATINULUS (Lat.), n. m. Ka^{2}t(ka^{3}t)-i^{2}n'u^{2}l(u^{4}l)-u^{3}s(u^{4}s). See CATILLUS.

CATINUM (Lat.), n. n. Ka^{2}t(ka^{3}t)-in(en)'u^{3}m(u^{4}m). 1. See CATINUS. 2. Soda. [B, 88.] Cf. ALUMEN *c.*

CATINUS (Lat.), n. m. Ka^{2}t(ka^{3}t)-in(en)'u^{3}s(u^{4}s). Gr., *λεκάνη, τρυβλίον.* 1. A pot or bowl. 2. A crucible (Pliny). 3. An air-vessel in a hydraulic apparatus. [B, 114.] See also ALUMEN *catinum.*—**C. arenarius, C. fusorius.** See CATILLUS *cinereus.*

CATION [Faraday], n. Ka^{2}t'i^2-o^{2}n. Written also *cathion* and *kation.* From *κατά,* down, and *ἰόν* (n. of pres. part. of *ἰέναι,* to go). Fr., *c., cathion.* Ger., *Kation.* In electrolysis, an electro-positive element or radicle, *i. e.,* one that tends to accumulate at the negative pole. [B.]

CATIPPING, n. In Ceylon, the *Cassia tagera.* [B, 121.]

CATIRA (Hind.), n. The *Sterculia urens.* [B, 172.]

CATISAR, n. A Brazilian name for several species of *Iriartea.* [B, 121.]

CATISCHON (Lat.), adj. Ka^{2}t(ka^{3}t)-i^{2}sk(i^{2}sch^2)'o^{2}n(on). Gr., *κατίσχων* (pres. part. of *κατίσχειν = κατέχειν,* to withstand an attack). Not easily affected by drugs, especially by purgatives. [A, 325.]

CATITINA, n. In the West Indies, the *Ornitrophe occidentalis.* [B, 121.]

CATIVE DE MANGLE (Fr.), n. Ka^{3}t-ev d' ma^{3}n^{2}gl. The resin of *Bursera gummifera.* [B.]

CATIVÍ (Carib), **CATIVÍA**, n's. 1. The manihot-root in its raw state. 2. In Central America, a cutaneous disease said to be produced by an animal parasite, giving rise to profuse white, grain-like lesions; said to be so called from the resemblance of the lesions to grated manihot-root. [*a*, 14.]

CATIZOPHYTUM (Lat.), n. n. Ka^{2}t(ka^{3}t)-i^{2}z-o^{2}f'i^{2}t(u^{6}t)-u^{3}m-(u^{4}m). Fr., *catizophyte.* Of Necker, a genus (order) of plants, comprising the species (genera) *Papaver, Chelidonium, Argemone, Podophyllum, Calophyllum, Elæocarpus, Cistus, Garcinia, Ternstrœmia,* etc., now included in the *Papaveraceæ, Cistaceæ,* and other orders. [B, 38, 170.]

CATJANG, n. The *Cajanus indicus.* [B, 121, 275.]—**C.-ball.** See *C.*—**C.-gattal.** In India, the *Dolichos* (*Mucuna*) *pruriens.* [B, 88, 121.]—**C. tandoc.** The *Cassia tora.* [B, 121.]

CATKIN, n. Ka^{2}t'ki^{2}n. Ger., *Kätzchen.* See AMENT.

CAT-KORUNDOO UNNAY (Tamil), n. The *Trichilia spinosa.* [B, 88.]

CATLÆ [Bleeker] (Lat.), n. f. pl. Ka^{2}t(ka^{3}t)'-le(la^3-e^2). A subfamily of the *Anacanthini.* ["Proc. of the Zool. Soc.," 1865, p. 304 (L).]

CATLIN, CATLING, n's. Ka^{2}t'li^{2}n, -li^{2}ng. A long, narrow, double-edged, pointed knife, used to divide the tissues between the bones in amputations of the forearm or the leg. [E.]

CATMA, n. In alchemy, gold filings. [B, 200.] Cf. CATHMIA.

CATMINT, CATNEP, CATNIP, n's. Ka^{2}t'mi^{2}nt, -ne^{2}p, -ni^{2}p. Lat., *cataria.* Fr., *herbe aux chats, cataire.* Ger., *Katzenmünze.* The *Nepeta cataria* and the *Calamintha officinalis.* [B, 275.]—**Common c.** The *Nepeta cataria.* [B, 275.]—**Lesser c.** See *Small c.*—**Malabar c.** The *Anisomeles malabarica.* [B, 172.]—**Nep of c.** See *C.*—**Small c.** The *Nepeta nepetella.* [B, 275.]

CATOCALIDÆ (Lat.), n. f. pl. Ka^{2}t(ka^{3}t)-o-ka^{2}l(ka^{3}l)'i^{2}d-e-(a^3-e^2). A family of the *Limbatæ.* [L, 248.]

CATOCALIDI (Lat.), n. m. pl. Ka^{2}t(ka^{3}t)-o-ka^{2}l(ka^{3}l)'i^{2}d-i(e). Fr., *catocalides.* A subfamily of the *Arctiidæ.* [L, 303.]

CATOCATHARTIC, adj. Ka^{2}t-o-ka^{2}th-a^{3}rt'i^{2}k. Lat., *catocatharticus* (from *κάτω,* below, and *καθαρτικός,* purgative). Fr., *catocathartique.* Ger., *reinigend nach unten.* Purging downward (by the bowels). [A, 301, 322.]

CATOCHE (Lat.), n. f. Ka^{2}t(ka^{3}t)'ok(o^{2}ch^2)-e(a). Gr., *κατοχή.* 1. Catalepsy. [B, 117.] 2. See CATOCHUS (3d def.). 3. Anciently, fever with coma. [*a*, 18.]

CATOCHEILON (Lat.), **CATOCHEILUM** (Lat.), **CATOCHILON** (Lat.), n's n. Ka^{2}t(ka^{3}t)-o-kil'(che^2-i^{2}l')-on, -u^{3}m(u^{4}m), -kil(ch^{2}el)'o^{2}n. Gr., *κατώχειλον* (from *κάτω,* below, and *χεῖλος,* the lip). The lower lip. [A, 325.]

CATOCHITES (Lat.), **CATOCHITIS** (Lat.), n's m. and f. Ka^{2}t(ka^{3}t)-ok(o^{2}ch^2)-it(et)'ez(as), -i^{2}s. Gen., *catochit'æ, -idis.* Gr., *κατοχίτης, κατοχῖτις.* A precious stone found in Corsica, anciently reputed to attract and retain the hand of one touching it. [Pliny, Ruland (A, 318, 325).]

CATOCHUS (Lat.), adj. and n. Ka^{2}t(ka^{3}t)'ok(o^{2}ch^2)-u^{3}s(u^{4}s). Gr., *κάτοχος.* 1. (Adj.) affected with catalepsy. [A, 387.] 2. (N.) catalepsy. [A, 322; D, 70.] 3. (N.) a term sometimes applied to comatose conditions, especially coma-vigil, also to cataleptic, hystero-cataleptic, and cataleptoid attacks. [A, 319.] 4. (N.) induration of the connective tissue, especially in children. [A, 322.]—**C. cervinus.** Tetanus. [E.]—**C. diurnus.** Symptomatic tetany. [L, 84.]—**C. holotonicus** [Galen]. Tetanus. [E; L, 132.]—**C. infantum.** See *C.* (4th def.).

CATOCLESIUM (Lat.), n. n. Ka^{2}t(ka^{3}t)-o-klez(klas)'i^2-u^{3}m-(u^{4}m). See CATACLESIUM.

CATOCŒLIA (Lat.), n. f. Ka^{2}t(ka^{3}t)-o-sel'(ko^2'e^{2}l)-i^2-a^3. From *κάτω,* below, and *κοιλία,* the belly. Fr., *catocœlie, bas-ventre.* Ger., *Unterleib.* Syn.: *venter infimus.* The lower part of the belly. [A, 322.] Cf. HYPOGASTRIUM.

CATOCŒNADELPHE (Fr.), n. Ka^{3}t-o-san-a^{3}d-e^{2}lf. From *κάτω,* below, *κοινός,* common, and *ἀδελφός,* a brother. A cœnadelphous monster having the two bodies united below. [Gurlt (A, 301, 385); L, 32.]

CATODE, n. Ka^{2}t'od. See CATHODE.

CATODON (Lat.), n. m. Ka^{2}t(ka^{3}t)'o(o^2)-do^{2}n. From *κατά,* down, and *ὀδούς,* a tooth. The *Physeter c.* [L, 105.]—**C. macrocephalus** [Lacép]. The *Physeter macrocephalus.* [Husemann (L, 57).]

CATODONTE (Fr.), adj. Ka^{3}t-o-don^{2}t. Having the teeth curved downward. [L, 109.]

CATODONTIDÆ (Lat.), n. f. pl. Ka^{2}t(ka^{3}t)-o(o^2)-do^{2}nt'i^{2}d-e-(a^3-e^2). The sperm whales, a family of the *Cetacea;* so called because the upper jaw is edentulous. [L, 121, 302.]

CATŒADION (Lat.), n. n. Ka^{2}t(ka^{3}t)-e(o^2-e^2)-a^{2}d(a^{3}d)'i^2-o^{2}n. See CATEIADION.

CATOLE (Fr.), n. Ka^{3}t-ol. In the south of France, the flower-heads of *Arctium majus.* [B, 121.]

CATOLE, n. Fr., *catolé.* In Brazil, the *Attalea humilis.* [B, 121.]

CATOLLE (Fr.), n. Ka^{3}t-ol. In Lyons, the *Galium aparine.* [B, 38.]

CATOMETOPA (Lat.), **CATOMETOPITA** (Lat.), n. n. pl. Ka^{2}t(ka^{3}t)-o-me^{2}t'o^{2}p-a^3, -me^{2}t-o^{2}p'i^{2}t-a^3. Fr., *catométopes* [Milne-Edwards]. A tribe of the *Brachyura* having a thick, depressed body. [L, 41, 303.]

CATOMISMUS (Lat.), n. m. Ka^{2}t(ka^{3}t)-o-mi^{2}z(mi^{2}s)'mu^{3}s(mu^{4}s). Gr., *κατωμισμός* (from *κατωμίζειν,* to raise with the shoulder). Fr., *catomisme.* An ancient Greek method of reducing a dislocation of the head of the humerus by placing one's shoulder in the axilla and then lifting the patient by straightening one's self. [Hippocrates (A, 325); Paulus Ægineta (A, 387).]

CATOOSA SPRINGS, n. Ka^{2}t-us'a^3. A place in Catoosa County, Georgia, where there are purgative calcic springs (called "All-healing," "Red Sweet," "White Sulphur," "Buffalo," "Cosmetic," "Chalybeate," "Magnesia," "Congress," "Alum," and "Black Sulphur") of special value in dyspepsia with constipation and hepatic engorgement. [A, 363.]

CATOPES (Fr.), n. pl. Ka^{3}t-op. See CATOPODA.

CATOPODA (Lat.), n. n. pl. Ka^{2}t(ka^{3}t)-o^{2}p(op)'o^{2}d-a^3. From *κάτω,* below, and *πούς,* the foot. Fr., *catopodes, catopes.* Ger., *Bauchflosser.* Ventral fins, also fishes provided with them and other animals having ventral limbs. [A, 301, 322; Duméril (A, 385).]

CATOPTER (Lat.), n. m. Ka^{2}t(ka^{3}t)-o^{2}p'tu^{5}r(tar). Gen., *catopter'os* (*-is*). Gr., *κατοπτήρ.* It., *catottro.* Sp., *catoptro.* An old name for a speculum, especially a speculum for dilating the anus or vulva. [Galen (A, 325).]

CATOPTRIC, adj. Ka^{2}t-o^{2}p'tri^{2}k. Gr., *κατοπτρικός.* Lat., *catoptricus.* Fr., *catoptrique.* Ger., *catoptrisch.* It., *catottrico.* Sp., *catóptrico.* Pertaining to reflected light or to catoptrics. [A, 322.]—**C. examination of the eye, C. test.** Fr., *examen catoptrique de l'œil.* Ger., *catoptrische Untersuchung des Auges.* It., *esame catottrica dell'occhio.* Sp., *examinación catóptrica del ojo.* A method of examination formerly used to determine the presence and nature of a cataract, but now mainly employed to show whether or not the lens is completely dislocated. A lighted candle is moved from side to side before the patient's eye in a dark room. If the pupil is moderately dilated, three images of the flame may be seen: one, upright and very bright, on the anterior surface of the cornea; a second, upright but not so bright, on the anterior surface of the lens; and a third, inverted and faint, on the posterior surface of the lens. If the lens is dislocated, the third image will be wanting. [F.]

CATOPTRICS, n. sing. Ka^{2}t-o^{2}p'tri^{2}ks. Gr., *κατοπτρική* (*τέχνη* understood). Lat., *catoptrica, catoptrice* (*ars* understood). Fr., *catoptrique.* Ger., *Catoptrik.* It., *catottrica.* Sp., *catóptrica.* That part of physics which treats of reflected light. [F.]

CATOPTROMANCY, n. Ka^{2}t-o^{2}p'tro-ma^{2}n-si^2. Lat., *catoptromanteia* (from *κάτοπτρις,* a mirror, and *μαντεία,* prophecy). Fr., *catoptromancie.* Ger., *Spiegelprophezeiung.* Divination by observation of the face seen in a mirror. [A, 385.]

CATOPTRON (Lat.), n. n. Ka^{2}t(ka^{3}t)-o^{2}p'tro^{2}n. Gr., *κάτοπτρον.* A mirror. [A, 322.]

CATOPTROSCOPE, n. Ka^{2}t-o^{2}p'tro-skop. Lat., *catoptroscopium* (from *κάτοπτρις,* a mirror, and *σκοπεῖν,* to examine). Fr., *c.* Ger., *Spiegelapparat.* An apparatus for examining objects by reflected light, especially in microscopy. [W. Sömmerring (A, 322).]

CATOPTROSCOPIE (Fr.), n. Ka^{3}t-o^{2}p-tro-skop-e. Examination by means of mirrors. [A, 301.]

CATOPUS (Lat.), adj. Ka^{2}t(ka^{3}t)-op'u^{3}s(u^{4}s). From *κάτω,* below, and *πούς,* the foot. Fr., *catope.* Having the characters of the *Catopoda* (*q. v.*). [A, 301, 385.]

CATORCHITES (Lat.), n. m. Ka^{2}t(ka^{3}t)-o^{2}rk(o^{2}rch^2)-it(et)'ez-(as). Gr., *κατορχίτης* (*οἶνος* understood). Syn.: *sycites.* A wine anciently made from figs, sometimes with the addition of other in-

gredients; reputed diuretic, emmenagogue, and galactagogue. [B, 200 (*a*, 21).]

CATORETIC, adj. Ka^{2}t-o-re^{2}t'i^{2}k. See CATOTERIC.

CATORHINUS [Lissauer] (Lat.), adj. Ka^{2}t(ka^{3}t)-o-rin(ren)'u^{3}s-(u^{4}s). From κάτω, below, and ῥίς, the nose. Ger., *katorhin.* Having the angle formed by the intersection of the radius fixus and a line connecting the punctum alæ vomeris and the anterior nasal spine greater than +16·5. [L.]

CATOSTOMINA (Lat.), n. n. pl. Ka^{2}t(ka^{3}t)-o-stom(sto^{2}m)-in-(en)'a^3. A group of the *Cyprinidæ.* [L, 207.]

CATOSTOMUS (Lat.), adj. Ka^{2}t(ka^{3}t)-o^{2}s(os)'tom(to^{2}m)-u^{3}s-(u^{4}s). From κάτω, below, and στόμα, the mouth. Fr., *catostome.* Having the mouth situated low; in craniometry, having the angle between the radius fixus and a line drawn from the punctum præmaxillare to the punctum alæ vomeris between +0·90 and +25·5°. [A, 385; Lissauer (L).]

CATOTAPHYTA (Lat.), n. n. pl. Ka^{2}t(ka^{3}t)-ot-a^{2}f(a^{3}f)'i^{2}t-(u^{6}t)-a^3. From κατώτατω, inferiorly, and φυτόν, a plant. Fr., *catotaphytes.* Of Necker, a division of plants, comprising genera (now classed in the *Caryophyllaceæ*) having the stamens inserted at the base of the calyx. [B, 38, 121.]

CATOTERIC, adj. Ka^{2}t-o-te^{2}r'i^{2}k. Gr., κατωτερικός (from κατώτερος, lower). Lat., *catotericus.* Fr., *catotérique.* Causing a downward flow, cathartic. [A, 301, 322, 325, 385.]

CATOTICA (Lat.), n. n. pl. Ka^{2}t(ka^{3}t)-o^{2}t'i^{2}k-a^3. Of Mason Good, an order of his *Eccritica* (*q. v.*) affecting internal surfaces. [L, 83.]

CATOTRETA (Lat.), n. n. pl. Ka^{2}t(ka^{3}t)-o-tret(trat)'a^3. From κάτω, below, and τρητός, pierced. Fr., *catotrètes.* Of Ehrenberg, two families of *Infusoria* in which the anus is not terminal. [L, 109, 180.]

CATOURANISCUS [Lissauer] (Lat.), adj. Ka^{2}t(ka^{3}t)-o-u^{2}r(ur)-a^{2}n(a^{3}n)-i^{2}sk'u^{3}s(u^{4}s). From κάτω, below, and οὐρανίσκος, the roof of the mouth. Ger., *katouranisch.* Having the angle formed by the radius fixus and a line tangent to the middle of the posterior edge of the incisor foramen and the punctum præmaxillare between +20° and +40°. [L.]

CATOURANUS [Lissauer] (Lat.), adj. Ka^{2}t(ka^{3}t)-o-u^{2}r(ur)'a^{2}n-(a^{3}n)-u^{3}s(u^{4}s). From κάτω, below, and οὐρανός, the roof of the mouth. Ger., *katouran.* Having the angle of intersection of the radius fixus with a line drawn from the punctum præmaxillare to the posterior nasal spine greater than +17°. [L.]

CATOXYS (Lat.), adj. Ka^{2}t(ka^{3}t)-o^{2}x'i^{2}s(u^{6}s). Gr., κάτοξυς (from κατά intens., and ὀξύς, acute). Very acute (said of diseases). [Hippocrates, Galen (A, 325).]

CATRAME (It.), n. Ka^{3}t-ra^{3}m'a. Tar. [B, 10.]—**Acqua di c.** See *Aqua* PICIS (under PIX).—**C. di legno, C. vegetale.** See *Wood*-TAR.—**Olio di c.** See TAR *oil.*

CATRICONDA, n. The *Coix lacrima.* [B, 88, 121.]

CATRIGHONDAO, n. An Indian name for a gum-resin of a slightly acid taste, used as a stomachic and tonic. [B, 88.]

CATROBIL, n. Of the alchemists, earth. [L, 94.]

CATSJIL-KELENGU, n. In India, the *Dioscorea alata.* [B, 88.]

CATS-JOPIRI, n. In Amboyna, the *Gardenia florida.* [B, 121.]

CATSJULA-KALENGU, n. In India, the *Kœmpferia galanga.* [B, 88, 121.]

CATSKILL MOUNTAINS, n. pl. Ka^{2}ts'ki^{2}l. A mountainous region in the State of New York, on the west side of the Hudson River, said to have the same climatic advantages as the Adirondack region. ["N. Y. Med. Jour.," Sept. 29, 1888, p. 363.]

CATSPIL-KELENGU, n. See CATSJIL-KELENGU.

CATTA CACHEREE, n. In India, a sort of *Hibiscus.* The leaves are used to hasten the maturation of phlegmons. [B, 88, 121.]

CATTA CAMBOO (Tamil), n. A variety of catechu prepared from the areca-nut. [B, 180.]

CATTA GAMBER, n. See CATECHU (2d def.).

CATTA GAMMA, CATTAGAUMA, n's. Gamboge. [B, 121, 180.]

CATTAI-ILLANDAI, n. In Coromandel, a species of *Zizyphus.* [B, 121.]

CATTAMMON, n. In Madagascar, the *Eugenia jambos.* [B, 88, 121.]

CATTARIA, n. See CATARIA.

CATTA-TIRPALI, CATTA TRIPALI, n's. See CATTU-TIRPALI.

CATTE-COULLOU, n. In Coromandel, the *Cassia chamœcrista.* [B, 88, 121.]

CATTELLI-PALLA, CATTELLI-POLLA, n's. The *Pancratium zeylanicum.* [B, 121.]

CATTEMUNDOO, n. See CATTIMANDOO.

CATTEN-CLOVER, n. Ka^{2}t''e^{2}n-klo'vu^{5}r. The *Lotus corniculatus.* [B, 275.]

CATTEON-DEREGUE, n. In Coromandel, the *Cissus angulata.* [B, 121.]

CATTERIDGE-TREE, n. Ka^{2}t'u^{5}r-i^{2}j-tre. The *Cornus sanguinea.* [B, 275.]

CATTI-CATTI (Malay), n. The *Cœsalpinia bonduc.* [B, 88, 121.]

CATTI-CORONDE, n. A tree of Ceylon having an aromatic bark sometimes substituted for cinnamon. [B, 88, 121.]

CATTILICHERY, n. In Pondichery, the *Solanum melongena.* [L, 105.]

CATTIMANDOO, CATTIMANDU (Teloogoo), n's. The *Euphorbia cattimandoo.* [B, 172, 185.]

CATTLE-PLAGUE, n. Ka^{2}tl'plag. See RINDERPEST.

CATTLE-POISON-PLANT, n. Ka^{2}tl'poizn-pla^{3}nt. In Western Australia, the *Gastrolobium trilobum, Gastrolobium obovatum,* and *Gastrolobium spinosum.* [B, 275.]

CATTON-CATCHEREE, n. See CATTA CACHEREE.

CATTON-VARY, n. In Coromandel, the *Loranthus longiflorus.* [B, 121.]

CATTON-WALAY, n. See CATU-WAGGHEI.

CATTU, n. An Indian name for several plants. [B, 121.]—**C.-carambu** (Malay). The *Jussiœa villosa.* [B, 172.]—**C.-casturi.** The *Abelmoschus moschatus* (*Hibiscus abelmoschus*). [B, 172.]—**C. gambar.** Gambir catechu. [B, 180.]—**C.-gasturi.** See *C.-casturi.*—**C.-Kelengu.** The *Convolvulus malabaricus.* [B, 121.]—**C.-molago.** In Malabar, an undetermined species of *Piper.* [B, 121.]—**C. paeru** (Malay). The *Phaseolus rostratus.* [B, 172.]—**C.-picinna.** In Malabar, an undetermined species of *Momordica.* [B, 121.]—**C. scheragam** (Malay), **C. schiragam** (Malay). The *Vernonia anthetminthica.* [B, 121, 172.]—**C.-tagera.** The *Indigofera hirsuta.* [B, 121.]—**C.-tirpali** (Malay). The *Chavica Roxburghii* (*Piper longum*). [B. 121, 172.]—**C. tirtava.** The *Ocimum gratissimum.* [B, 121.]—**C.-tsieru-nageram.** A species of *Limona* with a very acid fruit. [B, 121.]—**C.-tsjandi.** The *Dolichos rotundifolius;* according to some, the *Canavalia maritima.* [B, 121.]—**C.-valli.** The *Cissampelos pareira.* [B, 121.]

CATTUS (Lat.), n. m. Ka^{2}t(ka^{3}t)'tu^{3}s(tu^{4}s). 1. Of Theophrastus, the *Beta vulgaris.* [B, 88, 121.] 2. See CATUS.

CATU, n. See CATTU.—**C.-adamboe.** The *Adambea* (*Lagerstrœmia*). [B, 121.]—**C.-alu.** The *Ficus citrifolia.* [B, 121.]—**C.-bala.** The *Canna indica.* [B, 121; L, 105.]—**C.-balaeren.** The *Hibiscus vitifolius.* [B, 121.]—**C.-baramareca.** See CATTU-*tsjandi.*—**C.-capel.** The *Liriope.* [B, 121.]—**C.-catsjil.** The *Dioscorea bulbifera.* [B, 88, 121.] Cf. CATSJIL-KELENGU.—**C.-curba.** The *Lavandula carnosa.* [B, 121.]—**C.-kalengu.** The *Dioscorea acuminata.* [B, 121.] Cf. CATSJIL-KELENGU.—**C.-kamhigarakta** (Sanscrit). The *Dæmonorops draco.* [L, 105.]—**C.-karohiti.** The *Barleria prionitis.* [B, 121; L, 105.]—**C.-lama.** The *Vahlia pirapitica.* [B, 121.]—**C.-mulla.** A Malabar species of *Jasminum.* [B, 38, 121.]—**C.-naregam.** A species of *Limonia.* [B, 121.] Cf. CATTU-*tsieru-nageram.* [B, 121.]—**C.-nargam.** The *Alangium decapetalum.* [B, 88.]—**C.-nuren-kelengu.** A species of *Dioscorea* said to resemble the *Dioscorea aculeata.* [B, 121.]—**C.-paelu, C.-paeru.** A species of *Dolichos* (perhaps the *Dolichos rotundifolius*). [B, 121.]—**C.-pal-valli.** The *Periploca dubia.* [B, 121.]—**C.-pee-tjanga piisporam.** The *Ruellia antipoda.* [B, 121.]—**C.-pinaca.** The *Lagerstrœmia.* [B, 121.]—**C.-pitsjegam mulla.** The *Mogorium triflorum.* [B. 121.]—**C.-taekka.** An undetermined tree of India, belonging, according to Adanson, to the *Caprifoliaceœ.* [B, 121.]—**C.-tirpali.** See CATTU-*tirpali.*—**C.-tjiragam-mulla.** The *Mogorium multiflorum.* [B, 121.]—**C.-tritava.** See CATTU-*tirtava.* [B, 121.]—**C.-tsjérégam-mulla.** See *C.-tjiragam-mulla.*—**C.-tsjetti-pu.** The *Artemisia indica.* [B, 88, 121.]—**C.-uren.** The *Sida cordifolia.* [B, 121.]—**C.-wagghei.** The *Acacia lebbek.* [B, 121.]

CATUABA (Port.), n. Ka^{3}t-u-a^3'ba^3. In Brazil, a species of *Erythroxylon.* [B, 121.]

CATUBÉE (Fr.), n. Ka^{3}t-u^6-ba. See COUTOUBEA.

CATULIO-VITSNA-ELEANDI, n. In Malabar, the *Ruellia erecta.* [B, 121.]

CATULLI-PELA, CATULLI-POLA, n. The *Pancratium zeylanicum.* [B, 121.]

CATULOTIC, adj. Ka^{2}t-u^{2}l-o^{2}t'i^{2}k. Gr., κατουλωτικός (from κατουλοῦν, to cause to cicatrize). Lat., *catuloticus.* Fr., *catulotique.* Ger., *vernarbend.* Tending to promote cicatrization (said of remedies). [L, 30, 109.]

CATULUS (Lat.), n. m. Ka^{2}t(ka^{3}t)'u^{2}l(u^{4}l)-u^{3}s(u^{4}s). In botany, an ament; in zoology, a puppy. [B, 19, 121; L, 94.]

CATURIDÆ (Lat.), n. f. pl. Ka^{2}t(ka^{3}t)-u^2(u)'ri^{2}d-e(a^3-e^2). An extinct family of the *Amioidei* having a persistent notochord with partially ossified vertebræ, a homocercal tail, fins with fulcra, and small and pointed teeth in a single series. [L, 207.]

CATURUS (Lat.), n. m. Ka^{2}t(ka^{3}t)-u^2(u)'ru^{3}s(ru^{4}s). From *catus,* the cat, and οὐρά, a tail. Fr., *cature.* 1. Of Linnæus, see ACALYPHA. 2. Of Loureiro, see ALCHORNEA. [B, 121.]—**C. spiciflorus** [Linnæus]. The *Acalypha hispida.* [B, 173.]

CATUS (Lat.), n. m. Ka(ka^3)'tu^{3}s(tu^{4}s). The cat, of which the fat, blood, head, dung, skin, and secundines were formerly used in medicine. [L, 94.]—**C. aquæ.** The *Mustela lutra.* [L, 105.]—**C. zibethicus.** The civet cat. [L, 105.]

CATUSA (Port.), n. Ka^{3}t-us'a^3. See BEENEL.

CATZOTL (Mex.), n. The *Dolichos tuberosa.* [A, 447.]

CAUA-THENTHI (Hind.), n. The *Clitoria ternata.* [B, 172.]

CAUCAFON, n. The *Allium magicum.* [Dodoeus, Lobel (B, 121).]

CAUCALEÆ (Lat.), n. f. pl. Ka^4(ka^3-u^4)-kal(ka^{3}l)'e^2-e(a^3-e^2). Of C. Koch, a tribe of the *Umbelliferæ,* comprising *Caucalis,* etc. [B, 121.]

CAUCALIA (Lat.), n. f. Ka^4(ka^3-u^4)-kal(ka^{3}l)'i^2-a^3. See CACALIA.

CAUCALIDE (Fr.), n. Ko-ka^{3}l-ed. See CAUCALIS.—**C. âpre.** The *Caucalis anthriscus.* [B, 38.]—**C. à grandes fleurs.** The *Caucalis grandiflora.* [B, 38.]—**C. à large feuilles.** The *Caucalis latifolia.* [B, 38.]

CAUCALIDEÆ (Lat.), n. f. pl. Ka^4(ka^3-u^4)-ka^{2}l(ka^{3}l)-i^{2}d'e^2-e-(a^3-e^2). Fr., *caucalidées.* Of Link and others, a suborder, subtribe, or section of the *Umbelliferæ* (*Acanthospermæ*), comprising *Caucalis, Daucus,* and, according to Link, *Athamantha, Libanotis, Cuminum, Anthriscus,* etc. [B, 170.]

CAUCALIER (Fr.), n. Ko-ka^{3}l-i^2-a. The *Caucalis.* [B, 38.]—**Petit c.** The *Caucalis leptophylla.* [B, 173.]

CAUCALINÆ (Lat.), n. f. pl. Ka^4(ka^3-u^4)-ka^{2}l(ka^{3}l)-i(e)'ne-(na^3-e^2). Fr., *caucalinées.* 1. Of Sprengel, an order (or tribe) of the *Umbelliferæ,* comprising *Caucalis, Daucus, Athamanta, Bubon, Cuminum,* and *Bunium.* 2. Of Reichenbach, a subdivision of the *Solenospermæ,* comprising *Caucalis* and *Elæoselinum.* [B, 170.]

CAUCALINEÆ (Lat.), n. f. pl. Ka^4(ka^3-u^4)-ka^{2}l(ka^{3}l)-i^{2}n'e^2-e(a^3-e^2). Fr., *caucalinées.* 1. Of Koch, Reichenbach, and others, a tribe of the *Umbelliferæ* comprising *Caucalis* and two genera now included with it. Cf. CAUCALEÆ. 2. Of Bentham and Hooker, a tribe of the *Umbelliferæ* (series *Diplozygiæ*), comprising *Caucalis, Daucus, Cuminum, Coriandrum,* etc. [B, 42, 170.]

CAUCALINIDÆ [Lindley] (Lat.), n. f. pl. Ka^4(ka^3-u^4)-ka^{2}l-(ka^{3}l)-i^{2}n'i^{2}d-e(a^3-e^2). Fr., *caucalinidées.* See CAUCALEÆ.

CAUCALIS (Lat.), n. f. Ka^4'(ka^3'u^4)-ka^{2}l(ka^{3}l)-i^{2}s. Gen., *caucal'idos (-is).* Gr., καυκαλίς [Dioscorides]. Fr., *caucalide.* 1. Of Pliny, a plant, probably the *C. grandiflora*; of Dioscorides, probably the *C. maritima* (*Daucus maritima*). 2. Of Linnæus, a genus of umbelliferous plants of the tribe *Caucalineæ,* comprising about eighteen species, mostly indigenous to the northern hemisphere of the Old World, and especially the shores of the Mediterranean. It comprises, according to Bentham and Hooker, the genera *Turgenia Torilis,* and *Lisæa,* formerly regarded as distinct. [B, 42, 180.]—**C. altera.** See *C. latifolia.*—**C. anglica flore rubente** [Parkinson]. See *C. daucoides.*—**C. anthriscus** [Scopoli]. An annual plant about 2¼ ft. high, growing in hedges; said to be diuretic. [B, 42, 173.]—**C. apii foliis, flore rubro, C. apii foliis, floribus rubris** [Merc.], **C. arvensis echinata latifolia** [Ray. Tournefort], **C. arvensis latifolia purpurea** [Parkinson]. See *C. latifolia.*—**C. aspera** [Lamarck]. See *C. anthriscus.*—**C. carota** [Roth]. The *Daucus carota.* [B, 173.]—**C. daucoides** [Linnæus]. Fr., *gratteau.* Bur-parsley, hedge-parsley; a low annual European herb with red flowers, growing in hedges and thickets. The fruit was formerly regarded as diuretic and emmenagogue. [B, 71, 173, 200.]—**C. grandiflora** [Linnæus]. Fr., *giroville, mélinot, persillée.* An annual European species with large white flowers; said to be diuretic. [B, 173.]—**C. latifolia** [Linnæus]. Fr., *gratteau.* Bastard parsley; an annual European species about 3 ft. high, with rather broad leaves and red flowers; diuretic and formerly eaten as a pot-herb. [B, 173, 200.]—**C. lato apii folio** [Hist. oxon.]. See *C. latifolia.*—**C. leptophylla.** Fr., *petit caucalier.* 1. Of Lamarck, the *C. daucoides.* 2. Of Linnæus, a low annual European species with pink flowers; said to be edible. [B, 71, 173.]—**C. maritima** [Gowan, Cavanilles]. The *Daucus maritimus.* [B, 42, 173, 180.]—**C. minor flore rubente** [Parkinson], **C. minor flosculis rubentibus** [Ray]. See *C. daucoides.*—**C. pumila** [Vahl]. See *C. maritima.*—**C. rugaris** [Rupp.]. See *C. daucoides.*—**C. sanicula** [Crantz]. The *Sanicula europæa.* [B, 173, 180.]—**C. scandicina** [Roth]. The *Anthriscus vulgaris.* [B, 121.]—**C. secunda** [Ger.]. See *C. latifolia.*—**C. semine aspero, flosculis rubentibus** [C. Bauhin]. See *C. daucoides.*

CAUCALOÏDES (Lat.), adj. Ka^4(ka^3-u^4)-ka^{2}l(ka^{3}l)-o(o^2)-i(e)'-dez(das). From καυκαλίς (see CAUCALIS), and εἶδος, resemblance. Fr., *caucaloïde.* Resembling the flower of the *Caucalis* (said of the patella). [L, 41, 94.]

CAUCASON [Lob.], n. The *Allium magicum.* [B, 121.]

CAUCHALAGUA, n. See CANCHALAGUA.

CAUCHEMAR (Fr.), n. Kosh-ma^{3}r. See INCUBUS.

CAUCHUC, n. See CAOUTCHOUC.

CAUCHUM, n. Of Avicenna, the *Chelidonium majus.* [B, 88, 121.]

CAUCON (Lat.), n. n. Ka^4'(ka^3-u')-ko^{2}n. Gr., καῦκον. Of Pliny, a plant variously considered to be the *Cuscuta, Equisetum,* or *Ephedra.* [B, 121.]

CAUDA (Lat.), n. f. Ka^4'(ka^3'u^4)-da^3. Gr., οὐρά. Fr., *queue.* Ger., *Schwanz.* 1. A tail or a tail-like appendage; of the older writers, the penis, the clitoris, and the coccyx; applied by some writers to the ventral end of the fasciola or fascia dentata. [A, 322, 325; I.] 2. In botany, the elongated, hairy, and accrescent style tipping the fruit in certain plants; also any elongated, soft, narrow terminal appendage, such as that of the corolline lobes of *Strophanthus.* [B, 1, 19, 121.] 3. Of Link, see CAUDICULA. 4. Of a muscle, that portion that forms its insertion. [L, 175.]—**C. caudati** [Wilder]. See *C. corporis striati.*—**C. cerebelli.** See *Vermiform* PROCESS.—**C. coccygea.** See COCCYX.—**C. colliculi caudati.** See *C. corporis striati.*—**C. cornu Ammonis.** Of Zuckerkandl, a narrow strip sometimes found along the margin of the fasciola (fascia dentata), between it and the fimbria and near the splenium. It has, however, no direct connection with the hippocampus (cornu Ammonis). [I.]—**C. cornu posterioris.** A solid appendage to the posterior horn of the lateral ventricle of the brain, running backward toward the occipital lobe and composed of highly vascular neuroglia; an obliterated continuation of the *cornu posterius.* [Krause (α, 18).]—**C. corporis striati.** Syn.: *c. caudati* [Wilder], *c. striati* [Wilder], *surcingle* [Dalton]. The pointed posterior extremity of the corpus striatum. [I.]—**C. epididymidis.** Fr., *queue de l'épididyme.* Ger., *Nebenhodenschwanz.* Syn.: *globus minor.* The lower extremity of the epididymis. [L, 7.]—**C. equina.** Fr., *queue de cheval.* Ger., *Pferdeschweif, Rossschweif.* 1. The inferior segment of the spinal cord together with the numerous large (lumbar and sacral) nerves arising from the lumbar enlargement and continuing downward in a parallel direction until they diverge through the intervertebral foramina. They give the termination of the cord the appearance of a horse's tail, whence the name. [I, 6; α, 17, 18.] 2. In botany, the *Equisetum.* [B, 200.]—**C. equina minor.** The *Equisetum arvense.* [B, 180.]—**C. fasciæ dentatæ.** Of Luschka, the continuation of the fasciola or fascia dentata upon the uncus of the gyrus hippocampi; the banderella, or bandelette, of Giaccomini. [α, 18; Zuckerkandl (I, 85).]—**C. felis** [Rumphius]. The *Acalypha.* [B, 121.]—**C. helicis.** A small process of the cartilage of the ear at the junction of the helix and anthelix. [L, 31.]—**C. leonis** [Cæsalpinius]. The *Orobanche major.* [B. 211.]—**C. lienis.** The lower end of the spleen. [L, 31.]—**C. medullæ.** Of Bartholin, apparently a collective term for the medulla oblongata and the spinal cord. [Burdach (α 18); I, 3; K.]—**C. medullæ oblongatæ.** Fr., *queue de la moëlle allongée.* Of Winslow, the medulla oblongata. [I, 3.]—**C. muliebris.** See CLITORIS.—**C. murina.** The *Myosurus minimus.* [B, 180.]—**C. muris.** A species of *Ranunculus.* [B, 200.]—**C. musculi.** See *C.* (4th def.).—**C. pancreatis.** Fr., *queue du pancréas.* The left extremity of the pancreas, which tapers to a small size. [L, 31.]—**C. penduculus mallei.** The manubrium of the malleus. [L, 7.]—**C. porcina.** The *Peucedanum.* [B, 200].—**C. prior flexoris brevis.** The deep origin of the flexor brevis pollicis. [L, 31.]—**C. seminis.** See *C.* (2d def.).—**C. striati** [Wilder]. See *C. corporis striati.*—**C. superciliaris.** The external portion of the eyebrow. [L, 7.]—**C. vulpis rubicundi.** An alchemical name for red lead. [B, 200.]

CAUDACUTUS (Lat.), adj. Ka^{4}d(ka^3-u^{4}d)-a^{2}k(a^{3}k)-u^{2}t(ut)'u^{3}s-(u^{4}s). From *cauda,* the tail, and *acutus,* acute. Having a sharp tail. [L, 341.]

CAUDAD, adj. and adv. Ka^{4}d'a^{2}d. From *cauda,* a tail. Toward the tail. [L, 343.]

CAUDAFURCATUS (Lat.), adj. Ka^{4}d(ka^3-u^{4}d)-a^3-fu^{5}rk-(fu^{4}rk)-a(a^3)'tu^{3}s(tu^{4}s). From *cauda,* the tail, and *furca,* a fork. Having a forked tail. [L, 341.]

CAUDAL, adj. Ka^{4}d'a^{2}l. Lat., *caudalis.* Fr., *c.* Pertaining to, resembling or situated near the tail. [L, 343.]

CAUDATA (Lat.), n. n. pl. Ka^{4}d(ka^3-u^{4}d)-a(a^3)'ta^3. The *Batrachia gradientia.* [L, 289.]

CAUDATE, CAUDATED, adj's. Ka^{4}d'at, -at-e^{2}d. Lat., *caudatus.* Fr., *caudé.* Ger., *geschwänzt.* Shaped like or having a tail or a tail-like appendage. [B, 98, 215.]

CAUDATION, n. Ka^{4}d-a'shu^{3}n. Lat., *caudatio.* Fr., *c.* It., *caudazione.* Sp., *caudación.* 1. The state of being provided with a tail. [L, 73.] 2. Elongation of the clitoris. [A, 325.]

CAUDATUM [Wilder] (Lat.), n. n. Ka^{4}d(ka^3-u^{4}d)-at(a^{3}t)'u^{3}m-(u^{4}m). See CORPUS *striatum.*

CAUDATUS (Lat.), **CAUDÉ** (Fr.), adj's. Ka^{4}d(ka^3-u^{4}d)-at-(a^{3}t)'u^{3}s(u^{4}s), kod-a. See CAUDATE.

CAUDEX (Lat.), n. m. Ka^{4}d'(ka^3'u^{4}d)-e^{2}x. Gen., *caud'icis.* Gr., στέλεχος, κορμός, στύπος. Fr., *c.* Ger., *Stock, Stamm.* It., *caudice.* Of some botanists, a general term for the stalk or trunk of a plant, and so synonymous with axis; of others, a non-branching plant axis, provided with leaves at its upper extremity only, such as the trunk of palm-trees; of Link, the living part of a plant-stalk the branches and leaves of which die each year after fructification. [B, 1, 19, 121.]—**C. ascendens.** Fr., *c. ascendant.* Ger., *aufsteigender Stock.* The aerial stem of a plant. [B, 123.]—**C. cerebri.** Ger., *Grosshirnstamm.* That part of the encephalon that is situated between the pons Varolii and the optic thalami, consisting of the crura cerebri and the tegmentum. [Burdach (α, 18).]—**C. descendens** [Linnæus]. Fr., *c. descendant.* Ger., *absteigender Stock.* The rhizome of a plant: according to some, its root. [B, 1, 19, 121, 123.]—**C. dorsalis.** 1. The spinal cord. 2. The medulla oblongata. [L, 7.]—**C. encephali.** The cerebral peduncle. [I, 3; K.]—**C. encephali communis.** See MEDULLA *oblongata* and CRUS *cerebri.*—**C. encephali pontilis.** See PONS *Varolii.*—**C. epigæus.** Fr., *c. sur terre.* Ger., *oberirdischer Stock.* See *C. ascendens.*—**C. hypogæus.** Fr., *c. souterrain.* Ger., *unterirdischer Stock.* A subterranean stem. [B, 198.]—**C. intermedius.** A portion of the plant-axis situated between the stem and the root, and differing in character from both. The tuberous thickening of the stalk in some varieties of cabbage is an example. [B, 123.]—**C. medullaris.** See *Cerebral* PEDUNCLE.—**C. radicis** [Bosc.]. The extremity of a root. [B, 121.]—**C. repens.** A rhizome. [B, 19.]—**C. simplex.** A non-branching plant-stem. [B, 198.]—**C. subterraneus.** See *C. hypogæus.*

CAUDICIFORM, adj. Ka^{4}d-i^{2}s'i^2-fo^{2}rm. Lat., *caudiciformis* (from *caudex* [*q. v.*], and *forma,* form). Fr., *caudiciforme.* Ger., *stockförmig, stockartig.* Shaped like or resembling a caudex (2d def.). [B, 123.]

CAUDICLE, n. Ka^{4}d'i^2-kl. See CAUDICULA and CAUDICULUS.

CAUDICULA (Lat.), n. f. Ka^{4}d(ka^3-u^{4}d)-i^{2}k'u^{2}l(u^{4}l)-a^3. Dim. of *cauda,* a tail. Fr., *caudicule.* Ger., *Schwänzchen, Schweifchen* (2d def.). Syn.: *stipes* [Link] (2d def.), *cauda* [Link] (2d def.), *processus filiformis* [R. Brown] (2d def.). 1. A little tail or cauda (*q. v.*). 2. The pedicle which bears the pollen-masses in certain orchids and which is formed by an abortion of a portion of the pollen-substance itself. It is usually attached to the anther-wall through the medium of the retinaculum (*q. v.*). [B, 42, 121, 123, 198.]

CAUDICULATUS (Lat.), adj. Ka^{4}d(ka^3-u^{4}d)-i^{2}k-u^{2}l(u^{4}l)-at(a^{3}t)'-u^{3}s(u^{4}s). Fr., *caudiculé.* Ger., *geschwäntzt* (1st def.), *beschweift* (2d def.). 1. Provided with a *caudicula* (1st def.). 2. Provided with a *caudicula* (2d def.). [B, 123.]

CAUDICULUS (Lat.), n. m. Ka4d(ka3-u4d)-i2k'u2l(u4l)-u3s(u4s). Dim. of *caudex* (*q. v.*). Fr., *caudicule.* Ger., *Stämmchen.* A perennial ramification of a root-stock, leafy and growing upon the surface of the ground. It resembles a stolon, but is less elongated and has fewer runners. [B, 123.]

CAUDIFEROUS, adj. Ka4d-i2f'e2r-u3s. Lat., *caudiferus* (from *cauda*, a tail, and *ferre*, to bear). Fr., *caudifère.* Ger., *schwanztragend.* Having a tail or a tail-like appendage. [L, 41.]

CAUDIFORME (Fr.), adj. Kod-e-form. Tail-shaped. [A, 385.]

CAUDIGERUS (Lat.), adj. Ka4d(ka3-u4d)-i2j(i2g)'e2r-u3s(u4s). From *cauda*, a tail, and *gerere*, to bear. Fr., *caudigère.* Terminating in a tail-like appendage. [L, 41.]

CAUDIMANOUS, adj. Ka4d-i2m'a2n-u3s. Lat., *caudimanus* (from *cauda*, a tail, and *manus*, a hand). Fr., *caudimane.* Ger., *schwanzhandig.* Having a prehensile tail. [L, 41.]

CAUDIVOLVULUS (Lat.), adj. Ka4d(ka3-u4d)-i2-vo2l(wo2l)'-vu2l(wu4l)-u3s(u4s). From *cauda*, a tail, and *volvulus*, a coil. See CAUDIMANOUS.

CAUDLE, n. Ka4dl. Lat., *calidum.* Fr., *chaudeau.* A warm drink containing wine, eggs, sugar, and spices. [L, 77.]

CAUDO-TIBIALIS (Lat.), n. m. Ka4d''(ka3''u4d)-o(o2)-ti2b-i2-a(a3)'li2s. For deriv., see CAUDA and TIBIA. In the *Phocidæ*, a muscle extending from the caudal vertebræ to the tibia. [L, 66.]

CAUDULA (Lat.), n. f. Ka4d'(ka3'u4d)-u2l(u4l)-a3. Dim. of *cauda* (*q. v.*). Fr., *caudule.* Ger., *Schwänzchen.* In thysanurous insects, a setaceous appendage in which the body terminates. [L, 41.]

CAUL, n. Ka4l. Fr., *coiffe.* Ger., *Glückshaube.* It., *cuffia.* 1. A popular term for the amnion, or a portion thereof, covering the child or its head at the time of birth; due to rupture of the membranes failing to take place before the birth, or occurring late in labor and at such a situation that a portion covers the head. To be "born with a caul" (Fr., *naître coiffé*) is deemed by the superstitious a sign of good luck. 2. The omentum.

CAUL (Fr.), n. Kol. An old name for cabbage. [L, 41.]

CAUL (Hind.), n. The *Nelumbium speciosum.* [B, 172.]

CAULACANTHEÆ (Lat.), n. f. pl. Ka4l(ka3-u4l)-a2k(a3k)-a2n-(a3n)'the2-e(a3-e2). Of Kützing, a family of *Algæ* (*Periblasteæ*), having filiform, branching, gelatino-cartilaginous fronds, formed in the centre of a single longitudinal row of cells, from which diverge lateral sets of cells that come together at the periphery to form a cortical layer. [B, 121, 170.]

CAULANTHON [Bentham] (Lat.), n. n. Ka4l(ka3-u2l)-a2n(a3n)'-tho2n. See PITHECOLOBIUM.

CAULEDON (Lat.), n. n. Ka4l(ka3-u4l)-e(a)'do2n. Gr., καυληδόν (from καυλός, a stalk); really an adjective, the full expression being κάταγμα καυληδὸν (Lat.. *fractura caulatim facta*). Fr., *caulédon.* Ger., *Querbruch.* A transverse fracture. [A, 322, 325.]

CAULERPEÆ (Lat.), **CAULERPIDÆ** [Lindley] (Lat.), n's f. pl. Ka4l(ka3-u4l)-u5rp(e2rp)'e2-e(a3-e2), -i2d-e(a3-e2). From *Caulerpa*, one of the genera. Fr., *caulerpées.* Ger., *Caulerpeen.* Of Reichenbach, De Caisne, Endlicher, and others, a family or tribe of *Algæ*, comprising unicellular caulescent genera; now referred to the *Cœloblasteæ.* [B, 49, 75, 121, 170.]

CAULES (Lat.), n. m., pl. of *caulis.* Ka4l'(ka3'u4l)-ez(e2s). Medullary filaments on the inner side of the optic thalamus. [L, 7.]

CAULESCENT, adj. Ka4l-e2s'e2nt. Lat., *caulescens.* Fr., *c.* Ger., *stengeltreibend, stengelig.* 1. Provided with a stalk, especially (in opposition to acaulescent) a visible aerial stalk. 2. Resembling a plant-stalk (*caulis*). [B, 121, 123.]

CAULESCENTIA [Latreille] (Lat.), n. n. pl. Ka4l(ka3-u4l)-e2s-se2n(ke2n)'shi2(ti2)-a3. A family of the *Echinodermata.* [L, 180.]

CAULET (Fr.), n. Kol-a. A variety of cabbage. [B, 38, 121.]

CAULIAS (Lat.), n. m. Ka4l'(ka3'u4l)-i2-a2s(a3s). Gr., καυλίας. An ancient name for the juice of the stem (καυλός) of a certain plant; according to Pliny, the *Laserpitium.* [A, 318, 325.]

CAULICINALIS (Lat.), adj. Ka4l(ka3-u4l)-i2s(i2k)-i2n-a(a3)'-li2s. Fr., *caulicinal.* Growing upon stems and branches; a botanical species name. [B, 38.] Cf. CAULINE.

CAULICLE, n. Ka4l'i2-kl. Lat., *cauliculus* (dim. of *caulis*, a stalk). Fr., *caulicule, tigelle.* Ger., *Stengelchen.* A little stalk; in the germinating seed, that portion (hypocotyl, hypocotyledonary axis) of the embryonic stalk which is below the cotyledons. The name has also been applied in its Latin form to the stipes of certain fungi and to a small stem generated at the neck of a root. [B, 1, 19, 121, 229.] Cf. CAUDICULUS.

CAULICOLÆ (Lat.), n., f. pl. of adj. *caulicolus* (see CAULICOLOUS). Ka4l(ka3-u4l)-i2k'ol(o2l)-e(a3-e2). *Fungi* that live on the stems of plants. [B, 38, 121.]

CAULICOLOUS, adj. Ka4l-i2k'ol-u3s. Lat., *caulicolus* (from *caulis*, a stem, and *colere*, to inhabit). Fr., *caulicole.* Living upon the stems of plants. [B, 38, 121.]

CAULICULA (Lat.), n. f. Ka4l(ka3-u4l)-i2k-u2l(u4l)-a3. An erroneous form of *cauliculus.* [B, 1.] See CAULICLE.

CAULICULATA (Lat.), n. n. pl. Ka4l(ka3-u4l)-i2k-u2l(u4l)-a-(a3)'ta3. An order of the *Hexacorolla.* [L, 173.]

CAULICULE, n. Ka4l'i2k-u2l. Fr., *c.* See CAULICLE.

CAULICULUS (Lat.), n. m. Ka4l(ka3-u4l)-i2k'u2l(u4l)-u3s(u4s). Dim. of *caulis.* See CAULICLE.

CAULIFLORUS (Lat.), adj. Ka4l(ka3-u4l)-i2-flor'u3s(u4s). From *caulis*, a stem, and *flos*, a flower. Fr., *cauliflore.* Ger., *stammbluthig.* Having flowers on the axis; a botanical species name. [B, 121.] See POLYPHEMA *cauliflorum.*

CAULIFLOWER, n. Ka4l'i2-flu5-u4-u5r. Fr., *chou-fleur.* Ger., *Blumenkohl, Karfiol.* It., *cavol fiore.* Sp., *coliflor.* A variety of cabbage (the *Brassica oleracea botrytis*), the agglomerated flowers of which form a round fleshy mass which is edible. [B, 19, 75.] Cf. *C.* EXCRESCENCE.

CAULIFORM, adj. Ka4l'i2-fo2rm. Lat., *cauliformis* (from *caulis*, a stem, and *forma*, form). Fr., *cauliforme.* Ger., *stengelförmig.* Stem-shaped; resembling a plant-stem. [B, 121, 123.]

CAULIGENOUS, adj. Ka4l-i2j'e2n-u3s. Lat., *cauligenus* (from *caulis*, a stem, and *genus*, origin, birth). Springing from a plant-stem. [B, 19.]

CAULIN, n. Ka4l'i2n. A blue coloring matter prepared from red cabbage, used for coloring wine. [B, 270.]

CAULINARY, CAULINE, adj's. Ka4l'i2n-a-ri2, -i2n. Lat., *caulinus, caulinaris.* Fr., *caulinaire.* Ger., *stengelständig.* It., *caulino.* Of or pertaining to the stem; especially disposed upon or contained in the stem (*e. g.*, c. leaves, c. bundles). [B, 1, 19, 123.]

CAULINICOLUS (Lat.), adj. Ka4l(ka3-u4l)-i2n-i2k'ol(o8l)-u3s-(u4s). Fr., *caulinicole.* See CAULICOLUS.

CAULINUS (Lat.), adj. Ka4l(ka3-u4l)-in(en)'u3s(u4s). See CAULINE.

CAULIPARE (Fr.), adj. Kol-e-pa3r. From *caulis*, a bud, and *parere*, to bring forth. Transformed so as to produce an expansion like an ordinary bud instead of an embryo. [B, 38.]

CAULIRRHIZUS (Lat.), adj. Ka4l(ka3-u4l)-i2r-riz(rez)'u3s(u3s). From *caulis*, a stem, and ῥίζα, a root. Fr., *caulirrhize.* Producing roots from the stem. [B, 38.]

CAULIS (Lat.), n. m. Ka4l'(ka3'u4l)-i2s. Gr., καυλός. Fr., *tige.* Ger., *Stengel.* It., *caule.* A stalk or stem; especially the aerial leafy stem of an herbaceous plant; anciently, the penis, also the neck of the uterus; in cerebral anatomy, the crus cerebri. [A, 325; B. 1, 123; I, 30; K.]—**C. deliquescens.** A stem which divides irregularly into branches at some distance above the ground. [B, 19.]—**C. excurrens.** See *Excurrent* AXIS.—**C. fasciatus.** Fr., *tige en bandelette.* A stem made up by the union of two or more branches. [B, 121.]—**C. procumbens.** See *Procumbent* AXIS.

CAULO-ACROBLASTÆ (Lat.), n. f. pl. Ka4l''(ka3''u4l)-o(o2)-a2k(a3k)-ro(ro2)-bla2st(bla3st)'e(a3-e2). Of Reichenbach, an order of the *Acroblastæ*, comprising the formations (*formationes*) *Glumaceæ* and *Ensatæ.* [B, 170.]

CAULOBRYON [Klotzsch] (Lat.), n. n. Ka4l(ka3-u4l)-o2b'ri2-(ru6)-o2n. See PIPER.

CAULOBULBE (Fr.), n. Kol-o-bu6lb. A bulb of the nature of or representing a stem. [B, 121.]

CAULOCARPOUS, adj. Ka4l-o-ka3rp'u3s. Lat., *caulocarpeus, caulocarpus* (from καυλός, a stem, and καρπός, a fruit). Fr., *caulocarpe, caulocarpien.* Having a stalk which persists and bears fruit for several successive years. [De Candolle (B, 1, 19).]

CAULOCOLEOPHYTA [Reichenbach] (Lat.), n. n. pl. Ka4l-(ka3-u4l)-o(o2)-kol(ko2l)-e2-o2f'i2t(u6t)-a3. See CAULO-ACROBLASTÆ.

CAULODES (Lat.), adj. Ka4l(ka3-u4l)-od'ez(as). Gr., καυλώδες (from καυλός, a stem, and εἶδος, resemblance). Resembling a stalk or stem; as a n., of Pliny, the green cabbage. [A, 387; B, 121.]

CAULOGENUM (Lat.), n. n. Ka4l(ka3-u4l)-o2j(o2g)'e2n-u3m-(u4m). A tuber of the nature of or representing a stalk (*e. g.*, that of a potato). [Irmisch (B, 121).]

CAULOME, n. Ka4l-om'. Lat., *cauloma.* A generic term for the stem or leaf-bearing portion of a plant-axis and all its forms and representatives, including the rhizome, the runner, the tuber, the corm, the bulb-axis, the flower-axis, tendrils, and thorns; the term was formerly applied to the stem of a palm (see CAUDEX) and to the cauliform portion of the thallus in *Algæ.* [B, 19.]

CAULOPHYLLE (Fr.), n. Kol-o-fel. See CAULOPHYLLUM.

THE CAULOPHYLLUM PHALICTROIDES. (AFTER J. U. AND C. G. LLOYD.)

CAULOPHYLLEÆ (Lat.), n. f. pl. Ka^{4}l(ka^3-u^{4}l)-o(o^2)-fi^{2}l(fu^{6}l)'-le^2-e(a^3-e^2). Fr., *caulophyllées.* Of Reichenbach, a subdivision of the *Cruciferæ* (1827) or *Berbereæ* (1837), comprising *Leontice, Caulophyllum,* and *Diphylleia.* [B, 170.]

CAULOPHYLLIN, n. Ka^{4}l-o-fi^{2}l'i^{2}n. Fr., *caulophylline.* A resinous precipitate thrown down on pouring a concentrated tincture of caulophyllum into water. [B, 5.]

CAULOPHYLLUM (Lat.), n. n. Ka^{4}l(ka^3-u^{4}l)-o(o^2)-fi^{2}l(fu^{6}l)'-lu^{3}m(lu^{4}m). From καυλός, a stem, and φύλλον, a leaf. Fr., *caulophylle.* 1. Of Michaux, a genus of North American berberidaceous plants of the tribe *Berbereæ,* by Baillon referred to *Leontice.* 2. Of the U. S. Ph., the rhizome and rootlets of *C. thalictroides.* [B, 5, 42, 121.]—**C. thalictroides** [Michaux]. Ger., *Stengelblatt, Frauenwurz.* Syn.: *Leontice thalictroides* [Linnæus]. Blue cohosh, blueberry-root, pappoose-root, squaw-root. The only species; a perennial herb growing in damp woods throughout the United States, and in Japan and the region of the Amoor. The rhizome with its matted rootlets contains saponin or a similar principle and two resins. It has been considered to be emmenagogue, ecbolic, and diaphoretic. The roasted seeds are said to be employed as a substitute for coffee. [B, 5, 93, 245.]

CAULOPLECTUS (Lat.), adj. Ka^{4}l(ka^3-u^{4}l)-o(o^2)-ple^{2}k(plak)'-tu^{3}s(tu^{4}s). From καυλός, the penis, and πληκτός, stricken. Affected with cauloplegia. [A, 322.]

CAULOPLEGIA (Lat.), n. f. Ka^{4}l(ka^3-u^{4}l)-o(o^2)-plej(plag)'i^2-a^3. From καυλός, the penis, and πληγή, a stroke. Paralysis of the penis. [A, 322.]

CAULOPTERIDEÆ (Lat.), n. f. pl. Ka^{4}l(ka^3-u^{4}l)-o^{2}p-te^{2}r-i^{2}d'-e^2-e(a^3-e^2). Fr., *cauloptéridées.* Of Brongniart, a division of fossil ferns with arborescent or herbaceous stems and with or without petioles and adventitious roots. [B, 121, 170.]

CAULOPTERIDES (Lat.), n. f. pl. Ka^{4}l(ka^3-u^{4}l)-o^{2}p-te^{2}r'i^{2}d-ez(e^{2}s). Of Endlicher, an order of ferns corresponding nearly to the *Caulopterideæ,* distinguished by the scalariform vessels of the trunk, which are arranged in a single row about a medullary substance and send prolongations into the leaves and roots. [B, 121, 170.]

CAULORAPUM [Cam.] (Lat.), n. n. Ka^{4}l(ka^3-u^{4}l)-o^{2}r'a^{2}p(a^{3}p)-u^{3}m(u^{4}m). The *Brassica oleracea.* [B, 211.]

CAULORRHAGIA (Lat.), n. f. Ka^{4}l(ka^3-u^{4}l)-o^{2}r-raj(ra^{3}g)'i^2-a^3. From καυλός, the penis, and ῥήγνυσθαι, to burst forth. Hæmorrhage from the penis. [F.]—**C. ejaculatoria.** See SPERMATOCYSTIDORRHAGIA.

CAULORRHIZE (Fr.), adj. Kol-o^{2}r-ez. See CAULIRRHIZUS.

CAULORRHŒA (Lat.), n. f. Ka^{4}l(ka^3-u^{4}l)-o^{2}r-re'(ro^2'e^2)-a^3. From καυλός, the penis, and ῥεῖν, to flow. Fr., *caulorrhée.* Ger., *Schleimfluss der männlichen Harnröhre.* Urethral blennorrhœa in the male. [A, 322.]

CAULOS (Lat.), n. n. Ka^{4}l'(ka^3'u^{4}l)-o^{2}s. Gr., καυλός. See CAULIS.

CAULOSARQUE (Fr.), n. Kol-o-sa^{3}rk. From καυλός, a stem, and σάρξ, flesh. See CAULOBULBE.

CAULOSPORA (Lat.), **CAULOSPORÆ** (Lat.), n's n. and f. pl. Ka^{4}l(ka^3-u^{2}l)-o^{2}s'por(po^{2}r)-a^3, -e(a^3-e^2). From καυλός, a stem, and σπορά, a seed. Of K. H. Schultz, homorganic plants bearing seeds on the stem. [A, 322.]

CAULUS (Lat.), n. n. Ka^{4}l'(ka^3'u^{4}l)-u^{3}s(u^{4}s). See CAULIS.

CAUMA (Lat.), n. n. Ka^{4}m'(ka^3'u^{4}m)-a^3. Gen., *caum'atos (-is).* Gr., καῦμα. Heat, a burning, especially a burning fever; of Young, inflammation and inflammatory fever, a genus of the order *Pyrexiæ,* class *Parhæmasiæ.* [L, 290.]—**C. bronchitis** [Young]. See CROUP.—**C. carditis.** See CARDITIS.—**C. catarrhale.** See CORYZA.—**C. cystitis.** See CYSTITIS.—**C. enteritis.** See ENTERITIS.—**C. erythematicum.** See ERYTHEMA.—**C. gastritis.** See GASTRITIS.—**C. hæmorrhagicum.** An active hæmorrhage. [L, 290.]—**C. hepatitis.** Acute hepatitis. [L, 290.]—**C. hysteritis.** Metritis. [L, 290.]—**C. nephritis.** Idiopathic nephritis. [L, 290.]—**C. odontalgicum.** See ODONTALGIA.—**C. ophthalmitis.** See OPHTHALMIA.—**C. otitis.** See OTITIS.—**C. paristhmitis** [Young]. See PARISTHMITIS and CYNANCHE.—**C. parotitis.** See CYNANCHE *parotidæa.*—**C. peripneumonia.** See PNEUMONIA *peripneumonia.*—**C. peritonæitis, C. peritonitis.** See PERITONITIS.—**C. phlegmone.** See PHLEGMON.—**C. phrenitis** [Young]. See PHRENITIS.—**C. pleuritis.** See PLEURISY.—**C. podagricum.** See GOUT.—**C. rheumatismus.** Acute rheumatism. [L, 290.]—**C. rubeola.** See RUBEOLA.—**C. splenitis.** See SPLENITIS.

CAUMATIC, adj. Ka^{4}m-a^{2}t'i^{2}k. Relating to cauma (*q. v.*). [a, 17.]

CAUMATODES (Lat.), adj. Ka^{4}m(ka^3-u^{4}m)-a^{2}t(a^{3}t)-od'ez(as). Gr., καυματώδης (from καῦμα [see CAUMA], and εἶδος, resemblance). Hot, burning, feverish. [A, 322.]

CAUMON, CAUMOUN, n's. A palm-tree of Cayenne, perhaps the *Areca oleracea;* the buds and fruit are eaten and the oil expressed from the fruit is used like olive-oil. [B, 38, 88.]

CAUNEI (Lat.), n. m. pl. Ka^{4}n'(ka^3'u^{4}n)-e^2-i(e). Figs obtained from Caune, a city of Ætolia; employed topically by Celsus. [B, 45.]

CAUNGA, n. Of Rheede, the *Areca catechu.* [B, 121.]

CAUPPETRAPE (Fr.), n. Kop-tra^{3}p. The *Centaurea calcitrapa.* [B, 121.]

CAUQUOTREPO, n. In Provence, the *Centaurea calcitrapa.* [B, 121.]

CAURE (Fr.), n. Kor. The *Corylus avellana.* [B, 121.]

CAURETTE (Fr.), n. Kor-e^{2}t. The hazel-nut; the fruit of *Corylus avellana.* [B, 38.]

CAURIER (Fr.), n. Ko-ri^2-a. See CAURE.

CAU-RUNG, n. In Cochin-China, the *Areca.* [B, 121.]

CAUSA (Lat.), n. f. Ka^{4}z'(ka^3'u^{4}s)-a^3. See CAUSE.—**C. abdita.** See *Hidden* CAUSE.—**C. antecedens.** An ultimate cause. [A, 325.]—**C. continens.** Fr., *cause continente.* A cause that continues to act after its effect has begun. [A, 325.]—**C. conjuncta.** An immediate cause. [L, 104.]—**C. disponens.** A predisposing cause. [L, 116.]—**C. excitans.** An exciting cause. [L, 116.]—**C. procatarctica.** See *Procatarctic* CAUSE.—**C. proegumena.** A remote cause. [A, 325.]—**C. proxima.** A proximate cause. [A, 325.]

CAUSAL, adj. Ka^{4}z'a^{2}l. Lat., *causalis.* Fr., *c.* Ger., *c., ursächlich.* Pertaining to or founded on the cause of a disease. See *C.* INDICATION.

CAUSALGIA (Lat.), n. f. Ka^{4}s(ka^3-u^{4}s)-a^{2}l(a^{3}l)'ji^2(gi^2)-a^3. From καῦσος, burning heat, and ἄλγος, pain. Fr., *causalgie.* Ger., *Causalgie.* Neuralgia with a sense of severe burning pain; particularly a painful affection, often affecting the foot, chiefly characterized by a burning pain with pain and tenderness at various neighboring points, sometimes accompanied by twitching or spasmodic action of some sort about the affected part—generally observed in women; also a condition giving rise to similar pain, accompanied with a glossy state of the skin, in the area of distribution of a nerve that has been injured. [A, 326; C. T. Poore, "Med. Record," July 22, 1882, p. 106.]

CAUSALIS (Lat.), adj. and n. f. Ka^{4}z(ka^3-u^{4}s)-a(a^3)'li^{2}s. 1. Adj., see CAUSAL. 2. N. (gen., *causal'idos* [*-is*]), a bleb or blister resulting from a burn. [A, 322.]

CAUSALITY, n. Ka^{4}z-a^{2}l'i^{2}t-i^2. Fr., *causalité.* Ger., *Kausalität.* It., *causalità.* Sp., *causalidad.* The faculty of perceiving the relations between causes and effects. [Spurzheim, Broussais (A, 301).]

CAUSATIO (Lat.), n. f. Ka^{4}z(ka^3-u^{4}s)-a(a^3)'shi^2(ti^2)-o. Gen., *causatio'nis.* 1. See CAUSATION. 2. Disease, sickness. [A, 318.]

CAUSATION, n. Ka^{4}z-a'shu^{3}n. Lat., *causatio.* The process by which a cause produces an effect. [A, 302.] Cf. ÆTIOLOGY.

CAUSE, n. Ka^{4}z. Gr., αἰτία, αἴτιον. Lat., *causa.* Fr., *c.* Ger., *Ursache.* It., Sp., *causa.* Any act or state of things that produces a certain effect. [A, 385.]—**Accessory c.** Fr., *c. accessoire.* A c. that contributes to the production of an effect mainly due to another c. [A, 316.]—**Accidental c.** Fr., *c. accidentelle.* See *Occasional c.*—**Antecedent c.** Lat., *causa antecedens.* Fr., *c. antécédente.* A remote or predisposing c. [A, 385.]—**C. animée.** See *Vital c.*—**C. cachée** (Fr.). See *Hidden c.*—**C. continente** (Fr.). See CAUSA *continens.*—**C. éloignée** (Fr.). See *Remote c.*—**C. excitante** (Fr.). See *Proximate c.*—**C. formelle** (Fr.). See *Specific c.*—**C. intime** (Fr.). See *Internal c.*—**C. occulte** (Fr.). See *Hidden c.*—**C. prochaine** (Fr.). See *Proximate c.*—**Common c.** 1. A c. that most usually gives rise to the result under consideration. 2. A c. that produces two or more effects, any one of which may erroneously be attributed to one of the others.—**Determining c.** [Chomel]. Fr., *c. déterminante.* A c. that gives efficiency to other c's, precipitating their action.—**Efficient c.** A c. that gives rise to the effect alone, independently of the action of other c's.—**Endopathic c.** See *Internal c.*—**Essential c.** See *Efficient c.*—**Exciting c.** Fr., *c. excitante.* See *Proximate c.*—**Exopathic c., External c.** Fr., *c. externe.* A c. that operates from without the organism. [L, 41.]—**Hidden c.** Lat., *causa abdita.* Fr., *c. cachée.* A c. that is inappreciable. [L, 41.]—**Immediate c.** See *Proximate c.*—**Internal c.** Fr., *c. intime.* A c. that exists within the organism, as in self-infection. [L, 41.]—**Mechanical c.** A c. that operates mechanically.—**Negative c.** Fr., *c. négative.* A c. consisting in the absence of some condition necessary to the prevention of the effect. [L, 41.]—**Occasional c.** Fr., *c. occasionelle.* See *Determining c.*—**Occult c.** See *Hidden c.*—**Physical c.** Fr., *c. physique.* A c. acting in conformity to physical laws. [L, 41.]—**Physiological c.** Fr., *c. physiologique.* A c. that acts only with the co-operation of some physiological act or process. [L, 41.]—**Positive c.** Fr., *c. positive.* See *Efficient c.*—**Predisponent c., Predisposing c., Procatarctic c.** Lat., *causa procatarctica* (seu *disponens*). Fr., *c. prédisposante.* Ger., *prädisponirendes Moment.* A c. that acts upon the organism in such a manner as to make it more readily susceptible to the action of an exciting c.—**Primary c., Proximate c.** Lat., *causa proxima.* Fr., *c. prochaine.* Ger., *nächste Ursache.* That one of two or more c's that comes into play last and produces its effect with comparative rapidity.—**Remote c., Secondary c.** See *Ultimate c.*—**Specific c.** Fr., *c. spécifique, c. formelle.* A c. of a specific nature (*e. g.,* a pathogenetic micro-organism).—**Ultimate c.** Fr., *c. éloignée.* A c. that eventually proves operative with the co-operation of a proximate c.—**Vital c.** Fr., *c. animée.* A specific pathogenic organism. [A, 385.] Cf. CONTAGIUM *vivum.*

CAUSEA [Scopoli] (Lat.), n. f. Ka^{4}s'(ka^3'u^{4}s)-e^2-a^3. Fr., *causée.* See HIRTELLA.

CAUSIALGIE (Fr.), n. Kos-i^2-a^{3}l-zhe. See CAUSALGIA.

CAUSIDÆ (Lat.), n. f. pl. Ka^{4}s'(ka^3'u^{4}s)-i^{2}d-e(a^3-e^2). A family of the *Ophidii colubriformes venenosi.* [L, 121.]

CAUSIS (Lat.), n. f. Ka^{4}s'(ka^3'u^{4}s)-i^{2}s. Gen., *caus'eos (-is).* Gr., καῦσις. Combustion, cauterization; also a burn. [A, 322, 387.]

CAUSODES (Lat.), adj. Ka^{4}s(ka^3-u^{4}s)-od'ez(as). Gr., καυσώδης (from καῦσις, combustion, and εἶδος, resemblance). Burning-hot, glowing, ardent; as a n., see CAUSUS. [A, 322, 325.]

CAUSOMA (Lat.), n. n. Ka^{4}s(ka^3-u^{4}s)-om'a^3. Gen., *causom'atos (-is).* Gr., καύσωμα. See CAUMA and CAUSUS.

CAUSOS (Lat.), n. m. Ka^{4}s'(ka^3'u^{4}s)-o^{2}s. See CAUSUS.

CAUSSIDE, CAUSSIDUS, n's. See CAOUSSIDA.

CAUSTIC, adj. and n. Ka^{4}st'i^{2}k. Gr., καυστικός (adj.), καυστικόν (n.), καυτήριον (n.). Lat., *causticus* (adj.), *causticum* (n.). Fr., *caustique.* Ger., *kaustisch* (adj.), *ätzend* (adj.), *Aetzmittel* (n.).

It., *caustico*. Sp., *cáustico*. 1. Destroying tissue as if by burning (said especially of substances which produce disintegration of tissue by chemical action); as a n., a substance so acting. 2. In optics, a curve produced by joining the intersections of the rays refracted through a lens or other transparent medium (*c. by refraction*) or reflected from a mirror (*c. by reflection*). [B.]—**Ammoniacal c.** See POMMADE *de Gondret*.—**Black c.** See CAUSTICUM *sulfurico-crocatum*.—**Canquoin's c.** See *Canquoin's* PASTE.—**C. arrows.** See FLÈCHES *caustiques*.—**C. by reflection, C. by refraction.** See C. (2d def.).—**Common c.** Potassa or a c. preparation containing it.—**Dubois's c.** See POUDRE *escharotique arsenicale*.—**Escharotic c.** Fr., *caustique escharotique, escharotique* [Fr. Cod.]. A c. that produces a slough. [B, 113.]—**Filhos's c.** See POTASSA *cum calce*.—**Frère Côme's c.** See *Arsenical* PASTE.—**Golden c.** Fr., *caustique doré*. See *Récamier's c.*—**Gondret's c.** See POMMADE *de Gondret*.—**Iodine c.** See *Causticum* IODI.—**Landolfi's c.** A preparation used as an application to cancers; it contains the chlorides of bromine, zinc, gold, and antimony. [α, 13; L, 49.]—**Lugol's c.** See *Causticum* IODI.—**Lunar c.** Lat., *causticum lunare*. Fr., *caustique lunaire*. Ger., *Höllenstein*. It., *caustico lunare*. Sp., *cáustico lunar*. Fused nitrate of silver; so called because the symbol of *luna* (the moon) was given by the alchemists to silver. [α, 21.]—**Mercurial c.** 1. A preparation made by mixing 1 part of mercury and 2 parts of commercial nitric acid. 2. The same, nitric acid of a sp. gr. of 1·5 being used. 3. The same as No. 1, but evaporated to ⅔ of its weight. 4. A preparation made by mixing 1 oz. of mercury, ⅔ oz. of nitric acid, and ⅓ drachm of arsenious acid. [L, 120 (α, 21).]—**Milder common c.** Lat., *causticum commune mitius*. See POTASSA *cum calce*. [B.]—**Mitigated c.** See ARGENTI *nitras dilutus*.—**Récamier's c.** A solution of 1 part of chloride of gold in 100 parts of nitrohydrochloric acid. [B, 46 (α, 21).]—**Rousselot's c.** See POUDRE *escharotique arsenicale*.—**Stronger common c.** Lat., *causticum commune acerrimum*. See *C.* POTASSA.—**Sulphuric c.** See CAUSTICUM *sulfurico-crocatum*.—**Vienna c.** Lat., *causticum vindobonnense* (seu *viennense*). Fr., *caustique de Vienne*. Ger., *wiener Aetzpulver*. See POTASSA *cum calce*.

CAUSTIC-HOLDER, n. Ka^{4}st'i^{2}k-hold-u^{6}r. Fr., *porte-pierre, porte-caustique*. Ger., *Aetzmittelträger*. An instrument for holding a piece of caustic. [E.] Cf. PORTE-CAUSTIQUE and CAUSTICOPHORUM.—**Politzer's pharyngeal c.-h.** An instrument consisting of a quadrilateral piece of silver, 1½ ctm. long and 4 mm. in diameter, furnished with a handle 20 ctm. long. The four sides, as well as the free end of the prism, are roughened like a file, in order to give the nitrate of silver, which is melted upon it, a firmer hold. The nitrate of silver is melted upon the side of the instrument corresponding to the side of the pharynx which it is intended to cauterize. It is introduced behind the soft palate into the superior pharynx. [F, 3.]

CAUSTICITY, n. Ka^{4}st-i^{2}s'i^{2}t-i^2. Lat., *causticitas*. Fr., *causticité*. Ger., *Aetzbarkeit, Aetzkraft*. The quality of being caustic. [L, 49.]

CAUSTICOPHORUM (Lat.), n. n. Ka^{4}st(ka^3-u^{4}st)-i^{2}k-o^{2}f'o(o^2)-ru^{3}m(ru^{4}m). From καυστικόν, a caustic, and φορεῖν, to carry. Fr., *causticophore*. Ger., *Kausticophor, Aetzmittelträger*. An instrument specially adapted for conveying a caustic to a particular locality in the urethra, the cervix uteri, etc. [Segalas, Tanchon (A, 322).]

CAUSTICUM (Lat.), n. n. Ka^{4}st'(ka^3'u^{4}st)-i^{2}k-u^{3}m(u^{4}m). See CAUSTIC.—**C. æthiopicum.** See *C. sulfurico-crocatum*.—**C. alcalinum.** See POTASSA *fusa*.—**C. ammoniacale Gondret.** See POMMADE *de Gondret*.—**C. antimoniale.** Antimony trichloride. [B.]—**C. arsenicale.** Fr., *poudre arsénicale de Justamonde*. Syn.: *arsenicum antimoniatum*. A mixture of white arsenic with arsenic trisulphide, with or without the addition of opium. [B, 119.]—**C. chirurgicum, C. chirurgorum.** See POTASSA *fusa*.—**C. commune acerrimum, C. commune fortius.** See POTASSA *fusa*.—**C. commune mitius.** See POTASSA *cum calce*.—**C. cum chlorureto zincico** [Fr. Cod.]. See *Caustique au chlorure de* ZINC.—**C. cum kali hydrico cum calce, C. cum potassa et calce, C. Filhos** [Belg. Ph.]. See POTASSA *cum calce*.—**C. lunare.** See *Lunar* CAUSTIC.—**C. nigrum.** See *C. sulfurico-crocatum*.—**C. nitricum.** See *Solidified* NITRIC *acid*.—**C. odontalgicum.** Fr., *caustique odontalgique*. A preparation made of 400 parts of nitric acid and 5 of morphine acetate; applied to painful dental cavities. [B, 92 (α, 21).]—**C. potentiale.** Caustic potassa. [B, 88.]—**C. salinum, C. salitum.** See POTASSA *fusa*.—**C. sulfurico-carboneum** [Ricord], **C. sulfurico-carbonicum, C. sulfurico-crocatum.** Fr., *caustique sulfo-safrané* [Velpeau]. Black caustic; made by mixing concentrated sulphuric acid with either powdered charcoal or saffron until the mixture acquires the consistence of a paste. Instead of the last ingredient, powdered licorice or charpie may be employed. [B, 108 (α, 21).]—**C. vegetabile.** See *Liquor* POTASSÆ.—**C. viennense, C. viennense fusum, C. viennense fusum Filhos, C. vindobonnense.** See POTASSA *cum calce*.

CAUSTICUS (Lat.), adj. Ka^{4}st'(ka^3'u^{4}st)-i^{2}k-u^{3}s(u^{4}s). See CAUSTIC.

CAUSTIQUE (Fr.), adj. and n. Kost-ek. See CAUSTIC.—**C. acide.** A caustic containing an acid substance (*e. g.*, eau de Rabel [*mixtura sulfurico-acida*] and chromic acid). [B, 93 (α, 21).]—**C. à la gutta percha.** A preparation made by melting gutta percha, adding half its weight of potassa caustica, molding into pastilles, and, before use, dipping into alcohol for a few seconds. [B, 46 (α, 21).]—**C. alcalin.** A caustic consisting of or containing an alkali (*e. g.*, caustic potassa). Bonnet, classifying caustics according to their chemical characteristics, considers c's alcalins to be forms of c's coagulants. [B, 46 (α, 21).]—**C. ammoniacal.** See POMMADE *de Gondret*. [L, 85.]—**C. anticancéreuse de Plunkett.** A paste made of 4 parts of arsenious acid, 30 each of sulphur, *Ranunculus acris*, and asafœtida, mixed together with white of egg. [B, 46 (α, 21).]—**C. arsenical.** See POUDRE *escharotique arsenicale*.—**C. coagulant.** A caustic acting by producing coagulation of albumin. Mialhe divides caustics into c's liquéfiants and c's coagulants. [B, 46 (α, 21).]—**C. de Filhos** [Fr. Cod.]. See POTASSA *cum calce*.—**C. de Rivallier, C. de Velpeau.** A paste containing concentrated nitric acid or, more frequently, sulphuric acid. [B, 108 (α, 21).]—**C. de Vienne** [Fr. Cod.]. See POTASSA *cum calce*.—**C. doré.** See *Récamier's* CAUSTIC.—**C. Filhos.** See POTASSA *cum calce*.—**C. liquéfiant.** A caustic which acts by liquefying tissue. [B, 46 (α, 21).] See under *C. coagulant*.—**C. lunaire.** Silver nitrate. [B, 93.]—**C. métallique.** A caustic containing a metal or metallic salt (*e. g.*, butter of antimony, nitrate of silver, nitrate of mercury, etc.). [B, 93 (α, 21).]—**C. odontalgique.** See CAUSTICUM *odontalgicum*.—**C. par réflexion, C. par réfraction.** See CAUSTIC (2d def.).—**C. perpétuel.** Fused silver nitrate. [B, 88.]—**C. sulfo-carbonique de Ricord, C. sulfo-safrané, C. sulfo-safrané de Velpeau.** See CAUSTICUM *sulfurico-crocatum*.—**Porte-c.** See CAUSTIC-HOLDER.

CAUSTISCH (Ger.), adj. Ka^3'u^{4}s-ti^{2}sh. See CAUSTIC.

CAUSTOCYCLUS (Lat.), n. m. Ka^{4}st(ka^3-u^{4}st)-o(o^2)-sik(ku^{6}k)'-lu^{3}s(lu^{4}s). From καυστικόν, a caustic, and κύκλος, a ring. Fr., *caustocycle, cautère circulaire*. Ger., *Aetzring*. Syn.: *annulus causticus*. Of Sanson, a caustic ring, one in which nitrate of mercury was fixed, for cauterizing the cornea. [A, 322.]

CAUSTODERMITIS (Lat.), n. f. Ka^{4}st(ka^3-u^{4}st)-o(o^2)-du^{6}rm-(de^{2}rm)-i(e)'ti^{2}s. Gen., *caustodermit'idis*. More properly written *caustodermatitis*. Fr., *caustodermite*. Ger., *Hautentzündung durch Verbrennen*. Inflammation of the skin from a burn. [A, 322.]

CAUSTOGYRUS (Lat.), n. m. Ka^{4}st(ka^3-u^{4}st)-o(o^2)-jir(gu^{6}r)'-u^{3}s(u^{4}s). From καυστικόν, a caustic, and γῦρος, a ring. See CAUSTOCYCLUS.

CAUSUS (Lat.), n. m. Ka^{4}s'(ka^3'u^{4}s)-u^{3}s(u^{4}s). Gr., καῦσος. Fr., *fièvre ardente* (ou *chaude*). Ger., *Brennfieber*. It., *febbre ardente*. Sp., *causon, fiebre ardiente*. Of Hippocrates, a burning fever; one attended with excessive heat, intolerable thirst, and other very violent symptoms; the remittent fever with gastric symptoms observed in hot countries. Of Moseley, yellow fever. [A, 301; B, 117; D. 46, 74; L.]—**C. endemica.** Yellow fever. [L, 119.]—**Exquisite c.** An excessively severe burning fever. [Boerhaave (B, 117).]

CAUTER (Lat.), n. m. Ka^{4}t'(ka^3'u^{4}t)-u^{6}r(ar). Gen., *cauter'is*. Gr., καυτήρ. Fr., *cautère*. Ger., *Brenneisen* (1st def.). 1. Lit., a branding iron, a cautery-iron. 2. Any caustic application. [A, 322.]—**C. trisulcus.** A three-pronged cautery-iron, said to have been used by Marcellus for cauterizing the substance of the spleen.

CAUTERANT, adj. and n. Ka^{4}t'e^{2}r-a^{2}nt. See CAUSTIC.

CAUTÈRE (Fr.), n. Kot-e^{2}r. See CAUSTIC, CAUTERY, and ISSUE.—**C. actuel.** See *Actual* CAUTERY.—**C. à gaz.** See *Gas* CAUTERY.—**C. annulaire, C. circulaire.** Syn.: *couronne de feu*. 1. A thick disc-shaped cautery-iron, hollowed out in the centre. [A, 301.] 2. See CAUSTOCYCLUS.—**C. conique.** Syn.: *pointe de feu*. A conical cautery-iron. [A, 385.]—**C. cultellaire.** Syn.: *couteau de feu*. A knife-shaped cautery-iron. [A, 301.]—**C. de Rust.** A cautery-iron of a prismatic shape. [L, 87.]—**C. électrique.** See *Galvano*-CAUTERY.—**C. en champignon.** A mushroom-shaped cautery-iron. [L, 87.]—**C. en hache.** A hatchet-shaped cautery-iron. [L. 87.]—**C. en rondache.** See *C. cultellaire*.—**C. en roseau.** A reed-shaped cautery-iron. [E, 7.]—**C. galvanique.** See *Galvano*-CAUTERY.—**C. olivaire.** An olive-pointed cautery-iron. [E.]—**C. permanent.** An issue. [L, 41.]—**C. simple.** See *Actual* CAUTERY. [L, 49.]—**Thermo-c.** See *Paquelin's* CAUTERY.

CAUTERETIC, adj. Ka^{4}t-e^{2}r-e^{2}t'i^{2}k. Lat., *cautereticus*. Fr., *cautérétique*. See CAUSTIC.

CAUTERETS (Fr.), n. Kot-er-a. A place in the department of the Hautes-Pyrénées, France, where there are numerous mineral springs, among which are the "César," "Espagnol," "Raillière," "Petit-Sauveur," "Les Œufs," and "Manhourat." They contain sulphur, sodium, sulphates, alkaline carbonates, chlorides, iron, and free nitrogen. They are thermal, some of them hyperthermal (45° or 48° C.); used in drinking, bathing, half-baths etc., for diseases of the respiratory organs and the stomach, and for chronic rheumatism. [A. Reumont (A, 319; L, 49).]

CAUTERIASMUS (Lat.), n. m. Ka^{4}t(ka^3-u^{4}t)-e(a)-ri^2-a^{2}z(a^{3}s)'-mu^{3}s(mu^{4}s). From καυτηριάζειν, to cauterize. See CAUTERIZATION.

CAUTÉRISANT (Fr.), adj. Ko-ta-rez-a^{3}n^2. See CAUSTIC.

CAUTERISATIO (Lat.), n. f. Ka^{4}t(ka^3-u^{4}t)-e^{2}r(ar)-i^{2}z(i^{2}s)-a-(a^3)'shi^2(ti^2)-o. Gen., *cauterisatio'nis*. See CAUTERIZATION.—**C. in distans.** Fr., *cautérisation objective*. Cauterization with the cautery held at some distance from the surface, so as to graduate the degree of burning. [Wolzendorff (A, 319).]—**C. per contactum.** Cauterization by actual contact with the cautery. [Wolzendorff (A, 319).]—**C. provocatoria** [Tarnowsky]. A cauterization designed to provoke, in case the subject is syphilitic, a local syphilitic infiltration; proposed by Tarnowsky as a means of diagnosis. According to him, when the skin of a person affected with syphilis, whether latent or manifest, is cauterized so as to produce ulceration, the periphery and base of the ulcer after a certain interval become infiltrated with a syphilitic deposit, and a characteristic copper-colored border is formed. ["Vierteljahresschr. f. Derm. u. Syph.," 1877, p. 19 (G).]

CAUTÉRISATION (Fr.), n. Ko-ta-rez-a^3-se-o^{2}n^2. See CAUTERIZATION.—**C. actuelle.** See *Actual* CAUTERY.—**C. à la flamme.** Cauterization by allowing a flame to strike the skin. [L, 41.]—**C. centrale.** The simple insertion of a *flèche caustique* into the centre of a superficial tumor. [Wolzendorff (A, 319).]—**C. chinoise.** See *Slow* CAUTERIZATION.—**C. circulaire.** See *C. en flèches*.—**C. destructive.** Cauterization to the extent of actual destruction of tissue, as opposed to mere rubefaction or vesication. [L, 49, 87.]—

C. douleureuse. See *C. vésicante.*—**C. électrique, C. électro-chimique.** See *Galvano*-CAUTERY.—**C. en flèche.** Cauterization by means of pointed pieces of a dried caustic paste, especially potassa cum calce, thrust into and around a growth that is to be destroyed. [A, 301.] See FLÈCHES *caustiques.*—**C. en puissance.** See *Potential* CAUTERY.—**C. épidermique.** Very superficial cauterization, affecting only the epidermis. [L, 87.]—**C. hémostatique.** Cauterization for the purpose of checking or preventing hæmorrhage. [L, 41, 87; α, 18].—**C. indirecte.** Cauterization at a point remote from the seat of disease, for purposes of revulsion. [L, 87.]—**C. japonaise, C. lente.** See *Slow* CAUTERIZATION.—**C. linéo-circulaire.** Cauterization with the galvanic-cautery loop. [α, 18.]—**C. modificatrice.** Cauterization of a diseased surface for the purpose of setting up a healthy action. [L, 87; α, 18.]—**C. objective.** See CAUTERISATIO *in distans.*—**C. par des corps en ignition.** Cauterization by burning fluids or solids upon the surface. [L, 41.] Cf. MOXA.—**C. par les rayons solaires.** See *Solar* CAUTERY.—**C. ponctuée.** See *Punctate* CAUTERIZATION.—**C. potentielle.** See *Potential* CAUTERY.—**C. sous-cutanée.** Deep cauterization without affecting the superficial parts, as by deep injections of ammonia or by passing a cautery-iron through a tube. [α, 18.]—**C. tubulaire.** Of Tripier, the operation of making an opening into a cyst by means of an instrument connected with the negative pole of a battery, so that the walls of the tubular opening are charred. See, also, OVARIOSTOMY.—**C. vésicante.** Cauterization to the degree of vesication, as with an iron heated in boiling water. [L, 41.]

CAUTERISM, n. Ka^{4}t'e^{2}r-i^{2}zm. See CAUTERIZATION.

CAUTERIUM (Lat.), n. n. Ka^{4}t(ka^3-u^{4}t)-e(a)'ri^2-u^{3}m(u^{4}m). Gr., καυτήριον, καυτήρ (from καίειν, to burn). Fr., *cautère.* Ger., *Kauter, Aetzmittel, Brennmittel.* It., Sp., *cauterio.* See CAUTERY and CAUSTIC.—**C. actuale.** See *Actual* CAUTERY.—**C. antimoniale.** See *Liquor* ANTIMONII *chloridi.*—**C. potentiale.** See *Potential* CAUTERY.

CAUTERIZATION, n. Ka^{4}t-e^{2}r-i^{2}z-a'shu^{3}n. Gr., καῦσις. Lat., *cauterisatio, adustio.* Fr., *cautérisation.* Ger., *Kauterisiren, Anbrennen, Verbrennung, Aetzung.* It., *cauterizzazione.* Sp., *cauterización.* The act of cauterizing, of destroying living tissue by means of heat or some other caustic. [A, 301.]—**C. by contact.** See CAUTERISATIO *per contactum.*—**C. by points.** See *Punctate c.* —**Distant c.** See CAUTERISATIO *in distans.*—**Inherent c.** Fr., *cautérisation inhérente.* Deep c. with the actual cautery. [E; L, 41.]—**Linear c.** Fr., *cautérisation linéaire.* C. in a line, as with a knife-shaped cautery, the galvanic-cautery wire, or a row of *flèches caustiques.* [α, 18.]—**Neapolitan c.** Fr., *cautérisation napolitaine.* Deep c. through an incision made for the purpose. [E.]—**Objective c.** Fr., *cautérisation objective.* See CAUTERISATIO *in distans.*—**Punctate c.** Fr., *pointes de feu, cautérisation ponctuée.* Ger., *punktförmige Ustion.* It., *cauterizzazione punteggiata.* Multiple deep c. with a pointed cautery. [L, 41.]—**Slow c.** Fr., *cautérisation lente.* C. with the moxa. [E; L, 41.]—**Transcurrent c.** Fr., *cautérisation transcurrente.* Superficial c. by drawing a white-hot iron rapidly over the surface in transverse lines. [D, 53; L, 41.]

CAUTERY, n. Ka^{4}t'e^{2}r-i^2. Gr., καυτήρ, καυτήριον. Lat., *cauter, cauterium.* Fr., *cautère.* Ger., *Kauter.* It., Sp., *cauterio.* Any cauterizing agent, particularly the actual c. (*q. v.*).—**Actual c.** Lat., *cauterium actuale, ferrum candens.* Fr., *cautère actuel.* Ger., *Brenneisen, Glüheisen.* It., *cauterio attuale.* Sp., *cauterio candente.* A heated iron or other apparatus for cauterization by means of actual heat, as opposed to the potential c.—**Button-c.** A c.-iron shaped like a button. [L.]—**Conical c.** Fr., *cautère conique.* A c.-iron in the form of a truncated cone. [A, 385.]—**Electric c., Galvanic c., Galvano-c.** Fr., *galvano-cautère, cautère électrique.* A c. apparatus in which a loop of wire or an instrument fashioned somewhat like a knife, made of platinum (selected on account of its being a comparatively poor conductor of electricity), is interposed in a galvanic circuit and heated by means of a battery arranged for quantity (see under BATTERY). [A, 321.]—**Gas c.** Fr., *cautère à gaz.* An apparatus invented by Nélaton for cauterization with an illuminating-gas flame. An elastic bag for holding the gas communicates by a piece of rubber tubing with a glass tube drawn to a point having a calibre of 0·1 mm. ["Bull. gén. de thérap.," 1863, p. 540 (α, 21).]—**Knife c.** A c. instrument shaped like a knife.—**Nummular c.** Fr., *cautère nummulaire.* A c.-iron in the form of a coin-like disc. [A, 385.]—**Paquelin's c.** The so-called thermo-c.; an apparatus founded on the property possessed by platinum, when heated red-hot, of remaining incandescent as long as the vapor of a hydrocarbon is projected upon it. A hollow piece of platinum, varying in shape according to the purpose in view, is attached to a tube connected with a reservoir of benzin, the vapor of which is pumped into the hollow of the piece of platinum (previously heated in the flame of a spirit-lamp) by means of a hand-bulb. [A, 321.]—**Potential c.** Lat., *cauterium potentiale.* Fr., *cautère potentiel.* A general term for all other cauterizing agents than actual heat.—**Solar c.** A lens ("burning-glass") used for concentrating the rays of the sun upon a part so as to cauterize it. —**Thermo-c.** Fr., *thermo-cautère.* Properly, any form of actual c.; as commonly used, Paquelin's c. (*q. v.*).

PAQUELIN'S CAUTERY.

· **CAUTICH, CAU-TISCH,** n's. In Cochin-China, the *Cibotium barometz.* [B, 88, 121.]

CAUTO, n. A West Indian name for the *Hirtella silicea.* [B, 282.]

CAUTSCHOA (Chinese), n. The *Cassia alata.* [B, 121.]

CAUVALAT (Fr.), **CAUVALAT-LE-VIGAN** (Fr.), n's. Ko-va^{3}l-a^3, ko-va^{3}l-a^3-l'-ve-ga^{3}n^2. A place in the department of the Gard, France, where there is a spring containing sulphur, calcium, and free hydrosulphuric and carbonic acids. Used for drinking, baths, and douches in affections of the respiratory and urinary passages, rheumatism, and moist skin diseases. [L, 49.]

CAVA (Lat.), n., f. of adj. *cavus,* hollow. Ka(ka^3)'va^3(wa^3). 1. Of the older pharmacists, the *Corydalis c.* [B.] 2. See KAVA. 3. Any cavity or hollow on the exterior of the body (*e. g.,* the orbit, the vulva, the hollow of the hand, etc). [A, 325.] See CAVUM and CAVITY. 4. See VENA *c.*—**C. herbariorum.** The *Corydalis c.* [B, 200.]—**Radix cavæ.** The root of the *Corydalis c.* [B, 180.]

CAVAL, adj. Ka'va^{2}l. Pertaining to the vena cava. [A, 316.]

CAVALAM, n. On the Malabar coast, the *Sterculia balanghas.* [B, 88, 121.]

CAVALAT (Fr.), n. Ka^3-va^{3}l-a^3. See CAUVALAT.

CAVALÉ, n. In Coromandel, the *Galega purpurea.* [B, 121.]

CAVALIER BRANCHU (Fr.), n. Ka^3-va^{3}l-i^2-a bra^{3}n^2-shu^6. A variety of green cabbage. [B, 121.]

CAVALIÈRE (Fr.), n. Ka^3-va^{3}l-i^2-e^{2}r. A variety of almond-tree growing in Sicily. [B, 38.]

CAVALINHA (Port.), n. Ka^3-va^{3}l-en'ya^3. The *Equisetum,* especially the *Equisetum arvense.* [B, 92, 121.]

CAVALLIUM [Schott] (Lat.), n. n. Ka^2(ka^3)-va^{2}l(wa^{3}l)'li^2-u^{3}m-(u^{4}m). Fr., *cavallion.* A genus of plants, now made a section of the genus *Sterculia.* [B, 121.]—**C. urens.** See STERCULIA *urens.*

CAVALRY-BONE, n. Ka^{2}v'a^{2}l-ri^{2}bo^{3}n. See *Rider's* BONE.

CAVANDELY, n. The *Lagenaria vulgaris.* [B, 121.]

CAVANILLA (Lat.), n. f. Ka^3-va^{3}n-el'ya^3. Fr., *cavanille.* Of Gmelin, see DOMBEYA; of Thunberg, see PYRENACANTHA; of Velloz, see TOURNESOLIA. [B, 121.]

CAVANILLEA (Lat.), n. f. Ka^3-va^{3}n-el'ye^2-a^3. A genus of ebenaceous plants, now referred to *Diospyros.* [B, 121.]—**C. philippensis** [Desvaux]. The *Diospyros glutinosa.* [B, 180.]

CAVANILLESIEÆ (Lat.), n. f. pl. Ka^3-va^{3}n-el-ye^{2}s-i(i^2)'e^2-e(a^3-e^2). Of Reihcenbach, a group of the *Bombaceæ,* consisting of the single genus *Cavanillesia.* [B, 121.]

CAVAN-TREE, n. Ka^{3}v'a^{3}n-tre. The *Acacia cavenia.* [B, 275.]

CAVANY, n. According to Ray, an undetermined species of palm growing in India. [B, 121.]

CAVATIE, n. The *Ostrea edulis.* [L, 105.]

CAVATIO (Lat.), n. f. Ka^2(ka^3)-va(wa^3)'shi^2(ti^2)-o. Gen., *cavation'is.* See CAVUM, CAVITY, and EXCAVATION.

CAVATUM-PILLOO (Tamil), n. The *Andropogon schœnanthus.* [B, 172.]

CAVAY, n. See CABAY.

CAVE (Fr.), adj. Ka^{3}v. See CAVUS.

CAVEA (Lat.), n. f. Ka(ka^3)'ve^2(we^2)-a^3. See CAVUM.

CAVE CANDEL, n. According to Rheede, an East Indian name for the *Rhizophora cylindrica.* [B, 121.]

· **CAVEKINE,** n. See CAVEQUI.

CAVENIA, n. In Chili, the *Acacia c.* [B, 121.]

CAVEQUI, n. According to Mérat and De Lens, the Indian name of the *Mimusops elengi;* according to Baillon, of a myrtaceous plant (perhaps a species of *Metrosideros*). [B, 88, 121.]

CAVERN, n. Ka^{2}v′u^{5}rn. Gr., κρύπτη. κοίλωμα, ἄντρον. Lat., *caverna.* Fr., *caverne.* Ger., *Höhle, Höhlung.* It., Sp., *caverna.* See Cavity.

CAVERNARIOUS, adj. Ka^{2}v-u^{5}rn-a′ri^2-u^{3}s. Lat.. *cavernarius.* Fr., *cavernaire.* Growing in caverns or other underground places. [B, 1, 38.]

CAVERNE (Fr., Ger.), n. Ka^{3}v-e^{2}rn, ka^{3}f-e^{2}rn′e^2. See Cavity. —**C. acineuse** (Fr.). A small pulmonary cavity representing an acinus and a bronchiole. [L, 88.]—**C. lobaire** (Fr.). A cavity occupying an entire lobe of the lung. [L, 88.]—**C. lobulaire** (Fr.). A pulmonary cavity occupying a lobule. [L, 88.]—**C. polylobulaire** (Fr.). A pulmonary cavity formed by the coalescence of several lobular cavities. [L, 88.]

CAVERNEUX (Fr.), adj. Ka^{3}v-e^{2}rn-u^5. See Cavernous.

CAVERN-FERN, n. Ka^{2}v′u^{5}rn-fu^{5}rn. The genus *Antrophyum.* [B, 19.]

CAVERNITIS (Lat.), n. f. Ka^2(ka^3)-vu^{5}rn(we^{2}rn)-i(e)′ti^{2}s. Gen., *cavernit′idis.* Inflammation of the corpora cavernosa of the penis. [Neumann, "Med. Jahrb.," 1882, ii, p. 143.]

CAVERNOMA (Lat.), n. n. Ka^2(ka^3)-vu^{5}rn(we^{2}rn)-om′a^3. Gen., *cavernom′atos* (*-is*). Ger., *Cavernom.* See *Cavernous* ANGEIOMA.

CAVERNOSITÉ (Fr.), n. Ka^{3}v-e^{2}rn-os-et-a. The state of being cavernous. [L, 41.]

CAVERNOSUM (Lat.), n. n. Ka^2(ka^3)-vu^{5}rn(we^{2}rn)-os′u^{3}m-(u^{4}m). See Corpus *c.*

CAVERNOUS, adj. Ka^{2}v′u^{5}rn-u^{3}s. Gr., ἀντρώδης. Lat., *cavernosus.* Fr., *caverneux.* Ger., *cavernös.* It., Sp., *cavernoso.* Of the nature of or pertaining to a cavity or to the corpora cavernosa; containing cavities, spongy; giving out a hollow sound (see *C.* RESPIRATION and *C.* VOICE.

CAVERNULA (Lat.), n. f. Ka^2(ka^3)-vu^{5}rn(we^{2}rn)′u^2(u^4)-la^3. Fr., *cavernule.* A little cavity; in certain *Fungi*, a pore. [B, 19.]

CAVERNULUS (Lat.), n. m. Ka^2(ka^3)-vu^{5}rn(we^{2}rn)′u^2(u^4)-lu^{3}s-(lu^{4}s). See Cavernula.

CAVERON (Fr.), n. Ka^3-ve^{2}r-o^{2}n^2. In the north of France, the *Prunus spinosa.* [B, 38, 88.]

CAVIADÆ [Gervais] (Lat.), n. f. pl. Ka(ka^3)-vi(wi^2)′-a^{2}d(a^{3}d)-e(a^3-e^2). Fr., *caviadées.* A family of rodents, including the guinea-pig. [L, 41; "Proc. of the Zool. Soc.," 1876, p. 63 (L).]

CAVIALE, CAVIARE, n's. Ka^3-vi^2-a^{3}l′, -a^{3}r′. Lat., *caviarium.* Fr., *caviar.* Ger., *Kaviar.* It., *caviale.* Sp., *cabial, caviar.* The roes of certain large fish, especially the sturgeon, preserved with salt and used as a relish. It has been employed as a substitute for cod-liver oil.

CAVICOLÆ (Lat.), n. f. pl. Ka^2(ka^3)-vi^{2}k(wi^{2}k)′ol(o^{2}l)-e(a^3-e^2). From *cavum*, a cavity, and *colere*, to inhabit. Fr., *cavicoles.* A section or family of the *Œstrides;* so called on account of their being found in the sinuses or cavities of the body. [L, 88, 180.]

CAVICORNIA (Lat.), n. n. pl. Ka(ka^3)-vi^2(wi^2)-ko^{2}rn′i^2-a^3. From *cavus*, hollow, and *cornu*, a horn. Fr., *cavicornes.* Ger., *Hohlhörner.* A family of ruminants having hollow horns. [L, 121.]

CAVICULA (Lat.), n. f. Ka(ka^3)-vi^{2}k(wi^{2}k)′u^2(u^4)-la^3. An old name for a malleolus, also for the cuneiform bone. [A, 325.]

CAVIDÆ (Lat.), n. f. pl. Ka(ka^3)′vi^{2}d(wi^{2}d)-e(a^3-e^2). A family of the *Rodentia.* [L, 147.]

CAVIFRONS (Lat.), adj. Ka(ka^3)′vi^2(wi^2)-fro^{2}nz(fro^{2}ns). From *cavus*, hollow, and *frons*, the forehead. Having the forehead concave. [L, 343.]

CAVIIDÆ (Lat.), n. f. pl. Ka(ka^3)-vi(wi^2)′i^{2}d-e(a^3-e^2). A family of the *Hystricomorpha.* [L, 253.]

CAVIINA [Waterhouse] (Lat.), n. n. pl. Ka(ka^3)-vi^2(wi^2)-i(e)′-na^3. A family of the *Hystricidæ.* ["Proc. of the Zool. Soc.," 1876, p. 62 (L).]

CAVIINI (Lat.), n. m. pl. Ka(ka^3)-vi^2(wi^2)-i(e)′ni(ne). See Cavidæ.

CAVILLA (Lat.), n. f. Ka(ka^3)-vi^{2}l(wi^{2}l)′la^3. See Cavicula.

CAVINNA-WOOD, n. The wood of *Dalbergia nigra.* [B, 275.]

CAVIROSTRE (Fr.), adj. Ka^{3}v-i^2-ro^{2}str. From *cavus*, hollow, and *rostrum*, a beak. Having a hollow beak. [L, 41.]

CAVITARIA [Cuvier] (Lat.), n. n. pl. Ka^2(ka^3)-vi^{2}t(wi^{2}t)-a-(a^3)′ri^2-a^3. Fr., *cavitaires.* An order of intestinal worms having a digestive canal floating in a distinct abdominal cavity. [L, 41, 180.]

CAVITARY, adj. Ka^{2}v′i^{2}t-a-ri^2. Lat., *cavitarius.* Fr., *cavitaire.* Relating to, connected with, or containing a cavity. [L, 41, 121.]

CAVITAS (Lat.), n. f. Ka^2(ka^3)′vi^{2}t(wi^{2}t)-a^{2}s(a^{3}s). Gen., *cavitat′is.* From *cavus*, hollow. Fr., *cavité.* Ger., *Cavität.* It., *cavità.* Sp., *cavidad.* A cavity; in botany, the perithecium of certain *Fungi.* [B, 19.]—**C. abdominalis.** Fr., *cavité abdominale.* Ger., *Bauchhöhle.* The cavity of the abdomen. [A, 385.]—**C. ancyroidea.** See *Ancyroid* CAVITY.—**C. antrosa auris.** See *Tympanic* CAVITY.—**C. aquæductus vestibuli membranacea.** See Saccus *endolymphaticus.*—**C. arachnoidalis.** See *Subdural* SPACE.—**C. articularis.** See *Articular* CAVITY.—**C. buccalis.** See *Buccal* CAVITY.—**C. buccinata.** See *Cochlear* CANAL.—**Cavitates cerebri.** See *Cerebral* CAVITIES.—**C. cochleata.** See *Cochlear* CANAL.—**C. conchæ.** The hollowed portion of the external ear, below the spine of the helix. [L, 115.]—**C. cotyloidea.** See *Cotyloid* CAVITY.—**C. cranii.** See *Cranial* CAVITY.—**C. dentis.** See *Pulp* CAVITY.—**C. digitalis, C. digitata.** See *Ancyroid* CAVITY.—**C. Duncani.** The fifth ventricle of the brain. [L.]—**C. elliptica.** See Ampulla *ossea* and *C. hemi-elliptica.*—**C. glenoidalis.** See *Glenoid* CAVITY.—**C. glenoidalis externa.** The concave surface upon the head of the tibia for the reception of the external condyle of the femur. [L.]—**C. glenoidalis interna.** The concave surface upon the head of the tibia for the reception of the internal condyle of the femur. [L.]—**C. glenoidea.** See *Glenoid* CAVITY.—**C. glenoidea ossis temporis.** The glenoid fossa of the temporal bone which receives the condyle of the inferior maxilla. [L, 115.]—**C. glenoidea radii.** The glenoid cavity of the radius. [L.]—**C. glenoidea scapulæ.** The glenoid cavity of the scapula. [L.]—**C. glenoidea tibiæ externa.** The articular surface of the head of the tibia that articulates with the outer condyle of the femur. [L, 348.]—**C. glenoidea tibiæ interna.** The articular surface of the head of the tibia that articulates with the inner condyle of the femur. [L, 348.]—**Cavitates glenoideæ tibiæ.** See *C. glenoidea tibiæ externa* and *C. glenoidea tibiæ interna.*—**C. gutturalis.** See *Guttural* CAVITY.—**C. hemi-elliptica.** The recessus ellipticus of the ear. [L, 31.]—**C. hemisphærica.** The recessus sphæricus of the ear. [L, 31.]—**C. inferior tibiæ.** The lower articular surface of the tibia. [L, 332.]—**C. innominata.** See *C. conchæ.*—**Cavitates innominatæ.** The auricles of the heart. [L, 325.]—**C. intermalleolaris.** See *C. inferior tibiæ.*—**C. intermedia** [Goldfuss]. In certain birds, a cavity situated between the nostril and the orbit. ["Proc. of the Zool. Soc.," 1851, p. 29 (L).]—**C. labyrinthi.** The osseous labyrinth of the ear. [L, 31.]—**C. mastoidea.** See *Mastoid* ANTRUM.—**C. mediastini.** See Mediastinum.—**C. medullaris.** See *Medullary* CAVITY.—**C. narium, C. nasi.** See *Nasal* CAVITY.—**C. orbicularis.** See *C. hemi-elliptica* and *C. hemisphærica.*—**C. oris.** See *Buccal* CAVITY.—**C. ovalis.** See *C. hemi-elliptica.*—**C. peritonæi.** See *Peritoneal* CAVITY.—**C. pleuræ.** See *Pleural* CAVITY.—**C. posterior ventriculi lateralis.** See *Ancyroid* CAVITY.—**C. prima.** See *Fifth* VENTRICLE.—**C. pulpæ.** See *Pulp* CAVITY.—**C. quinta.** See *Fifth* VENTRICLE.—**C. rhomboidalis.** See *Fourth* VENTRICLE.—**C. rotunda.** See *C. hemisphærica.*—**C. semilunaris minor.** See *Lesser sigmoid* CAVITY.—**C. semi-ovalis.** See *C. hemi-elliptica.*—**C. sigmoidea major.** See *Great sigmoid* CAVITY.—**C. sigmoidea minor.** See *Lesser sigmoid* CAVITY.—**C. subrotunda.** See *C. hemisphærica.*—**C. sulciformis** [Morgagni]. The sulcus ad aquæductum vestibuli. [L, 7.]—**C. Sylvii.** See *Fifth* VENTRICLE.—**C. tympani, C. tympanica.** See *Tympanic* CAVITY.—**C. Valsalvæ.** See *Mastoid* ANTRUM.—**C. Vieusenni, C. Vieussens.** See *Fifth* VENTRICLE.

CAVITÄT (Ger.), n. Ka^{3}f-i^2-tat′. See Cavity.—**C. der Bettstelle.** See Sella *turcica.*

CAVITÉ (Fr.), n. Ka-vi^2-ta. See Cavity.—**Arrière-c. péritonéale.** See Bursa *omentalis.*—**C. amnio-choriale.** The cavity between the chorion and the outer layer of the amnion. [A, 15.]—**C. ancyroïde.** See *Posterior* CORNU *of the lateral ventricle.*—**C. arachnoïdienne.** See *Subdural* SPACE.—**C. auditive.** See *Tympanic* CAVITY.—**C. centrale.** Of the yolk of an egg, a supposed cavity containing the latebra. [A, 4.]—**C. cérébrale.** A ventricle of the brain. [I, 28; K.]—**C. cotyloïde.** See Acetabulum (3d def.).—**C. crânienne.** See *Cranial* CAVITY.—**C. de la pulpe.** See *Pulp* CAVITY.—**C. de l'épiploon.** See Bursa *omentalis.*—**C. de Retzius.** See *Prevesicular* SPACE.—**C. de segmentation.** See *Segmentation* CAVITY.—**C. digitale.** See *Posterior* CORNU *of the lateral ventricle* and *Descending* CORNU *of the lateral ventricle.*—**C. du septum lucidum.** See *Fifth* VENTRICLE.—**C. hémo-viscérale.** See *Pleuro-peritoneal* CAVITY.—**C. médullaire.** See *Medullary* CAVITY.—**C. neurale.** See *Neural* CANAL.—**C. olécrânienne.** See *Olecranon* FOSSA.—**C. orbitaire.** See Orbit.—**C's pneumatiques.** The air spaces in the bones of birds. [L, 158.]—**C. préperitonéale.** See *Prevesical* SPACE.—**C. préputiale.** Syn.: *chambre préputiale.* In certain *Urodela*, a pouch in the cloaca of the male containing a gland accessory to reproduction. [L, 121, 321.]—**C. prévesicale.** See *Prevesical* SPACE.—**C. pulmo-branchiale.** See *C. pulmonaire* (1st def.).—**C. pulmonaire.** 1. In certain *Gasteropoda*, a chamber having respiratory functions, formed by the inflection of the mantle over the back of the neck, lined with a plexus of vessels. 2. In comparative anatomy, any cavity having respiratory functions. [L, 227, 321.]—**C. pulpaire.** See *Pulp* CAVITY.—**C. respiratoire.** See *C. pulmonaire* (2d def.).—**Premières c's médullaires.** See *Primary* AREOLÆ.

CAVITY, n. Ka^{2}v′i^{2}t-i^2. Gr., κοῖλον. κοίλωμα, κοιλότης. Lat., *cavitas, cavum* (from *cavus*, hollow). Fr., *cavité.* Ger., *Höhle.* It., *cavità.* Sp., *cavidad.* A hollow space (open or closed).—**Abdominal c.** Lat., *cavitas abdominalis, cavum abdominale.* Fr., *cavité abdominale.* Ger., *Bauchhöhle, Unterleibshöhle.* The c. of the abdomen. [a, 17.]—**Aerial cavities.** See *Air*-CELLS.—**Alimentary c.** In comparative anatomy, a c. in which the food is digested and assimilated. [L, 201.]—**Amygdaloid c.** In the solipeds, a triangular space between the soft palate and the base of the tongue, into which open a number of glands representing a tonsil. [L, 13.]—**Ancyroid c., Ankyroid c.** Lat., *cavitas ancyroidea.* Fr., *cavité ancyroïde.* The posterior cornu of the lateral ventricle of the brain. [I, 4; K.]—**Anterior peritoneal c.** See *Peritoneal c.*—**Arachnoid c.** Lat., *cavitas arachnoidalis, cavum arachnoidale* (seu *arachnoideum*). Fr., *cavité arachnoïdienne.* See *Subdural* SPACE.—**Archenteric c.** See Archenteron.—**Areolar c.** See Areola (2d def.).—**Arterial c.** See Cavum *arteriosum.*—**Articular c.** Lat., *cavitas articularis.* Fr., *cavité articulaire.* Ger., *Knochengelenkhöhle.* A hollow on a bone for receiving the articular head or tuberosity of another bone. [L.]—**Atrial c.** See *Branchial c.*—**Auditory c.** Fr., *cavité auditive.* See *Tympanic c.*—**Body c.** See *Pleuro-peritoneal* SPACE and Cœloma.—**Body cavities.** See *Intermesoblastic* SPACES.—**Branchial c.** 1. In certain fishes and *Amphibia*, a c. into which the gill-clefts open. [L, 201.] 2. In the *Tunicata*, see Atrium (2d def.).—**Brood-cavities.** See *Incubatory cavities.*—**Buccal c.** Lat., *cavitas buccalis, cavum buccale.* That portion of the c. of the mouth that is bounded by the cheeks; in the *Tunicata*, the stomodæum. [L.]—**Cartilage-cavities.** Ger., *Knorpelhöhlen.* The cavities (lacunæ)

in the matrix of cartilage, containing its cells. [J, 24, 32.]—**Cavities of reserve.** The follicles beneath the deciduous teeth, from which the permanent teeth are developed. [L, 31.]—**C. of the great omentum.** Lat., *bursa omentalis major* (seu *omenti majoris*). Fr., *grande bourse épiploïque.* The lower and larger of the two portions into which the bursa omentalis is divided by the gastro-pancreatic ligament. [L, 7, 31.]—**C. of the lesser omentum.** Lat., *bursa omentalis minor* (seu *omenti minoris*). Fr., *petite bourse épiploïque.* The upper and smaller of the two portions into which the bursa omentalis is divided by the gastro-pancreatic ligament. [L, 7, 31.]—**C. of von Baer.** See *Segmentation c.*—**Cerebral cavities.** Lat., *cavitates cerebri.* Fr., *cavités cérébrales.* The ventricles of the brain. [I, 28.]—**Cleavage-c.** Ger., *Furchungshöhle.* See BLASTOCŒLE.—**Closed cavities.** Fr., *cavités closes.* The serous sacs. [A, 385.]—**Cotyloid c.** Fr., *cavité cotyloïde.* Any cup-shaped articular c., especially the acetabulum. [L, 149.]—**Cranial c.** Lat., *cavitas* (seu *cavum*) *cranii.* Fr., *cavité crânienne* (ou *du crâne*). Ger., *Schädelhöhle.* The c. of the skull. [α, 17.]—**Cranio-vertebral c.** In the embryo, the upper of the two main tubular cavities formed the one above and the other below the notochord. It incloses the great nervous centre. [A, 5.]—**Cutigeral c.** In the solipeds, the excavation of the hoof into which the plantar cushion is received. [L, 13.]—**Decidual c.** The space which exists between the decidua vera and the decidua reflexa before they have coalesced. [A, 40.]—**Dental c.** Lat., *cavum dentis.* 1. See *Pulp c.* 2. An excavation in a tooth resulting from caries.—**Digital c.** Lat., *cavitas digitalis.* Fr., *cavité digitale.* See *Ancyroid c.*—**Epiploic c.** See BURSA *omentalis.*—**External dental c.** The c. found upon the cutting surface of the incisor teeth of solipeds ; it gradually wears away by use. [L, 13.]—**False amniotic c.** In animals with inverted germinal layers (many rodents), the part of the secondary blastodermic vesicle left next the placental pole of the ovum by the division of the secondary vesicle into two parts. It is soon obliterated by the meeting of its walls. [J, 89.] Cf. *Neuramniotic c.*—**Frontal cavities.** See *Frontal* SINUSES.—**Gastric c.** In comparative anatomy, any c. representing functionally the stomach of higher animals. [L, 11.]—**Gill-c.** See *Branchial c.*—**Glenoid c.** Lat., *cavitas glenoidalis.* Fr., *cavité glénoïde.* Ger., *Schultergelenkspfanne.* A shallow articular cavity in a bone, particularly in the head of the scapula. [C.]—**Greater peritoneal c.** See *Peritoneal c.*—**Great sigmoid c.** A large articular cavity in the superior extremity of the ulna, formed by the olecranon process above and behind and the coronoid process below ; it receives the trochlear surface of the humerus. [C, 3.]—**Guttural c.** Lat., *cavitas gutturalis.* Fr., *cavité gutturale.* The c. of the pharynx. [A, 385.]—**Head intestinal c.** The anterior blind extremity of the alimentary canal in the embryo. [L, 146.]—**Incubatory cavities.** Syn. : *brood-cavities.* Pouches found in the female *Crustacea* in different parts of the body, containing their ova, in which the ova are hatched and the young retained until they are able to subsist independently. [L, 121.]—**Intestinal c.** See *Abdominal c.* and *Pleuro-peritoneal* SPACE.—**Lesser peritoneal c.** Ger., *kleiner Bauchfellsack.* See BURSA *omentalis.*—**Lesser sigmoid c.** A narrow oblong articular depression on the outer side of the base of the coronoid process of the ulna which receives the cylindrical part of the head of the radius. [C, 3.]—**Mantle c.** See *Pallial c.*—**Marrow c.** See *Medullary c.*—**Mastoid c.** Lat., *cavum mastoidei.* See *Mastoid* ANTRUM.—**Maxillary c.** In the *Dipnoi* and *Amphibia*, a c. in the maxilla connected with the nasal cavities and provided with a branch of the olfactory nerve. [L, 294.]—**Medullary c.** Lat., *cavitas medullaris.* Fr., *cavité médullaire.* Ger., *Markraum, Markhöhle.* A c. or space in a bone containing marrow. The c. may be large, as in the shaft of long bones, or many small cavities may exist in the framework of cancellated bone. [G, 55, 66, 68.]—**Middle intestinal c.** The middle portion of the alimentary canal of the embryo. [L, 146.]—**Nasal cavities.** Lat., *cavitates nasales* (seu *narium*). Fr., *cavités nasales.* Ger., *Nasenhöhlen.* The cavities of the nose ; one on each side of the median vertical septum, opening in front by the anterior nasal apertures, and behind by the posterior nares, communicating with the sinuses of the frontal, ethmoid, sphenoid, and superior maxillary bones. [C.]—**Neural c.** Fr., *cavité neurale.* See *Spinal* CANAL, and *Neural* CANAL.—**Neuramniotic c.** The c. in which the embryos of animals (many rodents) with inverted blastodermic layers begin to develop. It is supposed to represent the true amniotic c. of developing ova with uninverted layers. It arises by the formation of a vesicle (secondary blastodermic vesicle) in a solid plug of epiblast cells developing at the placental pole of the ovum, and carrying the single-layered hypoblast before it into the blastodermic vesicle. Soon after the secondary vesicle is formed it is divided into two by the meeting of the walls near the middle. The c. left in the part at the free pole of the ovum is the true or neuramniotic c. lined with epiblast cells, and into that the developing embryo projects. [Fraser, "Proc. of the Roy. Soc.," xxxiv, 1882, p. 434 (J). Cf. *False amniotic c.*—**Oral c.** Lat., *cavum oris.* Ger., *Mundhöhle.* The cavity of the mouth.—**Orbital c.** Fr., *cavité orbitaire.* See ORBIT.—**Pallial c.** The c. between the two folds of the pallium, or mantle, of the *Brachiopoda* and *Mollusca.* [L, 121.]—**Paragastric c.** See PARAGASTER.—**Pelvic c.** Fr., *excavation du bassin, cavité pelvienne.* Ger., *Beckenhöhle, Beckenraum.* A part of the general abdominal cavity which is below the level of the linea ilio-pectinea and the promontory of the sacrum. It is bounded in front by the symphysis pubis, behind by the concavity of the sacrum and coccyx, laterally by the ischia, and below by the levatores ani and coccygei muscles. It forms a short curved canal, much deeper posteriorly than anteriorly. [α, 17.]—**Pelvic intestinal c.** The posterior blind extremity of the alimentary canal of the embryo. [L, 146.]—**Peribranchial c.** See *Branchial c.*—**Pericardial c.** Lat., *cavum pericardii.* The space between the heart and the pericardium ; in embryology, the c. which contains the heart. [L, 142, 201.]—**Peri-enteric c.** See CŒLOMA.—**Perigastric c.** In the *Polyzoa*, the space between the endocyst and the ectocyst, corresponding to the cœloma of higher animals. ["Jour. of the Roy. Micr. Soc.," 1889, p. 47 (L).]—**Peritoneal c.** Lat., *cavum peritonæi.* Ger., *Peritonäalcavum.* The closed space included between the visceral and parietal layers of the peritonæum ; divided into the general (greater or anterior) peritoneal c. and the bursa omentalis. [L.] Cf. PERITONÆUM and *Abdominal c.*—**Perivisceral c.** Fr., *cavité periviscérale.* The general body-c. of the embryo ; in sponges, the space between the mesoderm and the ectoderm. [L, 321.]—**Pleural c.** Lat., *cavitas pleuræ.* The closed space between the visceral and parietal layers of the pleura. [α, 17 ; L, 142.]—**Pleuro-peritoneal c.** 1. See *Pleuro-peritoneal* SPACE. 2. In comparative anatomy, the common c. containing both the abdominal and thoracic viscera. [L, 300.]—**Posterior peritoneal c.** See BURSA *omentalis.*—**Primary marrow** (or **medullary**) **cavities.** Fr., *premières espaces* (ou *cavités*) *médullaires.* Ger., *primäre* (oder *ursprungliche*) *Markräume.* Syn. : *primary marrow-spaces, secondary areolæ* [Sharpey]. See *Primary* AREOLÆ.—**Primitive digestive c.** See PROTOGASTER.—**Primitive vertebral c., Protovertebral c.** In embryology, the space between the laminæ of the muscle plates. [L, 146.]—**Pulmonary c.** 1. A pathological c. in the lung. 2. See CAVUM *pulmonale.*—**Pulp c.** Lat., *cavum dentis.* The c. within a tooth containing the dental pulp. [L, 121.]—**Resonance cavities.** In anthropoid and certain other monkeys, pouches connected with the larynx, serving to increase the volume and resonance of the voice. [L, 294 (α, 17).]—**Respiratory cavities.** The round passages terminating the smallest bronchi which divide to form the infundibula. [L, 318.]—**Rosenmüller's c.** A depression in the postero-lateral wall of the pharynx, between the posterior lip of the Eustachian tube and the posterior pharyngeal wall. [F, 31.]—**Rusconi's nutritive c.** See PROTOGASTER.—**Segmentation c.** Fr., *cavité de segmentation.* Ger., *Keimhöhle.* A shallow c. that forms between the white vitellus and the blastoderm. [A, 8.]—**Semilunar (or sigmoid) c. of the radius.** Lat., *incisura semilunaris* (seu *sinus lunatus*) *radii.* The narrow, concave articular surface on the inner side of the radius at its lower extremity, which articulates with the ulna. [C, 3.]—**Sigmoid cavities of the ulna.** See *Greater sigmoid c.* and *Lesser sigmoid c.*—**Small sigmoid c.** See *Lesser sigmoid c.*—**Somatic c.** The general c. of the body, as in the *Actinidæ.* [L, 121.]—Cf. *Pleuro-peritoneal* SPACE.—**Somato-visceral c.** See CŒLOMA.—**Splanchnic c.** See *Pleuro-peritoneal* SPACE.—**Splanchnic cavities.** Fr., *cavités splanchniques.* The cavities containing the important organs of the body ; the cranial, the thoracic, and the abdominal. [L, 43.]—**Subdermal cavities.** See *Subdermal* CHAMBERS.—**Subdural c.** See *Subdural* SPACE.—**Subgerminal c.** See *Segmentation c.*—**Synovial c.** The space within a joint lined by duplications of synovial membrane and containing synovia. [C.]—**Thoracic c.** Fr., *cavité thoracique.* Ger., *Brusthöhle.* The c. of the thorax. [α, 17.]—**Thoracico-abdominal c.** Fr., *cavité thoraco-abdominale.* See *Pleuro-peritoneal c.* (2d def.).—**Tympanic c.** Lat., *cavitas* (seu *cavum*) *tympani, antrum auris, tympanum.* Fr., *caisse du tympan.* Ger., *Trommelhöhle.* The c. of the tympanum. [F, 32.]—**Uterine c.** Lat., *cavum uteri.* Ger., *Höhle des Uteruskörpers, Uterinalcavum.* The c. of the body of the uterus. [α, 17.]—**Vascular c.** See *Pulp-c.*—**Venous c.** See *Cavum pulmonale.*—**Ventral c.** The space included by the hæmal arches ; the abdominal c. [L, 146.]—**Ventricular c.** 1. The cavity of a ventricle, as of the heart, of the brain, or of the larynx. 2. The cavity which, in the embryo of osseous fishes and some other animals, is formed in the involution of a solid column of epiblast, analogous to the medullary groove and canal of the higher vertebrates. [A, 5.]—**Visceral c.** See *Pleuro-peritoneal* SPACE.—**Yolk c.** See LATEBRA.

CAVOLINIDÆ (Lat.), n. f. pl. Ka(ka^3)-vo(wo^2)-li^{2}n′i^{2}d-e(a^3-e^2). A family of the *Thecosomata.* [L, 234.]

CAVOOGA (Malay), n. The *Areca catechu.* [B, 172.]

CAVO-VALGUS (Lat.), n. m. Ka(ka^3)″vo(wo^2)-va^{2}l(wa^{3}l)′gu^{3}s-(gu^{4}s). A variety of club-foot consisting of a combination of cavus and valgus.

CAVUM (Lat.), n. n. Ka(ka^3)′vu^{3}m(wu^{4}m). See CAVITY.—**C. abdominis.** See *Abdominal* CAVITY.—**C. arachnoidale, C. arachnoideum.** See *Subdural* SPACE.—**C. arteriosum.** In certain *Chelonia*, the left division of the right chamber of the ventricle of the heart, from which the arterial system springs. [L, 66, 121.]—**C. buccale.** See *Buccal* CAVITY.—**C. cervicis uteri.** Ger., *Höhle des Gebärmutterhalses.* Syn.: *c. colli uteri.* The cavity of the neck of the uterus; the cervical canal.—**C. cochleæ.** See *Cochlear* CANAL.—**C. colli uteri.** See *C. cervicis uteri.*—**C. cranii.** See *Cranial* CAVITY.—**C. dentis.** See *Pulp* CAVITY.—**C. Douglasii.** See *Douglas's* POUCH.—**C. Douglasii laterale.** Syn.: *fossa pararectalis.* A space at each side of the cavity of the true pelvis behind the broad ligament of the uterus. [L, 332.]—**C. endolymphaticum.** See SACCUS *endolymphaticus.*—**C. faucium.** See *Guttural* CAVITY.—**C. ischio-rectale.** See *Ischio-rectal* SPACE.—**C. laryngis.** The cavity of the larynx. [L, 332.]—**C. laryngo-pharyngeum.** The common cavity of the larynx and pharynx. [L.]—**C. mastoidei.** See *Mastoid* ANTRUM.—**C. Meckelli.** See *Circular* SINUS.—**C. mediastini antici.** Fr., *cavité du médiastin anterieure.* See *Anterior mediastinal* SPACE.—**C. mediastini postici.** Fr., *cavité du médiastin postérieure.* See *Posterior mediastinal* SPACE.—**C. medullare.** See *Medullary* CANAL (1st def.).—**Cava narium, Cava nasi.** See *Nasal* CAVITIES.—**C. naso-pharyngeum.** See *C. pharyngo-nasale.*—**C. oris.** Ger., *hintere Mundhöhle.* See *Oral* CAVITY.—**C. oris externum.** Ger., *Backenhöhle, vordere Mundhöhle.* Syn.: *vestibulum oris.* That portion of the oral cavity situated between the lips and the maxillæ. [L, 31.]—**C. pelveos, C. pelvis.** See *Pelvic* CAVITY.—**C. pericardii.** See *Pericardial* CAVITY.—**C. perilymphaticum.** The space between the membranous and osseous labyrinths. [L, 294.]—**C. peritonæi.** See *Peritoneal* CAVITY.—**C. pharyngis.** The cavity of the pharynx. [L, 146.]—**C. pharyngo-laryngeum** [Hyrtl].

That portion of the pharynx that lies below the velum palati. [L, 31.]—**C. pharyngo-nasale** [Hyrtl]. Fr., *cavite naso-pharyngienne.* That portion of the pharynx lying above the velum palati. [F; L, 31.]—**C. pharyngo-orale.** Fr., *cavité pharyngo-orale.* Ger., *Schlundhöhle.* The common cavity of the pharynx and mouth.—**C. præperitonæale (Retzii).** See *Prevesical* SPACE.—**C. pulmonale.** In certain *Chelonia*, the right division of the right chamber of the ventricle of the heart. [L, 66, 121.]—**C. pulmonis.** The common cavity of the lower air-passages. [L, 146.]—**C. pulpæ.** See *Pulp*-CAVITY.—**C. recto-ischiadicum.** See *Ischiorectal* SPACE.—**C. Retzii.** See *Prevesical* SPACE.—**C. segmentarium.** See BLASTOCŒLE.—**C. styli.** A canal in the female genital organ (so-called style) of mosses and *Hepaticæ.* [B. 198.]—**C. subarachnoidale, C. subarachnoideum.** See *Subarachnoid* SPACE.—**C. subdurale.** See *Subdural* SPACE.—**C. thoracis.** See *Thoracic* CAVITY.—**C. tympani.** See *Tympanic* CAVITY.—**C. tympanicum superius.** See *Mastoid* ANTRUM.—**C. tympani osseum.** Fr., *caisse du tympan osseuse.* The bony tympanic cavity. [L, 7.]—**C. uteri.** See *Uterine* CAVITY.—**C. utero-rectale.** See *Utero-rectal* SPACE. — **C. utero-vesicale.** See *Utero-vesical* SPACE.—**C. venosum.** See *C. pulmonale.*

CAVUS (Lat), adj. Ka(ka³)′vu³s(wu⁴s). Fr., *cave.* Ger., *hohl.* Hollow. [B.] Cf. VENA *cava.*

CAVUS (Lat.), n. m. Ka(ka³)′vu³s(wu⁴s). Fr., *pied creux* (2d def.). Ger., *Hohlfuss* (2d def.). 1. Of certain *Fungi*, the peridium. [B, 19.] 2. Talipes arcuatus (*q. v.*).—**C. rotundus.** Of Schaffer, the peridium of the *Lycoperdaceæ* and the sporangeium of the *Mucorini.* [B, 121.]—**C. superus.** Of Batsch, the generating surface of the *Peziza;* by others it is regarded as a variety of hymenium. [B, 19, 121.]—**Direct c.** [Duchenne]. A variety of paralytic talipes arcuatus in which only the triceps suralis is paralyzed. [A, 101.]

CAWA (Bengal.), n. The *Pharbitis nil.* [B, 172.]

CAXALUS, n. In Brazil, a species of *Cactus.* [B, 121.]

CAXAPARA DO GENTIO (Port.), n. Ka³sh-a³-pa³′ra do ge²n′ti²-o. In Brazil, the *Terminalia argentea.* [B, 19.]

CAXIM, n. In Brazil, the *Sapium ilicifolium* and *Sapium aucuparium.* [B, 121.]

CAXTON SPRING, n. Ka²x′tu³n. An alkaline-saline spring in Quebec, Canada, near the St. Leon Springs. [A, 363.]

CAY (Chinese), n. A plant. [B, 88, 121.]—**C. ba.** The *Ficus auriculata.* [B, 121.]—**C. bac thoi.** The *Sinapis brassicata.* [B, 121.]—**C. bai.** The *Euphorbia litchi* and the *Pimela nigra.* [B, 88, 121.]—**C. bang lang.** The *Lagerstrœmia hirsuta.* [B, 121.]—**C. baon.** See CHI-XAC.—**C. baong-baong.** The *Adiantum scandens.* [B, 121.]—**C. bap.** The *Zea mays.* [B, 88, 121.]—**C. bau.** The *Cucurbita lagenaria* (*Lagenaria vulgaris*). [B. 88, 121]—**C. bayoui.** The *Nymphanthus squamifolia.* [B, 121.]—**C. ben.** The *Sinapis pekinensis.* [B, 121.]—**C. bien-bien.** A species of *Vateria*, sometimes called c. vin-vin. [B, 121.]—**C. binch ba.** The *Pyrus malus.* [B, 88, 121.]—**C. binch bat.** The *Anona asiatica.* [B, 121.]—**C. binch lin.** A species of *Vitex* with dense wood, held in much estimation by the Chinese. [B, 121.]—**C. bo-bo.** The *Coix lacrima.*—**C. bo de, C. bode.** The *Ficus religiosa.* [B, 88, 121.]—**C. boi-boi.** The *Heliotropium indicum.* [B, 121.]—**C. bon hon.** The *Sapindus saponaria.* [B, 88, 121.]—**C. boung.** The *Basella nigra* (*rubra*). [B, 88, 121.]—**C boung nat.** The *Phyllanthus emblica.* [B, 88, 121.]—**C. boung chiala.** See *C.-buong chiala.*—**C. boung vang.** The *Opa metrosideros.* [B, 121.]—**C. boung van thai.** The *Cratægus indica.* [B, 121.]—**C. bua.** The *Oxycarpus* (*Garcinia*) *cochinchinensis.* [B, 121.]—**C. bucho.** The *Ficus politaria.* [B, 121.]—**C. buoi.** The *Citrus decumana.* [B, 121.]—**C. buong.** The *Erythrina corallodendron.* [B, 121.]—**C. buong chiala.** The *Hibiscus esculentus.* [B, 121.]—**C. ca chac.** A species of *Vatica* with yellowish, exceedingly durable wood; one of the trees furnishing wood-oil. [B, 121.]—**C. calava.** The *Panax fruticosus.* [B, 88.]—**C. cam.** The *Citrus aurantium.* [B, 88.]—**C. can.** The *Areca catechu.* [B. 121.]—**C. ca na.** The *Pimela alba.* [B, 121.]—**C. cang, C.-canh.** The *Citrus medica.* [B, 88, 121.]—**C. caphé.** The *Coffea arabica.* [B, 88, 121.]—**C. cay.** The *Diospyros sebata.* [B, 121.]—**C. chebaong.** The *Teucrium thea.* [B. 121.]—**C. chiai.** A Cochin-China species of *Hoppea.* [B, 121.]—**C. cho de, C. chode.** The *Phyllanthus niruri.* [B, 88, 121.]—**C. chom-chom.** The *Democarpus crinita* and the *Euphorbia nephelium.* [B, 121.]—**C. chua.** The *Hibiscus surattensis.* [B, 121.]—**C. chuoi nuoe.** The *Crinum asiaticum.* [B, 121.]—**C. cu.** The *Sinapis chinensis.* [B, 121.]—**C. cua.** The *Ficus benjamina.* [B, 121.]—**C. dai bi.** The *Baccharis salvia* (*Blumea balsamifera*). [B, 121, 266.]—**C. dai tao.** The *Zizyphus jujuba.* [B. 121.]—**C. dang huong.** A tree (probably a species of *Tillœa*) with hard, fragrant wood. [B, 121.]—**C. dan phung.** The *Arachis asiatica.* [B, 121.]—**C. dao.** The *Teucrium odorum.* [B, 121.]—**C. dao annam.** The *Eugenia jambos.* [B, 88, 121.]—**C. dao huong tau.** The *Jambosa malaccensis.* [B, 121.]—**C. dao nhen.** The *Amygdalus persica* (*Persica vulgaris*). [B, 88, 121.]—**C. dau long, C. dau mioc.** A species of *Dipterocarpus* furnishing wood-oil. [B, 121.]—**C. dau ngo.** A species of *Dipterocarpus* furnishing wood-oil. [B, 121.]—**C. dea.** The *Rhizophora gymnorrhiza.* [B, 121.]—**C. deanh nam.** The *Gardenia grandiflora* [Loureiro]. [B, 121.]—**C. dean ray.** The *Pimela oleosa.* [B, 112.]—**C. de anso.** The *Camellia drupifera.* [B, 121.]—**C. dean son.** The *Dryandra* (*Aleuritis*). [B, 121.]—**C. dean truong.** The *Pistacia oleosa.* [B, 121.]—**C. dee gai.** See *C. def gay.*—**C. dee sang.** The *Quercus.* [B, 121.]—**C. dee se.** The *Quercus concentrica.* [B, 121.]—**C. def gay.** The *Castanea.* [B, 121.]—**C. denong leo.** The *Ipomœa quamoclit.* [B, 121.]—**C. deo ban.** The *Aloexylon.* [B, 121.]—**C. deo duoi.** The *Streblus asper.* [B, 121.]—**C. deo niet.** The *Daphne cannabina.* [B, 121.]—**C. diau cay.** The *Pimela oleosa.* [B, 121.]—**C. dieo hoang.** The *Rumex crispus.* [B, 121.]—**C. dua.** The *Cocos nucifera.* [B, 88. 121.]—**C. duac.** The *Arenga saccharifera.* [B. 121.]—**C. dua nuoc.** The *Nipa fruticans.* [B, 121.]—**C. du-du, C. dudu.** The *Carica papaya.* [B, 88, 121.]—**C. dudu deal.** The *Ricinus communis.* [B, 88, 121.]—**C. dung dinh.** The *Caryota urens* and the *Caryota mitis.* [B, 121.]—**C. duoi-chon.** The *Adiantum capillus Veneris.* [B, 88, 121.]—**C. duoi chout.** The *Wallichia caudata.* [B, 121.]—**C. duong.** The *Cupressus.* [B, 121.]—**C. en chi.** The *Strychnos nux vomica.* [B, 88, 121.]—**C. gai.** The *Urtica nivea.* [B, 121.]—**C. go.** The *Intsia amboinensis.* [B, 121.]—**C. gung.** The *Amomum zingiber* (*Zingiber officinale*). [B, 88, 121.]—**C. hachdeo.** The *Juglans regia.* [B, 88. 121.]—**C. ha diep.** The *Hedysarum vespertilio.* [B, 121.]—**C. hang.** The *Allium cepa.* [B, 88, 121.]—**C. hanng.** The *Diospyros kaki.* [B, 88, 121.]—**C. hop.** The *Arundo multiplex.* [B. 121.]—**C. hiang huong.** See *C. dang huong.* [B, 121.]—**C. huong lan.** The *Dianella ensifolia.* [B, 121.]—**C. huyuhdan** (Cochin). The *Santalum album.* [B, 88, 121.]—**C. jua.** The *Pandanus odoratissima.* [B, 121.]—**C. khe.** The *Averrhoa carambola* and the *Panicum italicum.* [B, 88, 121.]—**C. khoai ca.** The *Aristolochia indica.* [B, 88, 121.]—**C. kim luon.** The *Acrostichum lanceolatum.* [B, 121.]—**C. la lip.** A species of *Corypha.* [B, 121.]—**C. lano cho.** The *Ficus septica.* [B, 121.]—**C. le tan.** The apple-tree (*Pyrus malus*). CAYAPONIA (Lat.), n. f. Ka³-ya³-pon′i²-a³. Fr., *cayaponie.* See TRIANOSPERMA.

CAYARA, n. In India, a species of *Acrocomia.* [B, 121.]

CAYAUNAMATA (Malay), n. The *Datura tatula.* [B, 88, 121.]

CAYEU (Fr.), n. Ka³ e-yu⁵. See BULBULUS.

CAYEUX (Fr.), n. Ka³-e-yu⁵. A marine-bathing resort in the department of Somme, France. [L, 87.]

CAYLA (Fr.), n. Ka^3-e-la^3. A place in the department of Aveyron, France, where there is a chalybeate spring. [A, 385.]

CAYLUSEÆ [M. Arg.] (Lat.), n. f. pl. Ka^3-i^2-lus'e^2-e(a^3-e^2). From *Caylusea*, the only genus. A tribe of resedaceous plants. [B, 121, 214.]

CAYMANS (Fr.), n. pl. Ka^3-e-ma^{3}n^2. See CAÏMANS.

CAYN-TRONG, n. Of Rumphius, the *Maba ebenus*. [B, 121.]

CAYOLIZAN, n. Of Hernandez, an undetermined shrub of Mexico, supposed to be a *Lantana*. [B, 121.]

CAYOLOCKA, n. A sort of heavy black sandal-wood obtained in the Philippines; used in dyeing and perfuming. [B, 88.]

CAYOO-GADDES, CAYOO-GADDUS, CAYOO-TREE [Marsden], n's. A fragrant tree of Sumatra; according to some, the *Cinnamomum parthenoxylon*. [B, 121, 214.]

CAYUPUT, CAYUPUTI, n. Ka^3'yu-pu^{3}t, ka^3-yu-put'i^2. See CAJUPUT.

CAZABI, n. See CASSAVA.

CAZAMARUCHA, n. In Peru, the *Xanthium catharticum* [B, 88, 121.]

CAZOU, n. An African fruit of the size of a melon, containing numerous edible kernels; probably borne by a species of *Artocarpus*. [B, 121.]

CCARHUAS SUCHE, n. The *Plumeria lutea*. [B, 121.]

CEANOTHEÆ (Lat.), n. f. pl. Se(ke^2)-a^{2}n(a^{3}n)-oth'e^2-e(a^3-e^2). Fr., *céanothées*. Of Reichenbach, a division of the *Rhamneæ*, comprising *Ceanothus* and other genera. [B, 170.]

CEANOTHINE, n. Se-a^{2}n-o'then. Fr., *céanothine*. Ger., *Ceanothin*. An alkaloid, insoluble in water, partially soluble in alcohol and ether, found in the *Ceanothus reclinatus* (*Colubrina reclinata*). [B, 270.]

CEANOTHOS (Lat.), n. m. Se(ke^2)-a^{2}n(a^{3}n)-oth'o^{2}s. Gr., κεάνωθος. The *Cnicus arvensis*. [Theophrastus (B, 121, 200).]—**C. Theophrasti.** See *C.*

CEANOTHUS (Lat.), n. m. Se(ke^2)-a^{2}n(a^{3}n)-oth'u^{3}s(u^{4}s). 1. See CEANOTHOS. 2. Of Linnæus, a genus of rhamnaceous shrubs related to *Euonymus*. [B, 19, 121.]—**C. americanus** [Linnæus].

THE CEANOTHUS AMERICANUS. [A, 327.]

Fr., *thé de la Nouvelle Jersey*. Ger., *amerikanischer Seckelstrauch*. Red-root; New Jersey tea. A shrub two to four feet high with numerous small white flowers, growing throughout the United States and cultivated in Europe. The root imparts a red color to water, and has been used for dyeing wool. It contains 9 per cent. of tannin, and is said to be purgative and of service in syphilitic disorders. The leaves have been used as a substitute for tea, and recommended as a remedy in aphthæ, pharyngitis, and dysentery. [B, 5, 19, 180.]—**C. arborescens** [Miller]. The *Rhamnus colubrinus* (*Colubrina ferruginosa*). [B, 173.]—**C. asiaticus** [Linnæus]. The *Colubrina asiatica*. [B, 282.]—**C. azureus.** See *C. bicolor*.—**C. benghalensis** [De Candolle]. A species used in Senegal as a remedy for dysentery. [B, 173.]—**C. bicolor** [Willdenow], **C. cæruleus** [Linnæus]. Blue bush; a Mexican species; the bark is said to be febrifuge. [B, 173.]—**C. chloroxylon** [Nees]. Syn.: *Laurus chloroxylon* [Linnæus]. A species doubtfully referred to the genus *C.*, indigenous to Jamaica, where it is known as log-wood. [B, 275, 282.]—**C. colubrinus** [Lamarck]. The *Rhamnus colubrinus* (*Colubrina ferruginosa*). [B, 173, 275.]—**C. decolor** [Delile]. See *C. benghalensis*.—**C. corymbis folio longioribus.** See *C. americanus*.—**C. cuneatus** [Nuttall]. A Californian shrub with white flowers. The whole plant exhales a balsamic odor and the fruit when ripe is covered with a bitter varnish-like exudation. [B, 286.]—**C. decumbens.** A garden variety of the *C. americanus*. [B, 173.]—**C. integerrimus** [Hooker and Arnott]. A Californian species with glomerate white flowers; called beauty of the Sierras and Californian lilac. [B, 275, 286.]—**C. levis.** An old name for the currant (*Ribes*). [B, 89.]—**C. macrocarpa.** A garden variety of the *C. americanus*. [B, 173.]—**C. ovalis** [Bigelow], **C. ovatus** [Desfontaines]. A white-flowered shrub growing throughout the United States. [B, 81, 228, 286.]—**C. paniculatus.** The *Celastrus paniculata*. [B.]—**C. reclinatus** [L'Héritur]. See *C. colubrinus*.—**C. spinosus.** A Californian species, sometimes called red-wood (red-wood of Santa Barbara). [B, 275.]—**C. thyrsiflorus** [Eschscholtz]. Californian lilac; a small tree with bright blue flowers, indigenous to California. [B, 275, 286.]—**C. trinervis** [Mönch]. See *C. americanus*.—**Radix ceanothi.** The root of *C. americanus*. [B, 48.]—**Stipites ceanothi.** The stalks of *C. americanus*. [B, 180.]

CEANQUA (Otomé), n. The *Sonchus oleraceus* and the *Sonchus ciliatus*. [A, 447.]

CEASMA (Lat.), n. n. Se(ke^2)-a^{2}z(a^{3}s)'ma^3. Gen., *ceas'matos* (*-is*). Gr., κέασμα (from κεάζειν, to split). A splinter, a fragment. [Hippocrates (A, 325).]

CEBA, n. In Languedoc, the *Allium cepa*. [B, 88, 121.]

CEBADA (Sp.), n. Tha-ba^{3}d'a^3. Barley. [B, 284.]—**C. caballar.** The *Hordeum hexastichon*. [B, 284.]—**C. comun.** The *Hordeum vulgare*. [B, 284.]—**C. de seis hileras.** The *Hordeum hexastichon*. [B, 284.]—**C. ladilla.** The *Hordeum distichon*. [B, 284.]—**C. mondada.** Hulled barley. [A, 447.]—**C. negra.** The *Hordeum nigrum*. [B, 284.]—**C. perla, C. perlada.** See *Pearl* BARLEY.—**C. ramosa.** The *Hordeum hexastichon*. [B, 284.]

CEBADILLA (Sp.), n. Tha-ba^3-del'ya^3. Lit., little barley. 1. The so-called caustic barley or cevadilla. 2. The *Achillea ptarmica* and the *Buphthalmum spinosum*. 3. The *Asagræa officinalis* (*Schœnocaulon officinale*), also its seeds (the sabadilla of the Br. Ph.). [B, 19, 185, 275, 284.]

CEBAR (Ar.), n. The *Aloe vera*. [B, 121.]

CEBALE (Lat.), n. f. Se^{2}b(ke^{2}b)'a^{2}l(a^{3}l)-e(a). Gen., *ceb'ales*. Gr., κεβαλή (a dialectic form of κεφαλή). The head. [A, 322.]

CEBATA (Ar.), n. Fr., *cébath, cébathe*. The *Menispermum edule;* of Lamarck, a genus of plants referred to *Menispermum*. [B, 38, 88, 173.]—**C. sarmentosa** [Lamarck] (Lat.). The *Menispermum edule*. [B, 173.]

CEBATH (Ar.), **CEBATHA** (Ar.), n's. See CEBATA.

CEBER (Ar.), n. Aloes-wood. [L, 97.]

CEBI (Lat.), n. m. pl. Se(ka)'bi(be). An old name for the roasted liver of the common fowl. [A, 325.]

CEBIDÆ (Lat.), n. f. pl. Se^{2}b(kab)'i^{2}d-e(a^3-e^2). From κῆβος, a long-tailed monkey. Fr., *cébidiens, cébiens*. The *Cebians*, a family or section of the *Primates*, exclusive of man. [L, 41, 121.]

CEBINA (Lat.), n. n. pl. Se^{2}b(kab)-in(en)'-a^3. A tribe of the *Cebidæ*. [L, 272.]

CEBINÆ (Lat.), n. f. pl. Se^{2}b(kab)-in(en)'e(a^3-e^2). A subfamily of the *Cebidæ*. [L, 121.]

CEBIPIRA, n. Fr., *cébipira, cébipire*. Of Martius, the *Bowdichia major*, a tree of Brazil with bitter astringent bark, which has been used in fomentations for deafness, pains in the limbs, and affections of the kidneys and lumbar region. [B, 38, 46, 121, 200.]—**C. Brasiliensibus, C. guacu, C. miri.** See *C.*

CEBII [Goldfuss] (Lat.), n. m. pl. Se(ka)'bi^2-i(e). See CEBIDÆ.

CEBLE (Lat.), n. f. Se^{2}b(ke^{2}b)'le(la). Gr., κέβλη, κεβλή. See CEBALE.

CEBO, n. See CEBA.

CÉBOCÉPHALIE (Fr.), **CEBOCEPHALIE** (Ger.), n's. Sa-bo-sa-fa^{3}l-e, tsa-bo-tse^{2}f-a^{3}l-e'. The sort of monstrosity seen in a cebocephalus (*q. v.*). [L, 57.]

CÉBOCÉPHALIEN (Fr.), adj. Sa-bo-sa-fa^{3}l-e-a^{3}n^2. Having a head like that of an ape. [L, 41.]

CÉBOCÉPHALIQUE (Fr.), adj. Sa-bo-sa-fa^{3}l-ek. Pertaining to or resembling a cebocephalus. [L, 41.]

CEBOCEPHALUS (Lat.), n. m. Se^{2}b(kab)-o(o^2)-se^{2}f(ke^{2}f)'a^{2}l-(a^{3}l)-u^{3}s(u^{4}s). From κῆβος, a monkey, and κεφαλή, the head. Fr., *cébocéphale*. A monkey-headed monster; one with the eyes very close together, the nose being almost wanting and the anterior lobes of the brain sometimes malformed. [I. Geoffroy St.-Hilaire (A, 385; L, 87).]

CEBOLA (Port.), n. Sa-bol'a^3. The *Allium cepa*. [B, 88.]—**C. albarra.** The *Scilla maritima*. [B, 88.]

CEBOLLA (Sp.), n. Tha-bol'ya^3. The *Allium cepa*. [B, 284.]—**C. albarrana.** The *Scilla maritima*. [B, 284.]—**C. albarrana de México.** The *Pancratium illyricum*. [A, 447.]—**C. ascalonia.** The *Allium ascalonicum*. [B, 284.]—**C. de culebra, C. de globaria.** The *Asphodelus*. [B, 121.]

CEBOLLANA (Sp.), n. Tha-bol-ya^{3}n'a^3. The *Globularia alypum*. [B, 284.]

CEBOLLETA (Sp.), n. Tha-bol-yat'a^3. A species of *Oncidium*. [B, 121.]

CEBOLLINA (Sp.), n. Tha-bol-yen'a^3. The *Ixia bulbocodium*. [B, 121.]

CEBOLLINO (Sp.), n. Tha-bol-yen'o. The *Allium schœnoprasum*. [B, 284.]

CEBRIONIDÆ [Westwood] (Lat.), **CEBRIONIDES** (Lat.), n's f. pl. Se^{2}b(kab)-ri^2-o^{2}n'i^{2}d-e(a^3-e^2), -ez(e^{2}s). Fr., *cébrionides, cébrionites* [Cuvier]. A family of the *Coleoptera*. [L, 196.]

CEBU, n. The *Parameria vulneraria*.

CEBYPIRA, n. See CEBIPIRA.

CÉCAL (Fr.), adj. Sa-ka^{2}l. See CÆCAL.

CECHYNOS (Lat.), adj. Se^{2}k(ke^{2}ch^2)'i^{2}n(u^{6}n)-o^{2}s(os). Gr., κεχυνώς. Panting. [A, 325.]

CECIDIEN (Ger.), n. pl. Tsatz-i^{2}d'i^2-e^{2}n. Galls. [B, 270.]

O, no; **O^2**, not; **O^3**, whole; **Th**, thin; **Th^2**, the; **U**, like oo in too; **U^2**, blue; **U^3**, lull; **U^4**, full; **U^5**, urn; **U^6**, like ü (German).

CECIDODAPHNE [Nees] (Lat.), n. f. Se^{2}s(kak)″i^{2}d-o(o^2)-da^{2}f-(da^{3}f)′ne(na). Fr, *cécidodaphné.* See CINNAMOMUM.

CECIDOMIIDÆ (Lat.), **CECIDOMYIDÆ** [Westwood] (Lat.), n's f. pl. Se^{2}s(kak)″i^{2}d-o(o^2)-mi(mi^2)′i^{2}d-e(a^3-e^2), -mi(mu^6)′-i^{2}d-e(a^3-e^2). Fr., *cécidomytes.* A family of the *Diptera*, having the genus *Cecidomyia* as the type. [L, 121, 196.]

CÉCILIADÉS (Fr.), n. pl. Sa-sel-e-a^3-da. See CÆCILIADÆ.

CÉCILIES [De Blainville] (Fr.), n. pl. Sa-sel-e. See PSEUDOPHIDIA.

CÉCILOÏDE (Fr.), adj. Sa-sel-o-ed. Resembling the *Cœcilia*; as a n., in the pl., *c's*, see CÆCILIIDÆ. [L, 41.]

CÉCIRÈGLE (Fr.), n. Sa-se-re^{2}gl. A sort of ruler by which the blind are enabled to write. [L, 41.]

CECIS (Lat.), n. f. Se(ka)′si^{2}s(ki^{2}s). Gen., *cecid'os* (*-is*). Gr., κηκίς. A gall-nut, also ink or dye made from it. [B, 115.]

CÉCITÉ (Fr.), n. Sa-se-ta. From *cœcitas.* See BLINDNESS.—**C. des mots.** See *Word*-BLINDNESS (in Supplement).—**C. diurne.** See NYCTALOPIA.—**C. de neige.** See *Snow*-BLINDNESS.—**C. des couleurs.** See *Color*-BLINDNESS.—**C. mentale.** See *Mental*-BLINDNESS.—**C. nocturne.** See HEMERALOPIA.—**C. pour bleu.** See *Blue*-BLINDNESS.—**C. pour rouge.** See *Red*-BLINDNESS.—**C. pour vert.** See *Green*-BLINDNESS.—**C. psychique.** See *Mental* BLINDNESS.—**C. verbale.** See *Word*-BLINDNESS (in Supplement).

CECITY, n. Se′si^2-ti^2. From *cœcitas.* See BLINDNESS.

CECLISMENÆ (Lat.), n. f. pl. Se^{2}k(ke^{2}k)-li^{2}z(li^{2}s)′me^{2}n-e-(a^3-e^2). Of Sprengel, an order of the *Proteaceæ*, comprising *Protea* and numerous other genera and corresponding nearly to the series *Nucamentaceæ* of Bentham and Hooker. [B, 170.]

CECOMORPHÆ (Lat.), n. f. pl. Se^{2}k(ke^{2}k)-o(o^2)-mo^{2}rf′e-(a^3-e^2). The gulls; a family of the *Carinatæ.* [L, 121.]

CECROPIA (Lat.), n. f. Se^{2}k(ke^{2}k)-rop′i^2-a^3. Fr., *cécropie.* Of Linnæus, a genus of moraceous plants of the suborder *Coriocephaloideæ*, comprising numerous South American species. [Engler (B, 245).]—**C. ambaiba** [Lamarck]. Fr., *bois à feu.* The ambaiba of Brazil; a tree with edible fruit. [B, 173.]—**C. concolor** [Willdenow]. A Brazilian species, employed like *C. peltata.* [B, 180.]—**C. palmata** [Willdenow]. The *ambaitinga* of Pison; a South American tree closely related to *C. peltata* and having similar properties and uses. [B, 180, 245.]—**C. peltata** [Linnæus]. Fr., *bois-canon, bois trompette, figuier de Surinam.* The ambaiia or trumpet-tree of South America. The milky juice is mucilaginous and astringent, and is used for diarrhœa, mucous and bloody fluxes, corns, warts, wounds, and ulcers. The old bark is said to be astringent. The young buds are eaten. [B, 19, 173, 180, 245.]

CECROPIDÆ [Baird] (Lat.), n. f. pl. Se^{2}k(ke^{2}k)-ro^{2}p′i^{2}d-e(a^3-e^2). A family of the *Peltocephala.* [L, 303.]

CECROPIEÆ (Lat.), n. f. pl. Se^{2}k(ke^{2}k)-ro^{2}p-i(i^2)′e^2-e(a^3-e^2). Fr., *cécropiées.* Of Gaudichaud and Reichenbach, a division of urticaceous plants, comprising *Cecropia.* also, according to Reichenbach, *Urtica, Brosimum, Bœhmeria, Procris,* and *Galactodendron.* [B, 170.]

CECROPINÆ (Lat.), n. f. pl. Se^{2}k(ke^{2}k)-ro(ro^2)-pi(pe)′ne(na^3-e^2). See CECROPIDÆ.

CECRYPHALON (Lat.), **CECRYPHALOS** (Lat.), n's n. and m. Se^{2}k(ke^{2}k)-ri^{2}f(ru^{6}f)′a^{2}l(a^{3}l)-o^{2}n, -o^{2}s. Gr., κεκρύφαλος. Fr., *cécryphale.* See CRYPHALUM.

CÉCUM (Fr.), n. Sa-ku^{4}m. See CÆCUM.

CECUTIENCY, n. Se^{2}k-u^2′si^2-e^{2}n-si^2. Partial or incipient blindness. [L, 56.]

CEDACILLO (Sp.), n. Tha-da^3-thel′yo. Lit., a little sieve; the *Briza media.* [B, 121.]

CEDAR, n. Se′da^{3}r. Gr., κέδρος. Lat., *cedrus.* Fr., *cèdre.* Ger., *Ceder.* It., Sp., *cedro.* A name properly restricted to the genus *Cedrus*, but applied to various other trees, especially of the *Coniferæ.* [B, 19, 185.]—**Atlas c.** The *Cedrus atlantica.* [B, 185.]—**Australian c.** The *Melia australis.* [B, 275.]—**Barbadoes c.** The *Juniperus barbadensis.* [B, 19.]—**Bastard Barbadoes c.** The *Cedrela odorata.* [B, 19.]—**Bastard c.** The *Guazuma ulmifolia* (or *tomentosa*), also the *Cedrela.* [B, 19, 282.]—**Bastard c. of New South Wales.** The *Dysoxylon rufum.* [B, 275.]—**Bastard Guiana c.** The *Icica altissima.* [B, 275.]—**Bastard Jamaica c.** The *Guazuma tomentosa.* [B, 275.]—**Bastard West Indian c.** The *Guazuma ulmifolia.* [B, 275.]—**Bermuda c.** The *Juniperus bermudiana* (seu *barbadensis*). [B, 19, 282.]—**Berry-bearing c.** The *Cedrus baccifera.* [L, 116.]—**Brazilian c.** The *Cedrela brasiliensis.* [B, 185, 275.]—**British Columbia c.** See *California c.*—**Bussaco c.** The *Cupressus lusitanica*, var. *pendula.* [B, 275.]—**California c.** The *Thuja gigantea* (*Libocedrus decurrens*). [B, 275.]—**Canary Islands c.** The *Juniperus cedrus.* [B, 275.]—**C.-apple.** Lat., *fungus juniperi virginianæ.* Ger., *Cederapfel.* An excrescence produced on the bark of the *Juniperus virginiana* by the punctures made by the *Podisoma macropus.* It is bitter and has been used as a vermifuge. [B, 19, 180.]—**C. of Lebanon, C. of Libanus.** The *Cedrus Libani.* [B, 19.]—**C. of New South Wales.** The *Cedrela australis.* [B, 19.]—**C. resin.** The resin of *Cedrus Libani.* [B, 180.]—**C.-tree.** See *C.*—**C.-wood.** Lat., *lignum cedri* (seu *cedrium*). Ger., *Cedernholz.* The wood of the c.-tree (*Cedrus*) and of several other coniferous trees, including *Cedrela.* [B.]—**C.-wood of Guiana.** The wood of *Icica altissima.* [B, 185.]—**Chinese c.** The *Cedrela sinensis.* [B, 275.]—**Deodar c.** The *Cedrus deodara.* [B, 185.]—**Dominica c.** The *Bignonia* (*Tecoma*) *leucoxylon.* [B, 275.]—**Dwarf red c.** The *Juniperus virginiana*, var. *humilis.* [B, 275.]—**East Indian c.** The *Cedrela toona* and *Cedrus deodara.* [B, 275.]—**False c.** The *Cedrela odorata.* [B, 275.]—**Goa c.** The *Cupressus lusitanica.* [B, 19, 185.]—**Great c.-tree of Libanus.** The *Cedrus Libani.* [B, 200.]—**Guiana c., Guiana c.-wood.** The *Icica altissima.*—**Honduras c.** The *Cedrela odorata.* [B, 19.]—**Incense-c.** The genus *Libocedrus.* [B, 275.]—**Indian c.** The *Cedrus deodara* and the *Cedrela toona.* [B, 19, 185.]—**Jamaica c.** The *Cedrela odorata.* [B, 75, 185, 275.]—**Japan c.** The *Cryptomeria japonica.* [B, 19, 185.]—**Lebanon c.** The *Cedrus Libani.* [B, 275.]—**Mount Atlas c.** The *Cedrus atlantica.* [B, 19, 275.]—**Oil of c.** Gr., κέδριον. Lat., *cedrium.* Ger., *Cedernöl.* An oil extracted from the wood of *Cedrus Libani*; employed medicinally by the ancients. [B, 180.]—**Oil of red c.** A volatile oil derived from the *Juniperus virginiana.* It has an agreeable odor and is used in perfumery. It contains cedrene and cedrene camphor. [B, 5.]—**Pencil-wood c.** The *Juniperus bermudiana.* [B, 275.]—**Pink c.** The *Acrocarpus fraxinifolius.* [B, 172.]—**Prickly c.** The *Juniperus oxycedrus* and the *Cyathodes oxycedrus.* [B, 19, 275.]—**Port Oxford c.** The *Cupressus lawsoniana.* [B, 185, 275.]—**Queensland c.** The *Pentaceras australis.* [B, 185, 275.]—**Red California c.** The *Libocedrus decurrens.* [B, 275.]—**Red c.** The *Juniperus virginiana* and the *Acrocarpus fraxinifolius.* [B, 19, 172.]—**Red c. of Australia.** The *Cedrela australis.* [B, 19.]—**Russian c.** The *Pinus cembra.* [B, 275.]—**Sharp c.** The *Juniperus oxycedrus.* [B, 19.]—**Silvery c.** The *Cedrus atlantica.* [B, 275.]—**Silvery-leaved red c.** The *Juniperus virginiana*, var. *argentea.* [B, 275.]—**Singapore c.** The *Cedrela toona.* [B, 275.]—**Stinking c.** The *Torreya taxifolia.* [B, 19, 275.]—**Sweet-scented Barbadoes c.** The *Cedrela odorata.* [B, 19.]—**Van Dieman's Land c.** The *Cyathodes oxycedrus.* [B, 275.]—**Virginian c., Virginia red c.** The *Juniperus virginiana.* [B, 19, 185, 275.]—**Water c.** The genus *Chamœcyparis.* [B, 275.]—**Weeping red c.** The *Juniperus virginiana*, var. *pendula.* [B, 275.]—**West Indian c.** The *Cedrela odorata.* [B, 282.]—**White c.** The *Cedrela toona*, the *Chamœcyparis sphœroidea* (*Cupressus thujoides*), the *Libocedrus decurrens* (*Thuja gigantea*), and the *Thuja occidentalis.* [B, 19, 275.]—**White c. of Australia.** The *Melia australis.* [B, 19.]—**White c. of British Guiana.** The *Icica altissima.* [B, 19.]—**White c. of California.** The *Thuja gigantea.* [B, 185.]—**White c. of Dominica.** The *Bignonia* (*Tecoma*) *leucoxylon.* [B, 19.]—**White Oregon c.** The *Cupressus lawsoniana.* [B.]—**White-wood c.** The *Tecoma leucoxylon.* [B, 275.]—**Yellow c.** The *Thujopsis borealis* (*Chamœcyparis nutkaensis*). [B, 275.]

CEDAR SPRINGS, n. A place in Preble County, Ohio, where there are alkaline-saline springs (the "Washington," "Seidlitz," "Chalybeate," "Glycerin," "Ohio Bethesda," etc.—about a hundred in all within an area two miles square). [A, 363; L, 86.]

CEDER (Ger.), n. Tsad′e^{2}r. See CEDAR.—**Bermudische C.** The *Juniperus bermudiana.* [B, 180.]—**C'apfel.** See CEDAR *apple.*—**C'baum.** The *Cedrus.* [B, 180.]—**C. aus Lycien.** The *Juniperus lycia.* [L, 43.]—**C'eidrin.** The resin of *Cedrus Libani.* [B, 48.]—**C. fichte.** 1. The *Pinus cembra.* 2. The *Cedrus Libani.* [B, 48.]—**C'gummi.** Cedar resin. [B, 48.]—**C'manna.** See MANNA *cedrina.*—**C'nessenz.** Oil of citron. [B, 48.]—**C'nharz.** Cedar resin. [B, 180.]—**C'nholz.** See CEDAR-*wood.*—**C'nkampher.** See CEDRENE *camphor.*—**C'nöl.** See *Oil of* CEDAR.—**C'nwachholder.** The *Juniperus oxycedrus.* [B, 180.]—**C. von Barbados.** The *Juniperus barbadensis.* [B, 48.]—**C. von Jamaika.** The *Theobroma guazuma.* [B, 48.]—**C. vom Libanon.** The *Cedrus Libani.* [B, 180.]—**Höckrige C.** The *Thuja sphœroidalis.* [B, 48.]—**Lycische C.** The *Juniperus lycia.* [B, 48.]—**Nordamerikanische rothe C.** The *Juniperus virginiana.* [B, 48.]—**Nordamerikanische weisse C.** The *Chamœcyparis sphœroidea* (*Cupressus thujoides*). [B, 48.]—**Phönicische C.** The *Juniperus phœnicea.* [B, 48.]—**Rothe C.** The *Juniperus virginiana.* [B, 180.]—**Russische C.** The *Pinus cembra.* [B, 48.]—**Spanische C.** The *Juniperus oxycedrus.* [B, 48.]—**Virginische C.** The *Juniperus virginiana.* [B, 48.]—**Weisse C.** The *Tecoma leucoxylon.* [B, 180.]

CEDERBOOM (Dutch), n. At the Cape of Good Hope, the *Callitris juniperoides.* [B, 245.]

CEDERELATE (Lat.), n. f. Se^{2}d(ke^{2}d)-e^{2}r-e^{2}l′a^{2}t(a^{3}t)-e(a). See CEDRELATE.

CEDMA (Lat.), n. n. Se^{2}d(ke^{2}d)′ma^3. Gen., *ced'matos* (*-is*). Generally written in the pl., *cedmata.* Gr., κέδμα. An old term for rheumatoid pains, especially about the hips, also for aneurysm in the same locality and for bubo. [A, 322, 325.]

CEDMATODES (Lat.), adj. Se^{2}d(ke^{2}d)-ma^3-tod′ez(as). Gr., κεδματώδης (from κέδμα [see CEDMA], and εἶδος, resemblance). Resembling cedmata (see CEDMA). [A, 322.]

CEDMATOPHTHALMIA (Lat.), n. f. Se^{2}d(ke^{2}d)-ma^{2}t(ma^{3}t)-o^{2}f-tha^{2}l(tha^{3}l)′mi^2-a^3. From κέδμα (see CEDMA). and ὀφθαλμία, inflammation of the eyes. Ophthalmia due to rheumatism, gout, etc. [A, 322.]

CEDMATOSUS (Lat.), adj. Se^{2}d(ke^{2}d)-ma^{2}t(ma^{3}t)-os′u^{3}s(u^{4}s). See CEDMATODES.

CEDMON (Lat.), **CEDNON** (Lat.), n's n. Se^{2}d(ke^{2}d)′mo^{2}n, -no^{2}n. Old names for the *Tuber cibarium.* [B, 88, 121.]

CEDOARIA (Sp.), n. Tha-do-a^3′re-a^3. Zedoary. [B, 280.]

CEDRA (Lat.), n. f. Se(ka)′dra^3. The specific name of the citron (*Citrus medica*, var. *c.*). [B.]—**C'öl** (Ger.). See *Oil of* CITRON.

CEDRALATE (Lat.), n. f. Se^{2}d(ke^{2}d)-ra^{2}l(ra^{3}l)′a^{2}t(a^{3}t)-e(a). See CEDRELATE.

CEDRAT, n. Se^{2}d′ra^{2}t. Lat., *c., cedratum.* Fr., *cédrat.* Ger., *C.* The citron (fruit of the *Citrus medica*); also the citron-tree. [B, 19, 180.]—**C'baum** (Ger.). The *Citrus medica.* [B, 48.]—**C'öl** (Ger.). See *Oil of* CITRON.—**C'wasser** (Ger.). See *Aqua* CITRI.—**Oleum de c.** (Lat.). Oil of citron. [B, 180.]

CÉDRAT [Fr. Cod.] (Fr.), n. See CEDRAT.—**Alcoolat de c.** A preparation made by macerating 1 part of fresh citron-peel in 6

parts of alcohol for two days and then distilling off the alcohol on a water-bath. [B, 92 (*a*, 21).]—**Huile de c., Huile volatile de c.** [Fr. Cod.]. See *Oil of* CITRON.—**Oléosaccharure de c.** [Fr. Cod.]. A preparation made by grating off the yellow outer surface of a citron with pieces of sugar (10 grammes) and mixing all together in a mortar. [B, 113 (*a*, 21).]—**Petit c.** A variety of lemon-tree (*Citrus limomum*). [B, 173.]—**Teinture d'essence de c.** [Fr. Cod.]. A preparation made of 1 part of volatile oil of citron and 49 parts of alcohol (90 per cent.). [B, 113 (*a*, 21). Cf. *Spiritus* LIMONIS and *Alcoolat de c.*—**Zeste de c.** [Fr. Cod.]. The rind of the citron (fruit of *Citrus medica*). [B, 113.]

CÉDRATIER (Fr.), n. Sa-dra^2-ti^2-a. The citron (*Citrus medica vulgaris* [Risso]). [B, 173.]—**C. monstrueux.** A variety of the *Citrus medica* with tuberous fruits. [B, 173.]

CEDRATUM (Lat.), n. n. Se^{2}d(ke^{2}d)-rat(ra^{3}t)'u^{3}m(u^{4}m). See CEDRAT.—**Elæosaccharum cedrati.** See *Oleo-saccharure de* CÉDRAT.

CEDRATUS (Lat.), adj. Se^{2}d(ke^{2}d)-rat(ra^{3}t)'u^{3}s(u^{4}s). Treated with oil of cedar. [B, 48.]

CÈDRE (Fr.), n. Se^{2}dr. See CEDAR.—**C. acajou.** The *Cedrela odorata.* [B, 173; L.]—**C. américain.** The *Thuja occidentalis.* [B, 38.]—**C. blanc.** The *Icica altissima*, the *Chamæcyparis sphæroides*, and the *Thuja occidentalis.* [B, 38, 121, 173.]—**C. blanc des Antilles.** The *Tecoma leucoxylon.* [B, 173.]—**C. de Bousaco, C. de Busaco, C. de Goa.** The *Cupressus lusitanica* (var. *pendula*). [B, 173.]—**C. de la Barbade.** The *Cedrela odorata.* [B, 173.]—**C. de l'Atlas.** The *Cedrus atlantica.* [B, 121.]—**C. de la Caroline.** The *Juniperus virginiana.* [B, 38.]—**C. de la Jamaïque.** The *Guazuma ulmifolia.* [B, 121.]—**C. de la Martinique.** The *Cedrela odorata.* [B, 88, 173.]—**C. de la Nouvelle-Hollande.** The *Callitris spiralis.* [B, 88.]—**C. de Lycie.** The *Juniperus lycia.* [B, 121.]—**C. d'encens.** See *C. d'Espagne.*—**C. Déodar.** The *Cedrus deodara.*—**C. de Phénicie.** The *Juniperus lycia.* [B, 38.]—**C. des Antilles.** The *Swietenia mahogoni.* [B, 88, 173.]—**C. des Bermudes.** The *Juniperus bermudiana.* [B, 173.]—**C. de Sibérie.** The *Pinus cembra.* [B, 121.]—**C. d'Espagne.** The *Juniperus hispanica.* [B, 173.]—**C. de Virginie.** The *Juniperus virginiana.* [B, 173.]—**C. du Liban.** The *Cedrus Libani.* [B, 173.]—**C. mahogoni, C. mahogony.** The *Swietenia mahogoni.* [B, 38, 121.]—**C. piquant.** The *Juniperus oxycedrus.* [B, 19.]—**C. rouge.** The *Icica altissima*, the *Juniperus virginiana*, and the *Pinus cupressoides.* [B, 173.] Cf. *Red* CEDAR.—**C. rouge de Virginie.** The *Juniperus virginiana.* [B, 88.]—**C. thurifère.** The *Juniperus hispanica.* [B, 173.]—**Petit c.** The *Juniperus oxycedrus.* [B, 173.]

CÉDREL (Fr.), n. Sa-dre^{2}l. The genus *Cedrela.* [A, 301, 385.]—**C. odorant.** The *Cedrela odorata.* [B, 38.]

CEDRELA (Lat.), n. f. Se^{2}d(ke^{2}d)-re(ra)'la^4. From κέδρος, the cedar-tree. Fr., *cédrel, cédréla.* Of Linnæus, a genus of tropical cedrelaceous trees. [B, 19, 42.]—**C. australis.** Red cedar of Australia. [B, 19.]—**C. Brownii cedro autoris** [Loifl.]. The *C. odorata.* [B, 211.]—**C. febrifuga.** 1. Of Blume, a tree growing throughout the East Indies, where its bark—*cortex cedrelæ* (seu *cedrelæ febrifugæ*), the *suren* of the Malays—has been used as a substitute for cinchona. 2. Of Roxburgh, the *Soymida febrifuga.* [B, 180, 270.]—**C. foliis pinnatis** [Brown]. The *C. odorata.*—**C'holz** (Ger.). The wood of *C. odorata.* [B, 180.]—**C. odorata** [Linnæus]. Fr., *cailcedra, cèdre acajou* (ou *de la Martinique*, ou *de la Barbade*). Barbadoes bastard-cedar, sweet-scented Barbadoes cedar, Jamaica (or Honduras) cedar; a large tree of the West Indies and South America. The leaves and fresh bark have a very disagreeable odor. The reddish wood (*cailcedra wood*, the *acajou à planches* of the French) after a while acquires an agreeable odor. Both the bark and the wood (which has a bitter, nauseous taste) are used in intermittent fever. From the tree exudes a resin of agreeable odor (the *resina acajou* of Martius). [B, 180.]—**C'rinde** (Ger.). The bark of *C. febrifuga.*—**C. rosmarinus** [Loureiro]. Syn.: *Itea rosmarinus* [Römer and Schultes] (seu *rosmarinifolia* [Poiret]). A tree of Cochin-China having very fragrant flowers, which yield a volatile oil resembling oil of lavender. The flowers are said to be cephalic, nervine, deobstruent, and diuretic, and to be employed in catarrh and rheumatism. The species has been referred to *Bæckea*, constituting the *Bæckea cochinchinensis.* [B, 88, 173, 283.]—**C. toona** [Roxburgh], **C. tuna** [Flem.]. Indian mahogany, white cedar. A tree closely related to the *C. febrifuga* (with which by some it is identified), about sixty feet in height, growing in India, where the dense red wood is employed like mahogany. The flowers are used in dyeing red. The bark is highly astringent, and is employed as a substitute for cinchona in malarial and bilious fevers, diarrhœa, and dysentery, and externally as an application to ulcers. [B, 172, 173, 180.]—**Cortex cedrelæ, Cortex cedrelæ febrifugæ.** The bark of *C. febrifuga.* [B. 180.]—**Fieberwidrige C.** (Ger.). See *C. toona.*—**Wohlriechende C.** (Ger.). See *C. odorata.*

CEDRELACEÆ (Lat.), n. f. pl. Se^{2}d(ke^{2}d)-re^{2}l-a(a^3)'se^2(ke^2)-e(a^3-e^2). Fr., *cédrélacées.* Ger., *Cedrelaceen.* The cedrelads, or mahogany family. Of Jussieu, an order of the *Meliaceæ*; of Spach, a family of the *Ampelideæ*; of Lindley, an order of the *Rutales*; of Meisner, an order of the *Melioideæ*; of Endlicher, an order of the *Hesperides*, comprising the tribes *Cedreleæ* and *Swietenieæ* (*q. v.*), which by Bentham and Hooker are included in the *Meliaceæ.* [B, 19, 42, 170.]

CEDRELACEOUS, adj. Se^{2}d-re^{2}l-a'shu^{3}s. Resembling the *Cedrela*; of or pertaining to the *Cedrelaceæ.* [B.]

CEDRELADS, n. pl. Se^{2}d'rel-a^{2}dz. See CEDRELACEÆ.

CEDRELÆON (Lat.), **CEDRELÆUM** (Lat.), n's n. Se^{2}d(ke^{2}d)-re^{2}l-e'(a^3'e^2)-o^{2}n, -u^{3}m(u^{4}m). Gr., κεδρέλαιον. Fr., *cédréléon, huile de cade.* Ger., *Cederöl, Fichtenöl.* Oil of cedar (extracted from the the *Cedrus Libani* or from its fruit). [Pliny (B, 115); B, 200.]

CEDRELATE (Lat.), n. f. Se^{2}d(ke^{2}d)-re^{2}l'a^{2}t(a^{3}t)-e(a). Gr., κεδρελάτη. The cedar, a large fir, such as excels all other trees in size. [Pliny (B, 115); L, 104.]

CEDRELEACEÆ [G. Don] (Lat.), n. f. pl. Se^{2}d(ke^{2}d)-re^{2}l-e^2-a(a^3)'se^2(ke^2)-e(a^3-e^2). See CEDRELACEÆ.

CEDRELEÆ (Lat.), n. f. pl. Se^{2}d(ke^{2}d)-re^{2}l'e^2-e(a^3-e^2). Fr., *Cédrélées.* Ger., *Cedreleen.* 1. Of R. Brown, Lindley, and Dumortier, a family or order of plants, corresponding to the *Cedrelaceæ* (*q. v.*), and divided into the *C. genuinæ* and the *Swietenieæ*; by De Candolle made a tribe of the *Meliaceæ*, including *Cedrela, Swietenia, Chloroxylon, Flindersia, Carapa*; by other authors made coordinate with the *Meliaceæ.* 2. Of various authors, a tribe or suborder of the *C.* (1st def.) or the *Cedrelaceæ*, comprising those with free stamens and the radicle turned toward the umbilicus. By Bentham and Hooker the *C.* are made a tribe of the *Meliaceæ*, comprising *Cedrela, Chloroxylon*, and *Flindersia*, distinguished by the free stamens inserted outside the base of the disc, by the multiovulate loculi of the ovary, by the dehiscence of the capsule, which is septifragal from the apex or is loculicidal with the valves separating from the axis, and by the numerous seeds and the frequently pinnate leaves. [B, 19, 42, 170, 180.]—**C. genuinæ.** See *C.* (2d def.). [B, 180.]

CÉDRÉLÉON (Fr.), n. Sa-dra-la-on^2. See CEDRELÆON.

CEDRELEUM (Lat.), n. n. Se^{2}d(ke^{2}d)-re^{2}l-e(a)'u^{3}m(u^{4}m). See CEDRELÆON.

CEDRENE, n. Se^{2}d'ren. Fr., *cédrène.* Ger., *Cedren.* It., *c.* 1. A hydrocarbon, $C_{15}H_{24}$, contained in volatile oil of red cedar (*Juniperus virginiana*); a liquid of the sp. gr. of 0·984, boiling at 248° C. 2. In general, any terpene of the formula $C_{15}H_{24}$. The c's comprise the essential part of the oils of red cedar, cloves, rosewood, cubeb, cascarilla, and patchouli. [B. 5.]—**C. camphor.** Fr., *camphre de cédrène.* Ger., *Cedrenkampher, Cedernkampher.* A crystalline substance, $C_{15}H_{26}O = C_{15}H_{24} + H_2O$, which separates from the oil of red cedar upon cooling. [B, 5, 270.]

CÈDRES (Fr.), n. Se^{2}dr. A place in the province of Oran, where there are chalybeate springs. [L, 49.]

CEDRIA (Lat.), n. f. Se^{2}d(ke^{2}d)'ri^2-a^3. Gr., κεδρία. Fr., *cédrie.* 1. The oil or resin obtained from the cedar (*Cedrus Libani*); used by the ancients in embalming. [B, 38; Dioscorides (B. 115), B, 180.] Cf. CEDRELÆON, with which it appears to be identical. [B, 180.] 2. Tar. [B, 180.]—**C. terrestris.** Maltha. [B, 180.]

CÉDRIDES (Fr.), n. pl. Sa-dred. The fruit of *Juniperus oxycedrus.* [B, 121.]

CÉDRIE (Fr.), n. Sa-dre. See CEDRIA.

CEDRIN, n. Se^{2}d'ri^{2}n. Fr., *cédrine.* Ger., *C.* A neutral bitter principle occurring as silky acicular crystals, obtained from the seeds of *Simaba cedron* by extracting with alcohol the residue left after exhaustion with ether. According to Lewy, it is the active principle of the seeds; according to Tanret, it is identical with valdivin. [B, 270.]

CEDRIN, adj. Se^{2}d'ri^{2}n. See CEDRINUS.

CEDRINO (It.), n. Che^{2}d-ren'o. A variety of citron cultivated in Italy. [B, 19.]

CEDRINUM (Lat.), n. n. Se^{2}d(ke^{2}d)-rin(ren)'u^{3}m(u^{4}m). The *vinum c.*; wine impregnated with resin of cedar. [B, 200.] See CEDRITES.

CEDRINUS (Lat.), adj. Se^{2}d(ke^{2}d)-rin(ren)'u^{3}s(u^{4}s). Gr., κέδρινος. Made of cedar. [B, 115.] See LIGNUM *cedrinum*, OLEUM *cedrinum*, VINUM *cedrinum*, and CEDRINUM.

CEDRION (Lat.), n. n. Se^{2}d(ke^{2}d)'ri^2-o^{2}n. Gr., κέδριον. See CEDRIUM. [B, 180.]

CEDRIRET, n. Se^{2}d'ri^2-re^{2}t. Lat., *cedriretum.* Fr., *cédrirète.* Ger., *C.* From κέδριον (see CEDRIUM), and *rete*, a net. A peculiar principle obtained by distilling beech-tar: it crystallizes in red needles that are interlaced, whence the name. [A, 301, 385; B, 38, 120.]

CEDRIS (Lat.), n. f. Se^{2}d(ke^{2}d)'ri^{2}s. Gen., *ced'ridos* (-*is*). Gr., κεδρίς. 1. The cone of the cedar, regarded by Dioscorides as heating, emmenagogue, and useful in coughs and convulsions. 2. A juniper-berry. 3. A shrub resembling the cedar (probably a species of juniper). [B, 115, 200.]

CEDRITES (Lat.), n. m. Se^{2}d(ke^{2}d)rit(ret)'ez(as). Gr., κεδρίτης. Fr., *cédrite.* A wine (*cedrinum, vinum cedrinum*), flavored with cedar-resin; used anciently as a vermifuge. [B, 38, 115.]

CEDRIUM (Lat.), n. n. Se^{2}d(ke^{2}d)'ri^2-u^{3}m(u^{4}m). Gr., κέδριον. 1. According to some authorities, the same as cedrelæon, being a resinous substance obtained by incisions in the bark of the *Cedrus Libani* or the *Juniperus phœnicea.* [B, 121; Pliny (B, 115)]. According to others, a cedar oil (obtained from the wood of *Cedrus Libani*). [B, 180.] 2. Oil of citron. [B, 121.]

CEDRIUS (Lat.), adj. Se^{2}d(ke^{2}d)'ri^2-u^{3}s(u^{4}s). Of or pertaining to the cedar. [B.] See LIGNUM *cedrium.*

CEDRO (Lat.), n. m. indecl. Se^{2}d(ke^{2}d)'ro. It., Sp., *c.* The citron-tree, *Citrus medica.* As a Spanish word, in Mexico, also the *Cupressus Lindleyi* and the *Cupressus* (*Chamæcyparis*) *thurifera.* [B, 121, 200, 214.]—**C. blanco** (Sp.). The *Cupressus Benthamii.* [B, 214.]—**C. blanco del deserto** (Sp.). The *Cupressus Lindleyi.* [B, 214.]—**C. colorado** [Mex. Ph.] (Sp.). The *Cedrela odorata.* [A, 447.]—**Essentia de c., Oleum c., Oleum de c.** Oil of citron. [B, 180.]

CEDROBALSAM (Ger.), n. Tsad'ro-ba^{3}l-za^{3}m. The turpentine of the *Pinus cembra.* [B, 48, 270.]

CEDROBAUM (Ger.), n. Tsad'ro-ba^3-u^{4}m. The genus *Cedrela.* [B, 48.]

O, no; **O^2**, not; **O^3**, whole; **Th**, thin; **Th**, the; **U^2**, like oo in too; **U^2**, blue; **U^3**, lull; **U^4**, full; **U^5**, urn; **U^6**, like ü (German).

CEDROELEON (Lat.), n. n. Se^{2}d(ke^{2}d)-ro(ro^2)-e^{2}l-e(a)′o^{2}n. Fr., *cédroéléon*. See CEDRELÆON. [B, 121.]

CEDROMELON (Lat.), n. n. Se^{2}d(ke^{2}d)-ro(ro^2)-me(ma)′lo^{2}n. Gr., κεδρόμηλον. The citron. [B, 285.]

CEDRON, n. Se^{2}d′ro^{2}n. Gr., κέδρον. Lat., *c.*, *semen cedronis.* Fr., *cédron* [Fr. Cod.]. Ger., *C.* Sp., *c.* 1. In Lat., the fruit of the cedar. 2. The cotyledon of the *Simaba c.* [Planchon] (*Quassia c.* [H. Baillon]). [B, 115, 185.] 3. Of the Mex. Ph., the *Lippia citriodora.* [A, 447.]—**C'früchte** (Ger.), **C'nüsse** (Ger.). See *C.* (2d def.). —**C'öl** (Ger.). Oil of citron. [B, 48.]—**C'samen** (Ger.), **C. seeds, Semen cedronis** (Lat.). See *C.* (2d def.).

CÉDRON (Fr.), n. Sa-dron^2. See CEDRON (2d def.).—**Noix de c.** See *C.* [B, 121.]

CEDRONELLA (Lat.), n. f., dim. of *cedrus.* Se^{2}d(ke^{2}d)-ro^{2}n-e^{2}l′la^3. Fr., *cédronelle.* 1. Of the pharmacists, the *Melissa officinalis.* 2. Of Mönch, a genus of labiate plants of the tribe *Nepeteæ.* [B, 42, 215.]—**C. canariensis viscosa,** etc. [Comm.]. The *C. triphylla.* [B, 211.]—**C. mexicana** [Bentham]. Sp., *toronjil* [Mex. Ph.]. Syn.: *Dracocephalum mexicanum* [Humboldt, Bonpland, and Kunth], *Gardoquia betonicoides* [Lindley]. A species indigenous to Mexico and extending to the mountains of southern Arizona. Its flowering tops are used instead of *Melissa*, and contain an abundance of volatile oil. Employed as an antispasmodic. [B, 215, 224.]—**C. officinarum.** The *Melissa* (*Dracocephalum*) *moldavica.* [B, 109.]—**C. pallida** [Lindley]. Sp., *toronjil* [Mex. Ph.]. A species indigenous to Mexico and the Mexican frontier of the United States. Employed for the same purposes as *C. mexicana.* [B, 215, 224.]—**C. Rivini** [Rupp.]. The *Dracocephalum moldavica.* [B, 211.]—**C. triphylla** [Mönch]. Syn.: *Dracocephalum canariense* [Linnæus]. Balm of Gilead; a species, having leaves of a penetrating camphoraceous odor, indigenous to the Canaries and Madeiras. The leaves were formerly used under the name of *herba melissæ canariensis* as a nervine. [B, 173, 180, 215.]—**C. turcica.** The *Dracocephalum moldavica.* [B, 180.]—**Herba cedronellæ.** The herb of the *Melissa officinalis.* [B, 180.]

CEDRONINE, n. Se^{2}d′ro^{2}n-en. Fr., *cédronine.* Ger., *Cedronin.* An alkaloid found in cedron seeds. [B, 270.]

CEDROS (Lat.), n. f. Se^{2}d(ke^{2}d)′ro^{2}s. Gr., κέδρος. Of Hippocrates, the *Juniperus oxycedrus.* The κέδρος μεγάλη of Dioscorides was the *Cedrus Libani.* [B, 180.] Cf. CEDRUS.

CEDROSTIS (Lat.), n. f. Se^{2}d(ke^{2}d)-ro^{2}st(rost)′i^{2}s. Gen., *cedros′teos* (*-is*). Gr., κέδρωστις. Bryony (the *Bryonia alba*). [Dioscorides (B, 115).]

CEDROT, n. In Nice, the citron. [B, 121.]

CEDROTA [Willdenow] (Lat.), n. f. Se^{2}d(ke^{2}d)-rot′a^3. Fr., *cédrote.* See ANIBA.—**C. longifolia** [Willdenow]. See ANIBA *guianensis.*

CEDRULA (Lat.), n. f. Se^{2}d(ke^{2}d)′ru^4-la^3. An ancient name for the *Juniperus oxycedrus.* [B, 121.]

CEDRUS (Lat.), n. f. Se^{2}d(ke^{2}d)′ru^{3}s(ru^{4}s). Gr., κέδρος. Fr., *cèdre.* Ger., *Ceder.* It., Sp., *cedro.* 1. Of Tournefort, see JUNIPERUS. 2. Of Miller, a section of the genus *Cedrela.* 3. Of Loudon, the true cedars; a genus of coniferous trees, distinguished from *Larix* by their evergreen leaves, and from *Pinus* by the fact that both the long and the short offshoots of the branches are provided with true foliage-leaves (needles). [B, 42, 245.]—**C. africana** [Gordon], **C. argentea, C. atlantica** [Manetti]. A tree growing in the Atlas. The wood is used like that of *C. Libani*, of which by some it is regarded as a mere variety. [B, 245.]—**C. Barbadensium alatis fraxini foliis** [Plukenet]. The *Cedrela odorata.* [B, 211.]—**C. conifera** [Jons.]. The *C. Libani.* [B, 200.]—**C. conifera foliis laricis** [C. Bauhin, Ray]. The *C. Libani.* [B, 200.]—**C. deodara** [Loudon]. Syn.: *Abies* [Lindley] (seu *Pinus* [Parlatore] *deodara*).

THE CONES OF CEDRUS LIBANI. [A, 327.]

A tree growing in the Himalayas; the wood is used like that of *C. Libani*, which this tree much resembles; the *devadara, deodara,* or *dewar*, of the Hindoos. [B, 214, 245.]—**C. elegans** [Knight]. The *C. atlantica.* [B, 214.]—**C. folio cupressi major, fructu flavescente** [Bauhin]. The *Juniperus phœnicea* and the *Juniperus lycia.* [B, 211.]—**C. folio cupressi media, majoribus baccis** [Bauhin]. The *Juniperus lycia.* [B, 211.]—**C. hispanica procerior,** etc. [Tournefort]. The *Juniperus thurifera.* [B, 211.]—**C. indica** [De Chambre]. See *C. deodara.*—**C. Libani** [Barrel.], **C. Libani conifera** [J. Bauhin], **C. libanotica** [Link]. Gr., κέδρος μεγάλη [Dioscorides]. Fr., *cèdre du Liban.* Ger., *Ceder vom Libanon.* Syn.: *Pinus c.* [Linnæus], *Larix c.* [Miller], *Abies c.* Cedar of Lebanon, a lofty and very large tree formerly abundant about Lebanon, where it is still sparingly found (some specimens there being from 2,000 to 3,000 years old), and plentiful in the mountains of Cilicia. A fragrant resin or oil which exuded spontaneously or was obtained by incisions in the bark, and which was variously called *cedrelæon, cedria,* and *resina cedri,* was formerly employed in medicine and for embalming. An oil obtained from the wood was called *cedrium* (κέδριον), although, according to some authorities, this term was synonymous with cedria. The cones of the tree, called *cedris*, were also of medicinal application, and it was the oil obtained from them to which, according to some authors, the terms *cedrelæon* and *cedria* were applied. From the cones or other parts of the tree a medicinal wine (*cedrites, cedrinum, vinum cedrinum*) was prepared. [B, 115, 180, 200, 245.]—**C. lycia** [Lob.]. The *Thuja occidentalis.* [B, 211.]—**C. magna** [Pliny], **C. magna conifera** [J. Bauhin], **C. magna conifera Libani** [Parkinson]. See *C. Libani.*—**C. mahogoni** [Miller]. The *Swietenia mahogani.* [B, 173.]—**C. major.** See *C. Libani.*—**C. phœnicea** [Renealm.]. The *C. Libani.* [B, 211.]—**C. phœnicea altera Plinii et Theophrasti** [Lob.]. The *Juniperus lycia.* [B, 211.]—**Lignum cedri.** Cedar-wood; properly the wood of *C. Libani*; afterward applied to the wood of several coniferous trees, especially to that of species of juniper. [B, 180.]—**Resina cedri.** The resin of *C. Libani.* [B, 48, 180.] See CEDRELÆON and CEDRIA.

CEDUE, n. Of the alchemists, air. [Ruland (A, 325).]

CEIBA (Lat.), n. f. Se(ke^2)-i(e)′ba^3. Adopted from the Spanish name of the *Bombax c.* (*Eriodendron anfractuosum*). Fr., *céiba.* A genus of plants, made by Gärtner, now referred to *Eriodendron.* [B, 42, 280.]—**C. espinosa** (Sp.). See ERIODENDRON *leiantherum.* —**C. pentandrum** [Gärtner]. The *Bombax pentandrum* (*Eriodendron occidentale*). [B, 173.]—**C.-tree.** The *Eriodendron anfractuosum.* [B, 185, 275.]

CEIBEÆ (Lat.), n. f. pl. Se(ke^2)-i^{2}b(eb)′e^2-e(a^3-e^2). Fr., *céibées.* Of Reichenbach, a section of the *Eriodendreæ*, consisting of the genus *Bombax.* [B, 170.]

CEIBO (Sp.), **CEIBON** (Sp.), n's. Tha-e′bo, -bon. The *Eriodendron anfractuosum.* [A, 447.]

CEIGNANTE (Fr.), n. Se^{2}n-ya^{3}nt. The twelfth dorsal vertebra; so called because a belt is ordinarily worn at that level. [L, 41.]

CEIMENON (Lat.), n. n. Si′(ke^2′i^2)-me^{2}n-o^{2}n. Gr., κείμενον (from κεῖμεσθαι, to hang down, to settle). An old term for a urinary sediment and for urine set aside for examination, also for the uvula when relaxed. [A, 325.]

CEINBRAT (Fr.), n. Sa^{2}n^2-bra^3. The *Pinus cembra.* [B, 121.]

CEINTURE (Fr.), n. Sa^{2}n^2-tu^{6}r. Gr., ζώνη. Lat., *cingulum.* Ger., *Leibbinde, Gurt, Gürtel.* It., *cintola, cintura.* Sp., *cinturón.* 1. A waist-band, a girdle, a sash; a band of any material intended to support and press upon the lower part of the abdomen. 2. Zoster. [A, 301; E; L.]—**C. abdominale.** 1. An abdominal belt. 2. See *Pelvic* GIRDLE.—**C. bénie.** See *Talismanic* BELT.—**C. claviculaire.** See *Shoulder* GIRDLE.—**C. coxale.** The bony pelvis. [L, 153.]—**C. dartreuse.** See *C.* (2d def.)—**C. de chasteté.** A belt with an attachment covering the genitals; formerly applied to women to prevent coitus and to children to prevent masturbation. [L, 41.]—**C. de Hilden, C. de Hildane** [L, 45]. See CINGULUM *Hildani.*—**C. de la Saint-Jean.** The *Artemisia vulgaris.* [B, 173.]—**C. de mercure.** See CINGULUM *mercuriale.*—**C. de Neptune.** The *Laminaria saccharina.* [B, 173.]—**C. de sagesse.** See *C. de mercure.*—**C. de Saint-François.** See *Talismanic* BELT.—**C. des femmes enceintes.** An abdominal belt for pregnant women. [L, 87.]—**C. de vif argent.** See CINGULUM *mercuriale.*—**C. érysipélateuse.** See ZOSTER.—**C. eutocique.** An abdominal bandage for pregnant women, for facilitating parturition. One invented by Pinard, broad in front and narrow behind, is used for the purpose of making such pressure as to prevent a transverse presentation of the fœtus. [A, 15.]—**C. hypogastrique.** See *Hypogastric* BELT.—**C. orthopédique.** A girdle or brace for the correction of curvature of the spine. [L, 49.]—**C. pelvienne.** 1. The brim of the pelvis. 2. See *Pelvic* GIRDLE.—**C. scapulaire.** See *Pectoral* GIRDLE.—**C. ventrale, C. ventrière.** An abdominal belt. [L, 41, 87.]

CEINTURÉ (Fr.), adj. Sa^{2}n^2-tu^{6}r-a. Girdled; in zoology, having the centre of the body of a different color from the rest. [L, 180.]

CEINTURON (Fr.), n. Sa^{2}n^2-tu^{6}r-on^2. See CEINTURE.

CEINTURONNÉ (Fr.), adj. Sa^{2}n^2-tu^{6}r-on-a. See CEINTURÉ.

CEIRIA (Lat.), n. f. Si′(ke^2′i^2)-ri^2-a^3. Gr., κειρία. An old term for a bandage or swathing-cloth, also for a tape-worm. [A, 325, 387.]

CEKE, n. The^{2}k′e^2. In Fiji, elephantiasis of the scrotum. ["Lancet," Apr. 6, 1889, p. 679 (*a*, 21).]

CELANDINE, n. Se^{2}l′a^{2}n-din. Lat., *chelidonium* [U. S. Ph.]. Fr., *célandine, chélidoine.* Ger., *Gelbkraut, Goldwurz.* It., *chelidonia.* Sp., *celidonia.* The *Bocconia frutescens.* [B, 282.]—**Brave c.** The *Caltha palustris.* [L, 73.]—**C. poppy.** The *Stylophorum diphyllum.* [B, 19, 275.]—**Common c., Great c., Greater c.** See *C.*—**Japanese c.** The *Chelidonium japonicum* (*C. grandiflorum*). [B, 275.]—**Lesser c., Small c.** The *Ranunculus ficaria.* [B, 275.]—**Tree-c.** The *Bocconia frutescens.* [B, 19.]

CÉLANDINE (Fr.), n. Sa-la^{3}n-den. See CELANDINE.—**Grande c.** The *Sanguinaria canadensis.* [B, 173.]

CELAPA, n. Of C. Bauhin, the plant furnishing jalap. [B, 121.]

CELAPE, n. Of the writers of the Renaissance, jalap. [B, 121.]

CELASTER (Ger.), n. Tse^{2}l-a^{3}st'e^{2}r. The genus *Celastrus.* [B, 180.]—**C'baum.** See *C.*—**Kletternder C.** The *Celastrus scandens.* [L, 80.]

CELASTIN, n. Se^{2}l-a^{2}st'i^{2}n. Fr., *célastine.* Ger., *C.* A non-nitrogenous bitter principle, chemically identical with menyanthin, found in the leaves of the *Celastrus obscurus.* [B, 5.]

CELASTRACEÆ (Lat.), n. f. pl. Se^{2}l(kal)-a^{2}s(a^{3}s)-tra(tra^3)'-se^2(ke^2)-e(a^3-e^2). Fr., *célastracées.* Ger., *Celastraceen.* Of Lindley, an order of the rhamnal alliance, comprising the tribes *Euonymeæ* and *Elæodendreæ;* of Torrey and Gray, an order of dicotyledons, comprising the tribes *Staphyleeæ* and *Euonymeæ.* [B, 19, 34, 170.] See CELASTRINEÆ and CELASTREÆ.

CELASTRACEOUS, adj. Se^{2}l-a^{2}s-tra'shu^{3}s. Lat., *celastraceus.* Fr., *célastracé.* Of or resembling the *Celastrus;* of or pertaining to the *Celastraceæ* (*Celastrineæ*). [B.]

CELASTRALES (Lat.), n. f. pl. Se^{2}l(kal)-a^{2}s(a^{3}s)-tral(tra^{3}l)'-ez(e^{2}s). Of Bentham and Hooker, a cohort of the *Disciflorœ,* comprising the orders *Celastrineæ, Stackhousieæ, Rhamneæ,* and *Ampelideæ.* It is especially marked by its erect ovules with ventral rhaphe, the other characteristics being the simple leaves (except in the *Ampelideæ*), and the hermaphrodite flowers, which have a pulvinar disc or one adnate to the calyx, or sheathing the base of the calyx, stamens disposed about the disc or inserted upon its border, and a gynœcium generally entire and having one or two ovules in each loculus. [B, 42.]

CÉLASTRE (Fr.), n. Sal-a^{2}str. See CELASTRUS.

CELASTREÆ (Lat.), n. f. pl. Se^{2}l(kal)-a^{2}s(a^{3}s)'tre^2-e(a^3-e^2). Fr., *célastrées.* Ger., *Celastreen.* 1. Of Reichenbach, a division of the *Theaceæ,* comprising *Euonymus, Celastrus, Maytenus, Alzatea, Elæodendron,* etc., and thus corresponding in general to the order *Celastraceæ* of other botanists and to the tribe *C.* of Bentham and Hooker. Reichenbach subsequently divided the *C.* into the *Euonymeæ, Alzateæ,* and *Ochrantheæ* (1837), and again (1841) into the *Euonymeæ, Dulongieæ,* and *Elæodendreæ.* Bentham and Hooker designate as *C.* a tribe of the *Celastrineæ* comprising thirty-five genera, with four or five (very rarely ten) stamens inserted on or below the margin of the disc, and having subulate often incurved filaments and albuminous seeds. It corresponds to the entire order *Celastrineæ* (*Celastrinæ, Celastraceæ*) of many authors, and comprises the subtribes *Euonymeæ,* in which the leaves are opposite, *Celastreæ,* in which the leaves are alternate and the fruit dehiscent, and *Elæodendreæ,* in which the leaves are generally alternate and the fruit is indehiscent. 2. Of Bentham and Hooker, also a subtribe of the *C.* (1st def.), comprising *Celastrus, Maytenus,* etc. [B, 42, 170.]

CELASTRIN [Wayne], n. Se^{2}l-a^{2}s'tri^{2}n. Fr., *célastrine.* Ger., *C.* A principle found in *Celastrus scandens,* forming minute white crystals. [A, 308.] Cf. CELASTIN.

CELASTRINÆ [R. Brown], **CELASTRINEÆ** [De Candolle]. Se^{2}l(kal)-a^{2}s(a^{3}s)-trin(tren)'e(a^3-e^2), -e^2-e(a^3-e^2). Fr., *célastrinées.* Ger., *Celastrineen.* Syn.: *Celastreæ, Celastraceæ, Spindle-trees.* An order of polypetalous dicotyledons, placed by Bentham and Hooker in the series *Disciflorœ* and cohort *Celastrales.* By De Candolle it was divided into the tribes *Staphylœaceæ, Euonymeæ,* and *Aquifoliaceæ;* by G. Don into the *Staphyleaceæ, Euonymeæ,* and *Cassinieæ.* The *Staphyleaceæ* have since been referred to the *Sapindaceæ,* and the *Aquifoliaceæ* have been made a distinct order (see ILICINEÆ). The order as thus limited corresponds to the tribe *Celastreæ* of Bentham and Hooker, and was divided by Lindley and others into the *Euonymeæ* and the *Elæodendreæ.* Cf. CELASTREÆ (1st def.). Bentham and Hooker include in the order the tribe *Hippocrateæ,* comprising *Hippocratea* and three other genera. As thus constituted, it comprises trees or shrubs with opposite or alternate, often coriaceous, simple leaves, exstipulate or possessing only minute and caducous stipules; hermaphrodite flowers in cymose inflorescence, having a four-lobed or five-lobed imbricated, persistent calyx with spreading petals inserted beneath the margin of the usually conspicuous disc, three to five (very rarely two or ten) stamens, with short subulate filaments and short bilocular anthers, inserted upon the disc alternately with the petals, a sessile ovary with one to five loculi, each containing two anatropous, erect ovules with a ventral rhaphe, a short style generally entire, and a simple or lobed stigma. The fruit is capsular, baccate, or samaroid, containing erect, often arillate seeds, exalbuminous or with fleshy albumen. It comprises thirty-nine genera and about four hundred species. [B, 42, 170.]

CELASTRINEOUS, adj. Se^{2}l-a^{2}s-tri^{2}n'e^2-u^{3}s. Lat., *celastrineus, celastrinus.* Fr., *celastriné.* It., *celastrineo.* Resembling *Celastrus;* of or pertaining to the *Celastrineæ.* [B.]

CELASTROIDEÆ (Lat.), n. f. pl. Se^{2}l(kal)-a^{2}s(a^{3}s)-tro(tro^2)-i^{2}d(ed)'e^2-e(a^3-e^2). Fr., *célastroïdées.* Ger., *Celastroïdeen.* Of Brongniart, a class of the *Dialypetalæ hypogynæ,* comprising the families *Viniferæ, Hippocrateaceæ, Celastrineæ, Staphyleaceæ,* and *Pittosporeæ.* [B, 170.] Cf. CELASTRALES.

CELASTRUS (Lat.), n. m. (sometimes treated as f.). Se^{2}l(kal)-a^{2}s(a^{3}s)'tru^{3}s(tru^{4}s). Gr., *κήλαστρος.* Fr., *célastre.* Ger., *Celaster.* It., *celastro.* Of Linnæus, the staff-tree; a genus of celastraceous shrubs and small trees of the tribe and subtribe *Celastreæ,* in which it is distinguished by its racemose or paniculate flowers, its free ovary with two erect ovules in each loculus, by its exalate capsular fruit, and by its arillate seeds. [B, 42.]—**C. buxifolius** [Linnæus]. Syn.: *Catha buxifolia* (et *venenata*) [Presl]. A species with numerous varieties, growing at the Cape of Good Hope. One variety, armed with strong poisonous spines, a wound from which causes violent inflammation, is the *C. venenatus* [Eckl. and Zeyl.]. [B, 180, 263.]—**C. coriaceus** [Guillemin and Perottet]. The *C. senegalensis.* [B, 250.]—**C. decolor** [Delile]. See *C. senegalensis.*—**C. edulis.** 1. Of Vahl, the *Catha edulis.* 2. Of Hochstetter, the *C. obscurus.* [B, 180, 250.]—**C. ellipticus** [Thunberg]. The *kamassie-hout* of the Cape Colony; an erect spiny shrub of South Africa. [B, 263.]—**C. inermis,** etc. Of Gronovius, the *Ceanothus americanus.* [B, 211.]—**C. macrocarpa, C. macrocarpus** [Ruíz and Pavón]. Syn.: *Hœnkea multiflora* [Ruíz and Pavón]. An erect Peruvian shrub with edible buds. From the seeds is obtained an oil useful for various purposes. [B, 121, 180.]—**C'manna** (Ger.). See MANNA *celastrina.*—**C. maytenus** [Willdenow]. The *Maytenus chilensis.* [B, 214.]—**C. montanus** [Roxburgh]. See *C. senegalensis.*—**C. nutans.** See *C. paniculatus.*—**C. obovatus** [Hochstetter]. See *C. senegalensis.* [B, 250.]—**C. obscurus** [A. Richard]. An Abyssinian species; the leaves, called *add add,* are employed for the cure of a malarial disease called *kolla.* They contain tannin, a volatile oil, and *celastin.* [B, 5, 270.]—**C. orixa** [Siebold and Zuccarini]. Syn.: *Orixa japonica* [Thunberg]. A Japanese species used medicinally. [B, 42, 121, 283.]—**C. paniculata, C. paniculatus** [Willdenow]. A climbing shrub of India and South America. The seeds contain a resinous principle and have a hot pungent taste. The crushed seeds furnish, by distillation with benzoin, cloves, nutmegs, and mace, an empyreumatic oil (*oleum nigrum*) which is said to be acrid, tonic, stimulating, diaphoretic, and aphrodisiac, and is used internally for rheumatism, gout, paralysis, beri-beri, and leprosy; but it is chiefly used in veterinary practice. [A, 479; B, 19, 121, 172.]—**C. parviflorus** [Vahl]. Syn.: *Catha spinosa* [Forskål]. An Arabian species. [B, 174, 214.]—**C. phyllacanthus** [L'Héritier]. See *C. senegalensis.*—**C. scandens** [Linnæus]. Fr., *bourreau des arbres.* Ger., *kletternder Celaster.* Syn.: *Euonymus* (seu *Euonymoides*) *scandens* [Mönch]. A climbing shrub of North America, where it

THE CELASTRUS SCANDENS. [A, 327.]

is called false bitter-sweet, wax-work, fever-twig, and climbing staff-tree. The bark, especially that of the root, is emetic, cathartic, and diaphoretic, and is employed in hepatic affections and secondary syphilis. The seeds are said to be narcotic and stimulating. [B, 5, 19, 180.]—**C. senegalensis** [Lamarck]. An African species, called *snatt, deck,* and *gheuondeck.* Its root is purgative and somewhat bitter and astringent, and with the bark is used in the treatment of chronic diarrhœa and dysentery. [B, 46, 180.]—**C. serratulus** [R. Brown], **C. serratus** [Hochstetter]. See *C. obscurus.*—**C. Theophrasti** [Clusius]. The *Cassine capensis.* [B, 211.]—**C. uncinatus** [Ruíz and Pavón]. The *Maytenus chilensis.* [B, 214.]—**C. undatus** [Thunberg]. The *koko* of the Hottentots; an erect shrub of South Africa. [B, 263.]—**C. undulatus** [Lamarck]. The *Senacia undulata* (*Pittosporum senacia*). [B, 173, 192.]—**C. venenata** [Eckl. and Zeyl.], **C. venenatus.** Syn.: *Catha venenata* [Presl]. See under *C. buxifolius.*—**C. verticillatus.** 1. Of Ruíz and Pavón, the *Maytenus verticillatus.* 2. Of Roxburgh, a species now referred to *Pittosporum.* [B, 212, 214.]

CELATION, n. Se^{2}l-a'shu^{3}n. Lat., *celatio* (from *celare,* to conceal). Fr., *célation.* Ger., *Verheimlichung.* It., *celamento.* Sp., *celación.* In forensic medicine, the concealment of pregnancy, parturition, or a disease. [A, 301.]

CELATOMIA (Lat.), n. f. Se^{2}l(kal)-a^{2}t(a^{3}t)-om(o^{2}m)'i^2-a^3. See KELOTOMY.

CELATUS (Lat.), adj. Se^{2}l(kal)-a(a^3)'tu^{3}s(tu^{4}s). 1. Stagnant (said of air). [A, 325; B, 200.] 2. Concealed. [L, 341.]

CELAURITIS, n. Fr., *céalurite.* Golden litharge. [B, 88.]

CELE (Lat.), n. f. Sel(kal)'e(a). Gen., *cel'es.* Gr., *κήλη.* Fr., *céle.* A swelling, especially one due to a hernia. [A, 325.]

CELEFOLI [Paracelsus], n. A pretended mucilaginous substance derived from the stars. [A, 325.]

CELEINÆ (Lat.), n. f. pl. Se^{2}l(ke^{2}l)-e^2-i(e)'ne(na^3-e^2). From *κελεός,* a woodpecker. Fr., *céléinées.* A subfamily of the *Picidæ.* ["Proc. of the Zool. Soc.," 1841, p. 31 (L).]

CELEOMORPHÆ (Lat.), n. f. pl. Se^{2}l(ke^{2}l)-e^2-o(o^2)-mo^{2}rf'e-(a^3-e^2). From *κελεός,* a woodpecker, and *μορφή,* shape. A family of the *Carinatæ.* [L, 121.]

CÉLERI (Fr.), n. Sal-e^{2}r-e. See CELERY.—**C. des marais.** The *Apium graveolens.* [A, 301.]—**C. rave.** The *Apium rapaceum.* [B, 121.] See CELERIAC.

CELERIAC, n. Se^{2}l-e′ri^{2}-a^{2}k. Fr., *céleri rave.* A cultivated variety of celery (*Apium graveolens*, var., *rapaceum*, the *Apium rapaceum*) called turnip-rooted celery, much grown in France and Germany. [B, 19.]

CELERIGRADA [De Blainville] (Lat.), n. n. pl. Se^{2}l(ke^{2}l)-e^{2}r-i^{2}g′ra^{2}d(ra^{3}d)-a^{3}. From *celer*, swift, and *gradi*, to step. Fr., *célérigrades.* An order of the *Mammalia* comprising the rodents. [L, 180.]

CELERIMETRUM (Lat.), n. n. Se^{2}l(ke^{2}l)-e^{2}r-i^{2}-me^{2}t′ru^{3}m-(ru^{4}m). From *celer*, swift, and μέτρον, a measure. See TACHOMETER.

CELERY, n. Se^{2}l′e^{2}r-i^{2}. Fr., *céleri, sellerie.* Ger., *Sellerie, Eppich.* It., *appio.* Sp., *apio.* The *Apium graveolens.* [B, 19.]—**Australian c.** The *Apium prostratum.* [B, 275.]—**C.-leaved, C.-topped.** Having leaves like the *Apium.* [B.] See *C.-leaved* PINE.—**Common c.** See *C.*—**New Zealand c.** The *Apium australe.* [B, 275.]—**Turnip-rooted c.** See CELERIAC.—**Water-c.** The *Ranunculus sceleratus.* [B, 275.]

CÉLESTINE (Fr.), n. Sal-e^{2}st-en. 1. The *Ageratum cœruleum.* [B, 121.] 2. Native strontium sulphate. [A, 385.]

CELETA (Lat.), **CELETES** (Lat.), n's n. Se^{2}l(kal)-et(at)′a^{3}, -ez(as). Gr., κηλήτης. A person affected with hernia. [A, 322.]

CELI, n. See KAYLA.

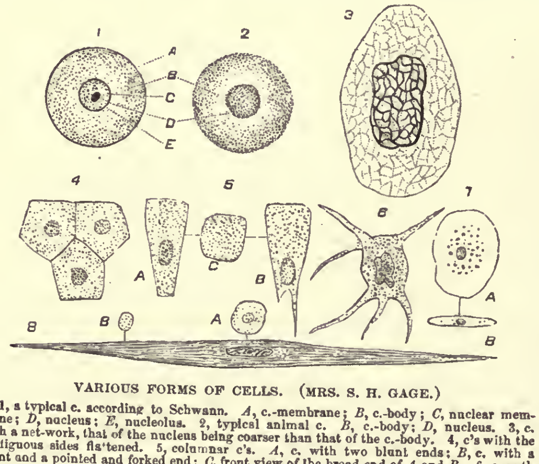
CELIA (Lat.), n. f. Sel(kal)′i^{2}-a^{3}. Fr., *célie.* Of Pliny, a kind of beer made by the Spaniards. [L, 86.]

CELIAC, CÉLIAQUE (Fr.), adj's. Sel′i^{2}-a^{2}k, sal-i^{2}-a^{3}k. See CŒLIAC.

CELIDIEÆ (Lat.), n. f. pl. Se^{2}l(ke^{2}l)-i^{2}d-i(i^{2})′e^{2}-e(a^{3}-e^{2}). Fr., *célidées.* Of Massalongo, a tribe of lichens. [B, 170.]

CELIDONIA (Sp.), n. The^{2}l-i^{2}-don′i^{2}-a^{3}. The *Chelidonium majus.* [B, 280.]—**C. del país.** The *Euphorbia maculata.* [A, 447.]—**C. europea, C. mayor.** See *C.*

CELIDONY, n. Se^{2}l′i^{2}-don-i^{2}. See CELANDINE.



CÉLIE (Fr.), n. Sal-e. 1. Any cavity of the body, especially the abdomen. [L, 109.] 2. See CELIA.

CELIFOLI, n. See CŒLIFOLIUM. [B, 200.]

CÉLINE (Fr.), n. Sal-en. The *Melissa officinalis.* [B, 121.]

CELIS (Lat.), n. f. Se(ka)′li^{2}s(les). Gen., *celid′os* (*-is*). Gr., κηλίς. A spot or mark upon the skin. [L, 94.]

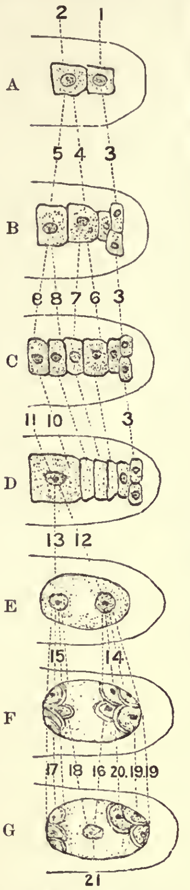
CELL, n. Se^{2}l. From Lat., *cella*, a chamber. Gr., κύτος. Lat., *cellula* (dim. of *cella*). Fr., *cellule.* Ger., *Zelle.* It., *cellula.* Sp., *célula, celdilla.* 1. Primarily, a cavity or inclosed hollow space; an areola or loculus; in this sense, comprising the following subordinate meanings: (*A*), any small completely closed space, such as the air-spaces of cork (in describing which the term c. was first employed, being used by Hooke in 1665), the small cavities in the mastoid and other bones, the alveoli of the lungs, the cleft-like spaces or areolæ of connective tissue, and, in botany, the cavity or loculus of the ovary, containing the ovules. (*B*), a cavity opening upon a free surface, such as the crypts in the stomach of the camel and other ruminants, the cavities in the nests of wasps and bees, the depression or loculus in the anther, which contains the pollen, and, by a slight extension of meaning, the spaces or areolæ upon the wings of insects, circumscribed by the nervures. (*C*), in microscopical technology, a chamber, open or closed, used for the examination and preservation of objects. (*D*), one of the similar elements or open chambers which constitute a galvanic battery or a battery of Leyden jars. 2. The elementary structure, anatomical unit, anatomical (morphological or structural) element, of which all animal and vegetable substances are constituted or from which they develop; so called because originally regarded as made up of

VARIOUS FORMS OF CELLS. (MRS. S. H. GAGE.)

1, a typical c. according to Schwann. *A*, c.-membrane; *B*, c.-body; *C*, nuclear membrane; *D*, nucleus; *E*, nucleolus. 2, typical animal c. *B*, c.-body; *D*, nucleus. 3, c. with a net-work, that of the nucleus being coarser than that of the c.-body. 4, c's with the contiguous sides flattened. 5, columnar c's. *A*, c. with two blunt ends; *B*, c. with a blunt and a pointed and forked end; *C*, front view of the broad end of *A* and *B*. 6, c. with numerous projections (stellate c.). 7, plate or scale like c. *A*, face-view and *B*, edge-view. 8, a greatly elongated c., often described as a fibre. *A*, section through the nucleus; B, section near the end.

a closed membrane surrounding a cavity. In this sense a c. is a minute, usually microscopic, mass of organized matter with a more or less distinct form and function. In the lowest animals and plants (*Protozoa, Schizomycetes, Chroococcaceæ*) the whole organism is represented by a single c., but in the higher plants and in the *Metazoa* the body is made up of a combination of c's and of their products, consisting of various forms of intercellular or ground substance. A typical c., according to Schwann, who in 1839 elaborated the c.-theory as it now exists [J, 36, 37], consists of an inclosing wall (c.-wall, c.-membrane) and the inclosed contents (c.-body) containing within its substance a distinct body, the nucleus, which is also surrounded by a membrane (nuclear membrane) and which itself incloses a still smaller body, the nucleolus. The mature ovarian ovum and many plant-c's correspond closely to this form of typical c. (See Fig. 1.) As now considered, a typical c. is rounded in form and presents only a c.-body and a nucleus, both of which are formed of protoplasm, that of the nucleus differing somewhat in physical or chemical composition from that of the c.-body, and, according to most cytologists, performing the initial and perhaps the most important part in c.-division. [Whitman, "Journ. of Morph.," ii (1888), pp. 27–49 (J).] (See Fig. 2.) The cellular protoplasm was formerly supposed to be homogeneous or of slightly granular character, but it is now generally believed that the substance of both c.-body and nucleus is composed of two parts—a more solid portion arranged in the form of a convoluted thread or a network which is nearly always coarser in the nucleus than in the c.-body, and a more liquid, hyaline portion filling the meshes of the network. [J, 15, 26, 30, 32, 58, 64.] (See Fig. 3.) In the higher animals and plants but few of the c's retain their typical character, most of them becoming modified in shape and structure in order to adjust themselves to their surroundings and to perform the various special functions necessitated by the physiological division of labor. (See Figs. 4 to 8.) On the one hand, all the constituents of the typical c. of Schwann may be present; on the other, the nucleus itself may disappear, leaving only the c.-body. Various non-protoplasmic substances, such as fat, pigment, or glycogen, may be present, or the whole c. may be partially or entirely changed to horn, etc. The size of c's in the higher plants and animals generally ranges from 5 μ to 150 μ, although, in some of the lower plants, c's of a length of 50 mm. (2 inches) are known, and some unicellular organisms have a size of less than 1 μ. C's have been variously named from the tissue or organ of which they form a part, from the layer of the embryo from which they spring, from their form, size, and other physical properties, and from their function. [B; J.]—**Acid c.** A c. secreting an acid. [J.] See *Delomorphous c.*—**Adelomorphous c.** Fr., *cellule adelomorphe* (ou *principale*). Ger., *Hauptzelle.* Syn.: *central c., chief c., peptic c., principal c.* One of the transparent epithelial c's forming the greater part of the lining of the glands of the stomach, especially those of the pyloric region. They are supposed to secrete the pepsinogen. [J, 18, 30.] Cf. *Delomorphous c.*—**Adhesive c.** A c. on the surface of some polyps, which serves to catch objects by sticking to them. [J, 32.]—**Adipose c.** See *Fat-c.*—**Adjuvant c.** See SYNERGIDA.—**Adventitial c.** Ger., *Adventitialzelle.* 1. One of the branched c's forming most of the perithelium or adventitia capillaris. 2. One of the flat stellate c's of the membrana propria of the gastric and other glands. [J, 21, 35, 42, 67.]—**Air-c.** Lat., *cellula aeria.* Fr., *cellule aérifère* (ou *aérienne*), *cavité pneumatique, poche aérienne.* Ger., *Luftsack.* It., *cellula aerea.* Syn.: *air cavity* (or *sac*, or *receptacle*, or *space*), *pneumatic c.* 1. A pulmonary air-vesicle or alveolus; one of the ultimate saccules into which the lungs are divided. They are situated on the walls of an infundibulum into the common cavity of which they open, but they do not communicate with each other except through this cavity. 2. An empty space in the body, communicating directly or indirectly with the lungs or air-passages. In man the chief air-c's are the mastoid and ethmoid c's and the frontal, maxillary, and sphenoidal sinuses. Among animals they are mostly developed in birds, in which every bone may possess an air-space and in which also numerous membranous air-sacs exist in the body-cavity and between the muscles. In birds, these air-c's are designated according to their location as axillary, supraclavicular, etc. 3. An empty space containing air, in vegetable tissues. According to their size these air-c's are designated as interstices, lacunæ, and air-passages or air-chambers. [B, 229; J, 28, 29, 45, 55, 84, 100; L, 14.]—**Akinetic c.-division.** See *Direct c.-division.*—**Albuminous c.** Fr., *cellule à protoplasme.* Ger., *Eiweisszelle.* Heidenhain's name for a salivary c. which contains albumin but no mucus. [L, 318.]—**Alveolar c.** One of the c's lining the acini of glands. [J.]—**Amitotic c.-division.** See *Direct c.-division.*—**Amœboid blood-c.** See *White blood-*CORPUSCLE.—**Amœboid c.** Fr., *cellule amiboïde.* Ger., *amöboide Zelle.* It., *cellula ameboide.* A c., such as a leucocyte, having the power of changing its shape like the *Amœba.* [J.] See *Wandering c.*—**Ancestral c.** A name applied by Haeckel to a zoosperm or an unfertilized ovum. [J, 89, 114.]—**Animal c.** Fr., *cellule animale.* Ger., *Thierzelle, thierische Zelle.* It., *cellula animale.* Sp., *celdilla animal.* 1. One of the c's constituting the tissue of animals. Cf. *Vegetable c.* 2. A c. situated at the animal pole of a segmenting ovum. Cf. *Vegetative c.* (1st def.) and MICROMERE.—**Annular c.** Fr., *cellule annulaire.* Ger., *Ringzelle.* It., *cellula annulare.* Syn.: *ringed c.* A vegetable c. in which there are one or more annular thickenings of the c.-wall upon its inner surface. [B, 34, 75.]—**Anterior ethmoidal c's.** Lat., *cellulæ ethmoidales anteriores.* Fr., *cellules éthmoïdales antérieures.* Ger., *vordere Siebbeinzellen.* The air-c's in the ethmoid bone, closed in by the lacrymal bone and the frontal process of the superior maxilla. [L, 7, 31, 142.]—**Anticlinal c.** Fr., *cellule anticlinale.* In botany, a c. produced by division of the mother-c. of the embryo-sac, situated below the embryonal sac and independent of the latter. It should not be confounded with the antipodal c., which is comprised within the embryonal sac. [B, 104.]—**Antipodal c.** Fr., *cellule antipode.* Ger., *Gegenfüsslerzelle.* Syn.: *antipodal vesicle, antipode.* In the development of a plant-ovary, a thin-walled c. found at the bottom of the embryo-

sac opposite the germ-c. (oosphere). The antipodal c's are usually 3 in number, representing 3 of the 4 nuclei into which the lower of the 2 c's developed from the fission of the germ-c. divides. See 17 in Fig. [B, 75, 104, 229; Engler (B, 245).]—**Apical c.** Fr., *cellule apicale.* Ger., *Scheitelzelle.* 1. The single c. situated at the growing point of most cryptogams, which by its development and continued subdivision forms the primary meristem. In the phanerogams the apical c. is replaced by a group of c's. 2. As occasionally employed, the upper of the two c's into which the primitive c. of the embryo-sac divides; the tapetal c. or calotte of most authors. See 1 in Fig. under *Antipodal c.*, and cf. *Cap c.* (2d def.). [B, 34, 75, 104, 229.]—**Apolar c., Apolar nerve-c.** Fr., *cellule nerveuse apolaire.* Ger., *apolare* (oder *fortsatzlose*) *Zelle.* It., *cellula apolare.* A nerve-c., especially of the sympathetic system, described as possessing no processes. It is supposed that fully formed nerve-c's without poles or processes are very rare and that the apparent absence of processes is due to manipulation. [J, 2, 35.]—**Archesporial c.** A c. of the archesporium. [B, 279.]—**Artificial c.** Fr., *cellule artificielle.* Ger., *künstliche Zelle.* It., *cellula arteficiale.* An imitation of a growing vegetable c., produced by placing within a liquid (such as a solution of tannin) a drop of another liquid (*e. g.*, fluid gelatin) which forms a film on contact with the former. Such a drop covered with its film (pellicle-membrane, precipitation-membrane) is capable of growth within certain limits. By placing one of the liquids within and the other on the outside of a porous jar, the precipitation-membrane can be formed upon the inner surface of the jar, the latter serving as a support for it; and in the artificial c. so formed, the conditions of intracellular pressure can be studied. [B, 167, 229.]—**Asexual reproductive c.** A c. which reproduces itself (*i. e.*, forms new c's) without the stimulus of contact or conjugation with any other c.; *e. g.*, a c. which produces new c's by fission or by spore-formation. [B, 167.]—**Axial c.** Fr., *cellule axiale.* Ger., *axiale Zelle.* 1. In the *Dicyemida*, a cylindrical c. which constitutes the body and in which are formed the embryos. 2. In botany, any c. situated in the axis of an organ. [B, 75; L, 11.]—**Basal c., Basilar c.** Fr., *cellule basilaire.* Ger., *Basalzelle.* It., *cellula basilare.* 1. In the pl., *basal c's*, a term used to designate in a general sense the deepest layer of an epithelium. 2. A single modified spermatocyte at the base of a spermatogen. 3. In the *Rivulariaceæ*, a large, spherical, thick-walled c. found at the base of each filament. 4. In the archegonium of the gymnosperms, the central c. or oosphere. [B, 75, 245; J, 67; "Proc. of the Roy. Micr. Soc.," 1884, p. 706 (J).]—**Bast c.** Fr., *cellule libérienne.* Ger., *Bastzelle.* Syn.: *liber c.* A name given sometimes to the elongated, tough, flexible, thick-walled fibres which form the characteristic element of the bast or liber of plants (phloem); sometimes to the thin-walled, only slightly elongated c's of the bast (phloem) parenchyma. [B, 75, 104, 229.]—**Beaker c.** See *Goblet c.*—**Bichromate c., Bichromate-of-potassium c.** The element of a bichromate battery (*q. v.*). [B.]—**Binary nerve-c.** Fr., *cellule binaire.* Ger., *birnförmige Zelle.* A pair of pear-shaped sympathetic nerve-c's contained in a single sheath and provided each with a single nerve-fibre attached to its pointed end. The two nerve-fibres extending in opposite directions give to the two c's the appearance of a single bipolar c. [J, 35.]—**Bipolar c.**



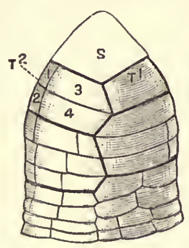


DIAGRAM OF THE FORMATION OF CELLS IN THE PLANT EMBRYO-SAC.

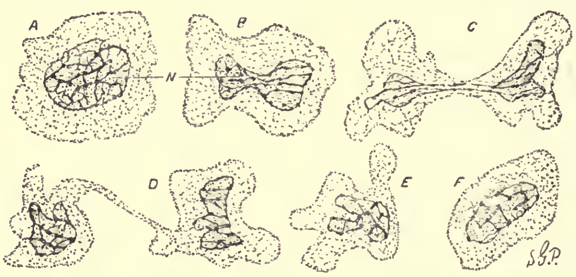
A, first stage in the division of the primitive c. in which it forms two new c's, an upper 1 (tapetal c., apical c.) and a lower 2 (mother-c. of the embryo-sac). B, second stage; 1 has divided into three c's which form a sort of tapetal layer (calotte, cap-c's) 3; 2 has divided into two c's, 4 and 5. C, third stage; 4 has divided into c's 6 and 7, and 5 into c's 8 and 9 (special mother-c's). D, fourth stage; 10 developed from 9, the lowermost c. of the series in C, has enlarged at the expense of the c's above it, which are in a process of absorption, and now constitutes the germ-c.; 11, the nucleus of 10, is the primary nucleus of the embryo-sac. E, fifth stage; the process of absorption of the overlying c's is complete, and the germ-c., now greatly enlarged, is in process of division, the nucleus 11 having already split up into two daughter-nuclei, 12 and 13. F, sixth stage; the nucleus 12 has split up into the four nuclei, 15, occupying the upper portion of the embryo sac, and the nucleus 13 has divided into the four nuclei, 14, occupying the lower portion of the sac. G, seventh stage; the lowermost nucleus, 16, of the tetrad of nuclei 15, and the uppermost nucleus, 18, of the tetrad 14, have gradually come together, and by their coalescence form the secondary nucleus of the embryo-sac (21); the remaining c's (17) of the lower tetrad form the antipodal c's; one of the remaining c's (20) of the upper tetrad forms the female germ-c. or oosphere; the other two (19, 19) constitute the adjuvant c's or synergidæ.

AN APICAL CELL. (AFTER THOMÉ.)

S, apical c. The spaces, such as T1, T2, included within the heavy lines represent the daughter-c's produced by the division of S, while the smaller included spaces, such as 1, 2, 3, 4, are the subsidiary c's formed by the subdivision of the daughter-c's.

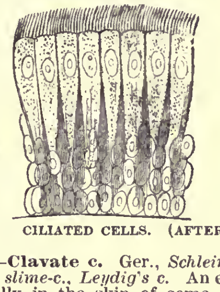


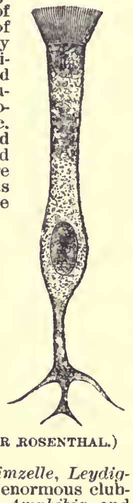
Lat., *cellula bipolaris.* Fr., *cellule bipolaire.* Ger., *bipolare Zelle.* It., *cellula bipolare.* A c. having two poles or processes; a term used mostly with reference to nerve-c's. [J.]—**Blood c.** See *Blood*-CORPUSCLE.—**Blood-corpuscle-holding c.** Ger., *blutkörperchenhaltige Zelle.* One of the small masses, especially in the spleen, containing one or more red blood-corpuscles or fragments of corpuscles. These bodies are looked on by some as red blood-corpuscles in process of pigmentation and disintegration; others consider them to be red blood-corpuscles in process of development; and still others as white blood-corpuscles which have ingested one or more red ones. [J, 24, 25.]—**Bone c.** Fr., *cellule osseuse.* Ger., *Knochenzelle.* It., *cellula ossea.* Syn.: *osteal c.* 1. One of the branched nucleated c's situated in the lacunæ of bone. The branches of the c. extend into the canaliculi radiating from the lacunæ, and probably communicate with the processes of neighboring c's. [J, 24. 26, 30. 31, 32; "Arch. f. mikr. Anat.," 1870, p. 182 (J).]

BONE CELLS. (AFTER FREY.)

2. See *Calcigerous c.* (2d def.). 3. See *Air-c.* (2d def.).—**Border c.** See *Marginal c.* and *Delomorphous c.*—**Branched c.** See *Ramified c.*—**Bristle c.** A name sometimes applied to prickle-c's, the connecting filaments or intercellular bridges being called bristles. [J, 124.]—**Brood-c.** Ger., *Brutzelle.* 1. A hæmatopoietic c. 2. One of the c's in which the larvæ of bees, etc., are reared. 3. In plants, a c. separated by asexual processes from a parent-c.; a gonidium. [B, 279; J; L, 196.)—**Brush-c's.** C's of the neuroglia, which have processes; a variety of spider-c's or Deiter's corpuscles (*q. v.*). [J, 42.]—**Bud c.** A c. which is developed from a parent-c. by budding. [B, 75.] Cf. *Brood-c.*—**Bulb-c.** Fr., *cellule de massue.* Ger., *Kolbenzelle.* One of the flattened, originally nucleated c's forming the inner bulb or cone of a compound terminal corpuscle. These c's belong to the thickened neurilemma of the nerves which end in the terminal corpuscle. [Krause, "Arch. f. mikr. Anat.," 1881, p. 53 (J).]—**Bunsen c.** The element of a Bunsen battery (*q. v.*). [B.]—**Calcareous c's, Calciferous c's.** C's which secrete or excrete calcareous matter; *e. g.*, those in the œsophageal glands of the earth-worm and in the external covering and the hepato-pancreas of the *Mollusca.* [J, 82; L, 322.]—**Calcigerous c's.** Lat., *corpuscula chalicophora.* Fr., *corpuscles calcaires.* Ger., *Kalkkörperchen.* It., *corpuscoli calcofori.* 1. See *Dentinal c.* 2. A name given by Müller and Henle to the lacunæ of bone and their processes, the canaliculi, on the supposition that they were the principal seat of calcareous matter. Also called bone c's and bone-corpuscles. [J, 35, 128.]—**Caliciform c.** See *Goblet c.*—**Cambiform c.** Fr., *cellule cambiforme.* Ger., *Cambiformzelle.* A prismatic, thin-walled, latticed c. found along with the sieve-c's in the cribrose portion of the fibro-vascular bundle. [B, 75, 229.]—**Cambium c.** Fr., *cellule du cambium.* Ger., *Cambiumzelle.* One of the c's of the cambium (*q. v.*); *i. e.*, a vegetable c. which still retains its capacity for division. [B, 75, 229; Henfrey (J).]—**Canal c.** Fr., *cellule du canal.* Ger., *Kanalzelle.* In mosses, one of a series of axile c's occupying the neck of the archegonium. In the archegonium of the gymnosperms, a small c. situated below the neck of the archegonial canal. It is the uppermost of the two c's produced by the division of the central c. (*q. v.*), the lower of the two forming the oosphere. Göbler calls the canal c. the *ventral canal-c.*, thus distinguishing it from the neck canal-c. (or neck c.) (*q. v.*). [B, 104; Eichler (B, 245); B, 279.]—**Cancer c.** Fr., *cellule cancéreuse.* Ger., *Krebszelle.* It., *cellula cancerosa.* Syn.: *macrocyte* [Ollier]. A round c. with pale outline, granular contents, and large eccentric nucleus, found in alveolar carcinoma and in some forms of sarcoma, and formerly supposed to be diagnostic of cancer. [E.]—**Cannulated c.** A c. perforated by a duct. [L, 121.]—**Cap c.** Fr., *cellule de la coiffe.* Ger., *Haubenzelle.* 1. One of the c's forming the root-cap of cryptogams; derived from the apical c. by segmentation and shut off from the latter by partitions. 2. In angeiosperms, one of the 3 upper c's into which the mother-c. of the embryo-sac divides, and which, in the development of the latter, are crowded together and are finally absorbed. (See 6, 7, and 8, in Fig. under *Antipodal c.*) [B, 167, 279.]—**Cardiac muscular fibre-c.** Fr., *cellule musculaire du cœur.* Ger., *quergestreifte Herzmuskelzelle.* One of the quadrangular or fusiform striated c's joined end to end to form the cardiac muscular fibres. [J, 30, 31.]—**Carpogenous c.** Fr., *cellule carpogène.* Ger., *carpogene Zelle.* A c. of the carpogonium, which after fertilization develops into a sporocarp. [B, 279.]—**Carrier c.** A name sometimes given to leucocytes or wandering c's on account of their action in taking up and removing foreign or pathological material from the tissues. [J, 109.] Cf. PHAGOCYTE.—**Cartilage c.** Lat., *cellula cartilaginea.* Fr., *cellule cartilagineuse, corpuscle du cartilage.* Ger., *Knorpelkörperchen, Knorpelzelle.* It., *cellula cartilaginea, corpuscolo cartilagineo.* Syn.: *cartilage corpuscle, chondroblast.* 1. One of the nucleated c's found in cartilage. They are mostly subcircular in outline; but c's similar in shape to the branched connective-tissue corpuscles are often present in the cartilage of cold-blooded animals and in the articular cartilage of warm-blooded animals. Fatty particles and glycogen are frequently present in cartilage c's. According to Klein and others, the spaces or lacunæ occupied by the cartilage-c's communicate by fine channels. According to Heitzmann, the c's are interconnected by numerous fine branches in some such way as the corneal corpuscles are. (See figures under CARTILAGE.) 2. A name sometimes applied to the space in the matrix of the car-

tilage occupied by a cartilage-c. [J, 30, 31, 32, 33, 35.]—**C.-action.** The proper action of a c.; its function, in contradistinction to the action or function of an entire organ or organism. [J, 108.]—**C.-anus.** The place in a protozoon where undigested food is expelled. [J, 55.]—**C.-body.** Fr., *corps cellulaire.* Ger., *Zellleib*, *Zellkörper.* It., *corpo cellulare.* Syn.: *cellular body, c.-corpuscle, c.-protoplasm, c.-substance.* 1. That part of a c. outside of the nucleus. It may or may not be inclosed by a c.-membrane, and may contain various non-protoplasmic substances, such as fat and glycogen. [J, 15, 30.] (See figure under *C.*) 2. See *C.-mass.*—**C.-budding.** See Gemmation and *C.-genesis.*—**C.-capsule.** 1. See Capsule *of a nerve-c.* 2. See *C.-membrane.*—**C.-cavity.** Fr., *cavité cellulaire.* 1. The cavity constituted by a c. (1st def.). 2. See *C.-space* (2d def.). 3. See *C.-lumen.* 4. See Vacuole.—**C.-chain.** Fr., *chaine de cellules.* Ger., *Zellkette, Zellstrang, Zellbalke, Zellfaden.* 1. A form of tissue constituted of one or more distinct rows of c's; produced by c.-fission in one direction only of space. 2. A row of small rounded c's between the bundles of nerve-fibres in the brain or myel. According to Löwe, these are wandering c's which remain throughout life in an embryonic condition. [B, 75; J, 38.]—**C.-chamber.** See *C.-lumen.*—**C.-colony.** See *C.-territory.*—**C.-complex.** Ger., *Zellcomplex.* An aggregation of c's connected together by community of origin or of function or structurally united so as to constitute a distinct tissue or a multicellular organism. [J, 55, 60, 96.] See *C.-family, C.-chain, C.-surface, C.-mass.* and *C.-nest.*—**C.-conjugation.** See *C.-genesis.*—**C. contents.** Fr., *contenu cellulaire.* Ger., *Zellinhalt.* 1. The entire contents of a c., including c.-body and nucleus, and, if no c.-wall is present, comprising the entire c. 2. The c.-body. [J, 27, 36.] 3. The adventitious substances, chlorophyll, starch, crystals, etc., found in c's. [B.]—**C.-corpuscle.** See *C.-body.*—**C.-cover.** The operculum or cuticular layer. [J.]—**C.-culture.** See under Culture.—**C.-derivative.** Fr., *produit cellulaire.* A substance or a tissue derived from c's or constituted of transformed c's; also a substance, such as starch, etc., secreted within the substance of a c. [B, 75, 106; J.]—**C.-development.** See *C.-genesis.*—**C.-district.** See *C.-territory.*—**C.-division.** Fr., *division cellulaire.* Ger., *Zelltheilung.* The formation of two or more c's (daughter-c's) by the separation of a mother-c. into two or more nearly equal parts. There are two principal forms of c.-division: A, *direct c.-division*, in which the c. divides without any apparent change of structure, and B, *indirect c.-division*, in which the c. and especially the nucleus appears to undergo marked structural changes. (See Caryocinesis.) In all cases, although the process of division in the c.-body and the nucleus may



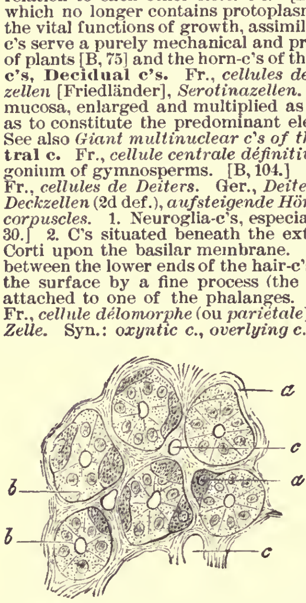


DIRECT CELL-DIVISION AS SEEN IN THE LARGE WHITE BLOOD-CORPUSCLES OF NECTURUS. (AFTER S. H. GAGE.)

A, corpuscle in a resting condition. *B*, same corpuscles showing dumb-bell like constriction in both c.-body and nucleus; and the chromatin fibrils show a tendency to become parallel with the long axis of the nucleus. *C*, same in a more advanced stage of division. *D*, the division of the nucleus is complete and the two parts of the c.-body are connected only by a slender bridge. *E*, *F*, the slender bridge in *D* is broken and there are two independent c's. *F* is quiescent, *E* shows marked amœboid movement. Not infrequently after reaching the condition shown in *C* or *D*, the parts flow together again; in this case no sign of commencing division would be left in *C*, but in *D* the presence of the two nuclei would reveal it.

go on simultaneously, the division of the nucleus is first completed. In ova, except the parthenogenetic forms and in all sexually reproductive c's, the stimulus to c.-division is the fusion with a male-element (zoosperm). In the ordinary tissue-c's (somatic c's), the stimulus giving rise to division is still unknown. It is also still in doubt whether the c.-body or the nucleus takes the initiative. [J, 27, 30, 31, 35, 64, 83, 115; Whitman, "Journ. of Morphol.," ii (1888), pp. 27–49 (J).] Gemmation and internal c.-formation (*q. v.*) are modified forms of c.-division [B.]—**C.-doctrine.** See *C.-theory.*—**C.-element.** See *C.*—**C.-envelope.** See *C.-membrane.*—**C. excrement.** The fragments of the nuclei which are ejected from c's during conjugation. [L, 121.]—**C.-family.** Ger., *Zellenfamilie.* An aggregation of similar c's forming a mass which constitutes a sort of spurious tissue. [B, 75.] Cf. *C.-nest.*—**C.-fibre.** See *Fibre-c.*—**C.-fission.** See *C.-division.*—**C.-fluid.** Fr., *suc cellulaire.* Ger., *Zellsaft, Zellflüssigkeit.* Syn.: *c.-sap, intracellular fluid.* The fluid part of a c., as distinguished from the solid or semi-solid part. It is supposed to fill the vacuoles in c's. [J, 35.]—**C.-formation.** See *C.-genesis.*—**C.-fusion.** The union of two or more c's in such a manner that the adjacent c.-walls are absorbed and the separate c.-bodies united into one. The tubes (vessels) in plants are examples of such fusions. [B, 75.]—**C.-gemmation.** C.-budding. [B.] See *C.-genesis* and Gemmation.—**C.-genesis.** Lat., *cytogenesis.* Fr., *genèse cellulaire.* Ger., *Zellbildung.* It., *citogenesi.* Syn.: *c.-development, c.-proliferation, c.-formation, cytogenesis, cytogeny.* The development or formation of c's. Two forms of c.-genesis are distinguished: A, *asexual c.-development*, comprising all cases in which a parent-c. without previous conjugation with another c. develops into new c's; B, *c.-union, c.-conjugation, sexual c.-development*, in which two c's, which are sometimes similar but are usually dissimilar in size, shape, or both, coalesce and form a single c. which then develops into new c's. C.-genesis of either form may take place in two principal ways: 1, by *c.-division* (*q. v.*) and, 2, by *internal c.-formation.* The former includes, as a special variety, c.-budding or gemmation (*q. v.*), which comprises many of the processes of spore-formation. Internal c.-formation (*q. v.*), which is a still more specialized variety of c.-division, comprises free c.-formation and rejuvenescence (*q. v.*). [B, 75; J.]—**C.-group.** See *C.-nest.*—**C.-histology.** The science which treats of the minute structure of c's, in contradistinction to histology proper, which deals rather with the structure of the tissues. ["Nature," 1888 (J).] Cf. Cytology.—**C.-kernel.** See *C.-nucleus.*—**C.-layer.** Ger., *Zellenschicht.* A layer or stratum of c's, such as a simple epithelium or part of a stratified epithelium. [J.]—**C.-life.** See under Life.—**C.-lumen.** Syn.: *c.-space* (3d def.), *c.-cavity* (3d def.). The space inclosed by the c.-membrane of vegetable c's and comprising the c.-contents. [J.]—**C.-mass.** Ger., *Zellkörper.* A collection of c's (see *C.-nest*); especially a tissue formed of an aggregation of c's produced by the fission of a single c. in the three directions of space so as to constitute a body of appreciable breadth and thickness. [B, 75; J.]—**C.-membrane.** Lat., *membrana cellulæ* (seu *cellularis*). Fr., *membrane cellulaire, couche limitante* (ou *membraneuse*). Ger., *Zellhaut, Zellmembran.* Syn.: *c.-capsule, c.-wall, limiting* (or *investing*) *membrane, periplast, theca.* 1. An envelope or capsule incasing a c. It is produced by a condensation or chemical change in the substance of the c. at its periphery. The existence of a c. membrane is inferred if the c. exhibits a double contour under the microscope. It was shown by Schwann that young and many adult c's did not possess a membrane, and its presence in animal c's is now considered to be the exception rather than the rule. (See figure under *C.*) 2. Of Remak (1850), the membrane made up of endothelial c's lining the blood-vessels and forming the wall of capillaries. [J, 20, 30, 35, 36.]—**C.-mouth.** The situation in a protozoon where food is ingested. [J, 55.]—**C.-multiplication.** Fr., *multiplication cellulaire.* Ger., *Zellvermehrung.* An increase in the number of c's by c.-division. [J.] See also *C.-genesis.*—**C.-nest.** Ger., *Zellengruppe, Zellenhaufe, Zellennest.* A collection of c's, more or less separated from surrounding c's by intervening tissue; such as the c.-groups of cartilage, the groups or nests of c's (nidi [Spitzka], nuclei of many authors) found in the nerve-centres. [Spitzka, "Journ. of Nerv. and Mental Dis.," July, 1888, p. 413 (I); J.] See also *C.-family.*—**C.-network.** Fr., *réseau cellulaire.* Ger., *Zellennetz.* Syn.: *c.-reticulation.* 1. A collection of ramified or stellate c's forming a network by the union of their branches. This arrangement is especially well seen in branched pigment c's and also in adenoid tissue. (See figure under *Stellate c.*) 2. The reticulations formed by the more solid part of a c. See figure under *C.* and cf. *Nuclear* net-work. [J, 21, 24.]—**C.-nucleolulus.** See Nucleolulus.—**C.-nucleolus.** See Nucleolus and *C.*—**C.-nucleus.** Fr., *noyau cellulaire.* The nucleus of a c. See *C.* and Nucleus.—**C's of bone, C's of cartilage,** etc. See *Bone-c., Cartilage-c.*, etc.—**C's of Claudius.** Ger., *Claudius'sche Zellen.* The outermost epithelial c's of the ductus cochlearis. [L, 318.]—**C's of connective tissue.** 1. The areolar spaces of connective tissue. 2. See *Connective-tissue* corpuscles. [B; J.]—**C's of Corti.** See *External hair-c's of the organ of Corti.*—**C's of Deiters.** See *Deiters's c's.*—**C's of Langerhans.** Fr., *cellules de Langerhans.* Ger., *Langerhans'sche Körperchen.* Syn.: *corpuscles of Langerhans.* Irregular bodies found between the c's of the rete mucosum of the skin and often at the end, or along the course, of an intra-epithelial nerve-fibre. They were discovered by Langerhans ("Arch. f. pathol. Anat.," xliv, 1868, p. 325), and were supposed to be the endings for the intra-epithelial nerve-fibres. By other authors they were thought to be wandering c's. [J, 31.]—**C's of Purkinje.** Fr., *cellules de Purkinje.* Ger., *Purkinje'sche Ganglienzellen* (oder *Nervenkörper*) (1st def.). Syn.: *corpuscles of Purkinje, Purkinje's c's.* 1. Large fusiform or pear-shaped nerve-c's forming a layer, one c. deep, between the ectal (outer) and the nuclear (or granule-) layer of the cerebellar cortex. Each c. sends a slender axis-cylinder process into the granule layer, and a large process, which soon subdivides like the antlers of a deer, toward the surface of the cerebellum. These c's, like most others belonging to the central nervous system, are said by most authors to be naked, but, according to Denissenko ("Arch. f. mikroskop. Anat.," xiv, 1877, p. 203), they possess a distinct membrane. 2. Large c's joined end to end to form the fibres of Purkinje in the heart. The c's have a clear, usually bi-nucleated, central part and a transversely striated peripheral part. According to Kölliker, they are muscular fibres or c's arrested in development. [J, 10, 30, 31, 32.]—**C's of Schultze.** See *Olfactory c's.*—**C's of the fibro-vascular system.** See *Prosenchymatous c's.*—**C's of the fundamental system.** See *Parenchymatous c's* (2d def.).—**C.-plate.** Fr., *plaque cellulaire* (ou *équatoriale* [2d def.]). Ger., *Zellplatte* (2d def.), *Plattenzelle* (1st def.). *Plättchenzelle* (1st def.). 1. Any c. of a flattened or plate-like form; *e. g.*, an endothelial c. [Klein], also the connective-tissue corpuscles and tendon-c's [Ranvier]. 2. Of Strasburger (1875), the plate-like mass of chromatin in the equator of a dividing c., indicating the plane of division. The part of the plate which is in the c.-body is sometimes distinguished as the cytoplasmic plate, and that in the nucleus as the spindle-plate or nuclear plate (*q. v.*). See figure under *C.-division.* [J, 31, 32; "Quart. Journ. of Micr. Sci.," 1878, p. 365, and 1886 (J).]—**C.-process.** Fr., *prolongement cellulaire.* Ger., *Zellausläufer, Zellfortsatz.* Syn.: *pseudopodium.* A conical or thread-like extension of the substance of c's. Such processes often anastomose with neighboring c's, as in pigment-c's, connective-tissue corpuscles, and prickle-c's; and the generalization has been made by Heitzmann and others that, except the free c's like those of the blood and lymph, all the c's in the body are interconnected by coarse or fine c.-processes. [J, 26; "Zeitschr. f. wissensch. Zool.," xli, 1884, p. 302 (J). Cf. figure under *C.* and *Stellate c.*—**C.-proliferation.** See *C.-division* and *C.-genesis.*—**C.-protoplasm.** Fr., *protoplasme cellulaire.* Ger., *Zellprotoplasma, Zellplasma.* Syn.: *cytoplasma* (1st def.). 1. The substance of the c. outside of the nucleus, the c.-body; often designated

simply as the protoplasm in contradistinction to the nucleus. 2. The protoplasm of which c's are made up, whether found in the c.-body or in the nucleus. [B; J.]—**C.-rejuvenescence.** Fr., *rajeunissement cellulaire.* Ger., *Zellerneuerung, Zellverjüngung.* That form of c.-genesis in which the entire mass of protoplasm of a c. contracts so as to become separated from the c.-wall, is then extruded through an opening in the latter, and, after a longer or shorter period of existence as a motile naked c., secretes a new c.-wall. The new c. so formed grows in an axis perpendicular to the growth of the old c. and forms new c's by division. C.-rejuvenescence is probably to be regarded as a variety of internal c.-formation (*q. v.*). [B, 75.]—**C.-reticulations.** See *C.-network.*—**C.-row.** See *C.-chain.*—**C.-sap.** See *C.-fluid.*—**C.-slime.** Protoplasm. [L, 146.]—**C.-space.** Fr., *lacune cellulaire.* Ger., *Zellraum.* 1. A white space left in tissues stained by silver nitrate, such a space corresponding to a c. and its processes, which remain unstained by the silver. 2. A space in the ground-substance (matrix) of various tissues, occupied by a c. Such spaces seem to be somewhat larger than the c's, thus giving rise to lymph-spaces and canaliculi around the latter. 3. See *C.-lumen.* [J, 26, 30, 34, 73.]—**C.-state.** Of Haeckel, an organism composed of many c's, from its analogy to a political state composed of many citizens. [J, 114.]—**C.-stroma.** The clear transparent matrix of a c., in which are imbedded the granules, etc. [Howell (J, 55).]—**C.-stuff.** Protoplasm. [J.]—**C.-substance.** Fr., *substance* (ou *corps*) *cellulaire.* Ger., *Zellsubstanz.* The substance of the c.-body in contradistinction to that of the nucleus. [J.]—**C.-surface.** Ger., *Zellfläche.* A tissue or organism, having appreciable length and breadth, formed by the development of one or more c's in two directions at right angles to each other. [B, 75.] Cf. *C.-chain* and *C.-mass.*—**C.-territory.** Fr., *territoire cellulaire.* Ger., *Zellenterritorium.* Syn.: *c.-colony, c.-district.* 1. An expression introduced by Goodsir (1845) to designate all the c's of the same kind in a given organ. 2. According to Virchow (1856), that part of a tissue supposed to be presided over by a single c., each c.-territory or c.-district thus consisting of a central c. and a greater or less amount of surrounding ground-substance. [J, 26, 27, 33, 47.]—**C.-theory.** Fr., *théorie* (ou *hypothèse*) *cellulaire.* Ger., *Zelllehre, Zellentheorie.* It., *teoria cellulare.* Syn.: *c.-doctrine.* The theory which regards the c. as the essential anatomical and physiological element of animal and vegetable structures. It is comprised in the following generalizations: *A*, the statement made by Schwann and Schleiden in 1838–1839 that all the various organs and tissues of both plants and animals are produced by a greater or less transformation of similar c's, the fertilized ovum forming the starting-point; that animal c's are in most cases produced by spore-formation within an intercellular nutritive fluid (cytoblastema); that most if not all vegetable c's and a few animal c's are developed within pre-existing c's, and that each c. is to a certain extent an independent individuality. *B*, the fact, proved by Goodsir, Virchow, and others, that animal c's also are invariably developed by the multiplication of pre-existing c's (*omnis cellula e cellula*). *C*, the generalization of Brücke, Haeckel, and others, that the c's forming one of the higher organisms are comparable to a colony of unicellular organisms, associated together for a common purpose, and that the c's vary from the simple or elementary forms in direct proportion to their specialization in function. *D*, the hypothesis, propounded at the present day by Heitzmann, Fromann, and others, that all the c's of the body, except the free c's of the blood and lymph, are interconnected by coarse or fine c.-processes, and that all c's, instead of being of a homogeneous or slightly granular character, present within their substance a reticulum or network. [J, 26, 27, 36, 37; Klein, "Quart. Jour. of Microscop. Sc.," 1878 (J).]—**C.-threads.** See *Achromatic* FIGURE.—**C.-tissue.** Fr., *tissu cellulaire.* A tissue made up of an aggregation of c's. [B, 167; J.]—**C.-trabeculæ.** Ger., *cylindrische Zellenstränge, Rindencylinder, Rindenstränge.* Syn.: *cortical cylinders* (or *trabeculæ*). Masses of c's arranged in the form of cords or cylinders, as in the adrenal. [J.]—**C.-union.** Fr., *conjugaison des cellules.* Ger., *Zellverschmelzung.* The fusion of two c's to form a single new c. This is the essential process in the sexual reproduction of plant and animal c's. The two uniting c's may be of about the same size and appearance (in which case the process is usually called *c.-conjugation*), or may be different in size and other characteristics. In the latter case, the smaller c. is usually the more actively motile, and seems to act by stimulating the larger and more stable c. to development, and is hence regarded as homologous with the similarly acting spermatozooid of the higher animals, and is called the *male reproductive c.* [B, 75, 106.]—**C.-wall.** 1. The wall of an air-c. (1st def.). [Donaldson (J, 55).] 2. See *C. membrane* (1st def.).—**Central c.** Fr., *cellule centrale.* Ger., *Centralzelle.* It., *cellula centrale.* 1. Of the stomach-glands, see *Adelomorphous c.* 2. In the archegonium of gymnosperms and of mosses, a c. from which the canal-c. and the oosphere are developed. According to some authors, the term central c. (or definitive central c.) is restricted to the latter. [B, 35, 104, 279; C; J.]—**Centro-acinar c., Centro-acinous c.** Fr., *cellule centro-acineuse.* Ger., *centroacinäre Zelle.* One of the c's found by Langerhans in the centre of the acini of the pancreas, and by others in other racemose glands. They are continuous with the epithelial lining of the excretory ducts, and are generally stellate in form. [J, 30, 32, 35.]—**Cerebral c.** Fr., *cellule cérébrale.* A nerve-c. of the cerebrum. [J, 119.]—**Cerebro-spinal nerve-c.** Fr., *cellule cérébro-spinale.* A c. belonging to the central nervous system (either brain or myel). [J, 31.]—**Chalice c.** See *Goblet c.*—**Chief-c.** [Heidenhain]. See *Adelomorphous c.*—**Chloride-of-silver c.** The element of a chloride-of-silver battery (*q. v.*). [B.]—**Chromatophore c.** Fr., *chromoblaste.* Ger., *Farbzelle.* A vesicular cavity immediately beneath the epidermis, containing coloring matter (scarlet, yellow, blue, or brown), and having attached to it radiating muscular bands which cause it to change its shape and color. [L, 121.] Cf. CHROMATOPHORE.—**Ciliary c., Ciliated c.** Lat., *cellula ciliata.* Fr., *cellule ciliée* (ou *à cils vibratiles*). Ger., *Flimmerzelle, Wimperzelle.* It., *cellula cigliata.* Sp., *celdilla ciliada.* A c. having one or more cilia upon its free surface. Free ciliated c's are found among the swarm-spores of the *Myxomycetes*, the zoospores of the *Zoosporeæ*, and the spermatozooids of liver-worts. In these there may be but one cilium, as in the swarm-spores of the *Myxomycetes*, or a pair of cilia, or the anterior extremity of the c. may bear a crown of cilia (as in the spores of the *Œdogonium*), or the whole surface of the c. may be covered with cilia. In the higher animals a typical ciliated c. is columnar with a centrally placed oval nucleus, and at the free extremity bearing numerous cilia which during life exhibit constant motion. Between the cilia and the remainder of the c. is a highly refractive layer, the operculum. United side by side these c's form ciliated epithelium and endothelium. According to Engelmann, the c's are traversed by intracellular fibres, each of which is connected with a cilium through its pedicle and the intermediate segment. [B, 75; J, 30, 35.] See also *Ciliary* MOTION.—**Ciliated endothelial c's.** C's of an endothelium bearing cilia, such as the c's of the peritonæum in *Amphibia.* [J, 73.]—**Ciliated epithelial c's.** Fr., *cellules épithéliales à cils vibratiles.* Epithelial c's bearing cilia. [J.]—**Circumvascular c's.** Syn.: *perivascular c's.* [J, 127.] The plasma c's or leucocytes found in the tissues near blood-vessels. [J.]—**Clavate c.** Ger., *Schleimzelle, Leydig'sche Schleimzelle.* Syn.: *slime-c., Leydig's c.* An enormous club-shaped c. found especially in the skin of some *Amphibia* and scaleless fishes. The larger part of the c. is toward the free surface of the skin; the c's often have a ribbed or striate appearance, and differ from goblet-c's in being entirely closed, and in having the nucleus situated near the centre of the c. Their office is unknown, but some of them that are not closed appear to secrete mucus. [Wright, "Proc. of the Can. Instit.," ii; "Arch. f. mikr. Anat.," 1886 (J); "Arch. of Anat. and Phys.," 1861, p. 281 (J); J, 55.]—**Cleavage c.** See *Segmentation c.*—**Collenchyma c.** Fr., *cellule collenchymateuse.* Ger., *Collenchymazelle.* A c. of the collenchyma in plants. Such c's present frequently localized thickenings at their angles, which project both outwardly into the intercellular passages and inwardly into the interior of the c. [B, 75, 106.]—**Colossal c.** See *Giant c.*—**Colostrum c's.** See *Colostrum* CORPUSCLES.—**Columnar c.** Fr., *cellule cylindrique* (ou *prismatique* [Robin]). Ger., *Cylinderzelle, cylindrische Zelle.* Syn.: *cylindrical c., cylinder-c., columnar corpuscle.* An elongated, more or less tapering, c., a number of which, standing side by side, form columnar epithelium (*q. v.*). Often the free ends are polygonal, the sides irregular, the attached end branched. The centrally placed oval nucleus is well defined and large. The typical form of cylindrical c. is found in the small intestine. It has a striated cuticular layer at the free extremity, with a bright border interposed between it and the remainder of the c. Other forms, such as those found in the smaller salivary ducts, are conical, and the protoplasm occupying the attached half is striated. Ciliated epithelial c's are usually cylindrical in form, but, owing to their cilia, are classed separately. [J, 32, 31, 35.]—**Columnar epithelial c's.** See *Columnar c.*—**Conjugate c's.** A name given to a pair of c's, especially parenchyma c's (*conjugate parenchyma c's, conjugate wood-parenchyma c's*), but also occurring among prosenchyma c's (*conjugate substitution c's*), which are joined together by tooth-like processes or tubes which project from one c. into the interior of the other. [Sanio (B, 229).]—**Connective c., Connective-tissue c.** Fr., *cellule* (ou *corpuscule*) *du tissu conjonctif.* A connective-tissue corpuscle; a term used to comprise with the ordinary connective-tissue corpuscle the plasmatic c's and the fat-c's. [J; L, 13.]—**Constant c.** The galvanic element of a constant battery (*q. v.*). [B.]—**Contractile c.** A general term to designate the c's forming a contractile tissue, such as white blood-corpuscles and other amœboid c's, ciliated epithelium, and muscular tissue. [J.]—**Contractile fibre-c.** See under *Muscular fibre-c.*—**Cork c.** Fr., *cellule subéreuse.* Ger., *Korkzelle.* One of a layer of c's constituting cork; such c's are usually cuboidal in shape, closely approximated, and containing no protoplasm, but air only. [B, 75.]—**Corneous c.** See *Horn c.*—**Cortical c.** Fr., *cellule corticale.* Ger., *Rindenzelle.* A c. belonging to the cortex of an organ. [J.]—**Corti's c's.** See *External hair-c's of the organ of Corti.*—**Cover-c.** Fr., *cellule recouvrante* (ou *de soutènement*). Ger., *Deckzelle.* Syn.: *encasing c., tegmental c., roof-c., protective c.* A c. inclosing and protecting other c's of special character. The name was given by Loven and Schwalbe to the elongated fusiform c's forming the ectal (external) layer of taste-buds, and inclosing the true taste c's. The whole taste-bud has something the shape of a barrel, the cover c's corresponding to the staves. For illustration, see under *Taste-c.* [J, 30, 31, 35.]—**Crescent c's.** Ger., *Lunularzellen.* Marginal c's (*q. v.*) which are combined to form a demilune. [J.]—**Cribriform c., Cribrose c.** See *Sieve-c.*—**Cruickshank's c.** The element of a Cruickshank's battery (*q. v.*). [B.]—**Crystal c.** A vegetable c. containing crystals. [B.]—**Cuboidal c.** A c. of cuboidal shape; *i. e.*, a parallelopipedon with rectangular section, such as occurs in the parenchyma of plants and forms the adelomorphous c's of the stomach. [B, 75; J; L, 322.]—**Cup-c.** Ger., *Kelchzelle.* 1. One of

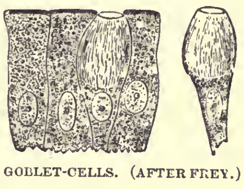


CILIATED CELLS. (AFTER ROSENTHAL.)

COLUMNAR CELLS. (AFTER FREY.)

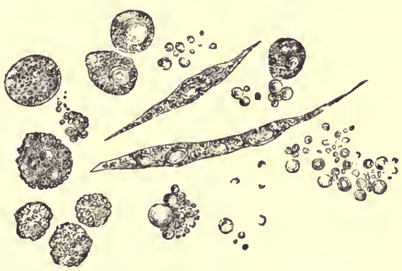
the large six-sided, prismatic c's in the taste-disks of the frog. These c's have a spherical nucleus near the branching base. The base does not reach the membrana propria. Each c. is covered by a firm membrane apparently open at the top or free end, whence the cup-like appearance. [J, 35.] 2. A goblet c.—**Cylinder c., Cylindrical c.** Fr., *cellule cylindrique.* Ger., *Cylinderzelle, cylindrische Zelle.* An elongated c. with circular section, and its ends at right angles to its axis. Such are many plant c's and the columnar c's (*q. v.*). [B, 75; J.]—**Cylindrical epithelial c.** See *Columnar c.*—**Cystogenous c.** Fr., *cellule cystogène.* A c. the secretion of which forms a cyst; applied to c's which secrete the substance in which a larva (*e. g.*, of a *Distoma*) encysts itself. [L, 322.]—**Daniell's c.** The element of a Daniell's battery (*q. v.*). [B.]—**Daughter-c.** Fr., *cellule-fille.* Ger., *Tochterzelle.* One of the c's formed by the division of a single c. (called the mother-c.). The term is especially applied to one of a number of c's which are still contained within a common envelope or within the substance of the mother-c. as in internal c.-formation. The several daughter-c's formed simultaneously from the same mother-c. are called in relation to each other *sister-c's.* [B, 75, 279; J.]—**Dead c.** A c. which no longer contains protoplasm, and hence performs none of the vital functions of growth, assimilation, and reproduction. Such c's serve a purely mechanical and protective office, like the cork-c's of plants [B, 75] and the horn-c's of the animal body. [B.]—**Decidua c's, Decidual c's.** Fr., *cellules de la caduque.* Ger., *Decidualzellen* [Friedländer], *Serotinazellen.* The proper c's of the uterine mucosa, enlarged and multiplied as the result of impregnation, so as to constitute the predominant element of the decidua. [A, 38.] See also *Giant multinuclear c's of the decidua.*—**Definitive central c.** Fr., *cellule centrale définitive.* The oosphere of the archegonium of gymnosperms. [B, 104.] See *Central c.*—**Deiters's c's.** Fr., *cellules de Deiters.* Ger., *Deiters'sche Zellen, untere äussere Deckzellen* (2d def.), *aufsteigende Hörzellen* (2d def.). Syn.: *Deiters's corpuscles.* 1. Neuroglia-c's, especially the large stellate ones. [J, 30.] 2. C's situated beneath the external hair-c's of the organ of Corti upon the basilar membrane. Each of them extends upward between the lower ends of the hair-c's, and each is prolonged toward the surface by a fine process (the phalangeal process), which is attached to one of the phalanges. [L, 31.]—**Delomorphous c.** Fr., *cellule délomorphe* (ou *pariétale*). Ger., *Belegzelle, delomorphe Zelle.* Syn.: *oxyntic c., overlying c., parietal c., superadded c.* A name given by Rollet (1870) to the granular, deeply staining c's found in the glands in the cardiac region of the stomach, next the basement membrane. They are larger than the adelomorphous c's, and in the higher animals rarely reach the lumen of the gland; in birds they completely line the secondary tubules of the true gastric glands. In the frog and other *Amphibia* these alone line the glands of the stomach, the adelomorphus c's being found in the œsophagus. Formerly these c's were called peptic c's, as they were supposed to secrete the pepsinogen, but now they are supposed to secrete acid, and are therefore often called acid c's. [J, 18, 30, 83.]—**Demilune c's of Giannuzzi.** See DEMILUNE and *Marginal c.*—**Denticulate c.** See *Prickle c.*—**Dentinal c., Dentine c.** Fr., *cellule dentinique.* Ger., *Dentinzelle.* Syn.: *calcigerous c.* 1. An odontoblast. 2. According to Retzius, one of the cavities in dentine analogous to bone lacunæ, in which the dental canals terminate. 3. According to Nasmyth and Owen, one of the solid bodies or compartments forming the matrix of dentine, containing the dental canals and forming their walls. [J, 24, 29.]—**Devouring c.** See PHAGOCYTE.—**Digestive c.** A c. producing a digestive ferment. [Mills (J, 55).]—**Direct c.-division.** Fr., *division directe des cellules.* Ger., *directe Zelltheilung.* Syn.: *akinetic* (*amitotic*, or *Remakian*) *c.-division.* The separation of a c. into two or more nearly equal parts or daughter-c's, without any apparent structural change in either c.-body or nucleus. [J, 30, 31, 64, 83.] See *C.-division* and cf. CARYOCINESIS.—**Dotted c.** See *Pitted c.*—**Double-fluid c.** See *Two-fluid c.*—**Drain-pipe c.** See *Cannulated c.*—**Drone-c.** A c. (def. 1 B) in a bee-hive in which a drone-bee is reared. [L, 121.]—**Dry c.** A galvanic c. containing no liquid. [B.] See *Dry* BATTERY.—**Drysdale's c.** See *Ovarian* CORPUSCLE.—**Ectodermal c.** A c. derived from the ectoderm of the embryo. [J.]—**Egg-c.** Ger., *Eizelle.* See *Germinal c.* (1st def.), OOSPHERE, and OVUM.—**Electric nerve-c.** One of the nerve-c's, of rounded form and with very prominent axis-cylinder processes, found in the central nervous system (myel or electric lobes) of electric fishes. They are connected with the electric organs through nerves, and are supposed to be modified motor c's which control the production and discharge of electricity. [J, 31, 84, 124.]—**Elementary c.** 1. An embryonic c. 2. A name sometimes applied to the white blood-corpuscles. [J; L, 318.]—**Embryo c.** 1. See *Embryonic c.* (1st def.), and BLASTOMERES. 2. As used by Thomson and by Carpenter, the germinal vesicle after fertilization; upon the supposition that the germinal vesicle is the anatomical equivalent of a somatic c. [J, 46, 111.]—**Embryonal c., Embryonic c.** Lat., *cellula primordialis.* Fr., *cellule embryonnaire* (ou *embryonale*). Ger., *Embryonalzelle, Primordialzelle.* It., *cellula embrionale.* Syn.: *elementary c., formative c., primary c., primitive c., primordial c.* 1. One of the c's which arise from the division of the ovum; a term especially employed when the process of segmentation has advanced so far that the c's are very small. These c's are so called because they give rise to the various tissues and organs of the embryo. 2. A c. in the adult, such as the lymph c's or wandering c's, which presents the character of an embryonic c. (1st def.). [Waldeyer, "Arch. f. mikr. Anat.," xi, p. 176 (J, 67).] 3. A c. formed during the metamorphosis of insects by histolysis of the larval tissues. [Viallanes, "Ann. des sci. nat.," xiv (1882), p. 1 (J).] 4. In the ovary of angeiosperms, a name applied collectively to the three c's (the oosphere and the two synergidæ) at the upper part of the embryonic sac. [B, 106.]—**Embryoplastic c's.** Fr., *cellules fibroplastiques* (ou *plasmatiques*). It., *cellule embrioplastiche* (o *plasmatiche*). Syn.: *embryoplastic bodies, fibroplastic bodies* (or *c's*). C's originally from the mesoblast which are at first similar to lymph corpuscles. They become fusiform or stellate, and in developing connective tissue form the so-called fixed connective-tissue corpuscles. [J, 31, 33.]—**Enamel c.** Fr., *cellule de l'émail.* Ger., *Schmelzzelle.* Syn.: *enamel-body, adamantoblast.* One of the columnar c's forming the layer of the enamel-organ next the dentine papilla. They are supposed to form the enamel prisms by the deposition of lime or by themselves becoming calcified. [J, 26, 30, 35.]—**Encasing c.** See *Cover-c.*—**Enchyma c., Enchymatous c.** See *Gland-c.*—**Enclosed c's.** Lepocyta (*q. v.*). [J.]—**Enclosing c.** See *Supporting c.*—**End-c.** See *Sensory c.* and NEURO-EPITHELIUM.—**Endogenous c.-formation, Endogenous c.-multiplication.** Fr., *division endogène cellulaire.* Ger., *endogene Zellbildung.* See *Internal c.-formation.*—**Endothelial c., Endothelial c.-plate, Endothelioid c.** Fr., *cellule endothéliale.* Ger., *Endothelzelle.* It., *cellula endoteliale.* Syn.: *endothelium, endothelial element* (or *plate*), *pavement corpuscle.* 1. One of the c's which in a single layer line the lumen of the various parts of the vascular system and the membranes of the serous cavities generally, such as the pleura and peritonæum. The typical form of c. is flat and plate-like, with an irregular, often sinuous outline. In the variety known as germinating endothelium, the c's are club-shaped or columnar, and in the frog bear cilia. [J, 30, 32.] For figure, see ENDOTHELIUM. 2. According to Ranvier, any flat c. from a single-layered epithelium without regard to the origin, situation, or structure of the c.; as those in the pulmonary alveoli. [J, 31.]—**Entodermal c.** A c. derived from the entoderm of the embryo. [J.]—**Epidermal c., Epidermic c., Epidermis c.** Fr., *cellule épidermique.* Ger., *Cuticularzelle, Epidermiszelle, Oberhautzelle.* It., *cellula epidermica.* Syn.: *epidermic scale.* 1. One of the c's forming the epidermis. The c's next the true skin are rounded or approximately columnar, while those near the surface are flat and scale-like. [J.] See figure under EPIDERMIS. 2. In plants, a c. of the epidermal tissues. [B, 229.]—**Epidermo-muscular c.** See *Neuro-muscular c.*—**Epithelial c.** Fr., *cellule épithéliale.* Ger., *Epithelzelle.* It., *cellula epiteliale.* Sp., *célula epitélica.* Syn.: *epithelium c., epithelium, epithelial corpuscle.* One of the c's forming an epithelium. They are of various shapes and form a covering, one or more c's deep, for free surfaces. [J.] Cf. EPITHELIUM and ENDOTHELIUM, and see figure under EPITHELIUM.—**Epithelial muscular c.** See *Neuro-muscular c.*—**Epithelioid c.** A flattened connective-tissue corpuscle which with similar c's forms an epithelial- (or endothelial-) like covering in many forms of membranous connective tissue. [J, 30.]—**Epithelio-muscular c.** See *Neuro-muscular c.*—**Epithelium c.** See *Epithelial c.*—**Ethmoidal c's, Ethmoid c's.** Lat., *cellulæ ethmoidales.* Fr., *cellules éthmoïdales.* Ger., *Siebbeinzellen.* It., *cellule etmoidali.* Irregular-shaped cavities in the ethmoid bone; in the disarticulated bone, apparent, for the most part, as depressions, which are converted into c's by the adjacent bones. [L.] See *Anterior, Middle,* and *Posterior ethmoid c's* and cf. *Sphenoid c's.*—**Excretory c.** A c. performing the function of excretion. [J.] See *Gland-c.*—**External ciliated c's, External hair-c's of the organ of Corti.** Ger., *äussere Haarzellen* [Deiters], *Corti'sche Haarzellen* [Köll], *Stachelzellen* [Leydig], *absteigende Hörzellen* [Böttcher], *Stäbchenzellen* [Hensen], *obere äussere Deckzellen.* Syn.: *c's of Corti.* C's external to the outer rods of Corti, cylindrical at the upper end where they fit into rings of the reticular lamina through which the hairlets project, rounded at the lower end, on one side of which is a process attached to the basilar membrane. [L, 31, 144, 319.]—**Fat-c.** Lat., *sacculus adiposus.* Fr., *cellule* (ou *vésicule*) *adipeuse* (ou *graisseuse*). Ger., *Fettzelle, Fettbläschen.* It., *cellula adiposa.* Syn.: *adipose c.* (or *vesicle*), *fat-corpuscle, fat-vesicle, unicellular gland.* A c. situated in various parts of the body, especially in areolar tissue, which contains a greater or less amount of fat. The fat may entirely fill the c. or it may be in one or more drops or globules in the midst of the protoplasm. A nucleus is always supposed to be present, and in most cases a layer of protoplasm of greater or less thickness incloses the fat. When the protoplasm seems to be absent, the nucleus appears as a thickening in the investing membrane. Fat-c's seem to be reservoirs for nutrient matter. They are formed by a deposit of fat in connective-tissue corpuscles, in wandering c's, sometimes in pigment-c's, and in the c's of almost any tissue, as a pathological condition [J, 30, 31; Hoggan, "Journ. of the Roy. Micr. Soc.," 1879, p. 533 (J); Gage, "Proc. of the Am. Soc. of Microsc.," 1882, p. 109 (J).]—**Faure's c.** The element of a Faure's battery (*q. v.*). [B.]—**Female c., Female reproductive c.** The c. (ovum, oosphere) in plants or animals which, after fertilization by another c. (the male c.) develops into an embryo. [B, 167; J.]—**Ferment c.** Fr., *cellule à ferment.* A c. which secretes a ferment, especially one of the digestive ferments. [J, 82.]—**Fibre-c.** Fr., *cellule fibreuse, fibre-cellule* (3d def.). Ger., *Faserzelle.* 1. A name given by Schwann to c's which become elongated and then divide longitudinally to form the fibrillæ of a fasciculus of connective tissue. 2. The name given by Kölliker to the flat, moderately long c's of which the so-called hair-fibres in the cortical substance of a hair are composed. 3. In general, any c. which becomes elongated so as to form a fibre; *e. g.*, the muscle-fibre c's, and the prosenchyma c's of plants. [B; J, 24, 36, 37.]—**Fibrillated c.** Ger., *Stäbchenzelle.* One of the c's in the convoluted and looped tubules of the kidney in which the c.-body seems to be mostly composed of rods or straight fibrillæ. This appearance was first pointed out by Heidenhain ["Arch. f. mikr.

TRANSECTION OF THE GASTRIC GLANDS OF A CAT. (AFTER FREY.)



a, delomorphous c's; *b*, adelomorphous c's; *c*, cut ends of capillaries.

Anat.," 1874, p. 1). 2. A name given to c's with a fibrillated appearance lining the intralobular ducts of the salivary glands. [J, 30, 32; "Arch. f. mikr. Anat.," 1877, p. 310 (J).]—**Fibroplastic c's.** See *Embryoplastic c's.*—**Fixed connective-tissue c's.** See *Connective-tissue* CORPUSCLES.—**Flagellate c.** A c. bearing one or more flagella or vibratile prolongations; the expression is mostly confined to such c's in the *Protozoa*, but is sometimes applied to ciliated c's. [J, 124.]—**Flame-c.** A ciliated c. projecting into the fine tubes which are the beginning of the excretory system of the *Trematoda*, *Cestoda*, and *Rotifera*. [L, 121.]—**Floor-c.** Fr., *cellule de plancher.* Ger., *Bodenzelle.* It., *cellula di pavimento.* Sp., *celdilla de pavimento.* One of those auditory c's in the organ of Corti which are found at the angle which the base of each rod makes with the membrana basilaris. [F.]—**Follicular c's.** Ger., *Follikelepithelzellen*, *Granulosazellen.* 1. C's forming the membrana granulosa of a Graafian follicle. [J, 1.] 2. C's in the seminal tubules associated with the seminal c's and sometimes inclosing them, but which do not themselves develop into spermatozooids. They are supposed to be homologous with the follicular c's of the ovary. ["Arch. de biol.," 1883, p. 749 (J).]—**Foot-c.** According to Drasch, a pyriform c. in a columnar epithelium which does not reach the free surface, but is joined by a slender process to one of the sub-epithelial c's of Debove's membrane. The foot-c. may be considered as two c's united together, or the pyriform part may be looked upon as a process of the sub-epithelial c. or foot. [J, 57.]—**Forked c.** Ger., *Gabelzelle.* Syn.: *staff-c.* One of the true taste-c's in the taste-discs of the frog. Each is composed of a fusiform body inclosing an ellipsoidal nucleus. Extending toward the free surface are two or three slender processes or prongs; extending centrally are also several less regular, slender processes which are supposed to have close relations with the gustatory nerve. [J, 35.]—**Formative c.** Fr., *cellule formative* (ou *formatrice*). Ger., *Bildungszelle*, *Bildungselement.* It., *cellula embrionale.* 1. A c. which, by a greater or less metamorphosis, gives rise to a tissue at any time during the life of the individual. See *Embryonic c.* 2. A large spherical c.-like body under the blastoderm, especially of the chick. Their significance is not understood. [J, 1, 21, 24, 57.]—**Free c.-formation.** Fr., *genèse* (1st def.), *formation cellulaire.* Ger., *Freizellbildung.* Syn.: *genesis* (1st def.). 1. The formation of c's in a nutritive fluid or cytoblastema within the body by a kind of spontaneous generation, *i. e.*, without the intervention of pre-existing c's in the cytoblastema. 2. The production of one or more c's by internal c.-formation, when only a portion of the c.-protoplasm is employed in their formation. It includes several varieties of spore-formation. See figure under *Internal c.-formation.* [B, 75, 167; J, 4, 21, 24, 33, 36.]—**Fuller's c.** The element of a Fuller's battery (*q. v.*). [B.]—**Fundamental c.** A typical c. or one which has not undergone great change in character; in plants, a parenchyma c. (in its widest sense). [B, 229.]—**Furrowed c.** See *Prickle-c.*—**Fusiform c.** See *Spindle-c.*—**Galvanic c.** The element of a galvanic battery. [B.] See *C.* (1st def., *D*).—**Gangliar c., Ganglion c.** Fr., *cellule ganglionnaire.* It., *cellula gangliare.* See *Nerve-c.*—**Ganglionic c.** Fr., *cellule ganglionique* (ou *ganglionnaire*). Ger., *Ganglienzelle.* 1. See *Nerve-c.* 2. See *Pyramidal nerve-c.*—**Gas-c.** See *Gas*-CHAMBER.—**Gastric c.** A c. which has the power of assimilating food materials. [L, 120.]—**Generative c.** See *Germinal c.*—**Germ-c.** Ger., *Keimzelle.* 1. See *Female c.* 2. The germinal vesicle of a non-fertilized ovum; an expression used by Carpenter and Thomson on the supposition that the germinal vesicle is the anatomical equivalent of a somatic c. [B, 75; J, 46, 111.]—**Germinal c.** Ger., *Germinalzelle.* 1. A sexually reproductive or sexual c., a gonoblast; a c. which develops into an ovum (female c.) or into a spermatozooid (male c.). See *Seminal c's.* 2. One of the c's of a developing ovum; a term employed to indicate that from these c's all the tissues arise. 3. A fertilized ovum or one capable of developing parthenogenetically. [J, 1, 35, 55, 62; "Nature," xxxiii (J).]—**Germinating c.** A c. which is developing into new c's by division or otherwise or which is forming new tissues or a new individual. [B.]—**Germinating endothelial c.** Syn.: *germinating endothelium.* One of the polyhedral or short columnar c's occurring especially in the pleura, the omentum, and the synovial membranes, where they are in a state of active division, producing lymphoid c's or lymph-corpuscles which ultimately become white blood-corpuscles. In the frog these c's often bear cilia. [J, 32, 73.]—**Germinative c.** [Sertoli]. See under *Seminal c.*—**Giant blood-c.** Syn.: *macrocyte.* A blood-corpuscle, very much larger than the normal size for the individual or animal. They are especially abundant in anæmic and hydræmic conditions. Very minute red blood-corpuscles are apt to be present under the same conditions, so that a microscopic appearance is like that of a mixture of blood from several animals whose corpuscles differ greatly in size. [J, 125.]—**Giant-c.** Fr., *cellule géante.* Ger., *Riesenzelle.* Sp., *célula gigante.* Syn.: *colossal c.*, *giant corpuscle.* 1. A c. in any tissue or part which is considerably larger than the other tissue elements with which it is associated. It is often multinucleated. This is a general and very indefinite term. 2. Plasmodium-like masses of protoplasm formed from the fusion of amœboid c's in invertebrates [Metschnikoff, "Quar. Jour. of Micr. Sci.," 1884, p. 89 (J).]—**Giant ganglion-c.** See *Pyramidal nerve-c.*—**Giant marrow-c., Giant medulla-c.** See *Marrow-c.*—**Giant multinuclear c's of the decidua.** Fr., *cellules géantes de la sérotine.* Ger., *Riesenzellen der Placenta uterina.*

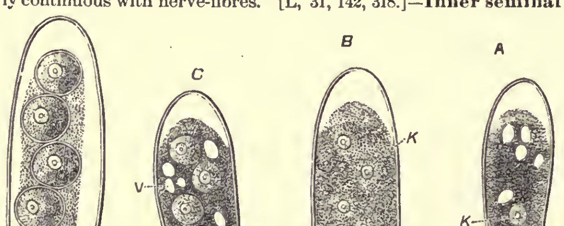


GIANT-CELLS. (AFTER FREY.)

Certain large multinucleated c's developed in the decidua of man, as well as in many of the lower animals, especially in the outer layer of the decidua serotina, of which layer during the latter half of pregnancy they have been said to be characteristic. [A, 5.]—**Gland-c., Glandular c.** Fr., *cellule glandulaire.* Ger., *Drüsenzelle*, *Enchymzelle*, *Secretionszelle.* It., *cellula d'enchima.* Syn.: *enchyma c.*, *parenchyma c.*, *secreting c.* (or *epithelium*). A c. the function of which is to separate certain constituents from the blood and elaborate them, thereby producing special secretions. [J, 24, 35.]—**Gluten c.** Ger., *Kleberzelle.* A plant-c. containing gluten. [B, 270.]—**Glutinous c.** A c. on the surface of many *Turbellarians* having minute processes and secreting glutinous substances by means of which the animal attaches itself. [L, 121.]—**Glycogenous c.** Fr., *cellule glycogène.* A c. producing glycogen, like the c's of the vertebrate liver and certain large connective-tissue c's projecting into the blood in molluscs. ["Proc. of the Royal Soc.," 1885 (J).]—**Goblet-c.** Fr., *cellule caliciforme* (ou *épithéliale glandulaire*), *glande muqueuse unicellulaire.* Ger., *Becherzelle*, *Schleimzelle*, *Becher*, *Bechergebilde*, *einzellige Drüse.* It., *cellula caliciforme.* Syn.: *beaker c.*, *chalice-c.*, *cup-c.*, *beaker*, *unicellular gland*, *Leydig's c.* A goblet or beaker-shaped body containing mucus in its free end, and found in surfaces which secrete mucus, as the mucous membrane of vertebrates and the skin of some of the lower vertebrates. (See *Clavate c.*) These c's are generally considered to be merely the ordinary c's of the surface, where they are found, which are undergoing mucous metamorphosis. Some, however, consider them unicellular glands with the special function of producing and secreting mucus. Whether, on giving up their mucus, they resume their original form or become disintegrated is not conclusively settled. [J, 25, 30, 32.]—**Granular c., Granulated c.** Fr., *cellule granuleuse.* Ger., *granulirte* (oder *körnige*) *Zelle*, *Körnchenzelle*, *Körnzelle*, *Granulosazelle* (2d def.). Syn.: *granular corpuscles*, *plasma-c's.* A c. of varying shape, possessing many shining granules, the appearance being due (*a*) to vacuoles, (*b*) to particles of a fatty substance, or (*c*) to the nodal or crossing points of the fibrils of the intracellular or intranuclear network. They are found in various situations, especially in connective tissue near blood-vessels. [J, 26, 30, 32, 35, 42.] 2. One of the c's forming the tunica granulosa of a Graafian follicle. [J, 30.]—**Granulation c.** Ger., *Granulationzelle.* 1. See *Subendothelial c.-plate.* 2. One of the c's found in wounds healing by granulation; especially such a c. when in process of fatty degeneration. [J, 108.]—**Granule-c.** See *Granular c.*—**Granule c. of blood.** See *White blood*-CORPUSCLE.—**Grenet's c.** The element of a Grenet's battery (*q. v.*). [B.]—**Grit-c.** See *Stone-c.*—**Grove c.** The element of a Grove's battery (*q. v.*). [B.]—**Growing c's of the second layer** [Brown]. See *Proliferating c's of the tubuli seminiferi.*—**Guard c., Guardian c.** Fr., *cellule stomatique* (ou *de bordure*). Ger., *Schliesszelle.* One of the pair of reniform c's which surround the slit-like orifice (ostiole) of a stoma in plants. They usually contain chlorophyll. They are developed by the fission of a small cubical c. (the mother-c. of the stoma), which is itself produced by segmentation from an epidermal c. See figure under STOMA. [B, 75, 104, 106.]—**Gustatory c.** See *Taste-c.*—**Hæmapoietic c., Hæmatopoietic c.** Fr., *cellule hémapoïétique.* Ger., *Brutzelle.* It., *cellula emapoietica.* Syn.: *brood-c.*, *vaso-formative c.* 1. A c., especially a wandering c., which, in the embryonic or immature state of animals, becomes hollow, gives rise to blood-corpuscles, and by anastomosis with similar c's forms blood-vessels. [J, 30, 31, 33.] 2. A c. producing red blood-corpuscles or vessels at any time of life. [J.]—**Hæmoglobic c.** Fr., *cellule hémoglobique.* Syn.: *protohæmoblast.* According to Malassez, a marrow-c., usually containing hæmoglobin, which is developing into red blood-corpuscles [Henry (J, 55); "Jour. of Anat. and Physiol.," xx (J).]—**Hair-c.** Fr., *cellule chevelue.* Ger., *Haarzelle*, *Stachelzelle.* It., *cellula capelluta.* Sp., *celdilla peluda.* 1. One of a number of epithelial or ganglionic auditory c's, which probably contain the terminal filaments of the cochlear nerve. Both the roof-c's and the floor-c's are hair-c's. [F.] 2. A c. forming a hair. [B.]—**Hare's c.** The element of a Hare's battery (*q. v.*). [B.]—**Head-c.** Syn.: *capitulum.* A rounded c. found in the antheridium of the *Characeæ*, upon each of the manubria. [B, 279.]—**Heckle c.** See *Prickle-c.*—**Henle's c.** See SPERMATOCYTE.—**Hensen's supporting c's.** See *Prop-c's of Hensen.*—**Hepatic c.** See *Liver-c.*—**Hill's c., Hill's gravity c.** The element of a Hill's battery (*q. v.*). [B.]—**Histogenetic c.** See *Somatic c.*—**Homogeneous c.** See *Simple c.*—**Horn-c., Horny c.** Fr., *cellule cornée.* Ger., *Hornzelle*, *Hornplättchen*, *Hornschüppchen.* It., *cellula cornea.* Syn.: *corneous c.* One of the c's of the free surface of the skin; or strictly of the stratum corneum of the epidermis. These c's contain keratin, and may be greatly modified or condensed, so as to form hairs, nails, hoofs, etc. The c's are mostly flattened or ridged, and homogeneous throughout, and often no vestige of a nucleus can be demonstrated. [J, 30, 67, 83.]—**Imbri-**

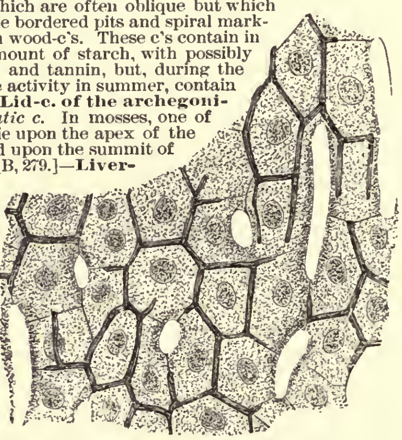
GOBLET-CELLS. (AFTER FREY.)

GRANULATION CELLS. (AFTER BILLROTH.)



cated c's. C's overlapping each other like the tiles of a roof. [C.] —**Immature c.** See *Young c.* and *Embryonic c.*—**Indifferent c.** Ger., *indifferente Zelle.* A c. without any characteristic structural features, especially a c. contained in a tissue but forming no essential part in the structure of the latter and not concerned in the special functions of the tissue; such as white blood-corpuscles or wandering c's. [J, 55, 108.]—**Indirect c.-division.** See *C.-division* and CARYOCINESIS.—**Initial c.** Fr., *cellule initiale.* One of the mass of c's which by their multiplication produce the various layers of nascent tissue (periblem, plerome, and dermatogen) in plants. The aggregations of c's which form the root-cap in phanerogams are an example of initial c's. [B, 106, 229.]—**Inner hair-c's of the organ of Corti.** Fr., *cellules du sommet* [Löwenberg].

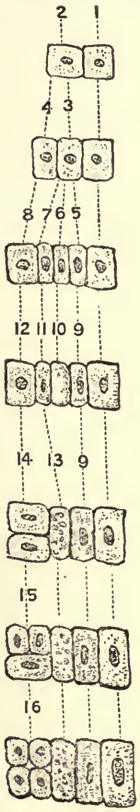
MULTIPLE CELL-FORMATION. (AFTER THOMÉ.)



A, end of one of the filaments of a species of *Saprolegnia*; by condensation of the protoplasm, the terminal portion has become somewhat darker than the rest. *B*, by the formation of a limiting membrane, the protoplasm of the terminal portion has been shut off from the rest, forming a c. which has already given rise to numerous c's (swarm-spores) by internal c.-formation. *C*, by rupture of the c. wall of the mother-c., the daughter-c's (swarm-spores) are escaping. The entire c.-body has been used up in their formation.

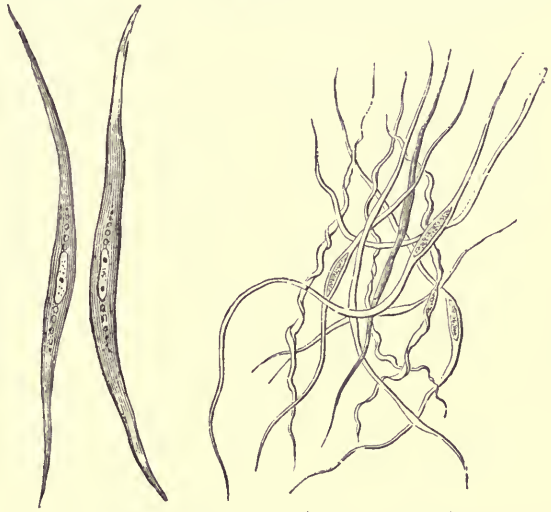
Ger., *innere Haarzellen* [Kölliker], *obere innere Hörzellen* [Böttcher]. A row of columnar epithelial c's on the inner side of the inner rods of Corti, terminating above in a tuft of short hairlets; below they are prolonged into a process which, according to some, is directly continuous with nerve-fibres. [L, 31, 142, 318.]—**Inner seminal c's.** See under *Seminal c's.*—**Intercalary c's.** See *C's of Langerhans.*—**Intermediate c.-mass.** 1. Intercellular substance. 2. A mass of c's between two organs or parts, as the c's between the two sides of the somatopleure in the embryo. [J, 89, 114.]—**Intermediate c's of the tubuli seminiferi.** See *Proliferating c's of the tubuli seminiferi.*—**Internal c.-formation.** Fr., *formation cellulaire interne* (ou *endogène*). The formation of new c's within the substance of the mother-c. by the division of the protoplasm of the latter. The nucleus of the mother-c. first divides into several new nuclei, and the protoplasm of the c.-body is aggregated about these in such a manner as to form new c's, which may or may not become invested with a distinct c.-membrane, while the daughter-c's are still contained within the mother-c. The new c's are finally set free by rupture of the c.-wall of the mother-c. If only a portion of the protoplasm of the mother-c. is used up in forming the daughter-c's, the process is called *free c.-formation* [Sachs]; when the whole of the protoplasm is employed, it is called *multiple c.-formation.* The process called *c.-rejuvenescence* (*q. v.*) is a variety of multiple c.-formation in which the c.-protoplasm forms one new c. instead of many c's. [B, 35, 75, 167.]—**Interstitial c's.** 1. See *Interstitial epithelial c's.* 2. Nucleated c's thickly scattered among the tailed c's of the *Cœlenterata*, from which the nematocysts are developed. [L, 322.]—**Interstitial epithelial c's.** Ger., *Zwischensubstanzzellen.* According to Klein (" Quart. Jour. of Micr. Sci.," xix, p. 125), c's of the testis and ovary, found in the connective tissue, which are the remains of the epithelium of the Wolffian body, which has not been used to form the true germinating epithelium. [J.]—**Intra-epithelial c's.** C's not belonging to an epithelium or endothelium, found between the epithelial c's proper, such as leucocytes or pseudostomatous c's (*q. v.*). [J, 73.]—**Involuntary fibre-c.** See *Muscular fibre-c.*—**Jagged c.** See *Prickle-c.*—**Keratogenous c.** A c. containing keratin, *e. g.*, a c. of the stratum corneum of the epidermis, or a c. of horn. [J, 55.] —**Kidney-c.** See *Renal c.*—**Latex-c.** A vegetable c. which alone or with other similar c's forms a laticiferous vessel. These c's have soft, compressible walls, and contain a milky, white or yellow, emulsion, the latex, which to a large extent, if not completely, replaces the c.-protoplasm (see LATEX). The latex-vessels may consist of single, unconnected, much-branched c's, or they may be made up of one or more rows of such c's which by absorption of their contiguous walls have become more or less confluent. [B, 229.]—**Latticed c.** An elongated, thin-walled c. found in sieve-tissue, and thought to be an undeveloped sieve-c., from which it differs in its diameter being smaller and its wall not having the perforations, although it presents the markings, of the sieve-discs. [B, 75.] Cf. *Cambiform c.*—**Leclanché's c.** The element of a Lelanché's battery (*q. v.*). [B.]—**Lepra-c.** Fr., *cellule du lèpre.* Ger., *Leprazelle.* One of the c's of a part affected by lepra and containing lepra *Bacilli.*—**Leydig's c.** See *Clavate c.*—**Liber-c.** See *Bast-c.* —**Libriform c.** Fr., *cellule libriforme.* Syn.: *libriform fibre.* Sanio's name for the structure constituting ordinarily the woody fibre; a c. either septate or unseptate, elongated into a spindle or fibre-shape, with thick lignified walls, and variously marked with pits which are often oblique but which are not like the true bordered pits and spiral markings of the vasiform wood-c's. These c's contain in winter a certain amount of starch, with possibly a little chlorophyll and tannin, but, during the period of vegetative activity in summer, contain only air. [B, 229.]—**Lid-c. of the archegonium.** Syn.: *stigmatic c.* In mosses, one of the four c's which lie upon the apex of the row of canal c's and upon the summit of the archegonium. [B, 279.]—**Liver-c.** Fr., *cellule hépatique* (ou *du foie*). Ger., *Leberzelle.* It., *cellula epatica.* Syn.: *hepatic c.* One of the spheroidal or polyhedral cells which form the proper glandular substance of the liver and constitute the lobules of the latter. These c's are packed around and between the vessels and are often surrounded by capillary lymphatics. They have nuclei with one or two nucleoli, and often contain granules of glycogen and pigment and, during digestion, a greater or less amount of fat. It is now supposed that the bile-ducts have their origin in the so-called intracellular channels of these c's. [C; J, 30, 32, 47.]—**Locomotive-c.** Any c. capable of independent movement; especially a c. bearing cilia which serve for locomotion. [J.]—**Lymph-canalicular c's.** Branched nucleated c's lying in the lymph-canalicular system. [J, 73.]—**Lymph-c.** See *Lymph-*CORPUSCLE.—**Lymphoid c.** Fr., *cellule lymphoïde.* Ger., *lymphoïde Zelle.* It., *cellula linfoide.* Lymph-corpuscles (*q. v.*). This term is sometimes restricted to the apparently newly formed lymph-corpuscles found in great abundance wherever dead tissue or germinating endothelia are present. [J, 30, 32.]—**Male c., Male reproductive c.** Fr., *cellule mâle.* Syn.: *seed-c.*, *sperm-c.* Any c., animal or vegetable, which, by conjugation with another c. (female c.), causes the latter to develop into a new c. or c's. The male c. is usually actively motile, being often ciliated or flagellate, and is usually much smaller than the female c. It includes the spermatozooid of animals and the spermatozooid and pollen-grain of plants. [B; J, 114.]—**Marginal c.** Fr., *cellule à protoplasme.* Ger., *Besätzkörperchen.* Syn.: *border c.*, *crescent c.*, *parietal c.*, *reserved epithe-*

FREE CELL-FORMATION. (AFTER THOMÉ.)



A, the mother-c. (ascus) of a *Peziza*, with nucleus, *K*, and vacuoles, *V*. *B*, the nucleus of *A* has divided into 8 nuclei, *K*. *C*, each nucleus has surrounded itself with a globular portion of the protoplasm of the mother c., forming a spore, *SP*. *D*, each protoplasmic mass has become inclosed in a distinct c.-membrane. Outside of the new c's thus formed there remains an unused portion of protoplasm.

LIVER-CELLS. (AFTER FLINT.)

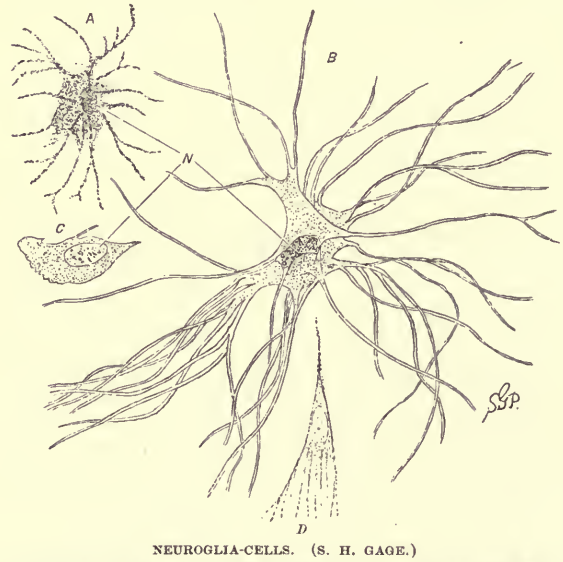


A, ape; **A²**, at; **A³**, ah; **A⁴**, all; **Ch**, chin; **Ch²**, loch (Scottish); **E**, he; **E²**, ell; **G**, go; **I**, die; **I²**, in; **N**, in; **N²**, tank;

lium. One of the small granular c's found next the basement membrane of mucous glands. By some they are supposed to replace the mucin-c's on the disintegration of the latter. In the submaxillary gland of the dog they are aggregated at one side of the alveolus in the form of a demilune (*q. v.*). [J, 30.]—**Marié-Davy c.** The element of a Marié-Davy battery (*q. v.*). [B.]—**Marrow-c's.** Fr., *cellules médullaires* (ou *de la moelle des os*). Ger., *Markzellen*, *Knochenmarkzellen.* It., *midollo-cellule.* The c's found in the marrow of bones. They include: (A) fat c's; (B) branched connective-tissue corpuscles; (C) bodies resembling lymph-corpuscles; (D) rounded nucleated c's, tinged like red blood-corpuscles and supposed to be immature red blood-corpuscles; these are confined to the red marrow; (E) large multinucleated c's, the osteoclasts, myeoloplaxes, or giant marrow-c's; (F) osteoblasts, nucleated c's of irregular form found in the marrow of developing bone. [J, 30, 32, 35, 42, 67, 83.] See also *Medullary c's.*—**Mastoid c's.** Lat., *cellulæ mastoideæ.* Fr., *cellules mastoïdiennes.* Ger., *Warzenzellen.* It., *cellule mastoidee.* Sp., *células mastoídeas.* Cellular spaces in the interior of the mastoid process, communicating with each other and with the mastoid antrum, and by one or two openings with the tympanic cavity and with the pharynx through the Eustachian tube. They are lined by a prolongation of its mucous membrane. They are formed by osseous lamellæ which cross each other in different directions, their number and size being exceedingly variable. In the larger cellular spaces connective-tissue membranes and bands are often seen. These c's are not developed until after puberty. [F, 3.]—**Matrix c's.** The follicular c's (2d def.) at an early stage of development. "Jour. of the Roy. Micr. Soc.," 1888, p. 13 (L).]—**Medullary c's.** Lat., *cellulæ medullares.* Fr., *cellules médullaires.* Ger., *Markzellen.* It., *cellule midollari.* 1. C's belonging to the medullary portion of an organ. Cf. *Cortical c.* 2. Marrow c's (*q. v.*). 3. The amœboid c's of developing cartilage-bones. [J, 21.]—**Menotti's c.** The element of a Menotti's battery (*q. v.*). [B.]—**Mesodermal c.** A c. derived from the mesoderm of the embryo. [J.]—**Middle ethmoidal** (or **ethmoid**) **c's.** Lat., *cellulæ ethmoidales mediæ.* Fr., *cellules ethmoïdales moyennes.* Ger., *mittlere Siebbeinzellen.* Cellular spaces on the upper surface of the labyrinth and closed in by the frontal bone. [L, 7, 31, 142.]—**Migrating c's, Migrating connective-tissue c's, Migratory c's.** See *Wandering c's.*—**Milk-c's.** Fr., *cellules* (ou *corpuscules*) *du lait.* Ger., *Milchzellen.* According to Kölliker, c's containing fat globules, found in the acini of the active mammary gland. They break up into milk-globules as soon as they reach the lactiferous ducts. [J, 65, 67.]—**Mind-c.** Ger., *Seelenzelle.* A large branched c. of the gray nerve-matter of the brain. [L, 146.]—**Mitotic c.-division.** See CARYOCINESIS.—**Moist c.** See *Moist* CHAMBER.—**Mother-c.** Fr., *cellule-mère.* Ger., *Mutterzelle.* Sp., *célula-madre.* A c. which by division or internal c.-formation gives rise to one or more new c's called daughter-c's. The name is especially employed in cases of multiple c.-formation (see *Internal c.-formation*), and is hence often applied to the common capsule inclosing several daughter-c's, as in cartilage. [B; J, 21.]—**Mother-c. of the embryo-sac.** Fr., *cellule-mère du sac embryonnaire.* Ger., *Embryosackmutterzelle.* Syn.: *primordial mother-c.* A c. which is destined to form the embryo-sac in plants. It is either produced directly by the growth of one of the axial c's of the nucellus, and may then be either directly transformed into the embryo-sac or may develop into *special mother-c's* (*q. v.*), the lowermost of which forms the embryo-sac; or indirectly by the bipartition of one of the c's of the nucellus (see No. 2 in figure under *Antipodal c.*). [B, 104; Engler (B, 245).]—**Mother-c. of the oosphere.** The central c. of the archegonium of gymnosperms. [B, 279].—**Mother-c. of the pollen.** Fr., *cellule-mère du pollen.* Ger., *Pollenmutterzelle.* One of the primitive c's found in the stamen, which by their division develop into pollen-grains. In most cases the mother-c. divides into four daughter-c's (*special mother-c's*), constituting a *tetrad.* The mother-c's are themselves developed either directly or by division from the c's of the archespore. [B, 104, 229; Engler (B, 245).]—**Mother-c. of the stoma.** Fr., *cellule-mère du stomate.* The vegetable c. which divides to form the two guard-c's. [B, 104.] See under *Guard-c.*—**Motor-c., Motor ganglion c., Motor nerve-c.** Fr., *cellule ganglionnaire motrice.* Ger., *motorische Nervenzelle.* A nerve-c., usually of large size, whose axis-cylinder process is supposed to be connected directly with a motor nerve-fibre. [J, 28, 30, 31, 35, 83.]—**Mucilage-c.** A plant-c. containing mucilage. [B.]—**Mucin-c., Mucous c.** [Heidenhain], **Mucus-c.** Fr., *cellule muqueuse.* Ger., *Schleimzelle.* A c. which contains or secretes mucus; particularly, a variety of the salivary c's, containing mucus but no albumin. [J, 21, 30, 35; L, 318.] See also *Goblet-c.*—**Multiple c.-formation.** Ger., *Vielzellenbildung.* A variety of internal c.-formation (*q. v.*). [B, 35.]—**Multipolar c.** Lat., *cellula multipolaris.* Fr., *cellule multipolaire.* Ger., *multipolare Zelle.* A c. having many processes or poles; a term used mostly in speaking of nerve-c's. [J.]—**Muscle-c.** Fr., *cellule musculaire.* Ger., *Muskelzelle.* 1. A general term applied to c's part or all of whose substance is contractile and acts as a muscular fibre. See *Muscular fibre-c.*, *Neuro-muscular c.* When the term is applied to the structural elements of muscular tissue, the form of muscular tissue is usually indicated, as striated muscle-c's, cardiac muscle-c's, etc. 2. According to Villanes ("Ann. des sci. nat. [zool.]," xiv, 1882, p. 1), the apparently true c's arising in the histolysis of the muscles of transforming insects by the nuclei of the muscle becoming surrounded with a c.-body. [J, 1, 56.]—**Muscular fibre-c.** Fr., *cellule-fibre*, *fibre-cellule contractile*, *cellule* (ou *fibre*) *musculaire lisse.* Ger., *contractile Zelle* (oder *Faserzelle*), *glatte* (oder *muskulöse*) *Faserzelle*, *glatte Muskelfaser*, *glatte Muskelzelle.* It., *fibra muscolare liscia*, *fibro-cellula muscolare.* Syn.: *involuntary* (*non-striped*, or *unstriped*, or *smooth*, or *plain*) *muscle-fibre* (or *muscle-c.*). The name given by Kölliker (1848) to the contractile c's of an elongated spindle shape, forming fasciculi or continuous membranes, and found in the alimentary canal, genito-urinary organs, blood-vessels, and, in general, in the organs of vegetative life. The contractile fibre-c's contain one or more nuclei, are inclosed in a delicate sheath, and are connected one to another by an intercellular cement similar to that uniting epithelial c's. Sometimes they are forked or very irregular in outline, and under some circumstances the c.-body shows a faint longitudinal striation, and the c.-membrane a transverse folding. In action they are slow and wholly involuntary. [J, 30, 31, 32, 34.]—**Myeloid c.** Fr., *cellule myéloïde.* One of the oval, multinuclear c's found in myeloid tumors; so called from their resemblance to the c's of the red marrow of bone.—**Myo-epithelial c.** See *Neuro-muscular c.*—**Nail-c.** Fr., *cellule de l'ongle.* Ger., *Nagelzelle.* One of the horny, irregularly polygonal or flattened, mostly nucleated c's forming the nails (ungues); they are modified epidermal c's, and, while hard and flattened on the surface of the nail, are soft and rounded next the corium. [J, 30, 35, 83.]—**Naked c.** Lat., *cellula primordialis*, *gymnocytum.* Fr., *cellule nue.* Ger., *hüllenlose* (oder *membranlose*, oder *nackte*) *Zelle.* A c. without a c.-membrane, as the white blood-corpuscles. Formerly naked c's were thought to be rare in the adult, and therefore the terms naked and primordial (or embryonic) c's were regarded as synonymous; at present it is known that the most highly differentiated c's, as those of the brain, are naked, so that the absence of a c.-membrane is no longer considered a peculiarity of embryonic c's, although it is characteristic of them. [J, 9, 31, 65.]—**Neck canal-c., Neck-c.** Fr., *cellule du col.* Ger., *Halszelle.* One of a series of small c's, usually arranged in the form of a rosette and forming the narrow neck of the flask-like archegonium of the gymnosperms. [B, 75, 104, 279; Eichler (B, 245).]—**Needle-c's.** Fr., *cellules à aiguilles.* The acuminated c's of the deep layer of the decidual c's. [A, 38.]—**Nerve-c.** Lat., *cellula nervea.* Fr., *cellule nerveuse* (ou *ganglionnaire*). Ger., *Nervenzelle*, *Ganglienzelle*, *Ganglienkörper.* It., *cellula nervosa.* Syn.: *ganglion-corpuscle* (or *globule*), *nerve-corpuscle* (or *vesicle*). A c. belonging to the nervous system. In shape nerve-c's are globular, pyramidal, spindleform, or stellate, with one or more processes. One of these processes (sometimes more) is connected with a nerve-fibre, and is called the axis-cylinder process; the remaining processes (protoplasmic processes) either end blindly or form anastomoses with similar processes from other c's. The processes, the c.-body, and sometimes the c.-nucleus, show a fibrillated structure, the fibrillations of the processes and of the c.-body appearing to be directly continuous with the fibrillæ of the axis-cylinder of the nerve with which the c. is connected. All the nerve-c's possess a nucleus, and many of them a nucleolus. Those

SCHEMATIC REPRESENTATION OF THE DEVELOPMENT OF POLLEN. (A. DUANE.)

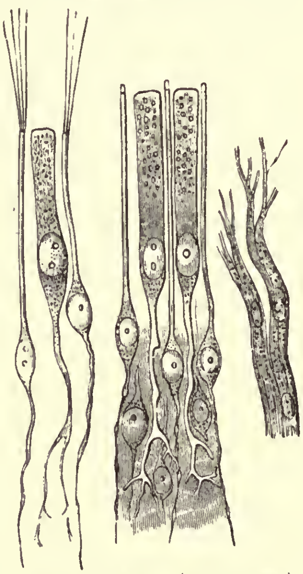
1, layer of epidermal c's (exothecium); 2, c. of the periblem layer; 3, outer, 4, inner, of the two layers into which 2 divides; 5, 6, 7, three secondary layers formed by the subdivision of 3; 8, the archespore formed by 4; 9, upper layer of c's formed by the division of 3, constituting the endothecium, which gradually loses its water and becomes thickened; 10, middle, and 11, lower, layer of c's formed by the division of 3; 12, archespore, which by processes of division indicated in 14 and 15, finally forms the tetrad (16) of daughter-c's (special mother-c's); 13, layer of tapetal c's, formed by the c's of 10 and 11, which lie nearest the archespore, the remaining c's of the middle and inferior layers having been absorbed. It contains globules of oil.



MUSCULAR FIBRE-CELLS. (AFTER J. ARNOLD.)

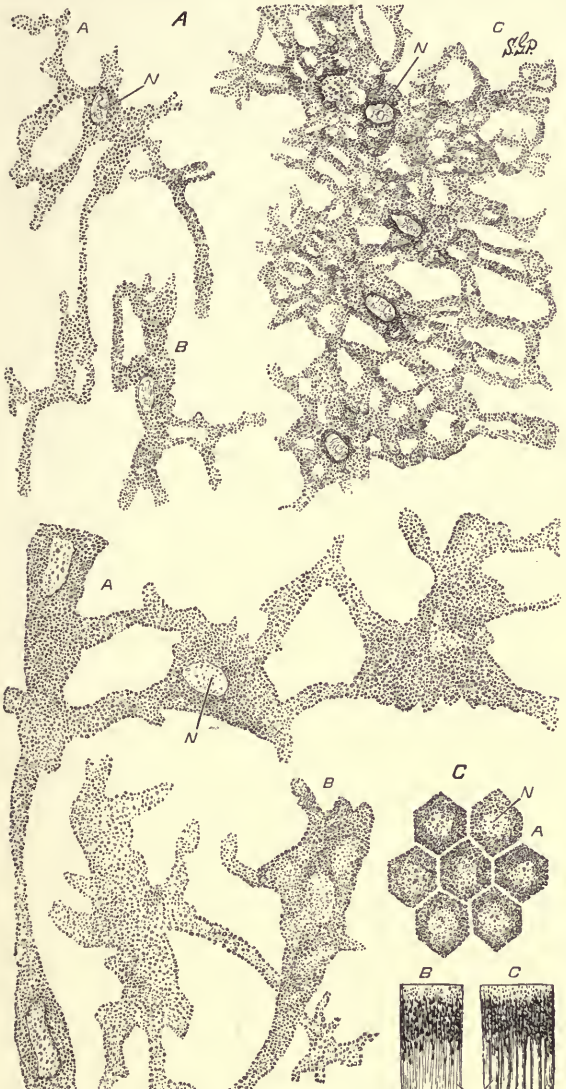
of the central nervous system (brain and myel) are usually described as naked, while those of the peripheral nervous system (spinal ganglia, ganglia of the sympathic, etc.) are inclosed in a capsule which

NERVE-CELLS. (AFTER FREY.)



is continuous with the neurilemma of the nerve-fibre which is connected with the c. Nerve-c's range in size from 6 μ (c's of the granule-layer of the cerebellum) to 126 μ (some giant-c's of the brain). [J, 10, 30, 35.]—**Nerve-epithelium c.** See *Sensory c.*—**Nervous c.** See *Nerve-c.*—**Nettle-c.** See NEMATOCYST.—**Neuro-epithelial c.** See *Sensory c.*—**Neuroglia-c.** Fr., *cellule en araignée* (ou *de la névroglie*). Ger., *Neurogliazelle*, *Gliazelle*. Syn.: *neuroglia* (or *Deiters's*) *corpuscle.* One of the c's belonging to the

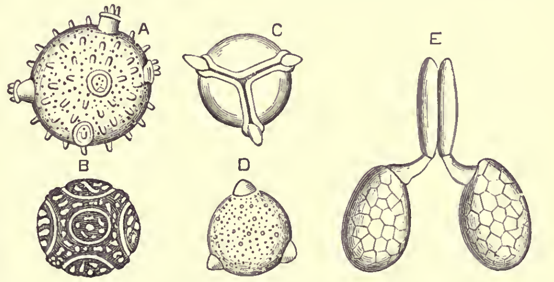
NEUROGLIA-CELLS. (S. H. GAGE.)



A, ramified neuroglia-c. with varicose processes from the cerebrum of an adult cat; *B*, large branched neuroglia-c. from the lateral column of the myel of an ox; *C*, nearly unbranched neuroglia-c. from the ventral column of the myel of man; *D*, brush or pencil neuroglia-c. from the striatum of man; *N*, nucleus of the c's. *A* and *B* after Ranvier, *C* and *D* after Krause.

neuroglia. These c's vary greatly in form, being flattened and circular or oval; often possessing few or no processes (*C* in figure), or many processes may be present, and these either varicose and branched (*A* in figure), or unbranched and extending in all directions (*B* in figure), or confined to one end like a brush (*D* in figure). They are especially abundant next blood-vessels and the pia. Some, at least, are supposed to be wandering c's. They stain like true nerve-c's, but may be distinguished from the large and medium-sized ganglion-c's by their much smaller dimensions, and from the nerve-c's of the same size by the absence of an axis-cylinder process. [J, 31, 35, 67.]—**Neuro-muscular c.** Fr., *cellule neuro-musculaire.* Ger., *Neuromuskelzelle*, *Neuromuskelfaser.* Syn.: *muscle epithelium, myoblast, bicellular apparatus.* The name given by Kleinenberg (1872) to c's in the ectoderm and entoderm of *Hydra* and other cœlenterates, which consist of a large c.-like portion on the free surface of the body or of the body-cavity, and a fibrous, smooth or striated, contractile part in the body-wall. The c. has a triple function: (*a*), that of an epithelial c.; (*b*), of a nerve-c. in so far as it receives stimuli and transmits them to the muscular portion; and (*c*), of a muscle-c. in so far as it responds to a stimulus by contracting along its long axis. [J, 1, 31; Parker, "Phil. Trans.," 1880 (J); Nussbaum, "Arch. f. mikr. Anat.," 1887 (J).]—**Notochordal c's.** Fr., *cellules du notochorde.* Ger., *Chordazellen.* The c's forming the notochord in the embryo. [Minot (J, 55).]—**Nuclear c.-division.** See CARYOCINESIS.—**Nucleated c.** Fr., *cellule nucléée.* Ger., *kernige* (oder *kernhaltige*) *Zelle.* A c. which (in opposition to a naked c.) contains one or more nuclei. [J.] Cf. CYTODE.—**Nutrient c.** Ger., *Nähr-Plastidium*, *Nährzelle*, *Nahrungszelle.* An amœboid c. which, as in the larvæ of sponges, serves for the elaboration of the nourishment of the animal. [J, 1.]—**Nutritive c.** See *Yolk-c.* (2d def.).—**Nutritive c's of the tubuli seminiferi.** A mass of c's in the tubuli seminiferi, internal to the proliferating c's, and probably derived from them. The heads of the spermatozooids project into these c's, while their tails extend into the lumen of the tubule. [C.]—**Odontoblastic c.** See *Odontoblast.*—**Oil-c.** Fr., *cellule huileuse.* Ger., *Oelzelle.* A secreting c. containing oil. [B.]—**Olfactory c.** Lat., *cellula olfactoria.* Fr., *cellule olfactive* (ou *fusiforme d'Eckhardt*). Ger., *Riechzelle*, *Riechstäbchen*, *Riechepithelzelle.* It., *celletta* (o *cellula*) *olfactiva.* Sp., *celdilla olfactoria.* Syn.: *olfactory epithelium, c. of Schultze.* One of the sensory c's of the organ of smell. As described by Schultze (1862), they are slender fusiform c's with a large spheroidal nucleus, found scattered between the original columnar epithelia of the regio olfactoria of the nasal cavity in all vertebrates. In cold-blooded animals, the olfactory c's bear one or more cilia or olfactory hairs which move to and fro with equal velocity; these have not been satisfactorily demonstrated in mammals. The central process extending from the nucleus toward the basement-membrane is varicose, and is supposed to be connected with a terminal filament of an olfactory nerve-fibre, but this also has been demonstrated only in cold-blooded animals. [J, 21, 31; "Arch. f. mikr. Anat.," xxix (J).]—**One-fluid c.** A galvanic c. which contains only a single fluid. [B.] Cf. *One-fluid* BATTERY.—**Osteal c.** See *Bone-c.*—**Outcast-c.** See *Extrusion* GLOBULE.—**Outer seminal c's.** See under *Seminal c.*—**Ovarian c.** A c. of the ovary other than an ovum. [J, 89.]—**Overlaying c.** See *Delomorphous c.*—**Ovic c.** A young ovarian ovum; a primordial ovum. [Minot (J, 55).]—**Ovoidal** (or **ovoid**) **c's of the peptic glands.** The delomorphous c's. [L, 322.]—**Ovum-c.** See OVUM.—**Oxyntic c.** See *Delomorphous c.*—**Palisade-c.** Fr., *cellule en palissade.* Ger., *Palisadenzelle.* One of a set of elongated parenchyma-c's arranged side by side in a compact row like the palings of a picket-fence. Such aggregations of c's are found especially forming a layer beneath the epidermis and cortical layers of leaves. [B, 104, 229.]—**Parapolar c's.** Fr., *cellules parapolaires.* Four c's, 2 ventral and 2 dorsal, with convex external surface, found in front of the polar c's in the *Dicyemida.* [L, 11, 321.]—**Parenchyma c's, Parenchymatous c's.** Fr., *cellules parenchymateuses.* Ger., *Parenchymazellen*, *Enchymazellen.* It., *cellule parenchimatose.* 1. The c's forming the parenchyma of an organ, especially of a ductless gland, as the spleen or liver. 2. Plasma-c's (*q. v.*). 3. In botany, a generic term for c's of the fundamental system, *i. e.*, the plant-c's which retain more or less closely the typical c.-form, in opposition to the transformed c's (fibres, vessels, etc.) which constitute the prosenchyma (tissue of the fibro-vascular system). Cf. PARENCHYMA. Parenchyma c's comprise: (A), the *c's of parenchyma* (in the more restricted sense), *i. e.*, c's more or less approximating to the spheroidal shape, and of typical consistence, found in the interior of plants; to this variety the term parenchyma c's is sometimes restricted; (B), c's resembling (*a*) in form and situation, but more or less altered in consistence (*collenchyma c's, sclerenchyma c's*); (C), *epidermal c's* including all the forms of trichomes; (D), cork-c's. Parenchyma c's have been divided, according to their shape, into *spheroidal, polyhedral, cuboidal, tubular, ramose,* and *stellate c's.* [B, 75, 229; J, 26, 30, 35.]—**Parent-c.** 1. A mother-c. 2. A name formerly given to the Graafian follicle. 3. The fertilized ovum. See CYTULA. [J, 111, 114.]—**Parietal c.** Fr., *cellule pariétale.* Ger., *Belegzelle.* 1. A term used by Heidenhain to denote the c's of a gland next the basement-membrane. [C; J.] See *Delomorphous c.* and *Marginal c.* 2. In the formation of pollen, one of a layer of c's formed along with the primary tapetal c's and lying external to the layer of tapetal c's which line the pollen mother-c's. See 9 in figure under *Mother-c. of the pollen.* [B, 279.]—**Pavement-c.** Fr., *cellule*

OLFACTORY CELLS. (AFTER FREY.)



aplatie (ou *pavimenteuse*). One of the flat c's which form pavement epithelium. [J.]—**Pepsin-c., Peptic c.** Fr., *cellule à pepsine.* Ger., *Labzelle, Pepsinzelle.* It., *cellula a pepsina.* A c. of the gastric glands, which secretes pepsin. [J.] See *Adelomorphous c.*—**Periosteal c., Periosteum-c.** A c. of the periosteum. These c's are of two kinds—those of the ectal (outer) layer, consisting of fat-c's and other c's common to connective tissue, and those of the ental layer, or layer next the bone. The latter in adult bones are flattened, but in growing bone they are mostly rounded and form a kind of epithelium on the surface of the bone. Stellate c's and

VARIOUS FORMS OF PIGMENT-CELLS. (S. H. GAGE.)

A, from the peritonæum of *Necturus*; *a*, *b*, branched pigment-c's of a simple form; c, pigment-c's with numerous branched and anastomosing processes and an example of the most complicated form of pigment-c's; *n*, *n*, nucleus. *B*, c's from the lamina suprachoroidea of man; *a*, several c's connected by their processes; *b*, branching c. unconnected with others; c, c. without apparent nucleus; *n*, nucleus. *C*, c's from the pigment-layer of the human retina; *a*, view of the ends of the c's resting on the chorioid; *b*, *c*, side view of two c's, with the pigment in the middle of the c's and fine processes (*d*) extending between the rods, which in c are represented as still in position; *n*, nucleus. *A* from drawing by S. H. Gage; *B*, from Key and Retzlus; *C*, after M. Schultze.

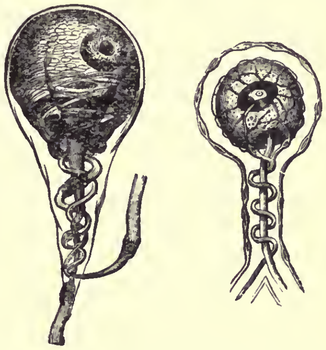
other forms of connective-tissue c's are also found in the ental layer. [J, 1.] Cf. OSTEOBLAST.—**Perithelial c.** Fr., *cellule perithéliale.* Ger., *Perithelzelle.* One of the c's forming a perithelium. [J, 67.]—**Peritoneal c.** One of the endothelial c's forming the peritonæum. [J, 29.]—**Perivascular c's.** See *Circumvascular c's.*—**Physaliphorous c's.** Fr., *cellules physaliphores.* Virchow's term for the vesicular c's met with in vesicular degeneration of the chorion. [A, 38.] See also PHYSALIDE and *Vesicular* MOLE.—**Pigment-c., Pigmented c.** Fr., *cellule pigmentaire.* Ger., *Pigmentzelle, pigmentirte Zelle.* It., *cellula pigmentaria.* A c. in which the c.-body (but not the nucleus) contains minute masses or crystals of pigment. In the higher animals, the pigment is black or brown, but in the lower animals it is often white, yellow, or red. Pigment-c's may be in the form of an epithelium, as in the pigment-layer of the retina. In man, pigment-c's are found in the eye, ear, nose, spleen, skin, and several other situations. In the cold-blooded animals, pigment-c's are very widely distributed throughout the body, being especially abundant in the true skin and in serous membranes, where they are generally of stellate or ramified form; they may also contain fat. Those in the corium in many animals give rise to changes of color either by drawing the c.-processes in and assuming an approximately spherical form, or, according to some, by heaping up the coloring matter around the nucleus without really withdrawing the c.-processes. [J, 21, 30, 83; "Proc. of the Am. Soc. of Microsc.," iv, 1882 (J).] Cf. CHROMATOPHORE.—**Pigmented connective-tissue c.** Fr., *cellule conjonctive pigmentée.* A connective-tissue corpuscle containing pigment. [J, 83.]—**Pigmented epithelial c.** Fr., *cellule épithéliale pigmentée.* An epithelial c. containing pigment; as in the respiratory region of the nose. [J, 30, 83.]—**Pitted c.** Fr., *cellule à ponctuation aréolée.* Ger., *behöftgetüpfelte Zelle.* A vegetable c. in which a circumscribed portion of the c.-wall remains thin while the surrounding portions become progressively thickened, thus giving rise to a depression, which, as the surrounding walls overarch it, becomes a pit covered with a perforated dome. Commonly two such c's are contiguous and the thin partition between the pits of each is broken down, leaving a cavity of double-convex shape, common to the two cells and included between them. Such c's exhibit under the microscope the appearance of two cencentric rings, one ring representing the perforation leading from the c. to the pit, the other representing the pit itself. [B, 34, 35, 75.]—**Planté's c.** The element of a Planté's battery (*q. v.*). [B.]—**Plasma-c.** Lat., *cellula plasmatica.* Fr., *cellule plasmatique.* Ger., *Plasmazelle.* It., *cellula plasmatica.* 1. Waldeyer's name for certain large, coarsely granular c's of connective tissue, similar to wandering c's but larger, more granular, and with much less marked amœboid movement. They are especially abundant in the interstitial substance of the testis. 2. See *Plasmatic c.* [J, 42, 83; "Arch. f. mikr. Anat.," 1875 (J).]—**Plasmatic c.** Fr., *cellule plasmatique.* Ger., *plasmatische Zelle.* It., *cellula plasmatica.* A name given by Virchow (1861) to the anastomosing, branched connective-tissue corpuscles which were supposed to become hollow and to form the origin of the lymphatic capillaries. [J, 31, 33, 34.]—**Pneumatic c.** See *Air-c.*—**Poggendorf's c.** The element of a Poggendorf's battery (*q. v.*). [B.]—**Polar c's.** Fr., *cellules polaires.* Ger., *polare Zellen.* 1. See *Extrusion* GLOBULE. 2. A circle of ectodermic c's, usually consisting of two rows of 4 c's each, which form an enlargement at the apical pole of the *Dicyemida.* [J; L, 11, 321.]—**Pollen-c.** Fr., *cellule du pollen.* Ger., *Pollen-*

DIFFERENT FORMS OF POLLEN-CELLS. (AFTER THOMÉ.)

A, *Cucurbita pepo*; *B*, *Passiflora*; *C*, *Cuphea*; *D*, *Dipsacus fullonum*; *E*, united pollen-c's (pollen-mass) of *Cynanchum vincetoxicum.*

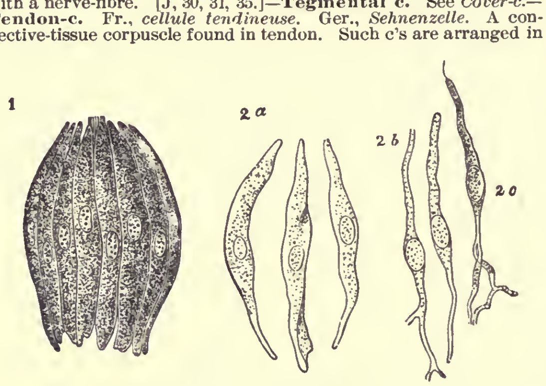
zelle. The male reproductive c. of the flowering plants. These c's aggregated together constitute the pollen which is lodged in the loculi of the anthers. They develop from the mother-c. of the pollen. (See figure under the latter.) The pollen-c's are variously shaped, and are often curiously sculptured externally. They consist of a mass of liquid protoplasm (*fovilla*) containing sugar and granules of fat, starch, etc., inclosed in a double c.-wall, an external firm one (*extine*), and an internal more delicate one (*intine*). In the process of fertilization the extine is ruptured and the intine is prolonged into a tube which comes into direct contact with the germ-c. of the ovary, thus allowing the protoplasm of the two c's to fuse. [B, 34, 75, 104, 106.]—**Polyhedral c.** Fr., *cellule polyédrique.* Ger., *polyëdrische Zelle.* A c. of approximately equal length, breadth, and thickness, having several flattened sides. In plants it is one of the varieties of parenchyma c's. [B, 75; J.]—**Porous c.** Fr., *cellule ponctuée* (1st def.). Ger., *Porenzelle, getüpfelte Zelle.* 1. A vegetable c. which has a rounded opening in the c.-wall. One variety is the pitted c. (*q. v.*). 2. A jar of porous material to contain one of the liquids of a galvanic battery, as in the Grove battery. [B; J.]—**Posterior ethmoidal c's.** Lat., *cellulæ ethmoidales posteriores.* Fr., *cellules ethmoïdales postérieures.* Ger., *hintere Siebbeinzellen.* Spaces in the posterior part of the labyrinth of the ethmoid bone, closed in by the palate bone. [L, 7, 31, 142.]—**Preseminal outcast c.** See *Extrusion* GLOBULE.—**Prickle-c.** Fr., *cellule dentelée* (ou *crénelée*). Ger., *Riffzelle, Stachelzelle.* It., *cellula cigliata* (o *spinosa*). An epidermic or epithelial c. which is connected with another similar c. by delicate threads of protoplasm (intercellular bridges), and which, when isolated, appears as if covered with spines. Prickle-c's are most easily demonstrated in the rete mucosum. [Martyn, "Trans. of the Bristol Med.-chir. Soc.," 1878, p. 122, and Klein, "Quart. Jour. Micr. Sci.," 1879, p. 165 (J, 26, 31).] See also PROTOPLASM.—**Primary c.** Fr., *cellule primaire.* Ger.,

primäre Zelle. 1. An embryonic c. 2. Any simple or undifferentiated c. 3. A c. which is not formed by the coalescence of other c's. 4. One of the less differentiated seminal c's which become modified into the secondary c's or vesicles of evolution from which the zoosperms are directly developed. Not often used in this sense at present. [J, 36, 37, 111.] Cf. *Secondary c.*—**Primary c.-wall.** Fr., *paroi cellulaire primaire.* Ger., *primäre Zellwand.* Properly, that one of several successively formed c.-walls which is generated first. Hence, as formerly applied, the middle lamella or intermediate wall lying between the c.-walls of two contiguous c's in vegetable tissues; so called because it was thought to be primarily a wall common to the c's generated at the time of their first formation and by subsequent development giving rise to the individual c.-walls, which were hence called *secondary.* [B, 75; J, 34, 62.]—**Primary germ-c.** See *Primitive germ-c.*—**Primary lymph-c.** A protoleucocyte. [J.]—**Primary tapetal c.** 1. In the development of the pollen, a term applied to one c. of the layer of c's (No. 3 in the figure under *Mother-c. of the pollen*) formed along with the archespore by division of the c's of the periblem, and also to the derivatives of this layer (tapetal c's, 7 and 10 in the figure) immediately investing the archespore. 2. In the development of the ovary, the upper of the two c's into which the primitive c. of the embryo-sac divides. (See No. 1 in the figure under *Antipodal c.*) [B, 279.]—**Primitive c.** See *Embryonic c.*—**Primitive germ-c.** (or **germinal c.**). A c. in the embryo which in the adult develops into a germinal c. (a spermatozooid in the male or an ovum in the female). [J, 55; Geddes (J, 56).]—**Primordial c.** Lat., *cellula primordialis.* Fr., *cellule primordiale.* Ger., *Primordialzelle, Primitifzelle.* It., *cellula primordiale.* 1. See *Embryonic c.* (1st and 2d def's). 2. In botany, also a naked c. [B, 167; J.]—**Primordial mother-c.** Fr., *cellule-mère primordiale.* See *Mother-c. of the embryo-sac.*—**Principal c.** See *Adelomorphous c.*—**Prismatic c.** Fr., *cellule prismatique.* A c. of prismatic form; in plants, one of the varieties of prosenchyma c's. [B, 75; J.]—**Progamous c.** That one of the two c's formed in the pollen-grain which is destined to produce fertilization and which contains the sperm-nucleus. [B, 279.] Cf. *Vegetative c.*—**Proliferating c.** A c. undergoing the process of division. [J.] Cf. *C.-division.*—**Proliferating c's of the tubuli seminiferi.** Syn.: *growing c's of the second layer* [Brown, "Quart. Jour. of Micr. Sci.," xxv, 1885, p. 343], *seminiferous c's* [Sertoli, Renson, *et al.*], *intermediate c's* [Schaefer]. The c's forming the middle of the three c.-layers described by Schaefer in the seminal tubules of the rat. They actively divide and form, according to Schaefer, the nutritive c's of the third layer and also the spermatozooids. [J, 30; "Quart. Jour. of Micr. Sci.," xxv (J).] Cf. Spermatogenesis.—**Propagative c.** See *Reproductive c.*—**Prop-c's of Hensen.** Cylindrical epithelial c's beneath the outer hair-c's of the organ of Corti, which, as they descend, become shorter and finally pass into cubical c's in the zona pectinata. [L, 318.]—**Prosenchyma c's.** Fr., *cellules prosenchymateuses.* Ger., *Prosenchymazellen.* It., *cellule prosenchimatose.* A collective term for those modified plant-c's which constitute fibres and vessels; *i. e.*, have a more or less elongated form, and hence comprise the cylindrical, prismatic, and fusiform c's. They include the typical wood-c's (wood-fibres, libriform c's, secondary wood-c's), the vasiform wood-c's (tracheids, tracheæ, and pitted c's), the modified c's constituting ducts (dotted c's, spiral c's, annular c's, reticulated c's, trabecular c's), and the bast-c's. [B, 75, 229.]—**Protective c.** See *Cover-c.*—**Prothallium c.** The vegetative c. of a pollen grain. [B, 279.]—**Protoplasmatic c.** Ger., *protoplasmatische Zelle.* A c. composed of protoplasm; a term used mostly of c's retaining a simple or embryonic character, as the white blood-corpuscles. [J, 55, 69.]—**Pseudostomatous c.** A c. in the subepithelial layer of a mucous or serous membrane which sends processes between the epithelial c's proper to the free surface. The exposed ends of these processes stain deeply with silver and form the so-called pseudo-stomata. [J, 73.]—**Pulmonary c.** Fr., *cellule pulmonaire.* Ger., *Lungenbläschen.* See *Air-c.* (1st def.).—**Purkinje's c's.** See *C's of Purkinje.*—**Pus-c.** Fr., *cellule du pus, globule pyoide* (ou *du pus*). Ger., *Eiterzelle, Eiterkörperchen.* It., *cellula purulenta* (o *piode*), *corpuscolo purulento.* Syn.: *pus-corpuscle, pus-globule, pyoid corpuscle.* One of the c's which constitute the solid portion of pus, and which are also found in the substance of inflamed tissues. They are apparently identical with leucocytes, and are supposed to be derived from the blood by a migration of the white corpuscles through the capillary walls and from the surrounding tissues by the collection and proliferation of the wandering c's normally present therein. [J, 77, 108, 109.]—**Pyramidal ganglion c., Pyramidal nerve-c., Pyramid-c.** Fr., *cellule ganglionnaire pyramidale.* Ger., *Pyramidenzelle.* A multipolar c. of the cerebral cortex, having a pyramidal form with the apex of the pyramid directed toward the free surface of the brain. From the base of the c. arise several processes named from their position lateral and middle base processes, that from the middle of the base being also called the axis-cylinder process because it is continuous with a nerve-fibre. In the third stratum of the cortex these c's are so large—sometimes 50 μ by 126 μ—that they are often called giant ganglion c's. [J, 10, 30, 31, 35, 83.]—**Queen-c.** A c. (1st def., B) in a bee-hive in which the queen-bee is reared. [L, 121.]—**Ramified c., Ramose c.** Fr., *cellule ramifiée* (ou *rameuse*). Ger., *ästige Zelle.* It., *cellula ramificata* (o *ramosa*). A general term used to designate c's with many processes, especially when the processes are irregular or secondarily branched; in botany, constituting one of the varieties of parenchyma c's. It includes the multipolar and stellate c's (*q. v.*). [B, 75; J, 83, 110.] For illustration, see under *Neuroglia c.*—**Ranvier's c's.** See *Tendon-c.*—**Rauber's c's.** Ger., *Rauber'sche Schicht.* Flattened c's (first distinctly pointed out by Rauber in 1875) on the ectal or upper surface of the epiblast in the rabbit's blastoderm; they are believed to be merely protective in function, and disappear soon after the sixth day. [J, 1, 30, 69, 75.]—**Red blood-c., Red c.** See *Red blood*-corpuscle.—**Remakian c.-division.** See *Direct c.-division.*—**Renal c.** Fr., *cellule rénale.* Ger., *Nierenzelle.* It., *cellula renale.* One of the c's of the proper glandular portion or tubules of the kidney. [J.]—**Rennet-c.** See *Peptic c.*—**Reproductive c.** Fr., *cellule réproductrice.* A c. which develops into one or more new c's. It comprises the asexual reproductive c. and the sexual reproductive c. (germinal c.), the latter including the male and the female c. It is sometimes restricted, however, to mean only the sexual reproductive c. [B, 167.]—**Resin-c.** Fr., *cellule résineuse.* Ger., *Harzzelle.* A vegetable c. containing resin. [B, 229.]—**Resting-c.** Syn.: *resting spore.* A unicellular organism (usually a spore) which has become dormant, so as to exhibit neither motion nor other functional activity. [B, 279.]—**Rete c's.** The c's of the rete mucosum of the skin. [J.] See figure under Epidermis.—**Reticulate c., Reticulated c.** Fr., *cellule réticulée.* Ger., *Netzzelle, Fadennetzzelle.* 1. Of Török ("Arch. f. mikr. Anat.," 1887, p. 777), one of the large c's in the skin of *Amphibia* which show a very coarse network in the c.-body and a finer network in the nucleus. They are thought to be specially modified goblet-c's. 2. In botany, a c. regarded usually as a modification of a spiral c., in which the c.-wall presents a network of interlaced raised bands produced by a process of localized thickening. Such c's are usually found forming the ducts of plants (reticulated vessels), and are hence a variety of prosenchymatous c's. [B, 75, 229; J.]—**Rhizogenic c.** Fr., *cellule rhizogène.* Ger., *rhizogene Zelle.* A c. of the peripheral layer of the central cylinder of a root, so called because from these c's are derived some or all of the tissues of the root-branches. [B, 229.]—**Ribbed c.** See *Prickle-c.*—**Riff-c.** See *Prickle-c.*—**Ringed c.** See *Annular c.*—**Rod-c., Rodded c.** See *Fibrillated c.* and *Staff-c.*—**Roof-c.** Fr., *cellule de toit* (ou *de voûte*). Ger., *Dachzelle.* It., *cellula di tetto.* Sp., *celdilla de tejado.* 1. See *Cover-c.* 2. One of the c's in the organ of Corti, found on the convex side of the roof formed by the union of the two rows of arches. [F.]—**Royal c.** See *Queen-c.*—**Salivary c.** Fr., *cellule salivaire.* Ger., *Speichelzelle.* One of the epithelial or glandular c's lining the alveoli of the salivary glands. [J, 43, 83.] Cf. *Salivary* corpuscle.—**Sarcogenic c.** Lat., *sarcoglia.* Fr., *cellule musculo-formative* (ou *myogène.* ou *myogénique*). An embryonic muscular fibre; a c. which develops into a muscular fibre. [J, 31; Bowman, "Phil. Trans.," 1840 (J).]—**Scalariform c.** Fr., *cellule scalariforme.* Ger., *Leiterzelle.* A plant-c. marked with numerous parallel, narrow and elongated, bordered pits set close together like the rounds of a ladder. They are especially frequent in c's forming ducts. [B, 229.]—**Scale-c.** See *Endothelial c.*—**Scaly c.** A scale-like flattened c.; especially an epithelial or endothelial c. [J.]—**Sclerenchyma c., Sclerenchymatous c.** Fr., *cellule sclérenchymateuse.* Ger., *Sclerenchymazelle.* A c. of sclerenchymatous tissue. [B.] See Sclerenchyma and under *Stone-c.*—**Sclerotic c., Sclerotic parenchyma c.** Fr., *cellule sclèreuse.* See *Stone-c.*—**Sebaceous c.** Ger., *Talgzelle.* One of the c's of a sebaceous gland. [J.]—**Secondary c.** Fr., *cellule secondaire.* Ger., *sekundäre Zelle.* It., *cellula secondaria.* 1. A c. formed by the coalescence of several c's. Cf. Syncytium. 2. According to Thomson (J, 46), the germinal vesicle after fertilization or the first segmentation nucleus; so called because the germinal vesicle of the ovum was thought to be the morphological equivalent of a somatic c. 3. As used by the older physiologists, one of the modified c's from which the zoosperms are directly developed. Cf. Spermatogenesis. [J, 36, 37, 49, 111.]—**Secondary c.-wall.** The proper c.-wall of a plant-c. as opposed to the primary c.-wall (middle lamella) lying in the interspace between two adjacent c's. It was so-called because it was at one time regarded as a secondary growth deposited upon the middle lamella. [B, 75.]—**Secreting c.** A c. which forms and throws off some secretion. [J.] See also *Gland-c.*—**Secretion c.** A c. which is thrown off with the secretions and which probably acts as a ferment. [Lankester, "Quart. Jour. of Micr. Sci.," xxi, p. 125 (J).]—**Secretory c.** See *Secreting c.*—**Seed-c.** See *Male c.*, Zoosperm, and Spermatozooid.—**Segmentation c.** Lat., *segmentellum.* Fr., *cellule* (ou *sphérule*) *blastémique, globule de segmentation.* Ger., *Furchungszelle, Dotterzelle.* It., *cellula di segmentazione.* Syn.: *blastomere.* One of the segments formed by the division of the ovum which develop into the



PRICKLE-CELLS. (AFTER ROBINSON.)

A PYRAMIDAL NERVE-CELL. (FROM GAGE, AFTER RANVIER AND KOSCHEWNIKOFF.)



A, apex-process extending toward the free surface of the brain; *B*, lateral base-processes; *C*, middle-base process (axis-cylinder process); *N*, nucleus.

blastoderm and ultimately into the embryo. [J.] See frontispiece to vol. i.—**Seminal c., Seminiferous c.** Fr., *cellule séminale* (ou *spermatoblastique*). Ger., *Samenzelle, Hodenzelle.* It., *cellula seminale.* 1. One of the c's lining the seminal tubules and giving rise to the spermatozooids. There are usually several layers of these c's, the single layer of polyhedral c's next the membrana propria being designated the *outer seminal c's*, or the *germ* (or *germinative*) *c's* of Sertoli, while the c's next the lumen of the tubule, usually found in two or three layers, are known as the *inner seminal c's.* By Sertoli and Renson, the term seminal c's is limited to the proliferating c's of the tubuli seminiferi. See also Spermatoblast. 2. One of the round amœboid c's connected by processes and situated between the spermatoblasts. They are supposed to secrete the fluid part of the semen. [J, 32, 42, 56; "Quart. Jour. of Micr. Sci.," xxv (1885), and "Arch. f. mikr. Anat.," xxxi (1888) (J).]—**Sense-c., Sensory c.** Fr., *cellule sensorielle.* Ger., *Sinneszelle.* 1. In general, any c. which performs sensory functions; *i. e.*, which is adapted to receive, transmit, or appreciate sensory impressions. 2. In particular, a modified epithelial c. in an organ of special sense, connected directly or indirectly by its central end with fibrils of the nerves of the sense-organ. Such c's are named from their supposed function as olfactory c., taste-c., etc. [J; L, 210.]—**Sensory epithelial c.** Ger., *Sinnesepithelzelle.* See *Sensory c.* (2d def.).—**Sensory nerve-c.** Fr., *cellule ganglionnaire sensitive.* Ger., *sensible Nervenzelle.* A nerve-c., usually of smaller size than the motor c's, whose axis-cylinder process is supposed to be continued as a sensory nerve. [J, 28, 30, 31, 35, 83.]—**Septate c.** A c. the cavity of which is divided by partitions. [B, 229.]—**Sertoli's c's.** See *Follicular c's* (2d def.).—**Sex-c.** See *Germinal c.* (1st def.).—**Sextant-c.** One of the six c's formed in *Equisetaceæ* and ferns by the bipartition of the three original segments of the apical c. [B, 167.] Cf. *Apical c.*—**Sexual c., Sexual reproductive c.** See *Germinal c.* (1st def.).—**Siemen and Halske's c.** The element of a Siemen and Halske's battery (*q. v.*). [B.]—**Sieve-c.** Fr., *cellule criblée* (ou *grillagée*). Ger., *Siebzelle.* A vegetable c. of tubular or prismatic shape, having in the c.-wall at either end and sometimes also on the sides panels (*sieve-plates*) in which are numerous fine perforations (*sieve-pores*) allowing communication between adjacent c's and converting a series of the latter into a tube with perforated cross-partitions. These c's constitute an essential part of the fibro-vascular bundles, and by their aggregation constitute cribriform tissue. [B, 229.]—**Simple c.** Ger., *einfache Zelle.* Syn.: *protoblast.* A typical c.; one that has not yet been differentiated to form a tissue. [J, 36, 55.]—**Single-fluid c.** See *One-fluid c.*—**Sister-c.** Ger., *Schwesterzelle.* One of two or more c's formed simultaneously by the division of a mother-c. [B, 279.]—**Skeleto-trophic c.** A c. belonging to a skeleto-trophic tissue; a term used in describing the minute anatomy of the cat. [J; L, 121.]—**Slime-c.** Fr., *cellule de Leydig.* Ger., *Schleimzelle, Leydig'sche Zelle.* See *Clavate c.*—**Smee's c.** The element of a Smee's battery (*q. v.*). [B.]—**Smooth-muscle c.** See *Muscular fibre-c.*—**Solitary c.** Fr., *cellule solitaire.* Ger., *solitäre Zelle.* 1. A c. (especially in the cerebral cortex) found by itself and not forming part of a group. 2. A unicellular organism (*e. g.*, one of the *Protozoa*). [J, 10; "Jour. of the Roy. Micr. Soc.," 1888 (J).]—**Somatic c.** Fr., *cellule somatique* (ou *histogénique*). One of the c's which compose the body, characterize the individual, protect and nourish the reproductive c's, and finally die, being thus distinguished from the reproductive c's, which perpetuate the species. ["Nature," xxxiii, 1885 (J); J, 56; L, 294.]—**Special mother-c.** Fr., *cellule-mère spéciale.* A name given by Warming to each of the four (sometimes three) c's produced by the successive division of the primitive c. destined to form the embryo-sac in the gamopetalous *Dicotyledons.* The lowermost of these c's usually develops into the embryo-sac, the other c's being absorbed by its expansion. The same term is applied to the c's produced by the division of the mother-c. of the embryo-sac in *Monocotyledons* and the *Dialypetalæ.* See Figures 6, 7, 8, 9 in the illustration under *Antipodal c.* It is also given to the 4 c's produced by the division of the mother-c. of the pollen. See 16 in illustration under *Mother-c. of the pollen.* [B, 104, 167, 245.]—**Spermatic c., Sperm-c.** Fr., *cellule spermatique.* Ger., *Samenzelle.* 1. A c. which ultimately develops into spermatozooids, or one which in plants contains spermatozooids. 2. A spermatozooid. [B, 75, 167; J, 56; L, 146.] See *Seminal c.*, *Male c.*, and Spermatozooid.—**Sphenoid c's.** Irregular c.-like cavities in the sphenoid bone. [B.]—**Spheroidal c.** Fr., *cellule sphéroïdale.* Ger., *sphäroidale Zelle.* A c. of approximately spherical form; in plants, a variety of the parenchyma c's. [B, 75; J.]—**Spider-c.** See *Neuroglia c.*—**Spindle-c.** Fr., *cellule fusiforme.* Ger., *Spindelzelle.* It., *cellula fusiforme.* A c. of fusiform shape; in plants, a variety of prosenchyma c. [B, 75; J.]—**Spinous c.** See *Prickle-c.*—**Spiral c.** Fr., *cellule spirale.* Ger., *spirale Zelle.* A vegetable c., usually more or less elongated in form, having spiral thickenings upon the c.-wall. *Annular c's* and *reticulated c's* are varieties of the spiral c. in which the thickening of the c.-wall takes place in special directions. [B, 34, 75.]—**Spiral fibre-c., Spiral fibre ganglion-c., Spiral fibre nerve-c.** Fr., *cellule ganglionnaire à fibre spirale.* Ger., *Ganglienzelle mit Spiralfaser.* A pyriform nerve-c. of the sympathic nervous system, connected at its smaller end with two nerve-fibres, a large straight fibre and a smaller one coiled spirally around the larger one. After extending a short distance the two fibres separate and go in different directions. These c's were first described by Beale ("Philos. Trans.," 1863). [J, 10, 20, 30, 74.]—**Splanchnic c's.** C's of the splanchnic layer of the mesoderm. [J, 89.]—**Squamous c.** See *Pavement c.*—**Stabile c.** A c. having no noticeable movement, like the fixed connective-tissue corpuscles. [J, 108.]—**Stachel c.** See *Prickle-c.*—**Staff-c.** Fr., *cellule en bâtonnet.* Ger., *Stäbchenzelle.* 1. A c. having the shape of a rod or staff, like the olfactory c's and the rods of the retina; especially applied to certain stone-c's in plants, which are blunt at the apex and less elongated than the other stone-c's. 2. A c. which is apparently made up of many minute rods or fibrillæ, like the fibrillated c's of the kidney or of the ducts of the salivary glands. [B, 23; J, 67.] See *Fibrillated c.*—**Starch-c.** A vegetable c. containing starch. [B.]—**Stellate c.** Lat., *cellula stellata.* Fr., *cellule étoilée.* Ger., *sternförmige Zelle.* It., *cellula stellata.* A ramified c., the radiating branches of which give it the appearance of a star. [B, 75; J.]—**Sterile c.** Fr., *cellule stérile.* A c. found in a reproductive organ but taking no direct part in reproduction; *e. g.*, the non-sporiferous c's on the hymenia of the *Agarici.* [J, 34.]—**Stigmatic c.** Fr., *cellule stigmatique.* 1. One of the c's forming the stigma of a flower. They are usually covered with hairs or papillæ and secrete an acid, saccharine, viscid substance. The viscid secretion and the hairs assist the pollen-grains to retain their position on the stigma. 2. See *Lid-c. of the archegonium.* [B, 77, 279; J, 62.]—**Stomach-c's.** See *Stomach*-pits.—**Stomatic c.** See *Guard-c.*—**Stone-c.** Fr., *cellule pierreuse.* Ger., *Steinzelle.* Syn.: *sclereblast.* A vegetable c. which has been rendered hard by the deposition of lignin and mineral matter and by the thickening of their c.-wall. Such c's are usually short and rounded (parenchyma c's), but are sometimes elongated (prosenchyma c's), and may occur singly or in groups or in concentric zones. In the latter case they constitute a sort of tissue often called sclerenchyma, the c's being then designated as *sclerenchyma c's*; but the term sclerenchyma is also often used as synonymous with prosenchyma and bast-tissue. Stone-c's are found in the stones of stone-fruits, in the grit of pears, etc., in the medullary rays of many woody *Dicotyledons*, and in many other situations. [B, 75, 104, 167; J, 34, 62, 110.]—**Striated c.** Fr., *cellule rayée.* A vegetable c. the wall of which exhibits striæ. [B, 104.]—**Striated epithelial c.** See *Fibrillated c.*—**Stroma-c.** One of the c's forming the stroma or mass of an organ or part. [J.]—**Subendothelial c.-plate.** Ger., *Granulationzelle.* A small granular c. found in the intima of blood-vessels. The function of these c's is unknown, but it has been suggested that they regenerate the desquamated endothelium of the vessel. [J, 35, 42.]—**Subepithelial c.** A c. at the attached part or base of an epithelium, especially one of the c's of Debove's membrane. [J.] Cf. *Basal c.*—**Suberogenous c.** Fr., *cellule subérogène.* A vegetable c. which produces cork. The inner layer of c's produced by the bipartition of a row of epidermal c's constitutes the primary layer of suberogenous c's. Each of the latter again divides into two c's, the outer of which is transformed into a cork-c., the inner becoming a new suberogenous c. destined to form a new cork-c. by its own subsequent division. [B, 106.]—**Suberous c.** Fr., *cellule subéreuse.* See *Cork-c.*—**Substitution c.** Ger., *Ersatzzelle.* Syn.: *substitute fibre.* Sanio's name for a form of typical prosenchymatous c. found in wood-tissue. [B, 229.]—**Sulphate-of-copper c.** The element of a sulphate-of-copper battery (*q. v.*). [B.]—**Superadded c.** See *Delomorphous c.*—**Supporting c., Sustentacular c.** Any c. which supports or isolates another c. having a special function; *e. g.*, the cover-c's of the olfactory c's. [J, 31, 57.] See *Cover-c.* and *Hensen's supporting c's.*—**Sustentacular c's of Deiters.** See *C's of Deiters* (2d def.).—**Swarm-c.** A naked c. moving freely by the aid of cilia. [B, 279.] Cf. *Swarm*-spore.—**Sympathetic c.** (or **ganglion-c.**, or **nerve-c.**). Fr., *cellule sympathique* (ou *ganglionnaire sympathique*). Ger., *sympathische Zelle* (oder *Nervenzelle*). A nerve-c. belonging to the sympathic nervous system in contradistinction to one belonging to the cerebrospinal system. [J, 31, 83.]—**Tabular c.** A flattened c., the vertical section of which forms an elongated rectangle; in plants, forming one of the varieties of parenchyma c's. [B, 75.]—**Tactile c's.** Fr., *cellules tactiles.* Ger., *Tastzellen.* A name given by Merkel ("Arch. f. mikr. Anat.," 1875, p. 636) to single c's or groups of c's (modified nerve-c's) in each of which is supposed to terminate part or all of the axis-cylinder of a medullated nerve-fibre, the sheath of the nerve forming a capsule for the c. or group of c's. They are described as present in considerable numbers in the rete mucosum and as forming the terminal part of the axis-cylinders in the tactile corpuscles and in the corpuscles of Grandry. [J, 30; "Arch. f. mikr. Anat.," 1881, p. 117 (J).]—**Tailed c's.** Nucleated c's forming the larger portion of the ectoderm of certain *Cœlenterata.* They are somewhat conical, the bases being situated externally and united, and terminate in one or more filiform processes which appear to be joined to the structureless membrane between the entoderm and the ectoderm. [L, 322.]—**Tannin-c.** A vegetable c. containing tannin. [B, 229.]—**Tapetal c., Tapetum c.** Fr., *cellule de la calotte.* Ger., *Tapetenzelle.* A c. which alone or with others forms a cap or investment over an organ. The name is applied especially to the c's investing the apex of the embryo-sac in many plants and formed by the division of the uppermost of the two c's derived from the bipartition of the primitive c. of the embryo-sac (see 1 and 3 in the illustration under *Antipodal c.*); and also to the c's immediately investing the archespores of the pollen (see 13 in illustration under *Mother-c. of the pollen*). [B, 104, 167; Engler (B, 245).]—**Taste-c.** Fr., *cellule gustative* (ou *du goût*). Ger., *Geschmackzelle.* One of the highly refractive, spindle-shaped c's situated in the interior of the taste-buds and supposed to be the true sensory element of the latter. It has a large clear nucleus situated at about the middle of the length of the c. That part of the c. extending from the nucleus to the surface is usually rather thick and is tipped with a thorn-like process, while the opposite half of the c. is slender and sometimes

SPIRAL FIBRE-CELLS. (AFTER CHAUVEAU.)

branched and is supposed to be connected, directly or indirectly, with a nerve-fibre. [J, 30, 31, 35.]—**Tegmental c.** See *Cover-c.*—**Tendon-c.** Fr., *cellule tendineuse.* Ger., *Sehnenzelle.* A connective-tissue corpuscle found in tendon. Such c's are arranged in

TASTE-CELLS. (AFTER FREY.)

1, gustatory bud from the rabbit; 2 *a*, cover-c's; 2 *b*, taste-c's; 2 *c*, a taste-c. with a fine terminal thread at the free end.

rows and are usually flattened and possess leaf-like processes. [J, 30, 31; "Arch. f. mikr. Anat.," 1875, p. 177 (J).]—**Thomson's c.** The element of a Thomson's battery (*q. v.*). [B.]—**Thread-c.** See NEMATOCYST.—**Tissue-c.** Ger., *Gewebszelle.* 1. A c. which, combined with other similar c's and intercellular substance, forms a tissue. 2. See *Somatic c.*—**Touch-c's.** See *Tactile c's.*—**Trabecular c.** A c. in which projections from the c.-wall extend like rafters nearly or quite across the lumen of the c. [B, 229.]—**Tracheal c., Tracheary c.** An elongated vegetable c., constituting one of the characteristic elements of woody tissue, and characterized by the presence of bordered pits and frequently of annular or spiral thickenings of the c.-walls (porous, pitted, annular, and spiral c's), and, in the fully developed c., by the absence of protoplasm, the latter being replaced by air, or air and water, or occasionally by latex. Tracheal c's include *tracheids* or *vasiform wood-c's*, distinguished by the presence of complete partitions between the c's of a series, and *tracheæ* or ducts, in which the partitions between contiguous c's are broken down so that the latter form continuous tubes or vessels. [B, 229.]—**Transformed c.** A c. which has lost its typical character; *e. g.*, one which has been converted into a fibre or vessel. In botany, in a general way synonymous with prosenchyma c. [B, 229.]—**Transition-c.** A c. which is intermediate in character between c's of two well-marked types and which is supposed to be changing from one type to the other, like the transition-c's of red marrow, which are supposed to be marrow-c's developing into red blood-corpuscles. [J.]—**Traube's c.** See *Artificial c.*—**Trouvé's c.** The element of a Trouvé's battery (*q. v.*). [B.]—**Twin-c.** A single c. which results from the fusion of two c's. [L, 318.]—**Two-fluid c.** A galvanic element in which two fluids are employed. [B.] See *Two-fluid* BATTERY.—**Typical c.** A c. which retains more or less closely its original character. [B.] See *C.* and Cf. *Fundamental c.*—**Unipolar c.** Lat., *cellula unipolaris.* Fr., *cellule unipolaire.* Ger., *unipolare Zelle.* A c. (especially a nerve-c.) having but one pole or process. [J.]—**Unseptate c.** A c. which has no partition across its lumen. [B, 229.]—**Unstriped muscle-c.** See *Muscular fibre-c.*—**Urate c's.** Of Schulze, doubly refracting bodies in the photogenic organs of certain insects, containing uric acid. [L.]—**Vacuolated c.** A c. containing one or more vacuoles. [J, 55.]—**Vascular c.** Fr., *cellule vasculaire.* 1. A c. belonging to a vessel, especially to the endothelium. 2. One of the c's forming a vessel in plants. [J, 21, 62.]—**Vasiform wood-c.** The closed variety of tracheal c. (*q. v.*). [B, 229.]—**Vasoformative c.** Fr., *cellule vaso-formative.* Ger., *vasoformative Zelle.* 1. Of Ranvier, see *Hæmatopoietic c.* (1st def.). 2. Of Hoggan ("Journ. of the Roy. Micr. Soc.," 1880, p. 568), an intercepted portion of a capillary, formed during the retrogression of blood-vessels. [J.]—**Vegetable c.** Fr., *cellule végétale.* Ger., *Pflanzenzelle.* One of the c's composing the tissues of plants. [J, 34.] Cf. *Animal c.* (1st def.).—**Vegetative c.** Fr., *cellule végétative.* Ger., *vegetative Zelle.* 1. One of the c's situated at the vegetative pole of a segmenting ovum and destined ultimately to form the entoderm as the c's at the animal pole (animal c's) form the ectoderm. See *Animal c.* (2d def.) and MACROMERE. 2. The smaller of the two cells formed by the division of the nucleus of a pollen-c. It frequently divides into several daughter-c's and takes no part in the process of fertilization. Cf. *Progamous c.* [B, 104, 245, 247, 279; J, 69, 114; L.]—**Ventral canal c.** The canal c. of the gymnosperms. [B, 279.] See *Canal c.*—**Vessel-c.** See *Vascular c.* (2d def.).—**Vessel-forming c.** [Hoggan]. See *Hæmatopoietic c.* (1st def.).—**Vitelligenous c's.** C's in the ovaries of certain insects, which during the formation of the ova are connected with the latter by a pedicle. [L, 11.]—**Voltaic c.** See *Galvanic c.*—**Walker's c.** The element of a Walker's battery (*q. v.*). [B.]—**Wander-c., Wandering c.** Fr., *cellule migratrice.* Ger., *wandernde Zelle, Wanderzelle.* It., *cellula mobile* (o *migratrice*). An expression applied by Recklinghausen ("Arch. f. pathol. Anat. u. Physiol. u. f. klin. Med.," xxviii, 1863, p. 157) to the c's, apparently identical with white blood-corpuscles, found in various tissues, especially areolar tissue, near blood-vessels and in situations where inflammatory or reparative processes are taking place. The function of the wandering c's is not well understood, but from the researches of Metschnikoff ("Quart. Jour. of Micr. Sci.," 1884, p. 112) it would appear that they are agents (*a*) in removing some part, such as the tails or gills of transforming amphibian larvæ; (*b*) in the active degeneration of nerve and muscle; (*c*) in removing any dead or irritant material, such as bacteria or dead c's. They are also supposed to take up fat and to assist in the formation of adipose tissue and perhaps of other tissues. [J, 30, 31, 32, 35, 109.]—**Whip-c.** A flagellate c. [L, 146.]—**White blood-c., White c.** See *White blood*-CORPUSCLE.—**Wollaston's c.** The element of a Wollaston's battery (*q. v.*). [B.]—**Wood-c.** Fr., *cellule de bois.* Ger., *Holzzelle.* A c. forming a part of woody tissue. The wood-c's comprise wood parenchyma c's, the typical wood-c's, more elongated than the former and often pointed and exhibiting great variety of form, the libriform c's, and the tracheal c's. [B, 229.]—**Wood parenchyma c.** A wood-c. which forms a sort of transition between a true parenchyma c. and a prosenchyma c., being more or less elongated like the latter, but differing in its relatively thinner wall in the absence of oblique slits upon the wall and in becoming septate before it becomes appreciably thickened. [B, 229.]—**Worker c.** A c. in a bee-hive containing a worker bee. [L, 121.]—**Yellow c.** Fr., *cellule jaune.* A c. of yellow color, found in the tissues of some aquatic invertebrates, such as the *Anthozoa* and *Radiolaria.* They are supposed to be the swarm-spores of some olive-green *Algæ* (*Melanospermeæ, Fucaceæ*) and to be symbiotic rather than parasitic. [J, 82.]—**Yolk-c.** Ger., *Dotterzelle* (1st def.), *Dotterbildungszelle, Einährzelle* (2d def.). 1. The ovum. 2. A c. serving for the nourishment of the ovum. Such c's are present in the platyhelminths and many insects. They are formed by a special gland or part of the ovary, and serve the same purpose as the white of the hen's egg. 3. A yolk-corpuscle. [J, 1, 23, 36, 37, 82.]—**Yolk-containing c.** A c. (*e. g.*, one of the c's at the vegetative pole of a frog's ovum) which contains a considerable quantity of nutritive yolk. [J, 1.]—**Yolk-forming c.** See *Yolk-c.* (2d def.).—**Young c.** An embryonic or immature c.; one which does not possess characteristic tissue differentiation. [J.] See also *Simple c.* and *Indifferent c.*—**Zinc-carbon c.** A galvanic c. in which the two elements employed are zinc and carbon. [B.] See *Zinc-carbon* BATTERY.—**Zinc-copper c.** A galvanic c. in which the two elements employed are zinc and copper. [B.] See *Zinc-copper* BATTERY.

CELLA (Lat.), n. f. Se^{2}l(ke^{2}l)'la^3. Gr., ταμιεῖον. 1. Anciently, an apartment in a bathing house. 2. See CELL. 3. Of Scopoli, a fruit characterized by having a pericarp composed of three layers, the external woody, the middle pulpy, and the internal dehiscent and membranous. 4. Of Batsch, the perithecium in certain *Fungi.* 5. Of B. G. Wilder, one of the cornua of the lateral ventricle of the brain. [A, 325; B, 1, 121; K.]—**C. frigidaria.** See *Roman* BATH.—**C. lateralis.** The lateral ventricle of the brain. [I, 94.]—**C. media.** The middle cornu of the lateral ventricle. [J, 17.]—**C. turcica.** See SELLA *turcica.*—**Prima c. coli.** See CÆCUM.

CELLÆFORM, adj. Se^{2}l'e-fo^{2}rm. From *cella*, a cell, and *forma*, shape. See CYTOID.

CELLARIÆA [De Blainville] (Lat.), n. n. pl. Se^{2}l(ke^{2}l)-la(la^3)-ri^2-e'(a^3'e^2)-a^3. Fr., *cellariés.* A family of the *Polypi.* [L, 180.]

CELLE (Ger.), n. Tse^{2}l'le^2. See CELL and CELLA.

CELLED, adj. Se^{2}ld. Composed of or characterized by cells (usually preceded by a word designating the kind of cell; *e. g.*, round-c., spindle-c., etc.). [J, 108.]

CELLEPORA (Lat.), n. f. Se^{2}l(ke^{2}l)-le^{2}p'o(o^2)-ra^3. Fr., *cellépores.* A genus of the *Celleporidæ.* [L, 180.]—**C. spongites** [Linnæus]. Ger., *gemeiner Schwammstein, Kropfstein.* A coralliform zoophyte the exoskeleton of which is found in sponges in the form of branching calcareous fragments which constitute one variety of the *lapides spongiarum*, formerly official. [B, 180.]

CELLEPOREÆ [Lamouroux] (Lat.), **CELLEPORIDÆ** (Lat.), n's f. pl. Se^{2}l(ke^{2}l)-le^2-po^{2}r'e(a^3-e^2), -i^{2}d-e(a^3-e^2). Fr., *celléporées.* 1. A family of infundibulate *Polyzoa* of the suborder *Cheilostoma.* 2. A family of the *Cornea.* [L, 73, 303.]

CELLEPORINA [Ehrenberg] (Lat.), n. n. pl. Se^{2}l(ke^{2}l)-le^2-po^{2}r-in(en)'a^3. See CELLEPORIDÆ.

CELLERI, n. Of Endlicher, see APIUM.

CELLERUM (Lat.), n. n. Se^{2}l(ke^{2}l)'le^{2}r-u^{3}m(u^{4}m). Of Endlicher, see APIUM.—**Radix celleri Italorum.** The root of *Apium graveolens.* [B. 180.]

CELLES-LES-BAINS (Fr.), n. Se^{2}l-la-ba^{2}n^2. A place in the department of Ardèche, France, where there are alkaline ferruginous springs. The waters are diaphoretic, diuretic and tonic, are used in catarrhal and scrofulous affections, anæmia and general debility, and have been reputed to cure cancer. [A, 363; L, 49.]

CELLICOLOUS, adj. Se^{2}l-i^{2}k'ol-u^{3}s. Lat., *cellicolus* (from *cella*, a cell, and *colere*, to inhabit). Fr., *cellicole.* Ger., *Zellbewohnend.* Dwelling in caves (*e. g.*, the *Nemesia cellicola*). [L, 41, 180.]

CELLIFEROUS, adj. Se^{2}l-i^{2}f'e^{2}r-u^{3}s. Lat., *celliferus* (from *cella*, a cell, and *ferre*, to bear). Bearing or forming cells. [L, 296.]

CELLIPORA (Lat.), n. f. Se^{2}l(ke^{2}l)-li^{2}p'o(o^2)-ra^3. See CELLEPORA.

CELLOID, adj. Se^{2}l'oid. See CYTOID.

CELLOIDIN, n. Se^{2}l-oid'i^{2}n. Collodion-wool (highly concentrated collodion produced by distilling off the ether from collodion) treated with a mixture of ether and alcohol; used in imbedding microscopic preparations. [B, 270.]

CELLULA (Lat.), n. f. Se^{2}l(ke^{2}l)'lu^2(lu^4)-la^3. Dim. of *cella*, a cell. Fr., *cellule.* Ger., *Zelle.* It., *c.* Sp., *celdilla.* 1. A small cell or crypt. 2. The perithecium or peridium in certain *Fungi*; of Bulliard, a tube of the *Polypori.* [B, 121.]—**Cellula adiposa.** See *Fat*-CELL.—**Cellula aerea.** See *Air*-CELL (1st def.).—**C. bipolaris.** See *Bipolar* CELL.—**C. bronchica.** See *Air*-CELL (1st def.).—**Cellula cartilaginea.** See *Cartilage*-CELL. [I.]—**C. ciliata.** See *Ciliated* CELL.—**Cellulæ coli.** Syn.: *haustra coli.* Small pouches or sacculations in the colon produced by constricting bands.

[L, 7, 115, 119.]—**Cellulæ ethmoidales.** See *Ethmoid* CELLS.—**Cellulæ ethmoidales anteriores.** See *Anterior ethmoid* CELLS.—**Cellulæ ethmoidales frontales.** See *Middle ethmoid* CELLS.—**Cellulæ ethmoidales lacrimales.** See *Anterior ethmoid* CELLS.—**Cellulæ ethmoidales mediæ.** See *Middle ethmoid* CELLS.—**Cellulæ ethmoidales orbitariæ.** See *Anterior ethmoid* CELLS.—**Cellulæ ethmoidales palatinæ, Cellulæ ethmoidales posteriores.** See *Posterior ethmoid* CELLS.—**Cellulæ frontales.** See *Middle ethmoid* CELLS.—**C. germinitiva.** See *Germinal* VESICLE.—**Cellulæ lacrimales.** See *Anterior ethmoid* CELLS.—**C. lactifera.** An acinus of the mammary gland. [L, 175.]—**C. Malpighii, C. malpighiana.** See *Air*-CELL (1st def.).—**Cellulæ mastoideæ.** See *Mastoid* CELLS.—**Cellulæ maxillares.** See *Anterior ethmoid* CELLS.—**Cellulæ medullares.** See *Medullary* CELLS.—**Cellulæ membranosæ.** See LEPOCYTA.—**C. multipolaris.** See *Multipolar* CELL.—**C. nervea.** See *Nerve*-CELL.—**Cellula nucleata.** See *Embryonic* CELL.—**C. olfactoria.** See *Olfactory* CELL.—**Cellulæ orbitariæ.** See *Anterior ethmoid* CELLS.—**Cellulæ palatinæ.** See *Posterior ethmoid* CELLS.—**Cellula pigmenti.** See *Pigment* CELL.—**C. plasmatica.** See *Plasma*-CELL.—**Cellulæ primordiales.** See GYMNOCYTA.—**C. pulmonalis.** See *Primary* ALVEOLUS.—**C. pulmonea.** See *Air*-CELL (1st def.) and ALVEOLUS. [I.]—**Cellulæ sanguinis.** See BLOOD-CORPUSCLES.—**Cellulæ sphenoidales.** See *Sphenoid* CELLS.—**C. stellata.** See *Stellate* CELL.—**Cellulæ tympanicæ.** Fr., *cellules tympaniques.* The bony cells in the posterior portion of the tympanic cavity. [L, 7.]—**C. unipolaris.** See *Unipolar* CELL.

CELLULACÉS (Fr.), n. pl. Se²l-u⁶l-a³-sa. Of De Blainville, an order of cephalous molluscs. [L, 41.]

CELLULAR, adj. Se²l′u²l-a³r. Gr., κυτώδης. Lat., *cellularis, cellulosus.* Fr., *cellulaire, celluleux.* Ger., *c., zellig.* It., *cellulare.* Sp., *celular.* Pertaining to cells or to a tissue or object composed of cells, or to connective tissue (nearly obsolete in the last sense); in botany, composed only of cells or destitute of a true vascular system (*e. g.,* the lower cryptogams). [B; J, 29, 31, 36, 37, 55, 67, 124; L, 343.] Cf. CELLULARES.

CELLULARES (Lat.), n. f. pl. Se²l(ke²l)-u²l(u⁴l)-a(a³)′rez(re²s). Of Lindley, a class of cryptogams, comprising the *Filicoideæ*, the *Muscoideæ*, and the *Aphylleæ*. [B, 121, 170.]—**C. aphyllæ** [De Candolle]. Fr., *végétaux cellulaires aphylles.* A subclass comprising the orders *Lichenes, Hypoxyla, Fungi,* and *Algæ.* [B, 198.]—**C. foliaceæ** [De Candolle]. Fr., *végétaux cellulaires foliacés.* A subclass comprising the orders *Musci* and *Hepaticæ.* [B, 198.]

CELLULARII (Lat.), n. m. pl. Se²l(ke²l)-u²l(u⁴l)-a(a³)′ri²-i(e). Of Reichenbach, a subdivision of the false *Byssaceæ.* [B, 121.]

CELLULARIS (Lat.), adj. Se²l(ke²l)-u²l(u⁴l)-a(a³)′ri²s. Cellular; as a n., in the f. (*membrana* understood), connective tissue. [J; L, 43.]—**C.-Gewebe** (Ger.). Of Rauber, a tissue composed of cells (*e. g.,* epithelial tissue). [J.]

CELLULATED, adj. Se²l′u²l-at-e²d. Lat., *cellulatus.* Fr., *cellulé.* Divided into cells. [L, 180.]

CELLULE, n. Se²l′u²l. Lat., *cellula.* Fr., *c.* Ger., *Zellchen.* It., *cellula.* Sp., *celdilla.* A little cell; in entomology, a space included between the nervures of the wing. [L, 121.]—**Bronchic c.** See *Air*-CELL (1st def.).—**C's à aiguille** (Fr.). See *Needle*-CELLS.—**C's à bâtonnets** (Fr.). Rod-like bodies found in the cystogenous cells of the *Trematoda.* [L, 121.]—**C. à cil vibratile** (Fr.). See *Ciliated* CELL.—**C. adélomorphe** (Fr.). See *Adelomorphous* CELL.—**C. adipeuse** (Fr.). See *Fat*-CELL.—**C. adjuvante** (Fr.). See SYNERGIDA.—**C. aérienne** (Fr.). See *Air*-CELL (1st def.). [I.]—**C's aérifères** (Fr.). The air-cells in birds' bones. [L, 158.]—**C's agminées.** In embryology, certain collections of cells upon the large branches of veins. [L, 158.]—**C. amiboïde** (Fr.). See *Amœboid* CELL.—**C. animale** (Fr.). See *Animal* CELL.—**C. annelée** (Fr.), **C. annulaire** (Fr.). See *Annular* CELL.—**C. antipode.** See *Antipodal* CELL and *Extrusion* GLOBULE.—**C. à pepsine** (Fr.). See *Peptic* CELL.—**C. à plateau** (Fr.). See *Columnar* CELL.—**C. aplatie** (Fr.). See *Pavement* CELL.—**C. à ponctuations aréolées** (Fr.). See *Pitted* CELL.—**C. à protoplasme** (Fr.). See *Albuminous* CELL and *Marginal* CELL.—**C's araignées** (Fr.). See *C's en araignée.*—**C. araignée** (Fr.). See *Neuroglia* CELL.—**C.-article.** One of the chain of ordinary chlorophyllaceous cells of which the members of the *Nostochineæ* are generally composed. [B, 75, 104.]—**C. artificielle** (Fr.). See *Artificial* CELL.—**C. axiale** (Fr.). See *Axial* CELL.—**C. basale** (Fr.). See *Basilar* CELL.—**C. basilaire** [Löwenberg] (Fr.). See *Floor*-CELL.—**C. binaire** (Fr.). See *Binary nerve*-CELL.—**C's blastémiques** (Fr.). See *Segmentation* CELL.—**C. blastodermique** (Fr.). See GASTRULA.—**C. bronchiale** (Fr.). See *Air*-CELL (1st def.) (*q. v.*).—**C. caliciforme** (Fr.). See *Goblet*-CELL.—**C. cartilagineuse** (Fr.). See *Cartilage* CELL.—**C. centrale** (Fr.). See *Central* CELL.—**C. cérébrale antérieure** (Fr.). See *Anterior cerebral* VESICLE and PROSENCEPHALON.—**C. cérébrale moyenne** (Fr.). See MESENCEPHALON and *Middle cerebral* VESICLE.—**C. cérébrale postérieure** (Fr.). See EPENCEPHALON and *Posterior cerebral* VESICLE.—**C. chatoyante** (Fr.). See IRIDOCYTE.—**C. chevelue** (Fr.). See *Hair* CELL.—**C. comblante** (Fr.). A cell of the layer of generative tissue which forms a lenticel (*q. v.*) on the surface of a tree. [B, 104.]—**C. conductrice** (Fr.). An elongated, thin-walled cell (such as is formed in leaves), the function of which is to convey the juices from one part to another. [B, 104.]—**C. conjonctive** (Fr.), **C. connective** (Fr.). See *Connective-tissue* CORPUSCLE.—**C. contractile** (Fr.). See *Muscular fibre*-CELL.—**C. cornée** (Fr.). See *Horn* CELL.—**C. crénelée** (Fr.). See *Prickle* CELL.—**C. criblée** (Fr.). See *Sieve*-CELL.—**C. cylindrique** (Fr.). See *Columnar* CELL.—**C. cylindro-conique** (Fr.). A granular cell attached by its pointed end, flat at the free end, and having a nucleus coinciding in its long diameter with that of the cell. [L, 88.]—**C. cystogène** (Fr.). See *Cystogenous* CELL.—**C. de Bichat** (Fr.). See *Lymphoid* FOLLICLE.—**C. de bois** (Fr.). See *Wood*-CELL.—**C. de bordure** (Fr.). See *Guard*-CELL.—**C's de la caduque** (Fr.). See *Decidual* CELLS.—**C. de la calotte** (Fr.). See *Tapetum* CELL.—**C. de la coiffe** (Fr.). See *Cap*-CELL.—**C. de l'émail** (Fr.). See *Enamel*-CELL.—**C. de liège** (Fr.). See *Cork*-CELL.—**C. de l'ivoire** (Fr.). See ODONTOBLAST.—**C. délomorphe** (Fr.). See *Delomorphous* CELL.—**C. de l'ongle** (Fr.). See *Nail* CELL.—**C. de l'ovisac** (Fr.). A polyhedral cell with rounded angles found in the walls of the ovisac. [L, 41.]—**C. de massue** (Fr.). See *Bulb*-CELL.—**C's de mucus** (Fr.). See MUCUS-CORPUSCLES.—**C. d'enchyme** (Fr.). See *Gland*-CELL.—**C. dentelée** (Fr.). See *Prickle*-CELL.—**C. dentinaires** (Fr.), **C. dentinique** (Fr.). See ODONTOBLAST.—**C. de plancher** (Fr.). See *Floor* CELL.—**C's de reserve** (Fr.). In certain embryonic *Ascidia*, a collection of cells representing tails. [L, 231.]—**C. de soutènement** (Fr.), **C. de soutien** (Fr.). A sac formed by the protrusion of the mucous coat of the bladder through the muscular coat. [L, 7.]—**C. vibratile** (Fr.). See *Ciliated* CELL.—**C's vitelligènes** (Fr.). Cells which develop into the vitellus. [L, 158.]—**C. vitelline** (Fr.). See *Segmentation* CELL.—**Ciliary c.** See *Ciliated* CELL.—**Grandes c's pyramidales** (Fr.). The layer of large pyramidal cells in the cortex cerebri. [K.]—**Petites c's pyramidales** (Fr.). The layer of small pyramidal

cells in the cortex cerebri. [I, 28; K.]—**Vibratile c.** See *Ciliated* CELL.

CELLULÉ (Fr.), adj. Se^{2}l-u^{6}l-a. See CELLULATED; as a n., in the m. pl. *c's*, see CELLULOSI.

CELLULEUX (Fr.), adj. Se^{2}l-u^{6}l-u^6. See CELLULAR.

CELLULIC, adj. Se^{2}l-u^{2}l'i^{2}k. Fr., *cellulique*. Of or pertaining to a cell; formed by the action of acids or alkalies on cell walls. [Frémy (B, 46).]—**C. acid.** Fr., *acide cellulique*. Ger., *Cellulinsäure*. An acid obtained by Frémy; according to him, identical with metapectic acid. [Fehling (B).]

CELLULIFEROUS, adj. Se^{2}l-u^{2}l-i^{2}f'e^{2}r-u^{2}s. Lat., *celluliferus* (from *cellula* [*q. v.*], and *ferre*, to bear). Fr., *cellulifère*. Ger., *zellchentragend, zellentragend*. Producing little cells or cavities (cellules), or producing cells in the anatomical sense (cellulæ); containing little cells or hollows. [B; L, 56, 180.]

CELLULIFORMIS (Lat.), adj. Se^{2}l(ke^{2}l)-lu^{2}l(lu^{4}l)-i^2-fo^{2}rm'i^{2}s. Fr., *celluliforme*. Ger., *zellchenförmig, zellenförmig*. Resembling or having the shape of a cellule or cell. [B; L, 41, 180.]

CELLULIN, n. Se^{2}l'u^{2}l-i^{2}n. Fr., *celluline*. See CELLULOSE.

CELLULINE, adj. Se^{2}l'u^{2}l-i^{2}n. See CELLULAR.

CELLULITÈLE (Fr.), adj. Se^{2}l'u^{6}l-e-te^{2}l. From *cellula* (*q. v.*), and *tela*, a web. Making the web in the form of a cell (said of spiders). [L, 41, 180.]

CELLULITIS (Lat.), n. f. Se^{2}l(ke^{2}l)-lu^{2}l(lu^{4}l)-it(et)'i^{2}s. Gen., *cellulit'idis*. From *cellula*, a small cavity (see also *-itis**). Fr., *cellulite*. Ger., *Zellgewebsentzündung*. It., *cellulite*. Sp., *celulitis*. Inflammation of the areolar tissue. [E.] Cf. ETHMYPHITIS (which is a better term).

CELLULO-ADIPOSE, adj. Se^{2}l''u^{2}l-o-a^{2}d'i^2-pos. Fr., *cellulo-adipeux*. Pertaining to areolar tissue containing fat-cells. [J.]

CELLULOCHINON (Ger.), n. Tse^{2}l-lu^{4}l-o-ch^{2}i^{2}n-on'. See CELLULOQUINONE.

CELLULO-CUTANEOUS, adj. Se^{2}l''u^{2}l-o-ku^2-tan'e-u^{3}s. Fr., *cellulo-cutané*. Pertaining to areolar tissue and to the skin. [A, 385.]

CELLULO-FIBROUS, adj. Se^{2}l''u^{2}l-o-fib'ru^{3}s. See FIBRO-CELLULAR.

CELLULOGÉNÉSIE (Fr.), n. Se^{2}l-u^{6}l-o-zhau-a-ze See CYTOGENESIS.

CELLULOID, n. Se^{2}l'u^{2}l-oid. A substance prepared by treating finely divided collodion-wool with water, expressing, adding camphor and other ingredients, and molding into a solid form by hydraulic pressure; very elastic and, as first prepared, highly inflammable, but rendered much less so by the addition of ammonium phosphate, sodium phosphate, or other ingredients. [B, 270.]

CELLULOQUINONE, n. Se^{2}l-u^{2}l-o^{2}k'wi^{2}n-on. Ger., *Cellulochinon*. A chemical derivative of cellulose, formed, according to Bevan, in lignified cell-membranes. [B, 270.]

CELLULOSA (Lat.), n., f. of adj. *cellulosus* (*tunica* understood). Se^{2}l(ke^{2}l)-u^{2}l(u^{4}l)-os'a^3. A cellular coat.—**C. chorioideæ** [Arnold]. The outer layer of the chorioid coat of the eye. [L, 7.]

CELLULOSE, n. Se^{2}l'u^{2}l-os. Fr., *c.* Ger., *C., Zellstoff, Zellulose*. It., *cellulosio*. A carbohydrate forming the walls of all vegetable cells and found almost pure in elder-pith, in absorbent cotton, and in pure unsized paper (filter-paper); a colorless, transparent mass, showing on microscopical examination the shape of the vegetable tissue from which it was derived; insoluble in water, in alcohol, or in ether, but soluble in cuprammonia. Sulphuric acid converts it into *amyloid* (see AMYLOID and *Parchment* PAPER). Nitric acid with sulphuric acid converts it into *trinitrocellulose* (gun-cotton), *dinitrocellulose* (pyroxylin), or *mononitrocellulose*, according to the length of time of the action and the amount of nitric acid employed. The formula of c. is some multiple of $C_6H_{10}O_5$. Two isomeric varieties of c. are described by Frémy: *paracellulose* and *metacellulose*, the former distinguished by dissolving in cuprammonia only after treatment with acid, the latter by not dissolving at all. Metacellulose is the variety occurring in *Fungi*. [B, 4, 8, 9, 229, 270.]—**Animal c.** See TUNICIN.—**Azotate de c.** (Fr.). See *C. nitrate*.—**C. degeneration.** See *Amyloid* DEGENERATION.—**C. dinitrate.** Fr., *dinitrate de c.* Ger., *C.-Dinitrat*. Dinitrocellulose. [B.]—**C'entartung** (Ger.). See *Amyloid* DEGENERATION.—**C'haut** (Ger.). The membrane of c. that forms a vegetable cell-wall. [B, 35.]—**C. mononitrate.** Fr., *mononitrate de c.* Ger., *C.-Mononitrat*. Mononitrocellulose. [B.]—**C. nitrate.** Fr., *azotate* (ou *nitrate*) *de c.* Ger., *C.-Nitrat, salpetersaure Cellulose*. A compound of c. with nitric acid; nitrocellulose. [B.] See MONONITROCELLULOSE, DINITROCELLULOSE, and TRINITROCELLULOSE.—**C. trinitrate.** Fr., *trinitrate de c.* Ger., *C.-Trinitrat*. Trinitrocellulose. [B.]—**Salpetersaure c.** (Ger.). See *C. nitrate*.—**Pilz-C'** (Ger.). C. occurring in *Fungi*, metacellulose. [B, 270.]—**Starch c.** See AMYLIN.—**Triacetyl c.** A substance, n.$[C_6H_7(C_2H_3O)_3O_5$, derived from the action of acetic anhydride on c. [B, 4.]

CELLULOSIC, adj. Se^{2}l-u^{2}l-o^{2}s'i^{2}k. Fr., *cellulosique*. Of, pertaining to, or composed of, cellulose. [B, 2.]

CELLULOSITY, n. Se^{2}l-u^{2}l-o^{2}s'i^{2}t-i^2. Lat., *cellulositas*. Fr., *cellulosité*. The state of being cellular. [L, 14.]

CELLULOUS, adj. Se^{2}l'u^{2}l-u^{2}s. Lat., *cellulosus*. Fr., *celluleux*. See CELLULAR.

CELLULO-VASCULAR, adj. Se^{2}l''u^{2}l-o-va^{2}s'ku^{2}l-a^{3}r. For deriv., see CELL and VAS. Composed of cells and blood-vessels. [J, 32.]

CÉLOCASIE (Fr.), n. Sal-o-ka^{3}z-e. See COLOCASIA.

CELOCOLICA (Lat.), n. f. Sel(kal)-o(o^2)-kol'i^{2}k-a^3. From κήλη, a hernia, and κωλική, colic. Fr., *célocolique*. Ger., *Bruchkolik*. Colic due to strangulated hernia. [A, 322.]

CELODES (Lat.), adj. Sel(kal)-od'ez(as). See KELOID.

CELODYSPNŒA (Lat.), n. f. Sel(kal)-o(o^2)-di^{2}sp(du^{6}sp)-ne'-(no^2'e^2)-a^3. From κήλη, a hernia, and δύσπνοια, dyspnœa. Fr., *célodyspnée*. See STETHOCELODYSPNŒA.

CELOIDES (Lat.), adj. Se^{2}l(kal)-o(o^2)-id(ed)'ez(as). Fr., *céloïde*. See KELOID.

CELOLOGY, n. Sel-o^{2}l'o-ji^2. See KELOLOGY.

CELORRHAPHIA (Lat.), n. f. Sel(kal)-o^{2}r-ra^{2}f(ra^{3}f)'i^2-a^3. Fr., *célorrhaphie*. See KELORRHAPHY.

CELOS (Lat.), n. m. Sel(kal)'o^{2}s. Gr., κῆλος (from καίειν, to burn). Ger., *brennende Geschwulst*. An old name for a tumor due to or accompanied by internal heat. [A, 322.]

CELOSIA (Lat.), n. f. Se^{2}l(ke^{2}l)-os'i^2-a^3. Fr., *célosie*. A genus of amarantaceous plants, closely allied to *Amarantus*. [B, 19.]—**C. arvensis** [Hochstetter]. The *belbelta*, an African species. The seeds are employed as an anthelminthic. [B, 121.]—**C. aurea.** A cultivated variety regarded as a form of *C. cristata*. [B, 19.]—**C. cristata.** Fr., *célosie crêtée, amaranthe, crête de coq, passe velours*. Cock's comb; a species which in its normal form is an erect herb from 1 to 2 feet in height. [B, 19.]—**C. nitida** [Vahl], **C. paniculata** [Linnæus]. Fr., *célosie paniculée*. A West Indian species. The flowers and seeds are said to be highly astringent and to be employed in dysentery. [B, 88, 173.]—**C. trigyna** [Linnæus]. An African species. The leaves are eaten as a remedy for worms. [B, 173.]

CELOSIEÆ (Lat.), n. f. pl. Se^{2}l(ke^{2}l)-os-i(i^2)'e^2-e(a^3-e^2). Fr., *célosiées*. Ger., *Celosieen*. Of Endlicher, Meissner, Moquin, and others, a tribe of the *Amarantaceæ*, comprising *Celosia, Lestiboudesia*, etc. [B, 42, 121.]

CELOSIOIDES (Lat.), adj. Se^{2}l(ke^{2}l)-os-i^2-o(o^2)-id(ed)'ez(as). Resembling the *Celosia*. [B.]

CÉLOSOME (Fr.), n. Sal-o-zom. See CELOSOMUS.

CÉLOSOMIE [I. Geoffroy St.-Hilaire] (Fr.), n. Sal-o-zom-e. The state of being a celosomus (*q. v.*). [L, 88.]

CÉLOSOMIEN (Fr.), adj. Sal-o-zom-e-a^{3}n^2. Pertaining to a celosomus, affected with celosomie; as a n., in the m. pl., *c's*, of I. Geoffroy St.-Hilaire, a family of monsters including the celosomus (*q. v.*). [L, 87.]

CÉLOSOMIQUE (Fr.), adj. Sal-o-zom-ek. Pertaining to célosomie. [L, 41.]

CELOSOMUS (Lat.), n. m. Sel(kal)-o(o^2)-som'u^{3}s(u^{4}s). From κήλη, a hernia, and σῶμα, the body. Fr., *célosome* [I. Geoffroy St.-Hilaire]. A monster with eventration or fissure or absence of the sternum, with more or less protrusion of the thoracic or abdominal organs. [L, 41.]

CÉLOSPERMÉ (Fr.), adj. Sal-o-spe^{2}rm-a. See CŒLOSPERMOUS; as a n., in the f. pl., *c'es*, see CŒLOSPERMEÆ.

CELOTOME, n. Sel'o-tom. See *Hernia* KNIFE.

CELOTOMY, n. Sel-o^{2}t'o-mi^2. See KELOTOMY.

CELSA, n. The "musculus vitæ," an old term for a wandering sense of pulsation in the body. [A, 325.]

CELSIA (Lat.), n. f. Se^{2}l(ke^{2}l)'si^2-a^3. Fr., *celsie*. A genus of scrophulariaceous plants, closely allied to *Verbascum*. [B, 19.]—**C. Arcturus** [Linnæus]. A dwarf undershrub with yellow flowers, indigenous to Crete and sometimes cultivated. [B, 19, 71.]—**C. coromandeliana** [Vahl]. The *kukshima* of the Bengalees: a weed growing throughout waste places in the Deccan. It is said to be sedative and astringent and to be a valuable remedy in dysentery. [B, 172.]—**C. cretica.** The Cretan mullein; a tall biennial species, with long spikes of large yellow flowers, indigenous to Crete and northern Africa and often cultivated in gardens. [B, 19, 71.]

CELTEÆ (Lat.), n. f. pl. Se^{2}lt(ke^{2}lt)'e^2-e(a^3-e^2). Fr., *celtées*. Of Lindley, a tribe of the *Ulmaceæ*, corresponding to the *Celtideæ* of Endlicher. [B, 170.]

CELTICEÆ [Walpers] (Lat.), n. f. pl. Se^{2}lt(ke^{2}lt)-i^{2}s(i^{2}k)'e^2-e-(a^3-e^2). Fr., *celticées*. See CELTIDEÆ.

CELTIDACEÆ [Walpers] (Lat.), n. f. pl. Se^{2}lt(ke^{2}lt)-i^{2}d-a(a^3)'-se^2(ke^2)-e(a^3-e^2). Fr., *celtidacées*. See CELTIDEÆ.

CELTIDEÆ (Lat.), n. f. pl. Se^{2}lt(ke^{2}lt)-i^{2}d'e^2-e(a^3-e^2). Fr., *celtidées*. Ger., *Celtideen*. Of Gaudichaud, a division of the *Urticeæ*, comprising *Celtis* and *Mertensia* (now merged in *Celtis*); by Endlicher made to include also *Sponia* (*Trema*). By Bartling it was made a division of the *Ulmaceæ* and to include *Planera* and *Ulmus*, which are now placed in a different tribe. As defined by Bentham and Hooker, it is a tribe of the *Urticaceæ*, comprising *Celtis*, etc. [B, 42, 170.]

CELTIDOIDEÆ (Lat.), n. f. pl. Se^{2}lt(ke^{2}lt)-i^{2}d-o(o^2)-i^{2}d(ed)'-e^2-e(a^3-e^2). Fr., *celtidoïdées*. Ger., *Celtidoïdeen*. Of Engler, a suborder of the *Ulmaceæ*, corresponding to the tribe *Celtideæ* of Bentham and Hooker. [B, 245.]

CELTIS (Lat.), n. f. Se^{2}lt(ke^{2}lt)'i^{2}s. Gen., *celt'idis*. Fr., *celtide, micocoulier, micacoulier*. The nettle-tree; of Linnæus, a genus of trees of the *Ulmaceæ* [Lindley, Engler] or of the *Urticaceæ* [Bentham and Hooker], tribe *Celtideæ*. It comprises about 60 species, widely distributed throughout the world. By Engler it is divided into the subgenera *Euceltis* (*Lotopsis, Ledopyrena, Proteophyllum*), *Sponioceltis, Solenostigma* (often regarded as a distinct genus), and *Momisia* (the genus *Mertensia* of Kunth). [B, 19, 42, 245.]—**C. aculeata** [Swartz]. Fr., *croc de chien*. A low spreading tree of the West Indies and South America, bearing edible fruit. [B, 19, 173, 245.]—**C. americana** ["Hort. paris."]. See *C. mississippiensis*.—**C. australis** [Linnæus]. Fr., *bois de Perpignan, fabrecoulier, fabreguier, perpignan*. Ger., *Zürgelbaum, gemeiner Zürgelbaum*. The European nettle-tree, the honey-berry of the Greeks, lote-tree; an erect, handsome tree 30 to 40 feet high grow-

ing throughout the Mediterranean region of Europe. It bears a very sweet, edible, blackish berry of the size of a small cherry. The seed is said to furnish an illuminating oil. The young branches are used as a mild astringent in diarrhœa. The tree is the lotus (λωτός) of Dioscorides, but not of Theophrastus and Homer. [B, 19, 180, 185, 245.]—**C. cordata** [Desf.], **C. cordifolia** [Duhamel], **C. crassifolia** [Lamarck]. The hoop-ash, thick-leaved nettle-tree; a variety of *C. occidentalis* with thick and rough serrate leaves, often considered a distinct species. [B, 34, 173, 180, 214.]—**C. epiphylladena** [Ortega]. See *C. aculeata.*—**C. fructu nigricante** [Tournefort]. See *C. australis.*—**C. fructu obscure purpurascente** [Tournefort]. See *C. occidentalis.*—**C. lima** [Swartz]. The *Trema micrantha.* [B, 214.]—**C. micrantha** [Swartz]. Fr., *arbre de soie, bois d'orme.* The Jamaica nettle-tree; a West Indian species. [B, 173, 275.]—**C. mississippiensis** [Bosc.]. Fr., *micocoulier de la Louisiane.* A species growing along the Mississippi and Red Rivers. [B, 214.]—**C. mollis** [Kunth]. The *Trema micrantha.* [B, 214.]—**C. obliqua** [Mönch], **C. occidentalis** [Linnæus]. Fr., *bois-ramon, micocoulier des Antilles, irophis d'Amérique.* The hackberry, rim-ash, sugar-berry, American nettle-tree, American false elm; a tree from 30 to 70 feet high, growing throughout the United States,

THE CELTIS OCCIDENTALIS. (A, 327.)

especially in the South and West. The small, sweetish, astringent berries are edible, and the leaves are eaten by cattle. The bark is said to be febrifuge, and, being astringent, is used in tanning. The *C. crassifolia* is often regarded as a variety of this species (*C. occidentalis,* var. *crassifolia*). [B, 34, 173, 245.]—**C. orientalis minor, floribus minoribus,** etc. [Tournefort]. See *C. Tournefortii.*—**C. procura foliis ovato-lanceolatis** [Gronovius]. See *C. occidentalis.*—**C. pumila** [Pursh]. The dwarf nettle-tree; a shrub of the Southern United States, with a sweet black fruit. [B, 34.]—**C. rhamnoides** [Willdenow]. See *C. aculeata.*—**C. rufescens** [Planchon], **C. rugosa** [Willdenow]. The *Trema micrantha.* [B, 214.]—**C. tala** [Gillies]. The *chichape* or *tala*, a species with several varieties, indigenous to Texas and subtropical South America. In the latter country the leaves are employed in thoracic affections. [B, 214, 245, 270.]—**C. Tournefortii** [Lamarck]. An Eastern species with an edible astringent fruit. [B, 173, 214.]

CEMBRA (Lat.), n. f. Se^{2}m(ke^{2}m)'bra^3. Of Spach, see PINUS; of the older pharmacists, the *Pinus c.* [B, 270.]—**C.-nuts, Nuclei cembræ.** The seeds of *Pinus c.* [B, 270.]

CEMBRO, n. The *Pinus cembra.* [B, 121.]

CEMBROIDES (Lat.), n. f. Se^{2}m(ke^{2}m)-bro(bro^2)-id(ed)'ez(as). Of Endlicher, a subsection of the genus *Pinus.* [B, 121.]

CEMBROL, n. See CEMBRO. [B, 121.]

CEMBUL (Ar.), n. The nard. [B, 121; L, 105.]

CEMELEG, CEMELES, n's. Ancient names for the *Helleborus niger.* [B, 121; L, 105.]

CEMENT, n. Sem-e^{2}nt'. Lat., *cæmentum, cortex osseus* (2d def.), *substantia osteoidea* (seu *petrosa*) (2d def.), *crusta fibrosa* (2d def.). Fr., *cément, cortical osseux* (2d def.). Ger., *C., Knochensubstanz* (2d def.), *Kittsubstanz* (2d def.), *Zahnkitt* (2d def.), *Zahncement* (2d def.). 1. A plastic material capable of hardening so as to form a medium of junction for two or more objects; in dentistry, such a material used for filling dental cavities. 2. The layer of true bone covering the teeth where they are not protected by enamel; *i. e.*, at the neck and root. [J, 26, 30, 35.]—**Alveolar c.** Fr , *cément alvéolaire* [Duvernoy]. An osseous structure that in certain animals joins the teeth to the jaws and binds them to each other. [L, 158.]—**Cell c.** Fr., *cément intercellulaire.* Ger., *Kittsubstanz.* The scanty hyaline substance between epithelial or endothelial cells. It stains black with nitrate of silver. When the substance between the cells is more abundant it is called ground-substance (*q. v.*), matrix, etc.—**Coronal c., Crown c.** Fr., *cément coronaire.* The special coating of c. that invests the crown of the teeth in many mammals. [L, 14, 318.]—**Foundation c's.** Soft dental c's that harden rapidly, having zinc oxychloride as a basis; used for covering the exposed pulp as a foundation for a metallic filling. [L, 125.]—**Intra-alveolar c.** Fr., *cément intra-alvéolaire.* See *Alveolar c.*—**Radical c.** Lat., *crusta osteoides radicis.* Fr., *cément radiculaire.* Ger., *Wurzelrinde.* The layer of c. covering the fangs of the teeth. [L, 14.]—**Tissue c.** See *Cell c.*

CÉMENTAIRE (Fr.), adj. Sa-ma^{3}n^{2}t-ar. Pertaining to cement, agglutinative. [A, 385.]

CEMENTATION, n. Sem-e^{2}nt-a'shu^{3}n. See CÆMENTATIO.

CEMENTERIUM, n. In alchemy, an aludel. [B, 50.]

CÉMENTEUX (Fr.), adj. Sa-ma^{3}n^{2}t-u^5. See CÉMENTAIRE.

CEMENTOBLASTS, n. pl. Sem-e^{2}nt'o-bla^{2}stz. From *cæmentum* (see CEMENT), and βλαστός, a germ. The osteoblasts concerned in the formation of the cement of the teeth; the cement-corpuscles of the fully formed teeth. [J.]

CÉMENTO-DENTAIRE (Fr.), **CÉMENTO-DENTINAIRE** (Fr.), adj's. Sa-ma^{3}n^{2}t-o-da^{3}n^{2}t-ar, -en-ar. Pertaining to the cement and the dentine of a tooth. [L, 87.]

CEMENTUM (Lat.), n. n. Sem(kam)-e^{2}nt'u^{3}m(u^{4}m). See CEMENT.

CEMOS (Lat.), n. m. Se(ka)'mo^{2}s. From κημός, a muzzle. 1. See CAPISTRUM. 2. Of certain authors, the *Hedera helix;* according to others, the c. of Dioscorides is the *Leontopodium* (the *Alchemilla vulgaris*). It is not known what the plant was that Pliny called c. [B, 88, 121.]

CEMPASUCHIL, CEMPOAL-XOCHITL, n's. In Mexico, the *Tagetes patula.* [A, 447; Hernando (B, 211).]

CEMUS (Lat.), n. m. Se(ka)'mu^{3}s(mu^{4}s). See CEMOS.

CENÆSTHESIS (Lat.), n. f. Sen(kan)-e^{2}s'(a^3'e^{2}s)-the^{2}s-i^{2}s. See CŒNÆSTHESIS.

CENANAM, n. In Mexico, a plant variously referred to the *Asclepiadaceæ* or the *Apocynaceæ*, or regarded as identical with the *Lantana camara.* [B, 121.]

CENANGIA (Lat.), n. f. Se^{2}n(ke^{2}n)-a^{2}n(a^{3}n^2)-ji(ge)'a^3. See CENEANGEIA.

CENANGIACEI (Lat.), n. m. pl. Se^{2}n(ke^{2}n)-a^{2}n(a^{3}n^2)-ji^2(ge)-a(a^3)'se(ke)-i(e). See CENEANGEIACEI.

CENANGIEI (Lat.), n. m. pl. Se^{2}n(ke^{2}n)-a^{2}n(a^{3}n^2)-ji(ge)'e^2-i(e). See CENEANGEIEI.

CENANGIUM (Lat.), n. n. Se^{2}n(ke^{2}n)-a^{2}n(a^{3}n^2)-ji(ge)'u^{3}m-(u^{4}m). See CENEANGEIUM.

CENAU, n. In Banda, the *Cordia sebestana.* [B, 121.]

CENCHET (Fr.), n. Sa^{3}n^2-sha. See CEINTURE.

CENCHRAMIDEA (Lat.), n. f. Se^{2}n(ke^{2}n^2)-kra^{2}m(ch^{2}ra^{3}m)-i^{2}d'e^2-a^3. Of Plukenet, the genus *Clusia.* [B, 121.]

CENCHRAMIS (Lat.), n. f. Se^{2}n(ke^{2}n^2)'kra^{2}m(ch^{2}ra^{3}m)-i^{2}s. Gen., *cenchram'idos (-is).* Gr., κεγχραμίς. The seed of a fig, also an olive-kernel. [B, 115.]

CENCHRE (Fr.), n. Sa^{3}n^{2}kr. See CENCHRUS.

CENCHRECPHLOGIOÏS (Lat.), n. f. Se^{2}n(ke^{2}n^2)-kre^{2}k-(ch^{2}re^{2}k)-flog(flo^{2}g)-i(i^2)'o(o^2)-i^{2}s. Gen., *cenchrecphogio'idos (-is).* From κέγχρος, millet, and ἐκφλέγειν, to set on fire. Ger., *Hirsenkorn-Varioloïde.* Varioloid with a miliary eruption. [A, 322.]

CENCHRIAS (Lat.), n. m. Se^{2}n(ke^{2}n^2)'kri^2(ch^{2}ri^2)a^{2}s(a^{3}s). Gr., κεγχρίας (from κέγχρος, millet). Ger., *Hirsenflechte.* Of Galen, miliary herpes. [A, 322, 325.]

CENCHRINÆ (Lat.), n. f. pl. Se^{2}n(ke^{2}n^2)-krin(ch^{2}ren)'e(a^3-e^2). Fr., *cenchrinées.* Of Link and Reichenbach, a family or division of the *Gramineæ*, comprising *Cenchrus*, etc. [B, 170.]

CENCHRIS (Lat.), n. f. Se^{2}n(ke^{2}n^2)'kri^{2}s(ch^{2}ri^{2}s). Gen., *cen'chridos (-is).* See CENCHRUS. [B, 111.]

CENCHRODES (Lat.), **CENCHROIDES** (Lat.), adj's. Se^{2}n-(ke^{2}n^2) - kro(ch^{2}ro)'dez(das), -kro(ch^{2}ro^2) - id(ed)'ez(as). Fr., *cenchroïde.* Ger., *hirsenähnlich.* Gr., κεγχροειδής. Millet-like, miliary. [B. 115, 200.]

CENCHRON (Lat.), n. n. Se^{2}n(ke^{2}n^2)'kro^{2}n(ch^{2}ro^{2}n). See CENCHROS.

CENCHROS (Lat.), n. m. and f. Se^{2}n(ke^{2}n^2)'kro^{2}s(ch^{2}ro^{2}s). Gr., κέγχρος. 1. The *Holcus sorghum*, or, according to most authorities, the *Panicum miliaceum.* 2. A stye. 3. A sort of serpent. 4. A sort of diamond [Pliny]. [B, 88, 115, 121.]

CENCHROSYPHILIONTHUS (Lat.), n. m. Se^{2}n(ke^{2}n^2)''-kro(ch^{2}ro^2)-si^{2}f(su^{6}f)-i^{2}l-i^2-o^{2}n'thu^{3}s(thu^{4}s). From κέγχρος, millet, *syphilis* (*q. v.*), and ἴονθος, a pustule. Fr., *cenchrosyphilionthe.* Ger., *venerische Hirsenfinnen.* A miliary pustular syphilide. [A, 322.]

CENCHROSYPHILOPSYDRAX (Lat.), n. m. Se^{2}n(ke^{2}n^2)''-kro(ch^{2}ro^2)-si^{2}f(su^{6}f)-i^{2}l-o(o^2)-sid(psu^{6}d)'ra^{2}x(ra^{3}x). Gen., *cenchrosyphilopsyd'racos (-is).* From κέγχρος, millet, *syphilis* (*q. v.*), and ψύδραξ, a blister. Fr., *c.* Ger., *venerische Hirsenkrätze.* A miliary vesicular syphilide. [A, 322.]

CENCHRUS (Lat.), n. m. Se^{2}n(ke^{2}n^2)'kru^{3}s(ch^{2}ru^{4}s). Gr., κέγχρος. Fr., *cenchre.* Of Linnæus, a genus of gramineous plants of the tribe *Paniceæ.* [B. 42, 121, 245.]—**C. ægyptius** [Linnæus]. The *Dactyloctenium ægyptiacum.* [B, 173.]—**C. granularis** [Linnæus]. An East Indian species, used in engorgements of the spleen and liver. [B, 173.]—**C. myosuroides** [Humboldt and Kunth]. A South American species resembling *C. tribuloides.* [B, 245.]—**C. spicatus** [Swartz]. The *Pennisetum typhoideum.* [B, 173.]—**C. tribuloides** [Linnæus]. Burr-grass; a North American species. [B, 34, 245.]

CENDICI VALLI, n. In Malabar, an undetermined species of *Convolvulus.* [B, 121.]

CENDOR, n. In Java, the *Illecebrum sanguinolentum.* [B, 121.]

CENDRE (Fr.), n. Sa^{3}n^{2}dr. See ASH (1st def.)—**C. alcaline.** An alkaline ash, such as is produced by the incineration of many vegetable substances, containing from 20 to 30 per cent. of alkaline carbonates, which are soluble in water and produce effervescence

with acids. [B, 46.]—**C. bleue.** Copper carbonate. [B, 93.]—**C. bleue naturelle.** Native copper carbonate. [A, 301.]—**C. calcaire.** An ash, such as is produced by the incineration of poplar, containing a large amount of calcium carbonate, which is insoluble in water but effervesces decidedly on contact with acids. [B, 46.]—**C's clavelées.** Impure potassium carbonate. [B.]—**C. d'antimoine.** See ANTIMONY *ash.*—**C. de fougère.** The ash of ferns; used in glass-making. [B, 132.]—**C. de plomb.** Lead protoxide. [B, 93.]—**C. d'éponge.** See SPONGIA *usta.*—**C. de roitelet.** The ashes of a wren; an old preparation composed chiefly of calcium carbonate. [B, 93 (*a*, 21).]—**C. de soie.** The ash produced by incinerating silk; composed chiefly of calcium carbonate. [B, (*a*, 21).]—**C. d'étain.** Tin monoxide. [B, 88.]—**C. de taupe.** An ash obtained by incinerating the mole; an old preparation consisting chiefly of calcium carbonate. [B, 93.]—**C. d'hérisson.** The ashes of a hedgehog; an old preparation composed chiefly of calcium carbonate. [B, 93 (*a*, 21).]—**C's gravelées.** See *C's clavelées.*—**C. perlée.** Pearl-ash. [B, 93.]—**C. phosphatée.** An ash, such as that obtained by incinerating wheat, which contains more or less phosphates, distinguished by containing a certain proportion of ingredients soluble in water, the insoluble portion dissolving in acidulated solutions without effervescence. [B, 46.]—**C. silicatée.** An ash, such as that obtained by the incineration of straw, which contains much silica; distinguished by not dissolving in water or in acidulated solutions and not effervescing when treated with acids. [B, 46.]—**C. verte.** See CINIS *viridis.*

CENDRÉ (Fr.), adj. Sa^{3}n^2-dra. See CINEREUS.

CENEANGEIA (Lat.), n. f. Se^{2}n(ke^{2}n)-e^2-a^{2}n(a^{3}n^2)-ji'(ge^2'i^2)-a^3. Gr., κενεαγγείη (from κενεός, empty, and ἀγγεῖον, a vessel). An empty state of the vessels, also an emptying of the vessels, from inanition. [Hippocrates (A, 322); A, 325, 387.]

CENEANGEIACEI (Lat.), n. m. pl. Se^{2}n(ke^{2}n)-e^2-a^{2}n(a^{3}n^2)-ji(ge^2-i^2)-a(a^3)'se^2(ke^2)-i(e). Syn.: *Cenangiacei* [Bonorden]. Of Bonorden, a family of *Discomycetes.* [B, 170.]

CENEANGEIEI (Lat.), n. m. pl. Se^{2}n(ke^{2}n)-e^2-a^{2}n(a^{3}n^2)-ji'-(ge^2'i^2)-e^2-i(e). Fr., *cénangiés, cenangiens.* Of Léveille, a section of *Fungi* (*Cyathideæ*). [B, 121, 170.]

CENEANGEIUM (Lat.), n. n. Se^{2}n(ke^{2}n)-e^2-a^{2}n(a^{3}n^2)-ji'(ge^2'i^2)-u^{3}m(u^{4}m). Fr., *cénangion.* Syn.: *Cenangium* [Fries]. Of Fries, a genus of ascomycetous *Fungi,* separated from *Peziza.* [B, 121.]

CENELLE (Fr.), n. Se^{2}n-e^{2}l. An old name for the fruit of the holly and the hawthorn. [B, 38, 121.]

CENEMBATESIS (Lat.), n. f. Se^{2}n(ke^{2}n)-e^{2}m-ba^{2}t(ba^{3}t)-es-(as)'i^{2}s. Gen., *cenembates'eos* (*-is*). Gr., κενεμβάτησις (from κενεμβατεῖν, to probe). 1. The operation of probing. 2. See PARACENTESIS. [A, 322.]

CENEON (Lat.), n. m. Se^{2}n(ke^{2}n)'e^2-o^{2}n(on). Gen., *ceneon'os* (*-is*). Gr., κενεών. Lit., an empty space; an old term for the space between the ribs and the ilium. [A, 325, 387.]

CÉNESTHÉSIE (Fr.), n. San-e^{2}s-ta-ze. See CŒNÆSTHESIS.

CENGLE (Fr.), n. Sa^{3}n^{2}gl. An old form of *ceinture* (*q. v.*). [L, 41.]

CENIFICATUM (Lat.), n. n. Se^{2}n(ke^{2}n)-i^2-fi^2-ka(ka^3)'tu^{3}m-(tu^{4}m). That which is calcined. [Ruland (B, 200).]

CENIGDAM, CENIGOTAM, n's. See CENIPLAM.

CENIOTEMIUM, n. Of Paracelsus, a purgative of unmentioned composition used in syphilis; according to Dolæus, a mercurial preparation used in syphilis. [A, 325.]

CENIPLAM, CENIPOTAM, n's. Old names for some instrument used in opening the cranium for epilepsy. [B, 50.]

CENJORIES, n. Of the Portuguese in India, small bananas. [B, 121.]

CÉNOBIAIRES (Fr.), n. pl. San-o-be-ar. See CÉNOBIONNAIRES.

CENOBIO (Lat.), **CENOBION** [Mirbel] (Lat.), n's f. and m. Se^{2}n(kan)-ob(o^{2}b)'i^2-o, -o^{2}n. See CŒNOBIUM.

CENOBIONAR, adj. Se^{2}n-o-bi'on-a^{3}r. See CŒNOBIONEUS.

CENOBIONARES (Lat.), n. m. pl. Se^{2}n(kan)-ob(o^{2}b)-i^2-o^{2}n-a-(a^3)'rez(re^{2}s). See CÉNOBIONNAIRES.

CENOBIONARIS (Lat.), **CENOBINEUS** (Lat.), adj's. Se^{2}n-(kan)-ob(o^{2}b)-i^2-o^{2}n-a(a^3)'ri^{2}s, -i^{2}n'e^2-u^{3}s(u^{4}s). See CŒNOBIONEUS.

CÉNOBIONNAIRES (Fr.), n. pl. San-ob-e-on-ar. Lat., *cœnobionares.* Of Mirbel, an order of fruits, comprising the single genus *Cénobion* (*Cœnobium*). [B, 1.]

CENOBIONNEOUS, adj. Se^{2}n-ob-i^2-o^{2}n'e^2-u^{3}s. Fr., *cénobionnien.* See CŒNOBIONEUS and cf. DIÉRÉSILE *cénobionnienne.*

CENOBIUM (Lat.), n. n. Se^{2}n(kan)-ob(o^{2}b)'i^2-u^{3}m(u^{4}m). See CŒNOBIUM.

CENOCLINE [Koch] (Lat.), n. f. Se^{2}n(kan)-o(o^2)-klin(klen)'e(a). See COTULA.

CENOCOCCEI (Lat.), n. m. pl. Se^{2}n(ke^{2}n)-o(o^2)-ko^{2}k'se^2(ke^2)-i(e). From *Cenococcum,* one of the genera. Of Fries and Endlicher, a division of *Lycoperdacei* (*Trichogasteres*). [B, 41, 170.]

CÉNOGASTRE (Fr.), adj. San-o-ga^{2}str. From κενός, empty, and γαστήρ, the belly. Having the belly hollow; as a n., in the pl., *c's,* of Duméril, a family of the *Diptera.* [A, 385.]

CENOGENESIS [Haeckel] (Lat.), n. f. Se^{2}n(ke^{2}n)-o(o^2)-je^{2}n-(ge^{2}n)'e^{2}s-i^{2}s. Gen., *cenogenes'eos* (*-gen'esis*). From κενός, futile, and γένεσις, generation. Ger., *Kenogenese, Fälschungsgeschichte.* Vitiated evolution; evolution in which there is a decided deviation from the ancestral type in accordance with the environment; the opposite of palingenesis. [L, 146.]

CENOGENETISCH (Ger.), adj. Tsan-o-gan-e^{2}t'i^{2}sh. Of the nature of cenogenesis. [L.]

CENOGENY, n. Se^{2}n-o^{2}j'e^{2}n-i^2. See CENOGENESIS.

CÉNOGONE (Fr.), n. Sa-no-gon. An animal that lays eggs at one time and brings forth its young free at another. [L, 109.]

CÉNOGONÉES (Fr.), n. f. pl. San-o-gon-a. See CŒNOGONEÆ.

CENOIRA (Port.), n. Se^{2}n-o-e'ra^3. The *Daucus carota.* [B, 121; L, 105.]

CENOMA (Lat.), n. n. Se^{2}n(ke^{2}n)-om'a^3. Gen., *cenom'atos* (*-is*). Gr., κένωμα. Fr., *cénome.* Anything voided or removed, also the space left by such evacuation. [A, 322, 387.]

CENOMYCE (Lat.), n. f. Se^{2}n(ke^{2}n)-o^{2}m'i^2(u^6)-se(ka). Fr., *cénomyce.* Of Acharius, a genus of lichens, now referred to *Cladonia* and other genera. [B, 121.]—**C. coccifera** [Acharius]. The *Bœomyces cocciferus.* [B, 173.]—**C. coronata** [Delisle], **C. extensa** [Floerke]. Varieties of *Bœomyces cocciferus.* [B, 173.]—**C. foliolosa** [Dufour]. The *Bœomyces pungeus.*—**C. humilis** [Delise]. A variety of *Bœomyces cocciferus.* [B, 173.]—**C. pyxidata** [Acharius]. The *Cladonia pyxidata.* [B, 173.]—**C. rangiferina** [Acharius]. The *Cladonia rangiferina.* [B, 173.]—**C. rangiferina pungens** [Acharius]. The *Bœomyces pungens.* [B, 173.]—**C. uncialis** [Acharius]. The *Bœomyces uncialis.* [B, 173.]

CENOMYCIDEÆ (Lat.), n. f. pl. Se^{2}n(ke^{2}n)-o(o^2)-mi(mu^6)-si^{2}d-(ki^{2}d)'e^2-e(a^3-e^2). Of Gray, a division of the *Cenothalameæ,* comprising *Ceramia, Cladonia,* etc. [B, 170.]

CÉNOPODE (Fr.), adj. San-o-pod. See CŒNOPODUS.

CENORIES, n. See CENJORIES.

CENORRHAMPHUS (Lat.), adj. Se^{2}n(ke^{2}n)-o^{2}r-ra^{2}m(ra^{3}m)'-fu^{3}s(fu^{4}s). From κενός, empty, and ῥάμφος, a beak. Fr., *cénoramphe.* Ger., *leerschnabelig.* Having the beak hollow; as a n., in the m. pl., *Cenorrhamphi,* of Duméril, a family of the *Scansores.* [L, 180.]

CÉNOSE (Fr.), n. San-oz. See CENOSIS.

CENOSIOPHTHISIS (Lat.), n. f. Se^{2}n(ke^{2}n)-os''i^2-o^{2}t(o^{2}f)'-ti^{2}s-i^{2}s. Gen., *cenosiophthis'eos* (*-oph'thisis*). From κένωσις, evacuation, and φθίσις (see PHTHISIS). Fr., *cénosiophthisie.* Emaciation from excessive evacuations. [A, 322.]

CENOSIS (Lat.), n. f. Se^{2}n(ke^{2}n)-os'i^{2}s. Gen., *cenos'eos* (*-is*). Gr., κένωσις. Fr., *cénose.* Ger., *Entteerung.* An evacuation. [A, 322.] Cf. APOCENOSIS.

CÉNOTHALAME (Fr.), adj. San-o-ta^{3}l-a^{3}m. See CŒNOTHALAMEUS.

CENOTHALAMEÆ (Lat.), n. f. pl. Se^{2}n(kan)-o(o^2)-tha^{2}l-(tha^{3}l)-a^{2}m(a^{3}m)'e^2-e(a^3-e^2). See CŒNOTHALAMEÆ.

CENOTIC, adj. Se^{2}n-o^{2}t'i^{2}k. Gr., κενωτικός. Lat., *cenoticus.* Fr., *cénotique.* Of, pertaining to, or causing, evacuation; drastic. [A, 301, 322.]

CÉNOTROPHOSPERME (Fr.), adj. San-o-tro-fo-spe^{2}rm. See CŒNOTROPHOSPERMOUS.

CENOULA DA ROCHA, n. In Madeira, the *Monizia edulis.* [B, 121.]

CENTAURA (Sp.), n. The^{2}n-ta^3'u^4-ra^3. See CENTAURY.—**C. menor** [Sp. Ph.]. The *Erythræa centaurium.* [B, 95.]

CENTAURACEÆ (Lat.), n. f. pl. Se^{2}n(ke^{2}n)-ta^{4}r(ta^3-u^{4}r)-a-(a^3)'se^2(ke^2)-e(a^3-e^2). Fr., *centauracées.* Of Bartling, a division of the *Synanthereæ,* comprising *Cnicus, Centaurium, Cyanus,* etc. [B, 170.]

CENTAURE (Fr.), n. Sa^{3}n^2-tor. See CENTAUREUM.

CENTAUREA (Lat.), n. f. sing. and n. pl. Se^{2}n(ke^{2}n)-ta^{4}r'-(ta^3'u^{4}r)-e^2-a^3, -ta^{4}r(ta^3-u^{4}r)-e(a)'a^3. From κενταύριον or κενταύρειον, centaury. Fr., *centaurée* (1st def.). Ger., *Tausendguldenkraut* (1st def.). 1. As a n. f., of Linnæus, a genus of composite herbs of the tribe *Cynaroideæ,* subtribe *Centaureæ,* comprising from 300 to 400 species ranged under a number of sections, such as *Centaurium, Phalolepsis, Chartolepis, Rhaponticum, Jacea, Cyanus, Calcitrapa,* and *Crocodylium.* 2. As a n. n. pl., of De Candolle, a division of the *Cinarocephalœ,* comprising *Cnicus, Crupina, Kentrophyllum,* and the genera *Crocodylium, Calcitrapa, Cyanus,* and *Centaurium,* now included in *C.* (1st def.). Sprengel added to the *C. Atractylis* and one or two other genera. [B, 42, 170.]—**C. acaulis.** A north African sub-acaulescent species with large heads of yellow flowers which have an odor like that of the *Acacia farnesiana.* The root is edible. [B, 19, 42, 173.]—**C. amara** [Linnæus]. A species said to be tonic, febrifuge, and aperient. [B, 121.]—**C. amberboi** [Linnæus]. The *Amberboa odorata.* [B, 42.]—**C. americana** [Nuttall]. A species growing in the southern United States, having a stem 2 to 6 feet high and large heads of rose-colored flowers. [B, 19, 215.]—**C. axillaris** [Willdenow]. A species growing in sunny places on the mountains of Europe. The blue florets are employed like those of *C. montana,* and likewise bear the name of *flores cyani majoris.* [B, 180.]—**C. behen** [Linnæus]. A species growing in Asia Minor. According to some, it is the white behen of the Arabs, and furnishes *radix behen albi,* but according to more recent authorities the white behen is the nearly related *C. cerinthœfolia* (*q. v.*). [B, 42, 173, 270.]—**C. benedicta** [Linnæus]. Fr., *chardon bénit.* Ger., *gesegnete Heildistel.* Syn.: *Carbenia benedicta* [Bentham and Hooker], *Cnicus benedictus* [Linnæus]. The blessed thistle; a low, branching annual herb with a yellowish flower-head, indigenous to Europe and sparingly naturalized in the United States. The herb, formerly official as *herba cardui benedicti* (seu *cardui sancti,* seu *cnici benedicti,* seu *cnici silvestris*), contains a bitter principle, *cnicin,* and was formerly used in a great variety of disorders, but is now chiefly employed as a stomachic tonic. The achænia (*semen cardui benedicti*) were formerly used for pleuritic pains. [B, 81, 173, 180, 215.]—**C. calcitrapa** [Linnæus]. Fr., *chausse-trape, chardon étoilé.* Ger., *gemeine Sterndistel, Sternflockenblume.* Syn.: *Calcitrapa hypophœstum* [Gärtner] (seu *stellata* [Lamarck].) Calcitrops, star-thistle; an annual herb 2 to 3 feet high, with reddish flowers, growing throughout Europe. The

entire plant is bitter and tonic. The herb—*herba calcitrapæ* (seu *cardui stellati*, seu *centaureæ calcitrapæ*)—was formerly employed, and the leaves and flower-heads are still used, as a febrifuge and in lithiasis. In Egypt and Arabia it is employed as a condiment and vegetable. [B, 173, 180.]—**C. candidissima.** A species with yellow flowers and white, tomentose leaves, growing in the Levant. [B, 19.]—**C. carduus** [Forskål]. See ATRACTYLIS *humilis*.—**C. centaurium** [Linnæus]. Gr., κενταύριον μέγα [Dioscorides]. Lat., *centaurium magnum* (seu *majus*). Fr., *grande centaurée*. Ger., *grosse Flockenblume*. Syn.: *Centaurium officinale* [Cassini]. The greater centaury; an annual herb growing on the Alps in southern Europe. The root (*radix centaurii majoris*), which is aromatic, bitter, and astringent, is used in southern Europe as a stomachic and diaphoretic. [A, 319; B, 173, 180.]—**C. cerinthæfolia, C. cerinthifolia** [Sibthorp]. Fr., *behen blanc, rhapontic blanc*. Syn.: *Serratula behen* [Lamarck]. A stout, erect, almost suffruticose herb growing in the East, where its root—the *behen album, radix behen albi*, the *behen abiad* of the Arabs—is regarded as tonic and nervine, and is said to increase the secretion of the spermatic fluid. The herb is used for seasoning. [A, 319; B, 42, 173, 270.]—**C. crocodilium, C. crocodylium** [Linnæus]. Fr., *centaurée du Nil*. A species growing in the Levant; by Cassini referred to a distinct genus (*Crocodylium*). [B, 19, 42.]—**C. cyanus** [Linnæus]. Fr., *bluet, barbeau* [Fr. Cod.], *aubifoin, casse-lunette, fleur de Zacharie*. Ger., *blaue Flockenblume, gemeine Kornblume, Cyane*. It., *fioraliso*. Syn.: *Cyanus vulgaris* [Lobel.] (seu *arvensis* [Mönch], (seu *segetum* [H. Nett.]). The corn-flower, blue-bottle, blue-bonnets; an annual herb indigenous to Europe and sparingly naturalized in the United States; growing in fields, especially amid grain. Its large blue flowers—*flores cyani* (seu *cyani cœrulei*, seu *baptiseculæ*, seu *aubifoniæ*)—were formerly employed in malignant fevers and against the bites of scorpions and insects. The juice of the flowers was used in the preparation of collyria. The dried flowers are now mainly employed for coloring and flavoring species. [B, 108, 173, 180.]—**C. decipiens** [Thuillier]. A species frequently confounded with *C. jacea* or substituted for it. [B, 180.]—**C. decumbens** [Dubois]. A decumbent variety of *C. jacea*.—**C. dubia** [Gmelin]. The *Xeranthemum annuum*. [B, 173.]—**C. jacea** [Linnæus]. Fr., *rhapontic vulgaire, tête de moineau, jacée des prés*. Ger., *gemeine Flockenblume*. Syn.: *Jacea pratensis* [Cassini]. An erect or decumbent annual species with rose-colored flowers, growing throughout Europe and central Asia. The bitter, somewhat astringent root—*radix jaceæ nigræ* (seu *carthami silvestris*)—and the herb and flowers—*herba* et *flores jaceæ nigræ*—were formerly employed as diuretics and for gargles. The plant affords a yellow dye. [B, 108, 173, 180.]—**C. lanata** [De Candolle]. See CARTHAMUS *lanatus*. [B, 42.]—**C. mexicana** [De Candolle]. See *C. americana*.—**C. mineralis.** An old term for crystallized nitrate of silver. [B, 88.] Cf. CENTAUREUM *minerale*.—**C. minore** (It.). The *Erythræa centaurium*. [B, 88.]—**C. mollis** [Schleich]. A villous variety of *C. jacea*. [B, 180.]—**C. montana** [Linnæus]. Mountain-centaury; a species growing in sunny, mountainous places of Europe. The large blue flower-heads (*flores cyani majoris*) have been used as a substitute for those of *C. cyanus*. [B, 19, 180, 270.]—**C. moschata.** A species already described as the *Amberboa moschata* (*q. v.*), but more properly given under *C*. [B, 42, 88.]—**C. mutabilis** [St. Am.]. A hybrid between *C. nigra* and *C. solstitialis*. [B, 42.]—**C. nigra** [Linnæus]. Fr., *fourche ferrée*. Syn.: *Jacea nigra* [Mönch], *Platophyllus niger* [Cassini], *Rhaponticum ciliatum* [Lamarck]. Black centaury, black knap-weed (or knob-weed), bell-weed, bull-weed, button-weed; an annual European species, a common and troublesome weed of pastures and grain-fields. It is said to have medicinal properties like those of *C. jacea*; and in Italy a decoction made from it has been employed in skin diseases. [B, 173, 180, 185, 275.]—**C. nigrescens** [Willdenow]. A species often confounded with *C. jacea* and having similar properties and uses. [B, 180.].—**C. Nuttallii** [Sprengel]. See *C. americana*.—**C. pratensis** [Thuillier]. A variety of *C. jacea*. [B, 180.]—**C. rhapontica** [Linnæus]. Fr., *rhapontic, rhapontique vulgaire*. Syn.: *Rhaponticum scabiosum* ["Fl. fr."], *Serratula rhaponticum* [Lamarck]. A Siberian species. The root is used in scurvy. [B, 88, 173.]—**C. scabiosa** [Linnæus]. The greater knap-weed, greater centaury, black-top; a troublesome weed growing in dry places throughout Europe. The root is said to be useful in cutaneous diseases. [B, 180.]—**C. serratuloides** [Linnæus]. A European and Asiatic species. The root is eaten in Asia. [B, 173.]—**C. sibirica** [Linnæus]. An Asiatic species. The stalks furnish a kind of amadou used as a material for the moxa. [B, 173.]—**C. sicula, C. solstitialis** [Linnæus]. Syn.: *Calcitrapa solstitialis* [Lamarck]. Barnabas's (or St. Barnaby's) thistle, yellow-flowered centaury; an annual species growing in southern Europe, with yellow flowers and large, thorny, yellow appendages upon the leaves of the involucres. The flowers are bitter and are said to be employed in Savoy against intermittent fever; the root (*radix spinæ solstitialis*) was formerly used as a diuretic. [B, 108, 180.]—**C. speciosa.** The *Cascarilla hexandra* (a misprint for *Coutarea speciosa*). [B.]

CENTAURÉE (Fr.), n. Sa3n2-to-ra. The genus *Centaurea*; *in* the pl., *c's*, the *Centaureeæ*. [B, 121.]—**C. bénite.** The *Centaurea benedicta*. [B, 38.]—**C. blanche.** The *Laserpitium latifolium*. [B, 88, 121.]—**C. bleue.** The *Scutellaria galericulata*. [B, 88, 173.]—**C. chausse-trape.** The *Centaurea calcitrapa*. [B, 38.]—**C. des prés.** The *Lychnis flos cuculi*. [B, 173.]—**C. jaune.** The *Chlora perfoliata*. [B, 88, 173.]—**C. musquée.** The *Centaurea moschata*. [B, 38.]—**C. noire.** The *Centaurea nigra*. [B, 173.]—**C. odorante.** The *Amberboa* (*Centaurea*) *odorata*. [B, 19.]—**C. officinale.** The *Centaurea centaurium*. [B, 93.]—**Extrait de petite c.** [Fr. Cod.]. See *Extractum* CENTAURII.—**Grande c.** The *Centaurea centaurium*. [B, 173.]—**Petite c.** [Fr. Cod.]. The *Erythræa centaurium*. [B, 113.]—**Tisane de c.** [Fr. Cod.]. A preparation made by infusing 1 part of dried leaves of lesser centaury in 100 parts of boiling distilled water for half an hour, and straining. [B, 113 (*a*, 21).]

CENTAUREEA (Lat.), n. n. pl. Se2n(ke2n)-ta4r(ta3-u4r)-e(e2)'-e2-a3. Of Reichenbach, a division of the *Amphicenianthæ*, corresponding nearly to the *Centaurea* (2d def.). [B, 170.]

CENTAUREEÆ (Lat.), n. f. pl. Se2n(ke2n)-ta4r(ta3-u4r)-e(e2)'-e2-e(a3-e2). Fr., *centaurées*. Of Bentham and Hooker, a subtribe of the *Cynaroideæ*, comprising *Centaurea, Serratula, Carthamus, Carduncellus*, etc., distinguished by their glabrous achænia with a very oblique or laterally affixed areola. [B, 42.]

CENTAURELLA (Lat.), n. f. Se2n(ke2n)-ta4r(ta3-u4r)-e2l'la3. See BARTONIA.

CENTAURELLE (Fr.), n. Sa3n2-tor-e2l. See BARTONIA and EXACUM.

CENTAUREUM (Lat.), n. n. Se2n(ke2n)-ta4r'(ta3'u4r)-e2 u3m-(u4m), -ta4r(ta3-u4r)-e(a)'u3m(u4m). See ERYTHRÆA.—**C. magnum, C. majus.** See CENTAUREA *centaurium*.—**C. minerale.** Fr., *centaure minéral*. Of Cardiluccius, antimony pentasulphide. [B, 88.]—**C. minus.** See ERYTHRÆA *centaurium*.

CENTAURIA [Linnæus] (Lat.), n. f. Se2n(ke2n)-ta4r'(ta3'u4r)-i2-a3, -ta4r(ta3-u4r)-i(e)'a3. See CENTAUREA.

CENTAURIDIUM [Torrey, Gray] (Lat.), n. n. Se2n(ke2n)-ta4r(ta3-u4r)-i2d'i2-u3m(u4m). Fr., *centauridie*. See XANTHISMA.

CENTAURIEÆ (Lat.), n. f. pl. Se2n(ke2n)-ta4r(ta3-u4r)-i(i2)'-e2-e(a3-e2). Fr., *centauriées*. Ger., *Centaurieen*. Of Cassini, a tribe of the *Synanthereæ*, comprising *Cnicus, Kentrophyllum, Crupina*, and several genera (*Calcitrapa, Centaurium, Chryseis, Crocodylium*, and *Cyanus*) now comprised under *Centaurea*. It was subsequently divided by him into the *C. archetypæ* and *Chryseidæ*. As defined by other authors, the *C.* have been variously limited. See CENTAUREEÆ and CENTAUREA (2d def.). [B, 121, 170.]—**C. archetypæ** [Cassini]. A division of the *C.*, comprising the *Jalaceineæ, Calcitrapeæ*, and *C. veræ*. [B, 170.]—**C. veræ** [Cassini]. A division of the *C. archetypæ*, comprising *Crupina* and genera now referred to the sections *Centaurium, Microlophus*, and *Microlonchus* of *Centaurea*. [B, 170.]

CENTAURINÆ (Lat.), n. f. pl. Se2n(ke2n)-ta4r(ta3-u4r)-in(en)'-e(a3-e2). Fr., *centaurinées*. Of Reichenbach, a division of the *Amphicenanthæ*, comprising *Galacites, Centaurea, Cnicus*, and *Centrophyllum*. [B, 170.]

CENTAURINE, n. Se2n-ta4r'en. Fr., *c*. Ger., *Centaurin*. A bitter crystalline base said by Dulong to exist in the *Erythræa centaurium*. [B, 180, 270.]

CENTAURINEÆ (Lat.), n. f. pl. Se2n(ke2n)-ta4r(ta3-u4r)-i2n'-e2-e(a3-e2). Fr., *centaurinées*. Of Schultz and Walpers, a division of composite plants, comprising *Centaurea, Carthamus*, and *Crupina*. [B, 170.] Cf. CENTAUREEÆ.

CENTAURIOIDES (Lat.), adj. Se2n(ke2n)-ta4r(ta3-u4r)-i2-o(o2)-id(ed)'ez(as). From κενταύριον, the centaury, and εἶδος, resemblance. Resembling the *Centaurium*; a botanical species name. [B.]

CENTAURION (Lat.), n. n. Se2n(ke2n)-ta4r'(ta3'u4r)-i2-o2n. Gr., κενταύριον. Of Celsus and Hippocrates, the *Erythræa c.*; of Adanson, the genus *Erythræa*. [B, 45, 121.]

CENTAURIS (Lat.), n. f. Se2n(ke2n)-ta4r'(ta3'u4r)-i2s. Of Theophrastus, the *Erythræa centaurium*. [B, 121.]

CENTAURIUM (Lat.), n. n. Se2n(ke2n)-ta4r'(ta3'u4r)-i2-u3m-(u4m), -ta4r(ta3-u4r)-i(e)'u3m(u4m). Gr., κενταύριον, κενταύρειον. 1. Of the ancient authors, the centaurion, or *Erythræa c.* 2. Of Mönch, the genus *Erythræa*. 3. Of De Candolle and of Cassini, a genus now constituting a section of *Centaurea*. 4. Of Hallier, the genus *Rhaponticum*. 5. Of Persoon, the *Bartonia* (1st def.). 6. Of Burmann, the genus *Chironia*. 7. Of the Austr. Ph., Hung. Ph., and Netherl. Ph., the herb of *Erythræa c.* [B, 42, 95, 121.] Cf. CENTAURY.—**Apices florentes centaurii minoris.** The flowering tops of *Erythræa c.* [B, 180.]—**Cacumina cum floribus centaurii minoris, Centaurii cacumina.** The tops and flowers of *Erythræa c.* [B, 180.]—**Centaurii herba** [Gr. Ph.]. The herb of *Erythræa c.* [B, 95.]—**C. magnum** [Ger., Ray], **C. majus, C. majus folio in lacinias plures diviso** [C. Bauhin], **C. majus juglandis folio** [J. Bauhin], **C. majus vulgare** [Parkinson]. Gr., κενταύριον μέγα. The *Centaurea c.* [B, 200.]—**C. minus** [C. Bauhin, Tournefort], **C. minus flore purpureo** [J. Bauhin]. The *Erythræa c.* [B, 200.]—**C. minus palustre ramosissimum flore purpureo** [Vaillant]. The *Erythræa pulchella*. [B, 180.]—**C. minus rubrum** ["Hist. Oxon."], **C. minus vulgare** [Parkinson], **C. parvum** [Ger.]. The *Erythræa c.* [B, 200.]—**Comæ floridæ centaurii minoris.** The flowering tops of *Erythræa c.* [B, 180.]—**Extractum centaurii** [Ger. Ph. (1st ed.), Austr. Ph., Hung. Ph., Gr. Ph.], **Extractum centaurii minoris** [Belg. Ph., Swiss Ph., Netherl. Ph., Russ. Ph.]. Fr., *extrait de petite centaurée* [Fr. Cod.]. Ger., *Tausendguldenkraut-Extract*. Sp., *extracto de centaura menor* [Sp. Ph.]. An aqueous extract made from the leaves, tops, or entire plant of *Erythræa c.* by exhaustion with water and subsequent evaporation. [B, 95.]—**Herba centaurii** [Ger. Ph., Swiss Ph.]. The herb of *Erythræa c.* [B, 95.]—**Herba centaurii chilensis.** The herb of *Erythræa chilensis*. [B, 270.]—**Herba centaurii minoris** [Belg. Ph., Russ. Ph.]. The herb of *Erythræa c.* [B, 95.]—**Infusum centaurii.** See *Tisane de* CENTAURÉE.

CENTAUROIDES (Lat.), adj. Se2n(ke2n)-ta4r(ta3-u4r)-o(o2)-id(ed)'ez(as). Resembling the *Centaurea* or *Centaurium*; as a n., an old name for the *Gratiola officinalis*. [B, 88, 121.]

CENTAURY, n. Se2n'ta4r-i2. Lat., *centaurium*. Fr., *centaurée*. Ger., *Tausendguldenkraut*. It., *centaurea*. Sp., *centáurea*. A name applied to several species of *Centaurea* and of *Erythræa*, especially to *Erythræa centaurium*. [B.] Cf. CENTAURIUM and CENTAURÉE.—**American c.** The *Sabbatia angularis*. [B, 34.]—**Australian c.** The *Erythræa australis*. [B, 185.]—**Black c.** The *Centaurea nigra*. [B, 275.]—**California c.** The *Erythræa chironoides*. [B, 185.]—**Common c.** The *Erythræa centaurium*. [B, 185.]—**Corn-c.** The *Centaurea cyanus*. [B, 275.]—**European**

c. The *Engthrœa centaurium.* [B, 5.]—**Great c.** The *Centaurea centaurium.* [B, 200.]—**Greater c.** The *Centaurea scabiosa.* [B, 275.]—**Gulana c.** The *Exacum guianense.* [B, 275.]—**Lesser c.** The *Erythrœa centaurium.* [B, 200.]—**Mountain-c.** The *Centaurea montana.* [B, 275.]—**Small purple c.** The *Erythrœa centaurium.* [B, 200.]—**Star-thistle c.** The *Centaurea calcitrapa.* [B, 275.]—**Sweet American c.** The *Cacalia suaveolens.* [B, 275.]—**Yellow-flowered c.** The *Centaurea solstitialis* and the *Chlora perfoliata.* [B, 275.]

CENTEIO (Port.), n. Se^{2}n-ta'i^2-o. The *Secale cereale.* [B, 121.]

CENTELLA (Lat.), n. f. Se^{2}n(ke^{2}n)-te^{2}l'la^3. Fr., *centelle.* 1. Of Linnæus, a genus of umbelliferous plants, now made a section of the genus *Hydrocotyle.* 2. Of Monardes, an undetermined plant of South America, where it is used in the treatment of certain scrofulous disorders. [B, 42, 121.]

CENTELLOIDES [Walpers] (Lat.), n. f. Se^{2}n(ke^{2}n)-te^{2}l-lo(lo^2)-id(ed)'ez(as). See HYDROCOTYLE.

CENTENILLE (Fr.). Sa^{3}n^2-te^{2}n-el-y'. The genus CENTUNCULUS. [L, 41.]

CENTENNINUS (Lat.), adj. Se^{2}n(ke^{2}n)-te^{2}n-nin(nen)'u^{3}s(u^{4}s). Lasting a hundred years; a botanical species name. [B.] See SUBLIMIA *centennina.*

CENTENO (Sp.), n. The^{2}n-tan'o. The *Secale cereale.* [B. 121.]

CENTERIA (Lat.), n. f. Se^{2}n(ke^{2}n)-te(te^2)'ri^2-a^3. Of Theophrastus, the *Hypericum androsæmum.* [B, 121.]

CENTESIMAL, adj. Se^{2}nt e^{2}s'i^{2}m-a^{2}l. From *centesimus,* a hundredth. Fr., *centésimal.* Of or pertaining to a division or dilution by hundreds or into a hundred or a multiple of a hundred parts; containing a hundred divisions or parts. [B.] See *C.* ALCOHOLOMETER and *C.* THERMOMETER.

CENTESIS (Lat.), n. f. Se^{2}nt(ke^{2}nt)-es(as)'i^{2}s. Gen., *centes'eos* (*-is*). Gr., κέντησις (from κεντεῖν, to perforate). See PARACENTESIS.

CENTETERION (Lat.), **CENTETERIUM** (Lat.), n's n. Se^{2}n-(ke^{2}n)-te^{2}t(tat)-e(a)'ri^2-o^{2}n, -u^{3}m(u^{4}m). Gr., κεντητήριον. A needle or other instrument for making punctures. [A, 322.]

CENTETICUS (Lat.), adj. Se^{2}n(ke^{2}n)-te^{2}t(tat)'i^{2}k-u^{3}s(u^{4}s). Gr., κεντητικός. 1. Prickly. 2. Pertaining to puncture. [A, 322, 387.]

CENTETIDÆ (Lat.), n. f. pl. Se^{2}n(ke^{2}n)-te^{2}t(tat)'i^{2}d-e(a^3-e^2). A family of the *Insectivora.* [L, 121.]

CENTETINÆ (Lat.), n. f. pl. Se^{2}n(ke^{2}n)-te^{2}t(tat)-in(en)'e(a^3-e^2). A subfamily of *Centetidæ.* [L, 121.]

CENTIFIDOUS, adj. Se^{2}nt-i^{2}f'i^{2}d-u^{3}s. Lat., *centifidus* (from *centum,* a hundred, and *findere,* to cleave). Split into a hundred parts or many parts. [A, 318; L, 56.]

CENTIFOLIE (Ger.), n. Tse^{2}nt-i^2-fol-e'. From *centum,* a hundred, and *folium,* a leaf. The *Rosa centifolia.* [B, 180.]—**C'nblätter.** The leaves of *Rosa centifolia.* [B.]—**C'nrose.** See *C.*

CENTIFOLIOUS, adj. Se^{2}nt-i^2-fol'i^2-u^{3}s. Lat., *centifolius* (from *centum,* a hundred, and *folium,* a leaf). Ger., *hundertblätterig.* Having a hundred leaves or many leaves. [L, 56.]

CENTIGRADE, adj. Se^{2}nt'i^2-grad. From *centum,* a hundred, and *gradus,* a step. Fr., *c.* It., *centigrado.* Sp., *centígrado.* Containing a hundred degrees; of or pertaining to a division into a hundred degrees. [B.] See *C.* THERMOMETER.

CENTIGRAM, CENTIGRAMME, n's. Se^{2}nt'i^2-gra^{2}m. From *centum,* a hundred, and *gramma,* a gramme. Fr., *centigramme.* Ger., *Centigram.* It., *centigrammo.* Sp., *centígramo.* In the metric system of weights, a hundredth part of a gramme (·1543 Troy grain). [B, 5.]

CENTILITER, CENTILITRE, n's. Se^{2}nt'i^2-let-u^{5}r, -letr. Fr., *centilitre.* Ger., *Centiliter.* It., Sp., *centilitro.* In the metric system of measures, the one hundredth part of a litre (·61028 cubic inches or 2·7053 fluidrachms). [B, 5.]

CENTIMETER, CENTIMETRE, n's. Se^{2}nt'i^2-met-u^{5}r, -metr. Fr., *centimètre.* Ger., *Centimeter.* It., *centimetro.* Sp., *centímetro.* In the metric system of measures, the one hundredth part of a metre, a length of ·39370 inch.—**Cubic c.** Fr., *centimètre cube.* Ger., *kubisches Centimeter.* It., *centimetro cubico.* Sp., *centímetro cúbico.* A measure of volume consisting of a cubical space each side of which has a length of one c.; the same as a millilitre, than which it is more commonly employed. [B.]

CENTIMORBIA (Lat.), n. f. Se^{2}nt(ke^{2}nt)-i^2-mo^{2}rb'i^2-a^3. See CENTUMMORBIA.

CENTINERVIA (Lat.), n. f. Se^{2}nt(ke^{2}nt)-i^2-nu^{5}r(ne^{2}r)'vi^2(wi^2)-a^3. From *centum,* a hundred, and *nervus,* a nerve. The *Plantago major.* [B, 200.]

CENTINODIA (Lat.), **CENTINODIUM** (Lat.), n's f. and n. Se^{2}nt(ke^{2}nt)-i^2-nod'i^2-a^3, -u^{3}m(u^{4}m). From *centum,* a hundred, and *nodus,* a knot. Fr., *centinode, herbe à cent nœuds.* Syn.: *centumnodia.* 1. The *Polygonum aviculare* (knot-grass). 2. A section of the genus *Polygonum,* including the *Polygonum aviculare.* [B, 121, 180.]—**Centinodium minus.** See *C.*

CENTIPEDA (Lat.), n. f. Se^{2}nt(ke^{2}nt)-i^{2}p'e^{2}d-a^3. 1. The *Oniscus asellus.* [L, 105.] 2. Of Loureiro, a genus of Asiatic and South American composite plants. [B, 121.]

CENTIPEDAL, adj. Se^{2}nt-i^{2}p'e^{2}d-a^{2}l. Gr., ἑκατόμπους. Lat., *centipes* (from *centum,* a hundred, and *pes,* the foot). Fr., *centipède.* Ger., *hundertfüssig.* Having more than 50 and fewer than 200 feet (said of insects). [L, 180.]

CENTIPES (Lat.), n. Se^{2}nt(ke^{2}nt)'i^2-pez(pe^{3}s). Gen., *centip'edis.* See CENTIPEDAL.

CENTOCULATED, CENTOCULOUS, adj's. Se^{2}nt-o^{2}k'u^{2}l-at-e^{2}d, -u^{3}s. Lat., *centoculus* (from *centum,* a hundred, and *oculus,* the eye). Having a hundred or many eyes. [A, 318; L, 73.]

CENTOGAMBO (It.), n. Che^{2}n-to-ga^{3}m'bo. The *Oniscus asellus.* [L, 105.]

CENTONE (Lat.), n. f. Se^{2}n(ke^{2}n)-ton'e(a). Of Cæsalpinius, the *Stellaria nemorum* and the *Centunculus.* [B, 121.]

CENTONE (It.), n. Che^{2}n-ton'a. The *Alsine* (*Stellaria*) *media.* [B, 121.]

CENTONIA (Lat.), n. f. Se^{2}n(ke^{2}n)-ton'i^2-a^3. The *Santolina chamæcyparissus.* [Gesner (B, 121).]

CENTONICE (It.), n. Che^{2}n-ton-e'cha. See CENTONE (It.).

CENTORY, n. Se^{2}n'to^{2}r-i^2. See CENTAURY.

CENTOTHECEÆ (Lat.), n. f. pl. Se^{2}n(ke^{2}n)-to(to^2)-the(tha)'-se^2(ke^2)-e(a^3-e^2). Fr., *centothécées, centothèques.* Of Bentham and Hooker and of Hackel, a subtribe of grasses belonging to the *Festuceæ,* distinguished by the broad, flat, reticulately veiny leaves. [B, 42, 245.]

CENT-PIEDS (Fr.), n. pl. Sa^{3}n^2-pə-a. See MYRIAPODA.

CENTRAD [Barclay], adv. Se^{2}n'tra^{2}d. Ger., *centralwärts.* Toward the centre of the body; proximally.

CENTRADIAPHANES (Lat.), n. f. Se^{2}n(ke^{2}n)''tra^3-di(di^2)-a^{2}f(a^{3}f)'a^{2}n(a^{3}n)-ez(as). From κέντρον, the centre, α priv., and διαφανής, transparent. See *Central* CATARACT.

CENTRAGE (Fr.), n. Sa^{3}n^{2}t-ra^{3}zh. Ger., *Centrirung.* 1. The process of ascertaining the centre of a body. 2. The condition in which the centres of all the refracting surfaces of the eye fall in the same straight line. [α, 18.]

CENTRAL, adj. Se^{2}nt'ra^{2}l. Lat., *centralis.* Fr., *c.* Ger., *c., centrisch, mittelständig.* It., *centrale.* Sp., *c.* 1. Pertaining to the body (*centrum*) of a vertebra. 2. Situated in or originating from a lesion of the central nervous system (*e. g., c. anæsthesia*). 3. In botany, situated nearest the axis of the whole plant or of an organ; especially of a placenta which is situated in the axis of the ovary. Such a placenta is said also to be free when it has no connection with the walls of the ovary. [B.]

CENTRALIS (Lat.), adj. Se^{2}n(ke^{2}n)-tral(tra^{3}l)'i^{2}s. See CENTRAL; as a n., in the neut., *centrale,* see Os *centrale.*

CENTRALITY, n. Se^{2}n-tra^{2}l'i^2-ti^2. Fr., *centralité.* The state of being originated in the central nervous system, and not in the peripheral nerves (said of nervous phenomena). [A, 301.]

CENTRAL SPRING, n. Se^{2}n'tra^{2}l spri^{2}ng. See SHELDON SPRINGS.

CENTRATIO [Paracelsus] (Lat.), n. f. Se^{2}n(ke^{2}n)-tra(tra^3)'-shi^2(ti^2)-o. Gen., *centratio'nis.* Degeneration of a fancied saline principle into one (*centrum salis*) of a corrosive and ulcerative quality, giving rise to ulceration. [A, 325.]

CENTRE, n. Se^{2}ntr. Gr., κέντρον. Lat., *centrum.* Fr., *c.* Ger., *Centrum, Mittelpunkt.* It., Sp., *centro.* 1. A point that is perfectly or approximately equidistant from all parts of the periphery of a surface or of the superficies of a solid. 2. The point of origin of a developmental process (*e. g., c. of ossification*). 3. An area in the nervous system from which a special nervous impulse proceeds.—**Accelerating c. of the heart.** See *Cardio-acceleratory c.*—**Acoustic c's.** Fr., *c's acoustiques.* Ger., *Gehörcentren, Hörsphäre, Gehörkerne.* 1. The c's of origin of the acoustic nerve; that region of the encephalon which includes portions of the cerebellar peduncles, the floor of the fourth ventricle, the funiculus cuneatus, the funiculus gracilis, the restiform body, and the striæ medullares. [F.] Cf. *Auditory* NUCLEUS. 2. The sensory c. of the acoustic nerve; a region situated in the posterior two thirds of the superior temporal convolution (Wernicke's convolution). Lesions of the gray substance, or the underlying white substance in this region, produce the condition called psychical deafness (Fr., *surdité psychique;* Ger., *Seelentaubheit*). [F; α, 18.]—**Ano-spinal c.** Fr., *c. ano-spinal.* A nervous c. in the lumbar portion of the spinal cord, presiding over the contractions of the sphincter ani. [K: L, 49.]—**Ano-vesical c.** Lat., *centrum ano-vesicale.* The c. in the spinal cord which regulates the tonicity of the sphincter ani and of the sphincter of the bladder; situated, according to Stilling and Kirchoff, in the lumbar enlargement, near the point of origin of the third and fourth sacral nerves. Paralysis of this c. produces incontinence of fæces and of urine. [Kirchoff, "Jour. of Ment. Sci.," April, 1886, p. 126 (α, 18).]—**Arm-c.** That one of the cerebral c's that is supposed to govern the movements of the arm; an area of the cortex occupying the middle third of both central convolutions (gyrus centralis anterior and gyrus centralis posticus), and also the base of the superior and middle frontal convolutions. Excitation of this c. produces movements in the arm of the opposite side. [Mendel (A, 319 [α, 18]); A, 481 (α, 18); Wiglesworth, "Liverpool Med.-chir. Jour.," Jan., 1885, p. 60.]—**Arrest c. of the heart.** See *Cardio-inhibitory c.*—**Articulate-language c.** See *Speech-co-ordinating c.*—**Auditory c.** Lat., *centrum auditivum.* Fr., *c. auditif.* Ger., *Gehörcentrum.* A region in the cerebrum to which auditory impulses are transmitted; located by Ferrier in the inframarginal convolution. [K, 3.] Cf. *Acoustic c's.*—**Broca's c.** See *Kinæsthetic c.*—**Budge's c.** See *Genito-spinal c.*—**Bulbar trophic c.** Fr., *c. trophique bulbaire.* The bulbar vaso-motor c., variously placed by different authors between a point situated 2 mm. below the corpora quadrigemina and one situated 5 mm. above the calamus scriptorius. Excess of carbon dioxide and diminution of oxygen in the blood excite this c. to increased action. [α, 18.]—**Cardiac c.** Fr., *c. cardiaque.* Ger., *Herzcentrum.* 1. The region in the medulla oblongata that includes the cardio-acceleratory and the cardio-inhibitory c's (*q. v.*). 2. An excito-motor nervous c. influencing the movements of the heart; situated in the lower cervical and upper dorsal portions of the spinal cord. [α, 18.] See *Cardio-acceleratory c.* and *Cardio-inhibitory c.*—**Cardio-accelerating** (or **acceleratory**) **c.** An area in the medulla oblongata from which fibres proceed down the cervical portion of the spinal cord to the lower cervical and upper dorsal ganglia of the sympathetic

nerve, and thence to the heart through the cardiac plexus. [A, 481 (a, 18); C. Paul (a, 18).]—**Cardio-inhibitory c.** Fr., *c. cardio-inhibitoire.* Ger., *Herzhemmungscentrum, Cardio-inhibitorisch-Centrum.* A c. in the medulla oblongata in which, by influences descending from the cerebral cortex or of reflex origin, impulses are originated which are transmitted by the vagi to the cardiac plexus and retard the action of the heart. [K, 3 (a, 17).]—**C. aponévrotique du diaphragme** (Fr.). The tendinous central portion of the diaphragm. [L, 32.]—**C. auditif** (Fr.). See *Auditory c.*—**C's auto-moteurs de l'intestin** (Fr.). Of Meissner, a rich reticulum of nerve cells and connecting fibres in the submucous coat of the intestine, supposed to preside over peristaltic action. Their existence is doubted. [L, 88; a, 18.]—**C. convulsif** (Fr.). See *Convulsion c.*—**C's d'inhibition** (Fr.). See *Moderator c's.*—**C. encéphalo-rhachidien** (Fr.). See *C. nerveux encéphalo-rhachidien.*—**C. for deglution.** See *Deglutition c.*—**C. for tactile sensation.** See *Tactile c.*—**C. for the lower extremity** (or **limb**). Fr., *c. pour l'extrémité inférieure.* Ger., *Centrum für die untere Extremität.* A nerve c. presiding over the movements of the lower limb; situated in the upper third of the two ascending convolutions (central gyri), the postero-parietal lobule of Ferrier, or the superior parietal convolution, the base of the superior frontal convolution, and the posterior part of the paracentral lobule. [a, 18.]—**C. for the secretion of saliva.** See *Salivation c.*—**C. médullaire du cervelet** (Fr.). The central white substance of the cerebellum. [I, 18; K.]—**C. moyen.** See *Median c. of Luys.*—**C's nerveux** (Fr.). The nervous c's; *i. e.*, the encephalon and spinal cord as a whole. [a, 18.]—**C. nerveux du diaphragme** (Fr.). See *C. aponévrotique du diaphragme.*—**C. nerveux encéphalo-rhachidien** (Fr.). The cerebro-spinal axis. [L, 41.]—**C. of a lens.** See *Optical c.*—**C's of arrest.** See *Moderator c's.*—**C. of gravity.** Lat., *centrum gravitatis.* Fr., *c. de gravité.* Ger., *Schwerkraftmittelpunkt.* It., *centro di gravità.* The point of application of the resultant of the parallel forces which are conceived to act upon the molecules of a body under the influence of gravity. This point is invariable in situation in every position of the body. In a body suspended by a cord, the line of the cord always passes through the c. of gravity, and in a body balanced upon a support it is necessary, in order to maintain equilibrium, that the support should be directly under the c. of gravity. Hence in a balance the c. of gravity of the movable portion (the arms and scale-pans) must be directly over the knife-edge upon which the arms rest. [B.]—**C's of moderation.** See *Moderator c's.*—**C. of ossification.** Fr., *c. d'ossification.* Ger., *Ossificationspunkt, Knochenkern.* A point in a cartilage about to be replaced by bone at which the calcific changes in the interior of the bone begin. There is one such c. in most of the short bones: in the long bones there is also one, or more than one, for each extremity or epiphysis, besides that for the shaft.—**C. of sensorial projection, C. of similitude.** Fr., *c. de la projection sensorielle, c. de similitude.* Ger., *Aehnlichkeitsmittelpunkt, optischer Mittelpunkt, Mittelpunkt der empfindlicher Scheindarstellung* (oder *Projection*). It., *centro di similitudine* (o *della projezione sensoriale*). Sp., *centro de similitud* (ó *de la proyección sensorial*). That point in which the straight lines which may be mentally drawn from all points in an object looked at to the points that correspond to them in the visual image cross each other. [F.]—**C. ovale latéral** [Vicq d'Azyr] (Fr.). See CENTRUM *ovale minus.*—**C. phrénique** (Fr.), **C. tendineux du diaphragme** (Fr.). See *C. aponévrotique du diaphragme.*—**Cerebral inspiratory c.** A c. which Christiani describes as existing in the optic thalamus. When directly stimulated, it causes deeper and more rapid inspirations. A similar c. has been described as situated in the posterior quadrigeminal bodies. [Landois (K).]—**Cerebro-spinal c.** Lat., *centrum cerebro-spinale.* Fr., *c. cérébro-spinal.* Ger., *Gehirnrückenmarkscentrum.* The cerebro-spinal axis, or central nervous system, including the encephalon and the spinal cord. [I, 47.]—**Ciliospinal c.** Lat., *centrum cilio-spinale.* Fr., *c. cilio-spinal.* Ger., *ciliospinalisches Centrum.* A c. in the lower cervical region of the spinal cord which presides over the movements of the iris. [K.]—**Color c.** A c. for the perception of colors; situated, according to Wilbrand, in some part of the occipital cortex in front of the apical region. Disease of this c. is said to cause unilateral color-blindness, but not hemianopia. [Gowers (a, 18).]—**Convulsion c., Convulsive c.** Fr., *c. convulsif.* Ger., *Krampfcentrum.* A limited area in the floor of the fourth ventricle stimulation of which causes tonic and clonic spasms of all the voluntary muscles. The convulsions of asphyxia are supposed to be due to the action of venous blood upon this c. [D, 35; K.]—**Co-ordinating c's.** Several parts of the nervous system have been thought to preside over co-ordination, viz., the cerebellum, the ganglia at the base of the brain, and to a certain extent the gray matter of the spinal cord. [a, 18.]—**Cortical c's.** Fr., *c's corticaux.* Ger., *Rindencentren.* Regions of the cerebral cortex endowed with special functions, motor, sensory, or psychical. [a, 18.]—**Coughing c.** Ger., *Hustencentrum.* A reflex c. in the medulla oblongata, just above the c. for inspiration. Afferent impulses reach it through the vagus; its efferent nerves are those supplying the glottis. [Landois (K).] Cf. *Respiratory c.*—**Defecation c.** Fr., *c. de défécation.* Ger., *Kothentleerungscentrum.* A c. in the lumbar portion of the spinal cord, supposed to keep the sphincter ani in a state of tonic contraction. [Gower, "Proc. of the Roy. Soc.," xxvi, 1877, p. 77 (K).]—**Deglutition c.** Fr., *c. de déglutition.* Ger., *Schluckcentrum, Verschluckenscentrum.* A c. in the gray matter of the floor of the fourth ventricle, above the c. for respiration and on a level with the apices of the alæ cinereæ, which presides over the reflex act of swallowing. It receives afferent impulses through the trifacial, vagus, and glassopharyngeal nerves, and transmits efferent impulses along the motor branches of the pharyngeal plexus. [Landois (K); Marckwald, "Ztschr. f. Biol.," xxv, 1, p. 1 (a, 18).]—**Deputy c.** [Spitzka]. A secondary nerve-c. in the spinal cord, also a nucleus of one of the cranial nerves. ["Med. Record," Oct. 11, 1884, p. 393 (K).]—**Diabetic c.** Lat., *centrum diabeticum.* Fr., *c. diabétique.* Ger., *Harnruhrcentrum.* An area in the median line of the posterior part of the anterior half of the floor of the fourth ventricle. C. Bernard discovered that a puncture in this region caused glycosuria. This has been explained as a disturbance of the vaso-motor system, the c. for which has the same situation. [Eckhard (K); a, 18.]—**Dilatation c.** See *Cilio-spinal c.*—**Dominating sweat-c.** Ger., *regierendes Schweisscentrum.* A c. in the medulla oblongata described by Adamkiewicz, stimulation of which in the cat causes profuse perspiration in the extremities. [Landois (K).]—**Dominating vaso-motor c.** Ger., *regierendes vaso-motorisches Centrum.* The vaso-motor c. in the medulla oblongata. [Landois (K).]—**Double c. demi-circulaire de Vieussens** (Fr.). Lat., *centrum geminum semicirculare.* See *Internal* CAPSULE.—**Ejaculation c.** See *Genito-urinary c.*—**Emotional c.** A nervous c. regulating the external manifestations of emotional states; according to Bastian, the pons Varolii may be regarded as such a c. [a, 18.]—**Epigastric c.** Lat., *centrum epigastricum.* Fr., *c. épigastrique.* Ger., *epigastrisches Centrum.* The solar plexus considered as the c. of the nervous activities of the abdominal organs. [K.]—**Epiotic c.** (of formation of the periotic cartilage). The portion of periotic cartilage that surrounds the posterior semicircular canal and extends into the mastoid portion of the temporal bone. [Huxley (A, 5).]—**Erection c.** See *Genito-urinary c.*—**Excito-motor c.** Fr., *c. excito-moteur.* Ger., *excito-motorisches Centrum.* The combined sensitive c's of the brain taken as a whole. These include the crura cerebri, the pons Varolii, the medulla oblongata, the deeper portions of the cerebellum, and the corpora quadrigemina. [K.]—**Expiratory c.** Fr., *c. de l'expiration.* Ger., *Expirationscentrum, Ausathmungscentrum.* A region described by Christiani, in the anterior quadrigeminal bodies, which is active after the inspiratory c. has been extirpated. [Landois (K).]—**Eyelid-closure c.** Ger., *Lidschlusscentrum.* A reflex c. in the medulla oblongata presiding over the closure of the eyelids. [K, 16.]—**Facial-movement c's.** The cortical c's for the movements of the muscles about the mouth (situated in the lower third of the ascending frontal convolution) and for those about the eyes (situated in the angular gyrus). [a, 18.]—**General-convulsion c.** See *Convulsion c.*—**General-sensibility c's.** Fr., *c's pour la sensibilité générale.* Ger., *Fühlsphäre* [Munk]. Cortical regions in which the perception and representation of contact, pain, the position of the body, and temperature are produced; overlapping the motor c's. [C. L. Dana, "Trans. of the Congr. of Am. Phys. and Surg.," 1888 (a, 18).]—**Genito-spinal c.** Fr., *c. génito-spinal.* A reflex c. in the spinal cord at the level of the fourth lumbar vertebra of the dog. It presides over the sexual functions in the male and female, and also the muscular action of the bladder. Lesions at this point pervert or destroy the sexual instinct or impair or prevent erection in the male. [I, 42 (K); a, 18.] Cf. *Micturition c.*—**Genito-urinary c.** Lat., *centrum genito-urinarium.* Fr., *c. génito-urinaire.* A c. in the lumbar portion of the spinal cord which is concerned in the erection of the penis and the emission of semen. [K.]—**Glandular c's.** See *Secretory c's.*—**Glycogenic c.** See *Diabetes-c.*—**Great nervous** (or **neural**) **c.** See *Medullary c.*—**Gustatory c.** See *Taste-c.*—**Half-vision c.** A c. situated in the apex of the occipital lobe; so called because it receives impressions from corresponding halves of the two retinæ. [Gowers (a, 18).] Cf. *Visual c.*—**Head-and-neck-movement c.** A c. presiding over the movements of the head and neck; situated in the posterior extremity of the second frontal convolution and the lower part of the corresponding region of the first frontal convolution. [Ferrier, quoted by Flint (a, 18).]—**Higher visual c.** A c., supposed by Ferrier to lie in the angular gyrus, in which the impressions from the half-vision c's are combined to form a complete image, chiefly from the eye of the opposite side. Disease of this c. causes crossed amblyopia. [Gowers (a, 18).]—**Inhibitory c's.** See *Moderator c's.*—**Insensitive c.** Fr., *c. insensible.* Ger., *unempfindliches Centrum.* The less sensitive portions of the brain, those which do not respond readily to stimulation, certain parts of the cortex, the corpora striata, and the optic thalami.—**Inspiratory c.** Fr., *c. inspiratoire* (ou *pour l'inspiration*). Ger., *Inspirationscentrum.* Two non-cortical encephalic inspiratory c's have been described: one situated in the optic thalamus (see *Cerebral inspiratory c.*), the other in the posterior pair of the corpora quadrigemina (Martin and Booker). The principal inspiratory c. is situated in the medulla oblongata, forming part of the respiratory c. These c's are all reflex. [a, 18.]—**Intracardiac c's.** Fr., *c's intracardiaques.* Three small nerve ganglia (Remak's, near the orifice of the inferior vena cava; Bidder's, near the mitral valve; and Ludwig's, in the interauricular septum), connected with the cardiac plexus, that cause the continued automatic beating of the heart after its removal from the body. [a, 18.]—**Kinæsthetic c.** The speech-c. in the third left frontal convolution of the brain, in which the motor element in the production of speech is represented. ["Brain," Jan., 1885, p. 482 (K); M. A. Starr, "N. Y. Med. Jour.," Sept. 29, 1888, p. 358.]—**Laryngeal cortical c.** Fr., *c. cortical laryngé.* A c. situated in the posterior extremity of the inferior frontal convolution, near the sulcus separating it from the ascending frontal gyrus. [J. Garel, "Rev. mens. de laryngol.," etc., May, 1886, p. 248 (a, 18).]—**Leg c.** Fr., *c. pour la jambe.* Ger., *Beincentrum.* See *C. for the lower limb.*—**Masius's c.** See *Ano-spinal c.*—**Median c. of Luys.** Lat., *centrum medianum.* Fr., *c. médian* (ou *moyen*) *de Luys.* The second of a series of four c's described by Luys as situated in the optic thalamus; a small nucleus near the central part of the thalamus, into which fibres from the optic nerve may be traced; considered by Luys as a visual c. Its existence has been denied. [I, 28 (K); a, 18.]—**Mastication c.** Ger., *Centrum der Kaubewegungen.* A reflex c. in the medulla oblongata presiding over the movements of mastication. [K, 16.]—**Medullary c.** Fr., *gouttière médullaire.* Ger., *Medullarplatte, Rückenfurche, Ruckenwülste, Medullarrohr.* Called also *neural c.* and *nervous c.*, with or without the word "great" prefixed. In embryology, that formation which is ultimately developed into the brain and the spinal marrow; a growth of the cells of the epiblast in the anterior part of the embryonic area in the same direction as the primitive streak. [A, 5.]—**Mic-**

turition c. Fr., *c. de micturition.* Ger., *Micturitionscentrum.* A c. in the lumbar portion of the spinal cord which presides over the act of urination. [Goltz, Pflüger's "Arch.," viii, 1874, p. 474 (K).]—**Moderator c's.** Fr., *c's modérateurs, c's d'inhibition.* Nervous c's found in the spinal cord and in the caudex encephali which exercise an inhibitory action, generally reflex, on various functions of the body. [L, 88; *a*, 18.]—**Motor c.** Fr., *c. moteur.* Ger., *Bewegungscentrum.* A c. which distributes motor impulses along the appropriate nerve-channels. Its area of representation in the cortex includes the convolutions about the upper extremity of the fissure of Rolando. [Hitzig and Fritsch, Du Bois-Reymond's "Arch.," 1870, p. 300 (K).]—**Nerve-c., Nervous c.** Fr., *c. nerveux.* Ger., *Nervencentrum.* A central point of origin or termination for nerve-fibres, generally in the cerebro-spinal axis; a c. which originates efferent and receives afferent impulses. [C; K.] Cf. *Medullary c.*—**Neural c.** See *Medullary c.*—**Nutrition-c.** See *Trophic c.*—**Olfactory c.** Fr., *c. olfactif, c. d'odoration.* Ger., *Geruchcentrum, Riechcentrum, Riechsphäre* [Munk]. A c. for the sense of smell; located by Frigerio in the foot of the left gyrus hippocampi, by Ferrier in the gyrus uncinatus and in the region about it. ["Semaine médicale," 1887, p. 431 (*a*, 18); Munk (A, 319 [*a*, 18]); K, 3, 16.] —**Opisthotic c.** (of formation of the periotic cartilage). Huxley's name for that portion of the periotic cartilage that surrounds the fenestra rotunda and the cochlea. [A, 5.]—**Optic c., Optical c.** Lat., *centrum opticum.* That point upon the principal axis of a lens, every ray passing through which emerges in a course parallel to that of its entry. Its distance from either surface of a lens is directly proportional to the radius of curvature of that surface. [B.] —**Oral c.** An area at the anterior extremity of the second primary convolution of the cerebral cortex in the dog, stimulation of which causes opening of the mouth and protrusion of the tongue. [Landois (K).]—**Orbicularis-palpebrarum c.** A c. supposed to be situated near the angular gyrus. [Mendel (A, 319 [*a*, 18]).]—**Oval c.** See CENTRUM *ovale.*—**Parenchymatous nerve-c.** Ger., *parenchymatöses Nervencentrum.* Of Körner, a nerve-c. existing in the substance of an organ and regulating its action. [Landois (K).]—**Parturition c.** A reflex c. in the spinal cord, opposite the first and second lumbar vertebræ, which communicates by afferent and efferent fibres with the uterine plexus. [Landois (K).]—**Peristaltic c.** Lat., *centrum peristalticum.* Fr., *c. péristaltique.* Ger., *peristaltisches Centrum.* A c. in the medulla oblongata which presides over the peristaltic movements of the stomach and intestines. [K.]—**Petit c. ovale (de Vieussens)** (Fr.). See CENTRUM *ovale minus.*—**Phonation c.** See *Laryngeal cortical c.*—**Phonetic c., Phonic c.** Lat., *centrum phonicum.* Fr., *c. phonique.* 1. The point of origin of the voice in a person who is speaking. 2. In a broader sense, the point of origin of the sound made by any vibrating body. [Littré (K).]—**Phrenic c.** The tendinous central portion of the diaphragm. [*a*, 17.]—**Pro-otic c.** (of formation of the periotic cartilage). Huxley's name for that portion of the periotic cartilage that incloses the superior semicircular canal. [A, 5.] —**Psychical c's.** See *Psycho-motor c's* and *Sensory cortical c.*—**Psycho-acoustic c.** See *Auditory* AREA.—**Psycho-geusic c.** Ger., *psychogeusisches Centrum.* The cerebral c. for the sense of taste, located by Ferrier (in the dog's brain) in the gyrus uncinatus. [Landois (K).]—**Psycho-motor c's.** Fr., *c's psycho-moteurs.* Ger., *psychomotorische Centren.* The regions of the cerebral cortex from which motor impulses originate; the same as the cortical motor c's, but the term takes into account the element of volition. [*a*, 18.]—**Psycho-optic c.** Ger., *psycho-optisches Centrum.* See *Visual c.*—**Psycho-osmic c.** A cerebral c. for the sense of smell, located by Ferrier in the subiculum cornu Ammonis. [Landois (K).] Cf. *Olfactory c.*—**Psycho-sensorial c.** See *Sensory cortical c.*—**Psycho-visive c.** See *Visual c.*—**Pupil-dilating c.** 1. See *Cilio-spinal c.* 2. A c. situated in the posterior extremity of the first and second frontal convolutions. [*a*, 18.]—**Red c. of the tegmentum.** Ger., *rother Kern der Haube.* See *Red* NUCLEUS.—**Reflex c.** Fr., *c. réflexe.* Ger., *Reflexcentrum.* Any nerve-cell or group of nerve-cells in the encephalon, spinal cord, or ganglionic system which receives an impression through centripetal nerve-fibres from end-organs in the periphery, and transforms it into an impulse, either motor or secretory, which is sent out through centrifugal nerve-fibres. This may take place without conscious sensation or volition being superadded. [*a*, 18.]—**Respiratory c.** Lat., *centrum vitale.* Fr., *c. respiratoire, nœud vital.* Ger., *Athemcentrum, Lebensknoten.* The vital knot; a region in the medulla oblongata in which respiratory movements are induced and co-ordinated, and in which, to a limited extent, they originate. It lies in the floor of the fourth ventricle, on either side of the posterior longitudinal sulcus and near the apparent origin of the vagi. Both inspiration and expiration seem to be represented in this c., and related so that impulses which excite the one inhibit the other. However, the ganglionic cells of this c. act automatically for inspiratory impulses whenever a deficiency of oxygen in the blood bathing them arises, but in a reflex manner for special expiratory impulses which determine coughing, sneezing, etc. Although the action of this c. is greatly modified by afferent impulses conveyed to it, especially through the vagus, and was formerly supposed to be entirely reflex, it has been shown to be primarily automatic. This c. does not itself directly excite the action of the respiratory muscles, but sends impulses to the motor c's of the cord, which transmit them to those muscles through the spinal accessory, cervical, intercostal, and phrenic nerves. Additional inspiratory c's have been found in the floor of the third ventricle, near the anterior part of the aquæductus Sylvii [Christiani], and between the corpora quadrigemina [Martin and Booker]. This c. was called by Flourens *nœud vital* because upon its injury all respiratory movements cease forever. [J, 19, 28, 41; *a*, 18.]—**Salivary c., Salivation c.** Fr., *c. de salivation.* Ger., *Speichelcentrum, Speichelflusscentrum, Speichelabsonderungscentrum.* A reflex c. presiding over the secretion of saliva; situated in the floor of the fourth ventricle. [Landois (K).]—**Secretory c's.** Fr., *c's sécrétoires.* Ger., *Absonderungscentren.* 1. The urinary c's, including the diabetic c., one a little below it, puncture of which produces simple polyuria, and one a little above, puncture of which produces albuminuria. 2. See *Salivary c.* [*a*, 18.] —**Sensitive c.** Lat., *centrum sensitivum.* Fr., *c. sensitif.* Ger., *sensitives Centrum, empfindliches Centrum.* As a general expression, any portion of the brain which responds promptly to a stimulus. [K, 3.]—**Sensory c.** Fr., *c. sensorial, c. sensitif.* Ger., *Empfindungs-Centrum.* A supposed c., better called region or tract, in the brain to which sensory impressions are conducted; in this region are included c's for olfaction, taste, touch, sight, and hearing. It is located by Ferrier at the posterior part of the superior and middle frontal convolutions; by Bastian it is made to include the supramarginal and angular gyri, the convolutions of the temporo-sphenoidal lobe on its external and internal aspects, and possibly also the occipital convolutions. [Ferrier, "West Riding Rep.," iii, 1873 (K); Bastian (*a*, 18); Ranney (*a*, 18).] Cf. *Visual c., olfactory c.,* etc.—**Sensory cortical c.** Ger., *sensorisches Rindencentrum.* A supposed area in the cerebral cortex which is concerned in sensory perception. [Landois (K; *a*, 17).]—**Smell c.** See *Olfactory c.*—**Sneezing c.** Ger., *Niesencentrum.* A reflex nerve-c. in the medulla oblongata the afferent fibres of which are the nasal branches of the trifacial. The efferent impulses are transmitted along the nerves supplying the expiratory muscles. [Landois (K).] Cf. *Respiratory c.*—**Spasm c.** See *Convulsion c.*—**Speech-co-ordinating c.** Fr., *c. de co-ordination pour la parole.* Ger., *Sprachcoordinationscentrum.* A region in the brain in which several allied but distinct faculties are located, such as auditory word-perception, word-memory, and word-formation (or phonation). It includes the third left frontal convolution (Broca's c.), the anterior convolutions of the insula and the cortical area between them, the supramarginal convolution, the first temporal convolution and the angular gyrus. [Ranney (*a*, 18); M. A. Starr, "N. Y. Med. Jour.," Sept. 29, 1888, p. 358 (*a*, 17).]—**Sucking c.** Ger., *Centrum der Saugbewegungen.* A reflex c. which regulates the movements of sucking. [K, 16.]—**Sudoral c's.** Fr., *c's sudoraux.* Ger., *Schweisscentren.* Spinal c's regulating the secretion of sweat. [L, 88.]—**Supreme c.** Of Spitzka, the cortical c's of the brain as a whole. ["Med. Record," Oct. 14, 1884, p. 393 (K).]—**Swallowing c.** See *Deglutition c.*—**Sweat c's.** See *Sudoral c's.*—**Tactile c.** Fr., *c. tactile.* Ger., *Touchircentrum, Fühlsphäre* [Munk]. A cortical c. for the sense of touch, located by Ferrier in the hippocampus major and the hippocampal convolution. Munk places the c's for touch, pressure, and temperature above the Sylvian fissure and in front of the angular gyrus, and subdivides this area into c's for different parts of the body, which often coincide with and overlap the corresponding motor c's. [Landois (K); A, 319 (*a*, 18).] Cf. *Sensory cortical c.*—**Taste c.** Fr., *c. du goût.* A c. for gustatory sensations, located by Ferrier in the gyrus uncinatus. Munk asserts that it can not be definitely located, but supposes that an area in the base of the brain anterior to the fossa Sylvii is in some way connected with the representation of those sensations. [*a*, 18.]—**Temperature-regulating c's.** See *Thermotaxic c's.*—**Thermal cortical c.** An area discovered by Landois in the cortex of the dog's brain, near the extremity of the sulcus cruciatus, stimulation of which produces a change in the temperature of the opposite limbs. If it is completely destroyed, the temperature rises several degrees. [Landois (K).]—**Thermo-excito c., Thermogenic c.** Fr., *c. thermogène* (1st def.), *c. thermogène cérébral* (2d def.). Ger., *thermogenisches Centrum.* 1. A supposed c. in the spinal cord which presides over the bodily temperature. [K.] 2. The median portion of the corpus striatum and the subjacent parts down to the base of the brain. Lesions of these parts increase the production of bodily heat. [Girard, "Semaine méd.," Aug. 18, 1886, p. 334 (*a*, 18).]—**Thermo-polypnœic c.** A nerve-c. situated in the gray matter about the third ventricle at its anterior part. Sensory impulses brought to it are said to be conveyed to the polypnœic c., which in turn excites the respiratory c. to throw off heat. [I. Ott, "N. Y. Med. Jour.," March 2, 1889, p. 247.]—**Thermotaxic c's.** Six cerebral c's for maintaining the balance between the production and the dissipation of heat. Of the four basal thermotaxic c's, one is situated in the caudate nucleus, one in the gray matter beneath it, one in the gray matter about the most anterior part of the third ventricle (see *Thermo-polypnœic c.*), and one at the anterior inner end of the optic thalamus. [I. Ott, *l. c.*]—**Trophic c.** Fr., *c. trophique.* Ger., *trophisches Centrum.* A nervous c. presiding over nutrition. Such a c. is said to be situated in the gray matter of the brain, the spinal cord, and the sympathetic ganglia giving origin to nerves. [Duval (*a*, 18).]—**Vaso-constrictor c's.** Fr., *c's vaso-constricteurs.* C's in the spinal cord excitation of which causes constriction of the smaller blood-vessels. The principal vaso-constrictor c. is situated in the medulla oblongata and the pons Varolii, from just below the corpora quadrigemina to 3 or 4 mm. above the point of the calamus scriptorius. The spinal vaso-constrictor c's, of secondary importance, are represented by the tractus intermedio-lateralis. [*a*, 18; L, 88.]—**Vaso-dilator c's.** Fr., *c's vaso-dilateurs.* C's in the spinal cord excitation of which causes dilatation of the smaller blood-vessels. [L, 88.]—**Vascular c's, Vaso-motor c's.** Lat., *centra vasomotoria.* Fr., *c's vaso-moteurs.* Ger., *vasomotorische Centren.* Reflex c's in the medulla oblongata and the spinal cord which regulate the calibre of the smaller arteries throughout the body. [Ludwig (K).]—**Vesico-spinal c.** See *Micturition c.*—**Visual c.** Fr., *c. visuel.* Ger., *Sehcentrum, Sehsphäre* [Munk]. An area in the cerebral cortex for visual perceptions. It occupies the posterior third of the supramarginal convolution, the gyrus angularis, and the occipital lobes. [Ferrier (*a*, 18); Munk (*a*, 18).]—**Vital c.** See *Respiratory c.*—**Vomiting c.** Fr., *c. de vomissement.* Ger., *Erbrechenscentrum.* A region in the medulla oblongata which presides over the reflex act of vomiting. Its action is excited by irritation of the terminal filaments of the vagi, as well as by certain psychical impulses. [K, 3.] —**Winking c.** The reflex c. for winking, in the medulla oblongata. [*a*, 18.]

CENTRIC, adj. Se²nt'ri²k. Lat., *centricus.* Ger., *centrisch.* It., *centrico.* Sp., *céntrico.* Central; especially pertaining to the central nervous system.

CENTRIFLORÆ (Lat.), n. f. pl. Se^{2}nt(ke^{2}nt)-ri^2-flor′e(a^3-e^2). From *centrum*, a centre, and *flos*, a flower. Of Fries, a class of the *Calyciflorœ*, comprising the *Ericineœ*, *Empelreœ*, *Euphorbiaceœ*, *Tamariscineœ*, *Portulacaceœ*, *Paronychiaceœ*, and *Polygoneœ*. [B, 170.]

CENTRIFUGAL, adj. Se^{2}nt-ri^{2}f′u^{2}g-a^{2}l. Lat., *centrifugus* (from *centrum*, a centre, and *fugere*, to flee). Fr., *centrifuge*. Ger., *c.* It., *centrifugo*. Sp., *centrifugo*. Tending outward from the centre, efferent; in botany, said of the radicle when it is directed toward the fruit-wall; said also of the inflorescence when the central or apical flower of a branch is developed before the flowers upon the lateral offshoots given off below, and the latter are developed in succession from above downward, or from within outward. [B.] Cf. *C.* FORCE and *C.* INFLORESCENCE.

CENTRIFUGIRT (Ger.), adj. Tse^{2}nt-ri^2-fug-ert′. Freed from admixed substances by the action of centrifugal force. [B.]

CENTRIFUGUS (Lat.), adj. Se^{2}nt(ke^{2}nt)-ri^{2}f′u^{2}g(u^{4}g)-u^{3}s(u^{4}s). See CENTRIFUGAL.

CENTRINIDÆ (Lat.), n. f. pl. Se^{2}n(ke^{2}n)-tri^{2}n′i^{2}d-e(a^3-e^2). A family of the *Acanthopterygii*. ["Proc. of the Zool. Soc.," 1843, p. 93 (L).]

CENTRION (Lat.), n. n. Se^{2}nt(ke^{2}nt)′ri^2-o^{2}n. See CENTRIUM.

CENTRIPETAL, adj. Se^{2}nt-ri^{2}p′e^{2}t-a^{2}l. Lat., *centripetalis*, *centripetus* (from *centrum*, a centre, and *petere*, to seek). Fr., *centripète*. Ger., *c.* It., *centripeto*. Sp., *centripeto*. Tending toward the centre, afferent; in botany, said of a radicle which is directed toward the centre of the fruit; said also of an inflorescence in which the flowers develop successively from without inward, so that the lateral or basal flowers are developed before the central and terminal ones. [B.] Cf. *C.* FORCE and *C.* INFLORESCENCE.

CENTRIRUNG (Ger.), n. Tse^{2}nt-rer′un^{2}g. See CENTRAGE.

CENTRISCH (Ger.), adj. Tse^{2}nt′ri^{2}sh. See CENTRAL and CENTRIC.

CENTRISCHINI (Lat.), **CENTRISCIDÆ** (Lat.), n. m. pl. and f. pl. Se^{2}nt(ke^{2}nt)-ri^{2}s-ki(ch^{2}e)′ni(ne), -ri^{2}s′si^{2}d(ki^{2}d)-e(a^3-e^2). A family of the *Tetragonurina*. [L, 280.]

CENTRISPORÆ (Lat.), n. f. pl. Se^{2}nt(ke^{2}nt)-ri^{2}s′por(po^{2}r)-e(a^3-e^2). From κέντρον, a centre, and σπορά, a seed. Fr., *centrisporées*. Of Agardh, a class of the *Phanerocotyledoneœ completœ hypogynœ polypetalœ*, comprising the orders *Caryophylleœ*, *Lineœ*, *Oxalideœ*, *Hypericineœ*, and *Vochisieœ*. [B, 170.]

CENTRIUM (Lat.), n. n. Se^{2}nt(ke^{2}nt)′ri^2-u^{3}m(u^{4}m). Gr., κέντριον (from κεντεῖν, to pick). An old name for a certain plaster used for a pricking pain. [Galen (A, 325).]

CENTRO-ACINAR, adj. Se^{2}nt-ro-a^{2}s′i^{2}n-a^{3}r. Ger., *centroacinär*. Pertaining to or occupying the centre of an acinus or alveolus. [J; L, 31, 142.] See *C.-a.* CELLS.

CENTROBARIQUE (Fr.), adj. Sa^{3}n^{2}t-ro-ba^{3}r-ek. From κέντρον, a centre, and βάρος, weight. Depending upon the centre of gravity. [L, 42.]

CENTROCATARACTA (Lat.), n. f. Se^{2}nt(ke^{2}nt)-ro(ro^2)-ka^{2}t-(ka^{3}t)-a^{2}r(a^{3}r)-a^{2}k(a^{3}k)′ta^3. See *Central* CATARACT.

CENTRODONTOUS, adj. Se^{2}nt-ro-do^{2}nt′u^{3}s. Lat., *centrodontus* (from κέντρον, a sharp point, and ὀδούς, a tooth). Fr., *centrodonte*. Having sharp-pointed teeth. [A, 385.]

CENTRODORSAL, adj. Se^{2}nt-ro-do^{2}rs′a^{2}l. For deriv., see CENTRAL and DORSAL. Relating to the central dorsal region. [L, 201.]

CENTROGANGLIITIS (Lat.), n. f. Se^{2}nt(ke^{2}nt)-ro(ro^2)-ga^{2}n^2-(ga^{3}n^2)-gli^2-i(e)′ti^{2}s. Gen., *centrogangliit′idis*. For deriv., see CENTRE and GANGLION. See MYELOGANGLIITIS.

CENTROGASTRE (Fr.), adj. Sa^{3}n^{2}t-ro-ga^{2}str. From κέντρον, a sharp point, and γαστήρ, the belly. Having abdominal spines. [A, 385; L, 42.]

CENTROGONIDA (Lat.), n. n. pl. Se^{2}nt(ke^{2}nt)-ro(ro^2)-go^{2}n′-i^{2}d-a^3. See RHIZOCEPHALA.

CENTROLECITHAL, adj. Se^{2}nt-ro-le^{2}s′i^{2}th-a^{2}l. From κέντρον, a centre, and λέκιθος, the yolk of an egg. Fr., *centrolécithe*. Having the yolk situated at the centre (said of ova). [L, 201.]

CENTROLEPIDACEÆ [Hieronymus] (Lat.), n. f. pl. Se^{2}nt-(ke^{2}nt)-ro(ro^2)-le^{2}p-i^{2}d-a(a^3)′se^2(ke^2)-e(a^3-e^2). Fr., *centrolépidacées*. Ger., *Centrolepidaceen*. See CENTROLEPIDEÆ.

CENTROLEPIDACEOUS, adj. Se^{2}nt-ro-le^{2}p-i^{2}d-a′shu^{3}s. Lat., *centrolepidaceus*. Fr., *centrolépidacé*. Resembling the genus *Centrolepis*; of or pertaining to the *Centrolepidaceœ*. [B.]

CENTROLEPIDEÆ (Lat.), n. f. pl. Se^{2}nt(ke^{2}nt)-ro(ro^2)-le^{2}p-i^{2}d′e^2-e(a^3-e^2). Fr., *centrolépidées*. Ger., *Centrolepideen*. Syn.: *Centrolepidaceœ*, *Desvauxieœ*, *Desvauxiaceœ*. Of Desvaux and succeeding authors, the bristle-worts, an order of monocotyledonous plants allied to the *Restiaceœ* and *Cyperaceœ*. It comprises *Centrolepis*, *Desvauxia*, etc., distinguished by their linear or filiform leaves and their scapiform or leafy peduncles bearing a single head or spikelet of flowers which are involucrate with bracts (glumes), destitute of perianth, and either hermaphrodite or polygamous, the male flowers consisting of 1 stamen (rarely 2 stamens) with versatile unilocular anthers, the female flowers of a single ovary with one or more loculi in a single or double row, with a solitary pendulous ovale in each loculus and crowned by as many styles as there are loculi. The fruit, in shape resembling the ovary, contains a solitary, pendulous, albuminous seed in each loculus, and is longitudinally dehiscent. [B, 42, 170; Hieronymus (B, 245).]

CENTROLOBIUM (Lat.), n. n. Se^{2}nt(ke^{2}nt)-ro(ro^2)-lob(lo^{2}b)′-l^2-u^{3}m(u^{4}m). From κέντρον, a sharp point, and λοβός, a lobe, from the spurred and prickly fruit. Fr., *centrolobe*. Of Bentham and Martius, a genus of South American leguminous trees of the tribe *Dalbergieœ*. [B, 42.]—**C. robustum, C. tomentosum.** Two Brazilian species to which the name *araroba* is sometimes given. [Martius (B, 81).]

CENTROLOPHE (Fr.), adj. Sa^{3}n^{2}t-ro-lof. From κέντρον, a sharp point, and λόφος, the top of the head. Having spines on the head. [A, 385.]

CENTROMYRSINE (Lat.), n. f. Se^{2}nt(ke^{2}nt)-ro(ro^2)-mu^{6}r-(mu^{6}r)′si^{2}n-e(a). Gen., *centromyr′sines*. From κέντρον, a sharp point, and μυρσίνη, the myrtle. The *Ruscus aculeatus*. [Theophrastus (B, 121).]

CENTRONIA [Pallas] (Lat.), n. n. pl. Se^{2}nt(ke^{2}nt)-ron(ro^{2}n)′-i^2-a^3. See ECHINODERMATA.

CENTRONIÆ (Lat.), n. f. pl. Se^{2}nt(ke^{2}nt)-ron(ro^{2}n)′i^2-e(a^3-e^2). Of Gray, see ACTINOZOA; of Hill, see ECHINIDA.

CENTRON (Lat.), n. n. Se^{2}nt(ke^{2}nt)′ro^{2}n. See CENTRUM.

CENTRONOTUS (Lat.), adj. Se^{2}nt(ke^{2}nt)-ro^{2}n-ot′u^{3}s(u^{4}s). From κέντρον, a sharp point, and νῶτος, the back. Fr., *centronote*. Having spines on the back. [A, 385.]

CENTROPHYGADOPSORIASIS (Lat.), n. f. Se^{2}nt(ke^{2}nt)-ro(ro^2)-fi^{2}g(fu^{6}g)″a^{2}d(a^{3}d)-o(o^{2}p)-so-ri^2-as(a^{3}s)′i^{2}s. Gen., *centrophygadopsorias′eos* (*-is*). From κέντρον, a centre, φύγειν, to flee, and ψωρίασις (see PSORIASIS). See PSORIASIS *centrifuga*.

CENTROPHYGAS (Lat.), adj. Se^{2}nt(ke^{2}nt)-ro^{2}f′i^{2}g(u^{6}g)-a^{2}s-(a^{3}s). From κέντρον, a centre, and φύγειν, to flee. See CENTRIFUGAL.

CENTROPODINÆ (Lat.), n. f. pl. Se^{2}nt(ke^{2}nt)-ro(ro^2)-po^{2}d-i-(e)′ne(na^3-e^2). A subfamily of the *Cuculidœ*. ["Proc. of the Zool. Soc.," 1886, pp. 196, *et seq.* (L).]

CENTROPODUS (Lat.), adj. Se^{2}nt(ke^{2}nt)-ro^{2}p′od(o^{2}d)-u^{3}s(u^{4}s). From κέντρον, a centre, and πούς, a foot. Fr., *centropode*. Having spines on the feet. [A, 322, 385.]

CENTROPOMUS (Lat.), adj. Se^{2}nt(ke^{2}nt)-ro(ro^2)-pom′u^{3}s(u^{4}s). From κέντρον, a centre, and πῶμα (see OPERCULUM). Fr., *centropome*. Having a spiny operculum. [A, 322, 385.]

CENTROPUS (Lat.), adj. Se^{2}nt(ke^{2}nt)′ro(ro^2)-pu^{3}s(pus). See CENTROPODUS.

CENTROSPERMÆ (Lat.), n. f. pl. Se^{2}nt(ke^{2}nt)-ro(ro^2)-spu^{6}rm-(spe^{2}rm)-e(a^3-e^2). From κέντρον, a centre, and σπέρμα, a seed. Fr., *centrospermées*. Ger., *Mittensamige*. Of Eichler, a series of choripetalous dicotyledons, comprising those with a basal ovule or with a central seed-carrier and a generally curved embryo lying at the outer side of the albumen. It comprises the orders (cohorts) *Oleraceœ* (including the families *Polygonaceœ*, *Chenopodiaceœ*, *Amarantaceœ*, *Nyctaginaceœ*, and *Phytolaccaceœ*) and *Caryophyllinœ* (including the families *Sileneœ*, *Alsineœ*, *Paronychieœ*, *Sclerantheœ*, and *Portulacaceœ*). [B, 36.] Cf. CARYOPHYLLINEÆ.

CENTROSTEOSCLEROSIS (Lat.), n. f. Se^{2}nt(ke^{2}nt)-ro^{2}st″-e^2-o(o^2)-skle^{2}r(sklar)-os′i^{2}s. Gen., *centrosteoscleros′eos* (*-is*). From κέντρον, a centre, ὀστέον, a bone, and σκληροῦν, to harden. See OSTEOSCLEROSIS *centralis*.

CENTROSYPHILOLEPIS (Lat.), n. f. Se^{2}nt(ke^{2}nt)″ro(ro^2)-si^{2}f(su^{6}f)-i^{2}l-o^{2}l′e^{2}p-i^{2}s. Gen., *centrosyphilolep′idos* (*-is*). From κέντρον, a centre, *syphilis* (*q. v.*), and λεπίς, a scale. See SYPHILOLEPIS *exulcerans centralis*.

CENTROTHALAMÆ (Lat.), n. f. pl. Se^{2}nt(ke^{2}nt)-ro(ro^2)-tha^{2}l(tha^{3}l)′a^{2}m(a^{3}m)-e(a^3-e^2). Of Trevisan, a suborder of *Algœ* (*Florideœ*), comprising the tribes *Wrangelieœ*, *Naccarieœ*, *Dudresnayeœ*, *Halymenieœ*, *Furcellarieœ*, *Gigartineœ*, *Sphœrococceœ*, *Rhodomeleœ*, *Corallineœ*, and *Lithophylleœ*. [B, 170.]

CENTROTRIÆNE (Lat.), adj. Se^{2}nt(ke^{2}nt)-ro(ro^2)-tri(tri^2)-en′(a^3′e^{2}n)-e(a). From κέντρον, a centre, and τρίαινα (see TRIÆNE). Having a triæne springing from near the centre (said of sponge spicules). [L, 121.]

CENTROTUS (Lat.), adj. Se^{2}nt(ke^{2}nt)-rot′u^{3}s(u^{4}s). Ger., *stachelborstig*. Covered with stiff bristles not so hard as prickles. [B, 123.]

CENTROTYLOTE, adj. Se^{2}nt-ro^{2}t′i^{2}l-ot. From κέντρον, a centre, and τυλωτός, callous. Having a knob-like protuberance near the centre (said of sponge spicules). [L, 121.]

CENTRUM (Lat.), n. n. Se^{2}nt(ke^{2}nt)′ru^{3}m(ru^{4}m). Gr., κέντρον. Fr., *centre* (1st def.). Ger., *C.* (1st def.), *Mittelpunkt* (1st def.), *Stachel* (2d def.). 1. A centre; in anatomy, the middle point of a part, the body of a vertebra. [B, 121; L, 116.] 2. A pointed projection, a spine. [A, 322.]—**Athmungsc′** (Ger.). See *Respiratory* CENTRE.—**Bewegungsc′** (Ger.). See *Motor* CENTRE.—**C. anospinale.** See *Ano-spinal* CENTRE.—**C. ano-vesicale.** See *Ano-vesical* CENTRE.—**C. auditivum.** See *Auditory* CENTRE.—**C. cerebro-spinale.** See *Cerebro-spinal* CENTRE.—**C. cilio-spinale.** See *Cilio-spinal* CENTRE.—**C. cinereum (medullæ spinalis).** The gray commissure of the spinal cord. [I, 6; K.]—**C. commune.** The solar plexus. [L, 107.]—**C. der Brechbewegung** (Ger.). See *Vomiting* CENTRE.—**C. der Kaubewegungen** (Ger.). See *Mastication* CENTRE.—**C. der Saugbewegungen** (Ger.). See *Visual* CENTRE.—**Setschenow'sches Hemmungs-C.** (Ger.). An inhibitory centre in the optic lobes of the frog described by Setschenow. Removal of these parts causes an increase in the general reflex irritability. [K, 16.]—**Sinus centri.** A sinus which follows the longitudinal axis of the bodies of the vertebræ. [L, 14.]—**Speichelc'** (Ger.). See *Salivation* CENTRE.—**Sprachc'** (Ger.). See *Speech-co-ordinating* CENTRE.—**Vomirc'** (Ger.). See *Vomiting* CENTRE.

CENTRURIDES (Lat.), n. m. pl. Se^{2}nt(ke^{2}nt)-ru'ri^{2}d-ez(e^{2}s). Fr., *c., centrures.* A family of the *Scorpionides.* [L, 121.]

CENTULUM (Lat.), n. n. Se^{2}nt(ke^{2}nt)'u^{2}l(u^{4}l)-u^{3}m(u^{4}m). An old name for *Athanasia maritima.* [B, 88, 121.]

CENTUM (Lat.), n. n., indecl. Se^{2}nt(ke^{2}nt)'u^{3}m(u^{4}m). A hundred.—**C. capita.** The *Eryngium campestre.* [B, 88, 121.]

CENTUMGRANA (Lat.), n. n. pl. Se^{2}nt(ke^{2}nt)-u^{3}m(u^{4}m)-gran(gra^{3}n)'a^3. The *Polycarpon tetraphyllum.* [B, 121.]

CENTUMMORBIA (Lat.), n. f. Se^{2}nt(ke^{2}nt)-u^{3}m(u^{4}m)-mo^{2}rb'-i^2-a^3. The *Lysimachia nummularia.* [B, 121, 180.]

CENTUMNODIA (Lat.), n. f. Se^{2}nt(ke^{2}nt)-u^{3}m(u^{4}m)-nod'i^2-a^3. The *Polygonum aviculare.* [B, 121.]

CENTUNCULUS (Lat.), n. m. Se^{2}nt(ke^{2}nt)-u^{3}n^2(u^{4}n^2)'ku^{2}l-(ku^{4}l)-u^{3}s(u^{4}s). Fr., *centuncule, centinille.* A genus of primulaceous plants, closely related to *Anagallis.* [B, 19.]—**C. arvensis** [Scopoli]. The *Cerastium arvense.* [B, 173.]

CENTURIONINA (Lat.), n. n. pl. Se^{2}nt(ke^{2}nt)-u^2(u^4)-ri^2-o^{2}n-i-(e)'na^3. A tribe of the *Phyllostomidæ.* ["Proc. of the Zool. Soc.," 1866, p. 118 (L).]

CENTURY-PLANT, n. Se^{2}nt'u^2-ri^2-pla^{3}nt. See AGAVE *americana.* [B, 275 ; L, 65.]

CENURUS (Lat.), n. m. Se^{2}n(kan)-u^2(u)'ru^{3}s(ru^{4}s). See CŒNURUS.

CEP (Fr.), n. Sa. See CÈPE and CÉPAGE.—**C. blanc.** The *Boletus edulis.* [B, 121.]—**C. noir.** The *Boletus œreus.* [B, 121.]—**Faux c.** The *Boletus luridus.* [B, 121.]

CEPA (Lat.), n. f. Se(ka)'pa^3. Also written *cœpa, cepe,* and *cœpe.* The onion ; of Mönch and Bernhardi, a genus of plants now referred to *Allium.* [B.]—**Bulbus cepæ.** The bulb of *Allium c.* [B, 180.]—**Bulbus cepæ oblongæ.** The bulb of *Allium fistulosum.* [B, 180.]—**C. alba et rubra.** The *Allium c.* [B, 200.]—**C. angulosa** [Bernhardi]. The *Allium angulosum.* [B, 173.]—**C. ascalonica** [Pliny], **C. ascalonitides** [Parkinson], **C. fissilis** [J. Bauhin]. The *Allium ascalonicum.* [B, 200.]—**C. longa.** The *Allium c.* [B, 200.]—**C. marina.** The bulb of *Scilla maritima.* [B, 180.]—**C. moly** [Mönch]. The *Allium moly* of Linnæus. [B, 173.]—**C. obliqua** [Mönch]. The *Allium obliquum.* [B, 173.]—**C. oblonga.** The *Allium fistulosum.* [B, 180.]—**C. porci.** Squill. [B, 50.]—**C. rotunda et longa** [J. Bauhin], **C. rubra et alba** [J. Bauhin]. The *Allium c.* [B, 200.]—**C. schœnoprasa** [Mönch], **C. sectilis** [Rupp], **C. sectilis juncifolia perennis** [Tournefort]. The *Allium schœnoprasum.* [B, 200.]—**C. sterilis** [Bauhin]. The *Allium ascalonicum.* [B, 200.]—**C. ursina** [Bernhardi]. The *Allium ursinum.* [B, 173.]—**C. ventricosa** [Bernhardi]. The *Allium altaicum.* [B, 173.]—**C. victorialis.** The *Allium victoriale.* [B ; L.]—**C. vulgaris** [Bernhardi], **C. vulgaris floribus et tunicis candidis et purpurascentibus.** The *Allium c.* [B, 173, 200.]—**Linimentum cepæ.** See UNGUENTUM *suppurans.*

CEPA-CABALLO (Sp.), n. Tha-pa^3-ka^3-ba^{3}l'yo. The *Carduus carduncellus.* [B, 121.]

CEPACEOUS, adj. Se-pa'shu^{3}s. Lat., *cepaceus.* Fr., *cépacé.* Having an onion-like odor. [L, 180.]

CEPÆ (Lat.), n. f. pl. Se(ka)'pe(pa^3-e^2). Of Adanson, a section of the *Liliaceæ,* comprising the genera *Asphodelus, Ornithogalum, Helonias, Cepa, Allium,* and *Porrum.* [B, 170.]

CEPÆA (Lat.), n. f. Se(ka)-pe'(pa^3'e^2)-a^3. Gr., κηπαῖα [Dioscorides]. 1. A plant, probably the *Sedum c.* [B, 180.] 2. A subdivision of the genus *Acarus.* [L, 41.]

CÉPAGE (Fr.), n. Sa-pa^{2}zh. A species or variety of the grape-vine, especially of the grape-vine as cultivated for use ; collectively, a vintage. [B, 121.]

CEPASTRUM (Lat.), n. n. Se(ka)-pa^{2}s(pa^{3}s)'tru^{3}m(tru^{4}m). A variety of garlic, also the *Allium ascalonicum* and *Allium schœnoprasum.* [Dale (B, 200).]

CEPE (Lat.), n. f. Se(ka)'pe(pa). See CEPA.

CÈPE (Fr.), n. Se^{2}p. A name applied to several edible species of *Boletus.* [B, 121.]—**C. cordon-rouge.** The *Boletus pachypus.* [B, 105.]—**C. creux.** The *Boletus castaneus.* [B, 105.]—**C. de Bordeaux, C. de Fontainebleau.** Varieties of the *Boletus edulis* (*q. v.*). [B, 105.]—**C. de Juillet.** The *Boletus versipellis.* [B, 105.]—**C. écaillé-longue-tige.** The *Boletus radicans.* [B, 105.]—**C. franc.** The *Boletus œreus* and the *Boletus edulis.* [B, 105, 173.]—**C. franc à tête noire.** A variety of *Boletus edulis* with a black pileus. [B, 105.]—**C. noir.** The *Boletus œreus.* [B, 173.]—**C. obson.** The *Boletus obsonium.* [B, 105.]—**C. ordinaire.** The *Boletus edulis.* [A, 385.]—**C. peaucier à verrues.** The *Boletus pellitus.* [B, 105.]—**C. perroquet.** The *Boletus psittacinus.* [B, 105.]—**C's pinaux.** Of Paulet, a family of *Fungi.* [B, 121.]—**C. royal.** The *Boletus œstivalis.* [B, 105.]—**C. soufré.** The *Hyphomyces chrysospermus.* [B, 121.]

CÉPÉE (Fr.), n. Sa-pa. See CEPÆA.

CEPERNKRAUT (Ger.), n. Tsap'e^{2}rn-kra^3-u^{4}t. The *Sedum cepœa.* [B, 180.]

CEPHADELIA (Lat.), n. n. pl. Se^{2}f(ke^{2}f)-a^{2}d(a^{3}d)-el(al)'i^2-a^3. See CEPHALOPODA.

CÉPHAÉLIDE (Fr.), n. Sa-fa^3-al-ed. See CEPHAELIS.

CEPHAELIDEÆ (Lat.), n. f. pl. Se^{2}f(ke^{2}f)-a^3-e^{2}l(al)-i^{2}d'e^2-e(a^3-e^2). Of Reichenbach, De Candolle, and others, a section of rubiaceous plants, comprising *Cephaelis,* etc. [B, 170.]

CÉPHAÉLIE (Fr.), n. Sa-fa^3-al-e. See CEPHAELIS.

CEPHAELINE, n. Se^{2}f-a^3-el'en. See EMETINE.

CEPHAELIS (Lat.), n. f. Se^{2}f(ke^{2}f)-a^3-el(al)'i^{2}s. Fr., *céphaélide, céphélide.* Ger., *Kopfbeere.* Of Swartz, a genus of rubiaceous shrubs, undershrubs, and herbs, of the tribe *Pyschotrieæ,* comprising about seventy species distributed over the whole world. [B, 42.]—**C. asthmatica** [Vahl]. A West Indian species, used as a remedy in respiratory disorders. [B, 121.]—**C. Aubletii** [De Candolle]. See *C. involucrata.*—**C. Bearii.** A Mexican species, used medicinally. [B, 121.]—**C. cyanocarpa.** A Mexican species mentioned along with the *C. ipecacuanha.* [B, 224.]—**C. diversifolia** [Willdenow]. The *Geophila diversifolia.* [B, 180.]—**C. elata** [Swartz]. A West Indian species. employed medicinally. [B, 121.]—**C. emetica** [Persoon]. The *Ronabea* (*Psychotria*) *emetica,* also the *C. ipecacuanha.* [B, 180.]—**C. involucrata** [Willdenow]. An undershrub of Guiana, employed in asthma. [B, 121, 180.]—**C. ipecacuanha** [Richard]. Fr., *ipécacuanha.* Ger., *brechenerregende Kopfbeere, echte Brechwurzel.* It., Sp., *ipecacuana.* Syn.: *Calicocca*

THE CEPHAELIS IPECACUANHA. [A, 327.]

evea [Brotero] (et *ipecacuanha* [Brotero]). An undershrub or herb indigenous to Brazil and frequently cultivated there. The root is ipecacuanha (*q. v.*). [B, 121, 173, 180.]—**C. muscosa** [Swartz]. A small tree of Cuba and Martinique. The root is used as an emetic. [B, 180.]—**C. punicea** [Vahl]. A shrub of Jamaica, used as an emetic. [B, 180.]—**C. reniformis** [Humboldt. Bonpland, and Kunth]. The *Geophila reniformis.* [B, 180.]—**C. ruelliæfolia** [Chamisso and Schlechtendahl]. A South American species. The seeds are employed as a rat-poison in Brazil. [B, 121.]

CEPHALACÆNUS (Lat.), adj. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-a^{2}s(a^{3}k)-en'-(a^3'e^{2}n)-u^{3}s(u^{2}s). From κεφαλή, and ἄκαινα, a thorn. Fr., *céphalacène.* Ger., *Kopfdornig.* Having a prickly head ; as a n., in the n. pl., *Cephalacœna,* a family of the *Percoides.* [L, 180.]

CÉPHALACANTHE (Fr.), **CEPHALACÈNE** (Fr.), adj's. Sa-fa^{3}l-a^3-ka^{2}nt, -se^{2}n. See CEPHALACÆNUS.

CEPHALAD, adv. Se^{2}f'a^{2}l-a^{2}d. From κεφαλή, the head. Toward the head. [L, 343.]

CEPHALÆA (Lat.), n. f. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-e′(a^3′e^2)-a^3. Gr., κεφαλαία (from κεφαλή, the head). Fr., *céphalée.* Chronic, severe, deep-seated headache. [A, 322, 326; L, 41, 94, 132.]—**C. ab acrimonia.** A headache due to acrimony of the humors. [L, 132.]—**C. arthritica** [Musgrave]. Syn.: *podagra capitis.* A variety of headache alternating with gouty pains in the feet. [L, 132.]—**C. febricosa.** Hemicrania attributed to latent intermittent fever. [L, 132.]—**C. gravans.** Dull pain with a sense of heaviness over the whole head, sometimes intermittent. [L, 83.]—**C. juvenum.** Headache attending puberty. [L, 119.]—**C. melancholica** [Conte]. Chronic headache in hypochondriacs. [L, 88, 132.]—**C. polonica.** Headache due to plica polonica. [L, 132.]—**C. serosa.** Headache due to serous effusion within the skull. [L, 132.]—**C. spasmodica.** Sick headache. [L, 83.]—**C. syphilitica.** Fr., *céphalée vérolique.* Headache due to syphilis. [L, 132.]

CEPHALÆMATOCELE (Lat.), n. f. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-e^{2}m-(a^3-e^{2}m)-a^{2}t(a^{3}t)-o(o^2)-sel(kal)′e(a); as an Eng. word, se^{2}f-a^{2}l-e^{2}m-a^{2}t′o-sel. From κεφαλή, the head, αἷμα, blood, and κήλη, a tumor. Fr., *céphalématocèle.* A collection of extravasated venous blood beneath the scalp, communicating with a sinus of the dura mater through an opening in the skull. [A, 326.]

CEPHALÆMATOMA (Lat.), n. n. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-e^{2}m(a^3-e^{2}m)-a^{2}t(a^{3}t)-om′a^3. Gen., *cephalæmatom′atos (-is).* From κεφαλή, the head, and αἷμα. blood (see also *-oma**). Fr., *céphalématome.* Ger., *Cephalohämatom, Kopfblutgeschwulst.* It., *cefaloematoma.* Sp., *cefalematoma.* 1. Properly, a swelling due to a collection of blood between one or more of the bones of the skull and the pericranium. 2. See Caput *succedaneum.*—**C. duræ matris.** See *Internal c.*—**C. neonatorum.** See Caput *succedaneum.*—**C. spurium, C. subaponeuroticum.** A gelatinous exudation beneath the occipito-frontal aponeurosis. [A, 326.]—**C. subpericranicum, C. verum.** See *C.* (1st def.).—**Internal c.** Lat., *c. duræ matris.* Fr., *céphalématome interne.* A c. situated between the dura mater and the bone, in the new-born. [L, 87.]

CÉPHALÆMATOME (Fr.), n. Sa-fa^{3}l-am-a^3-tom. See Cephalæmatoma and Céphalématome.

CEPHALÆMATOMETER, n. Se^{2}f-a^{2}l-e^{2}m-a^{2}t-o^{2}m′e^{2}t-u^{5}r. From κεφαλή, the head, αἷμα, blood, and μέτρον, a measure. Fr., *céphalohémomètre.* A sort of manometer to be inserted into the head in animals to ascertain if the amount of blood within the head is increased or diminished. [L, 49.]

CEPHALÆMIA (Lat.), n. f. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-em′(a^3′e^{2}m)-i^2-a^3. From κεφαλή, the head, and αἷμα, blood. Fr., *céphalémie.* Ger., *Blutüberfüllung des Kopfes.* An excess of blood in the head. [A, 322.]

CEPHALÆODA (Lat.), n. n. pl. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-e(a^3-e^2)-od′a^3. Fr., *céphalæodes* [G. Fischer]. A class of *Mollusca.* [L, 180.]

CEPHALÆUS (Lat.), adj. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-e′(a^3′e^2)-u^{3}s(u^{4}s). Gr., κεφάλαιος. Pertaining to the head. [A, 322.]

CEPHALAGOGUS (Lat.), n. m. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-a^3-gog′u^{3}s-(u^{4}s). From κεφαλή, the head, and ἄγειν, to lead. Fr., *céphalagogue.* Ger., *Kopfführer.* An obstetrical forceps. [A, 322.]

CEPHALAGRA (Lat.), n. f. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)′a^{2}g(a^{3}g)-ra^3. From κεφαλή, the head, and ἄγρα, a seizure. Fr., *céphalagre.* Ger., *Kopfgicht.* Chronic gouty or rheumatic headache. [A, 322.]

CEPHALAGRAPHIA (Lat.), n. f. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-a^{2}g(a^{3}g)-ra^{2}f(ra^{3}f)′i^2-a^3. Fr., *céphalagraphie.* See Cephalography.

CÉPHALAGRE (Fr.), n. Sa-fa^{3}l-a^{3}gr. See Cephalagra.

CEPHALAGRICUS (Lat.), adj. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-a^{2}g(a^{3}g)′-ri^{2}k-u^{3}s(u^{4}s). Pertaining to cephalagra. [A, 322.]

CÉPHALAIRE (Fr.), adj. Sa-fa^{3}l-ar. Of the size of a man's head; as a n., see Cephalaria.

CEPHALALGES (Lat.), adj. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-a^{2}l(a^{3}l)′jez(gas). Gr., κεφαλαλγής. Affected with or causing headache. [A, 322, 387.]

CEPHALALGIA (Lat.), n. f. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-a^{2}l(a^{3}l)′ji^2(gi^2)-a^3. Gr., κεφαλαλγία (from κεφαλή, the head, and ἄλγος, pain). Fr., *céphalalgie, mal de tête.* Ger., *Cephalalgie, Kopfschmerz, Kopfweh.* It., Sp., *cefalalgia.* Headache; of the ancients, a slight, limited, and transitory pain in the head, as distinguished from cephalæa, which was a violent and more or less chronic headache. [L, 88.—**C. anæmica.** Fr., *céphalalgie anémique.* Headache due to spasmodic contraction of the blood-vessels of the head. [Seeligmüller (A, 319).]—**C. anemotropa.** A headache due to changes of the wind. It occurs in certain individuals when the wind is from a certain direction and disappears with a change of wind. [L, 132.]—**C. catamenialis.** Fr., *céphalalgie menstruelle.* A headache due to suppression of the menses, or accompanying the menses. [L, 87.]—**C. catarrhalis.** The headache of acute catarrh (a common cold). [L, 119.]—**C. congestiva.** Fr., *céphalalgie congestive.* Congestive headache. [D, 63.]—**C. dyspeptica.** Dyspeptic headache. [D, 63.]—**C. epileptica** [Sieveking]. Epileptic headache; the periodical headache of nervous persons; so called on account of the relation between certain forms of headache and epilepsy. [D, 35.]—**C. febrilis.** Fr., *céphalalgie fébrile.* The headache of fevers and inflammations. [D, 132.]—**C. gravidarum.** The headache of pregnancy. [L, 87.]—**C. hæmorrhoidalis.** Fr., *céphalalgie hémorrhoïdaire.* Headache due to hæmorrhoids and constipation. [L, 132.]—**C. hyperæmica.** Congestive headache. [Seeligmüller (A, 319).]—**C. hysterica.** Fr., *céphalalgie hystérique.* Hysterical headache. [L, 132.] Cf. Clavus *hystericus.*—**C. inflammatoria.** Ger., *inflammatorischer Kopfschmerz.* See *C. febrilis.*—**C. irritabilis.** See *C. hysterica.*—**C. metallica.** A headache to which metal workers, smelters, and the like are subject. [L, 132.]—**C. muscularis** [Burder]. Fr., *céphalalgie musculaire.* A form of external headache which is limited to the muscles and aponeuroses which cover the head, especially to the occipito-frontalis and temporal muscles. [D, 63; L, 88.]—**C. nervosa.** Fr., *céphalalgie nerveuse.* Ger., *nervöser Kopfschmerz.* So-called nervous headache. [Seeligmüller (A, 319).]—**C. neuralgica.** Fr., *céphalalgie névralgique.* Neuralgic headache; pain in the head which is, in some cases, intermittent, in others, continuous in character; and is usually limited to one side of the head, or face, or both. It is often recurrent at regular intervals. [D, 63.]—**C. neurasthenica.** Ger., *neurasthenischer Kopfschmerz.* Headache with a sense of pressure; observed in cases of general neurasthenia. [Seeligmüller (A, 319).]—**C. organica.** Fixed and deep-seated pain which appears to be within the head. It resembles the plethoric form of congestive headache, and is subject to increase and decrease of severity. [D, 63.]—**C. periodica.** Fr., *cephalalgie périodique.* Periodical headache. [D, 63.] See *C. neuralgica.*—**C. periosteosa.** Headache which is confined to the pericranium. It is usually limited to one spot, is attended by swelling (especially when syphilis is the cause), and is increased by firm pressure. [D, 63.]—**C. pharyngo-tympanica.** A form of c. dependent on catarrh of the pharynx and middle ear; characterized by more or less violent paroxysms of pain, generally in the areas supplied by the auriculo-temporal and great occipital nerves. [Legal, "Dtsch. Arch. f. klin. Med.," xl, 2; "Med. Chron.," May, 1887, p. 137.]—**C. plethorica.** Fr., *céphalalgie pléthorique.* Ger., *plethorischer Kopfschmerz.* Headache accompanying or due to plethora. [L, 132.]—**C. pulsatilis.** Fr., *céphalalgie pulsatile.* Headache in which the pain, chiefly at the temples, is pulsatory; headache with a sensation of pulsation in the head. [L, 83, 132.]—**C. rheumatica.** Ger., *rheumatischer Kopfschmerz.* Rheumatic headache; usually seated in the scalp. [Seeligmüller (A, 319).]—**C. spasmodica, C. stomachicha** [Riverius]. Sick headache. [L, 83, 132.] Cf. Migraine.—**C. sympathetica.** See *C. dyspeptica.*—**C. syphilitica.** Fr., *céphalalgie syphilitique.* Ger., *syphilitischer Kopfschmerz.* See Cephalæa *syphilitica.*—**C. toxica.** Fr., *céphalalgie toxique.* Headache due to poisoning, as with alcohol, chloroform, narcotics, the fumes of charcoal, etc., or to uræmia. [Seeligmüller (A, 319).]—**C. vasomotoria** [Eulenburg]. Congestive headache due to paresis of the vaso-motor nerves. [Seeligmüller (A, 319.)]—**Neuro-ocular c.** Headache caused by continuous use of the eyes in cases of asthenopia of accommodative or muscular origin. [Parinaud, "Rec. d'ophthal.," Nov., 1887; "N. Y. Med. Jour.," Aug. 11, 1888, p. 162.]—**Ocular c.** Headache due to any ocular defect. [Parinaud, *l. c.*]

CEPHALALGIC, adj. Se^{2}f-a^{2}l-a^{2}l′ji^{2}k. Gr., κεφαλαλγικός. Lat., *cephalalgicus.* Fr., *céphalalgique.* Ger., *cephalalgisch.* Pertaining to, affected with, or disposed to, headache; as a n., a person subject to headaches. [A, 322, 385, 387.]

CÉPHALALGIE (Fr.), n. Sa-fa^{3}l-a^{2}l-zhe. See Cephalalgia.—**C. arthritique.** See Cephalagra.—**C. circonscrite.** Headache occupying a limited portion of the head. [L, 87.]—**C. diffuse.** Headache occupying the entire surface of the cranial region. [L, 87.]—**C. du rhumatisme cérébral, C. épicrânienne.** See Cephalalgia *muscularis.*—**C. menstruelle.** See Cephalalgia *catamenialis.*—**C. réflexe.** See *C. symptomatique.*—**C. sanguine.** See Cephalalgia *congestiva.*—**C. symptomatique.** Headache due to some cause outside of the head or nervous system, and occurring as an accompaniment or symptom of some constitutional affection, or due to disease of some remote organ. [L, 88.]—**C. syphilitique.** See Cephalæa *syphilitica.*

CEPHALALGY, n. Se^{2}f-a^{2}l-a^{2}l′ji^2. See Cephalalgia.

CEPHALALOGIA (Lat.), n. f. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-a^{2}l(a^{3}l)-oj-(o^{2}g)′i^2-a^3. See Cephalology.

CEPHALANDRA (Lat.), n. f. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-a^{2}n(a^{3}n)′dra^3. From κεφαλή, the head, and ἀνήρ, a man, on account of the head-like process formed by the united apices of the anthers. Fr., *céphalandre.* Of Schrader, a genus of cucurbitaceous plants, of the tribe *Cucumerineæ.* [B, 42, 121.]—**C. indica** [Naud.], **C. Schimperi** [Naud.], **C. wrightiana** [Römer]. Syn.: *beembo* [Beng.], *Bryonia grandis* [Linnæus] (seu *palmata* [Wallich]), *Coccinia indica* [Wight and Arnott], *Momordica monadelpha* [Roxburgh]. A climbing plant indigenous to the Cape of Good Hope and India. The root and leaves are employed medicinally in India in small-pox and inflammatory fevers. [B, 19, 180, 212.]

CEPHALANTHEÆ (Lat.), n. f. pl. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-a^{2}n-(a^{3}n)′the^2-e(a^3-e^2). Fr., *céphalanthées.* Of Kunth, Chamisso and Schlechtendahl, and Bartling, a section of the *Rubiaceæ* comprising *Morinda, Cephalanthus,* and *Nauclea;* by De Candolle and succeeding authors restricted to include only the genus *Cephalanthus.* [B, 170.]

CEPHALANTHIDIÆ (Lat.), n. f. pl. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-a^{2}n-(a^{3}n)-thi^{2}d′e^2-e(a^3-e^2). Of Dumortier, a family of the *Fructitubia,* consisting of the single genus *Cephalanthus.* [B, 170.]

CEPHALANTHIUM (Lat.), n. n. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-a^{2}n(a^{3}n)′-thi^2-u^{3}m(u^{4}m). From κεφαλή, the head, and ἄνθος, a flower. Fr., *céphalanthe.* Ger., *Blumenkopf.* Of Richard, the capitulum of the *Compositæ.* [B, 1.]

CEPHALANTHUS (Lat.), n. n. (treated by botanists as m.). Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-a^{2}n(a^{3}n)′thu^{3}s(thu^{4}s). Fr., *céphalanthe.* Of Linnæus, a genus of North American and Asiatic rubiaceous shrubs and small trees, of the tribe *Naucleæ.* [B, 42, 215.]—**C. chinensis** [Lamarck]. The *Nauclea orientalis.* [B, 173.]—**C. occidentalis** [Linnæus], **C. oppositifolius** [Mönch]. Fr., *bois bouton.* The button-bush, button-wood, crane-willow, swamp-dogwood; a shrub 3 to 15 feet high, growing throughout the Atlantic, Pacific, and Gulf States. Its bark is bitter, laxative, and tonic, and has been used as a remedy in intermittent fevers, paralysis, and syphilis. It contains a crystallizable acid, an amorphous, bitter principle, a substance resembling saponin, tannic acid, etc. [B, 5, 81, 173, 215.]—**C. orientalis** [Linnæus]. A species corresponding in part to the *Nauclea cadamba,* in part to the *Nauclea orientalis.* [B, 180.]

CEPHALANTIA (Lat.), n. f. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-a^{2}n(a^{3}n)′shi^2-(ti^2)-a^3. Of Rafinesque, a family of the *Rubiacea,* comprising the subfamilies *Nauclidia* and *Cephelidia.* [B, 121, 170.]

CEPHALANTIDIÆ (Lat.), n. f. pl. Se2f(ke2f)-a2l(a3l)-a2n-(a3n)-ti2d'i2-e(a3-e2). See CEPHALANTHIDIÆ.

CEPHALAPAGOTOME, n. Se2f-a2l-a2p-a2g'o-tom. From κεφαλή, the head, and ἀπάγειν, to drag away, and τέμνειν, to cut. Fr., *cephalapagotome.* An old name for a form of cephalotome. [Hullin (A, 385).]

CEPHALARIA (Lat.), n. f. Se2f(ke2f)-a2l(a3l)-a(a3)'ri2-a3. Fr., *céphalaire.* Of Schrader, a genus of dipsaceous plants. [B, 42, 121.]—**C. ambrosioides** [Römer and Schultes]. The common variety of *C. communis.* [B, 214.]—**C. appendiculata** [Schrader]. The *Dipsacus pilosus.* [B, 214.]—**C. centauroides** [Coulter]. Syn.: *Lepicephalus centauroides* [Lag.], *Scabiosa centauroides* [Lamarck] (et *transylvanica* [Allioni], et *ambrosioides* [Smith and Sibthorp], et *lævigata* [Waldstein and Kitaibel]). A perennial species growing throughout the Levant and in southern Siberia. Several varieties are described. The bitter achænia have been considered to be aperient, resolvent, and depurative, and, with the root, have been used in syphilis, cutaneous disorders, and the eruptive diseases. [B, 180, 214.]—**C. corniculata** [Römer and Schultes]. A variety of *C. centauroides.* [B, 180, 214.]—**C. cretacea** [Römer and Schultes]. A variety of *C. centauroides.* [B, 180, 214.]—**C. lævigata** [Schrader]. The common variety of the *C. centauroides.* [B, 214.]

CEPHALARTIC, adj. Se2f-a2l-a3rt'i2k. Lat., *cephalarticus.* Fr., *céphalartique.* Ger., *kopfreinigend.* Relieving headache; as a n., a remedy which purges the head. [A, 322; L, 41, 49, 109.]

CEPHALASPIDÆ (Lat.), **CEPHALASPIDES** (Lat.), n's f. pl. Se2f(ke2f)-a2l(a3l)-a2sp(a3sp)'i2d-e(a3-e2), -ez(e2s). A suborder of the *Tabuliferi.* [L, 173.]

CEPHALASPIDINI [Lankester] (Lat.), n. m. pl. Se2f(ke2f)-a2l(a3l)-a2sp(a3sp)-i2d-in(en)'i(e). An order of the *Ganoidei.* [L, 121.]

CEPHALASPIDOBÆNI (Lat.), n. m. pl. Se2f(ke2f)-a2l(a3l)-a2sp(a3sp)-i2d-o(o2)-ben'(ba3'e2n)-i(e). Fr., *céphalaspidobœnes, céphalaspidobènes.* Of Ritgen, a tribe of the *Geosauræ* having plates on the head. [L, 41, 116.]

CEPHALATA [Lamarck] (Lat.), n. n. pl. Se2f(ke2f)-a2l(a3l)-at(a3t)'a3. Fr., *céphalés.* A section of *Mollusca*, embracing those provided with a head. [L, 180.] See CEPHALOPHORA.

CEPHALATE, adj. Se2f'a2l-at. Lat., *cephalatus.* Fr., *cephalé.* Provided with a head; as a n., a mollusc provided with a head. [L, 56, 73.]

CEPHALATOMIA (Lat.), n. f. Se2f(ke2f)-a2l(a3l)-a2t(a3t)-om-(o2m)'i2-a3. See CEPHALOTOMY.

CEPHALATUS (Lat.), adj. Se2f(ke2f)-a2l(a3l)-at(a3t)'u3s(u4s). See CEPHALATA and CEPHALATE.

CEPHALE (Lat.), n. f. Se2f(ke2f)'a2l(a3l)-e(a). Gr., κεφαλή. The head. [A, 325.]

CÉPHALÉE (Fr.), n. Sa-fa3l-a. See CEPHALÆA.—**C. de croissance.** A form of cephalæa attributed to rapid growth. ["Union méd.," May 3, 1884, p. 771 (D).]

CÉPHALÉIDÉES (Fr.), n. f. pl. Sa-fa3l-a-ed-a. See CEPHAELIDEÆ.

CÉPHALÉIS (Fr.), n. Sa-fa3l-a-es. See CEPHAELIS.

CEPHALELIDES (Lat.), n. m. pl. Se2f(ke2f)-a2l(a3l)-e2l'i2d-ez(e2s). A subtribe of the *Lævipedes.* [L, 247.]

CEPHALÉMATOME (Fr.), n. Sa-fa3l-am-a3-tom. See CEPHALÆMATOMA.—**C. des femmes.** A cephalæmatoma said to form in young women in connection with delayed menstruation. [Treves (A, 63).]

CÉPHALÉODES (Fr.), n. pl. Sa-fa3l-a-od. See CEPHALÆODA.

CÉPHALÉS (Fr.), n. pl. Sa-fa3l-a. See CEPHALATA.

CEPHALETRON [Owen] (Lat.), n. n. Se2f(ke2f)-a2l(a3l)-et(at)'ro2n. From κεφαλή, the head, and ἦτρον, the belly. A proposed term for the anterior division of the body in the *Crustacea.* [L, 121].

CEPHALHÆMATOCELE (Lat.), n. f. Se2f(ke2f)-a2l(a3l)-he2m(ha3-e2m)-a2t(a3t)-o(o2)-sel(kal)'e(a); in Eng., se2f-a2l-he2m-a2t'-o-sel. See CEPHALÆMATOCELE.

CEPHALHÆMIA (Lat.), n. f. Se2f(ke2f)-a2l(a3l)-hem'(ha3'e2m)-i2-a3. See CEPHALÆMIA.

CEPHALHÆMATOMA (Lat.), n. n. Se2f(ke2f)-a2l(a3l)-he2m-(ha3-e2m)-a2t(a3t)-om'a3. See CEPHALÆMATOMA.

CEPHALHYDROCELE, n. Se2f-a2l-hid'ro-sel. From κεφαλή, the head, ὕδωρ, water, and κήλη, a tumor. An accumulation of watery fluid under the fascia covering the cranium, generally as the result of fracture of the skull. ["Brit. Med. Jour.," May 12, 1888, p. 1004; "N. Y. Med. Jour.," Aug. 25, 1888, p. 217.]

CÉPHALIADE (Fr.), n. Sa-fa3l-e-a2d. See CEPHALOPAGUS.

CEPHALIC, adj. Se2f-a2l'i2k. Gr., κεφαλικός. Lat., *cephalicus, capitalis.* Fr., *céphalique.* Ger., *cephalisch.* It., *cefalico.* Sp., *cefálico.* Pertaining to the head; as a n., a remedy for headache or other disorder of the head. [A, 325.]

CEPHALICA (Lat.), n., f. of adj. *cephalicus* (*vena* understood). Se2f(ke2f)-a2l(a3l)'i2k-a3. Fr., *céphalique.* The cephalic vein. [L, 80.]—**C. pollicis.** A branch of the cephalic vein going to the thumb. [L, 119.]

CEPHALICI (Lat.), n., m. pl. of *cephalicus* (*morbi* understood). Se2f(ke2f)-a2l(a3l)'i2-si(ke). In W. Farr's classification, brain diseases. [B.]

CEPHALICUS (Lat.), adj. Se2f(ke2f)-a2l(a3l)'i2k-u3s(u4s). See CEPHALIC.

CEPHALIDEA (Lat.), n. n. pl. Se2f(ke2f)-a2l(a3l)-i2d'e2-a3. A *stirps* of the *Invertebrata*, including the *Insecta* and *Mollusca.* [E. Lewis, "Proc. of the Zool. Soc.," 1840, p. 118 (L).]

CEPHALIDIA (Lat.), n. n. pl. Se2f(ke2f)-a2l(a3l)-i2d'i2-a3. Fr., *céphalidiens* [Latreille]. A series of animals having a small so-called head. [L, 180.]

CEPHALIDIUM (Lat.), n. n. Se2f(ke2f)-a2l(a3l)-i2d'i2-u3m-(u4m). Gr., κεφαλίδιον. A little head, a capitellum. [A, 322.]

CEPHALINA (Lat.), n. f. Se2f(ke2f)-a2l(a3l)-in(en)'a3. See SARCOCEPHALUS.

CÉPHALIN (Fr.), adj. Sa-fa3l-a2n2. Fixed by the head, provided with a head. [A, 385.]

CEPHALINDEX, n. Se2f-a2l-i2n'de2x. See *Cephalic* INDEX.

CEPHALINE, n. Se2f'a2l-en. A substance allied to lecithine, composed of glycerophosphoric acid and a base; derived from the brain. [B, 270.]

CEPHALINE (Lat.), n. f. Se2f(ke2f)-a2l(a3l)-in(en)'e(a). Gr., κεφαλίνη. Fr., *céphaline.* It., *cefalina.* An old term for that part of the tongue nearest the fauces, where the sense of taste is most developed. [Gorræus (A, 225); L, 41, 43.]

CEPHALION (Lat.), n. n. Se2f(ke2f)-a2l(a3l)'i2-o2n. Gr., κεφάλιον. Fr., *céphalion.* See CEPHALIDIUM.

CÉPHALIONITE [Piorry] (Fr.), n. Sa-fa3l-i2-on-et. Inflammation of the cerebellum. [L, 82.]

CÉPHALIONORRHÉMIE [Piorry] (Fr.), n. Sa-fa3l-i2-on-o-ra-me. Hæmorrhage into the cerebellum. [L, 82.]

CEPHALITIS (Lat.), n. f. Se2f(ke2f)-a2l(a3l)-it(et)'i2s. Gen., *cephalit'idis.* From κεφαλή, the head (see also *-itis**). Fr., *céphalite.* Ger., *Kopfentzündung.* See ENCEPHALITIS.—**C. ægyptiaca.** An epidemic variety of encephalitis observed in Egypt in early summer, during hot winds. [L, 132.]—**C. littriana.** Inflammation of the pineal gland. [L, 132.]—**C. meningica.** See MENINGITIS.—**C. nervosa.** See PERTUSSIS.—**C. seriasis.** See CAUMA.—**C. spontanea.** Syn.: *morbus solstitialis, phrenitis hectica* [Hippocrates]. A form of encephalitis in which the symptoms are severe pain in the head and spine, abolition of all sensation, and progressive palsy; spasms are frequent, and patients often tear their persons. [L, 132.]—**C. verminosa.** An epidemic observed in France in 1545, believed to be due to the presence of worms, which were ejected in large numbers from the mouth. [L, 132.]

CEPHALITY, n. Se2f-a2l'i2t-i2. From κεφαλή, the head. In zoology, a preponderance of the head over the rest of the organism. [Agassiz, "Proc. of the Boston Soc. of Nat. Hist.," viii, p. 279 (L).]

CEPHALIUM (Lat.), n. n. Se2f(ke2f)-a2l(a3l)'i2-u3m(u4m). 1. See CEPHALIDIUM. 2. The female inflorescence in the *Pandaneæ.* [B, 121.] 3. An enlargement of the summit of the axis in the *Melocactus*, covered with wooly hairs among which the flowers develop. [B, 19.]

CEPHALIZATION, n. Se2f-a2l-i2z-a'shu3n. The concentration of organs around a single nerve-centre; a term proposed by Dana for the process by which the head becomes distinguished from the rest of the body in animals. [L, 227.]

CEPHALIZED, adj. Se2f'a2l-izd. Having the process of cephalization complete. [L, 121.]

CEPHALOBRANCHIATA [Latreille] (Lat.), n. n. pl. Se2f-(ke2f)-a2l(a3l)-o(o2)-bra2n2k(bra3n2ch2)-i2-a(a3)'ta3. From κεφαλή, the head, and βράγχια, gills. Fr., *céphalobranches.* Ger., *Cephalobranchien.* Syn.: *Tubicola.* An order of the *Annelida*, having branchiæ at the anterior extremity of the body. [L, 147.]

CEPHALOBRANCHIATE, adj. Se2f-a2l-o-bra2n2k'i2-at. Lat., *cephalobranchiatus.* Fr., *céphalobranche.* Having branchiæ near or upon the head. [L, 147.]

CEPHALOBRANCHS, n. pl. Se2f'a2l-o-bra2n2ks. See CEPHALOBRANCHIATA.

CEPHALOCARPI [Genth] (Lat.), n. m. pl. Se2f(ke2f-a2l(a3l)-o(o2)-ka3rp'i(e). A division of lichens, consisting of the order *Cladonieæ.* [B, 121, 170.]

CEPHALOCATHARTIC, adj. Se2f-a2l-o-ka2th-a3rt'i2k. Lat., *cephalocatharticus* (from κεφαλή, the head, and καθαρτικός, cleansing). Fr., *céphalocathartique.* Ger., *kopfpurgirend, hauptreinigend.* See CEPHALARTIC.

CEPHALOCELE (Lat.), n. f. Se2f(ke2f)-a2l(a3l)-o(o2)-sel(kal)'e-(a); in Eng., se2f'a2l-o-sel. From κεφαλή, the head, and κήλη, a tumor. A congenital or acquired hernial protrusion of a portion of the contents of the cranium. [A, 326.]

CEPHALOCENTESIS (Lat.), n. f. Se2f(ke2f)-a2l(a3l)-o(o2)-se2nt(ke2nt)-e(a)'si2s. Gen., *cephalocentes'eos* (*-is*). From κεφαλή, the head, and κέντησις, puncture. Fr., *céphalocentèse.* Ger., *Anstechen des Kopfes.* The operation of puncturing the head, as in hydrocephalus. [E.]

CEPHALOCERATON (Lat.), n. n. Se2f(ke2f)-a2l(a3l)-o(o2)-se2r(ke2r)'a2t(a3t)-o2n. See ISOETES.

CEPHALO-CERCAL, adj. Se2f"a2l-o-su5rk'a2l. From κεφαλή, the head, and κέρκος, the tail. In zoology, lengthwise of the body. [L, 343.]

CEPHALOCHOLOSIS (Lat.), n. f. Se2f(ke2f)-a2l(a3l)-o(o2)-kol-(ch2o2l)-os'i2s. Gen., *cephalocholos'eos* (*-is*). From κεφαλή, the head, and χολοῦν, to rouse the bile. Fr., *céphalocholose.* Ger., *Gallenleiden des Hirns.* An old name for some affection of the brain attributed to biliary derangement. [A, 322.]

CEPHALOCHORDA (Lat.), **CEPHALOCHORDATA** (Lat.), n's n. pl. Se2f(ke2f)-a2l(a3l)-o(o2)-ko2rd(ch2o2rd)'a3, -ko2rd-(ch2o2rd)-a(a3)'ta3. From κεφαλή, the head, and χορδή, a cord. Syn.: *Leptocardia.* A division of the *Chordata* in which the notochord extends from one end of the body to the other and persists through life; a branch of the *Vertebrata* (in the widest sense) in which the nervous axis does not expand into a brain. [Lankester, "Quart. Jour. of Micr. Sci.," 1877, p. 450 (L); L, 121, 201, 210.]

CEPHALOCLADIA (Lat.), n. n. pl. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-o(o^2)-kla(kla^3)′di^2-a^3. Of Corda and succeeding authors, a family of hyphomycetous *Fungi*. [B, 170.]

CEPHALOCLASIA (Lat.), n. f. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-o(o^3)-klaz-(kla^{3}s)′i^2-a^3. From κεφαλή, the head, and κλάσις, a breaking. See CEPHALOTRIPSY.

CEPHALOCOTYLEA (Lat.), n. n. pl. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-o(o^2)-ko^{2}t-i^{2}l(u^{6}l)′e^2-a^3. From κεφαλή, the head, and κοτύλη, a cup. See CESTOIDEA.

CEPHALOCROTONEÆ (Lat.), n. f. pl. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-o-(o^2)-kro(kro^2)-ton(to^{2}n)′e^2-e(a^3-e^2). Fr., *céphalocrotonées*. A subtribe of the *Acalypheæ*, comprising *Cephalocroton*, etc. [M. Arg. (B, 214); B, 121.]

CEPHALOCYSTS, n. pl. Se^{2}f′a^{2}l-o-si^{2}sts. From κεφαλή, the head, and κύστις, a bag. Fr., *céphalocystes*. See CESTOIDEA.

CÉPHALODE (Fr.), n. Sa-fa^{3}l-od. See CEPHALODIUM.

CEPHALODEA (Lat.), n. n. pl. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-od′e^2-a^3. See CEPHALOIDEA.

CÉPHALODÈRE (Fr.), n. Sa-fa^{3}l-o-de^{2}r. In zoology, the head and neck when they are fused into one piece. [L, 41.]

CEPHALODES (Lat.), adj. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-od′ez(as). See CEPHALOID.

CEPHALODESMION (Lat.), **CEPHALODESMIUM** (Lat.), n's n. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-o(o^2)-de^{2}s′mi^2-o^{2}n, -u^{3}m(u^{4}m). Gr., κεφαλοδέσμιον (from κεφαλή, the head, and δεσμός, a band). Fr., *céphalodesmion*. Ger., *Kopfbinde*. A bandage for the head. [A, 322; L, 135.]

CEPHALODIUM [Sprengel] (Lat.), n. n. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-od′-i^2-u^{3}m(u^{4}m). From κεφαλή, the head, and εἶδος, resemblance. Fr., *céphalode, céphalodie*. Ger., *Knöpfchen, Brutknöpfchen*. A rounded, convex, often pedicellate mass found upon the surface or in the substance of certain lichens; formerly considered to be the fructification of the latter, but, according to later authors, of unknown function. According to De Bary, it is to be regarded as an accessory *Alga* mass which enters into the composition of the lichen in addition to the *Alga*, which already forms an essential and constant part of the latter. [B, 1, 54, 121.]—**C. endogenum.** Fr., *céphalodie endogène*. An endogenous c.; one contained with the substance of the thallus of the lichen. [B, 121.]—**C. epigenum.** Fr., *céphalodie épigène*. An epigenous c.; one found upon the superior surface of the thallus and evident as a visible external protuberance. [B, 121.]—**C. hypogenum.** Fr., *céphalodie hypogène*. An hypogenous c.; one found upon the inferior surface of the thallus. [B, 121.]—**C. pyrenodeum.** An endogenous c. which gives rise to a prominence upon the inferior surface of the thallus. [B, 121.]

CEPHALODUCTOR (Lat.), n. m. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-o(o^2)-du^{3}k-(duk)′to^{2}r. Gen., *cephaloducto′ris*. From κεφαλή, the head, and *ducere*, to lead. See CAPITIDUCTOR.

CEPHALODYMIA (Lat.), n. f. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-o(o^2)-di^{2}m-(du^{6}m)′i^2-a^3. From κεφαλή, the head, and δύμεναι, to mingle with. See CEPHALOPAGY.

CEPHALODYNIA (Lat.), n. f. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-o(o^2)-di^{2}n-(du^{6}n)′i^2-a^3. From κεφαλή, the head, and ὀδύνη, pain. Fr., *céphalodynie*. Pain in the occipito-frontalis muscle of a rheumatic character; the *rhumatisme épicrânien* of French authors. [D, 74; L, 87.]

CEPHALŒDEMA (Lat.), n. n. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-e^{2}d(o^2-e^{2}d)-e(a)′ma^3. Gen., *cephalœdem′atos* (*-is*). From κεφαλή, the head, and οἴδημα (see ŒDEMA). Fr., *céphalœdème*. Ger., *œdematöse Kopfgeschwulst, äusserer Wasserkopf*. An œdematous swelling of the head. [A, 322; E, 15.]

CEPHALO-EXTRACTOR, n. Se^{2}f″a^{2}l-o-e^{2}x-tra^{2}k′to^{2}r. From κεφαλή, the head, and *extrahere*, to extract. See CAPITIDUCTOR.

CEPHALO-FACIAL, adj. Se^{2}f″a^{2}l-o-fa′si^2-a^{2}l. From κεφαλή, the head, and *facies*, the face. Pertaining to the skull and to the face. [L.] Lee *C.-f.* INDEX.

CEPHALOGENESIS (Lat.), n. f. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-o(o^2)-je^{2}n-(ge^{2}n)′e^{2}s-i^{2}s. Gen., *cephalogenes′eos* (*-gen′esis*). From κεφαλή, the head, and γένεσις, production. Fr., *céphalogénèse*. Ger., *Kopfbildung*. The development or evolution of the head. [L, 41; Spix (L, 121).]

CEPHALOGRAPH, n. Se^{2}f′a^{2}l-o-gra^{3}f. From κεφαλή, the head, and γράφειν, to write. Fr., *céphalographe*. An instrument for tracing the contours of the head. Harting's c. is the *conformateur* used by hatters. [A, 301; L, 150.]

CEPHALOGRAPHY, n. Se^{2}f-a^{2}l-o^{2}g′ra^{2}f-i^2. Fr., *céphalographie*. The anatomy of the head; also the use of the cephalograph. [A, 301; L, 49.]

CEPHALOHÆMATOMA (Lat.), n. n. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-o(o^2)-he^{2}m(ha^3-e^{2}m)-a^{2}t(a^{3}t)-om′a^3. See CEPHALÆMATOMA.

CEPHALOHÆMIA (Lat.), n. f. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-o(o^2)-hem′-(ha^3′e^{2}m)-i^2-a^3. See CEPHALÆMIA.

CÉPHALOHÉMOMÈTRE (Fr.), n. Sa-fa^{3}l-o-a-mo-me^{2}tr. See CEPHALÆMATOMETER.

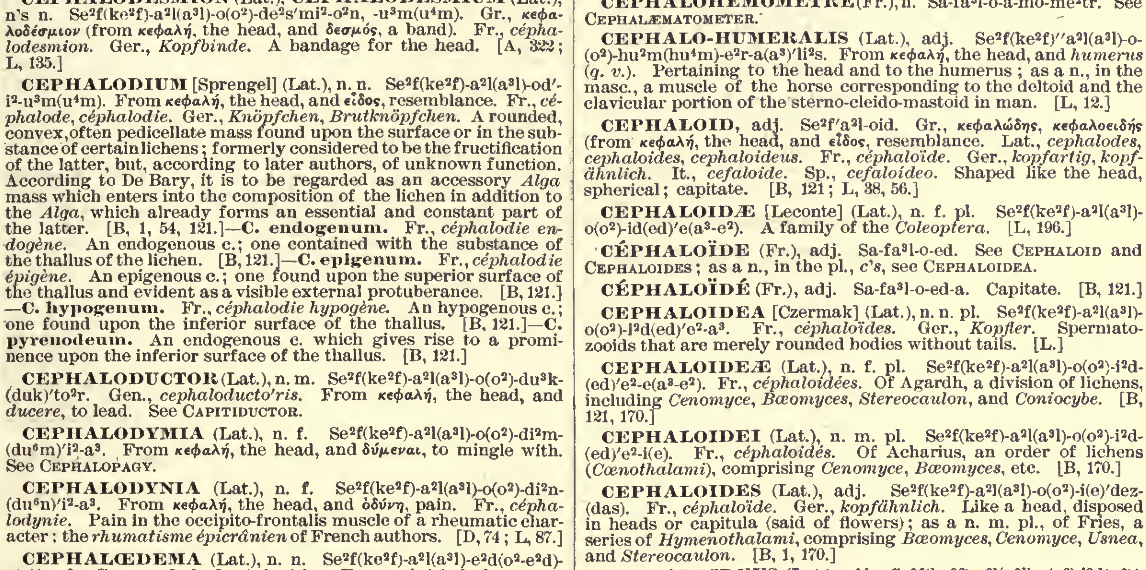
CEPHALO-HUMERALIS (Lat.), adj. Se^{2}f(ke^{2}f)″a^{2}l(a^{3}l)-o-(o^2)-hu^{2}m(hu^{4}m)-e^{2}r-a(a^3)′li^{2}s. From κεφαλή, the head, and *humerus* (*q. v.*). Pertaining to the head and to the humerus; as a n., in the masc., a muscle of the horse corresponding to the deltoid and the clavicular portion of the sterno-cleido-mastoid in man. [L, 12.]

CEPHALOID, adj. Se^{2}f′a^{2}l-oid. Gr., κεφαλώδης, κεφαλοειδής (from κεφαλή, the head, and εἶδος, resemblance. Lat., *cephalodes, cephaloides, cephaloideus*. Fr., *céphaloïde*. Ger., *kopfartig, kopfähnlich*. It., *cefaloide*. Sp., *cefaloideo*. Shaped like the head, spherical; capitate. [B, 121; L, 38, 56.]

CEPHALOIDÆ [Leconte] (Lat.), n. f. pl. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-o(o^2)-id(ed)′e(a^3-e^2). A family of the *Coleoptera*. [L, 196.]

CÉPHALOÏDE (Fr.), adj. Sa-fa^{3}l-o-ed. See CEPHALOID and CEPHALOIDES; as a n., in the pl., c's, see CEPHALOIDEA.

CÉPHALOÏDÉ (Fr.), adj. Sa-fa^{3}l-o-ed-a. Capitate. [B, 121.]



CEPHALOIDEA [Czermak] (Lat.), n. n. pl. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-o(o^2)-i^{2}d(ed)′e^2-a^3. Fr., *céphaloïdes*. Ger., *Kopfler*. Spermatozooids that are merely rounded bodies without tails. [L.]

CEPHALOIDEÆ (Lat.), n. f. pl. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-o(o^2)-i^{2}d-(ed)′e^2-e(a^3-e^2). Fr., *céphaloïdées*. Of Agardh, a division of lichens, including *Cenomyce, Bœomyces, Stereocaulon*, and *Coniocybe*. [B, 121, 170.]

CEPHALOIDEI (Lat.), n. m. pl. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-o(o^2)-i^{2}d-(ed)′e^2-i(e). Fr., *céphaloïdés*. Of Acharius, an order of lichens (*Cœnothalami*), comprising *Cenomyce, Bœomyces*, etc. [B, 170.]

CEPHALOIDES (Lat.), adj. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-o(o^2)-i(e)′dez-(das). Fr., *céphaloïde*. Ger., *kopfähnlich*. Like a head, disposed in heads or capitula (said of flowers); as a n. m. pl., of Fries, a series of *Hymenothalami*, comprising *Bœomyces, Cenomyce, Usnea*, and *Stereocaulon*. [B, 1, 170.]

CEPHALOIDEUS (Lat.), adj. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-o(o^2)-i^{2}d(ed)′-e^2-u^{3}s(u^{4}s). See CEPHALOID.

ANTELMES'S CEPHALOMETER. (MODIFIED FROM "MEM. DE LA SOC. D'ANTHROPOL.")

AA, a circle passing obliquely around the head just above the eyes, held in place with screws; CC, a semicircle pivoted on pins, BB, which allow it to be rotated in an antero-posterior direction; D, a rider that can be slipped upon CC; E, a circle divided into degrees, which is attached to CC and moves with it, showing the angle it forms with AA.

CEPHALOLOGY, n. Se^{2}f-a^{2}l-o^{2}l'o-ji^2. Lat., *cephalologia* (from κεφαλή, the head, and λόγος, understanding). Fr., *céphalologie*. Ger., *Kopflehre*. The anatomy, etc., of the head. [A, 301, 322.]

CEPHALOLOXIA (Lat.), n. f. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-o(o^2)-lo^{2}x'i^2-a^3. From κεφαλή, the head, and λοξός, oblique. See TORTICOLLIS.

CEPHALOMA (Lat.), n. n. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-om'a^3. Gen., *cephalom'atos* (*-is*). From κεφαλή, the head (see also *-oma**). Fr., *céphalome*. An old term for soft cancer. [A, 66.]

CÉPHALOMÉLIE (Fr.), n. Sa-fa^{3}l-o-mal-e. A form of monstrosity characterized by the insertion of an accessory member upon the head. [L, 41.]

CEPHALOMELUS (Lat.), n. m. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-o^{2}m'e^{2}l-u^{3}s-(u^{4}s). From κεφαλή, the head, and μέλος, a member. Fr., *céphalomèle*. A monster with a limb inserted upon the head. [L, 41, 57.]

CEPHALOMENIA (Lat.), n. f. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-o(o^2)-men-(man)'i^2-a^3. From κεφαλή, the head, and μήν, a month. A diversion of the menstrual flow to the head. [A, 322.]

CEPHALOMENINGITIS (Lat.), n. f. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-o(o^2)-me^{2}n(man)-i^{2}n(i^{2}n^2)-ji(ge)'ti^{2}s. Gen., *cephalomeningit'idis*. From κεφαλή, the head, and μῆνιγξ, a membrane of the brain (see also *-itis**). See MENINGOCEPHALITIS.

CEPHALOMETER, n. Se^{2}f-a^{2}l-o^{2}m'e^{2}t-u^{5}r. Lat., *cephalometrum* (from κεφαλή, the head, and μέτρον, a measure). Fr., *céphalomètre*. Ger., *Kephalometer*, *Kopfmesser*. It., *cefalometro*. An instrument for measuring the head. [A, 301; L, 81.]

CEPHALOMETRY, n. Se^{2}f-a^{2}l-o^{2}m'e^{2}t-ri^2. Fr., *céphalométrie*. Ger., *Kephalometrie*, *Schädelmessung*. It., *cefalometria*. The art or act of measuring the head by means of the cephalometer. [L, 41.] Cf. CRANIOMETRY.

CEPHALOMONODIDYMI (Lat.), n. m. pl. Se^{2}f(ke^{2}f)''a^{2}l-(a^{3}l)-o(o^2)-mo^{2}n-o(o^2)-di^{2}d'i^{2}m(u^{6}m)-i(e). From κεφαλή, the head, μονος, single, and δίδυμος, a twin. Twins with the heads grown together or having only one head. [L. 81.]

CEPHALOMYIA [Latreille] (Lat.), n. f. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-o-(o^2)-mi(mu^6)-i(e)'a^3. From κεφαλή, the head, and μυῖα, a fly. Fr., *céphalomyie*. A genus of the *Brachycera*. [L, 49.]—**C. ovis**. A species the larvæ of which are found in the maxillary and frontal sinuses of sheep. [L, 49.]

CEPHALOMYITIS (Lat.), n. f. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-o(o^2)-mi(mu^6)-l(e)'ti^{2}s. Gen., *cephalomyit'idis*. From κεφαλή, the head, and μῦς, a muscle (see also *-itis**). Fr., *céphalomyite*. Ger., *Kopfmuskelentzündung*. Inflammation of the muscles of the head. [A, 322, 385.]

CEPHALOMYODYNIA (Lat.), n. f. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-o(o^2)-mi(mu^6)-o(o^2)-di^{2}n(du^{6}n)'i^2-a^3. From κεφαλή, the head, μῦς, a muscle, and ὀδύνη, pain. Fr., *céphalomyodynie*. Ger., *Kopfmuskelschmerz*. Pain in the muscles of the head. [A, 322.]

CEPHALON (Lat.), n. n. Se^{2}f(ke^{2}f)'a^{2}l(a^{3}l)-o^{2}n. The head (of a crustacean). [L, 121.]

CEPHALO-NASAL, adj. Se^{2}f''a^{2}l-o-nas'a^{2}l. From κεφαλή, the head, and *nasus*, the nose. Pertaining to the skull and to the nose. [L.] See *C.-n.* INDEX.

CEPHALONIA (Lat.), n. f. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-on'i^2-a^3. Ger., *Cephalonie*. A pathological condition in which the head is abnormally developed and the brain hypertrophied. [A, 326.]

CEPHALONOSOS (Lat.), n. f. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-o^{2}n'os(o^{2}s)-u^{3}s(u^{4}s). From κεφαλή, the head, and νόσος, disease. Fr., *céphalonose*. Ger., *Hauptkrankheit*, *Kopfkrankheit*. See AMPHEMERINA *hungarica*.

CEPHALONT, n. Se^{2}f'a^{2}l-o^{2}nt. A member of the *Septata* during the stage when the epimerite is present. [L, 121.]

CEPHALO-ORBITAL, adj. Se^{2}f''a^{2}l-o-o^{2}rb'i^{2}t-a^{2}l. From κεφαλή, the head, and *orbita*, the orbit. Pertaining to the skull and to the orbits. [L.] See *C.-o.* INDEX.

CEPHALO-ORBITO-NASAL, adj. Se^{2}f''a^{2}l-o-o^{2}rb'''i^{2}t-o-nas'a^{2}l. From κεφαλή, the head, *orbita*, the orbit, and *nasus*, the nose. Pertaining to the skull, to the orbits, and to the nose. [L.] See *Cephalo-orbital* INDEX.

CEPHALOPAGES (Lat.), n. m. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-o^{2}p'a^2(a^2)-jez(gas). See CEPHALOPAGUS.

CEPHALOPAGOTOME, n. Se^{2}f-a^{2}l-o-pa^{2}g'o-tom. See CEPHALAPAGOTOME.

CEPHALOPAGUS (Lat.), n. m. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-o^{2}p'a^{2}g(a^{3}g)-u^{3}s(u^{4}s). From κεφαλή, the head, and παγείς, united. Fr., *céphalopage*. Syn.: *craniopagus*. A double monster in which the two individuals are adherent by the head. [B, 108.]

CEPHALOPAGY, n. Se^{2}f-a^{2}l-o^{2}p'a^{2}j-i^2. Fr., *céphalopagie*. A form of monstrosity characterized by the development of two individuals united by the head. [L, 41.]

CEPHALOPATHIA (Lat.), n. f. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-o(o^2)-pa^{2}th-(pa^{3}th)'i^2-a^3. From κεφαλή, the head, and πάθος, disease. Fr., *céphalopathie*. Ger., *Kopfleiden*. Disease of the head. [L, 81.]

CEPHALOPELTINÆ (Lat.), n. f. pl. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-o(o^2)-pe^{2}l-tin(ten)'e(a^3-e^2). A tribe of the *Lepidosternidœ*. [L, 256.]

CEPHALOPHARYNGEUS [Arnold] (Lat.), adj. Se^{2}f(ke^{2}f)''-a^{2}l(a^{3}l)-o(o^2)-fa^{2}r(fa^{3}r)-i^{2}n(u^{6}n^2)'je^2(ge^2)-u^{3}s(u^{4}s). From κεφαλή, the head, and φάρυγξ, the pharynx. Fr., *céphalo-pharyngien*. Ger., *Schlundkopfmuskel* (2d def.). It., *cefalofaringeo*. 1. Relating to the head and the pharynx. [L, 44.] 2. As a n., see *Superior* CONSTRICTOR *of the pharynx*. This name is given by some anatomists to both the middle and the superior constrictors of the pharynx, referring incorrectly to Winslow as authority, as he gives this name to an independent muscle. [L, 263.] 3. A name sometimes applied to an anomalous muscle arising from the petrous portion of the temporal bone and inserted into the pharyngeal aponeurosis. [L, 31.] 4. A small muscle arising from the basilar process of the occipital bone and running down to be lost in the fibres of the superior constrictor muscle of the pharynx. [Douglas, Winslow (L).]

CEPHALOPHORA (Lat.), n. n. pl. and f. sing. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-o^{2}f'o(o^2)-ra^3. From κεφαλή, the head, and φορεῖν, to bear. Fr., *céphalophores* (1st def.), *céphalophore* (2d def.). 1. As a n. n. pl., of Burmeister, an order of *Mollusca*; of Von Siebold, as commonly used, see ENCEPHALA; of De Blainville, see CEPHALOPODA; of others, a branch or section of the *Mollusca*. [L, 17, 87, 147, 231.] 2. As a n. sing., of Cavanilles, a genus of South American composite plants. [B, 42, 121.]—**C. antipedia**. See DIBRANCHIATA.—**C. pinnata**, **C. pteropoda hyalacea**. See PTEROPODA.

CEPHALOPHOROUS, adj. Se^{2}f-a^{2}l-o^{2}f'o-ru^{3}s. For deriv., see CEPHALOPHORA. Lat., *cephalophorus*. Fr., *céphalophore*. Ger., *kopftragend* (2d def.). 1. Relating to the *Cephalophora*. 2. Bearing flowers in heads or capitula. [B, 38; L, 121.]

CEPHALOPHORUM (Lat.), n. n. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-o^{2}f'o(o^2)-ru^{3}m(ru^{4}m). For deriv., see CEPHALOPHORA. Fr., *céphalophore*. Ger., *Kopfträger*. The pedicel or stipe of the receptacle in certain *Fungi* (*e. g.*, *Stilbum*). [B, 19, 121.]

CEPHALOPHORUS (Lat.), adj. and n. m. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-o^{2}f'o(o^2)-ru^{3}s(ru^{4}s). Fr., *céphalophore*. Ger., *kopftragend* (adj.). 1. See CEPHALOPHOROUS. 2. See CEREUS. [B, 121; L.]

CEPHALOPHRAGMA [Kirby] (Lat.), n. n. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-o(o^2)-fra^{2}g(fra^{3}g)'ma^3. Gen., *cephalophrag'matos* (*-is*). From κεφαλή, the head, and φράγμα, a wall. Fr., *céphalophragme*. Ger., *Kopfzaun*. The partition which divides the head in insects into an anterior and a posterior chamber. [L, 180.]

CEPHALOPHYMA (Lat.), n. n. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-o(o^2)-fi(fu^6)'-ma^3. Gen., *cephalophym'atos* (*-is*). From κεφαλή, the head, and φῦμα, a tumor. Fr., *céphalophyme*. Ger., *Kopfgeschwulst*. A tumor or swelling of the head. [A, 322.] See CEPHALÆMATOMA.

CEPHALOPOD, n. Se^{2}f'a^{2}l-o-po^{2}d. Fr., *céphalopode*. Ger., *Kopffuss*. A member of the *Cephalopoda*. [B.]

CEPHALOPODA (Lat.), n. n. pl. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-o^{2}p'od-(o^{2}d)-a^3. From κεφαλή, the head, and πούς, the foot. Fr., *céphalopodes*. Ger., *Kracken*, *Kopffüssler*, *Cephalopoden*. An order or class of the *Mollusca*, so called on account of their feet or arms being attached to the head. [L, 121, 147, 180.]—**C. acetabulifera** [Férussac]. See DIBRANCHIATA.—**C. antipedia siphinia** [Rafinesque]. See SIPHINIA.—**C. argonautica** [Gravenhorst], **C. argonautidæ** [Contraine]. See OCYTHYOIDÆ.—**C. cryptodibranchia** [D'Orbigny]. See DIBRANCHIATA.—**C. decapoda** [Leach *et al.*], **C. decapoda enterostea** [Lamarck]. See SIPHINIA.—**C. dibranchia**, **C. dibranchiata**. See DIBRANCHIATA.—**C. foraminifera** [D'Orbigny]. See FORAMINIFERA.—**C. libera** [De Haan], **C. nuda** [Cuvier]. See DIBRANCHIATA.—**C. octobrachides** [De Blainville], **C. octoceres**, **C. octopoda** [Leach]. See OCTOPIA.—**C. sipunculifera** [D'Orbigny]. See SIPHONOPODA.—**C. pinnata**. See PTEROPODA.—**C. testa nulla** [Lamarck]. See DIBRANCHIATA.—**C. testa unilocularia** [Lamarck]. See OCYTHOIDÆ.

CÉPHALOPODES (Fr.), n. pl. Sa-fa^{3}l-o-pod. See CEPHALOPODA.—**C. monothalmes**. See OCTHYOIDÆ.

CEPHALOPODIC, **CEPHALOPODOUS**, adj's. Se^{2}f-a^{2}l-o^{2}p'o^{2}d-i^{2}k, -u^{3}s. Belonging to the *Cephalopoda*. [L, 11.]

CEPHALOPODS, n. pl. Se^{2}f'a^{2}l-o-po^{2}dz. See CEPHALOPODA.

CEPHALOPONIA (Lat.), n. f. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-o(o^2)-po(po^2)'-ni^2-a^3. From κεφαλή, the head, and πόνος, pain. See CEPHALALGIA.

CEPHALOPROTHORAX (Lat.), n. m. Se^{2}f(ke^{2}f)''a^{2}l(a^{3}l)-o-(o^2)-pro-thor'a^{2}x(a^{3}x). See CEPHALOTHORAX.

CÉPHALOPSIDE (Fr.), adj. Sa-fa^{3}l-op-sed. Resembling the *Cephalops* (a genus of *Diptera*); as a n., in the m. pl., *c's*, a tribe of *Diptera*, having the genus *Cephalops* as the type. [L, 41.]

CÉPHALOPSITES (Fr.), n. pl. Sa-fa^{3}l-op-set. See under CÉPHALOPSIDE.

CEPHALOPSORÆ (Lat.), n. f. pl. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-o^{2}p-so'-re(ra^3-e^2). From κεφαλή, the head, and ψώρα, a lichen. Of Reichenbach, a suborder of lichens (*Hyphopsorœ* or *Podetiopsorœ*), comprising the families *Siphuleœ* (or, according to a later classification, *Isidieœ*), *Lecidineœ*, and *Cladoniaceœ*. [B, 170.]

CEPHALOPSYCTER (Lat.), n. m. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-o(o^2)-psi^{2}k(psu^{6}k)'tu^{5}r(tar). From κεφαλή, the head, and ψυκτήρ, a cooler. Fr., *céphalopsyctère*. Ger., *Kephalopsykter*, *Kopfkälter*. A device for applying a refrigerant to the head. [A, 322.]

CEPHALOPTERIDÆ (Lat.), n. f. pl. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-o^{2}p-te^{2}r'i^{2}d-e(a^3-e^2). From κεφαλή, the head, and πτέρον, a wing. Fr., *céphaloptères*. Ger., *Flugelköpfe*. A family of the *Batides*, having a winged or feathered head. [L, 14, 180.]

CEPHALOPTEROUS, adj. Se^{2}f-a^{2}l-o^{2}p'te^{2}r-u^{3}s. Lat., *cephalopterus*. Fr., *céphaloptère*. Ger., *kopfgeflugelt*. Having a winged or feathered head. [L, 180.]

CEPHALOPYOSIS (Lat.), n. f. Se^{2}f(ke^{2}f)-a^{2}l(a^{2}l)-o(o^2)-pi(pu^6)-os'i^{2}s. Gen., *cephalopyos'eos* (*-is*). From κεφαλή, the head, and πύωσις, suppuration. Fr., *céphalopyose*. Ger., *Kopfabscess*. Abscess in or on the head. [L, 41, 135.]

CEPHALORRHACHIDIAN, adj. Se^{2}f-a^{2}l-o^{2}r-ra^{2}k-i^{2}d'i^2-a^{2}n. From κεφαλή, the head, and ῥαχίς, the spine. Fr., *céphalo-rhachidien*. Relating to the brain and spinal cord. [D, 74.]

CÉPHALORRHÉMIE [Piorry] (Fr.), n. Sa-fa^{3}l-o-ram-e. From κεφαλή, the head, and ῥεῖν, to flow. Hæmorrhage into the brain. [L, 82.]

CEPHALORRHEUMA (Lat.), n. n. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-o^{2}r-ru^{2}m'a^3. Gen., *cephalorrheum'atos* (*-is*). From κεφαλή, the head, and ῥεῦμα, a rheum. A rheumatic affection of the head. [A, 322.]

CEPHALORRHIZOUS, adj. Se^{2}f-a^{2}l-o^{2}r-iz'u^{3}s. Gr., κεφαλόῤῥιζος (from κεφαλή, the head, and ῥίζα, a root). Lat., *cephalorrhizus*. Having nodular, head-like roots. [A, 322; B.]

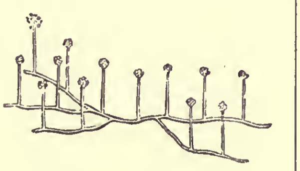
CEPHALORRHYNCHUS [Boissier] (Lat.), n. m. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-o^{2}r-ri^{2}n^2(ru^{6}n^2)'ku^{3}s(ch^{2}u^{4}s). From κεφαλή, the head, and ῥύγχος, the snout. See Lactuca.

CEPHALOSCOPE, n. Se^{2}f'a^{2}l-o-skop. Lat., *cephaloscopium* (from κεφαλή, the head, and σκοπεῖν, to examine). Fr., *céphaloscope*. A stethoscope with a large orifice which is placed over the ear of the patient, who at the same time breathes actively through the corresponding nostril. The movement of the air in the tympanic cavity is then plainly audible through the c. [B, 120.]

CEPHALOSCOPIC, adj. Se^{2}f-a^{2}l-o-sko^{2}p'i^{2}k. Fr., *céphaloscopique*. Pertaining to cephaloscopy. [L, 41.]

CEPHALOSCOPY, n. Se^{2}f-a^{2}l-o^{2}s'kop-i^2. Fr., *céphaloscopie*. 1. Examination of the head for the purpose of ascertaining the state of the intellectual faculties. [L, 41.] 2. Auscultation by means of the cephaloscope.

CEPHALOSEISIS (Lat.), n. f. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-o(o^2)-sis'(se^2-es')-i^{2}s. Gen., *cephaloseis'eos* (*-is*). From κεφαλή, the head, and σεῖσις, a shaking. Fr., *céphaloséisis*. Ger., *Erschütterung des Kopfes*. Concussion of the brain. [A, 322.]



CEPHALOSISTICUS (Lat.), adj. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-o(o^2)-si^{2}st'-i^{2}k-u^{3}s(u^{4}s). Pertaining to or affected with concussion of the brain. [A, 322.]

CEPHALOSOMATOUS, adj. Se^{2}f-a^{2}l-o-som'a^{2}t-u^{3}s. Lat., *cephalosomatus* (from κεφαλή, the head, and σῶμα, the body). Fr., *céphalosome*. Ger., *kopfkörperig*. Having the head and forepart of the body large. [L, 41.]

CEPHALO-SPINAL, adj. Se^{2}f''a^{2}l-o-spin'a^{2}l. Lat., *cephalospinalis* (from κεφαλή, the head, and *spina*, the spine). See Cephalorrhachidian.

CEPHALOSPOREÆ (Lat.), n. f. pl. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-o(o^2)-spor(spo^{2}r)'e^2-e(a^3-e^2). From κεφαλή, the head, and σπορά, a seed. Fr., *céphalosporées*. Of Dumortier, a family of the *Mucedinarieæ*, or the *Nudigrania*, comprising three genera. [B, 170.]

CEPHALOSPOREI (Lat.), n. m. pl. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-o(o^2)-spor(spo^{2}r)'e^2-i(e). Fr., *céphalosporés*. Of Léveillé, a tribe of *Trichosporei* (*Phycocladii*), comprising genera in which the spores are attached to a vesicle situated at the extremity of the sporophore. [B, 121, 170.]

The cephalosporium. (After Neumann.)

CEPHALOSPORIUM (Lat.), n. n. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-o(o^2)-spor(spo^{2}r)'i^2-u^{3}m(u^{4}m). Of Corda, a genus of hyphomycetous *Fungi*. [B, 121.]

CEPHALOSTAT, n. Se^{2}f'-a^{2}l-o-sta^{2}t. From κεφαλή, the head, and ἱστάναι, to place. An appliance invented by Lawrence for holding a patient's head; a sort of vise consisting of two padded side-plates capable of being adjusted to the head by means of a screw. [F.]

CEPHALOSTEGITE, n. Se^{2}f-a^{2}l-o^{2}s'te^{2}j-it. From κεφαλή, the head, and στέγειν, to cover in. That portion of the carapace of a crustacean which is situated in front of the cervical groove. [L, 11.]

CÉPHALOSTOME (Fr.), adj. Sa-fa^{3}l-o-stom. From κεφαλή, the head, and στόμα, the mouth. Having the mouth supported by a head; as a n., in the m. pl., c's, of De Blainville, a family of the *Arachnides*. [L, 109.]

CEPHALOT, n. Se^{2}f'a^{2}l-o^{2}t. Lat., *cephalotum*. Fr., *céphalote*. A brownish fatty body of resinous appearance obtained by Conerbe from cerebral tissue. [B, 118.]

CEPHALOTA [Latreille, Müller] (Lat.), n. n. pl. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-ot'a^3. Fr., *céphalotes*. An order of the *Entomostraca*. [L, 204.]

CEPHALOTACEÆ [Lindley] (Lat.), n. f. pl. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-ot-a-(a^3)'se^2(ke^2)-e(a^3-e^2). Fr., *cephalotacées*. See Cephaloteæ.

CÉPHALOTE (Fr.), adj. and n. Safa^{3}l-ot. See Cephalot and Cephalotus.

CEPHALOTEÆ (Lat.), n. f. pl. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-ot'e^2-e(a^3-e^2). Fr., *céphalotées*. Syn.: *Cephalotaceæ* [Lindley]. Of Dumortier, R. Brown, and succeeding authors, a family of plants variously referred to the *Veratreæ*, *Rosaceæ*, or *Crassularieæ*, or made an independent order akin to the *Ranunculaceæ*; consisting of *Cephalotus*, now referred to the *Saxifragaceæ*. [B, 19, 170.]

CEPHALOTES (Lat.), adj. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-ot'ez(as). See Cephalotus.

CEPHALOTHECA (Lat.), n. f. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-o(o^2)-the-(tha)'ka^3. From κεφαλή, the head, and θήκη, a sheath. Fr., *céphalothèque*. Ger., *Kopfkasten*, *Kopfhülle*. 1. Of Kirby, the anterior extremity of the chrysalis, which covers the head. [L, 41, 180.] 2. A genus of *Fungi*. [B, 121.]

CEPHALOTHECEÆ (Lat.), n. f. pl. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-o(o^2)-the(tha)'se^2(ke^2)-e(a^3-e^2). Fr., *céphalothécées*. Of Dumortier, a family of *Urnularia* (the *Hepaticæ*), comprising *Marchantia*, *Conocephalus*, *Fimbraria*, *Lunularia*, and *Grimaldia*. [B, 170.]

CEPHALOTHLASIA (Lat.), **CEPHALOTHLASIS** [Hüter] (Lat.), n's f. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-o(o^2)-thlaz(tha^{3}s)'i^2-a^3, -o^{2}th'la^{2}s-(la^{2}s)-i^{2}s. From κεφαλή, the head, and θλάειν, to crush. Fr., *céphalothlasie*. Cephalotripsy. [A, 15.]

CEPHALOTHLASTES (Lat.), n. m. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-o(o^2)-thla^{2}st(thla^{3}st)'ez(as). Fr., *céphalothlaste*. An old term for a variety of the embryothlastes used for crushing the head. [A, 112.]

CEPHALOTHLIBE, n. Se^{2}f'a^{2}l-o-thlib. Lat., *cephalothliba*, *cephalothlibes* (from κεφαλή, the head, and θλίβειν, to crush). Fr., *céphalothlibe*. Ger., *Kopfzermalmer*. See Cephalotribe.

CEPHALO-THORACIC, adj. Se^{2}f''a^{2}l-o-tho-ra^{2}s'i^{2}k. From κεφαλή, the head, and θώραξ (see Thorax). Of or pertaining to the cephalo-thorax. [B, 100.]

CEPHALOTHORACOPAGUS (Lat.), n. m. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-o(o^2)-tho^{2}r(thor)-a^{2}k(a^{3}k)-o^{2}p'a^{2}g(a^{3}g)-u^{3}s(u^{4}s). From κεφαλή, the head, θώραξ (see Thorax), and πάγειν, to join. Fr., *céphalo-thoracopage*. A double monster in which the two individuals are adherent by the head and trunk as far as the umbilicus, which is common to both members of the pair. Veit subdivides these monsters into the *syncephalus* and *prosopothoracopagus* (*q. v.*). [A, 15; B, 108.]

CEPHALOTHORACOSTERUMENOS (Lat.), n. m. Se^{2}f-(ke^{2}f)-a^{2}l(a^{3}l)-o(o^2)-tho^{2}r(thor)-a^{2}k(a^{3}k)-o(o^2)-ste^{2}r-u^{2}m(um)'e^{2}n-o^{2}s. From κεφαλή, the head, θώραξ (see Thorax), and στερεῖν, to deprive. A monster without head or chest. [L, 81.]

CEPHALO-THORAX (Lat.), n. m. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-o(o^2)-thor'a^{2}x(a^{3}x). Gen., *cephalothorac'os* (*-is*). Fr., *céphalo-thorax*. The fused head and thorax of many *Arthropoda* (*e. g.*, the *Arachnida* and *Crustacea*). [B.]

CEPHALOTHRYPSIS [E. von Siebold] (Lat.), n. f. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-o(o^2)-thri^{2}p(thru^{6}p)'si^{2}s. Gen., *cephalothryp'seos* (*-is*). From κεφαλή, the head, and θρύψις, a breaking in pieces. Fr., *céphalotripsie*. Ger., *Cephalothrypsie*. It., Sp., *cefalotripsia*. Cephalotripsy (*q. v.*). [A, 85.]

CEPHALOTHRYPTOR (Lat.), n. m. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-o(o^2)-thri^{2}p(thru^{6}p)'to^{2}r. Ger., *Kephalothryptor*, *Cephalothrypter*. An instrument invented by A. Baudelocque for extracting the fœtus by the head without perforation, but now used after that operation; a strong obstetric forceps with a short cephalic curve and a compressive mechanism at the handles. [A, 85.] To be distinguished from the *cephalotribe*.

CEPHALOTINA (Lat.), n. n. pl. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-o(o^2)-tin-(ten)'a^3. Fr., *céphalotes*. A tribe of the *Pteropida*. [L, 272.]

CEPHALOTOME, n. Se^{2}f'a^{2}l-o-tom. Lat., *cephalotomus* (from κεφαλή, the head, and τέμνειν, to cut). Fr., *céphalotome*. Syn.: *craniotome*. Blot's perforator.—**Saw-c.** It., *sego-cefalotomo*. Sp., *cefalótomo*. An instrument devised by Finizzio for performing cephalotomy.

CEPHALOTOMY, n. Se^{2}f-a^{2}l-o^{2}t'o-mi^2. Lat., *cephalatomia*, *cephalotomia*. Fr., *céphalotomie*, *sciage de la tête*. Ger., *Schneiden* (oder *Zerlegen*) *des Kopfes*. It., *cefalotomia*. Sp., *cefalotomía*. 1. The dissection of the head. [L, 41.] 2. The operation of dividing the fœtal head, as with an écraseur or a forceps-saw, as a modification of craniotomy.

CEPHALOTOS (Lat.), adj. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-ot'o^{2}s. Gr., κεφαλωτός. See Capitate.

CEPHALOTRACTOR (Lat.), n. m. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-o(o^2)-tra^{2}k(tra^{3}k)'to^{2}r. Gen., *cephalotracto'ris*. From κεφαλή, the head, and *trahere*, to drag. See Capitiductor.

CEPHALOTRIBE, n. Se^{2}f'a^{2}l-o-trib. Lat., *cephalotriba* (from κεφαλή, the head, and τρίβειν, to wear away). Fr., *céphalotribe*. Ger., *Kephalotribe*, *Kopfstreichler*, *Kopfzermalmer*. It., *cefalotrittore*, *cefalotribo*. Sp., *cefalótribo*. A heavy forceps with narrow blades for crushing the fœtal head by screw-power.—**Perforating c.** Ger., *perforatorische Kephalotribe*. A combined perforator and cephalotribe devised by Cohen. The perforator is worked after the blades of the c. have been applied ["Monatsschr. f. Geburtsk.," x, p. 115; A, 20.]

Blot's cephalotribe. (After Lusk.)

CEPHALOTRICHA (Lat.), n. n. pl. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-o^{2}t'-ri^{2}k(ri^{2}ch^2)-a^3. From κεφαλή, the head, and θρίξ, hair. Of Ehrenberg, a cohort of *Fungi*, comprising *Calicium*, *Cephalotrichum*, *Ceratium*, *Isaria*, etc. [B, 170.]

CEPHALOTRICHEI (Lat.), n. m. pl. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-o(o^2)-tri^{2}k(tri^{2}ch^2)'e^2-i(e). Fr., *céphalotrichés*, *céphalotrichiens*. Of Fries, Endlicher, and Reichenbach, an order of hyphomycetous *Fungi* (*Tubercularini*), comprising *Cephalotrichum*, *Isaria*, etc. [B, 170.]

CEPHALOTRICHI (Lat.), n. m. pl. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-o^{2}t'-ri^{2}k(ri^{2}ch^2)-i(e). Fr., *céphalotrichés*, *céphalotrics*. Of Nees, Martius, Fries, and Sprengel, a series, family, or order of the *Hyphomycetes* corresponding nearly to the *Cephalotricha*. [B, 170.]

CEPHALOTRICHII [Reichenbach] (Lat.), n. m. pl. Se^{2}f-(ke^{2}f)-a^{2}l(a^{3}l)-o(o^2)-tri^{2}k(tri^{2}ch^2)'i^2-i(e). See Cephalotrichei.

CEPHALOTRIDYMUS (Lat.), n. m. Se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-o(o^2)-tri^{2}d'i^{2}m(u^{6}m)-u^{3}s(u^{4}s). From κεφαλή, the head, and τρίδυμος, a triplet. A monster with three heads. [L, 81.]

CÉPHALOTRIPSIE (Fr.), n. Sa-fa^{3}l-o-trep-se. See Cephalotripsy.—**C. intra-crânienne.** Ger., *intracranielle Kephalothryp-*

sie. Syn.: *trépanation du sphénoïde.* A method of breaking up the fœtal skull recommended by Guyon. It consists in pushing the piercer of a trephine into the cranial vault and trephining, then inserting a smaller trephine and operating on the base of the skull. A small screw-forceps is used for extraction (see FORCEPS *à crémaillère*). [A, 23, 24.]—**C. répétée sans tractions.** Pajot's term for a method of cephalotripsy in which the base of the skull is first crushed, and then an attempt is made by rotation to bring the flattened head into such relation with the contracted pelvis as to allow of its passage. If there is any resistance, the case is left to Nature for two or three hours, and the crushing is then repeated.

CÉPHALOTRIPSIÉ (Fr.), adj. Sa-fa3l-o-trep-se-a. Subjected to crushing with a cephalotribe (said of the fœtus). [A, 54.]

CEPHALOTRIPSY, n. Se2f'a2l-o-tri2p-si2. Lat., *cephalotripsis* (from κεφαλή, the head, and τρίβειν, to crush). Fr., *céphalotripsie, broiement de la tête.* Ger., *Kephalotripsie, Zerquetschung des Kindeskopfes.* It., *cefalotripsia, cefalotrissia.* Sp., *cefalotripsia.* Syn.: *cephalothlasis* [Hüter]. The operation of crushing the head of the fœtus to facilitate delivery.

CÉPHALOTRIPTEUR (Fr.), n. Sa-fa3l-o-trep-tu5r. See CEPHALOTRIBE.

CÉPHALOTRIPTIE (Fr.), n. Sa-fa3l-o-trep-se. See CEPHALOTRIPSY.

CEPHALOTROCH, n. Se2f'a2l-o-tro2k. In comparative anatomy and embryology, a ciliated band surrounding the body in front of the mouth. [Lankester, "Quart. Jour. of Micr. Sci.," 1877, p. 423 (L).]

CEPHALOTROTUS (Lat.), adj. Se2f(ke2f)-a2l(a3l)-o(o2)-tro'-tu3s(tu4s). Gr., κεφαλότρωτος (from κεφαλή, the head, and τρώειν, to wound). Wounded in the head. [A, 325.]

CEPHALOTRYPESIS (Lat.), n. f. Se2f(ke2f)-a2l(a3l)-o(o2)-tri2p(tru6p)-e(a)'si2s. Gen., *cephalotrypes'eos (-is).* From κεφαλή, the head, and τρύπησις (from τρυπᾶν), perforation. The operation of trephining. [A, 322; E.]

CEPHALOTRYPTER (Lat.), n. m. Se2f(ke2f)-a2l(a3l)-o(o2)-tri2p(tru6p)'tu5r(tar). See CEPHALOTHLIBA.

CÉPHALOTTE (Fr.), n. Sa-fa3l-ot. See CÉPALOTE.

CEPHALOTUM (Lat.), n. n. Se2f(ke2f)-a2l(a3l)-ot'u3m(u4m). See CEPHALOT.

CEPHALOTUS (Lat.), n. m. Se2f(ke2f)-a2l(a3l)-ot'u3s(u4s). A genus of plants constituting the *Cephaloteæ.* [B.]

CEPHALOTYPOSIS [Eisenmann] (Lat.), n. f. Se2f(ke2f)-a2l-(a3l)-o(o2)-tip(tu6p)-o'si2s. Gen., *cephalotypos'eos (-is).* From κεφαλή, the head, and τύπωσις, expression. Ger., *Kephalotypose.* An old term for a form of periodical fever which, finding no lodgment elsewhere, expended itself on the head. [A, 322.]

CEPHALOUS, adj. Se2f'a2l-u2s. Having a head (applied chiefly to a division of molluscs, the *Cephalata*, including the univalves, etc.). [L, 56.]

CÉPHALO-VISCÉRAL (Fr.), adj. Sa-fa3l-o-vi2s-a-ra2l. Pertaining to the head and to the abdominal viscera. [L, 41.]

CEPHALOZIEÆ (Lat.), n. f. pl. Se2f(ke2f)-a2l(a3l)-o(o2)-zi-(zi2)'e2-e(a3-e2). Of Dumortier, a subtribe of the *Jungermannieæ.* [B, 170.]

CEPHALOZOA (Lat.), n. n. pl. Se2f(ke2f)-a2l(a3l)-o(o2)-zo'a3. From κεφαλή, the head, and ζῶον, a living creature. Ger., *Kopfthiere.* Animals having a distinct head. [L, 81.]

CEPHALULA (Lat.), n. n. pl. Se2f(ke2f)-a2l(a3l)'u2l(u4l)-a3. Larvæ in which a cephalic region is indicated. [L, 342.]

CEPHALULCUS (Lat.), n. m. Se2f(ke2f)-a2l(a3l)-u3lk(u4lk)'-u3s(u4s). From κεφαλή, the head, and ἕλκειν, to drag. Fr., *céphalulcus.* Ger., *Kopfauszieher.* A fillet for extracting the fœtal head. [A, 322; L, 81.]

CEPHALUM (Lat.), n. n. Se2f(ke2f)'a2l(a3l)-u3m(u4m). See CAPITULUM.

CEPHALURODEA (Lat.), n. n. pl. Se2f(ke2f)-a2l(a3l)-u2(u)-rod'e2-a3. From κεφαλή, the head, and οὐρά, a tail. Spermatozooids which have a distinct head and tail. [L, 49.]

CEPHALUROIDEUS (Lat.), adj. Se2f(ke2f)-a2l(a3l)-u2(u)-ro-(ro2)-i2d(ed)'e2-u3s(u4s). Fr., *céphaluroïde.* Having a distinct head oids and tail (said of spermatozoids). [L, 49.]

CEPHAN-MAHI (Malay), n. The *Agelæa Lamarckii.* [B, 93, 121.]

CEPHANOMYIA [Latreille] (Lat.), n. f. Se2f(ke2f)-a2n(a3n)-o(o2)-mi2(mu6)-i(e)'a3. A genus of the *Brachycera*, the larvæ of several species of which live in the nasal fossæ of the stag. [L, 49.]

CÉPHÉLIDE (Fr.), n. Sa-fa-led. See CEPHAELIS.

CÉPHÉLIDÉES (Fr.), n. pl. Sa-fa-led-a. See CEPHAELIDEÆ.

CEPHELIDIA (Lat.), n. f. Se2f(ke2f)-e2l-i2d'i2-a3. Of Rafinesque, see CEPHAELIDEÆ. [B, 170.]

CÉPHÉLIS (Fr.), n. Sa-fa-les. See CEPHAELIS.

CEPHINA (Lat.), n. n. pl. Se2f(ke2f)-i(e)'na3. A subfamily of the *Tenthredinidæ.* [L, 252.]

CÉPILLON (Fr.), n. Sa-pel-on2. The *Boletus parvulus.* [B, 105.]

CEPINI, n. Of the alchemists, vinegar. [B, 50.]

CEPOLIDÆ (Lat.), n. f. pl. Se2p(ke2p)-o2l'i2d-e(a3-e2). Fr., *cepoloïdes.* 1. A family of the *Acanthopterygii blenniiformes.* [L, 207.] 2. A family of the *Tetragonurina.* [L, 280.]

CEPPATELLO (It.), n. Che2p-pa3-te2l'lo. The *Boletus bovinus.* [B, 121.]

CEPS (Fr.), n. Se2ps. 1. See CÈPE. 2. The trunk of a tree. [L, 41.]—**C. noir.** The *Boletus æreus.* [B, 173.]—**Faux c.** The *Boletus luridus.* [B, 173.]

CEPULA (Lat.), n. f. Se2p(ke2p)-u2(u)'la3. Gr., κέπουλα (1st def.). 1. An old term for large myrobalans. [Myrepsus (B, 200).] 2. The *Allium fistulosum.* [B, 121.]

CEPURICA (Lat.), n. n. pl. Se2p(kap)-u2r(ur)'i2k-a3. Gr., κηπουρικά (from κῆπος, a garden). Pot-herbs. [B, 88.]

CER (Ger.), n. Tse2r. Cerium. [B.]—**C'nitrat.** Cerium nitrate. [B, 270.]—**C'oxyd.** Ceric oxide. [B, 270.]—**C'oxydul.** Cerous oxide. [B, 270.]—**C'oxydulhydrat.** Cerous hydroxide. [B, 270.]—**C'salz.** A salt of cerium. [B, 270.]—**Oxalsaures C'oxydul.** Cerium oxalate. [B, 270.]—**Phosphorsaures C'oxydul.** Cerous phosphate. [B.]

CERA (Lat.), n. f. Se(ka)'ra3. Fr., *cire* (1st def.), *cère* (2d def.). Ger., *Wachs* (1st def.), *Wachshaut* (2d def.). It., Sp., *c.* 1. Wax; beeswax; the official title in many pharmacopœias. [B.] 2. See CERE.—**Butyrum ceræ.** A thick oil obtained by distilling wax. [B, 119.]—**C. alba** [U. S. Ph., Br. Ph.]. Fr., *cire blanche.* Ger., *weisses Wachs.* It., *c. bianca.* Sp., *c. blanca.* Beeswax bleached by exposure to the air. [B, 5.]—**C. amarilla** (Sp.). Yellow wax. [B.] See *C. flava.*—**C. amylata.** Pulverulent wax; an excipient for pills containing oils or substances difficult to mix with water. Beeswax is cut into fine shavings, which are dried by several days' exposure. Half of the shavings is mixed in an unglazed porcelain mortar with an equal weight of dry rice-starch, the temperature not being allowed to exceed 16° C.; after powdering, the remaining shavings are incorporated, and the trituration is continued till a fine powder is obtained, which is sifted and kept in air-tight receptacles. [H. Hager, "Pharm. Ztg.," 1889, p. 431; "Am. Jour. of Pharm.," June, 1889, p. 294.]—**C. arborea.** See *Ceratum* RESINÆ *compositum.*—**C. bianca** (It.), **C. blanca** (Sp.). See *C. alba.*—**C. chinensis, C. chinese** (It.). See *Chinese* WAX.—**C. citrina.** See *C. flava.*—**C. de palma** (Sp.). The Peruvian name for the wax of the wax-palm (*Ceroxylon andicola*). [B, 19.] See *Palm*-WAX.—**C. di Carnoba** (It.). See *Carnauba* WAX.—**C. di mirto** (It.). See *Myrtle*-WAX.—**C. di Ocuba** (It.). See *Ocuba* WAX.—**C. di palma** (It.). See *Palm*-WAX.—**C. flava** [U. S. Ph., Br. Ph.]. Fr., *cire jaune.* Ger., *gelbes Wachs.* It., *c. gialla.* Sp., *c. amarilla.* Yellow wax; beeswax not blanched. [B, 5.]—**C. fossile** (It.). Fossil wax. [B.]—**C. gialla** (It.). See *C. flava.*—**C. giapponese** (It.). See *Japan* WAX.—**C. inaurata.** Fr., *cérat doré.* A preparation official, in the Brunswick Ph., 1777, made of 10 parts of yellow wax, 3 parts, each, of red lead and sulphate of zinc, and 1 part each of cupric oxide, verdigris, and borax. It was applied to corns. [B, 119 (a, 21).]—**C. japonica.** See *Japanese* WAX.—**C. nigra.** Ger., *Schwarzwachs.* A mixture of 5 parts of litharge and 20 of Japanese wax, heated together and then melted with 75 of yellow wax, and mixed with 2 each of soot and Venice turpentine. [B, 270.]—**C. rubra.** Wax mixed with red lead and cinnabar. [B, 270.]—**C. viridis.** See *Ceratum* ÆRUGINIS.—**Emplastrum ceræ** [Swed. Ph., Belg., Ph.]. See *Ceratum* RESINÆ. [B, 95 (a, 21).]—**Emplastrum ceræ terebinthinum** [Finn. Ph.]. See EMPLASTRUM *citrinum.*—**Oleum ceræ.** Fr., *huile de cire.* Oil of wax; cerelæon. The oil obtained by rectifying the butyrum ceræ; official in many of the older pharmacopœias. [B, 119.]—**Unguentum ceræ.** Ointment of wax; made of 4 parts of white wax, 3 of spermaceti, and 1 part of olive oil, melted over a gentle fire and stirred constantly until it grows cold. [L, 104.] Cf. CERATUM.

CERABRANCHIA (Lat.), n. n. pl. Se2r(ke2r)-a3-bra2n2k-(bra3n2ch2)'i2-a3. A suborder of the *Gymnobranchiata.* [L, 282.]

CERACEÆ [Klotzch] (Lat.), n. f. pl. Se(ka)-ra(ra3)'se2(ke2)-e(a3-e2). Fr., *céracées.* A division of orchids (*Opercularieæ*), comprising the subdivisions *Vandeæ, Epidendreæ,* and *Malaxideæ.* [B, 170.]

CÉRACÉE (Fr.), n. Sa-ra3-sa. In Switzerland, a sort of milk food or diet. [L, 42.]

CERACEOUS, adj. Se-ra'shu3s. Lat., *ceraceus.* Fr., *céracé.* Ger., *wachsartig.* It., *ceraceo.* Sp., *ceráceo.* Waxen; waxlike; of the consistence or appearance of wax. [B, 116, 121, 123.]

CERADIA [Lindley] (Lat.), n. f. Se2r(ke2r)-a(a3)'di2-a3. Fr., *céradie, céradia.* Ger., *C.* See OTHONNA.—**C. furcata** [Lindley]. See under OTHONNA.—**C. resin.** Ger., *C'harz.* The resin of *C. (Othonna) furcata.* [B, 270.]

CERÆA (Lat.), n. Se2r(ke2r)-e'(a3'e2)-a3. Gr., κεραία. An old term for a horn of the uterus. [A, 322.]

CERAGO, n. Se-ra'go. See *Bee*-BREAD.

CERAIA (Lat.), n. f. Se2r(ke2r)-a(a3)'i2-a3. Fr., *céraïa, céraja, céraie.* Of Loureiro, a genus of orchids now referred to *Dendrobium.* [B, 42.]—**C. simplicissima** [Loureiro]. An imperfectly known species of China and Cochin-China, used by the native physicians in nervous prostration and epilepsy. [B, 180.]

CERAIN, n. Se'ra3-i2n. Fr., *céraine.* Of the older chemists, a non-saponifiable body produced, along with margaric acid, by the action of caustic potash on cerin. [Gmelin (B).]

CÉRAISTE (Fr.), n. Sa-ra3-est. See CERASTIUM.

CERAITIS (Lat.), n. f. Se2r(ke2r)-a3-i(e)'ti2s. Gen., *cerait'idos (-is).* Gr., κεραῖτις. An herb, perhaps fenugrec. [Dioscorides (B, 115).]

CERAJA (Lat.), n. f. Se2r(ke2r)-a(a3)'ja3(ya3). See CERAIA.

CERAMB-ELIXIR (Ger.), n. Tsa-ra3mb'a-li2x-er. The alcoholic distillate obtained from the glutinous liquid exuding from the *Cerambyx moschatus.* [B, 180.]

CERAMBYCIDÆ (Lat.), **CERAMBYCINÆ** (Lat.), **CERAMBYCINII** (Lat.), n's f. pl., f. pl., and m. pl. Se2r(ke2r)-a2m-(a3m)-bi2s(bu6k)'i2d-e(a3-e2), -bi2(bu6)-sin(ken)'e(a3-e2), -si2n(ken)'i2-i(e). Fr., *cérambycidées.* Ger., *Bockkäfer.* 1. A family of the *Longicornia.* [L, 121.] 2. See LONGICORNIA.

CERAMBYX (Lat.), n. m. Se2r(ke2r)-a2m'a3m)'bi2x(bu6x). Gen., *ceram'bycis.* A genus of *Cerambycidæ.* [L, 180.]—**C. mos-**

chatus [Linnæus]. Ger., *Bisamschröter, Moschusbockkäfer.* Syn.: *Callichroma moschata* [Latreille]. A species found upon willows. It has a strong musk-like odor, dependent apparently upon a glutinous liquid which exudes from the anus when the animal is irritated. Distilled with alcohol, this liquid forms an elixir which is said to be useful as a stomachic tonic and nervine. The insect itself is often mistaken for the Spanish fly. [B, 180.]

CERAMEÆ (Lat.), n. f. pl. Se²r(ke²r)-am(a³m)'e²-e(e²-e²). Fr., *céramées.* Ger., *Cerameen.* Of Lindley, a suborder of the *Ceramiaceæ*, comprising *Ceramium*, etc., and corresponding to the *Ceramieæ* of Agardh. [B, 170.]

CERAMIACEÆ (Lat.), n. f. pl. Se²r(ke²r)-a²m(a³m)-i²-a(a³)'-se²(ke²)-e(a³-e²). Fr., *céramiacées.* Ger., *Ceramiaceen.* Of Harvey, Lindley, and others, an order or division of *Algæ* corresponding in general to the *Ceramieæ* of J. Agardh. According to some, it is made co-ordinate with the whole order *Florideæ* (*Rhodospermeæ*); according to Berkeley, Cohn, and others, it constitutes a division of that order. According to Berkeley, it includes those genera of the *Gongylospermeæ* in which the capsular fruit (spore-case) is either naked or invested with a whorl of threads. [B, 19, 75, 121.]

CERAMIACEOUS (Lat.), adj. Se²r-a²m-i²-a'shu³s. Lat., *ceramiaceus.* Fr., *céramiacé.* Of or resembling the *Ceramium*; belonging to the *Ceramiaceæ*. [B.]

CERAMIARIÆ (Lat.), n. f. pl. Se²r(ke²r)-a²m(a³m)-i²-a(a³)'-ri²-e(a³-e²). Fr., *céramiaires.* Of Bory, an order of the *Hydrophyta articulata*, comprising *Ceramium*, etc. [B, 170.]

CERAMICE (Lat.), n. f. Se²r(ke²r)-a²m(a³m)'i²-se(ka). Gr., κεραμική. Potter's clay. [Hippocrates (B, 200).]

CERAMIDEÆ (Lat.), n. f. pl. Se²r(ke²r)-a³-mi²d'e²-e(a³-e²). Fr., *céramidées.* Of Dumortier and of Gray, a division of the *Thalassiophyta*, comprising *Bulbochæte, Ectocarpus, Ceramium, Batrachospermum*, and other genera now placed in different orders. [B, 170.]

CERAMIDIUM (Lat.), n. n. Se²r(ke²r)-a³-mi²d'i²-u³m(u⁴m). Gr., κεραμίδιον. Fr., *céramide, kéramide.* Agardh's name for a variety of fructification found in various *Rhodospermeæ* (*Florideæ*), consisting of a conical or globose-ovate capsule usually opening by a pore at the summit, and inclosing spores (usually four-parted to form tetraspores) which are inserted at the bottom of a membranous pericarp. [B, 19, 121.]

CÉRAMIE (Fr.), n. Sa-ra³-me. See CERAMIUM.

CERAMIEÆ (Lat.), n. f. pl. Se²r(ke²r)-a²m(a³m)-i(i²)'e²-e(a³-e²). Fr., *céramiées.* Ger., *Ceramieen.* Of Bonnemaison, a section of the *Hydrophyta loculata*; of Agardh, a division of *Confervoideæ* or order of *Algæ*, comprising *Ceramium*, etc. It consists of genera which are usually monosiphonous and filiform or are simpler in their structure than other *Florideæ*, approaching the *Confervaceæ* in this regard. [B, 75, 121, 170.]

CERAMINEÆ (Lat.), n. f. pl. Se²r(ke²r)-a²m(a³m)-i²n'e²-e-(a³-e²). Fr., *céraminées.* Of Dumortier, a family of the *Acinia*, consisting of *Ceramium.* [B, 170.]

CERAMIS (Lat.), **CERAMITIS** (Lat.), n's f. Se²r(ke²r)'a²m-(a³m)-i²s, se²r(ke²r)-a²m(a³m)-i(e)'ti²s. Gr., κεραμίς, κεραμῖτις. See CERAMICE.

CERAMIUM (Lat.), n. n. Se²r(ke²r)-a(a³)'mi²-u³m(u⁴m). Gr., κεράμιον. Fr., *céramie, céramion.* Ger., *Gliederalge* (2d def.). 1. A jar; also a measure containing about nine gallons. 2. Of Adanson, a genus of *Algæ*, of the order *Ceramieæ*. 3. Of Blume, a genus now referred to *Bragantia*. 4. Of Reinwardt, a genus of ferns. [B, 121, 200.]—**C. ægagropilum** [De Candolle]. Fr., *pelote de mer, ægagropile marine.* Syn.: *Conferva ægagropila* [Linnæus] (seu *brevissima* [Ehrenberg]), *Chloronitum ægagropilum* [Gaillon]. A species of *C.* (2d def.) found in lakes, which, either powdered or roasted, is used as a remedy for scrofula and as an anthelminthic. [B, 173.]—**C. cancellatum** [De Candolle], **C. catenatum, C. ciliatum** [Ducluz.], **C. diaphanum** [Roth]. Different species of *C.* (2d def.) occurring in Corsican moss. [B, 88, 180.] See HELMINTHOCHORTON.—**C. filum** [Roth]. The *Chorda filum.* [B, 173.]—**C. forcipatum, C. gracile.** Two species of *C.* (2d def.) occurring in Corsican moss. [B, 88.] See HELMINTHOCHORTON.—**C. helminthochorton.** Corsican moss. [B, 180.] See HELMINTHOCHORTON.—**C. helminthocortos** [Roth]. The *Gigartina helminthochortos.* [B, 173.]—**C. hirsutum** [Roth]. The *Dasya coccinea.* [B, 180.]—**C. incurvum.** A species of *C.* (2d def.) occurring in Corsican moss. [B, 88.]—**C. Loureiri** [Agardh]. A species of *C.* (2d def.) used in Japan and Cochin-China as an article of food. [B, 180.]—**C. plicatum** [Roth]. The *Gigartina plicata.* [B, 173.]—**C. plocamium** [Roth]. The *Plocamium coccineum.* [B, 173.]—**C. plumula** [Agardh], **C. rubrum** [Agardh]. Two species of *C.* (2d def.) sometimes found in Corsican moss. [B, 180.] See HELMINTHOCHORTON.—**C. scoparium** [Aut.]. The *Sphacellaria scoparia.* [B, 180.]—**C. strictum** [Roth]. The *Polysiphonia stricta.* [B, 180.]

CERAMOSPERMÆ (Lat.), n. f. pl. Se²r(ke²r)-a²m(a³m)-o-(o²)-spu⁵rm(spe²rm)'e(a³-e²). Of Tausch, a tribe of the *Umbelliferæ*, consisting of the subtribe *Coriandreæ.* [B, 121.]

CERAMURIA (Lat.), n. f. Se²r(ke²r)-a²m(a³m)-u²(u)'ri²-a³. From κέραμος, potter's clay, and οὖρον, urine. See PHOSPHATURIA.

CERANAIBA, n. In Brazil, the *Copernicia cerifera.* [B, 19.] See *Carnauba* WAX.

CERANITES (Lat.), n. m. Se²r(ke²r)-a²n(a³n)-it(et)'ez(as). Gr., κερανίτης. A sort of troche mentioned by Galen. [B, 200.]

CERANOIDES (Lat.), adj. Se²r(ke²r)-a²n(a³n)-o(o²)-i(e)'dez-(das). From κέρας, a horn, and εἶδος, resemblance. Fr., *céranoïde.* Ger., *hornähnlich.* Having branches disposed like horns (a botanical species name). [L, 180.]

CERANTHE [Reichenbach] (Lat.), n. f. Se²r(kar)-a²n(a³n)'the(tha). Fr., *céranthe.* See CERINTHE.

CERANTHEMUM (Lat.), **CERANTHEMUS** (Lat.), n's n. and m. Se²r(kar)-a²n(a³n)-the(tha)'mu³m(mu⁴m), -mu³s(mu⁴s). Gr., κεράνθημος. See *Bee*-BREAD.

CERANTHEREÆ (Lat.), n. f. pl. Se²r(ke²r)-a²n(a³n)-the(tha)'-re²-e(a³-e²). Fr., *céranthérées.* Of Reichenbach, a section of the *Alsodineæ*, comprising *Alsodeia, Ceranthera*, and two other genera since referred to *Alsodeia.* [B, 121.]

CERANTHIA (Lat.), n. n. pl. Se²r(ke²r)-a²n(a²n)'thi²-a³. A group of the *Thryptoceratæ.* [L, 301.]

CERAS (Lat.), n. n. Se(ke²)'ra²s(ra³s). Gen., *cer'atos* (*-is*). Gr., κέρας. A horn or anything of a horn-like structure. [B, 115, 200.] See also CERATA, CORNEA, and CORNU.

CERASA (Lat.), n. n., pl. of CERASUM (*q. v.*). Se²r(ke²r)'a²s-(a³s)-a³.

CERASCOME (Lat.), n. f. Se²r(ke²r)-a²s(a³s)'ko(ko²)-me(ma). Gr., κερασκόμη. The parsnip [Dioscorides (B, 115).]

CERASCOMION (Lat.), n. n. Se²r(ke²r)-a²s(a³s)-kom(ko²m)'-i²-o²n. Gr., κερασκόμιον. The wild vine or its flower. [Dioscorides (B, 115).]

CERASEA (Lat.), n. f. Se²r(ke²r)-a(a³)'se²-a³. Gr., κερασέα. The cherry-tree. [B, 115.]

CERASEÆ (Lat.), n. f. pl. Se²r(ke²r)-a(a³)'se²-e(a³-e²). Fr., *cérasées.* Of Reichenbach, a division of the *Amygdalaceæ*, consisting of the single genus *Prunus.* [B, 121, 170.]

CERASIA (Lat.), n. f. Se²r(ke²r)-a(a³)'si²-a³. Gr., κερασία. The cherry-tree. [B. 115.]

CERASIATUM (Lat.), n. n. Se²r(ke²r)-a(a³)-si²-a(a³)'tu³m-(tu⁴m). An old purgative preparation containing cherry-juice, apple-juice, and "essentia mercuriata." [A, 325.]

CERASIFERUS (Lat.), adj. Se²r(ke²r)-a²s(a³s)-i²f'e²r-u³s(u⁴s). Bearing cherries (a botanical species name). [B.] See *Prunus cerasifera.*

CERASIFORMIS (Lat.), adj. Se²r(ke²r)-a²s(a³s)-i²-fo²rm'i²s. Shaped like a cherry (a botanical species name). [B, 284.]

CERASIN, n. Se²r'a²s-i²n. Lat., *cerasinum.* Fr., *cérasine.* Ger., *C.* It., Sp., *cerasina.* A substance occurring in the gum of cherry, apricot, peach, and plum trees, and resembling bassorin in constitution and properties. [Guerin, "Ann. de chim. et de phys.," xlix, p. 248 (B).] It is said to be identical with metarabin. [B, 5.]

CERASINOSE, n. Se²r'a²s-i²n-os. A carbohydrate derived from cherry-tree gum by boiling with dilute sulphuric acid. It forms brittle hygroscopic crystals of the composition $C_6H_{12}O_6$, and, on heating with hydrochloric acid or spontaneously, is changed into the isomeric arabinose. [B, 3.]

CERASIOLA (Lat.), n. f. Se²r(ke²r)-a²s(a³s)-i(i²)'o(o²)-la³. Fr., *cérasiole.* Of Cæsalpinus, the *Tamus communis.* [B, 88, 121.]

CERASION (Lat.), n. n. Se²r(ke²r)-a(a³)'si²-o²n. Gr., κεράσιον. A cherry; also the cherry-tree. [B, 115.]

CERASIOS (Lat.), n. m. Se²r(ke²r)-a(a³)'si²-o²s. A name given by Messue to two ointments, which he called the greater and the lesser. [B, 200 (a, 21).]

CÉRASIOTE (Fr.), n. Sa-ra³-ze-ot. A remedy containing cherry-juice. [L, 41.]

CERASIUM (Lat.), n. n. Se²r(ke²r)-a(a³)'zi²(si²)-u³m(u⁴m). Gr., κεράσιον. See CERASUM.

CERASMA (Lat.), n. n. Se²r(ke²r)-a²z(a³s)'ma³. Gen., *ceras'matos* (*-is*). Gr., κέρασμα. A mixture; a mixed drink or potion, more particularly of cold and hot water. [B, 115, 200.]

CERASOS (Lat.), n. m. Se²r(ke²r)'a²s(a³s)-o²s. Gr., κερασός. The cherry-tree. [Theophrastus (B, 115).]

CERASPHORINÆ (Lat.), n. f. pl. Se²r(ke²r)-a²s(a³s)-fo²r-i(e)'ne(na³-e²). A subfamily of the *Cerambycidæ.* ["Proc. of the Zool. Soc.," 1866, p. 228 (L).]

CERASPHORIUM (Lat.), n. n. Se²r(ke²r)-a²s(a³s)-fo(fo²)'ri²-u³m(u⁴m). From κέρας, a horn, and φορεῖν, to bear. Fr., *cérasphore.* Ger., *Hornträger.* Of Illiger, an apophysis of the frontal bone in the mammals, forming the basis of the horn. [L, 180].

CERASSUM (Lat.), n. n. Se²r(ke²r)-a²s(a³s)'su³m(su⁴m). See CERASUM.

CERASSUS (Lat.), n. f. Se²r(ke²r)-a²s(a³s)'su³s(su⁴s). See CERASUS.

CÉRASTE (Fr.), n. Sa-ra²st. See CERASTES and CERASTIUM.

CERASTES (Lat.), n. m. Se²r(ke²r)-a²st(a³st)'ez(as). Gr., κεράστης. Fr., *céraste.* A certain venomous serpent formerly used medicinally. [L, 94.]

CERASTIEÆ (Lat.), n. f. pl. Se²r(ke²r)-a²s(a³s)-ti(ti²)'e²-e-(a³-e²). Fr., *cérastiées.* Of Reichenbach, a group of the *Caryophylleæ.* [B, 121.]

CERASTIUM (Lat.), n. n. Se²r(ke²r)-a²s(a³s)'ti²-u³m(u⁴m). From κέρας, a horn, on account of the projections of the capsule in some species. Fr., *céraste, céraiste.* Mouse-ear chickweed; of Linnæus, a genus of caryophyllaceous plants of the tribe *Alsineæ.* [B, 19, 42, 121.]—**C. aquaticum** [Linnæus]. A perennial European herb, used as food in time of scarcity. [B, 173.]—**C. arvense** [Linnæus]. A perennial herb common throughout Europe and the United States, said to be used as a food in time of scarcity. [B, 173.] The flowers—*flores holostei caryophyllei* (seu *auriculæ muris albæ*)—were formerly employed medicinally, but appear to be inactive. [B, 180.]—**C. glomeratum** [Thuillier], **C. obscurum** [Chaub.], **C. obtusifolium** [Lamarck], **C. ovale** [Persoon]. Spe-

cies either identical with *C. vulgatum* or, at least, resembling it in character and properties. [B, 173.]—**C. tomentosum, C. triviale.** A species variously called Jerusalem star, snow-in-summer, snow-plant, and wooly mouse-ear chickweed. [B, 279.]—**C. umbellatum** [Hooker]. See HOLOSTEUM *umbellatum.* [B, 180.]—**C. viscosum** [Curtis]. A perennial species of the United States; probably of the same properties as *C. arvense.* [B, 34, 173.]—**C. vulgatum** [Vaillant]. Fr., *mouron d'allouette.* An annual species of Europe and the United States, said to be used like *C. arvense.* [B, 34, 173.]

CERASUM (Lat.), n. n. Se^{2}r(ke^{2}r)'a^{2}s(a^{3}s)-u^{3}m(u^{4}m). Gr., *κεράσιον.* A cherry; the fruit of *Prunus cerasus.* [B.]—**Amygdalæ cerasorum.** Fr., *noyaux de cerises.* Ger., *Kirschkerne.* Cherry-kernels. They yield a volatile oil which contains a slight amount of hydrocyanic acid. [B, 180.]—**Aqua cerasorum** [Greek Ph., Swiss Ph.]. According to the Greek Ph., a preparation made by distilling 8 parts of a mixture of 1 part of dried sour cherries and 16 or 20 parts of water; according to the Swiss Ph., a mixture of 1 part of the aqua laurocerasi and 19 parts of distilled water. The preparation of the latter pharmacopœia contains 5 parts of hydrocyanic acid in 100,000 parts, and corresponds to the *aqua amygdalarum amararum diluta* (*q. v.*). [B, 95.]—**Aqua cerasorum amygdalata.** See *aqua* AMYGDALARUM *amararum.*—**Aqua cerasorum nigrorum.** Fr., *hydrolat de cerises noires.* A preparation, official in many European pharmacopœias, made by distilling 1 part of a mixture of 1 part of crushed black cherries (with their stones) and 4 parts of water; or, according to some pharmacopœias, by distilling 2 parts of a mixture of 3 parts of cherry-stones and 24 of water. [B, 119 (*a*, 21).] Cf. *Aqua cerasorum.*—**Aqua cerasorum nigrorum alcoholica.** Syn.: *Aqua pruni avium alcoholica.* A preparation, official in many European pharmacopœias, made by expressing the juice of any quantity of black cherries, crushing the stones and putting them into a barrel with the expressed fruit, letting the mass ferment until it has acquired a vinous smell, then distilling over a water-bath. [B, 119 (*a*, 21).]—**Cerasa acida** [Pruss. Ph., 6th ed., Gr. Ph.]. Fr., *cerise* [Fr. Cod.]. Sp., *guindo* [Sp. Ph.]. Sour cherries; especially the morello, or the fruit of the variety *austera* of the *Prunus cerasus.* [B, 108, 180.]—**Cerasa acida nigricantia,** etc. [J. Bauhin, Ray]. The morello; the fruit of the variety *austera* of the *Prunus cerasus.* [B, 200.]—**Cerasa alba dulcia** [Bauhin]. The fruit of a variety of the *Prunus cerasus.* [B, 211.]—**Cerasa dulcia.** See *Cerasa nigra.* [B, 180.]—**Cerasa Judæorum.** Fr., *cerises de Juif.* Ger., *Judenkirsche.* The fruit of the *Physalis alkekengi.* [B, 180.]—**Cerasa nigra.** Black cherries; the small black fruit of one variety of the *Prunus avium.* It was the kind ordinarily employed for medicinal preparations and also in the manufacture of cherry-brandy (*spiritus cerasorum*) and *Kirschwasser.* [B, 180.]—**Cerasa rubra, Cerasa sativa.** Red cherries; the ripe fruit of the *Prunus cerasus.* [L, 84.]—**Cerasa sativa majora** [Bauhin]. The fruit of the variety *bigarella* of the *Prunus cerasus.* [B, 211.]—**Nuclei cerasorum.** See *Amygdalæ cerasorum.*—**Spiritus cerasorum.** Ger., *Kirschgeist.* Cherry-brandy; an alcoholic liquor obtained by the fermentation and distillation of cherries. [B, 180.] See *Aqua cerasorum nigrum alcoholica.*—**Stipites cerasorum.** Cherry-stalks; sometimes used as a diuretic and sedative. [B, 180.]—**Succus cerasorum.** See *Suc de* CERISE.—**Syrupus cerasorum** [Ger. Ph.]. Fr., *sirop de cerise* [Fr. Cod.]. Ger., *Kirschensyrup.* Sp., *jarabe de cerezas.* A preparation made by bruising black cherries (*cerasa nigra*) with their seeds, setting them aside in a covered vessel at a temperature of about 20° C., until the filtrate, after straining, yields a clear liquid with alcohol, then filtering, and to 35 parts of the filtered juice adding 65 of sugar [Ger. Ph.]. The Fr. Codex directs that to the filtered juice of cherries sufficient sugar be added to make a syrup of a sp. gr. of 1·33. [B, 133, 205.]

CERASUS (Lat.), n. f. Se^{2}r(ke^{2}r)'a^{2}s(a^{3}s)-u^{3}s(u^{4}s). For deriv., see CERASOS. Fr., *cerisier.* Ger., *Kirschbaum.* It., *ciriegio.* Sp., *cerezo.* 1. A cherry. 2. The cherry-tree (*Prunus c.*); of Jussieu, a genus of amygdalaceous trees, including the cherry-tree, made out of the Linnæan genus *Prunus,* to which it is again referred by modern authors. [B, 42, 214.]—**Aqua cerasorum** [Ger. Ph., 1872]. See *Aqua* AMYGDALARUM *diluta.*—**Baccæ cerasi racemosæ.** The fruit of the *Prunus padus.* [B, 180.]—**C. acida** [Gärtner]. The *Prunus c.* [B, 180, 287.]—**C. acida nigricans.** The morello; the variety *austera* of *Prunus c.* [B, 180.]—**C. acida rubella** [J. Bauhin]. The *Prunus c.* [B, 200.]—**C. acidissima sanguineo succo** [Bauhin]. See *C. acida nigricans.*—**C. americana** [Hooker and Arnott]. The variety *β mollis* of the *Prunus americana.* [B, 280.]—**C. anglica.** A variety of the *Prunus avium.* [B, 200.]—**C. austera.** See *C. acida nigricans.*—**C. avium** [Loiseleur]. The *Prunus avium.* [B, 180, 212.]—**C. avium macrocarpa.** The large-fruited variety of the *Prunus avium,* comprising the varieties *duracina* and *juliana.* [B, 180.]—**C. avium microcarpa.** The small-fruited variety of the *Prunus avium,* comprising the *Prunus nigricans* and *Prunus varia* of Ehrhart. [B, 180.]—**C. avium nigra racemosa** [Ger.]. The *Prunus padus.* [B, 200.]—**C. avium racemosa** [Parkinson]. The *Prunus padus.* [B, 200.]—**C. borealis** [Michaux]. The *Prunus pennsylvanica.* [B, 286.]—**C. canadensis** [Miller]. The *Prunus canadensis,* a species no longer recognized. [B, 173, 286.]—**C. capollin** [De Candolle]. The *Prunus capuli.* [B, 60.]—**C. capricida** [Wallich]. The *Prunus undulata.* [B, 19, 212.]—**C. capronlana** [De Candolle]. The *Prunus c.* [B, 180, 214.]—**C. capuli** [Seringe]. The *Prunus capuli.* [B, 60.]—**C. caroliniana** [Michaux]. The *Prunus caroliniana.* [B, 286.]—**C. chamæcerasus** [Loiseleur]. The *Prunus chamæcerasus.* [B, 287.]—**C. chicasa** [De Candolle]. The *Prunus chicasa.* [B, 286.]—**C. demissa** [Nuttall]. The *Prunus demissa.* [B, 286.]—**C. densiflora** [Spach]. The *Prunus virginiana.* [B, 286.]—**C. depressa** [Seringe]. The *Prunus pumila.* [B, 286.]—**C. dulcis** [Gärtner]. The *Prunus avium.* [B, 180, 287.]—**C. duracina** [De Candolle]. The variety *duracina* of the *Prunus avium.* [B, 287.]—**C. emarginata** [Douglas]. The *Prunus emarginata.* [B, 228, 286.]—**C. fimbriata** [Spach]. The *Prunus virginiana.* [B, 286.]—**C. foliis ovatis.** The *Prunus mahaleb.* [B, 211.]—**C. foliis ovato-lanceolatis.** The *Prunus c.* [B. 211.]—**C. folio laurino** [Bauhin]. The *Prunus lauro-cerasus.* [B, 211.]—**C. fructu acido serotino, succi sanguinei** [Tournefort]. See *C. acida nigricans.*—**C. fruticosa** [Borckhausen]. The *Prunus chamæcerasus.* [B, 173.]—**C. glauca** [Mönch]. The *Prunus pumila.* [B, 173.]—**C. hiemalis** [Seringe]. The variety *β mollis* of the *Prunus americana.* [B, 286.]—**C. hortensis flore pleno** [Bauhin]. A variety of *Prunus c.* [B, 211.]—**C. humilis** [Host.]. The *Prunus chamæcerasus.* [B, 287.]—**C. ilicifolius** [Nuttall]. The *Prunus ilicifolia.* [B, 286.]—**C. juliana** [De Candolle]. The variety *juliana* of the *Prunus avium.* [B, 287.]—**C. lauro-cerasus** [Loiseleur]. The *Prunus lauro-cerasus.* [B, 180.]—**C. lusitanica** [De Candolle]. The *Prunus lusitanica.* [B, 214.]—**C. mahaleb** [Miller]. The *Prunus mahaleb.* [B, 180.]—**C. major fructu subdulci,** etc. [Bauhin]. The *Prunus avium.* [B, 211.]—**C. marasca, C. marasqua.** A species probably to be regarded as a variety of *Prunus avium.* [B, 173, 180.]—**C. micrantha** [Spach]. The low, small-flowered variety of the *Prunus virginiana.* [B, 286.]—**C. nana** [Desfontaines]. A variety of the *Prunus avium.* [B, 173.]—**C. nigra** [Loiseleur, Seringe]. 1. Of the pharmacists, the black cherry, a variety of the *Prunus avium.* 2. Of Loiseleur and Seringe, the *Prunus americana.* [B, 173, 200, 286.]—**C. obovata** [Beck]. The *Prunus virginiana.* [B, 284.]—**C. occidentalis** [Loiseleur]. The *Prunus occidentalis.* [B, 19, 282.]—**C. padus** [De Candolle]. The *Prunus padus.* [B, 287.]—**C. penis.** See GLANS *penis.*—**C. pennsylvanica** [Aiton]. The *Prunus pennsylvanica.* [B, 228.]—**C. pubescens** [Seringe]. The pubescent variety of the *Prunus maritima.* [B, 286.]—**C. pumila** [Michaux]. 1. Of Michaux, the *Prunus pumila* [Linnæus]. 2. Of Baumgarten, the *Prunus chamæcerasus.* [B, 173, 286.]—**C. pygmæa** [Lioseleur]. The *Prunus maritima.* [B, 286.]—**C. racemosa quibusdam,** etc. [Bauhin], **C. racemosa silvestris** [Jons.], **C. racemosa silvestris, fructu non eduli** [Bauhin]. The *Prunus padus.* [B, 200, 211.]—**C. rubra.** A pharmaceutical term for the red cherry (*Prunus c.*). [B, 200.]—**C. sativa** [Jons.], **C. sativa fructu rotundo,** etc. [Tournefort], **C. sativa rotunda rubra et acida** [Bauhin]. The *Prunus c.* [B, 200, 211.]—**C. semperflorens** [De Candolle]. The *Prunus serotina* [Ehrhart]. [B, 88, 173.]—**C. serotina.** 1. Of De Candolle, the *Prunus serotina* [Ehrhart]. 2. Of Loiseleur, perhaps the *Prunus virginiana.* [B, 286.]—**C. silvestris** [Gronovius]. The *Prunus serotina* [Ehrhart]. [B, 286.]—**C. silvestris amara, mahaleb putata** [Bauhin]. The *Prunus mahaleb.* [B, 211.]—**C. silvestris, fructu nigro et rubro** [Bauhin]. The *Prunus avium.* [B, 211.]—**C. silvestris mahaleb** [Mont.]. The *Prunus mahaleb.* [B, 200.]—**C. silvestris septentrionalis anglica, fructu rubro parvo serotino** [Ray]. The *Prunus avium.* [B, 211.]—**C. trapezuntina** [Bellardi]. The *Prunus lauro-cerasus.* [B, 173.]—**C. undulata.** The *Prunus undulata.* [B, 212.]—**C. virginiana** [Michaux, Hooker]. The *Prunus serotina* [Ehrhart]. [B, 284.]—**C. vulgaris** [Miller]. The *Prunus c.* [B, 200.]—**Cortex cerasi racemosæ.** The bark of *Prunus padus.* [B, 180.]—**Fructus cerasi** (seu **cerasi acidæ**). The fruit of *Prunus c.* [B, 108.]—**Fructus cerasorum acidorum.** See CERASA *acida.*—**Fructus cerasorum nigrorum.** See CERASA *nigra.*—**Gummi cerasorum.** Ger., *Kirschharz, Kirschgummi.* The gum which flows from the trunks and branches of cherry-trees. It contains cerasin. [B, 180.]—**Nuclei cerasorum.** See under CERASUM.—**Stipites cerasorum.** See under CERASUM.—**Succus e fructu cerasi** (Fr. Cod.). See *Suc de* CERISE.

CERAT (Ger.), n. Tsa-ra^{3}t'. See CERATE and CERATUM.—**C'-papier.** See CHARTA *cerata.*—**Braunes C.** See CERATUM *fuscum.*—**C'salbe.** The unguentum cereum of the Ger. Ph. [B, 205 (*a*, 21).]—**Gelbes C.** See CERATUM *citrinum.*

CÉRAT (Fr.), n. Sa-ra^3. See CERATE and CERATUM.—**C. adhésif.** See *Ceratum* RESINÆ. [B, 119 (*a*, 21).]—**C. amidonné.** A cerate of 10 parts of starch and 8, 15, or 30 of ceratum Galeni. [B, 92; L, 88.]—**C. ammoniacal.** See *Ammoniacal* CERATE.—**C. anodin.** See *Emplastrum* SEBI *anodynum.*—**C. antiseptique** [Fr. Cod., 1837]. A preparation made by mixing 1 part of the alcoholic extract of Peruvian bark dissolved in a little alcohol with 8 parts of ceratum Galeni. [B, 119 (*a*, 21).]—**C. arsénical.** See *Ceratum* ARSENICI.—**C. astringent.** An astringent cerate; a generic term including such moderately astringent preparations as *ceratum plumbi,* the *c. de Rhazès,* and the more astringent cerates containing salts of aluminium and zinc (*e. g.,* the *c. de Hufeland*). [B, 46 (*a*, 21).]—**C. avec la graisse cantharidée.** The *pommade épispastique jaune.* [B, 119.] See *Unguentum* CANTHARIDIS.—**C. avec l'huile cantharidée.** Cerate of cantharides made with an infusion of cantharides in olive-oil. [B, 119.] See *Ceratum* CANTHARIDIS.—**C. belladoné.** A preparation made of ceratum Galeni and one tenth its weight of extract of belladonna [Fr. Cod., 1837]. [B, 92 (*a*, 21).]—**C. blanc.** See CERATUM *Galeni.*—**C. calaminaire.** The ceratum calaminæ. [B, 92 (*a*, 21).] See *Ceratum* ZINCI *carbonatis.*—**C. calmant.** See *Ceratum cum* LAUDANO.—**C. calmant de Roux de Brignoles.** A cerate made by replacing the rose-water in ceratum Galeni with cherry-laurel water. [B, 46, 92 (*a*, 21).]—**C. camphré** ["Form. of the Paris Hosp.," 1839]. A mixture of 1 part of camphor and 10 parts of ceratum Galeni. [B, 119.] See *Ceratum* CAMPHORÆ.—**C. cantharidé.** See *Ceratum* CANTHARIDIS.—**C. commun.** The ceratum commune. [B.] See CERATUM *flavum.*—**C. composé.** A compound cerate; usually made by adding medicinal substances to ceratum Galeni. [A, 301.]—**C. cosmétique.** See COLD-CREAM.—**C. cyanhydrique.** A mixture of 60 parts of ceratum Galeni and 1 part of medicinal (1-per-cent.) hydrocyanic acid. [B, 46.]—**C. de Falck.** See CERATUM *mercuriale Falckii.*—**C. de Galien** [Fr. Cod.]. See CERATUM *Galeni.*—**C. de Goulard** [Fr. Cod.]. See *Ceratum* PLUMBI *subacetatis.*—**C. de Hufeland.** A preparation official in the Dutch Ph., 1805 (Niemann's ed.), made of 1 part each of flowers of zinc and lycopodium, and 16 parts of simple cerate. It is used for ulcerated

nipples, moist ringworms, and obstinate itch. [B, 119 (α, 21).]—**C. de Rhazès.** A cerate containing subcarbonate of lead. [B, 46 (α, 21).] See *Unguentum* PLUMBI *carbonatis*.—**C. de Réchoux.** See *Ammoniacal* CERATE.—**C. dessiccatif.** See CERATUM *exsiccans*.—**C. doré.** See CERA *inaurata*.—**C. épulotique.** See *Unguentum* ZINCI *oxidi*.—**C. jaune** [Fr. Cod.]. See CERATUM *flavum*.—**C. labial.** See *Ceratum* CETACEI *rubrum* and CERATUM *labiale*.—**C. laudanisé** [Fr. Cod.]. See *Ceratum cum* LAUDANO.—**C. mercuriel.** See *Unguentum* HYDRARGYRI *oxidi rubri*.—**C. mercuriel opiacé.** A cerate made up of equal parts of unguentum mercuriale and ceratum cum extracto opii; used for dressing indolent syphilitic ulcers. [B, 46 (α, 21).]—**C. narcotico-balsamique.** See *Emplastrum opii*.—**C. noir.** 1. See *Emplastrum* PICIS. 2. A preparation made of 4 parts of white wax and 12 of olive-oil melted and mixed with 2 parts of pulverized burnt cork and 1 part each of washed sulphur and pulverized antimonium crudum; used for eczema [Fr. Cod., 1837]. [B, 92 (α, 21).]—**C. oléo-résineux.** See *Oleoresinous* CERATE.—**C. ophthalmique.** 1. See UNGUENTUM *ophthalmicum*. 2. A preparation made up of 18 parts of ceratum Galeni and 1 part each of powdered red precipitate and pulverized camphor; used in cases of moderately acute ophthalmia. [B, 92, 119 (α, 21).]—**C. opiacé.** See *Ceratum cum* OPIO.—**C. ordinaire.** See CERATUM *Galeni*.—**C. pour les lèvres.** See CERATUM *ad labia*.—**C. rouge, C. rouge camphré.** See *Emplastrum* MINII *rubrum*.—**C. sans eau.** See CERATUM (2d def.).—**C. saturné** [Fr. Cod.]. See *Ceratum* PLUMBI *subacetatis*.—**C. simple** [Fr. Cod.]. See CERATUM (2d def.).—**C. soufré.** Lat., *ceratum sulphuratum* (seu *e sulphure*, seu *sulfuratum*). A preparation made of 2 parts of flowers of sulphur, 7 parts of ceratum Galeni [Fr. Cod., 1837] (or 10 parts [Fr. Cod., 1866]), and 1 part of oil of sweet almonds [Fr. Cod., 1837] (or 2 parts [Fr. Cod., 1866]). [B, 93, 119 (α, 21).]—**C. tonique.** A preparation made up of 8 parts of calisaya and 25 of ceratum Galeni; used for burns and wounds. [B.] Cf. *C. de* QUINQUINA.—**C. vésicant.** See *Ceratum* CANTHARIDIS.—**C. vésicant camphré.** Camphorated blistering cerate. [B, 119.] See under *Emplastrum* CANTHARIDUM *camphoratum*.

CERATA (Lat.), n. n., pl. of *ceratum* and of *ceras* (*q. v.*). Se^{2}r-(kar)-a(a^3)'ta^3, se^{2}r(ke^{2}r)'a^{2}t(a^{3}t)-a^3. 1. (Pl. of *ceratum*) cerates. 2. (Pl. of *ceras*) the papilliform processes on the dorsal surface of certain *Mollusca*. [L, 121.]

CERATAPTERINA (Lat.), n. n. pl. Se^{2}r(ke^{2}r)-a^{2}t (a^{3}t)-a^{2}p-(a^{3}p)-te^{2}r-i(e)'na^3. A group of the *Myliobatidæ*. [L, 280.]

CERATASPIDÆ (Lat.), n. f. pl. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-a^{2}s(a^{3}s)'-pi^{2}d-e(a^3-e^2). A family of the *Decapoda macrocera*. [L, 240.]

CERATE, n. Se'rat. Gr., κηρωτόν (from κηρός, wax). Lat., *ceratum*, *cerotum*. Fr., *cérat*, *céréolé*. Ger., *Cerat*, *Wachssalbe*. It., *cerotto*, *cerato*. Sp., *cerato*. 1. Generically, a pharmaceutical preparation consisting of a mixture of oil or lard with wax, and used either alone or as a basis for the application of medicines. For the wax, resin or spermaceti is frequently substituted, although, properly, the term c. embraces only preparations made with wax. 2. Specifically, of the U. S. Ph., simple c. See CERATUM (2d def.). [B.]—**Ammoniacal c.** A preparation made of 1 part of ammonium carbonate and 2 parts of simple c.; a derivative and rubefacient. [B, 92 (α, 21).]—**Anodyne c.** See *Ceratum cum* LAUDANO.—**Arsenical c.** See *Ceratum* ARSENICI.—**Belleville's c.** See *Unguentum* HYDRARGYRI *nitrico-oxydi*.—**Blistering c.** See *Ceratum* CANTHARIDIS.—**Camphorated blistering c.** See under *Emplastrum* CANTHARIDUM *camphoratum*.—**Camphorated c.** See CÉRAT *camphré* and CERATUM *camphoratum*.—**Citrine c.** See *Ceratum* HYDRARGYRI *nitratis*.—**Common c.** Lat., *ceratum commune* [Belg. Ph.]. Fr., *cérat commun*. It., *cerato commune*. Sp., *cerato simple*. See CERATUM *flavum*.—**Cosmetic c.** Lat., *ceratum cosmeticum*. Fr., *cérat cosmétique*. See COLD-CREAM.—**Galen's c.** See CERATUM *Galeni*.—**Goulard's c.** Lat., *ceratum Goulardi*. Fr., *cérat de Goulard*. See *Ceratum* PLUMBI *compositum*.—**Hufeland's c.** A preparation made of 2 parts each of zinc oxide and lycopodium and 30 of simple cerate; used for sore nipples and slight abrasions. [L, 77 (α, 21).]—**Issue c.** See CERATUM *ad fonticulos*.—**Kirkland's (neutral) c.** A mixture of 16 parts of lead plaster, 8 parts each of olive-oil, chalk, and vinegar, and 1 part of Goulard's extract; used like ceratum plumbi subacetatis. [B, 199.]—**Marshall's c.** A mixture of 2 parts each of calomel and palm-oil (or, according to Paris, 2 of calomel and 10 of palm-oil), 1 part of lead acetate, and 4 parts of citrine ointment; used in ophthalmic practice. [L, 120 (α, 21).]—**Mercurial c.** See CERATUM *mercuriale*.—**Neutral c.** See *Kirkland's* (*neutral*) *c*.—**Oleoresinous c.** Fr., *cérat oléo-résineux*. A preparation, official in the Lond. Ph., 1837, made of 1 part each of boiled turpentine and white wax and 2 parts of olive-oil; used for slight excoriations. [B, 119 (α, 21).]—**Simple c.** Lat., *ceratum simplex*. Fr., *cérat simple*. It., *cerato semplice*. Sp., *cerato simple*. See CERATUM (2d def.).—**Touch-c.** See CERATUM *pro tactu*.—**Turner's c.** See *Ceratum* CALAMINÆ.—**White c.** See *Ceratum* CETACEI.

CERATEA (Lat.), n. f. Se^{2}r(ke^{2}r)-a(a^3)'te^2-a^3. Gr., κερατέα. The *Ceratonia siliqua*. [B, 115.]

CERATECTASIA (Lat.), n. f. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-e^{2}k-ta(ta^3)'-zi^2(si^2)-a^3. From κέρας, the cornea, and ἔκτασις, extension. Ger., *Keratektasie*. A variety of staphyloma of the cornea; any morbid prominence of the cornea in which the iris is not involved. [A, 326; B, 120.]—**C. conica.** Syn.: *ceratoconus*. A conical staphyloma of the cornea. [B, 120.] See KERATOCONUS.—**C. sphærica.** A spherical staphyloma of the cornea. [B, 120.]

CERATECTOMY, n. Se^{2}r-a^{2}t-e^{2}k'to-mi^2. See KERATECTOMY.

CERATED, adj. Se'rat-e^{2}d. Lat., *ceratus*. Covered with wax. [L, 56.]

CERATHECA (Lat.), n. f. Se^{2}r(ke^{2}r)-a^{2}th(a^{3}th)-e(a)'ka^3. From κέρας, a horn, and θήκη, a sheath. Fr., *cérathèque*. Ger., *Hornkasten*. That part of the chrysalis which covers the antennæ. [L, 41, 180.] See CERATOTHECA.

CERATIA (Lat.), n. f. sing. and n. pl. Se^{2}r(ke^{2}r)-a(a^3)'shi^2(ti^2)-a^3. Gr., κερατία (1st def.), κεράτια (2d def.). As a n. f. s., the *Ceratonia siliqua* [Strabo], and, of Adanson, the genus *Ceratonia*; as a n. n. pl., the fruit of the *Ceratonia siliqua*. [B, 115, 121, 180.]—**C. diphyllos.** See COURBARIL.

CERATIACEÆ (Lat.), **CERATIÆ** (Lat.), n's f. pl. Se^{2}r-(ke^{2}r)-a(a^3)-shi^2(ti^2)-a(a^3)'se^2(ke^2)-e(a^3-e^2), -a(a^3)'shi^2(ti^2)-e(a^3-e^2). Fr., *cératiacées*, *cératiées*. Ger., *Ceratiaceen*, *Ceratieen*. A division of the *Myxomycetes*, made by Rostafinski. [B, 54, 121.]

CERATIASIS (Lat.), n. f. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-i^2-a(a^3)'si^{2}s. See KERATIASIS.

CERATICHTHYOSIS (Lat.), n. f. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-i^{2}k(i^{2}ch^2)-thi^2(thu^6)-os'i^{2}s. Gen., *ceratichthyos'eos* (*-is*). From κέρας, the cornea, and ἰχθύς, a fish (see ICHTHYOSIS). Fr., *cératichthyose*. Ger., *Fischschuppenausschlag der Hornhaut*. Sp., *ceratictiósis*. Ichthyosis of the cornea. [C. H. Schmidt (A, 322).]

CÉRATIE (Fr.), n. Sa-ra^3-se. See CERATIA.

CERATIN, n. Se^{2}r'a^{2}t-i^{2}n. See KERATIN.

CERATINA (Lat.), n., f. of adj. *ceratinus*. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-i(e)'na^3. See LAMELLA *c.*

CÉRATINIEN (Fr.), adj. Sa-ra^3-ten-e-a^{3}n^2. See KERATOID.

CERATINUM (Lat.), n. n. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-in(en)'u^{3}m(u^{4}m). See KERATIN.

CERATINUS (Lat.), adj. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-in(en)'u^{3}s(u^{4}s). Gr., κεράτινος. Make of horn; horn-like in structure. [A, 322; B, 115, 120.] See CERATINA and CERATINUM.

CERATIO (Lat.), n. f. Se(ka)-ra(ra^3)'shi^2(ti^2)-o. Gen., *cera-tion'is*. From *cera*, wax. Fr., *cération*. 1. The act of smearing with wax. 2. In alchemy, the operation of softening a hard substance to the point of liquefaction. [B, 50, 200.]

CERATION, n. Se-ra'shu^{3}n. See CERATIO (1st def.).

CERATION (Lat.), n. n. Se^{2}r(ke^{2}r)-a(a^3)'shi^2(ti^2)-on. Gr., κεράτιον (dim. of κέρας, a horn). 1. One of the horns of the uterus [Aristotle]. 2. The fruit of the *Ceratonia siliqua* (in this sense and the preceding usually in the pl.). 3. A weight, the siliqua of the Latins = a carat; in Greek = ⅓ of an obol; in Latin the $\frac{1}{1728}$ of a pound; so called because originally formed of the seeds of the *Ceratonia*. 4. The fœnugrec. [B, 19, 115.] See also CERATIUM.

CÉRATITE (Fr.), n. Sa-ra^3-tet. See KERATITIS and CERATITES.

CERATITES (Lat.), n. m. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-it(et)'ez(as). Of Link, a name applied to certain species of *Æcidium*, parasitic upon the leaves and fruit of trees. Now refered to *Rœstelia*. [B, 19, 121.]

CERATITIS (Lat.), adj. and n. f. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-it(et)'i^{2}s. Gen., *ceratit'idis*. Gr., κερατῖτις (from κέρατον, a horn). Fr., *cératite*. 1. (Adj.) horned. 2. (N. f.): (*a*) an ancient name for a sort of poppy; the horned poppy (*Glaucium luteum*); (*b*) keratitis (*q. v.*). [B, 114, 115, 121.]

CERATIUM (Lat.), n. n. Se^{2}r(ke^{2}r)-a(a^3)'shi^2(ti^2)-u^{3}m(u^{4}m). For deriv., see CERATION (Lat.). Fr., *cération*. 1. See CERATION (Lat.). 2. An elongated, horn-shaped, slender capsular fruit; the siliquiform capsule of most authors. [B, 19, 35, 200.]

CERATO-ARYTÆNOIDEUS (Lat.), n. m. Se^{2}r(ke^{2}r)''a^{2}t-(a^{3}t)-o(o^2)-a^{2}r(a^{3}r)-i^2(u^6)-ten(ta^3-e^{2}n)-o(o^2)-i^{2}d(ed)'-e^2-u^{3}s(u^{4}s). From κέρας, a horn, and ἀρύταινα (see ARYTENOID). An anomalous muscle arising from the posterior surface of the lesser cornu of the hyoid bone, and inserted into the processus muscularis of the arytenoid cartilage. [L, 332.]

CERATOBATRACHIDÆ (Lat.), n. f. pl. Se^{2}r(ke^{2}r)''a^{2}t(a^{3}t)-o(o^2)-ba^{2}t(ba^{3}t)-ra^{2}k(ra^{3}ch^2)'i^{2}d-e(a^3-e^2). A family of the *Fermisternia*. [" Proc. of the Zool. Soc.," 1884, p. 212 (L).]

CERATOBRANCHIAL [Owen], adj. Se^{2}r''a^{2}t-o-bra^{2}n^{2}k'i^2-a^{2}l. From κέρας, a horn, and βράγχια, gills. Fr., *cératobranchial*. Pertaining to the greater cornu of the hyoid bone and to the branchiæ (said of the more elongated bent pieces, supported by the bones, which constitute the lower extremities of the branchial arches in fishes). [L, 200.] Cf. *C.* BONES.

CERATOCAMPIDÆ [Harris] (Lat.), n. f. pl. Se^{2}r(ke^{2}r)-a^{2}t-(a^{3}t)-o(o^2)-ka^{2}mp(ka^{3}mp)'i^{2}d-e(a^3-e^2). A group of the *Bombycidæ* [L, 196.]

CERATOCARPUS (Lat.), adj. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-o(o^2)-ka^{3}rp'-u^{3}s(u^{4}s). From κέρας, a horn, and καρπός, a fruit. Fr., *cératocarpe*. Having horned fruit (a botanical species name), as a n., a genus of chenopodiaceous plants. [B, 121, 214.]

CERATOCAULIS [Bernhardi] (Lat.), **CERATOCAULOS** [Reichenbach] (Lat.), n's m. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-o(o^2)-ka^{4}l'(ka^3'u^{4}l)-i^{2}s, -o^{2}s. A section of the genus *Datura*, comprising several Old-World species. [B, 42, 121.]

CERATOCELE (Lat.), n. f. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-o(o^2)-se(ka)'le-(la); in Eng., se^{2}r'a^{2}t-o-sel. See KERATOCELE.

CERATOCENTESIS (Lat.), n. f. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-o(o^2)-se^{2}nt-(ke^{2}nt)-e(a)'si^{2}s. See KERATOCENTESIS.

CÉRATOCÉPHALE (Fr.), adj. Sa-ra^{3}t-o-sa-fa^{2}l. See CERATOCEPHALUS.

CERATOCEPHALEÆ (Lat.), n. f. pl. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-o (o^2)-se^{2}f(ke^{2}f)-al(a^{3}l)'e^2-e(a^3-e^2). Fr., *cératocéphalées*. Of Reichenbach, a section of the *Ranunculeæ genuinæ*, consisting of the single genus *Ceratocephalus*. [B, 170.]

CERATOCEPHALUS (Lat.), adj. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-o(o^2)-se^{2}f-(ke^{2}f)'a^{2}l(a^{3}l)-u^{3}s(u^{4}s). From κέρας, a horn, and κεφαλή, the head. Fr., *cératocéphale*. Having a horned appendix upon the head; as a n., of Vaillant, see BIDENS; of Mönch, a genus of ranunculaceous plants, now made a section of *Ranunculus*. [B, 38, 121, 245.]

CERATOCHLOA (Lat.), n. f. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-o(o^2)-klo-(ch^{2}lo)'a^3. Fr., *cératochloé*. 1. Of Palisot-de-Beauvois, see FESTUCA. 2. Of Schrader, see BROMUS.—**C. pendula** [Schrader]. The *Bromus Schraderi* (*unioloides*). [B, 19.]

CERATOCLADIA (Lat.), n. f. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-o(o^2)-kla-(kla^3)'di^2-a^3. Of Corda, a family of hyphomycetous *Fungi*. [B, 170.]

CERATOCOCCUS [Kützing] (Lat.), n. m. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-o(o^2)-ko^{2}k'ku^{3}s(ku^{4}s). See SPHÆROCOCCUS.

CERATOCONUS (Lat.), n. m. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-o(o^2)-kon'u^{3}s-(u^{4}s). See KERATOCONUS.

CERATOCORALLIA [Ehrenberg] (Lat.), n. n. pl. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-o(o^2)-ko(ko^2)-ra^{2}l(ra^{3}l)'li^2-a^3. Fr., *cératocoraux*. Syn.: *Gorgonina*. A family of the *Octatinia*. [L, 244.]

CERATO-CRICOID, adj. Se^{2}r''a^{2}t-o-kri'koid. Lat., *cerato-cricoideus* (from κέρας, a horn, and κρικοειδής, ring-shaped). See KERATO-CRICOID; as a n., see CRICOTHYREOIDEUS *posticus*.

CERATODEITIS (Lat.), n. f. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-od-e^2-i(e)'ti^{2}s. See KERATITIS.

CERATODEOCELE (Lat.), n. f. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-od-e^2-o(o^2)-se(ka)'le(la); in Eng., se^{2}r-a^{2}t-od'e^2-o-sel. See KERATOCELE.

CERATODEONYXIS (Lat.), n. f. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-od-e-o^{2}n-i^{2}x(u^{6}x)'i^{2}s. See KERATONYXIS.

CÉRATODERMAIRES [De Blainville] (Fr.), n. pl. Sa-ra^3-to-de^{2}rm-ar. See ECHINODERMATA.

CERATODES (Lat.), adj. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-od'ez(as). Gr., κερατώδης. See CERATOIDES.

CERATODISTOS (Lat.), n. m. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-od-i^{2}st'o^{2}s. From κέρας, the cornea, and ἱστός, a fabric. The corneal tissue. [A, 322.]

CERATODITIS (Lat.), n. f. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-od-i(e)'ti^{2}s. See KERATITIS.

CERATODONTEÆ (Lat.), n. f. pl. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-o(o^2)-do^{2}nt'e^2-e(a^3-e^2). From κέρας, a horn, and ὀδούς, a tooth. Fr., *cératodontées*. A family of mosses included in the tribe *Pottiaceæ*. [B, 121.]

CERATODONTOIDEÆ [Hampe] (Lat.), n. f. pl. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-o(o^2)-do^{2}nt-o(o^2)-i^{2}d(ed)'e^2-e(a^3-e^2). From *Ceratodon*, the only genus. A family of mosses. [B, 121.]

CERATOGENESIS (Lat.), n. f. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-o(o^2)-je^{2}n-(ge^{2}n)'e^{2}s-i^{2}s. Gen., *ceratogenes'eos*(*-gen'esis*). From κέρας, a horn, and γένεσις, formation. Fr., *cératogénèse*. Ger., *Hornbildung*. The formation of horn. [A, 322.]

CERATOGLOBUS (Lat.), n. m. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-o^{2}g'lob-(lo^{2}b)-u^{3}s(u^{4}s). See KERATOGLOBUS.

CERATOGLOSSUS (Lat.), n. m. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-o^{2}g'lo^{2}s-(glos)'su^{3}s(su^{4}s). From κέρας, a horn, and γλῶσσα, the tongue. Fr., *cératoglosse*. Syn.: *deprimens linguam* [Spigelius]. That portion of the hyoglossus muscle which arises from the great cornu of the hyoid bone. [Douglas (L).]—**C. accessorius** [Sappey]. An occasional flat bundle of muscular fibres which arises from the lesser cornu and the apex of the greater cornu of the hyoid bone or from the stylo-hyoid ligament, and is inserted into the lower surface of the lower portion of the styloglossus muscle. [L, 31, 332.]—**C. externus.** In the solipeds, the styloglossus muscle of Leyh. [L, 13.]—**C. internus, C. parvus** [Brühl]. In the horse, a muscle arising from the lower extremity of the styloid bone or from the greater cornu of the hyoid, and terminating near the tip of the tongue. [L, 13.]

CERATOGONEÆ (Lat.), n. f. pl. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-o(o^2)-gon-(go^{2}n)'e^2-e(a^3-e^2). Fr., *cératogonées*. Of Meissner, a subtribe of the *Apterocarpæ*, comprising the genera *Ceratogonum* and *Emex*. [B, 121, 170, 214.]

CERATO-HYAL, adj. Se^{2}r''a^{2}t-o-hi'a^{2}l. From κέρας, a horn, and ὑοειδής, U-shaped. Fr., *cérato-hyal*. Of or pertaining to a cornu of the hyoid bone and to the hyoid bone itself; as a n., see *C.* BONE. [L, 200.]

CERATO-HYOIDEUS (Lat.), n. m. Se^{2}r(ke^{2}r)''a^{2}t(a^{3}t)-o(o^2)-hi(hu^6)-o(o^2)-i^{2}d(ed)'e^2-u^{3}s(u^{4}s). See KERATO-HYOIDEUS. — **C.-h. magnus** [Leyh]. The stylo-hyoid muscle. [L.]

CERATOIDES (Lat.), adj. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-o(o^2)-i(e)'dez(das). Gr., κερατοειδής. Resembling horn in consistence, or like a horn in shape, also sounding like a horn; as a n., the cornea (*tunica* understood), also, in botany, the genus *Ceratocarpus*. [B, 115, 121; L, 84.]

CERATOIDITIS (Lat.), n. f. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-o(o^2)-i^{2}d(ed)-i-(e)'ti^{2}s. See KERATITIS.

CERATOIGENESIS (Lat.), n. f. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-o(o^2)-i^2-je^{2}n(ge^{2}n)'e^{2}s-i^{2}s. See CERATOGENESIS.

CERATO-IRITIS (Lat.), n. f. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-o(o^2)-i(e)-ri-(re)'ti^{2}s. See KERATO-IRITIS.

CERATOITIS (Lat.), n. f. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-o(o^2)-i(e)'ti^{2}s. See KERATITIS.

CERATOLENUS (Lat.), adj. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-o^{2}l(ol)'e^{2}n-u^{3}s-(u^{4}s). From κέρας, a horn, and ὠλένη, the arm. Fr., *cératolène*. Ger., *hornarmig*. Having horn-like arms (said of an order of the *Acephala* having the arms articulated, and near the mouth. [L, 109, 116.]

CERATOLEUCOMA (Lat.), n. n. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-o(o^2)-lu^2-kom'a^3. See LEUCOMA.

CERATOLYSIS (Lat.), n. f. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-o^{2}l'i^2(u^6)-si^{2}s See KERATOLYSIS.

CERATOMA (Lat.), n. n. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-o'ma^3. See KERATOMA.

CERATOMALACIA (Lat.), n. f. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-o(o^2)-ma^{2}l-(ma^{3}l)-a(a^3)'si^2(ki^2)-a^3. See KERATOMALACIA.

CERATOMALAGMA (Lat.), n. n. Se(ka)-ra^{2}t(ra^{3}t)-o(o^2)-ma^{2}l-(ma^{3}l)-a^{2}g(a^{3}g)'ma^3. Gen., *ceratomalag'matos* (*-is*). Gr., κηρατομάλαγμα (from κηρός, wax, and μάλαγμα, an emollient plaster). See CEROTOMALAGMA.

CERATO-MANDIBULAR, adj. Se^{2}r''a^{2}t-o-ma^{2}nd-i^{2}b'u^{2}l-a^{2}r. From κέρας, a horn, and *mandibula*, a jaw. See HYO-MANDIBULAR.

CERATOMENINGITIS (Lat.), n. f. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-o(o^2)-me^{2}n(man)-i^{2}n(i^{2}n^2)-ji(ge)'ti^{2}s. Gen., *ceratomeningit'idis*. From κέρας, the cornea, and μῆνιγξ, a membrane. See KERATITIS.

CERATOMENINX (Lat.), n. f. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-o(o^2)-men-(man)'i^{2}n^{2}x. Gen., *ceratomenin'gos* (*-is*). From κέρας, the cornea, and μῆνιγξ, a membrane. Fr., *cératoméninge*. The cornea. [L, 30.]

CERATOMETAPHYTEIA (Lat.), **CERATOMETATHESIS** (Lat.), n's f. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-o(o^2)-me^{2}t-a^3-fi^{2}t(fu^{6}t)-i'(e^2'i^2)-a^3, -a^{2}th(a^{3}th)'e^{2}s-i^{2}s. From κέρας, the cornea, and μεταφυτεία, transplantation, or μετάθεσις, transposition. Fr., *transplantation de la cornée*. Ger., *Ueberpflanzung der Hornhaut*. Transplantation of the cornea. [A, 322.]

CERATOMIA (Lat.), n. f. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-o(o^2)'mi^2-a^3. From κέρας, the cornea, and τέμνειν, to cut. Ger., *Hornhautausschnitt*, *Ceratomie*. The act of cutting the cornea in a cataract operation. [L, 30.] Cf. KERATECTOMY and KERATOTOMY.

CERATONIA (Lat.), n. f. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-on'i^2-a^3. Gr., κερατωνία. Fr., *caroubier*, *carougier*, *cératonie*. Ger., *Johannisbrotbaum*. 1. Of Linnæus, a genus of leguminous trees with polygamous flowers, 5 tooth-shaped sepals, no petals, a flat peltate disc, 5 stamens with filamentous filaments and versatile anthers, and a thick-compressed, elongated, indehiscent legume. 2. The fruit of *C. siliqua*. [B, 42, 180.]—**C. siliqua** [Linnæus]. Fr., *caroubier commun*, *figuier d'Egypte*. Ger., *gemeiner Johannisbrotbaum*, *Bockshornbaum*, *Carobenbaum*. Sp., *algarroba* [Sp. Ph.]. The carob-tree; a medium-sized tree growing about the Mediterranean region of Europe and Africa. The sickle-shaped, fleshy pods, which are from 4 to 8 inches long, are the St. John's bread, carob-pods, or sugar pods (the *caroba*, *ceronia*, *panis siliqua*, *panis Sancti Johannis*, *siliqua dulcis*, *fructus ceratoniæ*). They contain a sweetish mucilaginous pulp, and are considered demulcent and pectoral. From them have been obtained carobin, carobone, and carobic acid. They are eaten by cattle and occasionally by man, and are used in the preparation of a distilled liquor. The seeds when roasted are said to be used as a substitute for coffee, and also furnish a fine yellow dye. The bark and leaves are used in tanning, and a manna-like substance exudes from the trunk and branches. [B, 173, 180.]—**Extractum ceratoniæ.** Sp., *extracto de algarrobas* [Sp. Ph.]. A preparation made of the pods of *C. siliqua*, steeped for twenty-four hours in boiling water, strained and evaporated to the consistence of an extract. [B, 95 (*a*. 21).]—**Fructus ceratoniæ** [Ger. Ph., 1st ed.]. Fr., *caroube* [Fr. Cod.]. Sp., *algarroba*, *garrofa* [Sp. Ph.]. Syn.: *siliqua dulcis* [Greek Ph.]. The fruit of *C. siliqua*. [B, 95.]

CERATONIEÆ (Lat.), n. f. pl. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-on-i(i^2)'e^2-e-(a^3-e^2). Fr., *cératoniées*. Ger., *Ceratonieen*. Of Reichenbach, a subdivision of the *Cassieæ*; of Link, an order of the *Leguminosæ*, comprising *Ceratonia*, *Copaifera*, etc. [B, 170.]

CERATONIUS (Lat.), adj. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-on'i^2-u^{3}s(u^{4}s). Of or pertaining to the *Ceratonia*. [B.] See FRUCTUS *c*.

CERATONOSUS (Lat.), n. f. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-o^{2}n'o^{2}s-u^{3}s(u^{4}s). See KERATONOSUS.

CERATONOTA (Lat.), n. n. pl. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-o(o^2)-no'ta^3. A suborder of the *Opisthobranchiata*. [L, 121.]

CERATONOTOUS, adj. Se^{2}r-a^{2}t-o-no'tu^{3}s. Belonging or pertaining to the *Ceratonota*. [L, 121.]

CERATONYXIS (Lat.), n. f. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-o(o^2)-ni^{2}x-(nu^{6}x)'i^{2}s. See KERATONYXIS.

CERATOPHARYNGEUS (Lat.), n. m. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-o-(o^2)-fa^{2}r(fa^{3}r)-i^{2}n(u^{6}n^2)'je^2(ge^2)-u^{3}s(u^{4}s). From κέρας, a horn, and φάρυγξ, the pharynx. Fr., *cérato-pharyngien*. Ger., *Zungenbeinhornschlundmuskel*. Syn.: *hyo-cerato-pharyngeus* [Douglas]. Of Luschka, that portion of the middle constrictor of the pharynx that arises from the greater cornu of the hyoid bone. [L, 31, 50, 341.]—**C. major, C. minor.** See HYO-PHARYNGEUS.—**Inferior c.** In the solipeds, an anomalous muscle arising from the lower extremity of the large branch of the hyoid bone and becoming lost in the wall of the pharynx. [L, 13.]

CERATOPHORA [Lankester] (Lat.), n. n. pl. Se^{2}r(ke^{2}r)-a^{2}t-(a^{3}t)-o^{2}f'o^{2}r-a^3. A grade of the *Arthropoda*. [L, 121.]

CERATOPHORUS (Lat.), adj. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-o^{2}f'o^{2}r-u^{3}s-(u^{4}s). From κέρας, a horn, and φορεῖν, to bear. Fr., *cératophore*. Bearing horns or horn-like appendages. [B, 38.]

CERATOPHRYDES (Lat.), n. f. pl. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-o^{2}f'-ri^{2}d(ru^{6}d)-ez(e^{2}s). A subfamily of the *Cystignathidæ*. [L, 204.]

CERATOPHTHALMA [Cuvier, Latreille] (Lat.), n. n. pl. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-o^{2}f-tha^{2}l(tha^{3}l)'ma^3. Fr., *cératophthalmes*. See BRANCHIOPODA.

CERATOPHTHALMUS (Lat.), adj. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-o^{2}f-tha^{2}l(tha^{3}l)'mu^{3}s(mu^{4}s). Fr., *cératophthalme*. Having the eyes inserted in the end of horn-like projections. [L, 41, 180.]

CERATOPHYLAX (Lat.), n. m. and f. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-o^{2}f'-i^{2}l(u^{6}l)-a^{2}x(a^{3}x). Gen., *ceratophyl'acos* (*-is*). The *Pedicularis palustris*. [B, 88, 121.]

CERATOPHYLLACEÆ [A. Gray, Lindley] (Lat.), **CERATOPHYLLEÆ** [De Candolle *et al.*] (Lat.), n's f. pl. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-o(o^2)-fi^{2}l(fu^{6}l)-la(la^3)'se^2(ke^2)-e(a^3-e^2), -fi^{2}l(fu^{6}l)'le^2-e(a^3-e^2). From κέρας, a horn, and φύλλον, a leaf. Fr., *cératophyllacées, cératophyllées.* Ger., *Ceratophyllaceen, Ceratophylleen, Hornblattgewächse, Igellockgewächse.* An order of dicotyledonous plants, usually placed among the *Apetalæ*, and by Lindley and Eichler considered as related to the *Urticeæ*, by Bentham and Hooker placed among the anomalous orders of the *Apetalæ*, by Baillon regarded as a series of the *Piperaceæ*. A. Gray made them an order closely related to the *Cambobaceæ*, and Prantl accedes to this view, placing the *C.* among the *Ranales*, next to the *Nymphæaceæ*. The order consists of the single genus *Ceratophyllum*, including submerged aquatic plants with verticillate leaves and axillary unisexual flowers, having a many-parted perianth with the segments united at the base, the male flowers consisting of twelve to sixteen stamens with almost sessile anthers, and the female flowers of a single unilocular ovary containing one orthotropal pendulous ovule and tipped with a long subulate style. The fruit is an indehiscent nut containing a single exalbuminous seed. [B, 35, 42, 121, 170; Prantl (B, 245).]

CERATOPHYLLIN, n. Se^{2}r-a^{2}t-o-fi^{2}l'i^{2}n. Fr., *cératophylline.* A crystalline substance, of bitter burning taste, obtained by Hesse from the *Parmelia ceratophylla.* [B, 93.]

CERATOPHYLLINÆ (Lat.), n. f. pl. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-o-(o^2)-fi^{2}l(fu^{6}l)-li(le)'ne(na^3-e^2). Fr., *cératophyllinées.* Of Leunis, an order of the *Monochlamydeæ*, comprising the families *Ceratophylleæ* and *Nepentheæ.* [B, 170.]

CERATOPHYLLON [Adanson and the older medical writers] (Lat.), **CERATOPHYLLUM** [Linnæus] (Lat.), n's n. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-o(o^2)-fi^{2}l(fu^{6}l)'lo^{2}n, -lu^{3}m(lu^{4}m). Fr., *cératophylle.* Ger., *Hornblatt.* Syn.: *Hydroceratophillum* [Vaillant], *Dichotophyllum* [Dillenius]. A genus of submerged aquatic plants mentioned by the older medical writers, who do not, however, ascribe any special virtues to it. It constitutes the entire order *Ceratophylleæ.* [B, 42, 200; Prantl (B, 245).]

CERATOPHYLLOUS, adj. Se^{2}r-a^{2}t-o-fi^{2}l'u^{3}s. Lat., *ceratophyllus.* Fr., *cératophylle.* Having horn-shaped leaves, or horn-like appendages resembling leaves. [B.] See PARMELIA *ceratophylla.*

CERATOPHYTA [Schweiger] (Lat.), n. n. pl. Se^{2}r(ke^{3}r)-a^{2}t-(a^{3}t)-o^{2}f'i^{2}t(u^{6}t)-a^3. From κέρας, a horn, and φυτόν, a plant. Fr., *cératophytes.* A tribe of corals of the family *Corticati*, the internal axis of which has the appearance of wood or horn. A suborder of the *Rupicolæ* [Gray]. [L, 73, 244.]—**C. spongiosa** [Schweiger]. See SPONGIDA.

CERATOPLASTY, n. Se^{2}r'a^{2}t-o-pla^{2}s-ti^2. See KERATOPLASTY.

CERATOPTERIDEÆ (Lat.), **CERATOPTERIDINEÆ** (Lat.), n's f. pl. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-o^{2}p-te^{2}r-i^{2}d'e^2-e(a^3-e^2), -i^{2}d-i^{2}n-(en)'e^2-e(a^3-e^2). From κέρας, a horn, and πτερίς, a sort of fern. Fr., *cératoptéridées.* Of Gaudichaud, a subtribe (of Brongniart, a tribe) of ferns, consisting of the genus *Ceratopteris.* [B, 19, 170.]

CERATOPTERIS (Lat.), n. f. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-o^{2}p'te^{2}r-i^{2}s. Fr., *cératoptéris, cératoptéride.* Of A. Brongniart, a genus of aquatic polypodiaceous ferns. [B, 19, 121.]—**C. thalictroides.** The pod-fern; a species growing throughout the tropics of both hemispheres; the succulent fronds are eaten in the Indian Archipelago. [B, 19, 88.]

CERATORIUM (Lat.), n. n. Se(ka)-ra^{2}t(ra^{3}t)-o(o^2)'ri^2-u^{3}m-(u^{4}m). A cerate. [B, 114.]

CERATORRHEXIS (Lat.), n. f. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-o^{2}r-re^{2}x-(rax)'i^{2}s. See KERATORRHEXIS.

CERATOSA (Lat.), n. n. pl. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-o'sa^3. From κέρας, a horn. An order of the *Monaxonida.* [L, 121.]

CERATOSANTHUS (Lat.), n. m. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-o(o^2)-za^{2}n-(sa^{3}n)'thu^{3}s(thu^{4}s). See CONSOLIDA.

CERATOSCOPE, n. Se^{2}r'a^{2}t-o-skop. See KERATOSCOPE.

CERATOSCOPY, n. Se^{2}r-a^{2}t-o^{2}s'ko-pi^2. See KERATOSCOPY.

CERATOSE, adj. Se^{2}r'a^{2}t-os. See KERATOSE.

CERATOSIS (Lat.), n. f. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-os'i^{2}s. See KERATOSIS.

CERATOSOMIDÆ (Lat.), n. f. pl. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-o(o^2)-som'i^{2}d-e(a^3-e^2). A family of the *Pygobranchia.* [L, 282.]

CERATOSPERMUS (Lat.), adj. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-o(o^2)-spu^{5}rm(spe^{2}rm)'u^{3}s(u^{4}s). From κέρας, a horn, and σπέρμα, a seed. Fr., *cératosperme.* Having horned seeds (fruit). [B, 38.]

CERATOSPIDÆ (Lat.), n. f. pl. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-o^{2}s'pi^{2}d-e-(a^3-e^2). A family of the *Macrura.* [L, 240.]

CERATOSPONGIÆ (Lat.), n. f. pl. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-o(o^2)-spo^{2}n(spo^{2}n^2)'ji^2(gi^2)-e(a^3-e^2). From κέρας, a horn, and σπόγγος, a sponge. See CERATOSA.

CERATOSTAPHYLINUS (Lat.), n. m. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-o-(o^2)-sta^{2}f(sta^{3}f)-i^{2}l(u^{6}l)-in(en)'u^{3}s(u^{4}s). From κέρας, a horn, and σταφυλή, the uvula. Fr., *cératostaphylin.* A set of muscular fibres extending from the hyoid cornua to the uvula, constituting a portion of the thyreo-staphylinus muscle of Winslow. [L, 43.]

CERATOSTELIDIUM [Wallroth] (Lat.), n. n. Se^{2}r(ke^{2}r)-a^{2}t-(a^{3}t)-o(o^2)-ste^{2}l-i^{2}d'i^2-u^{3}m(u^{4}m). From κέρας, a horn, and στελίδιον, a little handle. A term applied by Wallroth to the podetium of lichens when it is subulate or shaped like a horn. [B, 198.]

CERATOSTOMEUS (Lat.), **CERATOSTOMUS** (Lat.), adj's. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-o(o^2)-stom(sto^{2}m)'e^2-u^{3}s(u^{4}s), -o^{2}st'om(o^{2}m)-u^{3}s-(u^{4}s). From κέρας, a horn, and στόμα, a mouth. Having horned mouths or ostiola (a botanical descriptive term). [B, 121.]

CERATOSTROMA (Lat.), n. n. Se^{2}r(ke^{3}r)-a^{2}t(a^{3}t)-o(o^2)-stro'ma^3. Gen., *ceratostrom'atos* (*-is*). From κέρας, a horn, and στρῶμα, a layer. Fr., *cératostrome.* Ger., *Ceratostrom.* See ICHTHYOSIS.

CERATOSTROSIS (Lat.), n. f. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-o(o^2)-stro'si^{2}s. Gen., *ceratostro'seos* (*-is*). From κέρας, a horn, and στρῶσις, a spreading out. Fr., *cératostrose.* The formation of a horny layer on the skin. [A, 322.]

CERATOSYPHILOLEPIS (Lat.), n. f. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-o-(o^2)-si^{2}f(su^{6}f)-i^{2}l-o^{2}l'e^{2}p-i^{2}s. Gen., *ceratosyphilolep'idos* (*-is*). From κέρας, a horn, *syphilis* (*q. v.*), and λεπίς, rind. Fr., *cératosyphilolépis, syphilide squameuse cornée* [Biett]. Ger., *hornartiges Schuppensyphilid des Handtellers.* Syn.: *syphilolepis palmarum cornea* [Fuchs]. A horny syphilide of the palms of the hands. [A, 322.]

CERATOTHECA (Lat.), n. f. Se^{2}r(ke^{2}r)-a^{2}t(a^{3}t)-o(o^2)-the(tha)'-ka^3. From κέρας, a horn, and θήκη, a sheath. Fr., *cératothèque.* 1. Of Endlicher, a genus of *Pedalineæ.* [B, 42, 121.] 2. The envelope of the antennæ of a chrysalis. [L, 42.]

CERATOTOME, n. Se^{2}r'a^{2}t-o-tom. See KERATOTOME.

CERATOTOMY, n. Se^{2}r-a^{2}t-o^{2}t'o-mi^2. See KERATOTOMY.

CERATO-TRACHEALIS (Lat.), n. m. Se^{2}r(ke^{2}r)''a^{2}t(a^{3}t)-o(o^2)-tra^{2}k(tra^{3}ch^2)-e(a)-a(a^3)'li^{2}s. From κέρας, a horn, and τραχεῖα, the trachea. In birds, a muscle arising from the cerato-hyal bone and running down along the trachea. ["Proc. of the Zool. Soc.," 1885, p. 319 (L).]

CERATOUS, adj. Se^{2}r'a^{2}t-u^{3}s. See KERATOSE.

CERATUM (Lat.), n. n. Se(ka)-rat(ra^{3}t)'u^{3}m(u^{4}m). From *cera* wax. Gr., κηρωτόν. Fr., *cérat.* Ger., *Cerat, Wachssalbe.* 1. A cerate. 2. In the U. S. Ph., simple cerate (*C. simplex* [Belg. Ph., U. S. Ph., 1870], *cérat simple* [Fr. Cod.], *Unguentum cerum* [Pruss. Ph.]), a preparation consisting of 3 parts of white wax and 7 of lard melted together [U. S. Ph.]. The simple cerate of the Fr. Cod., the Belg. Ph., and the Sp. Ph. is composed of 1 part of white wax and 3 parts of expressed oil of almonds. [B, 95 (*a*, 21).]—**C. adipis** [U. S. Ph., 1860]. See *C.* (2d def.).—**C. ad fonticulos.** See CHARTA *ad fonticulos.*—**C. ad labia.** See *C.* CETACEI *rubrum.*—**C. album** [Lond. Ph., 1745]. See under *C.* CETACEI.—**C. ammoniacale.** See *Ammoniacal* CERATE.—**C. calaminare.** See *C.* CALAMINÆ.—**C. calaminaris.** See *C.* ZINCI *carbonatis* and *C.* CALAMINÆ.—**C. calmans.** See *Cherry*-LAUREL *cerate.*—**C. camphoratum.** See *C.* CAMPHORÆ.—**C. citrinum.** See *Ceratum* RESINÆ *compositum.*—**C. commune.** See *C. flavum.*—**C. cosmeticum, C. cosmeticum anglicum.** Fr., *crème cosmétique.* A preparation official in the Pad. Ph., 1832, and the Port. Ph., 1836; made, according to the former, of 1 part of spermaceti, 1 part of white wax, 16 parts of almond-oil, and 12 parts of water; for water the latter pharmacopœia substitutes rose-water. [*a*, 21.] Cf. COLD-CREAM.—**C. cum aqua.** See *C. Galeni.*—**C. cum subacetate plumbico** [Fr. Cod.]. See *C.* PLUMBI *subacetatis.*—**C. detergens.** See *C. mercuriale Falckii.*—**C. elotum** [Celsus]. A cerate made of wax washed with sea-water and nitre before bleaching. [B, 45.]—**C. epuloticum.** See *Unguentum* ZINCI *oxidi.*—**C. e sulphure.** See CÉRAT *soufré.*—**C. ex Galeno.** See *C. Galeni.*—**C. exsiccans.** Fr., *cérat dessicatif.* A preparation official in the Dutch Ph., 1805 (Niemann's ed.), made of 10 parts each of acetate of lead, calamine, and tutia, 1 part of camphor, and a sufficient quantity of rose ointment. [B, 119 (*a*, 21).]—**C. flavum** [Fr. Cod., Swed. Ph.]. Fr., *cérat jaune* [Fr. Cod.]. A cerate composed of 1 part of yellow wax and 2 parts of olive-oil [Swed. Ph.], or of 1 part of yellow wax and 3 parts of olive-oil [Belg. Ph.], or of 2 parts of yellow wax and 7 of expressed oil of sweet almonds [Fr. Cod.], or of 3 of yellow wax and 7 of olive-oil [Pruss. Ph.], or of 3 of yellow wax and 4 of olive-oil [Russ. Ph.]. [B, 95 (*a*, 21).]—**C. fuscum** [Austr. Ph., Hung. Ph.]. Ger., *braunes Cerat.* A preparation made by heating 10 parts of litharge plaster, constantly stirring until the melted mass is dark brown, then adding 3 parts of yellow wax, 3 of mutton suet, and 5 of hogs' lard. [B, 95 (*a*, 21).]—**C. Galeni** [Fr. Cod.]. Fr., *cérat de Galien* [Fr. Cod.]. A cerate made of 5 parts of simple cerate mixed with 2 of expressed oil of sweet almonds and 3 of rose-water [Belg. Ph.]. The Fr. Cod. and the Sp. Ph. order 1 part of white wax, 4 parts of expressed oil of sweet almonds, and 3 parts of rose-water. Similar preparations have been official in other formularies. [B, 95 (*a*, 21).]—**C. Goulardi.** See *C.* PLUMBI *subacetatis.*—**C. hydrargyrosum.** See *C. mercuriale.*—**C. labiale.** A preparation of which many varieties were formerly described, all of which, however, approximate more or less closely to the *C. cetacei rubrum* (*q. v.*, under CETACEUM) of the modern pharmacopœias. [B, 119.]—**C. labiale album.** See *C.* CETACEI.—**C. labiale rubrum.** See *C.* CETACEI *rubrum.*—**C. laudanisatum** [Fr. Cod.]. See *C. cum* LAUDANO.—**C. mercuriale** [Lond. Ph., 1746]. A cerate made of 6 parts each of strong mercurial ointment and yellow wax and 3 of lard. [L, 165 (*a*, 21).]—**C. mercuriale compositum** [Lond. Ph., 1746]. A cerate made of 12 parts each of strong mercurial ointment and soap cerate and 3 of powdered camphor; used as a discutient. [L, 120 (*a*, 21).]—**C. mercuriale Falckii.** A preparation official in the formulary of the Strasb. Hosp., 1830, and in the Würzb. Ph., 1796, made of 1 part of red precipitate, 4 parts of mercurius dulcis (calomel), 2 parts of crystallized lead acetate powdered and incorporated with a mixture of 8 parts of white wax and 12 of olive-oil. [B, 119 (*a*, 21).]—**C. neutrale.** See *Kirkland's* (*neutral*) CERATE.—**C. nigrum.** See *C.* RESINÆ.—**C. noribergense, C. noricum.** See *Emplastrum* MINII *rubrum.*—**C. picatum, C. pisselæum.** See *C.* RESINÆ.—**C. pro tactu.** Fr., *cérat pour le toucher* [Soubeiran]. Touch-cerate; made of 1 part each of spermaceti, white wax, and caustic soda and 16 parts of olive-oil; used as a lubricant in vaginal examinations. [L, 120 (*a*, 21).]—**C. refrigerans Galeni.** See *C. Galeni.*—**C. resinosum.** See *C.* RESINÆ.—**C. rosatum.** See *Cérat à la* ROSE.—**C. rubrum.** See *C.* CETACEI *rubrum* and *C.* CINNABARIS.—**C. saturninum.** See *C.* PLUMBI *subacetatis.*—**C. simplex.** Fr., *cérat simple* [Fr. Cod.]. Sp., *cerato simple* [Sp. Ph.]. See *C.* (2d def.).—**C. simplex tabulatum** [Russ. Ph.]. See *C. flavum.*—**C. sulfu-**

ratum, C. sulphuratum. See Cérat *soufré.*—**C. tetrapharmacum.** See *C.* resinæ.—**C. tripharmacum, C. universale.** See *Emplastrum* minii *rubrum.*—**C. viride.** See *Ceratum* æruginis.

CERATURA (Lat.), n. f. Se(ka)-ra^{2}t(ra^{3}t)-u^2(u)′ra^3. From *cera*, wax. A smearing or covering with wax. [B, 114.]

CERATUS (Lat.), adj. Se(ka)ra(ra^3)′tu^{3}s(tu^{4}s). Combined with or containing wax; waxed (*e. g.*, charta cerata). [B.]

CERAUNARGYROS (Lat.), n. m. Se^{2}r(ke^{2}r)-a^{4}n(a^3-u^{4}n)-a^{3}r′-ji^{2}r(gu^{5}r)-o^{2}s. See Ceraunargyros.

CERAUNIA (Lat.), n. f. Se^{2}r(ke^{2}r)-a^{4}n′(a^3′u^{4}n)-i^2-a^3. 1. The *Ceratonia siliqua.* [Pliny (B, 114).] 2. See Ceraunium (2d def.).

CERAUNIARGYROS (Lat.), n. m. Se^{2}r(ke^{2}r)-a^{4}n(a^3-u^{4}n)-i^2-a^{3}r′ji^{2}r(gu^{6}r)-o^{2}s. From κεραύνιος, pertaining to thunder, and ἄργυρος, silver. Fr., *cérauniargyre.* Ger., *Knallsilber.* Fulminating silver. [A, 322.]

CERAUNIAS (Lat.), n. m. Se^{2}r(ke^{2}r) a^{4}n′(a^3′u^{4}n)-i^2-a^{2}s(a^{3}s). Gr., κεραυνιας. See Ceraunium (2d def.).

CERAUNICS, n. sing. Se^{2}r-a^{4}n′i^{2}ks. From κεραύνος, thunder. A branch of physics dealing with heat and electricity. [L, 56.]

CERAUNIOCHRYSOS (Lat.), n. m. Se^{2}r(ke^{2}r)-a^{4}n(a^3-u^{4}n)-i^2-o(o^2)-kriz(ch^{2}ru^{6}s)′o^{2}s. From κεραύνιος, pertaining to thunder, and χρυσός, gold. Ger., *Knallgold.* Fulminating gold. [B, 200.]

CERAUNION (Lat.), **CERAUNIUM** (Lat.), n's n. Se^{2}r(ke^{2}r)-a^{4}n′(a^3′u^{4}n)-i^2-o^{2}n, -u^{3}m(u^{4}m). Gr., κεραύνιον (from κεραύνος, thunder). 1. A sort of truffle, said to grow after thunderstorms, hence applied in modern times to the genus *Elaphomyces.* 2. A sort of precious stone (thunder-stone), also called *ceraunius*, *ceraunia*, *lapis ceraunia*, and *lapis fulminaris* (Ger., *Donnerstein*); a mineral described as blackish or brownish and pyramidal in shape, derived principally from Germany and supposed to occur after thunderstorms. The stone was applied to swellings of the breasts and knees, and used in dropsy and jaundice, and the name was also anciently given to any stone of meteoric origin. See also Belemnites, from which this was distinguished. [B, 114, 115, 121, 200.]—**C. granulatum** [Wallroth]. The *Elaphomyces officinalis.* [B, 180.]

CERAUNIUS (Lat.), adj. Se^{2}r(ke^{2}r)-a^{4}n′(a^3′u^{4}n)-i^2-u^{3}s(u^{4}s). Gr., κεραύνιος. Of or pertaining to thunder; as a n. m., see Ceraunion. [B, 180.]

CERAUNOCHRYSON (Lat.), **CERAUNOCHRYSOS** (Lat.), n's n. and m. Se^{2}r(ke^{2}r)-a^{4}n(a^3-u^{4}n)-o(o^2)-kriz(ch^{2}ru^{6}s)′o^{2}n, -o^{2}s. See Cerauniochrysos.—**Ceraunochryson diaphoreticum** [Bégin]. A preparation made by burning several successive charges of alcohol on precipitated gold oxide, and collecting and washing with alcohol the particles that sublime on the walls of the vessel. [B, 88.]

CERAUNUS (Lat.), adj. and n. m. Se^{2}r(ke^{2}r)-a^{4}n′(a^3′u^{4}n)-u^{3}s-(u^{4}s). See Ceraunius and Ceraunium.

CERAUNYDRARGYRUM (Lat.), n. n. Se^{2}r(ke^{2}r)-a^{4}n(a^3-u^{4}n)-id(u^{5}d)-ra^{3}r′ji^{2}r(gu^{6}r)-u^{3}m(u^{4}m). From κεραύνιος, pertaining to thunder, and ὑδράργυρος, quicksilver. Fr., *céraunydrargyre.* Ger., *Knallquecksilber.* Fulminating mercury. [A, 322.]

CERBERA (Lat.), n. f. Su^{5}r(ke^{2}r)′be^{2}r-a^3. Fr., *cerbère.* Of Linnæus, a genus of apocynaceous plants of the tribe *Plumerieæ*, comprising four species growing in Asia, the East Indies, and the Pacific Islands. [B, 42.]—**C. ahouai, C. ahovai** [Linnæus]. The *Thebetia ahouai.* [B, 42, 173, 180.]—**C. Forsteri** [Seemann]. A Pacific Island species, by Bentham and Hooker referred to *C. odollam.* [B, 42.]—**C. lactaria** [Hamilton]. A species growing in the Moluccas, by Bentham and Hooker referred to *C. odollam.* [B, 42, 180; "Nouv. rem.," Apr. 24, 1889, p. 211.]—**C. manghas** [Linnæus]. The original species of the genus, made by Linnæus; now referred to *Tabernæmontana dichotoma.* The *C. manghas* of other authors is the *C. odollam.* [B, 42, 172, 180.]—**C. odollam** [Gärtner]. The *odollam* of the Malays; a tree 20 feet high, growing on the Malabar coast. The wood is white and very spongy; the large green drupaceous fruit has a narcotic. more or less poisonous nut, and is said to loosen and destroy the teeth of dogs feeding upon it. It is also said to be used as an application in skin diseases. The bark and leaves are purgative, and the latter are used in Java as a substitute for senna and contain *cerberin.* The Molucca tree, *C. lactaria* (identified by Bentham and Hooker with the *C. odollam*), it is said, has purgative leaves and bark, and an illuminating oil is obtained from the seeds. [B, 42, 172, 180; "Nouv. rem.," Apr. 24, 1889, pp. 211, 214.]—**C. salutaris** [Loureiro]. A Cochin-China tree; the bitter root and the nut are employed in colic and gastric disorders. [B, 180.]—**C. tanghin** [Sims]. A medium-sized tree of Madagascar, said to be so poisonous that twenty people have been killed by a single seed. From it is obtained the ordeal poison of Madagascar (see Tanghin and Tangiun). [B, 42, 180.]—**C. thevetia** [Linnæus]. The *Thevetia neriifolia.* [B, 42, 173.]—**C. triphylla** [Rudge]. The *Couma guianensis.* [B, 173.]—**C. venenifera.** See *C. tanghin.*—**C. valli.** In India, the *Cissus coruga.* [Bory (B, 121).]

CERBEREÆ (Lat.), n. f. pl. Su^{5}r(ke^{2}r)-be(be^2)′re^2-e(a^3-e^2). Fr., *cerbérées.* Of Reichenbach, a subdivision of the *Carisseæ*, comprising *Carissa*, *Arduina*, *Ambelania*, *Cerbera*, *Strychnos*, *Ignatia*, etc. [B, 170.]

CERBERIN, n. Su^{5}r′be^{2}r-i^{2}n. Lat., *cerberinum.* Fr., *cerbérine.* Ger., *C.* It., *cerberina.* A glucoside discovered in the *Cerbera odollam* and in the seeds of the *Thevetia neriifolia.* It forms small colorless crystals of a bitter taste, and is an active poison, producing vomiting, prostration, convulsions, delirium, and coma. By dilute acids it is converted into glucose and theveresin. [B, 5.]

CERBERUS (Lat.), n. m. Su^{5}r(ke^{2}r)′be^{2}r-u^{3}s(u^{4}s). From κέρβερος, the fabled three-headed watch-dog of the infernal regions. An old name applied to several preparations, and by chemists, according to Libarius, to a compound of salt, mercury, and vitriol. [B, 200.]—**C. mitigatus.** Mercurius dulcis. [A, 322.] See Calomel.—**C. triceps.** See Pulvis *Cornachini.*

CERBINA (It.), n. Che^{2}r-be′na^3. The *Erica tetralix.* [B, 121.]

CERCAIRE (Fr.), n. Se^{2}r-kar. See Cercaria.

CERCAL, adj. Su^{5}rk′a^{2}l. From κέρκος, a tail. In ornithology, pertaining to the tail. [L, 343.]

CERCANTHEMUM [Plotzsch] (Lat.), n. n. Su^{5}rk(ke^{2}rk)-a^{2}n-(a^{3}n)′the^{2}m-u^{3}m(u^{4}m). From κερκίς, a spike or stem, and ἄνθεμον, a flower. A section of the genus *Howardia.* [B, 121.]

CERCARIA (Lat.), n. f. Su^{5}r(ke^{2}r)-ka(ka^3)′ri^2-a^3. From κέρκος, a tail. Fr., *cercaire.* 1. As now used, the larva of the *Trematoda* in the state in which it is provided with a tail-like process. [L. 201.] 2. An animalcule with the body terminating in a tail-like appendage. [L, 296.] 3. A genus of the *Distomata* of Dujardin. [Müller (L, 18).]—**Cercariæ seminis.** The spermatozooids. [L, 73.]

CERCARIÆ [Bory] (Lat.), n. f. pl. Su^{5}r(ke^{2}r)-ka(ka^3)′ri^2-e(a^3-e^2). Fr., *cercariées.* Ger., *Cercarien.* A family of *Infusoria*, having an enlarged body with a slender tail-like appendage. The body of the true *C.* of vegetable infusions is rounded, that of the zoosperms is flattened. [L, 108.]

CERCARIFORM, adj. Su^{5}r-ka^{2}r′i^2-fo^{2}rm. From *cercaria* (*q. v.*), and *forma*, shape. Like a cercaria in shape. [L, 296.]

CERCARIOID, adj. Su^{5}r-ka′ri^{2}oid. See Cercariform.

CERCEÆ [Brown] (Lat.), n. f. pl. Su^{5}r(ke^{2}r)′se^2(ke^2)-e(a^3-e^2). A tribe of the *Rectembryeæ*, consisting of the single genus *Cercis.* [B, 170.]

CERCEAU (Fr.), n. Se^{2}r-so. See Arceau.—**C'x trachéens.** The cartilaginous rings of the trachea. [L, 41, 153.]

CERCELI (It.), n. Che^{2}r′cha-le. A variety of lemon. [B, 121.]

CERCERA (Lat.), n. f. Su^{5}r(ke^{2}r)′se^{2}r(ke^{2}r)-a^3. Gr., κέρκερα. Of Dioscorides, the *Asarum europæum.* [B, 88, 121.]

CERCERAPHRON [Dioscorides] (Lat.), n. n. Su^{5}r(ke^{2}r)-se^{2}r-(ke^{2}r)-a^{2}f(a^{3}f)′ro^{2}n. Gr., κέρκεραφρον. A name of a plant, probably the *Anagallis arvensis*, var. *phœnicea.* [B, 88, 121.]

CERCHNALEON (Lat.), n. n. Su^{5}rk(ke^{2}rch^2)-na(na^3)′le^2-o^{2}n. Gr., κερχναλέον. See Cerchnos.

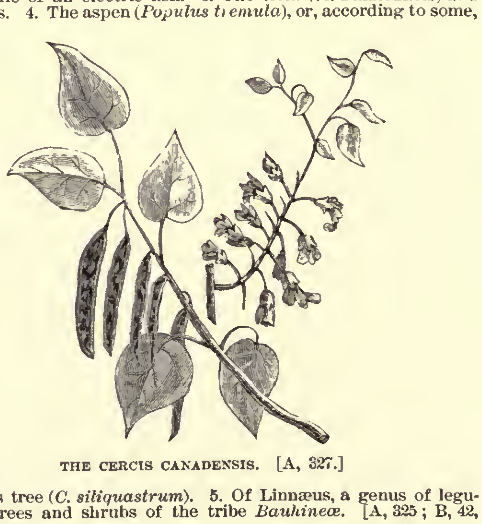
CERCHNASMICUS (Lat.), adj. Su^{5}rk(ke^{2}rch^2)-na^{2}z(na^{3}s)′-mi^{2}k-u^{3}s(u^{4}s). Pertaining to or affected with hoarseness. [A, 322.]

CERCHNASMUS (Lat.), n. m. and n. Su^{5}rk(ke^{2}rch^2)-na^{2}z-(na^{3}s)′mu^{3}s(mu^{4}s). Gr., κερχνασμός. Fr., *enrouement.* Ger., *Heiserkeit.* Hoarseness. [A, 322, 387.]

CERCHNOMA (Lat.), n. n. Su^{5}rk(ke^{2}rch^2)-no′ma^3. Gen., *cerchnom′atos* (*-is*). Gr., κέρχνωμα. See Cerchnasmus.

CERCHNOS (Lat.), **CERCHNUS** (Lat.), n's m. Su^{5}rk(ke^{2}rch^2)′-no^{2}s, -nu^{3}s(nu^{4}s). Gr., κέρχνος. A noisy respiration or wheezing caused by accumulation of mucus in the air-passages. [L, 94.]

CERCIDES (Lat.), n. f. pl. Su^{5}r(ke^{2}r)′si^{2}d(ki^{2}d)-ez(e^{2}s). A tribe of the *Coleoptera.* [L, 41.]



CERCIDIUM (Lat.), n. n. Su^{5}r(ke^{2}r)-si^{2}d(ki^{2}d)′i^2-u^{3}m(u^{4}m). Gr., κερκίδιον (dim. of κερκίς, a rod). Fr., *ccrcidion.* 1. Of Necker, the mycelium of *Fungi.* 2. Of Tulasne, a genus of leguminous plants of the *Eucœsalpinieæ.* [B, 121, 198, 267.]

CERCIDOCÈRE (Fr.), adj. Se^{2}r-se-do-se^{2}r. From κερκίς, a shuttle, and κέρας, a horn. Having the antennæ in the form of a shuttle. [L, 41.]

CERCIFIS (Fr.), n. Se^{2}r-se-fe. The *Scorzonera hispanica.* [B, 88, 173.]

CERCIFIX (Fr.), n. Se^{2}r-se-fe. The genus *Tragopogon.* [B, 173.]—**C. sauvage.** The *Tragopogon pratense.* [B, 173.]

CERCIS (Lat.), n. f. Su^{5}r(ke^{2}r)′si^{2}s(ki^{2}s). Gen., *cer′cidos* (*-is*). Gr., κερκίς. Fr., *gainier* (5th def.). 1. Lit., a rod or shuttle; of the ancient writers, a rod for stirring liquids [Galen], also a pestle. 2. The prickle of an electric fish. 3. The tibia (cf. Paracercis) and the radius. 4. The aspen (*Populus tremula*), or, according to some,

THE CERCIS CANADENSIS. [A, 327.]

the Judas tree (*C. siliquastrum*). 5. Of Linnæus, a genus of leguminous trees and shrubs of the tribe *Bauhineæ.* [A, 325; B, 42,

115.]—**C. canadensis.** Fr., *bouton rouge, gainier du Canada.* Red-bud, Judas tree; a tree 20 to 30 feet high, growing in the middle and western United States. The young twigs are used to dye wool, and the purple flowers are said to be used in seasoning salads. [B, 19, 34, 173.]—**C. chinensis.** A Chinese species, introduced into Europe. [B, 19.]—**C. pubescens** [Pursh]. A variety of *C. canadensis.* [B, 173.]—**C. siliquastrum** [Linnæus]. Fr., *arbre d'amour* (ou *de Judas*, ou *de Judée*), *gainier de Judée.* Ger., *Judasbaum.* The Judas tree; a European and Asiatic species often cultivated as an ornamental hedge-tree, distinguished by its simple reniform leaves and purple flowers. The young flower-buds are made into preserves, and the seeds are edible. [B, 19, 173.]

CERCLE (Fr.), n. Se2rkl. See CIRCLE and ANNULUS.—**C. à barrique, C. à barriques.** An undetermined species of *Bauhinia* growing in the West Indies. [B, 121.]—**C. artériel, C. céphalique.** See CIRCLE *of Willis.*—**C. chromatique** [Chevreul]. An arrangement of the primitive colors in the form of rays, from the palest to the deepest; used in studying the contrast of colors. [A, 385.]—**C. ciliaire.** See *Ciliary* LIGAMENT.—**C. de diffusion.** See *Diffusion* CIRCLE.—**C. galvanique.** See *Galvanic* CIRCUIT.—**C. membraneux.** A portion of the left auricle of the heart forming a ring around its ventricular opening. [L, 41.]—**C. sous-occipito-malaire.** Poullet's term for the circumference by which his *sériceps* is supposed to seize the fœtal head; below the occiput and below the malar bones. [A, 15.]—**C. tympanal, C. tympanique.** See ANNULUS *tympanicus.*—**C. veineux de l'iris.** See CIRCULUS *venosus iridis.*—**Grand c. de l'iris.** See ANNULUS *iridis ciliaris.*—**Petit c. de l'iris.** See ANNULUS *iridis pupillaris.*

CERCLÉ (Fr.), adj. Se2r-kla. See PIED *c.*

CERCOCARPEÆ (Lat.), n. f. pl. Su5r(ke2r)-ko(ko2)-ka3rp'e2-e(a3-e2). Fr., *cercocarpées.* Of Torrey and Gray and succeeding authors, a subdivision of the *Dryadeæ* (tribe of the *Rosoideæ* [Focke]), comprising *Cercocarpus* and *Purshia.* As defined by Focke, it comprises genera with a tubular flower-axis inclosing 1 carpel (rarely 2), with an appended capsule and only slightly developed stipules. [B, 170, 245.]

CERCODEÆ (Lat.), n. f. pl. Su5r(ke2r)-kod'e2-e(a3-e2). Of Reichenbach, a division of the *Halorageæ*, comprising *Hippuris*, *Haloragis*, *Cercodia*, etc. [B, 170.]

CERCODEEÆ [Wight and Arnott] (Lat.), **CERCODIANÆ** [Jussieu] (Lat.), n's f. pl. Su5r(ke2r)-kod-e(e2)'e2-e(a3-e2), -i2-a(a3)'ne-(na3-e2). Of Jussieu, a family separated from the *Onagrariæ*; of De Candolle and others, a tribe of the *Halorageæ*, comprising *Cercodea*, *Haloragis*, etc. [B, 170.] Cf. HALORAGEÆ.

CERCODINEÆ (Lat.), n. f. pl. Su5r(ke2r)-kod-i2n'e2-e(a3-e2). Of Dumortier, a family of the *Calicungulia*, consisting of the single genus *Cercodea.* [B, 170.]

CERCOFOGLIA (It.), n. Che2r-ko-fol'yi2-a3. The *Anthriscus cerefolium.* [B, 121.]

CERCOLABIDÆ (Lat.), n. f. pl. Su5r(ke2r)-ko(ko2)-la2b(la3b)'-i2d-e(a3-e2). A family of *Rodentia*, comprising the American porcupines. [L, 73.]

CERCOLABINÆ (Lat.), n. f. pl. Su5rk(ke2rk)-o(o2)-la2b(la3b)-i(e)'ne(na3-e2). A subfamily of the *Spalacopodidæ.* [L, 341.]

CERCOLEPTIDÆ (Lat.), n. f. pl. Su5r(ke2r)-ko(ko2)-le2p'ti2d-e(a3-e2). A family of the *Dendropoda.* [L, 277.]

CERCOMA (Lat.), n. n. Su5r(ke2r)-ko'ma3. Gen., *cercom'atos (-is).* A genus of coleopterous insects. [L.]—**C. Schæfferi** [Linnæus]. A vesicating species found in France. [L, 231.]

CERCOMONADE (Fr.), n. Se2r-ko-mon-a3d. See CERCOMONAS.

CERCOMONADINA [Kent] (Lat.), n. n. pl. Su5r(ke2r)-ko-(ko2)-mo2n-a2d(a3d)-i(e)'na3. A family of the *Monadidea.* [L, 121.]

CERCOMONAS [Dujardin] (Lat.), n. f. Su5r(ke2r)-ko2m'on-(o2n)-a2s(a3s). From κερκός, a tail, and μονάς, a unit. Fr., *cercomonade.* Ger., *Schwanzmonade.* A genus of the *Cercomonadina* or of the *Flagellata*, having a long or oval body, sharp-pointed at one end, and provided with a flagellum. [L, 121, 340.]—**C. acuminata** [Dujardin], **C. biflagellata** [Sternberg], **C. globulus** [Dujardin]. Species found in incrustations on the teeth. [L, 340.]—**C. hominis** [Davaine], **C. intestinalis** [Lambl]. A species found in the intestinal discharges, especially in cholera and typhoid fever and in various forms of chronic diarrhœa. It probably acts as a local irritant. [B, 27, 108; L, 17, 20.]—**C. saltans.** See BODO *saltans.*—**C. urinarius.** See BODO *urinarius.*—**C. vaginalis.** See TRICHOMONAS *vaginalis.*

CERCONCELLO (It.), n. Che2r-kon-che2l'lo. The *Lepidium sativum.* [B, 121.]

CERCOPIDÆ [Leach] (Lat.), **CERCOPIDES** (Lat.), n's f. pl. Su5r(ke2r)-ko2p'i2d-e(a3-e2), -ez(e2s). Fr., *cercopites, cercopides, cercopiens.* A family (*Cercopidæ*) or tribe (*Cercopides*) of homopterous insects. [L, 41, 121.]

CERCOPINÆ (Lat.), n. f. pl. Su5rk(ke2rk)-o(o2)-pi(pe)'ne(na3-e2). A subfamily of the *Cercopidæ.* ["Proc. of the Zool. Soc.," 1884, p. 461 (L).]

CERCOPITHECI [Goldfuss] (Lat.), **CERCOPITHECIDÆ** (Lat.), n's m. pl. and f. pl. Su5r(ke2r)-ko(ko2)-pi2th-e(a)'si(ke), -e2s-(ak)'i2d-e(a3-e2). From κερκοπίθηκος, a long-tailed ape. Fr., *cercopithèques.* Ger., *Schwanzaffen.* The long-tailed apes; a family of the *Quadrumana.* [L, 121.]

CERCOPITHECINA (Lat.), n. n. pl. Su5r(ke2r)-ko(ko2)-pi2th-e2s(ak)-i(e)'na3. A tribe of the *Simiadæ.* [L, 272.]

CERCOS (Lat.), n. f. Su5r(ke2r)'ko2s. Gr., κέρκος. 1. A beast's tail; hence, the penis. 2. A sort of animal that injures the vine. [B, 115.] Cf. CERCUS.

CERCOSAURIDÆ (Lat.), n. f. pl. Su5r(ke2r)-ko(ko2)-sa4r'-(sa3'u4r)-i2d-e(a3-e2). From κέρκος, a tail, and σαῦρα, a lizard. A family of the *Cionocrania.* [L, 121.]

CERCOSIS (Lat.), n. f. Su5r(ke2r)-ko'si2s. Gen., *cercos'eos (-is).* Gr., κέρκωσις (from κερκός, a tail). Fr., *cercose.* 1. An excrescence upon the clitoris [Paulus Ægineta (B, 115)] or an excessive elongation of that organ. 2. A uterine polypus protruding from the vagina. [A, 301.]—**C. clitoridis, C. externa.** See *C.* (1st def.).

CERCOSOMA (Lat.), n. n. Su5r(ke2r)-ko(ko2)-so'ma3. Gen., *cercosom'atos (-is).* From κέρκος, a tail, and σῶμα, the body. Of Branser, Diesing, and others, a supposed entozoon which was the larva of the *Eristalis tenax* or *Eristalis pendulum*, sometimes occurring accidentally in human urine. [L, 16.]

CERCUS (Lat.), n. f. Su5r(ke2r)'ku3s(ku4s). From κέρκος, a tail. A many-jointed setose appendage of the posterior end of the abdomen in certain insects. There is one on each side, and they are sometimes termed anal cerci. [L, 11, 196.]

CERDA [Dioscorides] (Lat.), n. f. Su5r(ke2r)'da3. A plant, perhaps the *Gypsophila.* [B, 121.]

CERDAC (Ar.), n. Au old name for mercury. [Ruland (A, 325).]

CERDON (Lat.), n. n. Su5r(ke2r)'do2n. See CERDA.

CERE, n. Ser. Lat., *cera.* Fr., *cère.* Ger., *Wachshaut.* The wax-skin of birds; a fleshy or cutaneous membrane, often feathered, covering the base of the upper mandible in parrots and many birds of prey. [L, 56, 147, 221, 343.]

CÈRE (Fr.), n. Se2r. See CIRE.

CEREÆ (Lat.), n. f. pl. Se(ka)'re2-e(a3-e2). Fr., *cérées.* Of Sprengel, a family of plants, comprising *Cactus*, *Ribes*, and *Aphyteia.* [B, 170.]

CEREACEÆ (Lat.), n. f. pl. Se(ka)-re2-a(a3)'se2(ke2)-e(a3-e2). Fr., *céréacées.* Of Blume, a tribe of orchids. [B, 170.]

CEREAL, adj. Se're2-a2l. Gr., δημήτριος. Lat., *cerealis* (from *Ceres*, the goddess of agriculture). Fr., *céréale.* Ger., *kornfrüchtig.* It., *cereale.* Sp., *c.* Pertaining to edible grain; as a n., in the pl., *c's*, edible gramineous plants in general: of diseases, due to the ingestion of diseased or damaged grain. [B, 38, 116.]

CEREALIA (Lat.), n. n. pl. Se(ke2)-re2-a(a3)'li2-a3. Fr., *céréales.* Ger., *Cerealien, Kornfrüchte.* It., *cereali.* Sp., *cereales.* The cereals. See under CEREAL.

CEREALIN, n. Se-re'a2l i2n. Fr., *céréaline.* Ger., *C.* It., Sp., *cerealina.* An albuminous principle found in cereals. [A, 385.]

CEREALIOUS, adj. Se-re2-a'li2-u3s. See CEREAL.

CEREALIS (Lat.), adj. Se(ke2)-re2-a(a3)'li2s. 1. See CEREAL. 2. As a n., a proprietary effervescent beverage, said to consist chiefly of barley-water with a small quantity of "extractum carnis."

CEREANUS (Lat.), adj. Se(ka)-re2-a(a3)'nu3s(nu4s). From *cerea*, wax. Fr., *céréan.* Living in wax (a species name). [L, 41.]

CEREASTREÆ (Lat.), n. f. pl. Se(ka)-re2-a2s(a3s)'tre2-e(a3-e2). Fr., *céréastrées.* 1. Of Salmi-Dyck, a tribe of the *Cacteæ*, comprising *Pilocereus*, *Echinopsis*, and *Cereus*; by Reichenbach made to include *Echinopsis* and *Cephalocereus.* [B, 170.]

CEREBEL, n. Se2r'e2-be2l. See CEREBELLUM.

CEREBELLA (Lat.), n. f. Se2r(ke2r)-e2-be2l'la3. Of Rabenhorst, a genus of *Fungi.* [B, 61, 121.]—**C. andropogonis.** A species discovered by Cesati, infesting the glumes of *Andropogon* in Italy. [B, 61.]—**C. urina.** Of Paracelsus, milky urine with froth adhering to the vessel, by which it was imagined that diseases of the brain could be diagnosticated. [A, 325.]

CEREBELLAR, CEREBELLIC, adj's. Se2r-e2-be2l'a3r, -i2k. Lat., *cerebellosus.* Fr., *cérébelleux.* Relating to the cerebellum. [L, 14, 41.]

CEREBELLITIS (Lat.), n. f. Se2r(ke2r)-e2-be2l-li(le)'ti2s. Gen., *cerebellit'idis.* Fr., *cérébellite.* Inflammation of the cerebellum. [L, 41.]

CEREBELLOCORTEX [Wilder] (Lat.), n. m. Se2r(ke2r)-e2-be2l''lo(lo2)-ko2rt'e2x. Gen., *cerebellocort'icis.* The cortex of the cerebellum. [I, 80; K.]

CEREBELLOUS, adj. Se2r-e2-be2l'u3s. See CEREBELLAR.

CEREBELLUM (Lat.), n. n. Se2r(ke2r)-e2-be2l'lu3m(lu4m). Dim. of *cerebrum*, the brain. Gr., ἐγκέφαλος ὀπισθίδιος, παρεγκεφαλίς. Fr., *cervelet.* Ger., *Kleinhirn, kleines Hirn, Hirnlein.* It., *cervelletto.* Sp., *cerebelo.* The little brain or hinder brain; that portion of the encephalon which occupies the posterior fossa of the skull. It is a symmetrical, cordiform mass distinct from the cerebrum proper, from which it is separated by a process of the dura mater (the tentorium). Its two hemispheres are united by a median process (the vermis), and are divided into peculiar involuted laminæ, certain groups of which have received special names as separate lobes. It is connected with the medulla oblongata, pons Varolii, and cerebrum by bands of white fibres (peduncles). In structure it consists of a central nucleus of gray matter (the corpus dentatum or ganglion of the c.), imbedded in a mass of white substance; exteriorly, of white and gray laminæ arranged in convoluted or arborescent form. Its function is not fully understood, no uniform disturbances presenting themselves when it is diseased. From the effects of experimental irritation, it seems to be connected with the co-ordination of muscular movements, including those of the eyes, and perhaps with the functions of the stomach and intestines. It reaches its greatest development in man. [K; L, 115, 149; *a*, 17.]—**C'gebiet** (Ger.). The region of the c., including the underlying portion of the medulla oblongata in the embryo. [I.]

CEREBER, n. Se2r'e2-bu5r. See CEREBRUM.

CEREBRAL, adj. Se2r'e2-bra2l. Lat., *cerebralis.* Fr., *cérébral.* Ger., *c.* It., *cerebrale.* Sp., *c.* Pertaining to the cerebrum; in familiar language, pertaining to the brain in general.—**C'wärts** (Ger.). Toward the cerebrum. [Schwalbe (I, 17; K).] Cf. CEPHALAD.

CEREBRALIA (Lat.), n., n. pl. of adj. *cerebralis* (*remedia* understood). Se^{2}r(ke^{2}r)-e^2-bra(bra^3)′li^2-a^3. Agents that act upon the brain. [B, 270.]

CEREBRALIS (Lat.), adj. Se^{2}r(ke^{2}r)-e^2-bra(bra^3)′li^{2}s. See CEREBRAL.

CEREBRASTHENIA (Lat.), n. f. Se^{2}r(ke^{2}r)-e^2-bra^{2}s(bra^{3}s)-the^{2}n-i(e)′a^3. For deriv., see CEREBRUM and ASTHENIA. Ger., *Cerebrasthenie.* Cerebral weakness due to general weakness of the nervous system. [H. Averbeck, "Dtsch. Med.-Ztg.," Apr. 5, 1886, p. 301.]

CEREBRASTHENIC, adj. Se^{2}r-e^2-bra^{2}s-the^{2}n′i^{2}k. Pertaining to cerebral asthenia. [C. H. Hughes, "Alien. and Neurol.," Oct., 1885.]

CEREBRATE, n. Se^{2}r′e^2-brat. Fr., *cérébrate.* A supposed salt of so-called cerebric acid. [A, 385.]

CEREBRATION, n. Se^{2}r-e^2-bra′shu^{3}n. Fr., *cérébration.* Of G. H. Lewes, a mental act consequent on a perception. [A, 385; K.]—**Unconscious c.** Automatic mental action. [K.]

CÉRÉBRÉ (Fr.), adj. Sa-ra-bra. Provided with a cerebrum. [A, 385.]

CÉRÉBREUX (Fr.), adj. Sa-ra-bru^6. Syn.: *capiteux.* Heady (said of wines, etc.). [L, 109.]

CEREBRIA [Pinel] (Lat.), n. f. Se^{2}r(ke^{2}r)-eb(e^{2}b)′ri^2-a^3. Fr., *cérébrie.* Ger., *Geistesstörung* (1st def.). 1. Insanity, mania. [A, 322, 385.] 2. Of C. Elam, "a spontaneous acute general inflammation of the substance of the brain uncomplicated with meningitis." [D.]—**C. acuta** [Pinel]. Furious mania; a severe irritation or inflammation of the brain. [A, 322.]—**C. chronica** [Pinel]. Dementia, imbecility, idiocy. [A, 322.]—**C. partialis** [Pinel]. Monomania. [A, 322.]—**C. sympathica** [Pinel]. Hypochondriasis, hysteria. [A, 322.]

CEREBRIC, adj. Se^{2}r-e^{2}b′ri^{2}k. See CEREBRAL.—**C. acid.** Fr., *acide cérébrique.* Ger., *Gehirnsäure.* Of Vauquelin and Frémy, impure cerebrin. [A, 385; K.]

CEREBRIFORM, adj. Se^{2}r-e^{2}b′ri^2-fo^{2}rm. Lat., *cerebriformis* (from *cerebrum* [*q. v.*], and *forma*, form). Fr., *cérébriforme.* See ENCEPHALOID.

CEREBRIN, n. Se^{2}r′e^{2}b-ri^{2}n. Lat., *cerebrinum, cerebrina, cerebrine.* Fr., *cérébrine.* Ger., *C.* It., Sp., *cerebrina.* A substance obtained, along with homocerebrin and encephalin, from brain tissue by boiling with a saturated solution of baryta, washing the precipitate with water, and again boiling with absolute alcohol; a snow-white microcrystalline powder melting without decomposition, burning with a luminous flame, and dissolving in boiling alcohol, in chloroform, in benzene, and in glacial acetic acid. The formula $C_{17}H_{33}NO_3$ has been doubtfully assigned to it. Mineral acids convert it into cetylide. It forms the essential constituent (9·5 per cent.) of white nervous tissue. Some consider it as not a true proximate principle, but an artificial derivative of protagon. [Parkus, "Jour. f. prakt. Chem.," n. F., xxiv, p. 310 (B); B, 108; "Ann. d. Chem. u. Pharm.," cv, p. 361 (K).]—**C'säure** (Ger.). See CEREBRIC *acid.*

CÉRÉBRIN (Fr.), adj. Sa-ra-bra^{2}n^2. See CEREBRAL.

CEREBRITIS (Lat.), n. f. Se^{2}r(ke^{2}r)-e^{2}b-ri(re)′ti^{2}s. Gen., *cerebrit′idis.* Fr., *cérébrite.* See ENCEPHALITIS.—**Local c.** Softening of the brain. [D, 1.]

CEREBRO-CARDIAC, adj. Se^{2}r″e^{2}b-ro-ka^{3}rd′i^2-a^{2}k. From *cerebrum*, the brain, and καρδία the heart. Fr., *cérébro-cardiaque.* Pertaining to the brain and to the heart (said of diseases in which there are both cerebral and cardiac symptoms [see *C.-c.* NEUROPATHY]).

CEREBROID, adj. Se^{2}r′e^{2}b-roid. Fr., *cérébroïde.* See ENCEPHALOID.

CEREBROL, n. Se^{2}r′e^{2}b-ro^{2}l. From *cerebrum*, the brain, and *oleum*, oil. A reddish oily liquid of an odor "like that of fresh brain" and a disagreeable rancid taste, obtained from cerebral tissue. [B, 118.]

CEREBROLOGY, n. Se^{2}r-e^2-bro^{2}l′o-ji^2. From *cerebrum*, the brain, and λόγος, understanding. Fr., *cérébrologie.* See ENCEPHALOLOGY.

CÉRÉBROME [Hayem] (Fr.), n. Sa-ra-brom. A growth consisting of cerebral matter situated outside the cranial cavity. ["Semaine méd.," Dec. 26, 1888, p. 487 (*a*, 18).]

CEREBRO-OLEIN, n. Se^{2}r″e^2-bro ol′e^2-i^{2}n. For deriv., see CEREBRUM and OLEIN. Fr., *cérébro-oléine.* A yellow oily liquid obtained from brain tissue; olein associated with lecithin. [A, 301, 385.]

CEREBROPATHY, n. Se^{2}r-e^{2}b-ro^{2}p′a^{2}th′i^2. Lat., *cerebropathia* (from *cerebrum*, the brain, and πάθος, disease). Fr., *cérébropathie.* Ger., *Cerebropathie.* See ENCEPHALOPATHY.—**Psychic c.** [Schüle]. Fr., *cérébropathie psychique.* Ger., *psychische Cerebropathie.* A mental disorder following a primary lesion of the brain or the spinal cord, not belonging among the regular phenomena of the latter, but presenting distinct symptoms of its own. [B, 108.]—**Syphilitic c.** Fr., *cérébropathie syphilitique.* Ger., *syphilitische Cerebropathie.* A psychic c. dependent on syphilis. [B, 108.]—**Tabetic c.** Fr., *cérébropathie tabétique.* Ger., *tabetische Cerebropathie.* A psychic c. dependent on tabes dorsalis. [B, 108.]

CEREBRO-PEDAL, adj. Se^{2}r″e^{2}b-ro-ped′a^{2}l. From *cerebrum* (*q. v.*), and *pes*, the foot. Pertaining to the cephalic and pedal regions (said of ganglia in certain *Mollusca*). [L, 11, 121, 210.]

CEREBRO-PLEUROVISCERAL, adj. Se^{2}r″e^{2}b-ro-plu^{2}r″-o-vi^{2}s′e^{2}r-a^{2}l. From *cerebrum* (*q. v.*), πλευρά, the side, and *viscus* (*q. v.*). Pertaining to the side of the cephalic and visceral regions (said of a ganglion in certain *Mollusca*). [L, 121, 322.]

CEREBROPSYCHOSIS (Lat.), n. f. Se^{2}r(ke^{2}r)″e^{2}b-ro(ro^2)-si-(psu^6)-ko(ch^{2}o)′si^{2}s. Gen., *cerebropsycho′seos* (*-is*). For deriv., see CEREBRUM and PSYCHOSIS. Fr., *cérébro-psychose.* Ger., *Cerebropsychose.* A mental disorder which, as distinguished from the psychoneuroses and the psychic cerebropathies, is immediately dependent on disease of the psychic portion of the brain, but tends either to become more intense than is usually observed in such disease or to become associated with symptoms denoting the implication of non-psychic centres. [Schüle (A, 319).]

CEREBRO-RHACHIDIAN, CEREBRORRHACHIDIAN, adj's. Se^{2}r″e^2-bro-ra^{2}k-i^{2}d′i^2-an, -bro^{2}r-a^{2}k-i^{2}d′i^2-a^{2}n. From *cerebrum*, the brain, and ῥαχίς, the spinal column. Fr., *cérébro-rhachidien.* See CEREBRO-SPINAL.

CEREBRORRHACHIOMENINGITIS (Lat.), n. f. Se^{2}r-(ke^{2}r)‴e^2-bro^{2}r-ra^{2}k(ra^{3}ch^2)″i^2-o(o^2)-me^{2}n(man)-i^{2}n(i^{2}n^2)-ji(ge)′ti^{2}s. Gen., *cerebrorrhachiomeningit′idis.* From *cerebrum*, the brain, ῥαχίς, the spinal column, and μῆνιγξ, a membrane (see also *-itis**). See *Cerebro-spinal* MENINGITIS.

CEREBROSCLEROSIS (Lat.), n. f. Se^{2}r(ke^{2}r)″e^2-bro(bro^2)-skle^{2}r(sklar)-o′si^{2}s. Gen., *cerebroscleros′eos* (*-is*). From *cerebrum*, the brain, and σκληροῦν, to harden. Fr., *cérébrosclérose.* Ger., *Gehirnsclerose.* Induration of the brain. [A, 301.]

CEREBROSCOPY, n. Se^{2}r-e^2-bro^{2}s′kop-i^2. From *cerebrum*, the brain, and σκοπεῖν, to examine. Fr., *cérébroscopie.* 1. See ENCEPHALOSCOPY. 2. Of Bouchut, the use of the ophthalmoscope to ascertain the condition of the cranial contents. [L.]

CEREBROSE, n. Se^{2}r′e^2-bros. Fr., *cérébrose.* Ger., *C.* A variety of sugar, $C_6H_{12}O_6$, existing to the extent of from 1 to 3 per cent. in cerebral tissue, combined with neurostearic acid and sphingoine. It is dextrorotary and reduces Fehling's solution. [Thudichum, "Brit. Med. Jour.," Sept. 15, 1883, p. 524 (B).]

CEREBROSIDE, n. Se^{2}r′e^2-bros-i^{2}d(id). A proximate principle of the cerebral tissue. [B.]

CEREBROSIS (Lat.), n. f. Se^{2}r(ke^{2}r)-e^2-bro′si^{2}s. Gen., *cerebros′eos* (*-is*). Ger., *Hirnwuth.* Frenzy, mania. [A, 322.]

CEREBRO-SPINAL, adj. Se^{2}r″e^2-bro-spi′na^{2}l. Lat., *cerebrospinalis* (from *cerebrum*, the brain, and *spina*, the vertebral column). Fr., *cérébro-spinal.* Ger., *c.-s.* It., *cerebro-spinale.* Sp., *cerebro-espinal.* Pertaining to both the brain and the spinal cord; as a n., an agent that acts upon the brain and the spinal cord. [A, 385; B, 270.]

CEREBRO-SPINANT, n. Se^{2}r″e^2-bro-spi′na^{2}nt. See CEREBRO-SPINAL (2d def.).

CEREBROSUS (Lat.), adj. Se^{2}r(ke^{2}r)-e^2-bros′u^{3}s(u^{4}s). Hot-brained; mad. [B, 114.]

CEREBROTE [Couërbe], n. Se^{2}r′e^2-brot. Lat., *cerebrotum.* Fr., *cérébrote.* Ger., *Cerebrot.* A fatty principle found in the brain; a white, tasteless, inodorous powder resembling starch, insoluble in water, moderately soluble in alcohol and in ether, resembling an albuminoid in composition, containing nitrogen and a minute quantity of sulphur and phosphorus. [B, 118.]

CEREBROTOMY, n. Se^{2}r-e^2-bro^{2}t′o-mi^2. Lat., *cerebrotomia* (from *cerebrum*, the brain, and τέμνειν, to cut). Fr., *cérébrotomie.* See ENCEPHALOTOMY.

CEREBRUM (Lat.), n. n. Se^{2}r(ke^{2}r)′e^2-bru^{3}m(bru^{4}m). Fr., *cerveau.* Ger., *Gehirn* (1st def.), *Hirn* (1st def.), *Grosshirn* (2d def.). It., Sp., *cerebro.* 1. The brain as a whole. 2. The principal portion of the brain, including the hemispheres (with the third and lateral ventricles), occupying the vault of the cranium and the anterior and middle fossæ of its base, consisting of central white and cortical gray matter, with special collections of gray matter (ganglia); continuous posteriorly with the cerebellum and the medulla oblongata by a constricted portion called the isthmus. [I, 15; K; L, 115.] See also BRAIN, CENTRE, COMMISSURE, CONVOLUTION, FISSURE, GANGLION, HEMISPHERE, LOBE, and the names of other particular parts of the c. 3. Of the ancients, the pith in the upper part of plants. [B, 114.] 4. In alchemy, water. [B, 50.]—**C. abdominale.** The solar plexus. [L, 115.]—**C. arietis.** Ger., *Wasser von Eierklar.* The watery portion of white of egg. [B, 50.]—**C. bovis.** Tartarum combustum. [B, 50.]—**C. elongatum, C. longum, C. oblongum.** The spinal cord. [L, 349.]—**C. palmæ.** Ger., *Palmhirn.* Anciently, the brain-like edible head of the cabbage-palm. [B, 180.]—**C. parvum.** See CEREBELLUM.—**C. porci.** A boar's brain; formerly used in medicine. [B, 180.]—**C. posterius.** See CEREBELLUM.

CERECERO (Sp.), n. Thar-a-thar′o. In Spanish America, the *Prunus cerasus.* [B; *a*, 14.]—**C. de Cuba.** The *Malpighia punicifolia.* [B, 121.]

CERECILLO (Sp.), n. Thar-a-thel′yo. See GUINDILLO.—**C. de Europa.** The *Lonicera xylosteum.* [B, 121.]

CERECLOTH, n. Ser′klo^{2}th. From *cera*, wax. Cloth imbued with wax; used, when made antiseptic, as a dressing for wounds. [E. Lund (D, 87).]

CERECTOMY, n. Se^{2}r-e^{2}k′to-mi^2. See KERATECTOMY.

CERED, adj. Serd. Provided with a cere. [L, 221.]

CÉRÉE (Fr.), n. Sa-ra. See DENDROBIUM.

CEREFACTIO (Lat.), n. f. Se^{2}r(kar)-e^2-fa^{2}k(fa^{3}k)′shi^2(ti^2)-o. See CERATIO.

CEREFOLIUM (Lat.), n. n. Se^{2}r(kar)-e^2-fol(fo^{2}l)′i^2-u^{3}m(u^{4}m). More properly written *cærefolium.* Fr., *cerfeuil.* Ger., *Kerbel.* It., *cerefoglio.* Sp., *perifolio.* Port., *cerefolho.* See ANTHRISCUS.—**C. hispanicum.** The *Myrrhis* (*Scandix*) *odorata.* [B, 95, 180.] **C. officinarum** [Rupp.], **C. sativum** [Morison]. The *Anthriscus c.* [B, 173.]—**C. silvestre** [Riv.]. The *Anthriscus silvestris.* [B, 180.]—**Herba cerefolii.** 1. Of the Swed. Ph., see *Herba cerefolii hispanici.* 2. Of the Belg. Ph. (1st ed.) and of the older pharmacists, the herb of *Scandix* (*Anthriscus*) *c.* [B, 95, 180.]—**Herba cerefolii hispanici** [Finn. Ph.]. Syn.: *herba cerefolii* [Swed. Ph.]. The herb of *Myrrhis* (*Scandix*) *odorata*, collected, according to the Swed. Ph., before flowering. [B, 95, 180.]

CEREIDÆ (Lat.), n. f. pl Se^{2}r(kar)-e(e^2)'i^{2}d-e(a^3-e^2). Of Lindley, a tribe of the *Cactaceæ*, comprising *Cereus*, *Pilocereus*, and *Echinopsis*. [B, 170.] Cf. CEREASTREÆ.

CEREIFORM, adj. Se're-i^2-fo^{2}rm. Lat., *cereiformis* (from *cereus*, a wax taper, and *forma*, form). Fr., *céréiforme*. Ger., *wachskerzförmig*. Tapering like a wax candle; in botany, shaped like the *Cereus* (a species name). [B; L, 41, 116.]

CERELÆON (Lat.), **CERELÆUM** (Lat.), n's n. Se^{2}r(kar)-e^{2}l-e'(a^3'e^2)-o^{2}n, -u^{3}m(u^{4}m). Gr., κηρέλαιον (from κηρός, wax, and ἔλαιον, grease). Fr., *céréléon*. Ger., *Wachsöl* (2d def.). 1. A mixture of wax and oil, containing more wax than an ordinary cerate. 2. See *Oleum* CERÆ. [A, 301, 322, 325; B, 115.]

CEREMBROCHE (Lat.), n. f. Se^{2}r(kar)-e^{2}m'brok(bro^{2}ch^2)-e-(a). Gr., κηρεμβροχή (from κηρός, wax, and ἐμβροχή, an embrocation). A fomentation with molten wax. [Alexander of Tralles (B, 115).]

CÉRENCÉPHALOTE (Fr.), n. Sar-a^{3}n^2-sa-fa^{3}l-ot. From κηρός, wax, and ἐγκέφαλος, the brain. See CEPHALOTE.

CÉRÉOLÉ (Fr.), n. Sa-ra-o-la. See CERATE.

CEREOLUS (Lat.), adj. and n. m. Se^{2}r(kar)-e(e^2)'ol(o^{2}l)-u^{3}s-(u^{4}s). From *cera*, wax. Ger., *Wachskerze*. 1. (Adj.) wax-colored. 2. (N.) a conical-pointed cylinder made of linen saturated with yellow wax; designed for introduction into a canal. Cf. BOUGIE and CANDELA. 3. (N.) a section of the genus *Stereocaulon*. [B, 114, 121, 270.]—**Cereoli antiseptici.** Bougies made of wax and certain antiseptics (such as creasote and carbolic acid); to be inserted into sinuses, etc., with a fœtid discharge. [L, 57 (*a*, 21).]—**C. chirurgorum.** See BOUGIE.—**Cereoli compositi.** See *Cereoli medicati.* —**Cereoli demulcentes, Cereoli emollientes, Cereoli exploratorii.** See *Cereoli simplices.*—**Cereoli medicati.** Medicated wax bougies. [L, 57 (*a*, 21).]—**Cereoli mercuriales** [Frank. Ph., 1791]. Fr., *bougies mercurielles de Plenk.* Bougies made of 48 parts of yellow wax, 2 of mercurius dulcis (calomel), and 4 of extract of lead. [B, 119 (*a*, 21).]—**Cereoli nasales.** Nasal bougies made by dissolving 55 parts of white gelatin in 30 of glycerin and 20 of distilled water, adding 0·2 part of carbolic acid, and pouring the mixture into 15 glass or waxed-paper molds to solidify. ["Proc. of the Am. Pharm. Assoc.," xxviii, p. 71 (*a*, 21).]—**Cereoli plumbici, Cereoli saturnini.** A preparation, official in many old pharmacopœias, made by melting 24 parts of yellow wax over a slow fire, adding 1 part of lead, and forming the mass into bougies. The Schlesw. Holst. Ph., 1831, and the Swed. Ph., 1817, ordered 96 parts of yellow wax, 3 of spermaceti, and 2 of extract of lead. [B. 119 (*a*, 21).]—**Cereoli simplices.** A preparation, official in many of the older pharmacopœias, made by dipping strips of linen in melted yellow wax and forming them into bougies. The Brunsw. Ph. directed 12 parts of yellow wax and 1 part each of goat's suet and expressed oil of sweet almonds. [B, 119 (*a*, 21).]

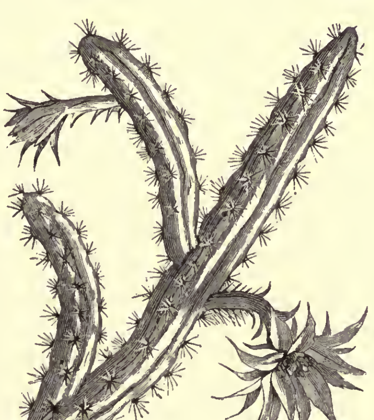
CEREOMETER, n. Se-re^2-o^{2}m'e^{2}t-u^{5}r. From κηρός, wax, and μέτρον, a measure. An instrument for determining the quality of wax, or the quantity contained in a given mixture, by a determination of the specific gravity. [B.]

CEREOUS, adj. Se're^2-u^{3}s. Gr., κήρινος. Lat., *cereus.* Fr., *céreux.* Waxen, made of wax. [A, 318.]

CÉRÉOXYLE (Fr.), n. Sa-ra-ox-el. See CEROXYLON.

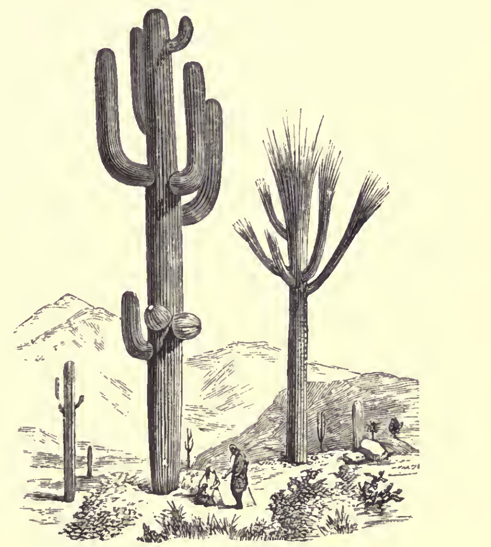
CERERE, n. The *Ægilops ovata.* [B, 121.]

CERES (Lat.), n. f. Se(ke^2)'rez(ras). Gen., *Cer'eris.* Gr., Δημήτηρ. The name of the Greek goddess of husbandry, used sometimes by metonymy for grain. [B.] Cf. CEREAL, CEREVISIA, and CERIUM.—**Liquor Cereris.** See BEER.



CERESE, n. The *Bignonia unguis-cati.* [B, 121.]

CERESIN, n. Se^{2}r'e^{2}s-i^{2}n. Lat., *ceresinum, ceresina.* Fr., *cérésine.* Ger., *C., Mineralwachs, Erdwachs.* A mineral wax made by treating ozokerite with sulphuric acid, decolorizing with charcoal, and filtering. It forms a hyaline mass resembling Japanese wax, and is employed as a substitute for beeswax. In the Ger. Ph. it is used as a synonym for paraffinum solidum. [B, 5, 205, 270.]



CÉRÉSOLES (Fr.), n. Sa-ra-zol. A place in Piémont, where there is a chalybeate spring. [L, 49.]

CÉRESTE (Fr.), n. Sa-re^{2}st. The *Cerastium.* [B, 38.]

CEREUS (Lat.), adj. and n. m. Se-(ka)'re^2-u^{3}s(u^{4}s). Gr., κήρινος (1st def.), λαμπάς (2d def.), λαμπάδιον (2d def.). Fr., *cierge* (3d def.). *céréus* (3d def.). Ger., *wachsartig* (1st def.). *Fackeldistel* (3d def.). 1. (Adj.) waxen, containing wax. [A; B, 119.] Cf. EMULSIO *cerea*, FLEXIBILITAS *cerea*, MORBUS *cereus*, and MEDICATUM *cereum.* 2. (N.) a wax taper. [A, 318.] 3. (N.) of De Candolle, a genus of cactaceous plants. [B, 42, 121.] —**C. americanus major articulatus**, etc. [Volk.]. See *C. grandiflorus.*—**C. americanus triangularis radicosus** [Bradl.]. See *C. triangularis.*—**C. Bonplandii.** See OPUNTIA *tuna.*—**C. compressus** [Miller]. See *C. triangularis.*—**C. divaricatus** [De Candolle]. Syn.: *Cactus divaricatus* [Lamarck]. An erect West Indian species with a 9-angled stem and bearing a sweetish acidulous fruit which is eaten. The acrid juice of the stem is used as a remedy for helminthiasis, etc. [B, 180, 214.]—**C. erectus altissimus surinamensis** [Herm.]. See *C. hexagonus.*—**C. erectus cristatus**, etc. [Plukenet]. A West Indian species, perhaps the *C. triangularis.* [B, 211.]—**C. erectus quadrangularis**, etc. [Boerhaave]. See *C. tetragonus.*—**C. fimbriatus** [De Candolle]. A species which, according to recent authors, is factitious, being compounded of the two species *C. grandispinus* and *C. serruliflorus.* [B, 180.]—**C. flagelliformis** [Miller]. Fr., *liane à vers, cierge queue de souris.* Ger., *Schlangenfackeldistel, geiselförmige Schlangenfackeldistel, Peitschenkaktus.* Sp., *junco* [Mex. Ph.], *junquillo, cuerno, floricuerno, flor del látigo, yerba de la alferecia* [Mex. Ph.]. Syn.: *Cactus flagelliformis* [Linnæus], *creeping c., snake cactus.* A creeping, slender, very branching species, with red flowers, indigenous to the West Indies and South America, and frequently cultivated. The juice is employed as an anthelminthic and externally as a rubefacient, and an infusion of the flowers as a prophylactic against convulsions. [B, 173, 180, 214, 224.]—**C. giganteus** [Engelmann]. A species, the *saguaro* of the Mexicans, growing in the deserts of New Mexico, having erect fluted stems from 50 to 60 feet high, and bearing light cream-colored flowers and greenish fruit with red juicy pulp. The fruit is eaten by the Indians, who also use the thick saccharine juice. [B, 19, 185, 288.]—**C. gracilis scandens ramosus**, etc. [Trew.], **C. grandiflorus** [Miller]. Fr., *fleur du Pérou.* Ger., *Königin der Nacht, grossblumige Schlangenfackeldistel.* Syn.: *Cactus grandiflorus* [Linnæus]. Night-blooming c.; a species indigenous to the West Indies and cultivated in North America and Europe, having a slender, trailing or climbing, curiously twining stem, and bearing very large white or straw-colored, fragrant flowers which bloom only during the night.

THE CEREUS FLAGELLIFORMIS. [A, 327.]

THE CEREUS GIGANTEUS. [A, 327.]

THE CEREUS GRANDIFLORUS. [A, 327.]

The acidulous orange-colored fruit is edible, and the acrid juice of the stem is used externally as a vesicant and counter-irritant in rheumatism, and internally as a remedy for dropsy and worms. [B, 180.]—**C. grandispinus** [Haworth]. Ger., *grossstachelige Schlangenfackeldistel.* Syn.: *Opuntia altissima cereiformis*, etc. [Plumier], *Cactus* [Linnæus] (seu *C.* [De Candolle]) *fimbriatus.* A West Indian species with very large thick spines. It is employed like *C. serruliflorus.* [B, 180.]—**C. hexagonus** [Haworth]. Syn.: *Cactus hexagonus* [Linnæus]. A species with erect six-sided stems growing in South America and Mexico. When young it is succulent, but when old it becomes woody, and is used for timber. [B, 185, 214.]—**C. jamacuru** [De Candolle]. The *jamacuru* of Pison; a Brazilian species the fruit of which is used like that of the *C. paniculatus.* [B, 180, 214.]—**C. laete virens** [Salm.]. The *C. variabilis.* [B, 180.]—**C. MacDonaldiæ, C. MacDonaldii** [Hooker]. A species indigenous to Honduras, with night-blooming white flowers which are often more than a foot in diameter. It has properties similar to those of the *C. grandiflorus.* [B, 19, 185, 270.]—**C. medicatus.** See CEREOLUS (2d def.) and CEREOLI *saturnini.*—**C. minima serpens americana** [Plukenet], **C. minimus scandens**, etc. [Boerhaave], **C. minor scandens**, etc. [Trew.]. The *C. flagelliformis.* [B, 211.]—**C. moniliformis** [De Candolle]. Ger., *perlschnurförmige Schlangenfackeldistel.* Syn.: *Cactus moniliformis* [Linnæus], *Melocactus ex plurimis globulis*, etc. [Plumier]. A prostrate, much-branched species, consisting of jointed spherical segments, growing upon the sea-shore in the West Indies. The crushed plant is used in the preparation of poultices and fomentations in inflammatory skin diseases and rheumatism, and the expressed juice is used for enemata. [B, 180, 214.]—**C. paniculatus** [De Candolle]. Ger., *rispige Schlangenfackeldistel.* Sp., *cardón cuadrangular.* Syn.: *Cactus paniculatus* [Lamarck], *Melocactus arborescens*, etc. [Plumier]. An arborescent species with erect 4-angled leaves and 4-angled branches, growing in the West Indies. The yellowish prickly fruit contains a white, acidulous, sweet pulp which is used in bilious and febrile disorders. [B, 180, 214.]—**C. pentagonus** [Linnæus]. Syn.: *Cactus pentagonus* [Linnæus]. A South American species with erect 5-angled stem, which becomes woody when the plant grows old. [B, 185, 214.]—**C. pitajaya** [De Candolle], **C. pitaya.** See *C. variabilis.*—**C. prismatiformis, C. quadrangularis.** Two varieties of the *C. variabilis.* [B, 180.]—**C. scandens** [Miller], **C. scandens minor**, etc. [Herm.]. See *C. grandiflorus.*—**C. scandens minor trigonus** [Herm., Boerhaave]. See *C. triangularis.*—**C. senilis** [Salm-Dyck]. Syn.: *Cactus* [Haworth] (seu *Pilocereus* [Lemaire]) *senilis.* Old-man cactus; a Mexican species with many-ridged cylindrical stem which is covered with long white hairs and contains much calcium oxalate, rendering it heavy and brittle. [B, 60, 185, 214.]—**C. sepium** [De Candolle]. Syn.: *Cactus sepium* [De Candolle]. A species growing near Quito, where it is called *pitahaya.* Its fruit is edible and is employed medicinally like that of the *C. paniculatus.* [B, 180, 214.]—**C. serruliflorus** [Haworth]. Syn.: *C. fimbriatus* [De Candolle], *Melocactus arborescens cereiformis et spinosissimus* [Plumier]. A West Indian species with erect 8- to 10-angled stem, upward of 18 feet in height, and bearing large rose-colored flowers and round fruit with red, acidulous pulp. The latter is employed as a refrigerant and refreshing drink in fevers. The acid juice of the stem is employed internally in abdominal engorgement and obstruction, and externally as a caustic application to warts and a topical remedy for skin disease. [B, 180.]—**C. speciosissimus** [Desfontaines]. Syn.: *Cactus speciosus* [Cavanilles] (seu *speciosissimus* [Bot. Reg.]). A species growing in Mexico and Central America, having very large and beautiful flowers. [B, 60, 121, 214.]—**C. surinamensis.** See *C. hexagonus.*—**C. tetragonus** [Haworth]. Syn.: *Cactus tetragonus* [Linnæus]. A South American species with erect 4-angled stem which becomes woody as the plant grows older. [B, 185, 214.]—**C. triangularis** [Haworth]. Ger., *dreieckige Schlangenfackeldistel.* Syn.: *Cactus triangularis* [Linnæus]. The prickly withe or strawberry pear. A species indigenous to the West Indies and Mexico, having an erect stem composed of oblong 3-angled segments and bearing very large white flowers which bloom at night and last till nearly noon on the following day. The fruit has a sweetish-red pulp which has a very good flavor and is employed as a refrigerant in febrile disorders. The crushed plant is employed in the preparation of resolvent and discutient poultices. [B, 180, 282.]—**C. trigonus** [Haworth]. Syn.: *Cactus triqueter β* [Haworth], (seu *triangularis foliosus* [Jacquin]). A West Indian species, employed like *C. triangularis.* [B, 180, 214.]—**C. undulosus** [De Candolle]. A variety of *C. variabilis.* [B, 180, 288.]—**C. variabilis** [De Candolle]. Sp., *pitahaya.* Syn.: *Cactus* [Jacquin] (seu *C.* [De Candolle]) *pitajaya.* A species growing in western Mexico. The fruit has an excellent taste and is much eaten in Mexico, although, when taken in large quantities, it is said to color the secretions of the body red. It is employed medicinally like the fruit of the *C. paniculatus.* [B, 180, 185, 288.]—**Creeping C.** The *C. flagelliformis.* [B, 185.]—**Night-blooming c., Night-flowering c.** See *C. grandiflorus.*—**Schlangenc'** (Ger.). The *C. flagelliformis.* [B, 180.]

CÉREUX (Fr.), adj. Sa-ru^5. Cerous. [B, 38.]

CEREVISIA (Lat.), n. f. Se^{2}r(ke^{2}r)-e^2-vi^{2}s(wes)'i^2-a^3. Gr., ζῦθος. Fr., *bière, cervoise.* Ger., *Bier.* It., *birra.* Sp., *cerveza.* Port., *cerveja.* Beer, ale; especially a medicated beer. For such medicated beers see under the names of the respective drugs. [B.] **C. abietica, C. abietina, C. abietis.** See SPRUCE *beer.*—**C. ad melancholiam.** A preparation made by boiling 4 handfuls of white horehound-leaves (folia marrubii albi) in from 4 to 6 gallons of fresh ale, and suspending in the cask a bag containing 2 oz. each of the root of *Smilax china* and peony-root, 1 oz. of the root of *Polypodium*, 3 oz. of sorrel-root (root of the *Rumex*), 10 drachms of horse-radish (*Armoracia*), 3 handfuls of hound's-tongue leaves (leaves of the *Scolopendrium officinarum*), 6 pinches of *Hypericum* tops, 4 oz. of ash-bark (bark of the *Fraxinus*), 1 oz.. each, of juniper-berries and carrot-seed, 4 oz. of tin filings, and 1 lb. of iron-rust. [B, 117.]—**C. amara** [Belg. Ph.]. Fr., *bière amère.* Ger., *bitteres Bier.* It., *birra amara.* Sp., *cereza amarga.* Bitter beer; a filtered infusion of 4 parts of wormwood and 10 of pine buds in 1,000 of beer [Belg. Ph.]. The name was also formerly applied to a medicated beer containing the *Erythræa centaurium* and to a preparation, also called *bitter stomachic ale*, made by steeping 4 oz. each of gentian and of fresh lemon-peel and 1 oz. of long pepper in a gallon of ale. [B, 59, 95, 119.] Cf. *C. antiscorbutica* and *Stomachic* BEER.—**C. anticolica.** See SULPHURIC *acid beer.*—**C. antiscorbutica** [Belg. Ph., Fr. Cod.]. Fr., *bière* (ou *brutolé*) *antiscorbutique* [Fr. Cod.], *sapinette.* Antiscorbutic beer (or ale); made by infusing 30 [Fr. Cod.] or 32 [Belg. Ph.] parts each of fresh scurvy-grass (*Cochlearia*) leaves and dried pine-buds and 60 [Fr. Cod.] or 64 [Belg. Ph.] parts of fresh horse-radish root in 2,000 of beer, and filtering. [B, 95.] The same name was given to a preparation formerly official, made by fermenting a mixture of 8 parts of horse-radish, 6 of juniper-berries, 2 each of sweet-flag rhizome and pine buds, of a little ginger, 12 parts of syrup of brown sugar, and 240 of beer, and, after decantation and filtration, adding 1 part of cream of tartar and 10 parts of a 14-per-cent. alcoholic tincture of mustard. [B, 199.] A still older preparation was made of 7 handfuls of scurvy-grass leaves, 1 oz. of guaiac-wood shavings, 2 oz. of coriander seed, and ½ oz. of senna-leaves, steeped in ale. [B, 59.]—**C. Brunsvicensis.** Brunswick beer; mentioned by Sydenham in some of his prescriptions. [B, 90.]—**Cerevisiæ fermentum.** See under FERMENTUM.—**C. fortis.** Fr., *bière forte.* Ger., *starkes Bier.* It., *birra forte.* Sp., *cerveza fuerta.* Port., *cerveja forte.* See *Strong* BEER.—**C. lupulata.** Hopped beer. [B, 119.] See BEER.—**Cerevisiæ medicatæ.** Fr., *bières médicinales.* Sp., *cervezas medicinales* [Mex. Ph.]. A beer or ale containing medicinal ingredients. [B.]—**C. melanagoga.** A preparation made by boiling ½ lb. each of black hellebore-roots and the radix hermodactyli, and 8 oz. of jalap in from 24 to 28 gallons of ale, and adding 2 lbs. of senna, 6 oz. of rhubarb, 4 oz. of white tartar, 6 oz. of coriander, 4 oz. each of licorice and iron filings, and 4 handfuls of leaves of scurvy-grass (*Cochlearia*), and then fermenting with yeast. [B, 117.]—**C. stomachica.** See *Stomachic* BEER.—**C. tenuis.** See *Small* BEER.—**C. zingiberata.** See GINGER *beer.*—**Cryptococcus cerevisiæ, Torula cerevisiæ.** See under TORULA.

CEREZA (Sp.), n. Tha-ra'th^{2}a^3. A cherry. [B, 121.]

CERF (Fr.), n. Se^{2}r. A stag or deer. [B.] See CERVUS.—**C. commun.** The *Cervus elaphus.* [B.]—**C. daim.** See CERVUS *dama.*—**C. volant.** The *Lucanus.* [B, 93.]—**Corne de c.** [Fr. Cod.]. See HARTSHORN and CORNU CERVI.—**Eau de cornichons de c.** See *Aqua e typhis* CERVI.—**Esprit de corne de c.** See *Spiritus* CORNU CERVI.—**Esprit de corne de c. purifié.** See *Spiritus* CORNU CERVI *depuratus.*—**Liqueur de corne de c. succinée blanche.** See *Liquor* CORNU CERVI *succinatus albus.*—**Liqueur de corne de c. térébinthinée.** See *Liquor* CORNU CERVI *terebinthinatus.*—**Os de cœur de c.** See *Ossa de corde* CERVI.—**Sel de corne de c.** See *Sal* CORNU CERVI *depuratum.*

CERFEUIL (Fr.), n. Se^{2}r-fu^{5}l-y'. The genus *Scandix* or *Anthriscus*; especially the chervil (*Anthriscus cerefolium*). [B, 121, 173.]—**C. à aiguillettes.** The *Scandix pecten.* [B, 19, 38.]—**C. anisé.** The *Myrrhis odorata.* [B, 121, 173.]—**C. bâtard.** The *Chærophyllum temulum.* [B, 121.]—**C. bulbeux.** The *Chærophyllum bulbosum.* [B, 121.]—**C. commun, C. cultivé.** The *Anthriscus cerefolium.* [B, 121, 173.]—**C. des bois.** See *C. bâtard.*—**C. des fous.** The *Anthriscus vulgaris.* [B, 121.]—**C. d'Espagne.** See *C. anisé.*—**C. frisé.** A variety of the *Anthriscus cerefolium.* [B, 121.]—**C. musqué.** The *Myrrhis odorata.* [B, 121, 173.]—**C. peigne de Venus.** The *Scandix pecten.* [B, 46.]—**C. sauvage.** 1. The *Geranium Robertianum.* 2. The *Anthriscus silvestris.* [B, 93, 121.]

CERFEUILLÈRE (Fr.), **CERFOGLIA** (It.), n's. Se^{2}r-fu^5-el-ye^{2}r, che^{2}r-fol'yi^2-a^3. The *Anthriscus cerefolium.* [B, 38, 88.]

CERGUACOS (Sp.), n. The^{2}r-gwa^3'kos. The *Cistus salviæfolius.* [B, 121.]

CERIA (Lat.), n. f. Se(ka)'ri^2-a^3. 1. See CELIA. 2. See CEREVISIA. 3. A sort of flat worm found in the intestines. [B, 114, 200.]

CERIA-CUSPIA, n. The *Sempervivum tectorum.* [B, 88, 121.]

CERIANTHIDÆ [Verrill] (Lat.), n. f. pl. Se(ka)-ri^2-a^{2}n(a^{3}n)'-thi^{2}d-e(a^2-e^2). A family of the *Actinacea.* [L, 224.]

CERIC, adj. Se'ri^{2}k. Lat., *ciricus, cericus.* Fr., *cérique.* It., *cerico.* Sp., *cérico.* 1. Of or pertaining to wax. 2. Containing cerium as a quadrivalent radicle. [B.]—**C. acid.** Lat., *Acidum cericum* (seu *ciricum*). Fr., *acide cérique.* It., *acido cerico.* Sp., *ácido cérico.* A name given to an acid substance which was probably impure cerotic acid. [B, 93.]—**C. oxide.** Fr., *oxyde cérique.* Ger., *Ceroxyd.* It., *ossido cerico.* Sp., *óxido cérico.* See CERIUM *dioxide.*

CERICO-POTASSIC, adj. Se''ri^{2}k-o-po^{2}t-a^{2}s'i^{2}k. Lat., *cerico-potassicus.* Fr., *cérico-potassique.* Containing cerium (as a quadrivalent radicle) and potassium. [B, 132.]

CÉRIDES [Ampère] (Fr.), n. pl. Sa-red. A group of elements, comprising cerium and manganese. [A, 301.]

CÉRIÉ, CÉRIÉIS, n's. Languedoc names for the cherry-tree. [B, 121.]

CERIFEROUS, adj. Se-ri^{2}f'e^{2}r-u^{3}s. Lat., *ceriferus* (from *cera*, wax, and *ferre*, to bear). Fr., *cérifère.* Ger., *wachstragend.* Producing wax. [L, 41, 56, 180.]

CERIFICATIO (Lat.), n. f. Se(ka)-ri^2-fi^2-ka(ka^3)'shi^2(ti^2)-o. Gen., *cerificatio'nis.* See CERATIO.

CERIGEROUS, adj. Ser-i^{2}j'e^{2}r-u^{3}s. Lat., *cerigerus* (from *cera* (see CERE), and *gerere*, to bear. Fr., *cérigère.* Ger., *wachshauttragend.* Furnished with a cere (said of a bird's beak). [L, 41.]

CERIN, n. Ser′i^{2}n. Lat., *cerinum, cerina, cerine.* Fr., *cérine.* Ger., *C., Korkwachs* (2d def.). It., Sp., *cerina.* 1. Of John (1812), see CEROTIC ACID. 2. Of Chevreul, a substance, occurring as small, translucent, acicular crystals, precipitated by cooling from the liquid obtained by treating an aqueous extract of cork with hot alcohol. [B, 93, 270.]

CERINIC, adj. Ser-i^{2}n′i^{2}k. Fr., *cérinique.* See CERIC.

CERINOUS, adj. Ser′i^{2}n-u^{3}s. See CERINUS.

CERINTA, n. In the Alps, the *Pinus picea.* [B, 121.]

CERINTHA (Lat.), **CERINTHE** (Lat.), n's f. Se(ka)-ri^{2}nth′-a^3, -e(a). Gr., κηρίνθη. Fr., *cérinthe.* 1. Of the ancients, a plant of which bees make wax; the *C. major.* 2. Of Linnæus, the honey-wort, a genus of boraginaceous plants, of the tribe *Borageæ.* 3. Bee-bread. See CERINTHON. [B, 42, 114, 180.]—**C. aspera.** Rough-leaved honey-wort; a species to which astringent properties are attributed. [B, 93.]—**C. echioides** [Linnæus]. The *Onosma echioides.* [B, 214.]—**C. major** [Linnæus]. Ger., *Wachsblume.* Honey-wort, wax-plant; a European species frequently cultivated; it is about a foot in height and bears a raceme of purplish flowers, which secrete much honey, and dotted leaves covered with a wax-like bloom. It is considered astringent and is used in ophthalmic affections. [B, 19, 88, 200.]—**C. minor** [Linnæus]. A European species often cultivated. It bears yellow flowers smaller than those of the *C. major*, and, like it, secretes an abundance of honey. [B, 19.]

CERINTHEÆ (Lat.), n. f. pl. Se(ka)-ri^{2}nth′e^2-e(a^3-e^2). Fr., *cérinthées.* Of Dumortier and De Candolle, a tribe or subtribe of the *Boragineæ*, consisting of the single genus *Cerinthe.* [B, 170, 214.]

CERINTHOIDES [Boerhaave] (Lat.), n. f. Se(ka)-ri^{2}nth-o(o^2)-i(e)′dez(das). From κηρίνθη (see CERINTHE), and εἶδος, resemblance. The *Mertensia* [Roth]. [B, 121, 200.]

CERINTHON (Lat.), n. n. Se(ka)-ri^{2}nth′o^{2}n. Gr., κήρινθον. 1. Bee-bread. 2. A sort of ulcer. [B, 115.]

CERINTHUS (Lat.), n. m. Se(ka)-ri^{2}nth′u^{3}s(u^{4}s). Gr., κήρινθος. Bee-bread. [B, 114.]

CERINUM (Lat.), n. n. Se(ka)-ri(re)′nu^{3}m(nu^{4}m). See CERIN.

CERINUS (Lat.), adj. Se(ka)′ri^{2}n-u^{3}s(u^{4}s). Gr., κήρινος. Fr., *jaune de cire.* Ger., *wachsgelb.* Waxen, especially in botany, waxen-yellow; dark-yellow with a light admixture of reddish-brown. [B, 115, 198.]

CERIO (Lat.), n. f. Se(ka)′ri^2-o. Gen., *cerion′is.* Fr., *cérion* [Mirbel]. 1. Syn.: *cerium.* A term equivalent to caryopsis in its strict sense (*i. e.*, to the caryopsis of the *Gramineæ*). [B, 198.] 2. See KERION.

CERION (Lat.), n. n. Se(ka)′ri^2-o^{2}n. Gr., κηρίον. Fr., *cérion.* 1. A honey-comb. 2. See KERION. [B, 115.]

CERIOPORIDÆ (Lat.), n. f. pl. Se(ka)-ri^2-o(o^2)-po^{2}r′i^{2}d-e(a^3-e^2). A family of the *Polyzoa.* [L, 73.]

CERIORCHIDEÆ (Lat.), n. f. pl. Se(ka)-ri^2-o^{2}rk(o^{2}rch^2)-i^{2}d′-e^2-e(a^3-e^2). Of Reichenbach, a subtribe of the *Orchideæ*, comprising the divisions *Ophrydeæ, Malaxideæ*, and *Epidendreæ.* [B, 170.]

CÉRIQUE (Fr.), adj. Sa-rek. See CERIC.

CERIROSTRIS (Lat.), adj. Se(ka)-ri^2-ro^{2}s′tri^{2}s. From *cera* (see CERE), and *rostrum*, a beak. Fr., *cérirostre.* Ger., *wachshautschnabelig.* Sp., *cerirostro.* Having the beak furnished with a cere. [L, 180.]

CERISALZ (Ger.), n. Tsa′re-za^{3}ltz. A ceric salt. [B, 270.] See CERIUM.

CERISCUS (Lat.), n. m. Se^{2}r(kar)-i^{2}s′ku^{3}s(ku^{4}s). Of Gärtner, a genus which by Bentham and Hooker is made a section of *Randia.* [B, 42.]—**C. malabaricus** [Gärtner]. The *Gardenia* (*Randia*) *dumetorum.* [B, 173.]

CERISE (Fr.), n. Se^{2}r-ez. 1. A cherry; the fruit of *Prunus cerasus* (official in the Fr. Codex). [B, 113.] 2. In hippiatry, a reddish excrescence on the sole of a horse's foot when there is a wound in the foot. [L, 41.]—**C. aigre.** The *Prunus cerasus.* [B, 106.]—**C. de capitaine.** The fruit of *Malpighia urens.* [B, 121.]—**C. de Cayenne.** The fruit of *Eugenia Michelii* (*uniflora*). [B, 121, 173.]—**C. de Cythère.** The fruit of *Averrhoa acida* (*Cicca disticha*). [B, 173.]—**C. de Juif.** The fruit of *Physalis alkekengi.* [B, 173.]—**C. de l'Inde.** See *C. de Cythère.*—**C. de Mahon.** See *C. de Juif.*—**C. des Antilles.** The fruit of *Malpighia punicifolia.* [B, 173.]—**C. des îles.** See *C. de Cythère.*—**C. d'hiver.** See *C. de Juif* and *C. de Cythère.*—**C. d'Inde.** See *C. de Cythère.*—**C. d'ours.** The fruit of *Arctostaphylos uva-ursi.* [B, 121.]—**C. du Mexique.** The fruit of *Prunus capuli.* [B, 88.]—**C. du Sénégal.** The fruit of *Sapindus senegalensis.* [B, 173.]—**C. gommeuse.** The fruit of *Sapindus saponaria.* [B, 173.]—**Laurier-c.** See PRUNUS *lauro-cerasus.*—**Limonade à la c.** [Fr. Cod.]. Cherry lemonade. A preparation made by mixing 1 part of *sirop de c.* [Fr. Cod.] with 9 parts of distilled water. [B, 113.]—**Queue de c.** [Fr. Cod.]. Cherry stalk; the peduncle of the fruit of *Prunus caproniana.* [B, 113.]—**Sirop de c.** A preparation made of 1 part of filtered juice of cherries and a sufficient quantity of white sugar. [B, 113.] See *Syrupus* CERASORUM, under CERASUM.—**Suc de c.** [Fr. Cod.]. Lat., *succus e fructu cerasi* [Fr. Cod.]. Cherry juice; made by taking 10 parts of sour red cherries and 1 part of black cherries, expressing and mixing the two juices, and allowing them to ferment until they are clear. [B, 113 (*a*, 21).]

CERISETTE (Fr.), n. Se^{2}r-ez-e^{2}t. The *Solanum pseudo-capsicum.* [B, 19, 121.]
